CONTENTS

All possible care is taken to check the information given in this volume. But the publishers cannot take responsibility for chance errors or omissions. Authoritative corrections will be gratefully received.

There is in some cases a discrepancy between the figures from the Central and a State Government relating to the same subject. This is generally pointed out in a foot-note.

At the end of the Index we have recorded some last minute changes in administrative personnel and other items: p. 1304.

On an auspicious day in 1859 Edwin L. Drake began drilling the first oil well in the world at Titusville, Pennsylvania, U. S. A.

Seven years after completion of the first oil well in the world explorers in Assam bored a well at Nahor Pung. It was 102 feet deep — 33 feet deeper than the Titusville well.

Deep drilling is a feature of the Assam Oil Industry today. The deepest well drilled so far by the AOC drillers is Well No. 1 at Moran, 13,739 feet, more than two and a half miles deep.

With the development of oil technique, drilling speed has also increased. The first well at Digboi, drilled in 1889 to a depth of 662 feet took 14 months to complete. Whereas a recent well at Nahorkatiya, depth 10,337 feet, was completed within a month.

Assam Oil is keeping pace with the latest developments of the world oil industry.

a NEW antibiotic?

The mold culture shown here has been isolated from a soil sample, one of many hundred thousand collected by Pfizer from all over the world. Will this mold produce an important new antibiotic, or one we already know? Further research must provide the answer. On the ever present possibility of a new discovery—realized perhaps but one time in a million tries—will be based the most exhaustive tests. Pfizer's painstaking research in the field of antibiotics has led to the discovery of many new compounds and many new principles that have made the physician's task easier and the patient's load lighter. The Pfizer seal is a guarantee of high quality and dependability.

Available:

Combiotic® — Cortril® — Cotlanzin® — Deltacortril® — Dihydrostreptomycin® — Penicillin® — Pronopen® — Streptohydrazid® — Synermycin® — Terramycin® — Terramycin® SF† — Tetracycline® — Tetracycline® SF† — Viocin®

GWALIOR - INDIA

Established mainly to organise and effect exports from and imports into India, the S.T.C. has sought to specialize in link arrangements, linking import of essential items with exports of Indian goods. Import of textile machinery and rice against export of Indian goods has been successfully effected in the past. General arrangement for sale & purchase of goods on similar link basis with countries of the world is negotiated to promote Indian trade and the business methods have been so devised as to afford to business organisations in the country, reasonable opportunities for participation in linked transactions. Among various items S.T.C. is exporting some are—Iron Ore, Manganese Ore, Chrome Ore, Handicrafts, Tea, Coffee, Coir, Cardamoms, Jute, Shoes, Salt and other products and is importing—Caustic Soda & Soda Ash, Raw Silk, Textile Machinery, Chemicals and other essential commodities.

PHYSIOGRAPHY

GEOGRAPHICALLY the mass of land today called India consists of the territories contained in the Union of India and the Portuguese possessions of Goa, Daman and Diu.

The State of Pondicherry, Karikal, Mahe and Yanam (formerly French) is a *de facto* but not *de jure* part of India, though a treaty for a *de jure* transfer has been signed. This treaty awaits ratification by the Governments of India and France.

STATES, TERRITORIES

The country is divided into 14 States and six Territories. The latter are under Central administration.

The fourteen States (with the capital towns in brackets) are:

Andhra Pradesh (Hyderabad), Assam (Shillong), Bihar (Patna), Bombay (Bombay), Kerala (Trivandrum), Madhya Pradesh (Bhopal), Madras (Madras), Mysore (Bangalore), Orissa (Bhubaneswar), Punjab (Chandigarh), Rajasthan (Jaipur), Uttar Pradesh (Lucknow), West Bengal (Calcutta), Jammu and Kashmir (Srinagar).

The six Territories (with capital towns in brackets) are:

The Andaman and Nicobar Islands (Port Blair), the Laccadive, Minicoy and Amindivi Islands (temporary headquarters: Kozhikode, Kerala), Delhi (Delhi), Himachal Pradesh (Simla), Manipur (Imphal), Tripura (Agartala).

These States and Territories came into being on 1st November, 1956.

In addition there are two territorial units: The North-East Frontier Agency and the Naga Administrative Unit.

GEOGRAPHY

India is about 1,700 miles from east to west, and about 2,000 miles from north to south. Its land frontier is about 8,200 miles long and the sea frontier about 3,600 miles.

The total land area is 1,269,640 sq. miles.

The total population is 356,879,394* (1951 census) a little less than one-sixth of the population of the whole world.

This population grows roughly at the rate of about four and half millions a year. The 1956 population is estimated at 397.6 millions.

The land frontier with Pakistan is about 3,000 miles long (east and west together).

In shape India is like a triangle with its base lying on the Himalaya Mountains in the north and its apex running far into the ocean in the south. At the southern extremity the triangle tapers with a pear-shaped curve to a point called Comorin.

India lies entirely to the north of the equator. From south to north including Kashmir, it passes from 8° north latitude to 37° north latitude, with the Tropic of Cancer cutting roughly into two halves. West to east it passes from about 68° 20' east longitude to 92° east longitude.

Broadly speaking, India is shut off from the rest of Asia by the Himalaya Mountains, the highest mountain range in the world. Going west to east along the country's land frontier are Pakistan, Chinese Turkestan, Tibet, Burma and Pakistan.

To the south, the country is surrounded on all sides by water—the Arabian Sea in the west, the Indian Ocean in the south and the Bay of Bengal in the east.

India is so vast and diversified that expressions like 'average rainfall', 'average temperature' have no meaning. The average annual rainfall in the Thar desert is 4 inches, while that in Manganj is 455.

Similarly places in Kashmir have a minimum temperature of 49° F. while places in Rajasthan have recorded a maximum temperature of 120° F. So one can only speak of local averages rather than of national averages.

Compared with the size of the country, the coast-line is short, as there are few bays or inlets. Hence there are also very few harbours. The fact is the west coast is rocky and the sea is deep near the coast, while in the east the sea is extremely shallow so that big ocean-going ships have to weigh anchor at some distance from the shore.

The only so-called natural harbours are Bombay and Goa, while Madras, Vishakapatnam and Port Okha are examples of purely artificial harbours built by human enterprise.

The principal ports in India are (going from west to east along the coast), Kandla, Bedi Bunder, Port Okha, Porbandar, Surat, Bombay, Marmugao, Mangalore, Kozhikode (Calicut), Cochin, Alleppey, Quilon, Tuticorin, Dhanushkodi, Nagapatnam, Karikal, Cuddalore, Pondicherry, Madras, Masulipatnam, Kakinada, Vishakapatnam and Calcutta.

Of these, Marmugao belongs to Portugal while the rest are in the Republic of India.

MOUNTAIN WALL

India can be divided into three natural regions—1. the mountain wall, 2. the Plain of Hindustan, and 3. the Indian Plateau.

Let us take the mountain wall first. From the Pamir Knot in the far north two mountain ranges radiate one in the south-east and easterly direction called the Himalayas, and the other in a south-western direction reaching almost down to the sea, called the Sulaiman Range in the north and the Kirthar Range in the south.

In the east the mountain wall between India and Burma is called by different names in different places. In the north, for instance, it is known as the Patkoi Hills, further south as the Naga Hills. In Assam it is called Jaintia, Khasi and Garo. Southward are the Lushai Hills, then lastly there are the Arakan Yoma which finally reach the sea at Cape Negrais and continue in the Andaman and Nicobar Islands.

Of the various ranges which constitute the mountain wall of India the Himalayas are the most note-worthy. Extending like a scimitar for a distance of 1,500 miles along the northern frontiers of the country they form the loftiest mountain range in the whole world, and contain many of the highest mountain peaks, Mount Everest 29,141 ft., Mount Godwin Austen 28,250 ft., and Kanchenjunga 28,146 ft.

There are no easy ways in and out through the mountain wall which shuts off India from the rest of Asia, but there are a few difficult passes. In the very north are the Zojila Pass and the Shipki Pass which lead out of Kashmir and Punjab respectively. Then from Shipki right down to Darjeeling there is no route across the mountain wall. Across the Burma frontier again there are a few routes but they are of little use for purposes of communication.

The following is a more detailed description of the mountain region.

In the east on the border of Burma the mountain wall is much lower. Here it can more accurately be described as a range of hills rather than of mountains. This region is wet, forested and very thinly populated. The region round about Cherrapunji in Assam has the highest rainfall in the world.

Then from Darjeeling to Kashmir are the Himalayas proper, over 1,500 miles in length and 150 to 300 miles in breadth. The Himalayas are thus not a mountain chain in the proper

sense of the word. They can be described as a series of parallel but converging ranges intersected by valleys and big plateaus.

Hence the Himalayas themselves can be further sub-divided into three parallel zones, the Great Himalayas with an average elevation of 20,000 ft., always covered with snow; the Lesser Himalayas, the middle range, with an average elevation of 15,000 feet; and finally the Outer Himalayas lying between the Lesser Himalayas and the plains with an average elevation of about 3,500 feet.

Two of the longitudinal valleys which separate the mountain ranges are worth a note. They are the Vale of Kashmir and the valley of Kaiman in Nepal. Both the valleys are fertile, extensive and from a tourist's point of view a dream of beauty.

PLAIN OF HINDUSTAN

Geologically, the Ganges plain can be considered as the fore-deep of the mountains to the north of it. This fore-deep extends thousands of feet below the sea-level, though since its formation it has been filled in by deposit. In the east this deposit consists of alluvial material from the mountains, in the west it consists of material blown by the wind. All through the deposit is fine grained made up chiefly of muds and sands.

The Plain of Hindustan extends from the Bay of Bengal in the east to the Pakistan frontier in the west; that is to say, it is about 1,500 miles long and from 150 to 200 miles broad. Throughout this vast tract of land not a hill can be seen. The slope from the mountains to the sea is so gradual that about 100 miles from the mouth of the River Ganges the surface is no more than 500 feet above sea-level.

The Plain of Hindustan is probably the most important part of the country. For one thing, it contains some of the richest soil in the world. Second, it is on the Plain of Hindustan that the whole drama of race conflict and race assimilation was played out, a drama which finally shaped the political and cultural destiny of both India and its neighbour Pakistan.

Going into more detail the Plain of Hindustan is formed by the basins of three distinct river systems. In the far west are the Beas and Sutlej, tributaries of the Indus draining into the Arabian Sea. Further east is the River Ganges with its tributaries the Yamuna, Gomti, Ghaghara and Gandak which flows south-eastwards into the Bay of Bengal. The capital of the Indian Republic Delhi stands on the watershed between the Indus and the Ganges river basins. The third of the three river systems, the Brahmaputra rises beyond the Himalayas, turns east and enters India at its eastern extremity and joins the Ganges before reaching the Bay of Bengal. The Brahmaputra has no important tributaries.

The rivers of Hindustan are notable in three respects: 1. They give a constant supply of water, 2. The land through which they flow is broad, flat and fertile and eminently suitable for irrigation, 3. Because water flows perennially they are navigable through the greater part of the year.

As we go from west to east in the plain rainfall increases and so do the fertility of the soil and the density of population.

INDIAN PLATEAU

The third of the natural regions into which the country is divided is called the Indian Plateau because it comprises a three-sided table-land covering the whole of the country in the south except for two narrow coastal strips in the east and the west.

* Including Kashmir, the population of which was estimated at 4.41 millions in 1951.

The Indian Plateau is marked off from the Plain of Hindustan by a confused mass of hill ranges running with a general direction of east to west. Three of these ranges have been distinguished by the names of Vindhya, Satpura and Ajanta respectively. They stand from 1,500 feet to over 4,000 feet high and though pierced by road and railway at the present time were not easy to cross in the old days and thus formed a barrier of hill and jungle between the northern and the southern portions of the country.

The Indian Plateau is higher in the west and the south than in the east and north. Along the western and eastern edge of the plateau run the Western and Eastern Ghats. They start southward, from the extremities of the Vindhya mountain system and run along the western and eastern coasts of the country and unite to form a sort of upheaved angle towards their southern extremity.

The Western Ghats run through the States of Bombay and Mysore and ascend to an average height of about 3,000 feet while some of the peaks are anything between 5,000 feet and 9,000 feet high.

The Eastern Ghats stretch down the States of Andhra Pradesh and Madras and have an average elevation of 1,500 feet.

The inner triangular plateau which the Western and Eastern Ghats form far in the south is seamed with little ranges of hills exceeding 4,000 feet in height the best known among which are the Nilgiris. It is on the Nilgiris that Ootacamund the famous summer capital of Madras State stands.

Drainage Systems.—There are three systems of drainage in the Indian Plateau—one towards the north, the second towards the west and the third towards the east. The drainage from the northern or Vindhya edge of the plateau falls into the Ganges. Two rivers Karmada and Tapi carry the rainfall of the southern slopes of the Vindhya and Satpura mountains respectively in almost parallel lines into the Arabian Sea.

Further south, as we have already stated, the plateau is much higher in the west than the east. So the drainage has to make its way across the whole breadth of the plateau eastwards until it falls into the Bay of Bengal.

The most important rivers are the Mahanadi, the Godavari, the Krishna and the Cauvery. These rivers differ from the rivers of the Plain of Hindustan in three ways: 1. They are fed only by the monsoon rains and therefore do not yield a constant supply of water. 2. Their valleys are less suitable for irrigation. 3. And finally, they are not navigable for certain seasons in the year when parts of the river dry up.

From a geological point of view the Indian Plateau consists mainly of very old crystalline rocks—much older than the Himalayan fold mountains.

On some of the edges of the plateau in the north-east for instance, are areas of sedimentary rocks from which the country obtains most of its coal. About nine-tenths of the coal resources of India lie in Jharia in Bihar and Raniganj in West Bengal, though coal-bearing beds are also found in the valley of the Godavari and the northern slopes of the Vindhyas.

The north-west of the plateau is covered by vast stretches of lava called the Deccan lavas. This region is one of the largest areas of lava in the world, covering as it does an area of 250,000 square miles with a total thickness of several thousand feet. In spite of the great extent of the lavas there are few or no signs of volcano.

In the rest of the Plateau valuable minerals occur here and there among old crystalline rocks. Gold is obtained in Mysore, manganese in Andhra, Mysore and Madhya Pradesh, copper and iron in Bihar and Orissa, mica in Andhra and the south-east. The point about diamonds is of some interest. They occur in sand-stones or conglomerate in Panna in Madhya Pradesh or Kurnool in Andhra, though no diamond bearing igneous rocks are found.

Ceylon is the only important island lying off the coast of India to which it is joined by a line of sand flats collectively called Adam's Bridge. But Ceylon is politically separate from the sub-continent.

Two groups of very small islands in the Bay of Bengal, the Andamans and the Nicobars, and one group in the Arabian Sea the Laccadives are part of the Republic of India.

So is the quasi-island of Kutch off the Kathiawar Peninsula in western India. Kutch is a dry, rocky, treeless country.

VEGETATION

India is thickly populated and so over the greater part of the country the natural vegetation has been removed. The country has no distinctive botanical features peculiar to itself.

Where the rainfall is more than 80 inches a year there are evergreen forests on the hills. The wood from these forests is hard but the forests have not yet been commercially exploited. These evergreen forests are chiefly found on the slopes of the Western Ghats, the wetter eastern parts of the Himalayas up to a level of 5,000 feet, and in Assam.

Where the rainfall is less than 80 inches but more than 40 we have what are called the monsoon forests, so-called because the trees in these forests lose their leaves in the dry season. The monsoon forests are very valuable, because they contain two of the most useful kinds of tree, the teak and the sal. The teak is found chiefly in the western parts of the country while the sal is obtained in the lower slopes of the Himalayas and the north-east of the Plateau.

Where the rainfall is less than 40 inches, in the drier parts of the country we find small thorny trees, sometimes so small that they are more like bushes than like trees.

In the driest parts where the land is desert or semi-desert even bushes cannot grow. There we find plants with thick fleshy stems and long roots.

There is not much grass land in India though in the hills in the monsoon grass patches can be seen.

The main cultivated plants include rice, wheat, pulses and grains. Among the important seeds grown are castor, sesamum and ground-nut.

The chief fruit trees include mango, coconut, arecanut and certain citrus fruit. Apples, peaches, pears, apricots and walnuts are confined chiefly to the Himalayan valleys.

There are tea plantations over large areas on the mountains in the north-east and south, while coffee, cardamom, pepper and rubber are extensively grown in the south. In some of the damper regions the cinchona is successfully cultivated.

ANIMALS

Just as natural vegetation has disappeared over the greater part of the land so have a great many wild animals. The lion, for instance, was not uncommon within historical times in the north. Today it is confined wholly, to the Gir forest in Junagadh in Bombay State.

The most famous among the wild animals which survive are the tiger and the elephant. The leopard or panther is more common than the tiger and equally destructive of life and property. The cheetah or the hunting leopard is found only in the Deccan and is generally trained for hunting the antelope. Other wild Indian animals of the cat family are the marbled cat and the jungle cat.

In the open country-side wolves are plentiful and usually prey on sheep. The Indian fox is comparatively scarce but the jackal is very common. The wild dog is found in the denser jungles and generally hunts in packs. Among other dogs are the pariah common in the south, and the greyhound used for hunting.

The black bear is common wherever rocky hills and forests occur. It lives on ants, honey and fruit and may often prove dangerous.

The Himalayan bear which is found only in the north, stays in the mountains during the summer but comes lower down during the winter.

The rhinoceros found in the country are of three different types, two have a single horn and one has double. The rhinoceros is commonest in the Brahmaputra valley and in the Sunderbans. With the rhinoceros might be mentioned the crocodile which can be very dangerous specially in the rivers of the north. The wild hog is also well-known in certain parts of the country and is very destructive of crops.

In the remote parts of the deserts of Kutch is found the wild ass but its contacts with man are few. Many wild varieties of sheep and goat are met with in the mountain ranges of the north.

The antelope proper is more widely distributed. On the coasts of Gujarat and Orissa, for instance, a herd of does accompanied by a single buck is a common sight. The gazelle can also be found almost everywhere. The sambar is confined to hill forests, while the spotted deer is considered to be the most beautiful animal of the Indian jungle.

In the Western Ghats, and in the hill jungles of Assam, Bombay and Madhya Pradesh is found the bison. It is a fierce animal and almost as dangerous to hunt as the tiger. Akin to the bison is the wild buffalo very common in Assam.

The rat and the mouse are a perpetual nuisance. The bandicoots some of which can be as long as 2 feet burrow under stores and godowns and are often deadly to plants, fruit or grain.

Reptiles abound in garden and jungle and even intrude into dwelling places specially during the rains. Thousands of people die every year in the country-side of snake-bite. The most dreaded of the reptiles is the cobra. There is another variety called Russell's viper whose bite is equally fatal. Generally speaking the salt-water snakes are dangerous while the fresh-water ones are harmless. The bigger variety scorpion which abounds in parts of Madras and Andhra is a domestic terror.

Of all the wild animals in the country the elephant is the most interesting as well as the most useful. It generally lives in the wilder parts of the monsoon forests and being an intelligent animal can be trained to do heavy work such as dragging great logs of wood, or arranging them in neat piles. The elephant is also excellent as a transport animal as it can push its way through the thickest jungle where roads cannot be built.

Domestic Animals.—So much for the wild animals. Among the domestic animals the most useful are the oxen. It is estimated that there are about 150 million cattle in India. Milk is not a staple article of food and the oxen are chiefly used for ploughing or drawing carts. The bullocks are more valuable than the cows though in certain parts like Uttar Pradesh dairy-farming is an important industry. One handicap is that in most areas fodder has to be specially grown for the cattle.

There are 45 million buffaloes in the country. The buffalo is stronger than the bullock and is chiefly used for ploughing. The she-buffalo is the typical dairy animal.

There are 30 million sheep in the country. But they are a very poor specimen and do not give good wool or meat. Sheep are most numerous in Madras and live chiefly on waste land which is not good enough for cattle. Goats (57 million) are found everywhere because it does not take much to keep them alive. They can feed on the poorest grass or shrub and so find enough to eat even in the driest parts of the country.

There are 1.5 million horses and ponies and about 60,000 mules and 1.2 million donkeys, most of which are used as draught animals. Mules, donkeys and camels are also used for purposes of transport: mules and donkeys on the hilly parts, and camels in the sandy desert.

The total number of live-stock in the country is 307 million.

There are also about 91 million fowls and about 6 million ducks.

The birds of India though not as gorgeous as those of some other tropical lands deserve mention. The parrot is easily the most beautiful of the Indian birds. The peacock is another beautiful bird, while the maina like the parrot lives happily in a cage and talks well. Of the vulture there are four varieties which in-

clude the common scavenger. There are many types of eagle too and some of the falcons can be trained for hawking. A bird much sought after for its plumage is the kingfisher and among the birds which are hunted for their flesh are pigeons, ducks, partridges, plover, quail and snipe. The jungle fowl, however, is not considered good for eating.

There are many beautiful butterflies in India, while among the more useful insects are the bee, the silk-worm, the cocoon lac, that is, the insect which gives lac. Cer-

tain varieties of Indian moth and ant are very destructive. Locust invasions are not frequent but when they appear they leave complete destruction behind them. Mosquitoes abound everywhere.

In India fish is eaten fresh as methods of fish preservation are either primitive or not practised. Among the edible Indian fishes are the carp family and the cat fishes. But the most delicious is the hilsa which is also a rich food. A fish which is found in all hill streams is the mahseer.

† Data not available.

MONSOON RAINFALL SUMMARY—1955

There was an abnormal delay in the onset of the monsoon over the country in 1955 and consequently the rainfall during the month of June was appreciably in defect over most parts. After the advance, however, the activity of the monsoon was maintained at an even pace till the end of the season. The rainfall during the months of August and September was in excess generally over the country and the shortfall that occurred earlier in the season was well made up. Floods were reported from several parts in the States of the Punjab (I), Uttar Pradesh, Bombay and Andhra Pradesh, the worst ones being those that affected west Uttar Pradesh towards the end of September. The total rainfall during the season was either normal or in excess over most parts of the country.

As already mentioned both the branches of the monsoon arrived very late over the country. The Arabian Sea branch set in over Kerala on the 14th June, about two weeks later than the normal date. It advanced slowly into the States of Mysore and Bombay and into Telangana and south Madhya Pradesh during the course of the next ten days.

The Bay branch of the monsoon advanced into Assam and Sub-Himalayan West Bengal as a feeble current on the 16th June, also late

by about two weeks. It advanced as a feeble current into the remaining parts of north-east India and into Uttar Pradesh, north Madhya Pradesh and east Rajasthan during the period 24th to 29th June and into the rest of north-west India between the 4th and 7th of July.

Both the branches of the monsoon became active during the first half of July in association with two depressions from the Bay and one from the Arabian Sea and were responsible for good rainfall in the States of Bombay and Madhya Pradesh during this period.

From about mid-July to mid-August, the monsoon remained active over the region extending from the Punjab (I) to Gangetic West Bengal and north Orissa and was responsible for a welcome increase in the rainfall over north-east India, Uttar Pradesh and the Punjab (I) where the season's rainfall till then had been appreciably in defect. It, however, remained moderate over the rest of the country. The monsoon was strong in the Konkan and Maharashtra almost throughout the month of August.

In association with the formation of three depressions and one low pressure area in the Bay of Bengal and their passage across the interior of the country, there was good and well distributed rainfall over most parts during

September. A spell of heavy rains which occurred in the Punjab (I) and west Uttar Pradesh towards the end of September, led to floods over these parts.

The monsoon commenced withdrawing from the north-western parts of the country by the 3rd October and by the middle of October it had withdrawn from north-west India and the States of Bombay, Uttar Pradesh, Madhya Pradesh, Orissa and Bihar.

The withdrawal from the remaining parts of north-east India took place by the last week of October.

The rainfall for the season as a whole was in large excess in Saurashtra and Kutch and the Konkan, in moderate excess in the Punjab (I) and Gujarat and in slight excess in Sub-Himalayan West Bengal, west Uttar Pradesh, Rajasthan, Maharashtra and Andhra Pradesh. It was in slight defect in Gangetic West Bengal, Bihar, east Uttar Pradesh and the Madras State and normal over the rest of the country.

The data from Himachal Pradesh, Jammu and Kashmir and the Arabian Sea Islands are incomplete.

Averaged over the plains of India, the season's rainfall was 6 per cent in excess.

POPULATION

Note:—Unless otherwise stated the following article is based on the 1951 census which are the latest.

The States were reorganized in November 1956. As the last census took place before this reorganization, census figures for the States that underwent drastic changes are not available. Such figures as are available have been brought together in tables at the end of this article.

The more important figures of the 1951 census are:

Total population (excluding Kashmir and the Part B Tribal areas of Assam): 356,879,394; Males: 183,333,874; Females: 173,545,520.

Population of Jammu and Kashmir: 4.41 millions (estimate for March 1, 1951); Population of Part B Tribal Areas of Assam: 0.56 millions (unverified local estimate).

Total including Kashmir and Part B Tribal area: 361,181,069.

Increase over 1941: 12,113,014 or a mean decennial growth rate of 12.5 or percentage increase of 13.4 per cent.

Highest population: Uttar Pradesh (63,215,742); Lowest population Andamans and Nicobars (30,971).

Average density: 312 per square mile.

Highest density: Delhi (over 3,017); Lowest density: Andaman and Nicobar (10).

Registered birth-rate (1941-50): 27.2; Probable birth-rate (1941-50): 40.

Registered death-rate (1941-50): 19.4; Probable death-rate (1941-50): 27.

Natural increase rate (1941-50): 13.

Infant mortality rate (1941-50): 127.1.

Life expectancy: 32 years and 3 months; Life expectancy at the age 10 years: 39.

The provisional birth-rates for 1955 and 1956 are 27.0 and 27.4.

The provisional death-rates for 1955 and 1956 are 11.7 and 11.4.

The infant mortality rates for 1955 and 1956 are 100 and 108.

Literacy for India for 1951: 16.6.

Number of females to every 1,000 males: 947.

Total urban population: 62 millions (17.3 per cent); Total rural: 295 millions (82.7 per cent). Increase in urban population over 1941: 3.5 per cent. Highest urbanization: Delhi (83 per cent).

The total number of towns is 3,018 and of villages 558,088.

Number of cities with a population of one lakh and over: 75.

Percentage of population dependent on agriculture: 70.

If the population is divided into classes according to livelihood the percentage of each class would be as follows:—

Peasant proprietors, 47; Tenants, 9; Landless labourers, 13; Landlord or rentier, one; Industry or other non-agricultural production, 10; Commerce, 6; Transport, 2; Services and miscellaneous professions, 12.

1951 CENSUS

The last census were taken at the beginning of 1951 (Feb. 9 to Mar. 1, 1951).

For the first time the census embraced the whole of India including the former Indian States, but excluding Jammu and Kashmir and the tribal areas of Assam. Jammu and Kashmir was omitted because of special conditions and the tribal areas of Assam because they had never been enumerated before.

Two main and two subsidiary questions in the census questionnaire related to "economic status" and "means of livelihood". These questions were: Are you a self-supporting person or a non-earning dependent or an earning dependent? If you are a self-supporting person, are you an employer or an employee or an independent worker or none of these? What is the occupation or source of income which forms your principal means of livelihood? Have you a secondary means of livelihood? If so, what is it?

GROWTH OF POPULATION FROM 1901-1951

Years	Persons	Variation	Percentage (Approximate)	Males	Variation	Females	Variation
1901	235,478,513			119,398,710		116,080,103

* Figures till 1941 in respect of certain areas being on the proportion their population bore to that of the District in 1951.

The figures for Jammu and Kashmir State are not shown.

POPULATION 1952 to 1957

The following table shows the estimated mid-year population of the country from 1952 to 1958. The estimates are based on the mean rate of growth during the period 1941-50.

The figures include those for Sikkim and Kashmir.

1952	36.74 crores
1953	37.20 ..
1954	37.68 ..
1955	38.17 ..
1956	38.65 ..

1957	39.24 crores
1958	39.76 ..

FUTURE GROWTH

Some calculations have been made about this from 1951 to 1961.

The estimate based on the assumption that the mean decennial rate of growth will be the same as that of the average of 1921-50 will be the lower limit, and the estimate based on the assumption that the mean decennial rate of growth will be the same as during the last decade will be the upper limit.

The figures given below are in millions:

	lower limit	upper limit
1951	361.3	361.3
1961	407.7	411.9
1971	458.5	469.7
1981	527.6	535.5

Making allowance for mortality and maternity rates the trends may be estimated as follows: The figures are in crores: 1951-36; 1961-41; 1971-46; 1981-52.

POPULATION BY NATURAL REGIONS

Natural Region	Total Population	Males	Females	1941	Females per 1,000 males (1951)	Mean Decennial Growth Rate (1941-51)
INDIA	358,87,394	183,333,874	173,545,520	314,766,380	947	+ 12.5
1. Himalayan Region	17,042,697	8,982,675	8,060,022	14,827,606	897	+ 13.9
2. Northern Plains Region	139,398,043	73,022,392	66,375,651	125,072,878	909	+ 10.8
3. Peninsular Hills and Plateau Region	108,598,645	55,111,536	53,487,109	96,220,094	971	+ 12.1
4. Western Ghats and Coastal Region	39,926,793	20,371,388	19,555,405	32,518,913	960	+ 20.5
5. Eastern Ghats and Coastal Region	51,832,336	25,798,608	26,033,728	46,093,121	1,009	+ 11.7
Andaman and Nicobar Islands	30,971	19,055	11,916	33,768	625	- 8.6

POPULATION, AREA BY ZONES

Below we give the figures for zones.

Zone	Area in square miles	Total Population	Males	Females	1941	Females per 1,000 males (1951)	Mean Decennial Growth Rate (1941-51)*	Density per square mile
INDIA	1,266,900	358,879,394	183,333,874	173,545,520	314,766,380	947	+ 12.5	303
I—North India	113,409	63,215,742	33,098,866	30,116,876	56,531,843	910	+ 11.2
II—East India	261,657	90,080,297	46,315,658	43,764,639	80,873,033	945	+ 10.8
III—South India	168,009	75,600,804	37,822,542	37,778,262	64,837,350	999	+ 15.3
IV—West India	149,669	40,661,115	20,962,281	19,698,834	33,249,726	938	+ 20.1
V—Central India	289,399	52,267,959	26,497,524	25,770,435	47,273,896	978	+ 10.0
VI—North-West India	284,342	34,972,597	18,569,725	16,402,869	31,966,764	883	+ 9.0

* The mean decennial rate is based on the mean population of the two censuses, and not like the 'percentage variation' on the population according to the earlier census.

† Add Chandernagore: Total: 49,909; Males: 25,230; Females: 21,689.

Figures for Part B Tribal areas are not included. But area includes NEFA and the Naga Unit.

POPULATION, AREA, DENSITY, SPECIAL GROUPS BY STATE

The following table gives the population, area, etc. of the States and Territories forming the Indian Union :

	Area in sq. miles (a)	Population	Density of population	Anglo-Indians —1951 census (a)	Scheduled Castes—1951 estimates	Scheduled Tribes—1951 estimates
INDIA	12,66,000	36,11,51,669	312(c)	1,11,637	5,51,70,696	2,25,11,854

(a) Provisional. (b) Inclusive of Naga Hills District now in the Naga Unit. (c) In working out the figure the area and population of Jammu and Kashmir and of the Part B Tribal areas of Assam have not been taken into account.

DISPLACED PERSONS

Position in March 1957: Total 84.50 lakhs. From W. Pakistan 47.40 lakhs. From E. Pakistan 41.10 lakhs.

1951 Census

The following particulars from the Census Report on Displaced Persons will be of interest (the census were taken in 1951):—

Total: 7,295,870; Males: 3,900,034; Females: 3,395,836.

From West Pakistan: 4,699,492; From East Pakistan: 2,549,390; Unspecified: 46,988.

The figures for individual States in West Pakistan are as follows: N.W.F.P.: 195,059; Sind: 776,229; Baluchistan: 24,945; West Punjab: 3,407,695; Pakistan States: 252,956; Origin unspecified: 42,600.

The figures for distinct areas in East Pakistan are as follows: East Bengal: 2,406,183; Sylhet (Assam): 137,414; Origin unspecified: 5,793.

The sex ratio among displaced persons is 871 females for every 1,000 males. The figure for displaced persons from West Pakistan is 872 females, from East Pakistan 871.

For the country as a whole, the displaced persons number 21 per 1,000. The principal concentrations are (the figures are for 1,000 of

local population): Delhi 397; Punjab 231; Tripura 188; Chandernagore 115; Ajmer 115; PEPSU 113; West Bengal 92; Andamans 51.

The distribution of displaced persons by age-groups is as follows:—

0—	47,931
1—4	412,193
5—14	1,935,781
15—24	1,512,466
25—35	1,195,683
35—44	841,987
45—55	602,548
55—64	366,653
65—74	176,689
75 and over	82,118
Age not stated	10,305

The distribution of displaced persons by livelihood classes is as follows. The first figure shows the number of males and the second the number of females:—

Cultivators of land wholly or mainly owned and their dependants: 212,591; 191,545.

Cultivators of land wholly or mainly un-owned and their dependants: 686,705; 605,814.

Cultivating labourers and their dependants: 167,304; 138,057.

Non-cultivating owners of land, agricultural rent receivers and their dependants: 32,250; 30,225.

Production other than cultivation: 461,626; 387,723.

Commerce: 922,939; 602,763.

Transport: 168,189; 140,877.

Other services and miscellaneous sources: 1,174,313; 1,061,403.

Distribution by civil condition is as follows:—

Unmarried: 1,923,908 (males); 1,315,963 (females).

Married: 1,719,149 (males); 1,650,193 (females).

Widowed or Divorced: 182,560 (males); 392,261 (females).

The literacy is indicated by the following figures:—

Literates: 1,768,022 (males); 912,567 (females).

Illiterates: 2,057,895 (males); 2,445,850 (females).

The urban-rural distribution in lakhs is 33 lakhs in villages and 39 lakhs in towns.

The movement of persons from West Pakistan by period is as follows. The number is for every 1,000 displaced persons:—

1947 August: 292; 1947 September: 214; 1947 October: 133; 1947 November: 83; Rest of 1947: 51; 1948 January-June: 88; Rest of 1948: 27; Rest upto February 1951: 18.

The movement from East Pakistan for 1,000 displaced persons:

1946: 23; 1947: 182; 1948: 193; 1949: 128; 1950: 450; Rest upto February 1951: 51.

FOREIGNERS

The number of foreigners in India in the year 1958 was 47,410 excluding U.K. and Commonwealth citizens and children below the age of 16. They were distributed according to nationality as follows: Chinese, 11,301; Afghans, 7,034; U.S. nationals, 3,709; Iranians, 4,370; Germans, 2,463; French, 1,064; Burmese, 2,144; Italians, 1,133.

Of the 29,746 non-Commonwealth foreign citizens, as on 1st Jan. 1957, 22,100 were traders, 1,663 were students and 4,893 missionaries.

RELIGIOUS GROUPS

The ratio of each religious group to the total population in the country is as follows (percentage): Hindus, 84.99; Muslims, 9.93; Christians, 2.30; Sikhs, 1.74; Jains, 0.45; Buddhists, 0.06; Zoroastrians, 0.03; Other tribal religions, 0.47; other non-tribal religions, 0.03.

The following table shows the position of religious groups in India in the States which were unaffected by the reorganization that took place (Nov. 1956) after the 1951 census.

State	Hindus	Sikhs	Jains	Buddhists	Zoroastrians	Muslims	Christians	Jews	Other Tribals	Other Non-Tribals
Assam	5,894,733	4,107	4,245	22,675	27	1,996,456	585,399	209	527,712	8,144

Andaman and Nicobar	9,294	126	1	1,604	2	4,783	9,494	1	20	5,646
Sikkim	97,863	18	19	39,397	—	124	304	—	—	—
India††	303,186,986	6,219,134	1,618,406	180,767	111,791	35,400,117	8,157,765	26,781	1,661,897	47,148

† Persons whose enumeration records were destroyed by fire—268,602.

†† The Census booklets available at the time of preparing the article did not give the all-India totals. The figures given here are the ones worked out by adding the figures for individual States. The total includes all the States and Territories.

RURAL AND URBAN POPULATION

It should be pointed out here that whether an area is urban or rural depends on a number of factors of which population is only one. Also these factors vary from State to State.

The rural and urban population grew as follows:

Percentage

	Rural	Urban
1921	88.6	11.4
1931	87.9	12.1
1941	86.1	13.9
1951	82.7	17.3

The population of villages and towns respectively grew as follows from 1921 to 1951 (figures in lakhs):

Year	Population		Rate of Growth	
	Villages	Towns	Villages	Towns
1921	2,199	282	—	—
1931	2,420	334	+10.1	+18.4
1941	2,710	438	+12.0	+31.1
1951	2,950	619	+ 8.9	+41.3

The population of the 10 largest cities (town-groups) has grown as follows (figures in lakhs):

City	1951	1941-50	1931-40	1901-30
Calcutta	45.8	—	—	6.0
Bombay	28.4	11.4	3.9	4.6
Madras	14.2	6.4	1.8	1.4
Delhi	13.8	7.2	2.2	2.3
Hyderabad	10.9	3.5	2.7	0.2
Ahmedabad	7.9	2.0	2.8	1.3
Bangalore	7.8	3.7	1.0	1.5
Kanpur	7.1	2.2	2.4	0.4
Poona	5.9	2.4	0.8	0.9
Lucknow	5.0	1.1	1.1	0.2

Rural-Urban Percentage

Below we give the percentage of rural and urban population of each State. The first figure gives the urban percentage, and the second the rural:

India 82.7, 17.3; Andhra 82.6, 17.4; Assam 95.4, 4.6; Bihar 93.2, 6.8; Bombay 71.7, 28.3; Kerala 86.9, 13.1; M.P. 88.0, 12.0; Madras 75.6, 24.4; Mysore 77.0, 23.0; Orissa 95.9, 4.1; Punjab 81.0, 19.0; Rajasthan 81.5, 18.5; U.P. 86.4, 13.6; W. Bengal 76.1, 23.9; Andamans 74.1, 25.9; Delhi 17.6, 82.4; H.P. 95.9, 4.1; Laccadives 100.0; Manipur 99.5, 0.5; Tripura 93.3, 6.7; Sikkim 98.0, 2.0.

It may be explained here that the concept of a village is not demographic but really administrative.

As a general rule, it represents a parcel of land, the boundaries of which are defined and settled by a Revenue Survey or by a cadastral survey. It may be but need not always necessarily be a single house-cluster with a local name marking its distinctiveness as a residential locality.

It can be seen from the figures that only 6.19 crores or 17.3 per cent live in urban areas while as many as 29.5 crores or 82.7 per cent live in rural areas.

But the drift from the village to the town is clear. The percentage of the urban population has grown from 11.4 in 1921 to 17.3 in 1951, while the percentage of the rural population has dropped from 88.6 per cent in 1921 to 82.7 per cent in 1951.

There are 558,088 villages in India and 3,018 towns.

A table given further down shows that about 26.5 per cent of people live in villages with a population of 500 and less, 48.8 per cent in villages with a population of between 500 and 2,000, 19.4 per cent in villages between 2,000 and 5,000, and 5.3 per cent in villages of over 5,000.

About population in the urban areas, about 38 per cent lives in cities with a population of over a lakh, 36.1 per cent in towns with a population of between 20,000 and one lakh, 23.6 per cent in towns with a population of between 5,000 and 20,000 and 3.3 per cent in townships.

Villages, Towns, Houses—By Zones

Zone	Villages	Towns	Occupied Houses		
			Total	Rural	Urban
•INDIA	558,088	3,018	64,361,676	54,056,388	10,305,288

East India	185,318	298	17,285,005	15,255,491	2,029,514
South India	57,758	683	13,387,542	11,251,393	2,136,149
West India	39,533	594	7,248,611	6,056,813	1,191,798
Central India	102,062	517	10,145,228	8,720,099	1,425,129
North-West India	61,494	440	5,881,046	4,995,199	1,185,847
Andamans	201	..	5,300	3,408	1,892

In earlier censuses, the definition of a house was not uniform in all States. At this Census a uniform definition of house was adopted and a conceptual distinction established between the 'house' and the 'household'.

A 'house' is a structure while a 'household' is a human group. A house means a 'dwelling' with a separate main entrance. "A household" means all persons who live together in the same house and have a common mess.

* Area (92,780 sq. miles) and population of the State of Jammu and Kashmir and population of part of Part B Tribal Areas of Assam not included.

Villages, Towns, Urban and Rural Population and Houses *

A house is a building in which people live. A household is a group of people who live together and take their food from a common kitchen.

There are 112 households in every 100 houses of a typical Indian village, and 124 households in every 100 houses of a typical Indian town.

In every 100 households in a village there are 491 persons, in every hundred households in the town the number is 471.

In every 100 houses in a village 550 people live, in every 100 houses of a town 584.

Out of 491 people in every 100 rural households 252 are males and 239 are females. Out of 471 people in every 100 urban households 248 are males and 223 are females.

We can have a four-fold classification of households—small household (3 persons or less), medium (4, 5 or 6), large (7, 8 or 9), very large (10 or more).

The number of different types in 100 households in a typical village and a typical town will be as follows:

	Village	Town
Small	33	38
Medium	44	41
Large	17	16
Very large	6	5

The pattern of household relationship in a 100 households with 487 persons in them will be as follows:

	Number
Heads of households	100
Wives of heads	71
Sons of heads	104
Daughters of heads	81
Male relatives other than sons	44
Female relatives other than daughters	72
Persons unrelated to heads	7
Total	487

TOWNS AND VILLAGES WITH POPULATIONS 500 TO 100,000

Size	Number	Males	Females
Less than 500	380,020	39,956,302	38,391,369
500—1,000	104,268	37,162,941	35,767,815
1,000—2,000	51,769	36,194,476	34,962,006
2,000—5,000	20,504	30,023,792	29,085,181
5,000—10,000	3,101	10,540,836	10,212,900
10,000—20,000	856	6,016,525	5,664,243
20,000—50,000	401	6,240,152	5,543,896
50,000—100,000	111	4,020,609	3,834,716
100,000 and above	73	13,174,241	10,373,376

There can be a four-fold classification of towns—cities (population of one lakh and over), major towns (population 20,000 to one lakh), minor towns (population 5,000 to 20,000), townships (under 5,000).

The average number of villagers per village is 529.

The percentage of rural population living in small villages (under 500) is 26.5; in medium-sized villages (500-2,000) is 48.8; in large villages (2,000-5,000) is 19.4; in very large villages (over 5,000) is 5.3.

LIVELIHOOD PATTERN—SCHEDULED CASTES AND TRIBES

The following table shows the figures for the Scheduled Castes and Tribes for the States which were not affected by the reorganization of States (Nov. 1956) which took place after the census of 1951.

Figures for the present Punjab could be obtained by adding the figures for the old Punjab and PEPSU.

State	Scheduled Castes			Scheduled Tribes		
	Total	Agricultural Classes	Non-Agricultural Classes	Total	Agricultural Classes	Non-Agricultural Classes
INDIA	51,343,898	38,118,959	13,224,939	19,116,498†	17,284,260	1,822,422

Bilaspur†	27,185	23,529	3,656	—	—	—
Himachal Pradesh	224,610	208,413	16,197	—	—	—

† The figures include about 5,000 persons in Madras who returned themselves as Harijans but were misclassified as 'Scheduled Tribes'.

†† Merged with Himachal Pradesh after 1st July, 1956.

Other statistics about the Special Groups are given below.

Note that there is a discrepancy between the figures here and those on page 7. The latter were published in 1956 after the reorganization of States, but are also based on the 1951 census. The discrepancy could be ascribed to a different basis of reckoning.

Groups	Number (in Lakhs)			Number per 1,000 persons

ECONOMIC STATUS

Out of a total population of 3,566 lakhs, 1,044 lakhs (29.3 per cent) are self-supporting; 2,143 lakhs (60.1 per cent) are non-earning dependents; and 379 lakhs (10.6 per cent) earning dependents.

Out of a total agricultural population of 2,490 lakhs, 710 lakhs are self-supporting; 1,470 lakhs are non-earning dependents; and 310 lakhs earning dependents.

Out of a total non-agricultural population of 1,076 lakhs, 334 lakhs are self-supporting; 673 lakhs are non-earning dependents; and 69 lakhs earning dependents.

The table below gives a comprehensive picture of self-supporting and dependent people and the percentage.

Under Agriculture Class I is owner-cultivator, Class II tenant-cultivator, Class III cultivating labourer, Class IV agricultural rentier.

Class V are persons engaged in non-agricultural production together with their dependents, Class VI persons in commerce and their dependents, Class VII in transport and their dependents, Class VIII in miscellaneous income recipients (non-agricultural rentiers, pensioners etc.).

The second column shows self-supporting persons; the third non-earning dependents; the fourth earning dependents; the fifth total; the sixth percentage to general population including dependents.

country as a whole. It is probable that it has increased slightly.

On the whole, there has been a general increase of non-earning dependency. The increase in absolute numbers of non-earning dependents has exceeded the entire increase of rural population in India as well as in each of the five zones out of six.

The increases in the percentages are not accompanied by any material change in sex ratio or age structure. They must therefore, be regarded as a rough index of the growth of unemployment in different parts of the country.

There has been a general increase throughout the country in the number of cultivators and cultivating labourers working on the same area (say 100 acres) of cultivated land.

Material changes have occurred in the percentage of cultivating labourers to all workers in land (i.e. cultivating labourers and cultivators including their unpaid family helpers).

The fall is the natural result of increase in the number of cultivators and members of their families occupying the same area of cultivated land. The cultivators' need for employing labourers diminishes, as also their capacity to pay for their services.

Other reasons for the fall may be that labourers were unwilling to acknowledge as labourers to guard against the accrual of occupancy rights in land.

There were also many people who partook of the characteristics of both cultivator and cultivating labourer and whose classification was open to doubt.

It is also possible that because of legislation and the general social climate a conversion has taken place of many persons from the status of cultivating labourer to that of cultivator.

Among cultivators the relative proportion of cultivator owners has increased to some extent.

Agricultural rentiers formed only a small proportion of the people in 1951, and this proportion has become still smaller in 1961.

The figures are in lakhs.

Category	2	3	4	5	6
Class I	457	1,001	215	1,673	46.9
Class II	84	189	39	316	8.8
Class III	149	247	52	448	12.6
Class IV	16	33	4	53	1.5
Total Agricultural classes ..	710	1,470	310	2,490	69.8
Class V	122	223	32	377	10.6
Class VI	59	145	9	213	6.0
Class VII	17	37	2	56	1.6
Class VIII	136	268	26	430	12.1
Total non-agricultural classes ..	334	673	69	1,076	30.2
General Population ..	1,044	2,143	379	3,566	100.0

The following figures show the number of dependents supported by 100 persons in each of the eight categories. The first figure in brackets shows the number of non-earning dependents and the second figure the number of earning dependents:

Class I—266 (210.47); Class II—259 (215.44); Class III—201 (166.35); Class IV—231 (206.25); All Agricultural classes—251 (207.44).

Class V—211 (165.36); Class VI—261 (246.15); Class VII—230 (215.12); Class VIII—216 (197.19); All non-agricultural classes—222 (201.21).

General Population—242 (205.37).

The broad conclusion of this survey is that the average self-supporting person uses his income to support himself and at least two others.

Roughly one among three self-supporting persons also provides, in addition, partial support for one earning dependent.

During the twenty years following 1931 population grew faster than cultivation. But the relative weight of dependence on agriculture for gainful employment has not declined in the

The figures for the new Punjab could be obtained by adding where appropriate the figures for the old Punjab and PEPSU.

Rural-Urban

There are 1,044 lakhs of self-supporting persons in the country or 29.3 per cent of the population.

The table below shows the rural-urban and sex-wise break-up.

Rural-Urban	Number (in lakhs)	Percentage
Rural males ..	706	47.1
Urban males ..	166	49.8
Rural females ..	151	10.4
Urban females ..	21	7.4
Total ..	1,044	29.3

Out of 1,044 lakhs of self-supporting persons 710 lakhs or 68.1 per cent are agriculturists, and 334 lakhs or 31.9 per cent are non-agriculturists.

The rural-urban and the sex-wise break-up of agricultural and non-agricultural self-supporting classes is as follows (the number is in lakhs):

Rural-Urban break-up		Agriculturists		Non-agriculturists	
		Number	Percentage	Number	Percentage
Rural males		566	80.2	140	19.8
Urban males		19	11.4	147	88.6
Rural females		121	80.2	30	19.8
Urban females		4	19.7	17	80.3
Total ..		710	68.1	334	31.9

The self-supporting agriculturists can be divided into four classes. The number in the second column in the table below is in lakhs, the number in the third column is the percentage of all agriculturists, the number in the last is percentage of all self-supporting persons.

Category	Number (lakhs)	Percentage of agriculturists	Percentage of all self-supporting persons
Cultivators of land wholly or mainly owned	457	84.4	48.8
Cultivators of land wholly or mainly un-owned	88	12.8	8.4
Cultivating labourers	149	21.0	14.8
Non-cultivating owners of land and other agricultural rent receivers	16	2.8	1.6
Total	710	100.0	68.1

Another way of describing Classes I and II is as owner-cultivators and tenant-cultivators. Thus the number of owner-cultivators is 457 lakhs and the number of tenant-cultivators is 88 lakhs. The total number of cultivators can thus be put down as 545 lakhs.

The 334 lakhs self-supporting non-agriculturists can also be divided into four sections. The number in the second column is in lakhs, the number in the third shows the percentage of all self-supporting non-agriculturists, the fourth the percentage of all self-supporting persons.

Categories	Number (lakhs)	Percentage of self-supporting non-agriculturists	Percentage of all self-supporting persons
Employers	11	3.3	1.1
Self-employed other than employers	165	49.4	18.7
Employees	148	44.3	14.2
Non-agricultural rentiers, pensioners and miscellaneous income-receivers	10	3.0	0.9
Total	334	100.0	31.9

The employees are a clear minority. Self-employed persons are more numerous than employers and employees combined.

If we deduct rentiers from both agriculturists and non-agriculturists we get the following classification of income-earners. The number in the following table is in lakhs.

Nature of income	Cultivation	Industries and Services	Total
Net profits	545	176	721
Wages and salaries	149	148	297
Total	694	324	1,018

Earners of profits are much more than twice as numerous as earners of wages and salaries.

In Industry

The 324 lakhs self-supporting persons engaged in industries and services other than cultivation may be divided as follows :

Categories	Number (in lakhs)	Percentage
Primary industries other than mining and quarrying (0)	24.0	7.4
Mining and quarrying (1)	5.7	1.8
Processing and manufacture (foodstuffs, textiles, leather) (2)	55.1	17.0
Processing and manufacture (metals, chemicals) (3)	12.4	3.8
Processing and manufacture not elsewhere specified (4)	24.3	7.5
Construction and utilities (5)	15.9	4.9
Commerce (6)	59.0	18.2
Transport, storage and communications (7)	19.0	5.9
Health, education and public administration (8)	22.4	10.2
Services not elsewhere specified (9)	75.4	23.3

The number engaged in some of the sub-divisions of the above main divisions is as follows (the figure is in lakhs) :

Plantations—10.6; Stock-raising—6.3; Fishing—4.2; Forestry (wood cutting, collection of forest produce not elsewhere specified)—2.5; Rearing of small animals and insects—27 (in thousands); hunting—9 (in thousands).

Figures for men engaged in mining (shown below) are given in thousands except for coal-mining, and mining of stone, clay and sand which are in lakhs :

Coal-mining—3.1; Mining of stone, clay, sand—1.2.

Iron ore—9; metals other than iron—57; petroleum—3; mica—33; salt, saltpetre and saline substances—22; non-metallic minerals—11. Total for this group—135.

The figures for persons engaged in various industries given below are in lakhs :

Divisions 2, 3, 4

Milling of cereals, pulses, hand pounding of rice, dehussing, grinding of food grains—4.0;

Vegetable oil and dairy products—2.7; Sugar—1.4; Beverages (breweries, distilleries, toddy drawers, aerated waters)—1.6; Tobacco (preparation of raw leaf, makers of biddis, cigarettes, etc., snuff)—3.6; Other food industries—1.8; All food industries (except cultivators, housewives, hotel workers)—15.

Cotton textiles—20.6; wearing apparel (except footwear)—6.5; Other textiles (jute, wool, silk, hemp, flax, rayon, rope, twine, etc.)—7.1; Leather (leather products, footwear)—5.8.

Manufacture of transport equipment—2.2; Machinery (other than electrical) including engineering workshops—1.2; Basic manufacture of iron and steel—1.1; Manufacture of metal products otherwise unclassified—6.2.

Manufacture of wood and wood products (carpenters, turners, etc.)—10.4; Manufacture of non-metallic mineral products (potters, makers of earthenware, porcelain, crockery, glass bangles, etc.)—4.5.

Division 5

Total for construction and utilities (15.9).

Division 6

The total number engaged in commerce is 59 lakhs.

They fall into three groups: Retail trade (51.1); Wholesale trade (4.6); Money-lending, banking, insurance, real estate (3.3).

Among men in retail trade: Selling food stuffs (22.5); Selling fuel (1.9); Selling textiles and leather goods (5.6).

Division 7

Total for Transport, Storage and Communications (19.0); Transport by road (8.9); By railway (5.7); By water (2.2); By air (18 thousand).

Division 8

Total for Health, Education and Public Administration (32.9).

Medical and health services (8.8).

Total for educational services and research

(7.4): of these stationed in towns (3.7); in villages (3.7).

These were divided as follows*: Professors, lecturers, teachers, research workers, employed in universities, colleges, research institutions (99,256); other professors, lecturers, teachers (549,544).

Total for public administration (21.6). These may be divided as follows:

Employees of Central Government (5.03); Total employees of State Governments (14.26);

* Excludes five Districts in Bihar.

Employees of District Boards, Municipalities and other local bodies (2.24).

These may be sub-divided as General administration (8.09); Police (other than village watchmen) (3.80); Village establishments including village watchmen (2.37); Employees of local bodies (2.24).

Division 9

Services not elsewhere specified (75.4). Of these nothing is known of 37.3 except that they

are self-supporting.

The following para. gives the details about the rest of the 38.1 lakh persons (the number is in thousands):

Domestic service (1,424); Laundries and laundry services (565); Barbers and beauty shops (511); Religious, charitable and welfare services (369); Legal and business services (230); Recreation services (214); Hotels, restaurants and eating houses (456); Arts, letters and journalism (39).

The following table shows the position in industries and services in some States in a sample of 10,000 self-supporting persons:

State.	0-Primary Industries not elsewhere specified.	1-Mining and Quarrying.	2-Processing and Manufacture of Foodstuffs, Textiles, Leather and products thereof.	3-Processing and Manufacture of Metals, Chemicals and products thereof.	4-Processing and Manufacture not elsewhere specified.	5-Construction and utilities.	6-Commerce.	7-Transport, Storage and Communications.	8-Health, Education and Public Administration.	9-Service not elsewhere specified.

Delhi .. .	22	5	795	370	655	964	2,247	665	2,575	1,703

The figures for the new Punjab could be obtained by adding where appropriate the figures for the old Punjab and PEPST.

DEPENDENTS

Out of 3,566 lakhs 2,143 or 60.1 per cent have been classified as non-earning dependents.

The table below shows the rural-urban and the sex-wise break-up of non-earning dependents:

Rural-Urban	Number (in lakhs)	Percentage
Rural males ..	674	45.0
Urban males ..	152	45.6
Rural females ..	1,065	73.5
Urban females ..	252	88.1
	2,143	60.1

There are 379 lakhs or 10.6 per cent earning dependents in the country. They are dependents in the sense that left to themselves they cannot support themselves.

The table below shows the rural-urban and sex-wise break-up of earning dependents.

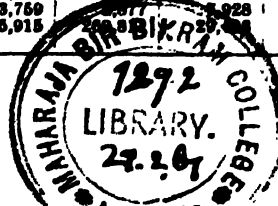

Rural-Urban	Number (in lakhs)	Percentage
Rural males	119	7.9
Urban males	15	4.6
Rural females	232	16.0
Urban females	13	4.5
	379	10.6

LITERACY AND EDUCATIONAL STANDARD

The test of literacy is ability to read and write a simple letter in some language.

All India percentage of literacy: 16.6; West India zone: 23.8; South India: 22.8; East India: 16.8; North-West India: 13.3; Central India: 10.9; North India: 10.8.

All India percentage of male literacy 24.9, of female 7.9.

In absolute numbers, out of 36 crores about 6 crores are literate. Out of 30 crores who are illiterate about 6 lakhs can read but not write. About 90 lakhs have reached the middle school standard, and 38 lakhs (women 5 lakhs) Higher

Secondary School Standard.

The total no. of those who have reached the Intermediate standard in Arts and Science: 407,000 (men), 59,000 (women).

The total no. of the holders of degrees and diplomas: 991,000 (men), 183,000 (women).

The above figures (degree and diploma) are broken up as follows. The first figure relates to men, the second to women:

Graduates in Arts and Science: 284,000; 37,000. Post-graduates in Arts and Science:

58,000; 7,000. Teaching: 151,000; 38,000. Law: 64,000; 1,000. Health and Medicine: 64,000; 8,000. Engineering: 35,000; 1,000. Commerce: 31,000; 1,000. Agriculture and Veterinary: 12,000; 1,000.

Percentage of literacy among agricultural classes: 12.1 (males 19.6, females 4.5). Among non-agricultural classes: 29.0 (males 39.7, females 17.0). In commerce in latter group: 37.9 (males 51.6, females 22.6). In Transport: 32.7 (males 41.7, females 21.7).

Percentage of literacy for those above the age of ten: urban: men 55, women 27; rural: men 24, women 6.

LITERACY—BY STATE

The following tables on literacy are not based on the entire population but on a 10 per cent sample.

A literate person is one who can read and write a simple letter. A person who can only read but not write a simple letter is a partially literate person.

The sample count data relate to males and females separately. In the sample males are slightly over-represented. Hence figures for total persons cannot be arrived at by merely adding the figures for males and females.

The table below gives the sample figures by State:

States, Union Territories	Total		Literate		Illiterate	
	Males	Females	Males	Females	Males	Females
INDIA	18,003,778	16,916,101	4,238,842	1,290,833	13,764,936	15,625,468

LANGUAGES

We give below some facts and figures relating to language :

Total number of speakers of languages specified in the constitution : 323,972,607 ; Number speaking Hindi, Urdu, Hindustani, Punjabi : 149,944,311 ; Telugu : 32,999,916 ; Marathi : 27,049,522 ; Tamil : 26,546,764 ; Bengali : 25,121,674 ; Gujarati : 16,310,771 ; Kannada : 14,471,764 ; Malayalam : 13,380,109 ; Oriya : 13,153,909 ; Assamese : 4,988,226 ; Kashmiri : 5,086 ; Sanskrit : 555.

The percentage to total is as follows :

Hindi, Urdu, Hindustani : 46·3 ; Telugu : 10·2 ; Marathi : 8·3 ; Tamil : 8·2 ; Bengali : 7·8 ; Gujarati : 5·1 ; Kannada : 4·5 ; Malayalam : 4·1 ; Oriya : 4·0 ; Assamese : 1·1.

Tribal languages (with speakers numbering one lakh and over for each language) : 11,531,848 ; Other Indian languages (with speakers numbering one lakh and over) : 17,698,041 ; Other Indian languages (with speakers numbering less than a lakh) : 2,860,974 ; Non-Indian languages : 226,251 ; Unclassified population : 589,673.

Number of Hindi speakers in North India : 50,454,217 ; East India : 34,036,450 ; South India : 149,287 ; West India : 492,906 ; Central India : 20,506,477.

Number of Urdu speakers in North India : 4,300,425 ; East India : 3,360,352 ; South India : 869,858 ; West India : 1,977,607 ; Central India : 2,904,632.

Number of Hindustani speakers in North India : 6,742,937 ; South India : 1,345,662 ; West India : 8,006 ; Central India : 59,939.

Number of Punjabi speakers in North India : 323,456 ; East India : 90,443 ; South India : 8,639 ; West India : 68,978 ; Central India : 78,364.

Hindi, Urdu, Hindustani, Punjabi in North-West India : 22,159,456.

Andaman and Nicobars : Hindi : 975 ; Urdu : 862 ; Hindustani : 4,139 ; Punjabi : 224.

U.P. : Hindi, Urdu, Hindustani : 99 per cent ; Punjabi : 324,000.

Bihar* : Hindi (as including Bihari, Urdu) : 34·8 millions ; Bengali : 17·6 lakhs ; Oriya : 3·1 lakhs. Santhal Parganas Dt. (Hindi 48 per cent, Santhali 42 per cent) ; Dhanbad Dt. (Hindi 65 per cent, Bengali 23 per cent) ; Singhbhum Dt. (Ho 29 per cent, Oriya 20, Bengali 14, Hindi 14, Santhali 10) ; Manbhum Dt., (Purulia Dt.) (Bengali 52 per cent, Hindi 32, Santhali 14) ; Purna Dt. (Hindi 92 per cent).

Oriasa : Oriya : 12,065,272 ; Tribal : 1,837,732 ; Ganjam Dt. (Oriya 72 per cent ; Telugu 15) ; Phulbani (Oriya 54 per cent ; Kni 37) ; Mayurbhanj (Oriya 53 per cent ; Santhali 24 ; Ho 11) ; Koraput Dt. (Oriya 55 per cent, Kondh 13, Paraja 12) ; Keonjhar Dt. (Oriya 71 per cent) ; Sundergarh (Oriya 72 per cent).

W. Bengal* : Bengali : 20,994,374 ; Hindi : 1,574,786 ; Midnapur Dt. (Bengali 90 per cent) ; Malda Dt. (Bengali 88 per cent) ; West Dinajpur Dt. (Bengali 78 per cent) ; Jalpaiguri Dt. (Bengali 57 per cent, Hindi 14 per cent) ; Darjeeling Dt. (Nepali 20 per cent, Rai 15, Bengali 14, Tamang 11).

Assam : Assamese : 4,972,493 ; Bengali : 1,447,075 ; Goalpara Dt. (Assamese 62 per cent, Bengali 17).

Tripura : Bengali : 273,441 ; Tripuri : 129,379.

Madras* : Hindi : 100,269 ; Bellary Dt. (Kannada 55 per cent ; Telugu 30) ; Coimbatore (Tamil 66 per cent ; Telugu 20) ; Kannada 11) ; Madras (Tamil 68 per cent ; Telugu 16) ; Nilgiris Dt. (Tamil 34 per cent ; Badaga 21 ; Malayalam

13 ; Kannada 13) ; South Kanara Dt. (Telugu 40 per cent ; Malayalam 24 ; Kannada 17 ; Konkani 14) ; Srikakulam Dt. (Telugu 89 per cent).

Travancore-Cochin*†† : Malayalam : 86 per cent ; Tamil : 12.

Trivandrum Dt. (Malayalam : 61 per cent ; Tamil : 39).

Bombay* : See under Bombay State.

M.P.* : Number of speakers per 1,000 of the population : Hindi 590, Marathi 293, Gond 59, Oriya 18, Nagpur Dt. (Marathi 75 per cent, Hindi 12), Betul Dt. (Hindi 43 per cent, Gond 27, Marathi 19), Nimar Dt. (Hindi 34 per cent, Nimadi 21, Marathi 15, Korku 11), Bastar Dt. (Halbi 29 per cent, Gond 27, Maria 12, Chhattisgarhi 10) ; Raipur Dt. (Hindi 57 per cent, Chhattisgarhi 26, Oriya 13), Bilaspur Dt. (Hindi 98 per cent).

Hyderabad*†† : Telugu : 8,921,524 (47·8 per cent, Marathi : 4,541,982 (24·3 per cent), Urdu : 2,159,214 (11·6 per cent), Kannada : 1,961,901 (10·5 per cent), Hindi : 133,733 (0·7 per cent) ; Nanded Dt. (Marathi 65 per cent, Urdu 11) ; Bidar Dt. (Marathi 39 per cent, Kannada 28, Urdu 16, Telugu 15) ; Hyderabad (Telugu 53 per cent, Urdu 35) ; Gulbarga Dt. (Kannada 55 per cent, Telugu 21, Urdu 16) ; Adilabad Dt. (Telugu 56 per cent, Marathi 21, Gond 10) ; Raichur Dt. (Kannada 63 per cent, Urdu 10, Telugu 24).

Myseore* : Kannada : 5,990,297 ; Telugu : 1,375,732 ; Tamil : 651,260. Bangalore Corporation (Kannada : 184,977 ; Telugu : 136,611 ; Tamil : 246,881) ; Bangalore (Kannada : 864,462 ; Telugu : 239,704 ; Tamil : 107,224) ; K. O. F. City (Kannada : 8,538 ; Telugu : 31,514 ; Tamil : 97,304) ; Kolar (Kannada : 230,066 ; Telugu : 579,460 ; Tamil : 54,157).

* Shows the position before the State was reorganized in Nov. 1956.

†† The State has ceased to exist as from 1st Nov. 1956.

AGE GROUPS

The following table shows the percentage of different age-groups to the total population :

	Age Group	Percentage to total population.
Infants and young Children	0 to 4	13·5
Boys and Girls	5 to 14	24·8
Young men and women	15 to 24	17·4
	25 to 34	15·6
Middle-aged men and women	35 to 44	11·9
	45 to 54	8·5
Elderly persons	55 to 64	5·1
	65 to 74	2·2
	75 and over	1·0

The following table shows age-groups for some States in a sample of 10,000 persons.

State	Infants	Young Children 1 to 4	Girls & Boys 5 to 14	Young men and women 15 to 34	Middle aged persons 35 to 54	Elderly persons 55 and over
India	329	1,026	2,482	3,298	2,038	828
Zones :—I—North India	332	1,013	2,505	3,218	2,090	840
II—East India	373	1,000	2,424	3,238	2,036	880
III—South India	263	986	2,445	3,364	2,096	847
IV—West India	325	1,055	2,573	3,410	1,925	712
V—Central India	300	1,041	2,534	3,285	2,066	773

SEX RATIO

In India as a whole the total number of males is 183 millions, and of females 174 millions.

The sex ratio has varied as follows : 1921—956; 1931—951; 1941—946; 1951—947.

It may be mentioned here that in the world as a whole the sex ratio is probably 992.

The sex ratio in percentage of males to females is 51·4 per cent—practically no change from 1941.

In the country as a whole the sex ratio as mentioned above is female to male 947 to 1,000. The lowest is 883 in the north-west, the highest

is 999 in south India where practical equality of the sexes exists.

In general the sex ratio is smaller in towns than in villages. For the country as a whole the sex ratio in villages is 966, while that in towns is 860.

The sex ratio in villages is lowest in north-west India (895). In the villages of south India females outnumber males (1,004).

The urban sex ratio is lowest in east India (719). It is highest in south India (977).

The difference between the rural sex ratio and the urban sex ratio is very large in east India (258). It is smallest in south India (27).

In the country as a whole there are 235 lakhs of people living in cities. Of these 132 lakhs are males and 103 are females.

The sex ratio for all cities is 787. It is lowest for east India (641) and highest for the south (940).

The sex ratio for the ten largest cities (town groups) is as follows :

Greater Calcutta, 602; Greater Bombay, 596; Madras, 921; Delhi, 750; Hyderabad, 989; Ahmedabad, 764; Bangalore, 883; Kanpur, 699; Poona, 833; Lucknow, 783.

Males and females are not born in equal numbers. They do not die in equal numbers. Hence the difference in the numbers of males and females.

CIVIL CONDITION*

	Total			Unmarried		Married		Widowed or divorced	
	Persons	Males	Females	Males	Females	Males	Females	Males	Females

Sikkim	2	476	387	134	40	477	260	123
Himachal Pradesh and Bilaspur	9	467	370	154	20	544	230	110
Delhi	17	466	366	118	23	623	269	66

Out of every 10,000 persons in India 5,133 are males and 4,867 are females.

Among them 2,521 males (49.1 per cent) and 1,896 females (38.8 per cent) are unmarried. Together the unmarried people are about 44.1 per cent of the population.

To put it the other way round, among men 45.8 per cent are married and 5.0 per cent are widowers, and among women 48.4 per cent are married and 12.8 per cent widows.

The number of divorced persons in India is 144,786 or 0.4 per cent.

The proportion of unmarried persons is highest in south India (48.2 per cent) and lowest in central India (41.1 per cent).

The 1951 census counted 2,888,000 married males and 8,118,000 married females, 66,000 widowers, 134,000 widows all between the ages of 5 and 14.

The approximate number of marriages contracted in contravention of the law would be 91,50,000.

But there is evidence that the child marriage rate is diminishing. The percentage of married females under 15 of all married females was 9.6. This dropped to 7.4 in 1951.

The percentage of unmarried women above 15 is 6.4.

Facts concerning marital status in villages and towns separately are as follows :

In the villages, out of 10,000 persons 2,388 are married males and 2,407 are married females.

In the towns the corresponding figures are 2,429 and 2,105.

There is a fall in the proportion of widowers and also of widows. The former fell from 5.6 per cent in 1931 to 5.0 per cent in 1951. The latter fell from 16.1 per cent in 1931 to 12.8 per cent in 1951.

For maternity only married women in the age-group 15 to 44 are to be taken into account.

We have to base our findings on investigations carried out in Travancore-Cochin State during the 1951 census.

On an average a mother in the former Travancore-Cochin area (mostly part of Kerala now) where this particular investigation was conducted—a mother who lives to complete her child-bearing period gives birth to more than 6 children but not more than 7.

Out of this the number actually alive on census day was 4.6. Among the children born alive 2 had died predeceasing their mother.

Thus in the Travancore-Cochin area the child birth index is 6.6, child survival index 4.6, child loss index 2.0.

Age group	Child birth index	Child survival index	Child loss index
Under 20 ..	1.2	1.0	0.2
20—24 ..	1.8	1.4	0.4
25—29 ..	2.9	2.3	0.6
30—34 ..	4.2	3.2	1.0
35—39 ..	5.3	4.0	1.3
40—44 ..	6.2	4.6	1.6
45 and over ..	6.6	4.6	2.0
Average ..	4.3	3.2	1.1

The child birth indices of mothers divided into groups were as follows :

Agricultural landholders' and tenants' families	4.5
Agricultural labourers' families	4.1
Non-agricultural families	4.2
Rural	4.3
Urban	4.2

Mothers can be divided into two groups : those who commenced child-bearing during the ages 15 to 19 (Maternity Type A), and those who commenced child-bearing during the ages 20 to 24 (Type B).

Their child birth indices are as follows :

	Type A	Type B
Under 20	1.2	—
20—24	2.0	1.3
25—29	3.6	2.3
30—34	4.8	3.7
35—39	6.0	4.9
40—44	6.8	5.8
Over 45	7.3	6.4

Investigations of a different sort have given the following results :

The total number of births which occur in the course of one year among about 1,000 persons is 40. Among these 40 births, 8 births are first births, 16 births are either first births or second births; 23 births are either first, second or third births; and 17 out of 40 are either fourth births or births of a higher order.

The following table shows the child-birth indices for different age-groups of mothers and child survival and loss indices by State (pre-reorganisation) from a sample census :

State (Pre-reorganisation)	Age Group of Mothers					Average for all ages	All ages	
	Incomplete Maternity experience				Complete maternity experience 45 and over		Survival index	Loss index
	Under 15	15-24	25-34	35-44

* Number of mothers less than 10.

† The State has either ceased to exist or has been drastically reorganised as from 1st Nov. 1956.

Himachal Pradesh and Bilaspur were merged on 1st July, 1954.

VITAL STATISTICS

The following table shows the number of births and deaths registered in each of the three decades. The figures in the first two columns

are in lakhs. The figures in the last two columns give the mean decennial registered rates.

Year	Registered births	Registered deaths	Birth-rate	Death-rate
1921-30	669	502	33.7	25.8
1931-40	753	512	33.8	23.0
1941-50	680	486	27.2	19.4

Many births and deaths go unregistered. Making allowance for this it is calculated that the birth-rate should be around 40, and the death-rate around 27.

This would give a natural increase rate of 13 per thousand per annum during the last decade.

On the same basis the birth-rates for the various zones will be as follows:

Central India (44); west India (42); north-west India (41 or 42); north India (38 or 39); east India (38 or 39); south India (36 or 37).

The death-rates would be as follows:

Central India (34); north India (27 or 28); east India (26, 27 or 28); west India (26); north-west India (24, 25 or 26); south India (21 or 22).

The following table shows the birth, death, and infant mortality rates for the sub-continent from 1921 to 1946 and for India alone from 1947 onwards where available.

Year	Birth-rate	Death-rate	Infant mortality
1921	33	31	198
1922	33	24	175
1923	34	25	176
1924	33	28	189

1956**	27.4	11.4	108

N. A.—Not available.

* For the pre-reorganization Part A States and Coorg and Delhi.

† Excluding Bihar, M.P., Orissa.

The expectation of life for males is 32.45 and for females 31.66. In the decade 1931-40 the respective figures were 26.91 for males and 26.56 for females.

The percentage of Indian males surviving to the age 20 is now 58 as against 45 at the beginning of this century. The same idea may be expressed differently by saying that 50 per cent

of Indian males survive to age 32 as against 14 previously.

The figures given below show the expectation of life at various ages as revealed by the 1951 census for the decade 1941-50:

For males: Age 0—32.45; 5—40.86; 10—38.97; 15—36.24; 20—33.03; 25—29.78; 30—26.58; 35—23.50; 40—20.53; 45—17.63; 50—14.89; 55—12.39; 60—10.13; 65—8.18; 70—6.51; 75—5.13; 80—3.99; 85—3.06; 90—2.30; 95—1.52.

For females: Age 0—31.66; 5—40.91; 10—39.45; 15—36.66; 20—32.90; 25—29.30; 30—26.18; 35—23.52; 40—20.06; 45—18.61; 50—16.15; 55—13.69; 60—11.33; 65—9.29; 70—7.53; 75—6.03; 80—4.77; 85—3.69; 90—2.72; 95—1.59.

The figures for births and deaths are based on a sample census carried out in 20 States**. In 10 of the States** the scheme covered all the Districts, while in the remaining it covered about one-fifth of the Districts. The exceptions were Rajasthan** and PEPSU** where only one District was covered. In Uttar Pradesh the scheme covered only the rural areas. Elsewhere both urban and rural areas came under survey.

The size of the sample also differs from State to State.

The number of unregistered births per 100 registered births were also recorded to estimate the true birth-rate by correcting the registered birth-rate in some States. The published registration figures in most States suffered from serious errors and could not form the basis of any scientific estimation.

The birth-rates as calculated from the same surveys are in a majority of States between 30 and 40 but are less with two exceptions than those estimated by the Actuary of 1951 for the decade 1941-50. The trend of fall in the birth-rate may be real or it may be affected by under-enumeration of births.

The average maternal age for all orders is between 27 and 28 in a large majority of the States. The average maternal age is higher in Japan and England and lower in the U.S.A., where maternity starts almost as early as in India.

The average age for first order births is between 21 and 22; the average for second order is between 23 and 25.

The Indian child birth index may be placed at between 6 and 7. The size of the sample was very small in every case and is not altogether dependable.

Child survival and loss indices indicate a very high loss of human resources. For mothers of completed fertility the child loss varies in a majority of States between 20 per cent and 33 per cent.

The proportion of births is almost equally balanced for the age-groups 15-24, 25-34 in the larger States where it is higher for the age-group 15-24.

A better study would have been possible if we had had quinquennial age-groups as in U.P. instead of decennial age-groups.

The proportion of first order births is the highest in all the States in the age-group 15-24, about 80 per cent of the first births occurring during this period. The different order births also occur earlier in India than elsewhere. The family here grows earlier and faster.

In a majority of the States in India between 40 and 50 per cent of the births are of the first and second order. In the remaining States they are between 30 and 40 per cent. Taking the total of the births of the first three orders the percentage works out to between 60 and 70 in half the States and 50 and 60 in the remaining half. The proportion of the first three orders do not show much difference from one another. The decline starts after the third birth and even then it is not as steep as it is in U.S.A. or England. A considerable proportion of births in India is recorded under the fourth and higher orders.

The Census Commissioner has a theory about improvident maternity. All births after the third will lead to an unwanted increase in the size of the family in an under-developed country like India. The proportion of births of 4th and higher order is therefore the incidence of improvident Maternity. This incidence was 40 to 50 in half the States and 30 to 40 in the remaining States.

In India the first and second births occupy a relatively unimportant place in the later age-groups after 34. Births of higher order assume prominence with increase in maternal age.

About births, per 1,000 females (all women, married as well as others) in the same age-group a majority of the States show fertility for all ages between 100 and 125 or 125 and over. Had it not been for a certain amount of under-enumeration the figures of fertility would have been still higher.

Fertility was the highest in the age-group 25-34 in nearly all the States. In U.P. where quinquennial age-groups were used fertility is low in the age-group 15-19 but rises sharply in the next age-group 20-24 and further rises slightly in the age-group 25-29, then a decline starts. In the age-group 30-34 the decline is gradual and continues to be gradual upto 39 after which it is steep. In the age-groups 40-44 and 45-49 it is preponderately high in comparison with figures for England, U.S.A. or Japan showing the high proportion of births in these ages.

These trends are common to all the States in India.

Rural fertility was higher than urban fertility except in two States.

The total birth-rates for all orders is above 100 in a majority of the States in India. In Japan it is 76, in U.S.A. 80, in England 50.

The fertility of married women for ages 15 to 44 was for major States between 150 and 200 or 200 and over. This indicates the figure for India as about 200. Fertility fell abruptly in the group 35-44. It was at its peak in the age-group 25 to 29.

In a majority of the States the death-rate as calculated for the sample census was between 10 and 20. This was much below the rate calculated by the 1951 census actuary. It is possible there was an under-enumeration of deaths in the sample census.

The proportion of deaths at younger age was high. In 10 States the specific death-rate for age under one was well over 60; in 12 States for the age-group 1 to 4 over 25; in 12 States for the age-group 5 to 9 over 6.

About 50 per cent of the deaths occurred among children under 10 years. The rates for the other age-groups in a majority of the States were as follows:

Age-group 10 to 14 it is over 8; 15-19 over 8; 20-24 over 5; 25-29 over 6; 30-34 over 7; 35-39 over 8; 40-44 over 10; 45-49 over 13; 50-54 over 15; 55-59 over 20; 60-64 over 40; 65-69 over 45; 70-74 over 65.

The mortality rates were higher for females than for males in the reproductive ages 15-44.

The rate for infant mortality (number of deaths under one per 1,000 live births per year) was over 50 for a majority of the States. If it was not for under enumeration the rate would be higher still. The rate for the period 1941-50 as estimated by the 1951 census actuary was between 180 and 230 for males and 145 and 225 for females.

** Pre-reorganisation.

The following table shows birth-rates and death-rates and other particulars by State (pre-reorganization) :—

State (Pre-reorganization)	Birth-rate registered		No. of unregis- tered births per 100 registered as verified at the sample census	Birth-rate (regis- tered) corrected for omissions	Birth-rate (Census Actuary), 1941-50	Death-rate registered		No. of unregis- tered deaths per 100 registered as verified at the sample census	Death-rate (regis- tered) corrected for omissions	Death-rate (Census Actuary), 1941-50

			Yemen	50	1956
			Yugoslavia	N.A.	---

(a) The present position in this respect has been described as uncertain. The figure 9 lakhs relates only to the plantation population who should be entitled to Ceylonese citizenship. The number of Indians who have left Ceylon upto August 1957 is 14,271. These Indian nationals had gone to Ceylon for professional or business reasons. Number of Indians and Pakistanis registered as citizens upto March 15, 1953 in the Indian Mission was 18,500.

(b) Renamed Ghana.

(c) Persons of Indian origin.

* Indian nationals only.

MIGRATION TABLES

The following table shows the emigration and immigration figures for 1953 and 1954 :

Country	Emigration		Immigration	
	1953	1954	1953	1954
Africa	24,604	25,692	22,230	22,844
Burma	8,361	8,960	10,990	13,392
Ceylon	90,297	47,066	1,17,008	58,294
Malaya	46,042	28,465	26,514	35,506
Others	24,186	23,394	31,193	34,124
Total	1,93,480	1,33,577	2,07,943	1,64,180

The distribution of some language groups in the countries of migration would be as follows:

Tamils
Malay-Singapore : 4,80,945; Mauritius : 10,500; Fiji Islands : 10,000.

Hindustani group
Mauritius : 2,40,000; Fiji Islands : 1,24,000; Malay-Singapore : 1,360.

Gujarati
Kenya : 69,000; Tanganyika : 61,000; Uganda : 44,000; Mauritius : 21,000; Zanzibar and Pemba : 15,000; Fiji Islands : 8,000; Nyasaland : 6,000; South Rhodesia : 4,500; North Rhodesia : 3,600; Ruanda Urundi : 2,000; Indonesia : 2,000; Malay-Singapore : 1,300; Belgian Congo : 1,200.

Punjabi
Kenya : 50,000; Malay-Singapore : 30,600; Tanganyika : 5,000; Indonesia : 4,000; Fiji Islands : 3,000; Uganda : 3,000.

Telugu

Malay-Singapore : 24,100 ; Indonesia : 20,000 ; Mauritius : 3,600.

Malayalam

Malay-Singapore : 44,400.

Sindhi

Indonesia : 12,000 ; Hong Kong : 1,600.

Marathi

Uganda : 2,600 ; Tanganyika : 1,600 ; Zanzibar and Pemba : 1,000.

Bengali

Malay-Singapore : 3,900.

EMIGRATION LAWS

Emigration out of India is governed by the Indian Emigration Act (VII of 1922) and the Rules made thereunder, as amended from time to time.

"Emigration" means departure by sea out of India of a person under an agreement or with the intention to work for hire. Emigration is not lawful except from Ports which have been notified as "Emigration" Ports. Emigration for unskilled work is not lawful to any country at present, and the very departure for engaging in unskilled work to Ceylon, Burma, Malaya and Singapore is prohibited, unless exemption is granted by general or special orders of the Central Government.

Emigration for skilled work is permissible on compliance with prescribed formalities.

The functions under the Act are performed by the Central Government through the Controller-General of Emigration and Joint Secretary to the Government of India in the Ministry of External Affairs, New Delhi, with the assistance of the Protectors of Emigrants at the Emigration Ports and the Controller of Emigration, Madras, who supervises the activities of the Protectors of Emigrants in the Madras State.

Following Ports are at present Emigration Ports under the Act. Each Port has a Protector of Emigrants.

1. Bombay (Protector of Emigrants : Army and Navy Building, 148 Mahatma Gandhi Road, Bombay 1)
2. Okha (Port Officer).
3. Porbander (Port Officer).
4. Beldi (Port Officer).
5. Madras (Protector of Emigrants : 41, Mukkur Nallamuthu Chetty Street, George Town, Madras).
6. Nagapattinam (Protector of Emigrants).
7. Dhanushkodi (Protector of Emigrants : Mandapam Camp).
8. Tuticorin (Protector of Emigrants).
9. Calcutta (Protector of Emigrants : 4, Brabourne Road, Calcutta).

QUOTA BASIS

The following countries admit Indians on quota basis : Canada, U.S.A., Philippines, Thailand and Indonesia.

Canada. The Government of India and the Government of Canada have entered into a modified Agreement regarding the immigration of Indians into Canada in partial modification of the Agreement of 1951 under which the Government of Canada had agreed to admit annually 150 Indian citizens into Canada. The modified Agreement came into effect on the 1st of January, 1957.

Under the modified Agreement, the Canadian Government have agreed to increase the annual quota of immigrants from India from 150 to 300. Of these 300 immigrants, 150 will be "ordinary quota" immigrants and 150 will be "preference quota" immigrants. Relatives of Indians who have permanently settled in Canada or who have acquired Canadian citizenship will be admissible into Canada as "preference quota" immigrants while other applicants will be admissible under the "ordinary quota". It may be noted that "close relatives" of all those who have become Canadian citizens will be admitted into Canada as non-quota immigrants.

A "relative" means the husband, wife, son, daughter, brother, sister (or the husband, wife or unmarried child under twenty-one years of

age of any such son, daughter, brother or sister), father, mother, grandparent, unmarried orphan nephew or niece under twenty-one years of age, fiancé or fiancée.

A "close relative" means the husband, wife, unmarried child under twenty-one years of age, father over sixty-five years of age, or mother over sixty years of age.

Any person admitted to Canada as an immigrant might become a citizen of Canada after five years' continuous residence there. There is no legislation in Canada, federal or provincial, which discriminates against any group of citizens on grounds of national origin, race, language or religion.

Applications from prospective immigrants to Canada from India should be addressed to The Canadian Immigration Office, Faridkot House, Lytton Road, New Delhi.

U.S.A. The United States of America has fixed an annual quota of 100 for India of which 25 per cent is reserved for Indians born or residing outside India. The selection of immigrants is made by the U.S. Government. The main considerations on which selection is made are : (a) the immigrant must be a genuine East Indian, (b) must be free from contagious diseases or moral turpitude, (c) must not subscribe to anarchist or subversive theories, (d) must not be a practicing polygamist, (e) must be literate in some foreign language, and (f) must be in possession of sufficient funds to avoid likelihood of becoming public liability. For this purpose the applicant must (i) have sufficient resources in U.S. dollars (or the Indian Government's sanction for conversion of sufficient resources to dollars) to maintain himself and his family in the U.S. during the period of all-nage (5 years) or (ii) acquire a sponsor in the U.S. who will provide funds for such maintenance.

There are no laws by which people of Indian origin are subjected to any colour prejudices.

Philippines. With effect from September 1953, 50 Indian nationals are admitted per annum for permanent settlement under the Philippines Immigration Act. Selection is made by the Philippines Government through their Embassy in India.

Thailand. The quota fixed by Thailand is 200 per annum. The selection is made by the Thai Government.

Indonesia. Indonesia fixed a quota of 1,000 immigrants in 1952 to a group of four countries, viz., India, Pakistan, Ceylon and Burma. It is, however, entirely at the discretion of the Indonesian Government to permit Indians to settle in Indonesia.

FREER MIGRATION

In some of the countries, though Indians are not admitted for the specific purpose of settlement, they may be permitted to enter and reside on completion of formalities and conditions prescribed under the respective immigration and other laws of those countries. Mauritius, British East African territories of Kenya, Uganda, Tanganyika, Zanzibar, Belgian Congo, Ruanda-Urundi, Nigeria, Ethiopia, Aden, Bahrain, Iraq, Muscat, Kuwait, Saudi Arabia, Seychelles, Malaya, Indo-China, Fiji, Japan, the United Kingdom, British West Indies, British Guiana, and British North Borneo are among such countries.

The main requirements of some of the countries are indicated below :

Mauritius. An intending immigrant should be able to deposit Rs. 1,000 on entry into the Colony.

British East Africa. A person intending to engage on his own account in trade, business, agriculture, mining, and manufacture in these territories must have at his disposition prescribed capital and must obtain a certificate from the prescribed authority in the territory concerned permitting him or her to engage in a particular profession, trade or calling in that territory. Professionals like doctors, dentists, lawyers, are not required to have any prescribed capital, but

should possess sufficient capital or assured income to enable them to give effect to their intention.

The Government of Kenya have announced that their future immigration policy will be largely based on economic considerations and that Great Britain will be the primary source of immigrants of the kind the Colony needs. The scope of Indian immigration into Kenya has been further curtailed.

Fiji. Generally, permits to enter and to settle are granted to the following categories of persons :

(i) Farmers and planters if they have already acquired property in the Colony not less than 100 acres, three quarters of which must be productive land.

(ii) Professional men and women with recognised qualification intending to practise their professions.

(iii) Ministers of religion and teachers.

Malaya. Under the New Immigration Ordinance which came into force on August 1, 1953, entry permits for permanent residence will not normally be granted to fresh immigrants wishing to enter Malaya for employment or for pursuing a profession unless the applicant is a skilled artisan or his entry is considered to be in the economic interest of Malaya or Singapore, or he holds a contract of employment with a well-established business concern on terms and conditions of service of a prescribed standard, or unless he holds special qualifications to be able to pursue his profession without prejudice to the interests of persons already resident in Malaya.

British West Indies. Indians are admitted in exceptional cases, where they possess special skills that are in short supply there or who may bring capital for investment.

Belgian Congo. Entry Permits may be granted to those who can deposit a certain sum and satisfy the authorities regarding good conduct, etc.

Ethiopia. There is no particular restrictions for immigration into Ethiopia, but the Ethiopian Government's permission is required in every case.

United Kingdom. Indians are free to settle in the United Kingdom.

Switzerland. Indian nationals can go to and reside in Switzerland, subject to the laws and rules in force in that country.

ENTRY BANNED

Fresh Indian immigration is either banned or is not permitted as a matter of policy into the following countries :—South Africa, Southern Rhodesia, Northern Rhodesia, Nyasaland, Australia, New Zealand, Burma, Ceylon, most of the European and South American countries.

South Africa. Immigration of Indians into the Union of South Africa is banned.

British Central Africa. The three territories of Southern Rhodesia, Northern Rhodesia and Nyasaland were brought into a federation known as the Federation of Rhodesia and Nyasaland. Immigration is a federal subject, and it is the declared policy of the Federal Government not to admit fresh Indian immigrants excepting teachers, ministers of religion and wives and minor children of persons already settled there.

New Zealand. There is a ban on the entry of fresh Indians, but as a special case the New Zealand Government permits the entry of the children of permanent residents into New Zealand for permanent residence provided they fulfil certain conditions.

Australia. Asians, including Indians, are not allowed to immigrate into Australia for permanent settlement. However, Indians who are bona fide merchants and are in a position to engage in wholesale import-export business may be admitted and allowed to remain there so long as they continue in the trade, but without any citizenship or other rights. Indians already settled there can, however, take their wives and minor children and also shop assistants from India subject to certain conditions.

BURMA

Burma was a province of India till 1937 April when it was given a separate constitution. In 1931 the Indian population was reported to be over one million. Consequent upon the Japanese occupation of Burma in 1942, about 4 lakhs of Indians left Burma for India. After the liberation of Burma many did not return to that country in view of the changed conditions in Burma and the difficulty of obtaining employment there. The present population of Indians in Burma is estimated to be about 7 lakhs.

Indians are mainly agricultural, dock and casual labourers and small-scale business men. Some Indians are engaged in wholesale importing business.

With the introduction of the Burmanisation policy, no foreigner is now allowed to buy any property, nor can any property be transferred to any foreigner. Non-nationals in Government service are being replaced by nationals.

A large number of Indian land-owners in Burma have been adversely affected by the 'Land Nationalization' Scheme.

Under the Union of Burma Citizenship Act, 1948, an alien can become a Burma citizen by naturalisation, if he had resided continuously in the Union for not less than five years before the application and also fulfils other prescribed conditions.

As foreigners in the country, Indians as such have no franchise. Those Indians who have become Burmese citizens are entitled to all privileges including franchise that other Burmese are entitled to.

Rupees thirty a month can be remitted to dependents in India by Money Order. (Source of information: Burmese Embassy). All applications for remittances of moneys should be passed by the Burmese Exchange Control Authorities who allow remittances for maintenance of families and other specific purposes on the strength of certificates from the District Magistrate concerned in India that the payees are solely dependent on the remittances. On leaving Burma for good, assets can be transferred to India if approved by the Exchange Control Authorities in Burma.

MALAYA

The Federation of Malaya is an independent Dominion and the term Malaya now generally denotes that country alone. The other administrative area in the Malaya peninsula is Singapore, a crown colony.

Of the total Indian population of over 7 lakhs in Malaya about 70 per cent are labourers in rubber and tin estates, and the rest are either clerks or employed in business, trade and other professions like law and medicine.

Indians do not suffer from any special disabilities.

Indians are eligible for citizenship of the Federation of Malaya, if they fulfil the prescribed conditions. Many of the Indians in Malaya are qualified or entitled to become Malayan citizens.

Elections in Malaya were held in 1955. The Legislative Council is composed of 98 members of whom 52 are elected and the remaining either nominated or ex-officio. The Legislative Council has seven Indian members. There are 16 Ministers in the Federal Executive Council of whom one is Indian.

In Singapore there is no citizenship law and the British Nationality Act applies.

Under a new law as from Oct. 1957 Commonwealth citizens who have not acquired U.K. citizenship can acquire Singapore citizenship, provided reciprocal arrangements have been entered into with respective countries.

The Colony of Singapore is under a Governor; strength of Council of Ministers 12 (two of these are Indian). The strength of the Legislative Assembly is 32 (four of these are Indian).

About 27,000 Indians who took Singapore citizenship were reported to be State-less because the U.K. had not amended the British Nationality Act to include Singapore.

There are no restrictions on Indians in the matter of remittances to India.

CANADA

Indian residents of Canada are largely comprised of labourers employed in lumbering and trucking. There are a few lumber mill owners, and some are working as clerks in various establishments. The majority of Indians are in British Columbia. The Indian community is called the "East Indian Community".

There are no disabilities on Indians in the matter of owning property, engaging in trade or profession, entering Government service or residence in any locality. The period for qualification for citizenship is 5 years. In 1952, one Indian was elected to a Municipal Council.

Indians can remit to India any amount earned in Canada.

BRITISH GUIANA, WEST INDIES

Indians form the bulk of sugar plantation labour in British Guiana and Trinidad. A good number of them work also on cocoa plantations. They are the backbone of the countries' agriculture, and grow rice and vegetables. There are also a number of prominent Indian merchants, doctors and teachers.

In British Guiana, Indians constitute the largest single racial group. (46 per cent of the total population.) In Trinidad Indians are about 56 per cent of the total population.

Very few Indians have been employed in Government service. A vast majority of Indians are illiterate. In Jamaica, a large number of dairies are owned by Indians.

There is no discrimination against Indians in British Guiana or Trinidad, and they enjoy the same citizenship rights as other nationals of these territories.

Indians have been elected to the Executive and Legislative Councils of British Guiana. The Constitution of British Guiana was suspended in 1953 and all the members of the Legislative Council were nominated.

In Trinidad the first general election under the revised constitution was held on Sept. 24, 1956 in which the Peoples' National Movement won 13 of 24 Legislative Council seats. Of the 24 seats nine were held by Indians. The Executive Council consisted of 10 members, two of whom were Indian.

Another election was held in March 1958. Only 26 per cent of the people are reported to have exercised their franchise rights. 25 members of the Federal Labour Party and 19 of the Democratic Labour Party were elected to the House of Representatives—the Federal Parliament. The elected representatives from the Democratic Labour Party include three Indians.

In Jamaica where Indians form only 1.7 per cent of the total population there is one Indian member in the Lower House comprising 32 elected members.

Money can be freely sent to India from the British West Indies.

MAURITIUS

Indians in Mauritius form about 67 per cent of the total population of the Colony. The Indian population is mainly composed of descendants of "indentured" labourers from Madras, U.P. and Bihar, but there is a sprinkling of traders from Bombay. Indians have settled there for generations and are now termed "Indo-Mauritians". A large proportion of them are farm-labourers on sugar plantations. The rest are engaged in commerce and trade or are doctors, lawyers, government servants.

Indians are mostly illiterate, and on the whole their economic and social conditions are not as satisfactory as in some other Colonies.

There is no colour bar against Indians, nor do they suffer from any political disability.

The Legislative Council of the Colony as at present constituted consists of 35 members including the Governor as President, three ex-officio, 12 nominated and 19 elected members. Of these 35 members 14 are Indian.

Fresh proposals for constitutional advance were made in 1956. Some of these were implemented later in the year. The strength of the Executive Council was raised from 9 to 12 of whom seven will be non-official members. The Executive Council will exercise collective responsibility. All members will be designated Ministers and six non-official members will be assigned portfolios.

The rest of the proposals are to be implemented in 1959, when fresh elections will be held and the number of elected members of the Legislative Council increased from 19 to 40.

Besides the 40 elected members, there will be three official members and not more than 12 members nominated by the Governor. The new Executive Council will have 12 members, three of whom will be officials. The remaining nine members will be appointed by the Governor from the legislature. All the members of the Executive Council including the officials, will be designated Ministers.

There are no restrictions on remittances to India.

EAST AFRICA

British East Africa consists of the four territories of Kenya, Uganda, Tanganyika and Zanzibar.

The majority of the Indians in these territories are engaged in commercial undertakings. Artisans, technicians, Government servants, doctors, lawyers, make up most of the balance.

Indians in East Africa—numbering about 2 lakhs—are mostly concentrated in urban centres. In Kenya and Tanganyika they constitute about 59 per cent of the total non-native population of each territory; in Uganda they form the single largest community among the non-Africans, being about 82 per cent of the non-African population. Their general economic condition is on the whole very satisfactory. Many of them are quite well-to-do.

In Uganda some Indians have big factories, e.g., sugar, meal and ginning. About 90 per cent of the total trade of Uganda passes through Indian hands.

Indians (and also other non-Europeans) are not allowed to own or lease land in the Kenya Highlands for agricultural and industrial purposes. Anti-Asiatic regulations prevent the purchase or occupation of certain residential sites in Nairobi and Mombasa (in Kenya) by Indians.

Indians are, in practice, discriminated against in the matter of appointments under the Government; they are generally excluded from appointments to higher posts. An Indian (or other non-European) gets less pay than a European for the same work. But this position is being remedied.

In Kenya, grants for social services, e.g., education, are more favourable to Europeans than to Indians.

Indian residents in these territories are entitled to acquire the citizenship of the U.K. and Colonies under the British Nationality Act. Normally one year's continuous stay or birth in the territory is necessary.

In Kenya, the population is divided into race categories for the election of members to the Legislative Council; the Indian electoral roll is further subdivided as between Indian Muslims and other Indians. Out of six seats two are for Indian Muslims and four for other Indians.

Indians also enjoy municipal franchise in these territories.

SOUTH AFRICA

Persons of Indian origin in South Africa numbering about 430,000 are mostly labourers, traders, small farmers, factory workers, and in small numbers professionals.

Racial discrimination against Indians exists in South Africa in every walk of life and in the worst possible form. Persons of Indian origin are practically excluded from parliamentary, provincial and municipal franchise as well as from public services except in menial and subordinate posts.

"Apartheid" or racial segregation is the declared policy of the South African Government. In accordance with this policy Indians are subject to a number of restrictions as regards immigration, inter-provincial migration, residence, trade, industry, professional and other occupations. Racial segregation is also enforced in schools, post offices, railways, public transport, hotels, churches, social and religious gatherings and public utility undertakings.

The outstanding piece of anti-Asiatic legislation is the Group Areas Act, 1950. By this Act, the entire population of the Union has been divided into three main groups, White, Native and Coloured. Persons of Indian origin are included in the Coloured group. The Government will establish by proclamation "group areas" for exclusive occupation or ownership or both, of any of the groups. The various racial communities will have to live and occupy premises for trade and professions only in areas allotted to them. Indians and other non-Europeans will thus not be able to continue to hold properties in an area declared for the European group. The Union Government has already started taking active steps for the proclamation of group areas in a number of important cities in the Union. When the Act is fully implemented, persons of Indian origin will have to move into the areas exclusively reserved for them and this will disrupt their trade and business and involve immense losses running to millions of pounds.

The Group Areas Act was further amended in 1955 (Act No. 4 of 1955) to invest increased powers to the Land Tenure Advisory Board.

Asians have been declared prohibited immigrants since 1913, but the right of entry into the Union of wives and children of Indians domiciled in South Africa was provided for in the Reciprocity Resolution passed at the Imperial Conference of 1918 and later in the Cape Town Agreement of 1927. Under an Act passed in 1953, the Union Government banned the entry into South Africa of the wives and children of persons of Indian origin domiciled in the Union. But certain specified categories of wives and children of persons of Indian origin were allowed to enter South Africa till 10th February 1956.

The aim of the present South African Government in regard to Indians is their ultimate repatriation to India.

Practically all Indians domiciled in South Africa are South African citizens by law, but they are denied some of the most important rights of citizenship.

No Indian, who is not already a South African citizen, is allowed to acquire South African citizenship.

Indians have no franchise rights in the Provinces of Natal and Transvaal. In the Cape Province they enjoy limited franchise rights as for Cape Coloureds.

Indians are not eligible to a place in the Executive Council or Legislature, whether provincial or central.

There is no special limit to remittances by Indians to India.

The question of the treatment of the people of Indian origin in South Africa was placed before the General Assembly of the United Nations in 1946. In that year the U.N. General Assembly passed a resolution expressing the opinion that "the treatment of Indians should

be in conformity with the international obligations under the agreements concluded between the two Governments and the relevant provisions of the Charter." Resolutions have been passed in subsequent sessions of the U.N. General Assembly in this respect, but the Union Government have paid little attention to these resolutions. In the Resolutions adopted in 1950 and afterwards the Union Government was also called upon to suspend the implementation of the Group Areas Act pending the conclusion of negotiations between the Governments of India, Pakistan and South Africa. But the Government of South Africa has proceeded with the implementation of this Act despite these Resolutions.

On Nov. 26, 1957 the U.N. passed two resolutions: The first by 59 votes to 6 with 14 abstentions that South Africa had not modified its race policies and asking that it should do so. The second resolution was passed by 64 votes to none with 16 abstentions asking South Africa to begin negotiations with India and Pakistan on the treatment of people of Indian origin.

The question of the treatment of people of Indian origin in South Africa was again discussed in the U.N. General Assembly in 1958 which was boycotted by the South African delegation. A resolution was adopted to express regret that the Government of the Union of South Africa have so far ignored all requests of the General Assembly and not changed its policy of apartheid which is in direct violation of the U.N. Charter.

SOUTHERN RHODESIA

Indians in Southern Rhodesia are mostly traders. Immigration of Indians into Southern Rhodesia has been prohibited since 1924, and only wives and children under 16 of domiciled Indian residents are admitted.

Although there are no discriminatory laws as such against Indians, in practice and in the interpretation of laws discrimination against them exists, particularly in the social sphere. Indians are not eligible for appointments to the Fixed Establishment of the Civil Services, and are not admitted into the Armed Forces. Indians are required to obtain special permits in order to purchase, possess or sell arms and ammunition whereas Europeans can do so on ordinary permits.

There is a common roll for all races with common qualifications. Of about 50,000 voters in the territory, between 400 and 500 are Indians.

There is no limit to remittances to sterling area countries.

CEYLON

Out of a total of about 10 lakh persons of Indian origin in Ceylon, about 781,000 (labourers, subordinate staff, etc.) are in the tea, rubber and coconut estates. The balance is made up of merchants, shop assistants, land proprietors, and professional men such as doctors, accountants, lawyers and their families.

There is no restriction on Indians acquiring property in Ceylon, but non-Ceylonese are not allotted Crown Land. Trade in certain commodities and with certain countries like Japan and Germany is exclusively reserved for Ceylonese enterprises. Certain rights like fishing rights and the ownership of industries like public transport (omnibuses) are restricted to Ceylonese. Government service is restricted to Ceylonese except that foreigners are appointed on a contract basis when no qualified or suitable Ceylonese is available. Consequently Indians who have not acquired Ceylon citizenship have severe handicaps. Indians are also denied certain privileges such as National Insurance and un-employment relief.

The rights of Indians to citizenship are governed by two Acts enacted in 1948 after a discussion between the Indian and Ceylonese Prime Ministers. These Acts are the Ceylon Citizenship Act and the Indian and Pakistani Residents (Citizenship) Act, which provide that the Indian residents in Ceylon would be entitled to obtain the citizenship of Ceylon by registration subject to the following conditions: (a) an

applicant must be resident in Ceylon when the laws came into force and must have been residing in Ceylon since January 1, 1936 if a bachelor and since January 1, 1939 if a married man, (b) he must have adequate means of livelihood, (c) he should be in a position to comply with the laws and customs of Ceylon, and (d) the application for registration was filed and submitted to the Controller of Registration before August 5, 1951.

An Agreement was entered into in January 1954 between the Government of India and the Government of Ceylon regarding the citizenship rights of persons of Indian origin in Ceylon. Under this Agreement the Government of Ceylon agreed to expedite the registration of citizens under the Indian and Pakistani (Citizenship) Act and to make every endeavour to complete the disposal of pending applications within two years.

At a conference held in October 1954 at New Delhi between the Representatives of Ceylon and India, it was agreed that applications for Indian citizenship by persons of Indian origin will not be refused on the ground that an applicant had earlier applied to the authorities in Ceylon for registration as a Ceylonese citizen, and that pending registration of such persons either as Ceylonese or as Indian, they will be issued Identity Certificates for travel to India by the authorities (Indian or Ceylonese as the case may be) with whom their applications for citizenship are pending. The Ceylon Government have also agreed that all those who hereafter become Indian citizens will be allowed to continue in their employment in Ceylon till the age of 55. They have further agreed to facilitate the registration of persons of Indian origin as Ceylonese citizens.

The total number of applicants for Ceylon citizenship is estimated to be about 850,000.

Out of these, the applications of about 96,923 persons were still reported as pending disposal as on September 1, 1954.

The Government of Ceylon launched their scheme of repatriating Indians at the end of 1954. Indians whose temporary residence permits had expired were served with quit notices.

In April 1955 the Government of Ceylon amended their Immigrants and Emigrants Act of 1948 whereby they have shifted the onus of proof in a prosecution under the Immigrants and Emigrants Amendment Act on the accused. The employment of persons who are unable to prove their nationality, has been made illegal and the employers rendered liable to prosecution.

Till the end of June 1957, about 23,285 Indians served with quit notices returned to India.

Pursuant to January 1954 Agreement, the Ceylon Government enacted the Indian and Pakistani (Parliamentary Representation) Act of 1954. Under it, for the purpose of voting the entire island of Ceylon is made into a single Constituency, from which registered citizens of Indian origin shall elect four members to the House of Representatives. The voting will be separate till 1966, after which registered citizens of Indian origin will also be brought on the general electoral register.

The Parliament of Ceylon consists of the House of Representatives (Lower House) and the Senate (Upper House). The strength of the House of Representatives was 101, 95 elected and 6 nominated members. Under the Constitution Amendment Act, 1954 the number of members of the House of Representatives has been increased from 101 to 105 to provide for the representation of 4 members to be elected from the Indian and Pakistani Residents Constituency.

But by a later Bill passed by the Parliament the separate electorates were to be abolished.

An agreement on the Ceylonization of Indian business undertakings was reached on Nov. 22, 1954. It was agreed that Indian firms could retain essential (technical, involving trust and confidence) personnel, but only Ceylonese should be employed in lower and middle ranks and that they should be trained for executive posts.

Remittances from Ceylon are governed by the Exchange Control Regulations in force which are altered from time to time in accordance with the financial situation in Ceylon. Under the existing Exchange Control Regulations remittances upto a maximum of one-third of proved income in Ceylon may be sent to India. All non-Ceylonese holding valid residence permits can obtain Exchange Control Cards from the Post Offices for a monthly remittance of Rs. 30 for purposes of maintenance.

FIJI

Indians have played an important part in the development of the economic resources of the Fiji Islands. Indian residents are the descendants of the indentured immigrants from India who started coming into the Colony in 1879. The Indian population is about 49 per cent of the whole population of the island. The majority of the Indians are independent farmers, agricultural labourers, skilled and semi-skilled workers; the rest being teachers, clerks, storekeepers, doctors, lawyers. Sugar-cane production and road transport are Indian monopolies.

There is no colour bar in Fiji and Indians suffer from no 'political disabilities'. There is also no racial discrimination against Indians with regard to appointment to the civil services. However, under the present Government regulations, Indians cannot own land which is marked as 'Native Land Reserve' or Crown Land, without the approval of Government; but there are no restrictions on their acquiring freehold land.

Indians in Fiji have franchise both in respect of Legislature and Local Town Council but the franchise is on a communal basis.

The Legislative Council consists of 31 members—16 officials and 15 non-officials. In the non-official group Europeans, Indians and Fijians have equal representation with 5 members for each group. Of the 5 Indian members 3 are elected on a communal franchise and 2 are nominated. The Executive Council consists of 4 officials (excluding the Governor) and 3 non-official members. One of the non-official members is an Indian elected from among the Indian members of the Legislative Council.

There are no restrictions on the remittance of money outside Fiji.

AUSTRALIA, NEW ZEALAND

The majority of persons of Indian origin settled in Australia are engaged in retail trade or agricultural operations.

Indians domiciled in Australia do not suffer from any disability and have all citizenship rights. In accordance with the White Australia policy, fresh Indians are, however, not admitted for permanent settlement.

The Commonwealth franchise was granted to Indians domiciled in Australia in 1925.

The great bulk of Indians in New Zealand are engaged in the sale of fruits and groceries. Domiciled Indians are not generally subject to any disability or discrimination.

Indians have always enjoyed the right to vote both in Municipal and Parliamentary elections.

Indians can remit a limited amount to India for maintenance of wives and children. Up to April 1962, the limit was £55 for wife and £5 for each child (subject to maximum of 4 children) per quarter, but since then a 50 per cent cut has been imposed.

A TOURIST'S GUIDE*

For all information and assistance, visitors are advised to contact the Government of India tourist offices in India. The representatives of the Tourist Department are stationed on duty at the airport and in the case of Bombay a representative of the Tourist Office always meets all important passenger liners.

THE following hints meant for foreign tourists may be useful:

1. Every foreign tourist entering India should be in possession of a valid passport issued by his Government.

He should also obtain before leaving his country a tourist visa from the Indian representative abroad (or the British representative in countries where there are no Indian representatives). Commonwealth citizens (except those of Pakistan and Ceylon) are exempt from the visa requirement, provided their passports are valid for travel to India. Persons of non-Indian origin domiciled in South Africa are, however, required to obtain visas.

Transit visas are not required for through air/ship passengers in direct transit by the same flight or by the next regularly scheduled flight irrespective of whether the flight is of the same or a different Airline, provided the period does not exceed 72 hours and provided the mode of journey does not change. One can however leave the airport or ship by obtaining a landing permit for 72 hours and on depositing his passport.

The normal period of stay on a tourist visa is 3 months, and on a transit visa 15 days.

The tourist visas can be further extended by two months.

For short visits not exceeding 2 weeks to Pakistan, Nepal or Ceylon tourists may obtain "no objection to return to India" certificates and return visas from the State Governments.

Visas for India are, unless otherwise specified, valid for a single journey only.

2. All non-Commonwealth tourists arriving in India are required to get themselves registered at the port of arrival and obtain certificates of registration. They will be registered as "tourists" if in possession of a tourist visa, and will not be required to report their movements to the police or registration authorities during their stay in India.

3. The Government of India have placed no health restrictions on persons entering India by sea or air, except in regard to yellow fever.

However, all persons are advised, in their own interest, to be protected against small-pox and cholera according to international requirements.

4. All baggage is open to customs examination. The duty payable on most articles varies from 25 per cent to 100 per cent or more according to the article.

Certain personal effects are allowed to enter free. Also alcoholic liquor up to one quart, provided the tourist can procure a permit on arrival by producing his Tourist Introduction Card. Liquor permits are issued to tourists at the Santa Cruz Airport, Bombay and at Ballard Pier, on application immediately on landing. Failing this, the permit may be obtained from the Foreign Liquor Permit Office, Old Customs House, Mint Road, Fort or from the excise official at the following hotels: Taj Mahal, Greens, Ambassador, Grand, West End and Ritz.

5. Tourists are allowed to bring into India any amount of Indian or foreign currency notes or coins subject to declaration except in the cases specified below:

Indian coins from Pakistan Rs. 5 in value, Indian coins from Afghanistan Re. 1 in value. There is no limit on the amount of Travellers' Cheques.

The official rates of exchange are as follows: £1 equal to Rs. 13.33; U.S. \$1 equal to Rs. 4.76. The actual buying and selling rates, however, differ slightly from these rates.

Foreign currency can be exchanged at any authorized dealer or money changer.

6. Tourists are advised to arrange for clearing their baggage by one of the recognized travel agencies.

TRAVEL AGENCIES

Here is a list of recognized agencies: Messrs. American Express Co. Ltd., Oriental Building, 364, Dr. Dadabai Naorji Road, P.O. Box No. 507, Bombay-1; Messrs. Thos. Cook & Son, Cook's Building, D. Naorji Road, Bombay-1; The Oriental Express Co. Ltd., Hotel

Marine, New Delhi; Jeena & Company, Passenger, Shipping, Clearing & Insurance Agents, 10, Veer Nariman Road, P.O. Box No. 849, Bombay-1; Lee & Muirhead (India) Ltd., 12, Rampart Row, Fort, Bombay-1; Trade Wings Ltd., Travel Agents, 30, Rampart Row, Fort, Bombay-1; Trade Wings (Calcutta) Ltd., 15-Old Court House Street, Calcutta-1; Balmer Lawrie & Co. Ltd., 21, Netaji Subhas Road, Calcutta-1; Mercury Travels (India) Ltd., Grand Hotel, P.O. Box No. 925, Calcutta-1; Rami Mohan & Co., Ltd., The National Travel Services, P.O. Box No. 1723, Madras-1; Bharat Travel Service Ltd., Tourist Agents, 310-311, Linghi Chetty St., Madras-1; Iyer & Son Ltd., United India Building, Connaught Place, New Delhi; Cox & Kings (Agents) Ltd., P.O. Box No. 308, Lloyds Bank Building, Bombay-1; Grindlays Bank Ltd., P.O. Box No. 98, Mint Road, Bombay-1; G. Raghunatham Pillai Bank Ltd., Tourist Agents, Hyderabad (Deccan); Jammal Sons Ltd. (Hind Musafir Agency), Jhangir Wadia Building, 15, Mahatma Gandhi Road, Bombay-1; The Indian Travel Corp. Ltd., Banaras Pathak & Banaras Cantt., Banaras; Airfreight Ltd., Neville House, Nicol Road, Ballard Estate, Bombay-1; Globe Travels, 11-H., Connaught Circus, New Delhi; N. Jammadas & Co., Travel Agents, 16 Bank Street, Fort, Bombay; Asiatic Travel Service, P.O. Box No. 1568, 12, Murzban Road, Fort, Bombay-1; National Travel Agency, Mercantile Buildings, 9 & 10 Lall Bazar, Calcutta-1; Saba & Rai Travels Ltd., Hotel Ambassador, Bujang Singh Park, New Delhi; Esorts (Agents) Ltd., P.O. Box 187, Pratap Buildings, Connaught Circus, New Delhi; Venzimal Beasurmal & Bros., 521, Kalbadevi Road, P.O. Box. 2112, Bombay; Harrison's Crossfields, Cochin.

Note: Of the travel agencies noted above the first 17 and the 25th are authorized to issue tickets both for internal and external travel; 18th to 22nd are authorized to issue tickets only in conjunction with air and sea travel internal or external; 23rd to 24th are authorized to issue railway tickets only in conjunction with external travel.

* **NOTE:** When the population of a town is not given it may be generally assumed that it is less than 20,000.

No. of foreign tourists in 1958: 92,000; in 1951: 21,000. Foreign exchange earnings through tourist traffic was about Rs. 16 to 20 crores, in 1958.

TOURIST OFFICES

The following is a list of Government of India tourist offices in India and abroad:

1. Director, Govt. of India Tourist Office, 123, Queen's Road, Bombay-1.
2. Director, Govt. of India Tourist Office, 88, Janpath, New Delhi.
3. Director, Govt. of India Tourist Office, 13, Old Court House Street, Calcutta.
4. Director, Govt. of India Tourist Office, 35, Mount Road, Madras.
5. Manager, Govt. of India Tourist Office, Krishna Vilas, Station Road, Aurangabad.
6. Manager, Govt. of India Tourist Office, Plot No. 5, Hanidia Road, Bhopal.
7. Manager, Govt. of India Tourist Office, The Mall, Agra.
8. Manager, Govt. of India Tourist Office, 15-B, Mall, Banaras.
9. Manager, Govt. of India Tourist Office, 16-A, Mahatma Gandhi Road, Bangalore.
10. Manager, Govt. of India Tourist Office, Willington Island, Cochin-3.
11. Manager, Govt. of India Tourist Office, The Mall, Simla.
12. Manager, Govt. of India Tourist Office, Tourist Bureau Building, Chaurastha, Darjeeling.
13. Manager, Govt. of India Tourist Office, Commissioner Road, Ootacamund.
14. Manager, Govt. of India Tourist Office, Rajasthan State Hotel, Jaipur.
15. Director, Govt. of India Tourist Office, 28, Cockspur Street, Trafalgar Square, London N.W. 1.
16. Director, Govt. of India Tourist Office, 19, East 49th Street, New York, 17, N.Y.
17. Manager, Govt. of India Tourist Office, 685, Market Street, San Francisco 5, California.
18. Director, Govt. of India Tourist Office, Indisches Verkehrsbureau, Frankfurt (main) Baseler Hochhaus, Baseler Strasse 46.
19. Assistant Director, Govt. of India Tourist Office, Leonard House, 46, Elizabeth Street, Melbourne C.1. (Australia).
20. Assistant Director, Govt. of India Tourist Office, Bank of Ceylon Buildings, York Street, Colombo.
21. Director, Govt. of India Tourist Office, 8, Boulevard de la Madeleine, Paris-9.

It may be mentioned here that a Tourist Promotion Committee with the Cabinet Secretary of the Union Government as Chairman has been formed to promote tourist traffic from abroad.

TOURIST CENTRES

Mount Abu (hill station): Pop. 4,316 (1941) in Rajasthan, about 4,000 feet above sea level. There are two seasons in the year, the first lasting about two and a half months from the middle of March to the beginning of June, and the second lasting about one and a half months from the middle of September to the end of October. *Places worth a visit:* 1. the Dilwara Jain temples (11th-13th century, A.D.) containing the finest marble carvings in India, 2. Achalgarh temples (15th-16th Century, A.D.) and Mandakini Kund, 3. Ruins of an ancient town called Chandravati, 4. Nakki Talao (lake), 5. Arbuda Devi, a shrine cut in rock, 6. Guru Shikhar (5,646 ft.), highest point in Abu, 7. Sunset point, 8. Palanpur point, 9. Ganmukh Temple and Agni Kund, 10. the Municipal Park. Mount Abu is electrified and has waterworks with public utility taps. The chief means of conveyance are rickshaws, taxis and buses. There are hotels, dak bungalows and inspection houses at Mount Abu. Permission is required to use the dak bungalows and inspection houses. Mount Abu is reached by railway and road. The nearest railway station is Abu Road on the metre-gauge section of the Western Railway from Ahmedabad to Delhi. From the station Abu Road is about 17½ miles by road, and there is regular motor service between the town and the station. Taxis can be hired from Mount Abu Motor Service, Abu Road.

Agra: Pop. 375,665 (1951), a city in U.P., stands on the banks of the River Jumuna. It was the capital of the Moghul Empire during the reigns of Babar, Akbar, Jehangir and Shah Jehan. *Places worth a visit:* 1. the Taj Mahal, regarded by many as the most beautiful building in the world, 2. the Fort, 3. the Juma Masjid, 4. Moti Masjid, 5. the tomb of Itmad-ud-Daula, 6. Akbar's tomb at Sikandra, about five miles from Agra, 7. Dayal Bagh, 8. Twenty-three miles from Agra is the deserted city of Fatehpur Sikri founded by Akbar.

Agra, which has many railway stations, is on the main Bombay-Delhi and Calcutta-Delhi lines and is accessible by the Central or the Western or the Northern Railway.

Ahmedabad: in Bombay State, is an important textile centre. It contains numerous monuments of the fifteenth and sixteenth centuries. Pop. 788,333 (1951).

Aiholi: near Bagalkot in Mysore State contains about fifty temples important in the development of Hindu architecture and sculpture.

Ajanta Caves: are 66 miles north of Aurangabad in Bombay State. The rock-cut caves are 29 in number (5 chaityas or shrines and 24 viharas or monasteries, all Buddhist) and present a record of a unique combination of painting, sculpture and architecture of a period extending over nine centuries from about the 2nd Century B.C. to about 7th Century A.D. Three miles from the caves are a rest-house and a travellers' bungalow under the charge of the Director of Archaeology of the State. There is a curator's office next to the rest-house from which help and information can always be obtained. The caves can be reached from Aurangabad on the railway line between Dronachellam and Manmad by the State Transport buses which regularly ply between Aurangabad Station and the Ajanta caves.

Ajmer: city of considerable antiquity, Hindu and Muslim religious centre, contains Western Railway workshop. Pop. 196,633 (1951). *Places worth a visit:* 1. the Durgah of Khwaja Sahib (tomb of Muslim saint), 2. the Magazine (Akbar's old palace now museum), 3. Ana Sagar Lake (the marble pavilions round the lake were built by Shah Jehan), 4. Adhai-din-ka-Jhoup (Hut of two and a half days), 5. Taragarh Fort (built by Akbar), 6. Mayo College, 7. Pushkar, the most sacred lake in India, is about seven miles away. The chief means of conveyance are buses, tongas and pao gharris. Ajmer lies on the metre-gauge section of the Western Railway line between Delhi and Ahmedabad. A line from Ajmer goes south to connect it with Khandwa on the Central Railway line between Delhi and Bombay (Rajasthan).

Allahabad: city in U.P., situated at the confluence of the Ganga and the Jumuna. It has an old fort and also an Asoka pillar. Sixty-five miles from Allahabad is Kosambi where the ruins of an ancient capital are being excavated. Pop. 332,295 (1951).

Alwar, Bikaner, Jodhpur, Kotah: famous for Rajput historical monuments.

Amritsar: city in the Punjab, sacred to the Sikhs. Pop. 325,747 (1951). Amritsar is the very centre of the Sikh religion and has a big trade in grain and textiles. *Places worth a visit:* 1. the Golden Temple standing in the Pool of Immortality, 2. Baba Atal Tower, 3. Akal Takht, 4. Ram Bagh Gardens, and 5. Fort Govind Garh. The chief means of conveyance in the city are hackney carriages. Fares are fixed. Amritsar is the Indian terminus of the frontier line from Delhi. It is on the Northern Railway.

Aurangabad: in Bombay, is note-worthy because of its proximity to Ellora and Ajanta caves and for handloom textiles. *Places worth a visit are:* 1. Bibi-ka-Mughara—the tomb of Aurangzeb's wife which is a replica of the famous Taj, 2. Panchakki (old water-mill). The shrine of Shah Munsafi, a Muslim saint, lies near by. Pop. 66,686 (1951).

Badami: in Mysore State, is famous for sculptured caves of the 6th century and for a group of Hindu temples. Fifteen miles from Badami is Pattadakal with another group of early Hindu temples (7th or 8th century) examples of pure Dravidian architecture.

Bangalore: Largest city in Mysore and a health resort, is about 3,000 feet above sea-level. It is well laid-out and up-to-date with every urban facility. *Places worth a visit:* 1. Cubbon Park, 2. Lal Bagh, 3. Band-stand, 4. Race Course, 5. Maharaja's Palace, 6. Tipu's Palace, 7. Venkataramanaswamy Temple. The chief means of conveyance are rickshaws, jukkas, buses and taxis. Pop. 778,977 (1951).

Baroda: Capital town of the former Baroda State, now part of Bombay State, is about 250 miles to the north of Bombay, modern, pop. 211,407 (1951). *Places worth a visit:* 1. Laxmi Vilas Palace (the residence of the Maharaja, one of the most beautiful palaces in India), 2. Old Nazar Bagh Palace, 3. Museum and Public Park, 4. Jubilee Garden, 5. L. F. Battery, and 6. the city walls. The chief means of conveyance are tongas, buses, taxis. Baroda lies on the main lines of the Western Railway between Bombay and Delhi and Bombay and Ahmedabad.

Belur: in Mysore State, noted for its elaborately sculptured temples of the Hoysala period.

Banaras: town in U.P. on the banks of the Ganges, very sacred to the Hindus. It is in fact the religious capital of Hindu India and contains about 1,500 comparatively large temples besides countless minor shrines. It is also reputed to be the oldest city in the country. Pop. 355,777 (1951). *Places worth a visit:* 1. Vishwanath Temple, 2. Bharat Mata Temple, 3. Mandir, with Jaisingh's Observatory, 4. Aurangzeb's Mosque, 5. Gyan Wapi Mosque, 6. Nandewar Kothi, 7. Ramnagar Fort, 8. Maidajin Garden, 9. Victoria Gardens, 10. Benares Hindu University, and 11. Sarnath, a great Buddhist centre with many architectural remains, is about six miles from Banaras. The chief means of conveyance are taxis and tongas.

There are also about 30 dharmaalas for Hindu pilgrims. Banaras is on the branch line from Moghul Sarai to Saharanpur. It is also connected with the major towns of India by railway.

Bharatpur: town in Rajasthan is famous for its historic fort. Pop. 37,321 (1951).

Bhubaneswar: which is the new capital of Orissa, is a city of temples once said to number 7,000. *Places worth a visit:* 1. Lingaraj Temple, visitors are not allowed inside the compound but have to see it from a platform, 2. Mukteswar Temple, 3. Parasurameswar Temple, 4. Raj Rani Temple. Nearby are the Jain and Buddhist rock-cut caves of Khandagiri and Udayagiri and Asoka's Rock Edict at Dhauli. There is a Dak Bungalow where visitors can stay with the District Board's permission. Bhubaneswar is on the main S.E. R. line between Waltair and Howrah, about 20 miles from Cuttack and 38 miles from Puri.

Bijapur: town in Mysore State, capital of the old Muslim kingdom of Bijapur is rich with the remains of palaces, mosques, and tombs of the Adil Shahi kings. *Places worth a visit:* 1. Jami Masjid (the greatest mosque in South India), 2. Gol Gumbaz (the tomb of Mahammad Adil Shah and the second largest dome in the world), also called the Whispering Gallery, 3. Methar Mahal, 4. Ashar Mahal, 5. Gagan Mahal, 6. Chini Mahal, 7. Mecca Masjid, 8. Taj-Baury (water-tank), 9. Malik-i-Maidan (Great Gun), 10. Landi-Kasab Gun, 11. Haldar Burj (tower), 12. Ibrahim Rosa (the tomb and mosque of Ibrahim II), 13. Jala Mandir (reservoir), 14. Chand Bauri (old tank), 15. Granary, 16. Jod Gombaz (double tombs), 17. Bara Kaman Masjid, and 18. Begum Tank. The chief means of conveyance are taxis, horries, tongas and bullock-carts. Bijapur is a railway station on the Gadag-Sholapur section of the Southern Railway. There are a dharmaala and a travellers' bungalow about one and a half miles from the station. Pop. 65,724 (1951).

* The official name is Varanasi.

Bombay: second city and port in India generally called the Gateway to India, is western and modern. Pop.: over 3 million; Area (Greater Bombay) 174 sq. miles. It is the principal centre of the textile industry, and the second biggest financial centre. The foreign trade of Bombay is about 45 per cent of the total trade of India. The city returns 30 per cent of the country's total income-tax, and 20 per cent of the corporation tax. It is an important communications centre, served by several air-lines and two big railways of both of which it is a terminus. May and October are the hottest months, but from November to March it is pleasant. *Places worth a visit:* 1. the Gateway of India, 2. Apollo Bunder, 3. Prince of Wales Museum, 4. the Town Hall, 5. Bombay Castle, 6. Rajabai Tower and University Building, 7. Victoria Terminus of the Central Railway, 8. the General Post Office, 9. Crawford Market, 10. Brabourne Stadium, 11. Chowpatty sands, 12. Malabar Hill, Hanging Gardens and Kamla Nehru Park, 13. Central Station, Terminus of the Western Railway, 14. Race Course, 15. Bhandarwada Reservoir and Gardens, 16. Victoria Gardens. Places near about Bombay which are worth a visit are: 1. Juhu (sea-side resort), 2. Versova (sea-side resort), 3. Vihar Lake (from which the city gets its water-supply), 4. Kanheri Caves (rock-cut caves of Buddhist origin), 5. Jogeshwari Caves, 6. Vajreshwari (temple and hot springs of medicinal property), 7. Mandapeshwar (cave temple), 8. Nirmal (temple and lake), 9. Ambarnath (temple), 10. Uran (port, with private garden and zoo), 11. Pali (hot springs and small game shooting), 12. Elephanta Caves (Brahmanical Caves). The chief means of conveyance in Bombay are trams, buses, electric railway, taxis and gharias.

Brindavan: holy place of Hindus, about six miles from Mathura in U.P. It is sacred because of its association with the birth and early life of the Hindu God Shri Krishna. *Places worth a visit:* 1. Govind Dev Temple, 2. Gopinath Temple, 3. Ranganath Mandir.

There are travellers' bungalows. Brindavan is accessible by railway or road from Mathura.

Buddha Gaya: in Bihar, a Buddhist centre of pilgrimage. It contains the famous meditative Buddhist temple near the Bodhi Tree under which Gautam did penance and attained Enlightenment. Pop. 133,700 (1951).

Bundi: in Rajasthan is well-known for its buildings. Jungles nearby provide plenty of tiger shooting. Pop. 22,697 (1951).

Calcutta: until March, 1912, the headquarters of the Indian Government, and now, as then, the commercial capital of India. It is the terminus of three great railways, and the port of an immense river traffic. Though it lies 84 miles from the Bay of Bengal on the River Hooghly, it has a larger foreign trade than any other Indian port, and its enterprising Port Trust has the largest revenue among Indian port authorities. It is the centre of five great industries—jute, tea, hides and skins, coal and lac. Its exports include gunny bags, raw jute, tea, shellac, coal, hides and skins, rice and linseed, while it is the chief distributing centre for Lancashire piece-goods, metals and machinery, and the vast and varied requirements of the States of West Bengal, East Bengal (Pakistan), Bihar and Orissa and the tea districts. Population of West Bengal is 26.16 millions and of Greater Calcutta 4,578,071. *Places worth a visit:* 1. Victoria Memorial (contains a picture-gallery and museum), 2. the Indian Museum, 3. the Zoological Gardens, 4. the Jain Temple, 5. the Kalighat Temple, 6. Belvedere House (where the British Viceroys stayed when on visit to Calcutta), now being converted into a museum, 7. Raj Bhavan (residence of the Governor of West Bengal), 8. Marble Palace (containing art treasures property of the Mallik family), 9. Fort William, 10. the Eden Gardens, 11. the Town Hall, 12. the National Library, 13. Dalhousie Square, 14. the Race Course, 15. Dhakuria Lake, 16. the Hindu bathing ghats, 17. Dakshineswar Temple. Places near about Calcutta which are worth a visit are:

1. Bally (holy place), 2. Belur (home of the Ramakrishna Mission), 3. the Botanical Gardens contains the biggest banyan tree in existence), 4. Diamond Harbour (fort and customs house), 5. Dam Dum (airport of Calcutta).

Cape Comorin: also called Kanya Kumari in Malira State, is the southern-most tip of India.

Conjeevaram (Kanchipuram): the city of temples, the Banaras of the South, is about 45 miles to the south-west of Madras. It is one of the seven holy cities of India and the only one in the South. The place is divided into three parts, Shiva Conjeevaram (containing Shiva temples), Vishnu Conjeevaram (containing a smaller number of Vishnu temples) and Pillayar Paliyam, a testimony to the part played by all the main Hindu religious sects in the history of the city. There are over a thousand temples in all. *Places worth a visit:* 1. Kallianath Temple (over 1,000 years old), 2. Valukunth Perumal Temple (over 1,000 years old), 3. Ekambareswar Temple (400 years old), 4. Vedaraja Perumal Temple. Pop. 84,810 (1951).

Conjeevaram is on the Rengunta-Chingleput section of the Southern Railway and is easily accessible from Madras via Chingleput.

Cooch-Behar: in West Bengal, is known for the facilities and opportunities which it offers to shikaris in search of big game hunting. Pop. 33,242 (1951).

Coomer: hill station on the Nilgiri Hills in Madras State, is about 6,000 feet above sea-level. The climate is mild and genial neither too hot in the summer nor too cold in the winter. The mean day temperature is 64 degrees. The north-east monsoon breaks in October and lasts about two months. The town has good water-supply and natural drainage facilities and is reputed to be one of the cleanest towns in South India. *Places worth a visit:* 1. Sim's Park (contains collection of plants), 2. Low's Waterfall, 3. Tiger Rock (hill fort). There are innumerable places for excursion and picnic purposes, e.g. the Droog, the Dolphin Nose, the Lamb's Rock, Las Falls, Lady Canning Seat, the Ralliah Dam and Catherine Falls. The chief means of conveyance are cars which can be hired.

Coomoor lies on the Mettupalayam-Ootacamund line of the Southern Railway. It is also connected by road with Ootacamund, and Kotagiri, another hill station. Pop. 23,902 (1951).

Darjeeling: hill station and summer capital of the West Bengal Government lies on the lower slopes of the Himalayas about 370 miles to the north of Calcutta. It is 7,110 feet above sea-level. The maximum temperature in the summer is about 70 degrees and the minimum in the winter is about 35. The town commands picturesque views including that of Mount Kanchenjunga and on a clear day of Mount Everest. Various sports are available during the season such as fishing, shooting, horse-riding and a number of other indoor and outdoor sports. Darjeeling has also a first-class sanatorium known as Eden Sanatorium. *Places worth a visit:* 1. Government House, 2. Town Hall, 3. Museum, 4. Observatory Hill (from where a magnificent view of Kanchenjunga can be obtained), 5. the Mall, 6. Natural History Botanical Gardens, 7. Birch Hill Park, 8. Senchal Lakes, 9. Ghoom Monastery, 10. Tiger Hill (from where the sunrise over Everest is generally viewed).

The chief means of conveyance are rickshaws, ponies and dandies. Darjeeling is the terminus of the Darjeeling-Himalayan section of the N. E. Railway and is about 27 hours' journey from Calcutta. From Siliguri where the visitor has to change, Darjeeling can also be reached by car which is quicker than travelling by the mountain railway. Pop. 33,605 (1951).

Delantabad: in Bombay State, contains the famous rock-hewn 12th century fortresses at one time so prosperous that it led Bin Tuglak to shift his capital to it from Delhi (1308). Close by is the tomb of the Moghul Emperor Aurangzeb.

Delhi (New): the capital of India and the seat of the Government. It was planned in accordance with modern ideas by the architects Sir Edwin Lutyens and Sir Herbert Baker and was formally opened in 1931. New Delhi houses the President's House (now called Rashtrapati Bhavan), the Parliament, and the Secretariat. All the buildings in New Delhi are white except the ones mentioned above. These latter are built of red sandstone. Pop. 276,314 (1951).

Delhi (Old): also called Shahjahanabad, the ancient capital of India stands on the river Jumna, and is enclosed by a stone wall with seven gates. It has a history going back to 3,000 years and within an area of 50 square miles eight Delhis rose and fell. The seven predecessors of present-day Delhi are Kutub, Biri, Tuglakabad, Jahanabad, Firozabad, Purana Quila and Shahjahanabad. No city in India contains as many historical remains as Old Delhi. One can trace here the growth and decay of almost every dynasty which held sway over the ancient land of Hindustan. There are a number of factories, jewellery, gold and silver embroidery and ivory carvings works for which Delhi is well-known. Pop. 914,700 (1951). Delhi is a great distributing centre for cotton, wool and silk. Industries include hardware, utensils and stoneware. Delhi is also a large market for grain. Lately tourist traffic has grown into a regular new trade. *Places worth a visit:* Red Fort, Jama Masjid, Chandni Chowk, Rajghat Samadhi, Ashoka's Pillars, Feroze Shah Kotla, Purana Quila, Humayun's Tomb, Isa Khan's Tomb, Lodi Park and Lodi Tomb, Safdar Jang's Tomb, Haus Khas, Kutab Minar, Tughlaqabad, India Gate or War Memorial Arch, Rashtrapati Bhavan, Parliament House, National Museum, Shri Lakshmi Narayan Temple, Jantar Mantar or the Observatory, Museums.

The means of conveyance are tongas, buses, taxis, trams, cycle-rickshaws and auto-rickshaws.

Delhi is directly connected by rail and air with Bombay, Calcutta and Madras. The Central and Western Railways connect it with Bombay, the Northern and Eastern Railways with Calcutta, and the Southern and Central Railways together with Madras.

Delhi also lies on the direct East-West trans-world air routes linking India with all the major cities of the world.

Ellora Caves: are situated about 15 miles to the north-west of Aurangabad in Bombay State. The caves which are excavated in the face of a hill are 34 in number and run north to south for a distance of a mile and a quarter. The hill has the shape of a crescent the southern, the centre, and the northern being occupied respectively by Buddhist, Hindu and Jain temples. There are 12 Buddhist caves, 17 Hindu caves and 5 Jain caves. The Hindu caves are more lavishly decorated than others and Kalash Temple which is the most famous of the caves is also the biggest cave temple in India. It stands in a court averaging 184 feet wide, 276 feet long with a earrp 107 feet high at the back. Among other notable caves are caves X, XII, XIV, XV, XXIX, XXXIII, XXXIV. It is believed that the Ellora Caves are about a thousand years old. They are reached from Aurangabad by bus or car.

Ernakulam: in Kerala State, is famous for its backwaters fringed by Hindu, Muslim, Christian and Jewish settlements. Pop. 62,283 (1951).

Fatehpur Sikri: City founded by Akbar in 1569 but abandoned soon after is situated 23 miles from Agra. Akbar wished to make it his capital but it had to be abandoned because of lack of water. Here Akbar's son Salim who later became the Emperor Jahangir was born. The place contains a number of palaces, shrines, mosques built of marble and red sandstone. *The more notable among the monuments are:* 1. Buland Darwaza, the Gateway of Victory, built to commemorate the conquest of Khandah. It is 176 feet high and is the highest gateway in India. It forms the southern gateway to the most imposing structure in Fatehpur Sikri, 2. the Jama Masjid,

said to be a copy of the mosque at Mecca or Medina. Then there are 3. Panch Mahal, 4. Diwan-i-Khas (Hall of Private Audience), 5. Mariam's House, 6. Palace of Jodh Bai, 7. House of Birbal, 8. Elephant Tower and 9. Khas Mahal. Fatehpur Sikri has a railway station, and the city can be easily reached by car. There is a dak bungalow where visitors can get meals by previous arrangement.

Goleconda: 5 miles from Hyderabad is an ancient spectacular fort (Andhra).

Gopalpur-on-Sea: in Orissa is a sea-side resort for a quiet holiday.

Gulmarg: an ideal hill station about twenty-nine miles from Srinagar, is a little less than 9,000 feet above sea-level. The place boasts of all modern facilities and is particularly noted as a winter playground affording scope for skating, skiing, tobogganing, and golf. Round about are ideal places for walks, rides and excursions.

Gwalior: best known for its fort (which is reputed to be the most interesting and remarkable example of a Hindu palace of an early age) lies about 200 miles to the south of Delhi. *Places worth visiting*: 1. Gwalior fort (includes Man Singh's Palace and a number of temples and shrines), 2. Tansen's Tomb, 3. Kani Laxmi Bai's Chhatrai, 4. the Chhatris of other Marhatta rulers, 5. Tomb of Mahomed Ghaus, 6. Jami Masjid, 7. State Museum, 8. King George Park and Zoo, 9. Gwalior Pottery Works. Seventy-two miles from Gwalior is Shivpuri or Sipri famous for its lake and scenery. Surway is twelve miles again from Shivpuri contains the remains of a fortress of the early medieval period. The chief means of conveyance are tongas and buses. There are two dharmshalas open only to Hindus but at Dufferin Sarai opposite the station rooms are available for rent. Gwalior is on the main Central Railway line between Bombay and Delhi. Pop. 241,577 (1951) (Madhya Pradesh).

Halabid: in Mysore, is well known for its elaborately sculptured temples of the Hoysala period.

Hampi: in Mysore State, is the ruined capital of the Vijayanagar Empire. It is 5 miles from the Hospet Railway Station on the Southern Railway. The ruins are about 600 years old and are described as "virtually a vast open air museum of Hindu monuments in the Dravidian style of architecture".

Hardwar: in U.P. on the Inner Himalayas, is a great Hindu pilgrim centre.

Imphal: north-east frontier town and capital of Manipur. It is celebrated for the Manipur dance and handloom products.

Jabalpur: in Madhya Pradesh; fourteen miles from Jabalpur are the marble rocks. Pop. 256,908 (1951).

Jaipur: provisional capital of Rajasthan Union, is a well laid-out modern city. It is famous all over India for the beauty of its art and the skill of its artisans. Jaipur pottery, brass ware, stone carving, ivory and sandalwood work and jewellery have enjoyed a great reputation from ancient times. Pop. 291,130 (1951). *Places worth a visit*: 1. Maharaja's Palace, 2. Jal Singh's Observatory, 3. the ruins of Amber (ancient capital), 4. the Hawa Mahal, 5. the Palace Armoury, 6. Cenotaphs of the Queens, 7. Galta (place of pilgrimage) and Chat, 8. School of Arts, 9. Public Library, 10. Transport Gardens, 11. Museum. The chief means of transport are tongas, ekkas, phaetons, taxis, buses and palgharis.

Jaipur is on the metro-gauge line of the Western Railway between Ahmedabad and Delhi.

Jamshedpur: in Bihar, famous as India's 'Steel town'. Pop. 216,162 (1951).

Jog Falls: in Mysore State, are one of the highest waterfalls in the world.

Junagadh: in Bombay, is situated below the celebrated Girnar Hill and is one of the most ancient cities in India. The temples on the hill are noted for their architecture and delicate painting. On the way to Girnar is a rock with an Asoka edict. Pop. 62,780 (1951).

In Junagadh is the famous Gir Forest—the only place in Asia where lions are found.

Kangra Valley: famous for its magnificent landscapes and historic temples, lies in the Punjab. Semi-urban hill stations are Kangra and Dharamsala. *Places worth a visit in Dharamsala are*: 1. Bhagunath Water Springs, 2. State Quarries, 3. Himalayan Snow View. The chief means of conveyance are cars and buses. There is also a dak bungalow at Dharamsala where visitors can stay. To get to the Kangra Valley a visitor has to change at Pathankot into the narrow-gauge railway which runs to Nagrota. Dharamsala can also be reached from Pathankot by car.

Kanheri: near Bombay, is famous for its Buddhist caves dating back to the 1st century A. D. It is about twenty miles from Bombay.

Kashmir: unsurpassed for the beauty of its mountains, lakes and valleys is a province of the State of Jammu and Kashmir, situated in the far north of India, 5,000 ft. above sea-level. Srinagar, the capital of the State is famous for its shawls and carpets and the exquisite beauty of its wood-work and papier-mache articles. Its fruit and vegetables are equally well-known. Well-furnished, luxurious house-boats moored along the river Jhelum or in the Dal Lake provide all necessary comforts amidst gorgeous natural surroundings. The normal recreations include Shikara rides on the lakes and canals, mountain-climbing, big and small game hunting, golf, fishing and swimming. Gulmarg, Sonamarg and Pahalgam are favourite holiday resorts in the neighbouring mountains and can be reached by motorable road. The way to Srinagar is via Pathankot, which is a railway terminus. From Pathankot one goes to Srinagar by road passing Jammu on the way. There is a regular air service from Delhi to Srinagar, and a shuttle non-scheduled air service from Pathankot to Srinagar during the tourist season. The chief means of conveyance are boats, tongas, cars or buses. *Places worth a visit*: 1. The Moghul Gardens, like a. Shalimar, b. Chashama, c. Achabal, d. Shahand, e. Nisbat. 2. The lakes like a. Dal Lake, b. Wular Lake, c. Anchar Lake, d. Manasbal Lake and so on. 3. Places of historical and religious interest like a. Martand temple, b. Pandranthan temple, c. Bhaumazu caves, d. Avantika Pura and e. Pari Mahal.

Khajuraho: in Chhattarpur in Madhya Pradesh, is famous for its group of highly ornate medieval temples (Madhya Pradesh).

Kodalkanal: famous hill station on the Pains Hills in Madras State. It is about 7,000 feet above sea-level and has a temperate climate. The average annual rainfall is 65 inches, the major part of the rain falling in October, November and December. The months of April, May and June constitute the 'season'. The town enjoys excellent water-supply and is also well-equipped with all the ordinary amenities of life. The place affords plenty of scope for such recreations as walking, hiking, boating, fishing, hill climbing and golf. Going on an excursion or picnic is yet another way of diverting oneself. For the more adventurous there is big game hunting. Kodalkanal is the delight of the gardener and flowers are in bloom all the year round. *Places worth a visit*: 1. the lake skirted by a three-mile road, 2. the water falls like a. Fairy Falls, b. Silver Cascades, c. Bear Shola Falls, d. Glen Falls, e. Pamber Falls. 3. There are view points like a. Coaker's Walk, b. Pillar Rocks, c. Prospect Point, d. Vembadi Shola Peak, e. Dolphin's Nose. Then 4. the Solar Observatory.

There are a number of boarding houses, and fully furnished flats can also be rented. Kodalkanal is reached from Kodalkanal Road railway-junction on the Southern Railway via Tiruchirappalli. Kodalkanal town is 80 miles from the railway station and the journey can be done by car, taxi or bus on a very good motor road.

Kanarak or Konark: place in Orissa, famous as the site of the Temple of the Sun God otherwise called the Black Pagoda. It is remarkable both as an example of ancient Indian archi-

teature and sculpture and of engineering skill. A great part of the temple is destroyed but on the porch stand the huge figures of warriors and life-sized pieces of horses and elephants and the famous carved wheels at the basement. The image of the sun in the yard of the Puri Temple is generally supposed to have come from Kanarak. Kanarak is about 60 miles from Puri by bus or taxi, 40 miles from Bhuvaneshwar by bus or taxi. The road is open from November to May.

Kolar: in Mysore, is the site of the famous gold fields. Pop. 159,084 (1951).

Kotagiri: A hill station on the Nilgiris, higher than Coonoor, but lower than Ootacamund, is smaller and quieter than either. It is about 6,500 feet above sea-level and has a mean day temperature of 62 degrees. The town has electricity, a number of shops and boarding houses, a local board hospital and golf course. Kotagiri is reached from Coonoor or Ootacamund by car or bus. The roads are excellent and there is a regular bus service. Between Kotagiri and Ootacamund the road goes over Doddabetta the highest peak in the Nilgiri Hills (Madras State).

Kulu Valley: well-known for the variety of its scenery and places of historical interest is situated in the Punjab, north of Simla. It is ideal for hiking and trout fishing. The important part of the valley from the tourist's point of view is the road which runs from Pathankot or Nagrota the rail-heads into the valley. A few miles beyond Pathankot the road passes through the rich cultivation of the Kangra Valley and the extensive tea gardens surrounding Palampur and Baijnath. The traveller has a view of the majestic snow-capped mountains of the Dhaul Dhar range standing out in bold relief against the sky-line. He also comes across the ancient temples of Baijnath. Beyond Aut after Mandi the valley opens out and the final stretch through the lovely Kulu Valley mainly along the left bank of the river Beas offers an entirely different type of scenic effect. The Kulu Valley is also called the 'Valley of the Gods' as in addition to several important deities like Raghunathji at Sutanpur and Jamlu of Malana every village has its own particular God. The best season is from March to May and September to November. The summer is never uncomfortably hot. The main centres of the Kulu Valley are: 1. Kulu or Sutanpur, the principal town, about 4,000 feet above sea-level. It is the main shopping centre and has a dak bungalow, and a number of rest-houses. 2. Raison, 8 miles from Sutanpur and 4,700 feet above sea-level. The available sports are golf, tennis and swimming. Mayflower and the Shacks are two hotels. 3. Katrain, is in the widest part of the Valley, 12 miles from Sutanpur and 4,800 feet above sea-level. 4. Naggar, summer headquarters, is 5,800 feet above sea-level. There is a departmental rest-house and a serial. 5. Manali, the head of the valley and terminus of the motor road, is 23 miles from Sutanpur and is situated amid typical Alpine scenery. Accommodation for visitors is available at Sunshine Orchards, Departmental rest houses and Mission Hospital. Except Manali, the road to which may be occasionally closed owing to snowfall the rest of the valley is open throughout the year. Pathankot is the rail-head for Kulu. From Pathankot Kulu is reached by bus or car, or from Pathankot to Nagrota by metre-gauge railway and from there by bus to Kulu.

Kumason Hills: in U.P. form part of the Himalayas and are known as the sportsman's paradise. Two important summer resorts are Nainital and Ranikhet. Most mountaineering parties establish their base at Ranikhet for ascent to the Pindari Glacier.

Tiger shooting is available in the Terai and Bhabhar Forests in the Kumason region.

Lansdowne: in U.P. in Garhwal about half way between Mussoorie and Nainital.

Lonsava: in Bombay State, lies in the heart of the Western Ghats and is known for the Karla Caves—6 miles from Lonsava by car.

Ludlow: the city of gardens is the capital of U.P. It is full of places of historical interest

and of architectural beauty and is generally regarded as the cultural capital of Moghul India. It is well-known for its pottery, copper and brass ware, wood and ivory carvings and gold and silver embroidery on cloth. Legend connects the founding of the city with Laxmana, the brother of Rama, the mythical hero of the Hindus, and is sometimes called Laxmanpur. Pop. 496,861 (1951). The chief means of conveyance are tongas, ekkas, phaetons and taxis. *Places worth a visit*: 1. Great Imambara, 2. Small Imambara, 3. tombs of Wajid Ali Shah and his Begum, 4. Kaiser Bagh Palace, 5. Chattr Manali, 6. Dilkusha Palace, 7. Moti Mahal, 8. Machi Bhavan Palace, 9. Jumma Masjid, 10. Charbagh, 11. Alam Bagh, 12. Sikander Bagh, 13. Nuss Bagh, 14. Wingfield Park, 15. Residency, 16. Havelock's Tomb, 17. Clock tower, 18. Museum, 19. Observatory, 20. Iron Bridge. Lucknow is a big junction on the Northern Railway.

Madras: the third largest city in the sub-continent and the capital of Madras State. It is the place where the English first settled to trade. Pop. 1,416,056 (1951 census). The chief means of conveyance are rickshaws, juktas, horse carriages, taxis and buses. *Places worth a visit*: 1. Fort St. George (contains the oldest Protestant church in the country where Clive was married), 2. High Court, 3. Light House, from the top of which one can get a panoramic view of the city, 4. Marina. The Marina is one of the most beautiful promenades in the world; sea-bathing is possible at certain points, 5. The Museum, 6. Connemara Library, 7. the Zoo, 8. the Observatory, 9. Moore Market, 10. Parthasarathy Temple, 11. Mylapore Tank and Kapaleswar Temple, 12. St. George's Cathedral, 13. St. Thomas Mount, 14. Race Course, 15. Buckingham and Carnatic Mill, 16. Madras Pencil Factory and 17. Adyar, where the headquarters of the Theosophical Society are located. There are two places round about Madras which are also worth a visit: 1. the ruins of the Gingee Fort famous in the days of the Vijayanagar Empire are about 95 miles from Madras and can be reached by rail and road, 2. the seven Pagodas of Mahabalipuram are 53 miles by road from Madras and can also be reached by road from Chingleput Railway Junction. Kalakshetra is a well-known institution for music, dance and drama at Adyar.

Madurai: the second biggest city in Madras State is a great religious centre, containing as it does a number of famous temples. In the old days it was the capital of the Pandya kingdom and has always been a seat of Hindu culture particularly Hindu architecture. The silk-weaving and textile industries of Madurai are also noteworthy. *Places worth a visit*: 1. The Great Temple, actually made up of two temples one of Meenakshi and the other of Shiva. Adjoining the temple are a. Nandi Hall, b. temple of the Saints, c. the Jewel House, d. the Stable Houses. Then there is 2. Tirumal Nayak's Palace. Pop. 361,781 (1951).

Mahabaleshwar: a hill station in Bombay State, the season being April and May. It is 4,500 feet above sea-level and is noted for its bracing climate. It is also well-known for its fruit and vegetables, orchids and lilies which bloom in April and May. The chief recreations are hiking and driving in a car. Among the sports which are available are tennis, golf and polo. *Places worth a visit*: 1. The two Government Houses old and new, 2. Reay Garden and 3. the two temples Krishna and Mahabaleshwar. Then there are a number of points from which magnificent views can be obtained, like Arthur Seat Point, Baghad Point, Castle Rock, Carnac Point, Connaught Point, Falkland Point, Elphinstone Point, Margney and Lardwick Point and Bombay Point. Then there are the waterfalls like Chinaman's Waterfall, Dhobi Waterfall, Lingmala Waterfall and a lake called Yenna Lake. The places of historical interest are all connected with the name of the Mahratha leader Shivaji such as Kamalgarh Fort, Makrandgarh Fort, Pandavgarh Fort, Pratapgarh Fort and Raigarh Fort. Near Pratapgarh are the Bhavani Temple and the tomb of Afzulkhan. All these places are accessible by road from Mahabaleshwar.

Mahabaleshwar can be reached from Poona both by road and railway. By railway one can go as far as Wathar Station from where Mahabaleshwar is only about half-an-hour's journey by road.

Mandu: in Madhya Pradesh is one of the greatest mediaeval city sites in India with extensive remains including fortifications and palaces. Seventy-eight miles west of Mandu by road via Dhar is Bagh which has a large number of caves adorned with fine old frescoes.

Matheran: the nearest hill station to Bombay is 2,650 feet above sea-level, and is famous for the magnificent views which it yields. The town looks on to the sea, and the coastal plain rises imperceptibly until it reaches the steep ascent of the Ghats. In his walk round the eighteen-mile circumference of the hill the visitor can reach no fewer than thirty-three points of which the following deserve mention: 1. Garbut Point, 2. Panorama Point, 3. Porcupine Point, 4. Louisa Point, 5. Chowk Point, 6. Alexandra Point, 7. Belvedere Point, 8. Echo Point, 9. Monkey Point. At every one of these points the visitor will find comfortable seats, shady trees and fine views. Among other places which are worth a visit are: 1. Charlotte Lake, 2. Paymaster Park, 3. Band-stand, 4. Castle Hill Tower, 5. Race Course. The chief recreations are walking and riding. Rickshaws, munchils and horses are the chief means of conveyance.

Matheran is reached from Neral Station on the main line between Bombay and Poona. From Neral there is a light railway to Matheran which is about one-and-a-half-hour's journey. Alternatively one can do the journey by rickshaw or pony by previous engagement at Matheran.

Mathura: in U.P. is an important place of pilgrimage for Hindus, because of its associations with Shri Krishna. It has also an archaeological museum. Six miles from Mathura is Brindavan. Pop. 98,552 (1951).

Mussoorie: A hill station in U.P. lies 18 miles to the north of Dehra Dun. It is 6,500 feet above sea-level. The town has excellent water-supply, electric lighting system, hospitals, nursing homes and some of the best schools in India both for boys and girls. There are also plenty of sports and amusements. And like every Himalayan hill station one can obtain magnificent views of mountain tops and green river valleys. Hiking and going on excursion or picnic are among the main recreations. The means of conveyance are rickshaws, ponies, dandies, buses and cars. *Places worth a visit*: 1. The falls like a. Bhatta Falls, b. Kamptee Falls, c. Hearsay Falls, d. Mossy Falls, 2. Wimper's Tank, 3. Band-stand. Mussoorie is reached from Dehra Dun by car or bus and is about two hours' journey.

Mysore (State): commemorates the destruction of Mahishasur, the demon by Chamundi who is the tutelary goddess of the royal family of Mysore. Mysore is a picturesque land of forest and mountain presenting the most diversified and beautiful scenery. In the southern forests are found wild elephants for the capture of which khedda operations are undertaken from time to time. Tigers, leopards, bears and lions are also numerous. *Places worth a visit in Mysore State*: 1. The Chenna Kesava Temple at Belur, 24 miles from Hassan, 2. Sivasaamudram Falls on the Cavery River, 3. Hoysaleswara Temple at Halebidu, 4. Geroppe Falls also called the Jog Falls on the Shiravati River, the most famous beauty spot in Mysore. The falls are higher than Niagara, 5. Kolar Gold Fields, the biggest in India worked by electric power, 6. Nandidurg, a hill station near Bangalore, and the summer residence of Tipu Sultan, 7. Srirangapatnam of historical and religious interest as the capital of Tipu and as the city of many temples, 8. Shravanabelgola, the great Jain religious centre with the huge statue of Gomateshwara and of course the city of Bangalore and the town of Mysore.

Mysore (City): second city in the State, is built in accordance with modern standards, and contains a number of beautiful public buildings. It attracts great crowds twice a year when the

city wears a gala appearance. These two occasions are the Maharaja's birthday and the Dasarah. *Places worth a visit*: 1. The various palaces (and also stables) like the Maharaja's Palace, Jaganmohan Palace and so on, 2. Chamundi Hill, with the Bull and the Temple, 3. Zoological Gardens, 4. Silk Factory, 5. Sandalwood Factory, 6. Krishnarajasagar Dam and the Brindavan Gardens, among the most beautiful in the world, about 12 miles from Mysore. The chief means of conveyance are juktas, coaches, and taxis. Mysore is one of the termini of the Southern Railway. Pop. 244,323 (1951).

Naini Tal: hill station and summer capital of the U.P. Government, is about 6,350 feet above sea-level. Among the principal recreations are hiking, boating and yatching on the lake around which the town stands, and fishing and riding. One can also enjoy the Himalayan mountain scenery. *Places worth a visit*: 1. Cheena Peak, 2. Land's End, 3. Lariya Kanta Peak, 4. Sher-ka-Danda Peak, 5. Tiffin Top or Dorothy Seat, 6. Camel's Peak or Deopatta Peak. Naini Tal is reached from Kathgodam railway station which is connected with Bareilly and Mathura. From Kathgodam one goes by bus or car to Naini Tal which is 22 miles away.

Nalanda: in Bihar contains a group of ruined Buddhist temples and monasteries and a small local museum. It was the seat of an ancient Buddhist university.

Nasik: in Bombay State, is a place of pilgrimage for Hindus and is famous for Buddhist rock-cut temples of the first century B.C. and later. Pop. 97,042 (1951).

Ootacamund: hill station and summer capital of Madras State, stands 7,600 feet above sea-level on the Nilgiris. It is sometimes called 'the Queen of the hill stations.' One of the main features which distinguishes it from other hill stations is the number and length of motorable roads which go winding in and out of spacious parks or long stretches of turf studded with ornamental trees. The mean temperature for the year is 57.33°; during the winter the thermometer touches freezing point. Ootacamund is called the sportsman's paradise: plenty of fishing and big game shooting being available. There is also golf and tennis and during the season races and tournaments are held. *Places worth a visit*: 1. Botanical Gardens, 2. Race Course, 3. Assembly Room, 4. Doddabetta, the highest peak in the Nilgiris, and 5. Pykara Hydro-Electric Dam which is about 18 miles from Ootacamund. The chief means of conveyance are juktas, rickshaws and taxis. Ootacamund is the terminus of the Nilgiri mountain railway. Pop. 41,370 (1951).

Pachmarhi: hill station, was summer capital of Madhya Pradesh lies on the Mahadeo hills of the Satpura Range and is about 3,500 feet above sea-level. There are about 20 golf links in the town and plenty of game is also available in the Pipariya forest. *Places worth a visit*: 1. Hee Dam, 2. Mahadeo Caves, 3. Dhupgarh, highest point in the Satpuras, 4. Dorothy Deep Falls, 5. Duchesa Falls, 6. Lansdowne Hill, 7. Sulphur springs, 8. Waters Meet, 9. Big Falls, 10. Pansy Pool, 11. Twipram Pool, 12. Saunder's Pool, 13. Pandava Caves. Pachmarhi is reached from Pipariya Station on the main Central Railway line from Bombay to Jabalpur. From Pipariya, Pachmarhi is 32 miles and the journey can be done by bus or car.

There are facilities for swimming, trekking and riding.

Padmanabhapuram: in Kerala, is the ancient capital of the former Travancore State. *Place worth a visit*: Palace.

Pahalgam: in Kashmir in the lap of the Lidder Valley is situated 60 miles from Srinagar and is famous for its camping sites, and as a base for the Amarnath Cave and Kolahoi glacier.

Palkiana: in Bombay, is famous for its holy hill Shatrunjaya (see separate note) and its Jain temples. Pop. 24,007.

Patna: capital of Bihar, stands on the site of the ancient city of Pataliputra. Pop. 283,479 (1951).

Poona : in Bombay State has many old palaces and parks and one of the best race courses in India. *Places worth a visit are* : the National Chemical Laboratory, the Defence Academy and the Central Water and Power Research Station at Khadakvasla. Pop. 480,982 (1951).

Portbandar : in Bombay, is the birth-place of Mahatma Gandhi and an attractive summer resort. Pop. 58,924 (1951).

Prabhas Patan : in Bombay, is the site of the famous Sumnath Temple, whose idol was reinstated in May 1951.

Puri : famous for the Jagannath Temple, is a coastal town in the State of Orissa and is the State's summer re-ort. The car festival when an image of Jagannath is taken in procession in a huge rath is an event of India-wide importance. The temple has a black marble pillar in front and a 24-feet high stone wall all round. There are four entrances. The presiding deities are Krishna, Balaram and their sister Subhadra. Besides the Jagannath Temple other places worth a visit are the monastic establishments (maths). Fifty miles from Puri is Konarak, famous for the Sun Temple. Pop. 49,037 (1951).

Rameshwaram : This holy town in Madras State is built on an island in the Palk Straits. It contains one of India's most venerated temples, perhaps the finest example of South Indian architecture. It is in the form of a quadrangular enclosure 650 ft. by 1,000 ft. The temple is renowned for its vast pillared corridors nearly 4,000 ft. long.

Ranchi : hill station and summer resort of Bihar, noted for its picturesque scenery and fine roads. Pop. 106,819 (1951).

Ranikhet : is a hill station in U.P. on the Kumaon Hills. Most mountaineering parties establish their bases at Ranikhet.

Sanchi : small village in Malhya Pradesh, famous for the Buddhist stupa which is the largest and the best preserved in India. The stupa is built with sand stone and is about 103 feet in diameter and 42 feet high. The sculpture is remarkable in that there is no anthropomorphic figure of Buddha. The most striking features of the Stupa are the four gates which are profusely carved with scenes from the Jataka stories. Sanchi is on the main Central Ry. line between Bombay and Delhi. There is a State-owned dak bungalow at the place where lodging and boarding are available by previous arrangement.

Santiniketan : in West Bengal, is the home of the famous Visva Bharati, the international university founded by Tagore. *Places worth a visit are* : Rabindra Bhavan (the poet's residence) where his personal belongings, manuscripts, etc. are on display and the poet's mud hut where he wrote many of his famous books. The place is 91 miles from Calcutta on the Eastern Railway and 3 miles from Bolpur Station.

Sasaram : in Bihar is famous for the magnificent tomb of Sher Shah, Emperor of Delhi. Pop. 29,265 (1951).

Seringapatam : or Srirangapatna in Mysore State, 9 miles by road from Mysore city is the ancient capital of Tippu Sultan. It has the Sultan's fort, mosque and palaces.

Sevagram : in Bombay State, is the village where Mahatma Gandhi founded his ashram.

Shatrunjaya Hills :—Shatrunjaya, near Paltana in Bombay, is also known to the Jains as Siddhagiri or Siddhachala or the Hill of the Perfected Ones. It is the most sacred place (*stha*) of Shvetambara Jains. There are a great number of temples in groups on *loks* or summits. The most important one is the *tsuk* of Adishvara Bhagavan. The ancient image, consecrated by the prophet's son, Bahubali, has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints are said to have attained *Nirvana*. A number of inscriptions have been found here, which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

Shillong : is the headquarters of the Assam Government. Thirty-six miles from here is Cherrapunji, the wettest place in the world. Pop. 53,756 (1951).

Shivpuri : also known as Sipri is in Madhya Pradesh, 72 miles from Gwalior. It is an interesting tourist resort with good hunting and boating possibilities. Pop. 21,887 (1951).

Simla : the former summer capital of the Government of India and the Government of the Punjab, it is situated on a spur of the Himalayas at a height of 7,200 feet. Among the recreations of the place are hiking, riding and shooting. The roads are excellent. *Places worth a visit* : 1. President's House, 2. Race Course, 3. Jakko Hill, 4. Observatory Hill, 5. Prospect Hill, and 6. Mashobra-Mahasu, seven miles away. There is a very good road into the interior and hikers to Narkanda, Kotgarh, Rampur and Bushahr can lodge in rest-houses that line the road. There is also a motor bus service on this road and holiday-makers who leave in the morning can be back in Simla by evening. The trek route to Kulu commences at Narkanda. Simla is also well provided with a number of excellent schools. The chief means of conveyance are rickshaws and horses.

Simla is now the capital of Himachal Pradesh.

Simla is reached from Delhi via Kalka on the Delhi-Ambala line. From Kalka there is a mountain railway upto Simla. At Kalka motor cars are available for those who prefer to travel by road. The journey taking 3½ hours. For cheaper travel there are buses which regularly run between Kalka and Simla. All through the scenery is superb, with mountain peaks or luxuriant foliage. Pop. 46,150 (1951).

Sumnath : see under Prabhas Patan.

Sravanabelagola : in Mysore State, is noted for its Jain temples and the colossal statue of Gomatesvara which is 60 ft. high, the tallest known monolithic statue in the world erected in 983 A.D.

Srirangam : an island on the Cavery, two miles north of Tiruchirappalli (Trichinopoly), contains the largest temple in South India. The temple is consecrated to Ranganath (Vishnu) and contains a hall of 1,000 columns. Changes were made from the 9th to the 16th centuries and inscriptions of Chola, Pandya, Hoysasala and Vijayanagar are all found on it. The north gopuram is 152 feet high. Pop. 36,702 (1951).

Tanjore : in the delta of the Cavery river in Madras State is noted for its temples and palaces. It was the capital of the Cholas under whom it grew in name and fame as a great centre of culture. *Places worth a visit* : 1. the temple of Brihadeshvara built by Raja-Raja the great, 2. Nalk's Court, 3. Mahratha Court (the two together are often called the Palace in Tanjore), 4. Nandi, the Bull. The chief means of conveyance are juktas and taxis. There are also good dak bungalows. Tanjore is reached from Madras by the Southern Railway. Pop. 100,680.

Tiruchirappalli (Trichinopoly) : the third largest city in Madras State is situated on the Cavery. It is a very ancient city and was the strategic capital of the Chola and Nalk kings. Tiruchirappalli is also known as the Kailash of the South. It is now a great educational centre. *Places worth a visit* : 1. the Rock and the temple on the Rock, 2. the two huge masses of granite known as the Golden Rock and Fakir Rock, 3. the Jambukeshwar Temple, two miles north of Trichinopoly dedicated to Appulinga or Siva. Pop. 218,921 (1951).

Travancore : (now constituent part of Kerala State) : the most beautiful and fertile region in all southern India has many charms to offer the traveller within its domains. It has scenery ranging from a countryside of lakes, creeks and canals, to low hills, undulating land, rice fields and forests of coconut and areca palms, with a heavy undergrowth of pepper vines and tapioca.

It has also a wonderful highland zone with mountains touching heights of from 5,000 feet to over 8,000 feet, and hills covered with the densest of virgin forest, the home of great herds of wild elephants and bison, tiger, bear, black panther and wild boar, and where lies the lovely Periyar Lake over which one may cruise in comfort and see wild life in its natural habitat.

Trivandrum, the capital of Kerala, is accessible by well-kept roads and railway, and is also now connected by air with Bombay, Madras and Colombo.

Places worth a visit : 1. the Palace, 2. Museum, 3. Picture Gallery, 4. Zoo, 5. Aquarium.

About seven miles south of Trivandrum is Kovalam, a pleasant seaside resort with good facilities for bathing.

Cape Comorin* (Kanya Kumari), the Lands End of India, is the southernmost point of the Union where the sunrise and sunset are magnificent sights. It is a sacred spot to Hindus and a place of pilgrimage as the reputed abode of Kanyakumari, the virgin Goddess to whom the temple there is dedicated.

North of Trivandrum is the ancient town of Quilon and to the north of this again, a pleasant trip by boat along delightful backwaters or by car along a good motor road, is the busy seaport of Alleppey.

Trivandrum : See under Travancore.

Udaipur : in Rajasthan, is a city of lakes with island palaces. Seventy miles from Udaipur is Chittorgarh, the abandoned capital of Mewar, famous for its Tower of Victory. Pop. 89,621 (1951).

Ujjain : in Malhya Pradesh, is one of the seven cities sacred to the Hindus. Pop. 129,817 (1951).

Other rest places exist at:

Jamnagar (Government Guest House), Khadi (Forest Bungalow), Nasik (Dt. Bungalow, Excise Commissioner's Bungalow), Konarak (P.W.D. Bungalow), Bharatpur (Swagat Bhawan), Nilokheri (Guest House), Patiala (Baradari Palace (Guest House), Ootacamund (Connemara Cottage, Westmere), Rameshwaram (Mahabir Dharma-shala), Srirangapatnam (Krishna Murthy Bungalow), Trivandrum (Residency, Sachhavotama Chattram), Ajanta (Fardapur State Guest House), Dandell (Forest Bungalow), Ellora (Khuldabad State Guest House), Mahabaleshwar (Surgeon's Bungalow, Holiday Camp), Mount Abu (Carriek Cottage, Strohl Vakalat, Old Strohl Tehall), Pachmarhi (Hotel Blocks), Sirsi (District Bungalow), Agra (Archaeological Bungalow, Fatehpur Sikri, Archaeological Bungalow, Sikandra), Haldwani (Kham Bungalow), Jaipur (Government Hotel), Lansdowne (District Board House), Nangal Township (Field Hostel (East and West)), Hampi (P.W.D. Bungalow (Hospet)), Dam Site (Tungabadhra), Kamalapuram, Kolar Gold Fields (Government Guest House, Oorgama), Periyar Game Sanctuary (Government Guest House, Edupalayam), Vellore (Masilami Madanar (Choultry (Private))), Vishakapatnam (Turner's Choultry).

CONSTITUTION OF INDIA

THE present constitution of India was drawn up by a Constituent Assembly which first met on 9th December 1946. A draft constitution was published in February 1948. The constitution with amendments in the original draft was finally adopted on 26th November, 1949. It came into effect on 26th January 1950.

There were seven amendments to the Constitution upto the end of December 1958.

A whole Schedule, the Ninth Schedule, was added by an amendment in 1951.

A major amendment was concerned with the re-formation of the constituent units of the Union. The States as re-formed came into existence on 1st Nov., 1956.

STATES

India, that is, Bharat is a sovereign democratic republic.

It is variously called the Republic of India, the Union of India, The Indian Union.

The Union is made up of 29 States.

Of these 13 are designated Part 'A' States, one, Part 'B' State and six Part 'C' Territories.

The 13 Part A States with their capitals given in brackets are:

Andhra Pradesh (Hyderabad); Assam (Shillong); Bihar (Patna); Bombay (Bombay); Kerala (Trivandrum); Madhya Pradesh (Bhopal); Madras (Madras); Mysore (Bangalore); Orissa (Bhubaneswar); Punjab (Chandigarh); Rajasthan (Jaipur); Uttar Pradesh (Lucknow); West Bengal (Calcutta).

The one Part B State with its capital in brackets:

Jammu and Kashmir (Srinagar).

The 6 part C Territories with their capitals in brackets are:

Delhi (Delhi); Himachal Pradesh (Simla); Manipur (Imphal); Tripura (Agartala); Laccadive, Minicoy and Amindivi Islands (Kochikode, provisional headquarters); Andaman and Nicobar Islands (Port Blair).

The States are administered by State Governments, the Territories by the Central Government.

The one Part B State, Kashmir, is in a unique position. It enjoys rather more power than a Part A State (see under Jammu and Kashmir). It has a flag of its own.

This special status is conferred by Art. 370 of the Constitution.

In addition to the States and Territories mentioned above there are two administrative units—the North-East Frontier Agency, called NEFA for short, and the Naga Administrative Unit.

Both these units are administered by the Governor of Assam as agent of the Central Government.

FEDERATION

The constitution of India is quasi-federal in nature.

The distribution of power between the Centre and the local administrations follows the accepted principle that subjects which for convenience and efficiency ought to be administered on an all-India basis are vested in the Union Government, while others (of the nation-building sort) which can be conveniently administered on a local basis are vested in the State Governments.

Thus, defence, foreign affairs, transport and communications, currency and coinage, banking, customs and export duties, and the administration of justice at the higher level are all Central subjects, while State powers include those over police, public health, education, agriculture, forests and so on.

There is a third group of subjects that fall betwixt and between such as trade and industry, economic and social planning, social security and

insurance, labour welfare, price control, electricity, newspapers and books and vital statistics. On these subjects both the Centre and the State can freely legislate, it being understood that whenever there is conflict between Union and State legislation the Union laws shall prevail.

Three detailed lists of subjects are drawn up, the Union List, the State List and the Concurrent List, and the residuary power rests with the Union. That is to say, if at any time, a subject which does not figure in any of the three lists, comes up for consideration the power of dealing with it lies with the Union Government.

The three lists are given in the Seventh Schedule.

It may be added that the Union List has 97 entries, the State List 66 and the Concurrent List 47.

Thus the constitution of India is a quasi-federation in which the Centre is the dominating partner. The Union Government controls the State Governments in certain matters. The Union has also the power to confer additional powers on the States.

All elections are directed and controlled by an Election Commission. Elections to the Lok Sabha and the Legislative Assemblies of the States are on the basis of adult suffrage. Seats are reserved in the Lok Sabha for the Scheduled Castes and the Scheduled Tribes.

There is a Public Service Commission for the Union and also for the States. Two or more States may agree to have only one Commission for the group. Actually, every Part A State has a Public Service Commission at present while the Union Public Service Commission operates for the Part C Union Territories as well. Appointment of members of the Commission are made by the President or the Governor as the case may be. The Commission conduct examinations for appointments to the services of the Union or the States. The Union Commission submits an annual report to the President.

Provision is made for removing differences between the various States by empowering the President to establish an Inter-State Council.

FUNDAMENTAL RIGHTS

In the Indian Union the rights of Indian citizenship are given to 1. One who is born in India, 2. Either of whose parents were born in India, and 3. Who has been a resident of India for five years. Provision is also made for persons who are affected by the partition of the sub-continent.

Details were filled in by the Citizenship Act of 1955 which also provides for the termination and deprivation of citizenship under certain conditions. The Act also empowers Government to extend the rights of citizenship to any country in the Commonwealth and the Republic of Ireland on a reciprocal basis.

Certain fundamental rights are guaranteed to every citizen for the first time. All citizens are equal before the law and no discrimination is made on grounds of religion, sex, caste, etc. All citizens have equal opportunities.

Freedom of speech and expression is guaranteed, and the right to hold meetings (without arms), to form unions and associations, to move freely in India and to reside in any part, to acquire property and to practise any profession are also assured under the Constitution.

Life and personal liberty are protected under the law, and there will not be punishment for the same offences more than once. Preventive detention is also forbidden except in certain cases.

Children under the age of 14 will not be allowed to be employed in factories and forced labour like *begar* is prohibited.

India is a secular State and as such there is freedom of conscience. Citizens are allowed to profess, practise and propagate any religion; and the State will not ordinarily interfere in religious questions. The minorities are assured of cultural and educational rights.

The State can acquire compulsorily property for public purposes, but compensation may be paid to the owner of the property concerned although questions relating to the quantum of compensation are not justiciable. But property may also be acquired without compensation in certain cases.

All titles, except military or academic, are also abolished, though honours for meritorious service may be conferred.

Untouchability is abolished.

These fundamental rights can be enforced by the Supreme Court which has the authority to issue prerogative writs such as *Habeas corpus*, *certiorari*, *prohibition*, etc.

In respect of the Defence Forces, however, Parliament has power to legislate on these fundamental rights.

It must also be pointed out that some of these fundamental rights can be suspended in case of emergency, and the remedies available for their enforcement may also be suspended by an order of the President.

There are also certain Directive Principles in accordance with which the State has to direct its policy. These principles are of a recommendatory character and cannot be enforced in a court of law. However the State is expected to look upon them as a kind of touch-stones for its policy and action.

These principles include organization of village panchayats, provision for just and humane conditions of work, maternity relief, a uniform civil code for the citizens, provision for compulsory and free education of children and separation of judiciary from executive.

There are special provisions to safeguard the interests of two groups—The Anglo-Indians and the Scheduled Castes and Tribes.

The Scheduled Castes and Tribes have special representation in the legislatures of the country (see separate articles on the Scheduled Castes and Tribes). In certain tribal areas there are autonomous administrative bodies.

As for Anglo-Indians the President may nominate not more than two members of the Anglo-Indian community to the Lok Sabha if he thinks that the community is not adequately represented. Similar power is given to the Governor of a State.

The claims of the Scheduled Castes and the Scheduled Tribes are to be considered in making appointments to services, and for two years after the commencement of the Constitution the Anglo-Indians were to have the same proportion in the services as they had immediately before 15th August 1947. This reservation is to be progressively reduced by 10 per cent every two years in such a way that it is to cease completely ten years after the commencement of the Constitution.

In fact all reservation including reservation of seats for Scheduled and Tribal classes are to cease ten years after the commencement of the Constitution.

A special officer for the Scheduled Castes and the Scheduled Tribes has been appointed.

UNION EXECUTIVE

The executive head of the Indian Union is the President. He is elected by the elected members of the Houses of Parliament and the Legislative Assemblies of all the States. His term of office is five years, and he is eligible for re-election.

Only a person who is a citizen of India and has completed the age of thirty-five years is qualified to contest the election.

He is the Supreme Commander of the Armed Forces.

He has the power to grant pardons or remission of punishment.

The President is entitled to the use of an official residence without payment of rent, and a salary of Rs. 10,000 per month and allowances. Provision has also been made by an Act of Parliament for a pension of Rs. 15,000 per annum.

The President has the power of summoning, proroguing and dissolving Parliament. At the commencement of each session he addresses both Houses of Parliament assembled together. He has the right of sending messages to Parliament and sending back a Bill presented to him for his consent. This power however can be used by him only once.

The President has legislative powers under certain circumstances. When neither of the Houses of Parliament is in session and the President is satisfied that circumstances exist which make immediate action necessary he may promulgate an ordinance.

Such ordinance must be put before both the Houses of Parliament and will cease to operate at the expiration of six weeks from the reassembly of Parliament.

The President can also declare emergency if he is satisfied that the security of India or any part thereof is threatened either by war or internal disturbances when the legislature is in session. Such a proclamation would give additional powers to the Union executive and the Legislature.

The Judges of the Supreme Court and the High Courts, the Attorney-General of India and the Comptroller and Auditor-General of India are all appointed by the President. The heads of the Part A States, i.e., Governors are also appointed by the President.

The President has the power of appointing ambassadors abroad and receiving diplomatic representatives of foreign States.

The President places a number of annual reports before Parliament: the Annual Financial Statement, the report of the Auditor-General of India relating to the accounts of the Government of India, the annual report of the Union Public Services Commission and the report of the Special Officer for Minorities.

All executive action of the Government of India is taken in the name of the President and it is the duty of the Prime Minister to communicate to the President all decisions of the Council of Ministers.

Provision is made for the impeachment of the President, by Parliament, for violation of the Constitution. If such a resolution is passed by a majority of not less than two-thirds of the total membership, such a resolution has the effect of removing the President from office.

In the exercise of his functions, the President has the aid and advice of a Council of Ministers, with the Prime Minister at the head of it. The President appoints the Prime Minister and other Ministers are appointed on the advice of the Prime Minister.

The Council of Ministers is collectively responsible to the Lok Sabha (the Lower House). Every Minister must be a member of either House of Parliament, and he is required to take an oath of office and secrecy.

The salaries and allowances of Ministers are determined by Parliament.

There is a Vice-President of India, who is ex-officio Chairman of the Rajya Sabha (the Upper House). The Vice-President acts as President during a casual vacancy in the office of the President. He is elected by the members of both Houses of Parliament and his term of office is five years.

UNION PARLIAMENT

The Parliament consists of the President and two Houses known as, as already mentioned, the Lok Sabha and the Rajya Sabha. It must meet at least twice a year. The maximum strength of the two Houses is fixed at 250 (12 nominated) for the Rajya Sabha and 520 for the Lok Sabha (not more than 500 from the States and 20 from the Territories).

In April 1958 the Rajya Sabha had a total strength of 232. Of these members 12 were nominated by the President.

In April 1958 the Lok Sabha had a total strength of 505. Of these members 11 were nominated.

The Rajya Sabha is elected by the elected members of the Legislative Assemblies of the States, while the Lok Sabha is elected directly by the voters in the country.

In the case of the Part C Union Territories of Himachal Pradesh, Tripura, and Manipur, the Territorial Councils form the electoral colleges for the election of members to the Rajya Sabha from these Territories. The electoral college for the Territory of Delhi consists of persons who were members of the Delhi Legislative Assembly immediately before the 1st November 1956.

The elections to the Lok Sabha are based on adult suffrage and joint electorates. There is no reservation of seats for any group except Scheduled Castes and Scheduled Tribes.

The representatives of Jammu and Kashmir in the Lok Sabha are appointed by the President on the recommendation of the legislature of the State.

The Rajya Sabha is a permanent body with one-third of its members retiring every second year. The Vice-President of the Union is also the Chairman of the Rajya Sabha. The Rajya Sabha has also a Deputy Chairman.

The Lok Sabha has a duration of five years, ordinarily. There is a Speaker and a Deputy Speaker of the House both of whom are elected by its members.

All these posts carry a salary and allowances. Under certain circumstances, the members can be disqualified and their seats declared vacant.

Money Bills can be introduced only in the Lok Sabha. The Rajya Sabha can only return a Bill with its recommendations to the Lok Sabha within a period of fourteen days of its receipt. Bills passed by Parliament are submitted to the President for his assent. Only on such assent being given does the Bill become law.

The language used in Parliament is either Hindi or English.

The distribution of seats in the Rajya Sabha is as follows:

Andhra Pradesh 18; Assam 7; Bihar 22; Bombay 27; Kerala 9; Madhya Pradesh 16; Madras 17; Mysore 12; Orissa 10; Punjab 11; Rajasthan 10; Uttar Pradesh 31; West Bengal 16; Jammu and Kashmir 4; Delhi 3; Himachal Pradesh 2; Manipur 1; Tripura 1; Total—220.

The President has nominated 12 members. Thus the total of elected and nominated members is 232 (Dec. 1958).

The allocation of seats in the Lok Sabha is as follows:

Andhra Pradesh 43; Assam 13; Bihar 53; Bombay 66; Kerala 18; Madhya Pradesh 36; Madras 41; Mysore 26; Orissa 20; Punjab 22; Rajasthan 22; Uttar Pradesh 86; West Bengal 36; Jammu and Kashmir 6; Delhi 5; Himachal Pradesh 4; Manipur 2; Tripura 2.

The President has nominated one member each for the Andamans and the Laccadives and two to represent the Anglo-Indian Community.

As mentioned above the six members from Jammu and Kashmir are also nominated by the

President on the recommendation of the State legislature.

SUPREME COURT

The Supreme Court of India consists of a Chief Justice of India and not more than ten other Judges. The appointments are made by the President. The salary of the Chief Justice is Rs. 8,000 per month and of the other Judges Rs. 4,000 per month.

The Judges could hold office till the age of 65.

For purposes of constitutional law the Supreme Court has exclusive original jurisdiction in any dispute (a) between the Government of India and one or more States, (b) between the Government of India and one or more States on one side and one or more other States on the other, (c) between two or more States only in so far as the dispute involves any question on which the existence of a legal right depends.

The Supreme Court has also jurisdiction both appellate and original in matters which involve a substantial question of law as to the interpretation of the constitution.

An Attorney-General for legal advice and a Comptroller and Auditor-General of India for audit and accounts are appointed by the President. The Attorney-General has the right to appear in all courts in India.

STATE GOVERNMENT

The 13 Part A States have Governors at their heads, five Part C Union Territories have Chief Commissioners at their head, the head of the sixth, Himachal Pradesh, is designated Lieutenant-Governor, and the Part B State of Kashmir has a Sadr-i-Riyasat (President).

The States and Union Territories are grouped into geographical zones, and for each zone there is a Zonal Council, which is an advisory body.

These came into existence as part of the scheme relating to the reorganization of States embodied in the States Reorganization Act of 1956.

Zonal Councils

There are five zones: Northern zone (Punjab, Rajasthan, Kashmir, Delhi and Himachal Pradesh); Central zone (Uttar Pradesh and Madhya Pradesh); Eastern zone (Bihar, West Bengal, Orissa, Assam, Manipur and Tripura); Western zone (Bombay and Mysore); Southern zone (Andhra Pradesh, Madras, and Kerala and also Mysore as a permanent invitee).

Each Zonal Council consists of a Union Minister to be nominated by the President, the Chief Minister of each of the States in the Zone and two other Ministers of each State. The two Ministers are to be nominated by the Governor of the State. In the case of Kashmir by the Sadr-i-Riyasat. If there is no Council of Ministers in a State the three members from that State will be nominated by the President. In the case of a Part C Territory there will be only two members and they will be nominated by the President.

The Union Minister is to preside over the meetings.

The Union Minister nominated by the President at present happens to be Mr. Govind Vallabh Pant, the Home Minister.

The Council will normally meet by rotation in the States included in the Zone.

The idea in constituting Zonal Councils is to develop the habit of cooperative working and to arrest the growth of particularist trends like regionalism and linguism.

It would also help in encouraging cooperation among the States in the execution of major development projects.

The Councils may discuss matters of common interest and more especially problems arising out of the reorganization of States such as border disputes, linguistic minorities, inter-State transport and also economic or social planning—and advise the Central or State Governments on the action to be taken in such matters.

All questions at meetings will be decided by a majority of the members present.

The proceedings of every meeting of a Zonal Council have to be forwarded to the Central Government and the States Governments concerned.

Wherever there is a problem in which States of more than one Zone have a common interest it will be discussed at a joint meeting.

The joint meeting will be held at such time and place as the Chairman may decide. The rules of procedure at these meetings will be framed by the Central Government.

The office of each Zonal Council has been located as follows :

North Zone—New Delhi, Central Zone—Allahabad, Eastern Zone—Calcutta, Southern Zone—Madras, Western Zone—Bombay.

The administrative expenses of the office, except the salary and allowances of the Secretary will be borne by the Central Government.

The Governor of a State is appointed by the President. Executive power is vested in the Governor who is appointed for a term of five years, ordinarily. Only a citizen of India and one who has completed 35 years of age, is eligible for such an appointment.

The Governor, like the President has power to grant pardon, etc. He will have a Council of Ministers to aid and advise him. The Governor also appoints an Advocate-General for the State.

Ten States, Andhra Pradesh, Bihar, Bombay, Kashmir, Madhya Pradesh*, Madras, Mysore, Punjab, Uttar Pradesh, West Bengal have two Houses of Legislature; the others, only one. The two Houses are called the Legislative Assembly (sometimes Vidhan Sabha) and the Legislative Council (sometimes Vidhan Parishad). The former has a duration of five years, while the latter is a permanent body with one-third of the members retiring every second year.

The minimum strength of an Assembly is 60 and the maximum 500.

The minimum strength of a Council is 40, and the maximum one-third of the State Assembly.

The Legislature must meet at least twice a year. While the Assembly consists of members who are directly elected from territorial constituencies, the Council consists of members nominated by the Governor, elected by the Assembly and of representatives of local bodies and special interests.

The number of seats in the Legislative Assembly and the Legislative Council is as follows (the first figure shows the number of seats in the Assembly, and the second in the Council):

Andhra Pradesh: 301, 0; Assam: 108,—; Bihar: 318, 96; Bombay: 297, 108; Kashmir: 100, 36; Kerala: 126,—; Madhya Pradesh: 288, 90; Madras: 208, 63; Mysore: 208, 63; Orissa: 140,—; Punjab: 154, 51; Rajasthan: 176,—; Uttar Pradesh: 430, 108; West Bengal: 252, 75.

The total number of seats in the Territorial Council of Himachal Pradesh is 41, of Manipur 30 and of Tripura 30.

About the Kashmir Assembly it may be mentioned that 25 seats are now vacant waiting to be filled in by members from that part of Kashmir now under occupation by Pakistan troops.

The effective strength of the Assembly is 75.

The right of summoning, proroguing and dissolving the legislature is vested in the Governor, who addresses the legislature at the commencement of each session.

Like the Parliament there is a Speaker, a Deputy Speaker, a Chairman and a Deputy Chair-

man for the Legislative Assembly and the Legislative Council respectively. These officers of the legislatures are entitled to salary and allowances.

The language in the legislature can be either Hindi or English or any other language allowed by the Speaker.

The State Legislatures cannot discuss the conduct of any judge of the Supreme Court or of a High Court in the discharge of his duties.

As the Governor is a part of the legislature, he has certain legislative powers. He can promulgate ordinances during the recess of the legislature; such ordinances must be placed before the legislature and cease to operate at the expiration of six weeks from the re-assembly of the legislature.

The salary of the Governor is Rs. 5,500 per month and he is also entitled to certain allowances.

If the government of a State cannot be carried on in accordance with the provisions of the Constitution, and the Governor makes a report to that effect to the President, the President may by proclamation assume to himself all or any of the functions of the Government of the State. He may also declare that the powers of the State legislatures shall be exercised by Parliament, and suspend any provision of the constitution relating to the State.

However, he cannot assume to himself, or suspend any of the provisions of the Constitution relating to High Courts.

UNION TERRITORIES

In accordance with the provisions of the Territorial Councils Act of 1950 three Part C Union Territories namely, Himachal Pradesh, Manipur and Tripura have Territorial Councils.

The Councils are elected directly from territorial constituencies on the basis of adult suffrage. They will deal with local affairs such as education, public health, roads and bridges and transport generally, panchayats, local works, animal husbandry.

A Council will meet at least once in two months. The Administrator of the Territory may attend and address a meeting of the Council. When he attends any such meeting he will preside over it.

For every Territorial Council there will be a chief executive officer appointed by the Administrator. There may also be other staff.

The Council can levy taxes on professions, trades, callings and employments and tolls on bridges and fix school fees. The taxes have to be approved by the Central Government before they become effective.

The Council has the power to borrow money with the approval of the Central Government.

The budget estimates of the Territory will be presented by a Finance Committee of the Council. The budget estimates finally adopted by the Council in the light of the suggestions made by the Administrator will be the budget of the Territorial Council.

The Central Government may pay to a Territorial Council the net proceeds of the following taxes attributable to the area under the Council's jurisdiction:

Entertainment tax; a certain percentage of the land revenue not exceeding 10; tax on motor vehicles; taxes on passengers, goods, terminal tax.

The Central Government may also make such grants as it thinks fit.

The Administrator will have the right to give directions to the Council in regard to matters connected with education.

The Administrator can also suspend the execution of a resolution or order of the Council or prohibit any action on grounds that it is likely to lead to a breach of the peace or cause annoyance or injury to the public or to any

class or body of persons. But in such cases he has to send a report to the Central Government together with explanations offered by the Council. The Central Government may then confirm, modify or rescind the Administrator's order.

The Central Government may on the report of the Administrator supersede a Territorial Council for incompetence, negligence of duty or abuse of power. In such cases a new Council will have to be elected within a period of one year.

The Central Government has the power to make rules for the purpose of carrying out the provisions of the Act, to regulate the conduct of business of the Council; regulate the employment, payment, suspension of officers and servants of the Council; the keeping of accounts.

Such rules framed by the Central Government have to be laid before Parliament for not less than thirty days, and have to be approved by it.

Any bye-laws made by the Council in regard to matters over which it has jurisdiction have to be confirmed by the Central Government. These laws are liable to alteration by the latter authority.

On the day the Territorial Council was established all Zilla Panchayats in Himachal Pradesh stood abolished, and the liabilities and assets accrued to the Council.

The strength of the Territorial Council of Himachal Pradesh is 41, of Manipur 30 and of Tripura 30. Of the 41 seats in the Himachal Council 12 are reserved for the Scheduled Castes.

The Central Government has the authority to nominate two persons who are not in the service of Government, to a Territorial Council.

For the Part C Union Territory of Delhi there is established an Advisory Committee which will be associated with the Minister of Home Affairs who is responsible for the administration of Union Territories. This Committee consists of all members of Parliament representing Delhi, the Chief Commissioner of Delhi, the Vice-Chancellor of the University of Delhi, the President of the Delhi Municipal Committee and the Senior Vice President of the New Delhi Municipal Committee.

As regards Andaman and Nicobar Islands (Part C Territory), the President makes rules and regulations for the peace and good government of the State, and appoints a Chief Commissioner for administration. The President has the power of making regulations which have the effect of amending or repealing an Act of Parliament.

NEFA and the Naga Administrative Units are administered by the Governor of Assam, who acts as the agent of the Union Government.

The Governor of Assam has an Adviser for NEFA and an Administrator for the Naga Unit.

It may be mentioned here that the tribal areas of Assam have a special status. The Governor of Assam administers them on behalf of the President and can set up councils for districts and regions. These councils have powers of legislation about disposition of land, inheritance of property, marital and other social customs. They can set up and administer courts, schools, dispensaries and markets. They can collect certain specified taxes.

These areas are often referred to as the autonomous districts of Assam.

There is a High Court for each State and a Judicial Commissioners' Court each for the Union Territories of Himachal Pradesh, Manipur and Tripura.

The salary of a Chief Justice of a State is Rs. 4,000, and of a High Court Judge Rs. 3,500.

The highest court for Delhi is the District Court. Appeals from here go to the Punjab High Court, a circuit bench of which sits in Delhi. For Andamans, the highest court is the Chief Commissioner's Court. Appeals go to the Calcutta High Court.

* The Council has not been set up at the time of writing (March 1959).

† Now Superseded by the Corporation.

FINANCE

The financial relations between the Union and the States are as follows:—There is a Consolidated Fund of India and a Consolidated Fund of each State, and all money received is credited to the public account of India or the public account of the State as the case may be. Provision is also made for the establishment of a 'Contingency Fund of India' and a 'Contingency Fund of the State.'

Certain duties and taxes are levied and collected by the Government of India, such as duties in respect of succession to property, terminal taxes, taxes on railway fares and freights, etc. But the net proceeds are assigned to the States, in accordance with such principles of distribution as formulated by Parliament. Certain other taxes, like income-tax are levied and collected by the Government of India, but are distributed between the Union and the States.

These matters are fixed in accordance with the recommendations of a Finance Commission appointed for the purpose.

No moneys can be appropriated out of the Consolidated Fund of India or of a State except in accordance with an Appropriation Act by the appropriate legislature.

The property of the Union is exempt from the taxes imposed by a State, and the property and income of States are exempt from Union taxation.

The privy purse sums of the Rulers are a charge on the Consolidated Fund of India, and these sums are to be exempt from taxes on income.

OFFICIAL LANGUAGE

Hindi in the Devanagari script is the official language of the Union and the form of numerals is the international form of the Indian numerals. The English language, however, will continue to be the official language for a period of not more than fifteen years from the commencement of the Constitution.

The official language of the Union, i.e., English will be used for communication between the Union and a State or between one State and another. However, if two States agree Hindi may be used instead of English between them.

All proceedings in the Supreme Court and High Courts, the texts of Bills and Acts passed by the legislatures and ordinances promulgated by the appropriate authorities are to be in the English language, until Parliament by law provides otherwise.

By previous consent of the President proceedings in a High Court may be conducted in Hindi or any recognised State language but judgments, decrees or orders passed by the court must be in English.

It is the duty of the Union Government to promote and spread the Hindi language. The vocabulary for the development of the language is to be drawn primarily from Sanskrit.

The States have been given the liberty of adopting any one or more languages used

in their territory or Hindi as the official language of the State.

The following languages are recognised by the Constitution: (1) Assamese, (2) Bengali, (3) Gujarati, (4) Hindi, (5) Kannada, (6) Kashmiri, (7) Malayalam, (8) Marathi, (9) Oriya, (10) Punjabi, (11) Sanskrit, (12) Tamil, (13) Telugu, (14) Urdu.

A commission was to be appointed by the President, at the expiration of five years from the commencement of the Constitution, to make recommendations to him, as regards the progressive use of the Hindi language for official purposes of the Union, and other allied matters.

The Commission so appointed has now published a report.

EMERGENCY PROVISIONS

If the President is satisfied that a grave emergency exists, and the security of India or any part thereof is threatened either by war or internal disturbance, he may make a declaration to that effect. Such proclamation must be approved by both the Houses of Parliament, before the expiration of two months, otherwise it ceases to operate at the end of that period. As a result of this proclamation Parliament will be authorised to legislate on items included in the State list and the President, to issue directions to the Governor. Parliament can validate such a proclamation for a period of three years which is the maximum.

A request for a declaration of emergency may also come from a State authority.

This, however, would not be applicable to the functions of the High Courts. Somewhat similar provision is also made for financial emergency.

AMENDMENT OF THE CONSTITUTION

For purposes of amendment the items are divided into three classes with a different procedure for each class.

For amendment of the provision with respect to the Supreme Court and the High Courts, the distribution of legislative powers between the Centre and the States, the representation of the States in Parliament, etc., the amendment must be passed by both the Houses of Parliament by a majority of the total membership of the House and by a majority of two-thirds of the members present and voting, and must further be ratified by the legislatures of not less than one-half of the States.

In other cases no reference to the State legislatures is necessary. Parliament by itself can amend the Constitution in the manner mentioned above. In some cases amendments can be effected even by a bare majority such as is required for the passing of any ordinary law.

There were seven amendments to the Constitution from the coming into force of the Constitution on 26th January 1950 to the end of December 1958.

The Constitution (First Amendment) Act, 1951 aimed among other things at enabling the State

to make special provision for the advancement of socially and educationally backward classes. It also gave the State broader powers to restrict freedom of speech and writing in the interests of friendly relations with foreign States, public order, decency, morality and in relation to defamation or incitement to an offence.

Two new articles were added after Art 31 to save the laws relating to the acquisition of estates and the validation of certain land reforms Acts and Regulations passed by certain States. These Acts were specified in an extra Schedule added to the list, the Ninth Schedule.

The Articles affected by the First Amendment were 15, 19, 85, 87, 174, 176, 341, 342, 372 and 375. It added two new Articles 31A and 31B and a new Schedule, the Ninth Schedule.

The object of the Constitution (Second Amendment) Act, 1952 was to make adjustments in the representation in the Lok Sabha consequent on the completion of the 1951 census. The Article affected was Article 81.

The Constitution (Third Amendment) Act, 1954 changed entry No. 33 in the Concurrent List in the Seventh Schedule by adding food-stuffs, cattle fodder, raw cotton and jute whose production and supply could be controlled by the Centre if necessary.

The Constitution (Fourth Amendment) Act, 1955 enables the State to acquire private property compulsorily for a public purpose and bars any reference about the quantum of compensation fixed by the legislature to a court of law. Also, the temporary taking over of private property* in the public interest or to secure better management is excluded from the compensation clause. Laws providing for State monopolies are also saved from invalidation. Seven new entries were made to the Ninth Schedule.

The Articles affected were 31, 31A, 31(2) and 305.

The Constitution (Fifth Amendment) Act, 1955 merely fixed a time for State legislatures to give their opinion on Central laws affecting the area, boundary etc. of the State concerned. The Article affected was 3.

The Constitution (Sixth Amendment) Act, 1956 added a new entry in the Union List in the Seventh Schedule, thus giving the Centre authority to legislate on the taxes, on the sale and purchase of goods in the course of inter-State transactions.

The Constitution (Seventh Amendment) Act, 1956 dealt with a whole host of problems thrown up by the reorganisation of the States, such as the alteration of State boundaries, the creation of new States, the classification of certain areas as Union Territory, the allocation of seats in the Rajya Sabha, the provision of a bicameral legislature for certain States. Other points the Amendment dealt with are the original jurisdiction of the Supreme Court, the High Courts and safeguards for linguistic minorities.

Some articles affected were 1, 80, 81, 82, 131, 168, 216, 217, 220, 222, 224 and the First Schedule and the Fourth Schedule. Four new Articles 290A, 350A and 350B and 372A were added.

* without affecting ownership.

PUBLIC SERVICES

EMPLOYEES of the Central Government numbered 14,07,387 in November 1957. Out of these about 10 lakhs were railwaymen.

Category-wise the figures were: Class I—12,556, Class II—18,532, Class III—7,51,635 and Class IV—8,24,664.

On an average about 25,000 employees of the Central Government earn a pension every year.

The Constitution provides for the setting up of a Public Service Commission for the Union and for each State. Two or more States may join together to have a common Public Service Commission.

The chairman and members of the Union Public Service Commission and of Joint Commissions are appointed by the President of the Union, while the chairman and members of a State Commission are appointed by the Governor.

A member of the Union Commission holds office for six years or till he is 65 years. A member of a State Commission also holds office for six years but retires earlier on attaining the age of 60.

On ceasing to hold office a member of the Commission is eligible for appointment only as Chairman of the same Commission or of some other Commission but not for any other employment either under the Government of India or the State Government.

The Chairman of the Union Public Service Commission is not eligible for any Government appointment whatever.

A member of a Commission can be removed only by the President on the advice of the Supreme Court.

The Union and State Commissions conduct examinations for recruitment to Government service. The Commissions also advise the Governments on the service conditions of the employees. There is a statutory obligation on a Government to consult the Commission on such questions, and if there are any rules which specifically exempt Government from such consultation these rules should be approved by the legislature.

An annual report of the Commission which also includes a list of cases in which Government did not accept the advice of the Commission together with a memorandum from Government explaining the reasons for the non-acceptance of the Commission's advice on these matters has to be placed before the appropriate legislature.

ALL-INDIA SERVICES

- (i) Indian Administrative Service;
- (ii) Indian Police Service.

With Independence two problems faced the country about Public Services. A large number of British officials left and Muslim officials opted for Pakistan. The gap thus created had to be filled by some sort of emergency recruitment. Out of about 1,000 Civil Servants about 600 are estimated to have left.

The second was to replace the I.C.S. by a new service, an I.A.S.

The first problem was met by setting up an Emergency Recruitment Board in the middle of 1948 which selected the required number of men from both inside and outside the ranks of the permanent services.

The I.A.S. was to serve the same purpose as the old I.C.S. except that it would not provide officials for the judiciary.

The recruitments to both I.A.S. and I.P.S. are made through an All India Competitive Examination. 25 per cent of the senior duty posts in both the cadres are filled up by promotion from the State Civil Service and State Police Service officers respectively. It has also been provided that 15 per cent of the vacancies in the promotion quota can be filled by officers of outstanding merit and ability in the other State Services. The promotions are made in consultation with the U.P.S.C.

During the period 1st September 1957 to 30th September 1958, 64 I.A.S. officers and 66 I.P.S. officers were appointed on the basis of the annual I.A.S., etc. Examinations conducted by the U.P.S.C.

During the same period, 49 I.A.S. officers and 21 I.P.S. officers were appointed by promotion from State Civil Service and State Police Service respectively.

The cadre strength of the I.A.S. and I.P.S. has been increased because of the growing demand of I.A.S. and I.P.S. officers for the Second Five Year Plan.

In order to fill up the gap in the I.A.S., 182 States Services Officers have been promoted to the I.A.S. and 66 of the open market special recruits selected on the basis of the I.A.S. (Special Recruitment) Examination, 1956 have so far been appointed to the I.A.S. under the Special Recruitment Scheme. Some more open market special recruits were expected to be appointed to the I.A.S. under this scheme.

In the case of I.P.S. 48 State Police Service officers have so far been promoted to the I.P.S. under the Special Recruitment Scheme (Dec. 1958).

The I.A.S. and I.P.S. probationers are trained at the I.A.S. Training School, Delhi and I.P.S. Training College at Mount Abu, respectively.

The conditions of recruitment, service, etc. of the two All India Services are fixed by the All India Services Act, 1951 as amended in 1958 to enable the State of Jammu and Kashmir to participate in the recruitment. So far 34 sets of rules and regulations relating to service conditions of these two services have been framed (Dec. 1958).

The present cadre strength of the I.A.S. and I.P.S. is 1,705 and 1,079 respectively (Dec. 1958).

CENTRAL SERVICES

The following are the Central Services:

1. Archaeological Service (Class I).
2. Botanical Survey of India (Class I).
3. Central Engineering Service (Class I).
4. Central Electrical Engineering Service (Class I).
5. Central Health Service (Class I).
6. Central Revenue (Chemical Service) (Class I).
7. Central Secretariat Service:—
 - (a) Selection Grade;
 - (b) Grade I.
 - (c) Grade II.
8. General Central Service (Class I).
9. Geological Survey of India (Class I).
10. Indian Audit and Accounts Service.
11. Indian Defence Accounts Service.
12. Indian Foreign Service (Class I).
13. India Meteorological Service (Class I).
14. Indian Postal Service (Class I).
15. Indian Posts and Telegraphs Traffic Service (Class I).
16. Indian Revenue Service:—
 - (a) Customs Branch (Indian Customs Service, Class I).
 - (b) Central Excise Branch Central Excise Service (Class I).
 - (c) Income Tax Branch (Income Tax Service, Class I).
17. Indian Salt Service (Class I).
18. Mercantile Marine Training Ship Service (Class I).
19. Mines Department (Class I).
20. Overseas Communications Service (Class I).
21. Survey of India (Class I).
22. Telegraph Engineering Service (Class I).
23. Zoological Survey of India (Class I).

To serve the needs of Ministries having industrial undertakings functioning under them, an Industrial Management Pool has been constituted. Recruitment to this Pool will be done by the Union Public Service Commission. At the initial constitution of the Pool its strength is to be 200.

A new service called the Central Legal Service came into being on 1st Oct. 1957. The main function of this Service was to draft legislation and to give advice on legal matters.

Proposals are also under consideration to create other All India Services like a service of Statisticians and another of Economists.

An Act which repeals all existing domicile laws in the country which prescribe a period of residence within a particular State or Union territory for any public employment has been passed by Parliament and was expected to come into force at any time.*

PAY SCALES

The pay scales of some of the more important All-India and Central services are given below:

Indian Administrative Service and Indian Foreign Service.

Junior Scale: 350-400-450-450-500-540-30-600-E.B.-30-870-40-950 (19 years).

Senior Scale: 800 (6th year or under)-50-1,000-80-1,300-50-1,800 (25 years).

Indian Police Service.

Junior Scale: 350-350-380-380-30-590-E.B.-30-770-40-850 (19 years).

Senior Scale: 600 (6th year or under)-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150 (22nd year).

Selection grade: 1,250.

Indian Audit and Accounts Service.

Junior Scale: Rs. 350-350-380-380-30-590-E.B.-30-770-40-850.

Senior Scale: Rs. 600 (6th year or under)-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150.

Junior Administrative grades: Rs. 1,300-60-1,600-1,600-100-1,800.

Senior Administrative grades: Rs. 1,800-100-2,000-2,000-125-2,250.

Indian Postal Service (Class I).

Junior Time Scale: Rs. 350-350-380-380-30-590-E.B.-30-770-40-850.

(Officers under training will draw pay in this time scale).

Senior Time Scale: Rs. 600-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150.

Directors of Postal Services: Rs. 1,300-60-1,600.

Postmaster-General: Rs. 1,800-100-2,000.

Indian Income-tax Service (Class I).

Grade II:

Time Scale: Rs. 350-350-380-380-30-590-E.B.-30-770-40-850.

Grade I:

Time Scale: Rs. 600-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150.

Assistant Commissioners of Income-tax: Rs. 1,000-50-1,400.

Commissioners of Income-tax, Grade II: Rs. 1,300-60-1,600.

Commissioners of Income-tax, Grade I: Rs. 1,800-100-2,000.

SERVICE RULES

The Rules regarding discipline and appeal of Govt. servants have been revised to delete many of the obsolete provisions and to make specific provisions in respect of many points which were previously included only in administrative instructions.

The revised rules, viz. the Central Civil Services (Classification, Control & Appeal) Rules, 1957, were promulgated on 28th Feb., 1957. The issue of these rules has contributed much to expedition in the disposal of disciplinary cases against Government servants.

* States which have amended their rules: Assam, Bombay, Kerala, M.P., Madras, Mysore, Punjab, Rajasthan, U.P. (March 1959).

Under the Central Civil Service (Conduct) Rules, 1955, Government servants are prohibited from taking part in politics, elections, accepting gifts more than of a trifling value, engaging in any private trade or business or undertaking any private employment, contracting bigamous marriage without Government's permission or speculating in investments, borrowing, etc.*

The rules also require Government servants to submit annual returns of their immovable, movable and other valuable property.*

The Home Ministry has announced an amendment to the General Services (Conduct) Rules 1955, declaring that no Government servant shall participate in any demonstration or resort to any form of strike in connection with any matter pertaining to his conditions of service.*

A Rules Revision Committee to simplify the existing Financial and Service Rules has been appointed.

The Home Minister made a declaration in Parliament that there was nothing wrong in a Government official's joining a commercial firm or an industrial undertaking after his retirement provided he had had no official dealings with such firms during his official career.

There was no reason why people who were fit and active and whose technical knowledge and experience were required by the private enterprise in order to step up productivity should not be allowed to serve. He cited instances in the U.S., the U.K. and Russia in support of his declaration.

The statement was made in the course of a discussion on Government policy about retired officials joining private firms.

The Home Minister said he was examining a proposal that even those officers who were not entitled to pension should not be allowed to join private firms for two years after their retirement without the Government's permission.

It had already been laid down that engineers should not take up jobs with contractors and the retired income-tax officers should not practice before officers who had worked under them.

The discussion itself arose from the fact that a retired Chairman of the Railway Board had accepted a job with a private firm.

The criteria which the official set for himself were explained in a letter which he wrote to the Chairman of the Railway Board. This letter was read in Parliament. The criteria are reproduced below as they are interesting and important :

(a) I would not accept a post for which suitable Indian younger than me was available.

(b) My future work must help in creating more gainful employment for Indians.

(c) My activities must be directed towards increasing the productivity of engineering industries.

(d) The organisation I join should enjoy the highest reputation and preferably be one with which I have not had direct dealings in my official capacity while on the Railway Board.

(e) If possible, I should replace a high level non-Indian national in an industrial organisation.

ANTI-CORRUPTION

There is a special police force at the Centre called the Delhi Special Police Establishment to investigate cases of corruption on the part of Central Government servants.

Under Section 5 of the Prevention of Corruption Act, 1947, 'criminal misconduct in the discharge of official duty' has been made an offence and a rule of evidence has also been laid down requiring the court to draw a presumption against a public servant found in possession of assets which are disproportionate to his known sources of income and which he cannot satisfactorily account for.

According to the annual report for 1957-58, cases involving 1,526 Government servants, including 287 gazetted officers, were dealt with by the Union Home Ministry's Special Police Establishment.

Fines imposed in cases decided by courts totalled more than Rs. 1,50,000, the maximum being Rs. 20,000 in the case of a non-gazetted employee.

The longest term of imprisonment awarded was five years.

Among the gazetted officers involved were : 41 engineers; 17 railway officers; 14 military commissioned officers; 10 Directors and Deputy Directors of Supply and Disposals and Food and Agriculture, and 37 other Class I and 54 other Class II officers.

Cases decided by departmental action, according to the Report, increased nearly threefold since 1953, from 115 to 311.

Similarly, the number of cases decided by courts were the highest, i.e., 254 as against 186 in 1956, 133 in 1955, 215 in 1954 and 161 in 1953.

In the calendar year 1958, Ninety-one Government employees, including eleven gazetted officers, were either dismissed or removed from service on charges of corruption. The Officers punished otherwise numbered 265.

A total of 811 corruption cases of different categories was brought to book. Of these 171 were taken to the courts and 335 probed into departmentally.

In 1957 the S.P.E. engaged in combating offences of bribery, corruption, misconduct, misappropriation, cheating, forgery, etc., took up 111 cases of bribery. Nearly 180 cases were of corruption and misconduct, 255 cases were of misappropriation, cheating and forgery, 45 related to breaches in Import Export Regulations, and 272 cases to cheating and forgery in the export-import trade.

Further, 734 initial inquiries were taken up and 511 were completed. Only in 122 cases was no action considered possible while proceedings were initiated in the rest of the 389 cases.

The Report says that nearly 1,000 anonymous and pseudonymous complaints were received by the Special Police Establishment in 1957. More than half were found worth looking into. But, only 50 per cent of them were found to have some substance. Similarly, only 50 per cent of the 1,900 complaints handed in openly had some truth.

Sustained efforts made to collect information regarding corruption and bribery among Central Government servants led to an increase in new cases, from 819 in 1956 to 1,061 in 1957.

This represented an increase of 29.5 per cent over the figures of the previous year.

The Report also refers to the Criminal Law Amendment Act passed in 1957, which has made changes in the law and procedure relating to bribery and corruption to fill the lacunae.

The Act has extended the definition of "public servant" to include employees of statutory corporations, Government companies and such other bodies. Further under this Act, a compulsory minimum sentence of one year is prescribed for persons convicted for criminal misconduct. The fines imposed will be commensurate with the proved or presumed illegal gains of the person convicted.

The Report added that four Inspectors of the S.P.E. were awarded the Police Medal by the President on the occasion of Independence Day and Republic Day. The Inspector General distributed about 30 Commendation Certificates besides granting cash awards to officers and staff for good work.

In the Ministry of Home Affairs an Administrative Vigilance Division has been set up under a Director of the status of a Joint Secretary, and in each Ministry and Department a Vigilance Officer has been appointed who personally deals with all cases requiring disciplinary action.

ORGANIZATION & METHODS DIVISION

The work of the Organization and Methods Division of the Government of India created in March 1954 has had considerable success in promoting speed and efficiency in the disposal of work. Experience revealed that it was not so much the system that was at fault but the way it was worked. Studies were made in selected sections by marking files and tracing their pro-

gress. A number of devices have been adopted to increase speed and efficiency. There is, for instance, a check on the output of work and a record of the cases pending for more than a month. More authority is delegated to the Section Officer than before. In the disposal of important matters either within a Ministry or between two Ministries recourse is had to personal discussion rather than to the routing of files. There is now far less delay in any correspondence with the Union Public Service Commission. A 'Standing Guard File' is now maintained for locating and putting up precedents. Dak is accepted upto the closing hour (previously it was accepted only upto 3 P.M.), and the Section Officer sends only such files up to the under Secretary as he cannot deal with himself.

The O & M Division, in collaboration with the Special Reorganisation Units, has introduced training classes for selected Section officers in the techniques of work study, the purpose of which is to simplify methods and procedures and to measure the output of work in a scientific way.

SERVICE CONDITIONS

Some of the steps recently taken to improve the service conditions of Government servants are :

In regard to pension, gratuity, leave and medical attendance certain disparities existed between class IV and other classes of Government servants. They have now been removed. About 9 lakh class IV employees are expected to benefit from this liberalisation.

The pension scheme has also been liberalised for all classes of Government servants.

All classes of Government servants and members of their families have been allowed travel concession benefits for visiting their home towns once every two years. Government's assistance will be 90 per cent of the railway fare to and fro in respect of distances exceeding 250 miles (100 miles in case of grade IV employees).

In each Ministry and Department of the Government of India, a Welfare Officer has been appointed to conduct welfare activities among the members of the staff and also to look into their personal problems.

The Staff Councils established in 1954 on the model of the Whitley Councils in U.K. are encouraged to hold meetings more frequently and to offer constructive suggestions regarding improvement of administrative machinery and also to seek redress of their grievances.

The Government Staff Welfare Organization has now a scheme of Kalyan Kendras under which wives of class III and IV Government employees will be trained to add to the family's income by doing job work like tailoring, embroidery and knitting in their leisure. The institutes will be opened in the various residential colonies of Government employees, especially in the new ones, to offer theoretical and practical coaching in these handicrafts. In addition, the centres will devote two days in a week to music and dancing.

Wages for the job work done will be fixed by a Committee of technically-qualified hands. Orders from Government offices, schools, hospitals, hostels, etc., will be sought on a regular basis and raw material such as cloth and wool will be obtained at concessional rates from manufacturers.

Six Kalyan Kendras were in existence in the Delhi colonies in Feb. 1959.

They are, however, in the nature of an experiment.

Other benefits to Government servants include advance of pay to employees drawing pay less than Rs. 300 p.m. on the eve of important festivals, overtime allowance to non-gazetted and class IV employees in Delhi, payment of railway fare for families of Government servants who die while in service, family pension, etc.

A Pay Commission has been appointed to examine the principles which should govern the structure of emoluments and conditions of service and other allied matters concerning Central Government employees.

* An amendment was made in March 1959 exempting non-gazetted employees drawing Rs. 500 or less per month. Proselytising activities are forbidden.

PUBLIC SERVICE COMMISSIONS

According to the 1957-58 report of the Union Public Service Commission, the Commission interviewed 8,842 candidates for 2,369 posts. Out of this 2,284 candidates were recommended for various posts and 1,375 placed on the reserve list for likely vacancies in the near future.

In addition, the Commission examined 154 candidates by interview aided by written or practical tests for 25 posts.

The Commission had in September 1958 about \$10 centres for conducting 15 examinations.

Important examinations held were: Indian Administrative Service, etc. Exam.; Engineering Services Exam.; Special Class Railway Apprentices' Exam.; Survey of India Exam.; National Defence Academy Exams.; Military College Exams.; Indian Air Force Exam.; Indian Navy Exams.; Army Medical Corps Exam.; Assistant Supdts. Exam.; Assistant Supdts. (Intelligence Bureau) Exam.; Assistant Grade Exam.; Stenographers' Exam.; Typewriting Tests and Assistants (R.T.E.) Exam. Besides Delhi, the centres were generally located in the States of Uttar Pradesh, Bombay, West Bengal, Andhra Pradesh, Madras, Punjab, Bihar, Assam and Jammu and Kashmir.

There was no case in which the Union Public Service Commission's recommendations had not been accepted by Government.

The Commission concurred in the *ad hoc* recruitment of Army Officers who had retired in 1955 and 1956 to Civil posts for which they may be deemed suitable by the Commission. In the year under report, the scheme was extended to apply to those who had retired before 1955. The Commission recommended during the year 16 officers of this category for appointment to civil posts.

The administrative posts, says the Report, "still continue to have a special charm for many aspirants to Government service and technical and scientific personnel are no exception".

Numerous candidates belonging to the technical services or holding technical posts had, for

instance, applied for the Indian Administrative Service (special recruitment).

The same feature was noticeable in the recruitment to the Industrial Management Pool.

"Obviously", says the U.P.S.C. "It is not in the public interest that technical and scientific personnel, who are badly needed at present in their own line, should feel tempted to go into the administrative line, often at a late stage of their career."

"If the conditions of service in the scientific and technical fields are suitably improved it is possible that the lure of administrative services may lose much of its force."

The Report once again pointed out to the deterioration of standards. According to the remarks of the examiners on the performance of candidates, "the general standard of attainment is going down".

The Commission felt however that possibly some of the deficiencies noticed among the candidates, particularly on the technical side, might very well be made up, if well-planned courses of training were prescribed for the successful candidates during the probationary period for all important appointments.

The Commission also noted that the number of candidates competing at the examinations was becoming disproportionately high compared with the number of posts available.

In the case of the Combined Indian Administrative Service, etc., Examinations the number of candidates appearing at the examinations were presenting a problem. Apart from the difficulty of finding accommodation for so many candidates there was the serious difficulty of finding the number of suitable examiners and ensuring uniformity of standards.

In spite of the rush of applicants, so far as the Joint Services Wing Examinations were concerned, it was found increasingly difficult to secure the requisite number of suitable candidates.

A very large number of those who qualified in the written test did not pass the test conducted by the Services Selection Board of the Defence

Services. In the case of the Navy although the number of vacancies each year was very small, the number who qualified finally was generally even smaller.

The Commission hoped that candidates as well as their parents would themselves weigh carefully the possibility of success and not fritter away their money and energies in the vain pursuit of competing for services for which the candidates were not adequately prepared.

The following is a list of Public Service Commissions in India:

1. Andhra Pradesh Public Service Commission (Hyderabad).
2. Assam Public Service Commission (Shillong).
3. Bihar Public Service Commission (15, Bayley Road, Patna).
4. Bombay Public Service Commission (Bank of India Building, Mahatma Gandhi Road, Bombay).
5. Madras Public Service Commission (Madras).
6. Madhya Pradesh Public Service Commission (Indore).
7. Mysore Public Service Commission (Ballabrooke, Palace Road, High Grounds, Bangalore).
8. Orissa Public Service Commission (Cuttack).
9. Punjab Public Service Commission (Patiala).
10. Kerala Public Service Commission (Trivandrum).
11. Uttar Pradesh Public Service Commission (Allahabad).
12. Rajasthan Public Service Commission (43, Station Road, Jaipur).
13. West Bengal Public Service Commission (Anderson House, Alipore, Calcutta).
14. Jammu and Kashmir Public Service Commission (Srinagar).

The Union Public Service Commission also operates for all Union Administrations.

ADMINISTRATION OF JUSTICE

THE Indian Union though a dual polity has no dual judiciary at all. The Supreme Court and the High Courts form one single integrated judiciary having jurisdiction and providing remedies in all cases arising under the constitutional law, the civil law or the criminal law. This is done in order to eliminate all diversities in remedial procedure.

The writs which for generations ran over the length and breadth of the country in the name of the British Sovereign, are now issued by the Supreme Court of India and the various High Courts in the territory of India. All the laws which existed before independence continue to operate in India as before subject to adaptation and modification made therein. Article 372 of the Constitution provides *inter alia* that, subject to the other provisions of the constitution, all the laws in force in the territory of India immediately before the commencement of the Constitution shall continue in force therein until altered, repealed or amended by a competent Legislature or other competent authority.

Article 13 of the Constitution provides that all laws in force in the territory of India immediately before the commencement of the Constitution, in so far as they are inconsistent with the provisions of the Constitution relating to Fundamental Rights (Part III) shall to the extent of such inconsistency be void.

The State is also deterred from making any law which takes away or abridges the Fundamental

Rights conferred by this Part, and any law made in contravention shall be void to the extent of such contravention (Art. 13 (2)).

Article 14 ensures to all persons equality before the law by providing that the State shall not deny to any person equality before the law or the equal protection of the laws within the territory of India.

The continuity of the existing laws and legal procedure is further ensured by Article 375 under which all courts of civil, criminal and revenue jurisdiction and all authorities and officers continue to exercise their respective functions subject to the provisions of the Constitution.

The indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Muslim. Both systems claim divine origin and are inextricably interwoven with religion, and each exists in combination with a law based on custom. The rules of the Shastras and the Koran have, however, been in some cases altered and relaxed. Instances can be found in the Bengal Sati Regulation Act of 1829, the Indian Slavery Act, 1843, the Caste Disabilities Removal Act of 1850, the Hindu Widows' Remarriage Act, 1856, and some other Acts and Codes like those which remove the civil disabilities of Harijans.

During recent years indeed there has been a determined demand on the part of social

reformers, and various women's organisations in India for an amendment of the Hindu Law so as to bring it into line with progressive social opinion, in consonance with the spirit of the times.

The Draft Hindu Code that was before the provisional Parliament aimed at abolishing the archaic principles of the ancient system of law, the removal of sex and caste disabilities, and generally simplifying, secularising, and modernising the law governing all Hindus, including Lingayats, Buddhists, Jains and Sikhs. But the Code lapsed on account of the dissolution of the provisional Parliament.

The Government of India however introduced piecemeal legislation regarding reforms in Hindu Law.

The following Acts have already been passed: The Hindu Marriage Act 1955, The Hindu Succession Act 1956, The Hindu Minority and Guardianship Act 1946, The Hindu Adaptation and Maintenance Act 1956. The new Hindu code is thus part of the statute book.

In the meanwhile, an opposite tendency has been observable among the Muslims, who by recent legislation have sought to revert to the law of the Shariat, discountenancing the application of Hindu Law and custom to the sections of the Muslim community who as converts from Hinduism had retained Hindu Law in matters of inheritance and succession.

Apart from this, the entire legal system which has hitherto prevailed in the country is in course of time bound to undergo a profound transformation by reason of the withdrawal of British rule and the partition of India. A Law Commission has been appointed by the Government of India for this purpose, and it has already submitted to the Government interim reports on certain laws and administration of justice. It has also submitted its report on the administration of justice.

A summary of this is given at the end of the article.

A demand has been made for the simplification of the procedure and law for the administration of justice.

Accordingly a bill for amending the code of Criminal Procedure was passed. The amendment gives the accused certain new rights. He can now take an oath and give evidence if he so desires.

The Indian Penal Code has from time to time been amended. The rules of Civil Procedure have been embodied in the Code of Civil Procedure. The Code of Civil Procedure was remodelled in 1908 and the Code of Criminal Procedure in 1898. These Codes as amended from time to time are now in force.

SUPREME COURT

Art. 124 of the Constitution provides for the establishment of a Supreme Court of India consisting of a Chief Justice of India and seven other judges. There is provision in law for the appointment in all of 10 other judges. At present there are 11 judges including the Chief Justice. Every judge of the Supreme Court shall be appointed by the President and shall hold office until he attains the age of sixty-five years. In the course of appointment of a Judge the Chief Justice shall always be consulted. Only a citizen of India who has been for at least 5 years a judge of a High Court, or for 10 years an advocate of a High Court, or a person, who in the opinion of the President, is a distinguished jurist, is qualified to be appointed judge of the Supreme Court.

A judge of the Supreme Court is not liable to be removed from his office except by an order of the President passed after an address by each House of Parliament, supported by a majority of the total membership of that House, and by a majority of not less than two-thirds of the members of that House present and voting, has been presented to the President in the same session for such removal, on the ground of proved misbehaviour or incapacity. No person who has held office as a judge of the Supreme Court shall plead or act in any court or before any authority within the territory of India.

The Supreme Court is a court of record with all the powers of such a court including the power to punish for contempt. The seat of the Court is to be in Delhi or such other place as the Chief Justice with the approval of the President may from time to time appoint.

The Supreme Court has exclusive original jurisdiction in any dispute (a) between the Government of India and one or more States; (b) between Government of India and one or more States on the one side and one or more other States, on the other; (c) between two or more States, if and in so far as the dispute involves any question (whether of law or fact) on which the existence or extent of a legal right depends. (Article 131).

The Appellate jurisdiction of the Supreme Court extends over all appeals from any judgment, decree or final order of a High Court, in civil, criminal or other proceedings, if the High Court certifies that the case involves a substantial question of law as to the interpretation of the Constitution. If the High Court refuses such a certificate the Supreme Court may grant special leave to appeal in a proper case (Art. 136). An appeal shall also lie to the Supreme Court from a High Court in civil matters, when the amount or value of the subject matter in dispute is not less than Rs. 20,000 or the High Court certifies the case to be a fit one for appeal to the Supreme Court (Art. 133).

In criminal matters under Art. 134 an appeal lies to the Supreme Court from any judgment, final order or sentence of a High Court, if the High Court has (a) on appeal reversed an order of acquittal of an accused person and sentenced him to death; or (b) has withdrawn for trial before itself any case from a subordinate court and has in such trial convicted the accused person and sentenced him to death; or (c) the High Court has certified that the case is a fit one for appeal.

For purposes of appeals to the Supreme Court, the Judicial Commissioners' Courts are to be considered as High Courts.

Under Art. 136 discretion is given to the Supreme Court to grant special leave to appeal from any judgment, decree, sentence or order, in any matter passed by any Court or Tribunal in the territory of India.

The Supreme Court has also power to review its own judgement (Art. 137).

The jurisdiction and powers of the Federal Court under the existing law are also exercisable by the Supreme Court (Art. 135) including the advisory power to give its opinion on questions of law or fact referred to it by the President (Art. 143).

The law declared by the Supreme Court shall be binding on all courts in the territory of India excepting the Supreme Court itself.

The dual system in the Supreme Court was abolished with effect from January 26, 1955.

Parliament has the power to legislate on the constitution, organisation, jurisdiction and powers of the Supreme Court.

Article 32 of the Constitution guarantees the right to move the Supreme Court by appropriate proceedings for the enforcement of Fundamental Rights; and for the enforcement of such rights the Supreme Court has power to issue directions or orders or writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, *quo warrant* and *Certiorari* whichever may be appropriate.

Power is given to Parliament to enlarge the jurisdiction of the Supreme Court by appropriate legislation (Art. 138).

The royal prerogative to grant pardons, reprieves, respites or remissions of punishments now resides in the President (Art. 72).

Under Art. 348, all proceedings in the Supreme Court and in every High Court in India and the authoritative text of all Bills and Acts of Parliament and the State Legislatures and of all Ordinances promulgated by the President or Governors and of all orders, rules and regulations issued under the Constitution or any law shall be in the English language. If this language is to be replaced by any other language, Parliament must legislate to that effect.

All authorities, civil and criminal in the territory of India, have to act in aid of the Supreme Court (Art. 144). The independence of the judges of the Supreme Court, is secured by charging their salaries on the Consolidated Fund of India, and by prohibiting any discussion on the conduct of the judges in their official capacity.

Some important judgements of the Supreme Court of India in 1958:

(1) In *Mohd. Hanif Quareshi and others v. State of Bihar and others* (1958 S.C.J. Pt. 75) the Supreme Court laid down that a total ban on the slaughter of cows of all ages and calves of cows and calves of the buffaloes male and female, is quite reasonable and valid with the directive principles laid down in Art. 48 of the Constitution of India.

(2) In *Express Newspapers (Private) Ltd. and another v. The Union of India and others* (1958 S.C.J. 1113, the Supreme Court laid down that fixation of 'rate of wages' includes the 'scale of wages' and in such fixation the capacity of the industry to pay is one of the essential circumstances to be considered except in cases of subsistence wages."

HIGH COURTS

Every High Court is a court of record and has all powers of such court including the power to commit for contempt of itself.

Every judge of a High Court is appointed by the President after consultation with the Chief Justice of India, the Governor of the State and the Chief Justice of the particular High Court; and he holds office until he attains the age of sixty years.

A person is not qualified to be appointed a judge of a High Court unless he is a citizen of India and has either held judicial office or practised as an advocate for 10 years in any of the States.

A High Court judge is not liable to be removed from his office except in the manner provided in Art. 124 (4) for the removal of a judge of the Supreme Court of India.

No person who after the commencement of the constitution has held office as a permanent judge of a High Court could plead or act in any court or before any authority in the territory of India except the Supreme Court or other High Courts.

There is provision in the Constitution for the appointment of additional or acting judges.

Power is given to the President in consultation with the Chief Justice of India to transfer a judge from one High Court to any other High Court in India. (Art. 222.)

Article 225 preserves the jurisdiction and powers of the High Courts as they existed immediately before the commencement of the Constitution. Restrictions on the exercise of the original jurisdiction in revenue matters are removed.

Art. 226 gives to every High Court in India power throughout its jurisdiction to issue to any person or authority including Government directions, orders, writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, *quo warrant* and *Certiorari* for the enforcement of Fundamental Rights and for any other purpose. (Art. 226).

The High Courts have powers of superintendence over all subordinate courts and tribunals within their respective jurisdiction.

Legislation affecting constitution and organisation of the High Courts can be passed by Parliament alone.

The Law Commission appointed by the Government of India has offered the suggestion that the powers of the High Courts under Art. 226-227 should be curtailed.

The Commission has also recommended to the Government of India that a High Court should not have Benches. It has also expressed the view that the establishment of tribunals will be necessary in view of the ideal of a Welfare State.

LOWER COURTS

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled courts of session and courts of magistrates.

Every State, outside the towns of Madras, Bombay and Calcutta, is divided into sessions divisions consisting of one or more districts, and every sessions division has a court of session and a sessions judge, with assistants if need be. These stationary sessions courts are like the English Assizes, and are competent to try all accused persons duly committed, and to inflict any punishment authorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the State.

The jury system has been abolished in Bombay State except in the Greater Bombay area.

Magistrates' courts are of three classes with descending powers. Provision is made and largely utilised in the towns, for the appointment of honorary magistrates. In the towns of Madras, Bombay and Calcutta, Presidency Magistrates deal with magisterial cases and benches of Justices of the Peace or Honorary Magistrates dispose of the less important cases.

Article 50 of the Constitution lays down that the States shall take steps to separate the judiciary from the executive in the public service of the States.

The State of Bombay was the first State to introduce the separation of the judiciary from the executive in public services, by a statute. The Act came into force on July 1, 1953.

There is partial separation in the following States: Andhra, Madras, Punjab, Bihar, U. P., and Kerala. It is not effected by any statute but by rules made by the Government in that behalf.

The Government of West Bengal has announced that it has decided to make the judiciary independent of the executive at all levels.

The constitution and jurisdiction of the inferior civil courts vary. Broadly speaking one district and sessions judge is appointed for each district. As District Judge he presides in its principal civil court. His functions as sessions Judge have already been described.

For these posts members of the Indian Civil Service were mainly selected in the past though some appointments were made from the Provincial Service. Now members of the Bar are recruited. In the majority of cases members of the subordinate judiciary are promoted to the posts of District Judges.

Next come the Subordinate Judges and Munsifs, the extent of whose original jurisdiction varies in different parts of the country.

There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs. 500. In the towns of Madras, Bombay and Calcutta where the Chartered High Courts have original jurisdiction, Small Causes Courts dispose of money suits up to Rs. 3,000.

In Bombay and Madras there are also City Civil Courts. The City Civil Court in Bombay has a pecuniary jurisdiction of upto Rs. 25,000.

As Insolvency Courts the Chartered High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns. In the mofussil similar powers are conferred on the District Courts by the Provincial Insolvency Act of 1920.

There are Coroners only for the Presidency Towns of Calcutta and Bombay. Elsewhere their duties are discharged by the ordinary staff of magistrates and police officers unaided by jurors.

SPECIAL COURTS

Labour Courts and Industrial Courts now exist in most States.

A Labour Court consists of a single judge.

These Courts decide upon disputes regarding (a) propriety or legality of an order passed by an employer, (b) the application and interpretation of standing orders, (c) they also decide disputes referred to them by Government for arbitration. Legality or otherwise of strikes or lock-outs or closure, etc. is also decided by them.

An appeal against the judgment of the Labour Courts lies to the Industrial Court. This court has also original jurisdiction regarding matters referred to it by the Government or by representative Unions. It decides upon questions of law referred to it by Wage Boards and references regarding interpretation of the Act and the Rules. It has power of superintendence over Labour Courts.

The Industrial Disputes Act was passed by the Central Legislature in 1947 for the investigation and settlement of industrial disputes.

Industrial Tribunals were established under this Act. If the conciliation bodies set up under this Act fail to bring about a settlement, the matter is referred to the Industrial Tribunals.

Neither party to a dispute is entitled to be represented by a legal practitioner except with the consent of the other party and by leave of the Tribunal.

Industrial Tribunals are not permanent Courts. Whenever a matter is referred to the Government regarding an industrial dispute the Government appoints one or more persons as Industrial Tribunal to adjudicate upon the dispute.

The Industrial Disputes (Amendment and Miscellaneous Provisions) Act No. 36 of 1956 makes provision for the constitution of the following courts and tribunals:

1. Labour Courts to be constituted by the appropriate Government. A court is to consist of one judge only.

2. Industrial Tribunals. A Tribunal is to consist of one judge only. A person is not qualified to be a member of a Tribunal unless he has been judge of a High Court. The Tribunals will be constituted by the appropriate Government.

3. National Tribunals. These Tribunals will be constituted by the Central Government. Here also a tribunal is to consist of one judge only.

This Act came into force on 1st Sept., 1956.

The Industrial Disputes (Amendment) Act 41 of 1956 and the Dock Workers (Regulation of Employment) Act, 1948, are two other Acts with respect to labour classes.

Administration of labour laws is a divided responsibility. The Central Government has the following organisations for the administration of labour laws. (1) The Office of the Chief Labour Commissioner, New Delhi. (2) The Office of the Coal Mines Welfare Commissioner, Dhanbad. (3) The Office of the Coal Mines Provident Fund Commissioner, Dhanbad. (4) The Office of the Welfare Commissioner, Mka Mines Labour Welfare Fund, Dhanbad and Nellore. (5) The Office of the Chief Inspector of Mines, Dhanbad. (6) The Office of the Chief Adviser of Factories, New Delhi. (7) The Office of the Director-General, Employees' State Insurance Corporation, New Delhi. (8) The Office of the Controller of Emigrant Labour, Shillong. (9) The Office of the Director, Labour Bureau, Simla. (10) The Office of the Central Provident Fund Commissioner, New Delhi.

The State Governments also have their own organisations for the administration and enforcement of labour laws.

Juvenile offenders are tried by the Juvenile Courts. In places where there are no juvenile courts the offenders are tried either by the High Court, or the Court of Session or a salaried Presidency Magistrate or a salaried Magistrate of the First Class.

Legal practitioners are not entitled to appear in any case or proceeding before a Juvenile Court. However the Court may grant permission in exceptional cases.

Probation officers are appointed by the State Government for helping the Court in the discharge of its functions. The powers and duties of such officers are laid down in the rules. Their main duty is to investigate the history of the juvenile offender and offer help to the Court. An appeal against the judgment of a Juvenile Court lies to the Chief Presidency Magistrate in Greater Bombay, and in other places to the Court of Session. If a case is decided by a Presidency Magistrate or a Court of Session the appeal lies to the High Court.

Panchayat Courts (called Nyaya Panchayat) are in existence in many States. The members of the Panchayat Court are elected by the Village Panchayat. Sections 30-44 of the Act lay down rules about the suits that may be tried and the suits that may not be tried by the Court. A Nyaya Panchayat cannot alter or revise its decision. An appeal against a decision of the Nyaya Panchayat lies to the District Judge.

LEGAL OFFICIALS

The Government of India have their own law colleague in the Law Minister of the Union Cabinet. All Government measures are drafted in his Ministry after their substance is decided upon by the administrative departments concerned.

Outside the Cabinet the principal law officers of the Government of India are the Attorney-General and Solicitor-General appointed by the President. At Bombay and Calcutta the Government of India have their own solicitors.

Each of the State Governments has its own Advocate-General.

Article 76 of the Constitution of India says that for the post of Attorney-General the President shall appoint a person qualified to be appointed a Judge of the Supreme Court. It shall be the duty of the Attorney-General to advise the Government of India on such legal matters and to perform such other duties of a legal character as may be referred or assigned to him by the President, and to discharge the functions conferred upon him by the Constitution. In the performance of his duties the Attorney-General shall have right of audience in all Courts in the territory of India. The Attorney-General has a right to take part in the proceedings of Parliament and address it.

Under Article 165 the Governor of each State is authorised to appoint a person qualified to be appointed a Judge of a High Court to be Advocate-General for the State.

The Advocate-General is appointed by the Governor. He has to give advice to the Government of the State upon such legal matters and to perform such other duties of a legal character as may be referred to or assigned to him. He holds office during the pleasure of the Governor. He appears in the Court on behalf of the Government. He is the leader of the Bar and the President of the Bar Council. He is also authorised to take part in the proceedings of the State legislature, if his advice is sought.

In addition to the Advocate-General there is also a Government Pleader in many States. He usually belongs to the Appellate Side of the High Court while the Advocate-General belongs to the Original Side where the High Court has both Original and Appellate Sides. The Government Pleader is assisted by an Assistant Government Pleader and they look after criminal work.

The State Governments have their own law officers, in addition to the Advocate-General and the Government Pleader. The law officer is designated Remembrancer of Legal Affairs. He also works as Secretary to the Legal Department. He is never a practising lawyer, but a Government servant. Usually one of the District Judges is appointed Remembrancer of Legal Affairs.

The Legal Remembrancer drafts Government Bills and gives advice to Government Departments on all legal matters.

Sheriffs are attached to the High Courts of Bombay, Calcutta and Madras.

They are entrusted with the work of preparing jury lists, serving summons and other legal processes. The Sheriff in Bombay is the ex-officio Chairman of the Bombay State Permanent Famine Relief Committee. He can also convene public meetings on behalf of the citizens.

The detailed work of the office is entrusted to the Deputy Sheriff who is an officer of the High Court.

There are Official Assignees in three States—Bombay, W. Bengal and Madras. The appointment is made by the Chief Justice of the High Court concerned.

The duties of the Official Assignee are two-fold, viz. realisation and distribution of the insolvent's estate, and the control of the property of the insolvent and his conduct generally.

A party aggrieved by the decision of the Official Assignee may appeal to the Insolvency Judge of the High Court.

In addition to the Official Assignee, a Deputy Official Assignee may also be appointed. Another officer of the court is the Insolvency Registrar who may be vested with the powers mentioned in section 6 of the Presidency Towns Insolvency Act.

There are two classes of legal practitioners, practising in the Supreme Court. They are Senior Advocates, and other Advocates (popularly known as Junior Advocates).

All Advocates of the Supreme Court are entitled to practise in High Courts. In Bombay and Calcutta an Advocate can appear on the original side only when instructed by an Attorney. An Advocate of a High Court is entitled to practise in the High Court concerned and in all the courts subordinate to it. An Attorney-at-Law if enrolled as an Advocate can also practise in the High Court, except on the original side. He, however, can plead in insolvency and chamber matters.

Pleaders are entitled to practise in the District for which they hold sanads.

In addition to these classes, there are Mukhtars in the States of Assam, Bihar, Orissa, Uttar Pradesh, West Bengal and Rajasthan. In Assam there is one more class of legal practitioners known as Revenue Agents.

The dual system was abolished in the Supreme Court on 26th Jan. 1955.

Formerly official Law Reports were published only in six series—Bombay, Allahabad, Calcutta, Madras and Nagpur. Three more series, Cuttack, Mysore and Rajasthan, have now been added.

These reports contain cases decided by the High Courts and the Supreme Court of India.

In addition to these series a "Supreme Court Reporter" is also published. It contains important decisions of the Supreme Court of India.

Besides these official reports there are a number of private agencies that also bring out reports of the decisions of the Supreme Court and the High Courts. The Law Commission is considering the desirability or otherwise of allowing private series of law reports. Reports are also published of important cases determined by Labour Courts, Industrial Courts and Labour Appellate Tribunals.

HINDU LAW REFORM

A short note on Hindu Law reform is in order as it concerns the welfare of the women of this country.

As a result of increasing consciousness on the part of Indian women of their social and political status, there has in recent years been a move to revise and codify the somewhat vague and contradictory law governing the Hindu home, especially as it affects marriage, divorce, succession to property, etc.

In 1937 the Indian Legislature enacted the Hindu Women's Rights to Property Act. This Act, for the first time, gave to Hindu widows a right to claim a share in the husband's property and demand partition.

Four years later the Government of India set up a Committee to overhaul and codify the Hindu Law. This Committee, which was known as the Rau Committee, drafted two bills dealing with Hindu intestate succession and Hindu marriage.

When the measures came up for consideration by the two Houses of the Central Legislature, a joint committee of the Houses recommended the revival of the Rau Committee with a view to the codification of the entire Hindu Law. Consequently the Rau Committee was revived early in 1944. During 1944-45, the Committee made a tour of the country and elicited public opinion on the proposals embodied in the two measures and on the codification of the Hindu Law as a whole. They gathered evidence from leading lawyers and representative organisations of various shades of Hindu opinion on a draft Hindu Code prepared by them.

During the last five years, the Central and the Provincial Legislatures passed various Acts, which aimed at improving the condition of Hindu women.

The Hindu Marriage Disabilities Removal Act of 1946, legalised marriages between Hindus belonging to the same Gotra or Pravara.

The Hindu Married Women's Right to Separate Residence and Maintenance Act of 1946 enabled a married Hindu woman to claim from her husband separate residence and maintenance on certain grounds.

The Hindu Marriage Validating Act, 1949 removed the caste-barriers from the sphere of marriages and validated even the Pratiloma marriages.

The Child Marriage Restraint (Amendment) Act of 1949 raises the marriage age of girls from 14 to 15 years.

In the State of Bombay, monogamy was made a rule by the Prevention of Hindu Bigamous Marriage Act of 1946, and dissolution of marriages by divorce was allowed under certain conditions by the Bombay Hindu Divorce Act of 1947.

In the state of Madras, there was an Act preventing bigamous marriages and providing for divorce. The Act was called the Madras Hindu (Bigamy Prevention and Divorce) Act.

The Madras Legislature passed the Madras Devadasis (Prevention of Dedication) Act in 1947. This Act puts an end to the unhealthy practice of dedicating Hindu women as 'devadasis' to Hindu deities.

Bombay Hindu Women's Right to Property Act (Extension to Agricultural Land) extended the application of the Hindu Women's Right to Property Act, 1938 to agricultural land also. A similar law was passed in Madras.

Though the Hindu Code Bill was dropped, the Government of India have passed several Acts as already mentioned affecting Hindu Law.

The Special Marriage Act of 1954 repeals the Special Marriage Act of 1872. Though the Act of 1954 is not a part of Hindu Code, it affects Hindus in so far as it provides for civil marriages both for Hindus and non-Hindus.

The Hindu Marriage Act of 1955 came into force on 18th May, 1955. The Act has repealed the following laws :—

1. The Hindu Marriage Disabilities Removal Act of 1946; 2. The Hindu Marriage Validity Act of 1949; 3. The Hindu Divorce Act of 1947 (Bombay Act); 4. The Prevention of Hindu Bigamous Marriage Act of 1946; 5. The Madras Hindu (Bigamy Prevention and Divorce) Act; 6. The Saurashtra Prevention of Hindu Bigamous Marriage Act; 7. The Saurashtra Hindu Divorce Act.

Under the Hindu Marriage Act 25 of 1955, monogamy has become a rule in Hindu Society. Divorce is allowed on certain grounds. Inter-caste marriages are valid.

The Hindu Minority and Guardianship Act (32 of 1955) seeks to regularise the law regarding guardianship.

The Hindu Succession Act 29 of 1956 aims at simplifying the Hindu Law of succession. It does away with the distinction between the Mitakshara and Dayabhaga law of succession. However, special provision is made for regulating succession to the property of intestates governed by Marumakkattayam, Aliyasantana or Mamudri laws of inheritance. The Act creates two classes of heirs, preferential heirs are included in Class I. The Act confers a right to a share on a daughter, a provision unknown to the previous Hindu Law.

The Hindu Succession Act has also made the following changes, which are revolutionary, in the old Hindu Law :

All property held by a Hindu woman is now her absolute property and there are no restrictions on her rights.

The heirs of a deceased Hindu are entitled to get a share even in the undivided interest in the coparcenary property. A Hindu can make a will even of his undivided interest in the coparcenary property.

The Hindu Adoption and Maintenance Act 79 of 1956 was passed in December 1956. Under the Act the adoption of a son or a daughter is permitted. The consent of the wife is necessary for adoption, which is now purely secular in character.

Besides these laws, Parliament has passed two important Acts relating to social reform. The Suppression of Immoral Traffic in Women and Girls' Act (No. 104 of 1956) was passed in December 1956. This Act provides in pursuance of the International Convention signed at New York on 9th May 1930 for the suppression of immoral traffic in women and girls. The Women's and Children's Institutions (Licensing) Act (No. 106 of 1956) was passed in December 1956. This Act provides for the licensing of such institutions and of matters relating to them.

Yet another Act, in social reform is the Probation of Offenders Act. Act 20 of 1958.

The Bombay Legislature has passed an Act for the registration of marriages.

LAW COMMISSION REPORT

A Law Commission to revise the Statute Law of the country and suggest ways and means of improving the system of judicial administration was appointed on Aug. 5, 1955.

The members were :

Mr. M. C. Setalvad (Chairman); Mr. M. C. Chagla, Mr. K. N. Wanchoo, Mr. G. N. Das, Mr. P. Satyanarayana Rao, Dr. N. C. Sen Gupta, Mr. V. K. T. Chari, Mr. Narasu Raju, Mr. S. N. Sikri, Mr. G. S. Pathak and Mr. G. N. Joshi.

The Commission was to function in two sections. The first section consisting of the Chair-

man and the first three members was to deal mainly with the question of the reform of judicial administration. The second was to consist of the other seven members and was to deal with the revision of statute law. The two sections would however work in close co-operation under the direction of the Chairman.

While the section dealing with the revision of statute law submitted periodical reports, the one dealing with judicial administration submitted its full report sometime in the second half of 1956. It was laid on the table in Parliament on 25th Feb. 1959.

In Dec. 1956 the Law Commission was re-constituted for a period of three years to enable it to continue the work of statute revision.

The chairman is Mr. T. L. Venkatarama Iyer, retired judge of the Supreme Court. There will be two whole-time and two part-time members. The Secretary to the Government of India in the Legislative Department, Mr. G. Rajagopal is Secretary to the Commission.

SUMMARY

Below we give a summary of the report of the Law Commission on judicial administration placed before Parliament on 25th February.

While urging the retention of the existing judicial system the Commission has made far-reaching recommendations.

These include the establishment of country-wide panchayat courts, the setting up at the Centre of a Ministry of Justice, a Law Commission, an Indian Judicial Service and the abolition of trial by jury. It has also recommended the replacement of English by Hindi in the world of law at some convenient date in the future, the creation of an all-India bar, the separation of the judiciary from the executive, legal aid to the poor, better pensions for Supreme and High Court Judges, the appointment of whole-time directors of public prosecution in each district and of an *ad hoc* body presided over by the Chief Justice of India to draw up a panel of persons suitable for appointment as judges.

The Commission has adversely commented on the appointment of judges of the High Court and the Supreme Court on communal, regional and other considerations.

In the High Courts "unsatisfactory appointments, made on political, communal and regional or other grounds, have resulted in the diminution of the out-turn of work and contributed to arrears."

In the Supreme Court too "the best talent among the judges of the High Courts has not always found its way to this Court."

"Communal and regional considerations and executive influence (exerted from the highest quarters) have been responsible for some appointments."

While agreeing that in a vast majority of cases of appointments to the High Courts, the procedure laid down under the Constitution had been followed and the concurrence of the Chief Justices obtained, in many unsatisfactory appointments "the Chief Justices have had to surrender their better judgment and yield to the wishes of the Chief Ministers."

The Commission has recommended the amendment of Article 217 of the Constitution to provide that a judge of the High Court should be appointed only on the recommendation of the Chief Justice of the State and with the concurrence of the Chief Justice of India.

Judicial System: The Commission is of the view that the working of the existing judicial system is not unsatisfactory and its abandonment is not desirable. Defects noticed in the existing system could and should be removed. At the same time greater use could be made of simpler procedures such as *nyaya panchayats*.

The Commission does not agree with the suggestion for amendment of Article 136 to restrict the Supreme Court's special appeal jurisdiction, but suggests the setting up of a special tribunal to hear appeals from labour tribunals or the enlargement of the jurisdiction of High Courts for the same purpose. It has also suggested that the Supreme Court should be "more chary of granting special leave freely (in criminal matters) as such a practice has a tendency to affect the prestige of the High Courts."

Recruitment: The Commission has advocated recruitment to the Supreme Court Bench directly from the Bar and the discontinuance of the present practice of appointing the most senior judge as Chief Justice of India or Chief Justice of a High Court.

In the case of the Supreme Court the most suitable person, whether from the Court, the Bar or the High Courts should be chosen while in the case of the High Court the fittest person should be chosen, if necessary from outside. The duties of a Chief Justice require not only a person of ability and experience but also a competent administrator capable of handling complex matters.

Pensions: The Commission has suggested increase in the pensions to be paid to Judges of High Courts and Supreme Courts. While there is no need to raise the retirement age of Supreme Court Judges, that of High Court judges should be raised to 66. Retired judges should not have "Chamber practice" and retired High Court

judges should not be allowed to practise in any court after retirement in view of the increased pensions recommended.

Retired judges of the Supreme Court and High Court should be prohibited from accepting any employment under the Government after retirement except to serve on the Supreme Court Bench as *ad hoc* or full judges as the case may be.

There should be an effort to recruit directly distinguished members of the bar to the Supreme Court Bench and the person so selected should have a tenure of at least ten years in the interests of the stability of the judicial administration. The Chief Justice of India should have a tenure of at least five to seven years.

Arrears: On the question of arrears in the Supreme Court, the Commission is of the view that the file of the Court is being clogged with appeals relating to labour matters. While Article 136 under which such appeals are filed should not be amended, relief should be given to the Supreme Court by enabling parties to file appeals in such matters to High Courts or to a special tribunal constituted for that purpose.

The pendency of cases before the Supreme Court shows an upward trend, but a further increase in the strength of the Court should be deferred for the present. The Commission recommends that in the meantime the Court itself might consider the desirability of instituting a system of preliminary hearing in Article 32 petitions and of enlarging the powers of a single Judge or of a Division Bench to deal with contested interlocutory and miscellaneous matters.

At the High Courts, the Commission is of the view that increase in normal work, expansion of special jurisdiction under various Acts, petitions for the enforcement of the fundamental rights guaranteed by the Constitution, faulty tests adopted by the executive in assessing the necessary judge-strength, delays in filling vacancies and deputation of judges for work other than purely judicial have contributed to the large arrears.

High Court Judges: The permanent strength of High Courts should be re-fixed after taking into consideration the recent increase in their work and the strength so fixed should be reviewed at intervals of two or three years.

The Commission does not think that the present salary of High Court judges is so inadequate as to deter competent men from accepting judgeships excepting perhaps in Calcutta and Bombay. The difficulties in these two places (because of the low salaries offered) could be counteracted by offering judgeships to rising junior members of the Bar at a comparatively early age.

At present an officer of the judicial service with ten years' service is eligible for appointment as a High Court judge even though he might not have actually performed judicial functions for that length of time. The relevant Article of the Constitution should be amended to restrict appointments only to a judicial officer who has exercised judicial functions as a district judge for at least three years.

The standard time for the disposal of second appeals and Letters Patent appeals should be one year, of first appeals two years and of criminal matters, writs and civil revision petitions six months from the date of institution. Cases pending for longer duration should be treated as arrears and additional judges appointed for the sole purpose of their disposal within two years.

JURISDICTION

Courts should work for at least 200 days in a year and judges should sit in the Court and do judicial work for at least five hours every working day. Judges should set an example of strict punctuality on the Bench—the practice of retiring into Chambers for dictating judgments or for doing administrative work during court hours is not desirable.

The setting up of Benches of the High Court at different centres in a State is undesirable.

The High Courts at Calcutta, Bombay and Madras should continue to exercise their ordinary original civil jurisdiction but this should extend only to matters exceeding Rs. 10,800 in value.

The non-appealable limit under Section 102 of the Civil Procedure Code should be raised to Rs. 2,000 and there should be no second appeals in civil suits where the value is below Rs. 2,000 and no right to immovable property is involved.

Letters Patent appeals may be abolished. A single judge hearing a second appeal should, if he finds the question involved in the appeal is important, refer it to a Division Bench.

The appellate jurisdiction of district judges should be immediately raised to Rs. 10,000 and all such appeals now pending in High Courts should be transferred to district courts for disposal.

Disposal of Suits: The Commission is of the view that in regard to the subordinate judiciary and the present arrears of work the existing strength of the judiciary at the level of *muniffs* and subordinate judges was sufficient to deal with current institution of suits. At the level of district judges, the judiciary is so largely deficient in numbers that it is not able even to cope with current institutions. The pendency of old suits is very high in most of the States.

The Commission suggests that a regular contested suit in a *muniff's* court should be dealt with within a year and in a subordinate judge's court within a year and a half. Small cause suits should be disposed of within three months, regular contested appeals in district courts within six months and civil miscellaneous appeals within three months. Criminal cases in magistrates' courts should be disposed of within two months, committal proceedings within six weeks and sessions cases within three months from the date of apprehension of the accused.

Criminal appeals and revisions should be disposed of within two months in the sessions courts and within six months in the High Court from the date of institution.

All matters not disposed of within the period specified should be treated as arrears and special arrangements made to deal with them.

The Commission says that despite repeated attempts by the High Courts, the failure of the State Governments to appoint additional judges to handle the work, which has considerably increased on account of several new Acts coming into force, has resulted in accumulation of arrears.

The strength of the subordinate judiciary should be kept at such a level as to enable it to dispose of all matters within the time-limits suggested by the Commission. The High Courts should carefully examine immediately the requirements of judicial personnel of various classes in the light of the volume of work in the subordinate courts and fix the strength so that it will be sufficient to dispose of the current institutions within the target limits.

Judicial Service: The Commission has made a number of recommendations about the recruitment, emoluments and promotions and conditions of service of the subordinate judiciary. The State Judicial Service should have two Classes—Class I consisting of District Judges or other equivalent posts, Class II comprising two grades of officers, namely, *muniffs* and subordinate judges.

Wherever the judiciary has been separated from the executive, the civil and criminal judiciary should be unified.

Dealing with recruitment to the subordinate judiciary, the Commission has strongly deprecated reservations of special quotas for specified communities. The Commission thinks that the only reservations that could be legitimately made are those in favour of the backward classes. But even these reserved seats should be filled by persons in order of merit from among those who have been subjected to an examination.

The Commission suggests that an All-India Judicial Service should be constituted by an all-India competitive examination open to law graduates on the lines of the I.A.S. examination.

This All-India service should man 40 per cent of the posts in the State Judicial Service Class I. The remaining 60 per cent should be filled in moieties by promotions from the State Judicial Service Class II and by direct recruitment of the Bar.

Promotions in the Judicial Service should be based only on merit and not on seniority. The age of retirement of judicial officers should be raised to 58, but they should not be re-employed under the Government after retirement.

No punishment short of dismissal should be imposed on a judicial officer found guilty of corruption.

While it is not advisable to form anti-corruption committees comprising district judges and members of the Bar to go into the cases of alleged corruption by judicial officers, the High Court should take particular care to scrutinise the reputation of officers for integrity at the time of promotions.

Where the judiciary has not been separated from the executive, the criminal judiciary should be brought under the administrative control of the High Courts.

Pecuniary Jurisdiction: The Commission has suggested vesting of unlimited pecuniary jurisdiction in the subordinate or senior civil judges, raising pecuniary jurisdiction of junior civil judges or munsifs, and vesting in the subordinate judges of jurisdiction under a number of laws like the Succession Act, the Guardian and Wards Act, the Indian Divorce Act, etc. which vest such jurisdiction in the district judges.

PROCEDURE

The Commission has suggested a number of procedural changes in the trial of suits and their appeals in respect of pleadings, service of process, examination of parties, discovery and issues, attendance of witnesses, hearing and delivery of judgments.

As regards civil revision, while the right of appeal against interlocutory orders should not be curtailed, a Rule Xist should be issued only on a careful and strict scrutiny of the revision petition.

The Commission is against suggestions for introducing written arguments in cases as in the U.S.

It suggests that in cases of suits against the Government, the provision in various laws requiring a two-month notice to the Government should be done away with. But if a suit against a Government or a public officer is filed without sufficient notice, the plaintiff could be deprived of his costs if his claims are settled by the Government before issues are framed in the Court.

Administration of justice being one of the primary functions of the State, it is not proper on principle to charge any fees from suitors in courts. But even if fees are charged, the revenue derived should not exceed the cost of administration of justice and should not be a source of profit. Steps should be taken to reduce Court

fees so that the revenue from it is sufficient to cover the cost of the civil judicial establishment.

The Commission thinks that the writ jurisdiction of the High Courts under Article 226 should in no way be curtailed as it provides a cheap, expeditious and effective remedy.

The Commission has recommended amendment of Article 226 of the Constitution to remove the difficulties created by the Supreme Court's interpretation of the Article that a High Court can only issue writs against the authorities within its territorial jurisdiction.

Tribunals: Dealing with the question of administrative tribunals, the Commission thinks that such tribunals should not be conceived of as a device to supplant the ordinary Courts of law. It does not favour the creation of a general administrative body. The existing jurisdiction of the Supreme Court and the High Court which enables them to examine to a limited extent the action of administrative bodies should be maintained unimpaired.

An appeal on facts should be provided to an independent tribunal, presided over by a High Court judge and assisted by a person or persons with administrative or technical knowledge in matters involving judicial or quasi-judicial decisions.

Court Servants: In view of the large number of applications to the High Courts by Government servants seeking redress in service matters through Article 226, appellate tribunals consisting of experienced civil servants as members and presided over by legally qualified chairmen may be established both at the Centre and in the States to deal with memorials and appeals from the Government servants.

Revising Enactments: The Commission has also suggested the setting up of a permanent body or commission, both at the Centre and the States, charged with the task of revising enactments.

Criminal Justice: Dealing separately with the question of criminal justice, the Commission is of the view that there is scope for improvement in the methods of trial and for investing the lower classes of magistrates with larger powers. The system of honorary magistrates could be tried in the States, where it does not prevail, to relieve the regular magistracy from the large number of petty cases.

At the investigation stage there is often considerable delay particularly in the complicated cases. The general quality of investigation is also poor. These defects must be remedied by increasing the police staff, modernising existing methods of investigation, separating investigating officers from the other police, avoiding piecemeal investigation, and providing training in proper methods of investigation and ensuring strict supervision by senior officers.

The work of prosecution should be conducted with the utmost fairness and without any eagerness on the part of the prosecutor to secure a conviction. The work of prosecution should not therefore be entrusted to police officers.

The Commission suggests the extension of the provision in the Motor Vehicles Act, enabling an accused to enter a plea of guilty without appearing in court, to other minor offences under the I.P.C., traffic cases and minor breaches of rules and regulations under various local and minor enactments.

There is large pendency of criminal appeals in most of the high courts and in the sessions courts in many States. To relieve the congestion in High Courts, a single judge may be empowered to hear all criminal appeals except those in which a sentence of death or transportation for life have been imposed. In the Sessions Courts, all jail appeals should be examined outside the Court hours. The present restrictions on rights of appeal should be raised from a fine of Rs. 50 to a fine of Rs. 200.

The judiciary has not been separated from the executive in a large number of States. Separation may be effected by Central legislation.

Legal Education: The Commission has also made recommendations for the improvement of legal education and the Bar. As regards the Bar, the Commission wants early implementation of the proposal for a unified All-India Bar. The employment of touts by lawyers should be made a criminal offence.

Aid to Poor: Legal aid to poor persons and persons of limited means is an obligation of a welfare State and the State should provide the necessary funds to meet this purpose. But the legal profession also owes a moral and social obligation to the poor members of society and should in the main, if not entirely, shoulder the responsibility for the administration and working of schemes of legal aid.

Social Life: The Law Commission has advised judges to remember that their office demands of them "certain reserve and restraint in their social life."

The Commission quotes the practice till very recently when British and Indian judges maintained as a rule "a tradition of isolation and aloofness, declining to mix freely with members of the public and the executive at clubs and other social functions."

The Commission adds: "We have indeed, in recent years, reached what was called 'an extreme position in the other direction' Far from avoiding the 'precincts of Government House', judges have come to treat invitations from Government House as 'commands'. Newspapers tell us of Chief Justices and judges being 'granted' interviews by Ministers."

"The attitude of judges in regard to contacts with the public seems to have completely altered. It has become frequent for judges, newly appointed to the bench, to accept invitations to entertainment not only from representative associations but also from individual members of the bar and even from private citizens."

"It appears to us that such behaviour by the judges must lead to a loss of the high respect in which the judges should be held by the community."

DEFENCE SERVICES

Chief of the Army Staff, General K. S. Thimayya.

Chief of the Naval Staff, Vice-Admiral Ram Das Katari.

Chief of the Air Staff, Air Marshal S. Mukerjee.

THE supreme command of all the Armed Forces of the Indian Republic is vested in the President. Since the attainment of Independence, the Ministry of Defence has become the central agency for formulating and obtaining policy decisions of the Government of India on defence matters and for transmitting them to, and seeing to their implementation by, the three Defence Services Headquarters.

The partition of India in 1947 was an important landmark in the history of the Armed Forces of India. They were divided between the two countries on a communal-cum-optional basis, which worked out to an approximate proportion of one-third to Pakistan and two-thirds to the Union of India. British troops, including the Royal Air Force, were completely withdrawn from India early in 1948.

The nationalisation of the Armed Forces started soon after the partition. In the three Services today only a handful of British technicians are employed on a contract basis. The order of precedence of the Defence Services has been re-arranged as Army, Navy and Air Force.

The total defence outlay on revenue and capital accounts for 1958-59 was estimated at Rs. 305 crores against the revised estimate of Rs. 291 crores during 1957-58 according to the annual White Paper on defence service estimates presented to Parliament. This is an increase of Rs. 80 to 100 crores over the 1956-57 figure and represents for the most part the cost of stores and equipment for the Air Force, Army and Navy in that order.

The foreign exchange component of this expenditure was Rs. 34.23 crores in 1956-57 and estimated at Rs. 77.58 crores in 1957-58 and is Rs. 71.31 crores in 1958-59.

Of the net defence estimate of Rs. 278.14 crores on revenue account for 1958-59, pay and allowances account for Rs. 95.77 crores, transport and miscellaneous charges for Rs. 17.57 crores, stores and equipment (including the expenditure on manufacturing establishments) for Rs. 138.71 crores, maintenance of buildings and installations for Rs. 11.60 crores and pensionary charges for Rs. 14.49 crores.

One head of receipts in the army estimates, which appears to call for scrutiny, is the sale proceeds of surplus and obsolescent stores. This amounted to Rs. 6.19 crores in 1956-57 and is estimated at Rs. 5.35 crores during 1957-58. The budget estimate for 1958-59 under this head is Rs. 5.22 crores.

DEFENCE ORGANISATION

During the British regime, the Commander-in-Chief was not only the Supreme Commander, i.e. head of the three Services, but also the Defence or War Member of the Executive Council, and, as such, occupied a specially privileged position—second only to that of the Viceroy and Governor-General. Since August 15, 1947, each Service has been placed under a separate and independent head, their present designations being Chief of the Army Staff, Chief of the Naval Staff and Chief of the Air Staff.

With the appointment of three Service Chiefs independent of each other, the task of co-ordination of the activities of the three Services has devolved on the Defence Ministry. In order to ensure expeditious handling of work, a network of committees has been established at different levels.

At the top is the Defence Committee of the Cabinet which is, for all practical purposes, the Government so far as the Services are concerned. All important policy questions relating to defence are decided by this Committee, which is presided over by the Prime Minister. Next in importance is the Defence Minister's Committee

which, besides, the Defence Minister, includes the Deputy Defence Ministers, the Defence Secretary, the Financial Adviser (Defence) and the three Service Chiefs.

The Defence Minister is responsible to Parliament for all matters relating to the Defence Services, including appropriation and allotment of funds, correlation of all civil and ministerial activities for purposes of defence and control and direction of research policy.

There are a number of inter-Services organisations, directly administered by the Defence Ministry, dealing with matters of common concern to the three Services. Some of them are the Defence Production Board, the National Cadet Corps, the National Defence Academy, the Defence Services Staff College, the School of Foreign Languages, the Directorate-General of Armed Forces Medical Services, the Resettlement Section, the Indian Soldiers' Sailors' and Airmen's Board, the Combined Inter-Services Historical Section, the Directorate of Military Lands and Cantonments and the Joint Cipher Bureau.

PRODUCTION BOARD

It was with a view to evolving a co-ordinated policy in regard to the production of military stores and equipment and the inspection, research, design and development activities of the three Services that the Government of India set up a Defence Production Board three years ago. With the Defence Minister as its Chairman, the Board is responsible for the proper running of all the Ordnance Factories, including the Machine-Tool Proto-Type Factory. It has under it the Scientific Adviser to the Minister, Dr. D. S. Kothari, and the Controller-General of Defence Production, Maj.-Gen. Pratap Narain, their respective departments being the Research and Development Organisation and the Production and Inspection Organisation.

The Research and Development Organisation was brought into being in January 1958 by the amalgamation of the Technical Development Establishments of the three Services and the Defence Science Organisation to ensure that scientific research played an effective role in production. The head of this new set-up, the Scientific Adviser to the Minister for Defence, is assisted by a Chief Controller and a Chief Scientist.

This re-organisation is intended to bring to the three Services the backing of the country's scientific activity and to secure the maximum utilisation of the available resources.

The R. and D. Organisation, which is closely associated with the P. and I. Organisation, includes technical establishments dealing with weapons, ammunition, military explosives, metallurgy, electronics and optical instruments. It has under it research installations like the Defence Science Laboratory, New Delhi, the Stores Laboratory, Kanpur, the Naval Physical Laboratories at Bombay and Cochin and research-cum-training installations, like the Institute of Armament Studies, Kirkee. Whereas research work is carried on in the laboratories, development work is concentrated at the various technical establishments scattered all over the country. The P. and I. Organisation is so designed as to achieve self-sufficiency in respect of stores required by the Services and has made continuous efforts to establish production of items hitherto imported.

A high-level departmental Committee, called the Defence Production Planning Committee, has been set up to work out a plan for achieving as near self-sufficiency as possible in defence stores.

The Artisan Training School, Ambarnath, plays an important role in training technical personnel for the defence industries.

It was in order to meet the urgent need of training technical staff officers for the Armed Forces that the Government established the Institute of Armament Studies some years ago, as a constituent of the Defence Science Organisation. Apart from training Service officers, the Institute provides facilities for a comprehensive scientific study and research in the performance of weapons and equipment.

Similarly, the two naval laboratories, one chemical and metallurgical and the other physical, were established to deal with science problems relating to the Navy. The former is concerned with anti-corrosion and anti-fouling paints, detection of flaws in materials and castings and welds, while the latter is engaged in research on under-water acoustics, mines and oceanography.

A Psychological Research Wing of the Science Organisation was formed in 1949 under a Chief Psychologist, the main function of which is to conduct research in the assessment of human personality so that the right type of officers may be selected for the Armed Forces.

A Defence Science Service has been instituted which includes all civilian scientists engaged in research, development, inspection or teaching in any of the three Services or in the Ministry of Defence.

ORDNANCE FACTORIES

The Ordnance Factories of the pre-1947 period, were producing only a limited range of conventional weapons. They have, since independence, been considerably enlarged and modernised to raise indigenous manufacture in an effort to make the country self-sufficient in vital supplies.

The Ordnance Factories' Organisation now comprises 19 industrial units scattered all over the country, employing more than two and a half lakh civilian employees and represents, next to the Railways, one of the largest State-owned integrated enterprises.

Before World War II there were only nine Ordnance Factories. Until recently the Ordnance Factories catered primarily for the Army, but during the past few years they have also produced stores for the Navy and the Air Force. These Service items include artillery guns, heavy mortars, naval guns, barrels and recoil system of guns, mountings, carriages and buffers for heavy and medium-calibre guns, light machine-guns and other small arms, bombs, shells and various types of ammunition and high explosives, sea mines, depth-charges, parachutes, service-clothing and mountaineering equipment.

Though primarily geared for the manufacture of highly-specialised armaments and military equipment, the Ordnance Factories, as part of their peace-time functions, are now using all their utilizable spare capacity to cater to the needs of various sections of the community. Wide and varied, their civil trade activities cover the five broad categories of ferrous, non-ferrous, leather and textile, chemical and general engineering. The last category includes scientific, optical and mathematical instruments, sporting arms and ammunition, metal castings and forgings and other miscellaneous articles.

The Machine-Tool Proto-Type Factory at Ambarnath (Bombay), with integrated facilities for the design, development and proto-type fabrication of newer types of armaments, is one of the principal Ordnance Factories. (For further details see under Government Industrial Undertakings.)

The Ordnance Factories manufacture a variety of steel, cast-iron and non-ferrous materials required by industry in various forms. Pioneer work has been done in the manufacture of practically all the steels, ferrous alloys and metal alloys for special purposes. Of the various

types of irons and steels which were hitherto imported, the Ordnance Factories can now supply carbon, nickel, nickel-chromium - molybdenum, austenitic stainless, spring, ball-bearing, high-speed and free-cutting steels, acid-resisting cast-irons and heat-resisting alloy irons. Typical items of non-ferrous metals which can be supplied are de-oxidised and arsenical copper, all types of brasses, high-tensile bronzes, nickel-silver, cupro-nickel and aluminium and its alloys. Long experience in the manufacture of these metals for the Services guarantees the quality of the material and rigid adherence to specifications.

With the peace-time relaxation in the requirements of scientific and optical stores for the Services, the Ordnance Factories have been manufacturing precision instruments of the highest standard of quality and finish for civilian use, including 35-mm sound projectors, film-strip projectors, still-film projectors, photo-enlargers, microfilm readers, pathological, dissecting and student-type microscopes, auto-collimators, prismatic binoculars, splinter-proof goggles and drawing instrument sets.

Initially manufacturing only harness and saddlery items for harnessed cavalry, artillery and other mounted units of the Army, one of the Ordnance Factories is now engaged in producing various miscellaneous items embracing four distinctly separate trades, e.g. leather, textile, wood and engineering. A multifarious variety of high-quality items are manufactured from raw hides for the Services, and, as and when fluctuations in defence needs occur, the flexibility of the set-up permits of production of consumer goods, such as frontier *chappals*, suit cases and brief cases.

The Ordnance Factories' highly-precision machinery, skilled craftsmen and production capacity offer substantial assistance to the Railways by keeping the wheels of traffic constantly moving. The railway stores manufactured by them cover several components of locomotives and wagons, including piston rods, connecting rods, crank-shafts, axles, coupling hooks, resistance grids, light-riding trolley wheels and fog signals. They also produce, among others, jeep engine blocks and heads, steam and diesel road-rollers and their spare parts, oil-exPELLERS, mechanical ploughs, air-conditioning compressors, fuel-gas plant, pressure cookers and small tools, bolts and nuts. The resources of these factories are now being harnessed to produce tractors in the country for the first time.

Among the various types of fire-arms for civil use which the Ordnance Factories produce are rifles and double and single-barrel shot-guns. They also supply to civil industry acetone, nitric and sulphuric acid, benzol, zylol, nitro-cellulose, nitro-benzene, mono-nitro-toluene and oleum. Schemes are also well advanced for the production of other chemicals.

ARTIFICIAL LIMB CENTRE

A modern Artificial Limb Centre was set up by the Central Government at Poona soon after World War II. In 1946, with the arrival of new equipment and machinery from the U.K., it was firmly established and now claims to be the fourth largest institution of its kind in the world.

For some years, the Centre catered only to the needs of the Services. But, since 1951 it has also been taking in civilian patients, whose number has since been progressively on the increase. In recent years, patients from some neighbouring countries, like Ceylon, Iraq, Burma and Indonesia, have also been accepted by it for limb-fitting.

The Centre, which functions under the control of the Director-General of Armed Forces Medical Services, also produces various types of orthopaedic boots and shoes, belts, trusses and spinal braces.

Besides the Ordnance Factories meeting the country's defence requirements, the other important defence industries are the Hindustan Aircraft (Private), Ltd., and the Bharat Electronics (Private), Ltd. at Bangalore.

For detailed notes on Hindustan Aircraft and Bharat Electronics see article 'Government Industrial Undertakings'.

NATIONAL CADET CORPS

The National Cadet Corps came into being in 1948. The aim of the Corps is (1) to develop character, comradeship, ideal of service and capacity for leadership in young men and women, (2) to stimulate interest in the defence of the country, and (3) to build up a reserve of potential officers to enable the Armed Forces to expand rapidly in a national emergency. The organisation is, thus, mainly of an educational and nation-building character. Officers and cadets have no liability whatsoever for active military service. In this way it is different from the Territorial Army, which is designed to serve as a second line of defence.

With the contemplated enlargement of the Cadet Corps under the Second Five-Year Plan, it is expected that a unit of the N.C.C. will be raised in every school and college throughout the length and breadth of the country. Giving, as it did, a background of military training to educated youth and inculcating in them a sense of discipline, the cadet movement caught the imagination of school and college students from the very beginning. It has proved to be the most popular and powerful youth organisation so far as the development of corporate life among students is concerned. Social service has been recognised as an essential feature of cadets' activities. By the end of the Second Five-Year Plan the strength of the Naval Wing of the N.C.C. is expected to be 30 Senior and 305 Junior Division troops compared to the strength in 1958 of 19 Senior and 150 Junior Division troops.

The N.C.C. consists of three divisions: (1) Junior, (2) Senior and (3) Girls'.

The strength of the Corps as on March 31, 1958 was as follows:—

	Officers	Cadets	Total
Junior Division ..	2,378	78,330	80,718
Senior Division ..	1,612	68,633	69,245
Girls' Division ..	515	15,480	15,995

The Senior Division provides Service training to young graduates and recruitment to it is from amongst students of universities and colleges. It is composed of three wings, viz. Army, Navy and Air.

Recruitment to the Junior Division is from amongst students of secondary schools. It is also composed of Army, Navy and Air Wings.

The object of the Girls' Division is to develop all-round personality among girls. This Division has two wings, Senior and Junior, units of the Senior Wing being raised in colleges and those of the Junior Wing in schools.

To cope with the demand for military training for boys and girls in schools who cannot get admission into the N.C.C., an Auxiliary Cadet Corps has been started. This corps has made rapid progress, and its present strength is estimated at 828,000.

The A.C.C. trains the youth of the country in team spirit, discipline and patriotism. It functions under the overall supervision of the Director, National Cadet Corps, Ministry of Defence. Instructors for this organisation are selected from schools and are trained by regular Army staff of the various N.C.C. units.

Ten per cent. of the total intake of commissioned officers in the Army, Navy and Air Forces on the basis of direct entry to the Service training institutions has been reserved for N.C.C. cadets of the three Service wings.

The Air Wing of the N.C.C. has been growing steadily. Glider training has been introduced in a few more air squadrons and in the senior wing of the girls' division of the corps. Two technical squadrons of the N.C.C. were established for the first time in 1958 at Hyderabad (Andhra) and Jorhat (Assam). These are in addition to the 17 air squadrons of the N.C.C. Air Wing.

TRAINING INSTITUTIONS

The important training institutions common to the three Services are given below:

National Defence Academy: The Joint Services Wing of the National Defence Academy was located in Clement Town, Dehra Dun,

where it started functioning as an experimental measure on January 4, 1949. The present location of the Academy is at Khadakvasala near Poona where it started functioning in January 1955. The Joint Services Wing, on its move to Khadakvasala, came to be known as the National Defence Academy. At this Academy, Army, Navy and Air Force cadets receive three years' combined basic training. This three years' course for cadets of all the three Services was introduced at Khadakvasala in July 1955. The first two years are devoted to common preliminary training and the third to specialised training in the three respective Services. Thereafter, Naval and Air Force cadets proceed to their respective Services establishments for advanced training, while the Army cadets join the Military College, Dehra Dun, for a further one-year course.

Commandant, Rear-Admiral B. A. Samson.

Defence Services Staff College: This is located in Wellington in the Nigri Hills in south India. One hundred officers drawn from all the three Services, including six officers from the U.S.A. and Commonwealth countries are, trained every year. The aim of the course is to prepare officers to hold second-grade or equivalent staff appointments or higher staff or command appointments.

Commandant, Maj.-Gen. P. P. Kumaramangalam.

School of Foreign Languages: This is located in New Delhi and was started on February 1, 1949.

Director, P. N. Banerjee.

Armed Forces Medical College: It is an inter-services post-graduate institution designed to meet the requirements of the integrated medical services of the Army, Navy and Air Force, and is located in Poona. The College has departments of medicine, surgery, pathology, hygiene, radiology, blood transfusion and dentistry.

This institution also supplies biological and chemical reagents and blood-transfusion material and equipment to all the Service hospitals and laboratories.

One of the most important functions of the College is to undertake fundamental and applied research for the solution of practical health problems of the Armed Forces.

Commandant, Maj.-Gen. Sarup Narain.

RESETTLEMENT SECTION

In appreciation of their services in World War II and after, the Government have given due consideration to the problem of resettlement of ex-Servicemen in civil life.

In collaboration with other Ministries of the Central Government, the State Governments, the Post-War Reconstruction Fund Trust Committees and other organisations, the Defence Ministry has formulated schemes for resettling ex-Servicemen in the Government and private service, land colonies, vocational and technical trades and motor transport services. More than 1,11,400 ex-Servicemen have already been thus rehabilitated in civil life.

In the matter of employment, the Government have accorded preference to ex-Servicemen in filling up appointments in police, excise, watch and ward and other departments for which military training is a qualification. As a result, nearly 71,550 ex-Servicemen have been placed in Government.

Ex-Servicemen who have a bias for agriculture are settled on land.

Through the efforts of the Defence Services Liaison Organisation, set-up in May 1946, 228 retired Armed forces officers were selected for appointment in civil posts under the Central or State Governments and 19 in the private sector up to the end of December 1957.

SOLDIERS', SAILORS' AND AIRMEN'S BOARD

The Indian Soldiers', Sailors' and Airmen's Board is the most important official institution connected with the welfare of the serving personnel of the Armed Forces and ex-Servicemen and their families. The nucleus of its funds was the residue of the Imperial Indian War Relief Fund which was handed in at the end of 1922.

The Board has its seat at New Delhi and co-ordinates the activities of State boards which exist in each State. Under the control of these State boards, there exists throughout the country a network of district boards, reinforced in some cases by tahsil or taluka committees and other kindred bodies. These boards are established in all districts from which recruits have been obtained in sufficient numbers. The President of the District Board is the Collector or the Deputy Commissioner. Each Board has a paid Secretary, usually an ex-I.C.O. or ex-J.C.O. There are 183 District Boards.

The Indian Soldiers', Sailors' and Airmen's Board Fund is now used primarily for payment of special pensions to blinded ex-Servicemen and to meet the expenditure on miscellaneous items, such as bank charges and audit fees in connection with the administration of the fund.

The other Central funds which are not under the control of the Indian Soldiers', Sailors' and Airmen's Board are:

Armed Forces Benevolent Fund, Flag Day Fund, Armed Forces Reconstruction Fund, Army Central Welfare Fund, Navy Benevolent Association Fund, Navy Amenities Fund, Air Force Benevolent Association Fund, Air Force Central Welfare Fund, Indian Gorkha Ex-Servicemen's Welfare Fund and St. Dunstan's India Fund.

GALLANTRY AWARDS

Three new gallantry awards were instituted by the President after Independence for gallantry in combat with the enemy. They are designated the Param Vir Chakra, the Maha Vir Chakra and the Vir Chakra. They came into force with effect from August 15, 1947.

The Param Vir Chakra is awarded for most conspicuous bravery, or some daring or pre-eminent act of valour or self-sacrifice, in the presence of the enemy, whether on land, at sea or in the air. It ranks first among all awards.

The Maha Vir Chakra is awarded for conspicuous acts of gallantry in the presence of the enemy whether on land, at sea or in the air.

The Vir Chakra is awarded for acts of gallantry in the presence of the enemy, whether on land, at sea or in the air.

A fourth gallantry decoration, named the Ashoka Chakra, in three grades, viz. Class I, Class II and Class III, was instituted for acts of gallantry other than in the face of the enemy. This also came into force with effect from August 15, 1947.

Class I of the Chakra is awarded for most conspicuous bravery, or some daring or pre-eminent act of valour or self-sacrifice. Class II of the Chakra is awarded for conspicuous gallantry and class III for gallantry.

If a recipient of any of these Chakras again performs such an act of bravery as would have made him or her eligible to receive the same decoration, such further act of bravery is recognised by the award of a Bar attached to the ribbon by which the Chakra is suspended, and for every such additional act of bravery, an additional Bar is added, and any such Bar or Bars is/are also awarded posthumously. For every Bar awarded a replica in miniature of the Chakra concerned and in the case of the Param Vir Chakra of the "Indra's Vajra" is added to the ribbon when worn alone.

Every recipient of any of these decorations who is junior in rank to a 2nd Lieutenant in the Army, a Sub-Lieutenant in the Navy, or a Pilot Officer in the Air Force, is entitled,

from the date of the act by which the decoration has been gained, to a special pension, and each additional Bar conferred carries with it additional pension for life.

A system of Mention-in-Despatches was also instituted. A 'lotus leaf' emblem is worn by the awardees on the ribbon of the campaign/war medal concerned.

The rates of monetary allowance admissible are as follows:—

- (a) (i) Param Vir Chakra.—Rs. 50 p.m. (Rs. 70 p.m. in the case of J.C.Os. who have previously been given an award of the second order of gallantry, such as the I.O.M.).
- (ii) Each Bar to PVC.—Rs. 20 p.m.
- (b) (i) Maha Vir Chakra.—Rs. 30 p.m. (Rs. 50 p.m. in the case of J.C.Os. who have been previously given a gallantry award of the third order, such as the M.C.).
- (ii) Each Bar to M.V.C.—Rs. 10 p.m.
- (c) (i) Vir Chakra.—Rs. 20 p.m.
- (ii) Each Bar to V.C.—Rs. 8 p.m.

On the death of such a recipient of the Chakra, the pension is continued to his widow until her death or remarriage. In addition to the above allowances admissible from the Central exchequer, all the States of the Union have framed their own schemes of rewarding the gallantry award winners by cash or land grants.

The following are the details of Republican India's awards won by members of the Armed Forces (Sept. 1957):—

INDIAN ARMY

Param Vir Chakra—5 (3 posthumous).
Ashoka Chakra Class I—8 (6 posthumous).
Maha Vir Chakra—51 (20 posthumous).
Ashoka Chakra Class II—31 (8 posthumous).
Vir Chakra—292 (88 posthumous), the number including 4 bars.
Ashoka Chakra Class III—61 (10 posthumous).
Mention-in-Despatches—1,153 (85 posthumous).

INDIAN NAVY

Ashoka Chakra Class III—2.

INDIAN AIR FORCE

Ashoka Chakra Class I—1.
Maha Vir Chakra—4.
Ashoka Chakra Class II—7.
Vir Chakra—30 (2 posthumous).
Ashoka Chakra Class III—2.

INDIAN ARMY

The Army HQ located in Delhi, functions directly under the Chief of the Army Staff. It is divided into the following main branches: (a) General Staff Branch, (b) Adjutant-General's Branch, (c) Quartermaster-General's Branch, (d) Master-General of the Ordnance Branch, (e) Engineer-in-Chief's Branch and (f) Military Secretary's Branch. These branches are further sub-divided into directorates.

The Chief of the General Staff, who is one of the four Principal Staff Officers (holding the rank of Lt.-General) at Army Headquarters, deals with military operations and intelligence, staff duties, training, artillery, signals, weapons and equipment, survey and the Territorial Army.

The Adjutant-General, who is another P.S.O., deals with all matters concerning man-power, such as pay and pensions, discipline, and terms and conditions of service.

The A. G. is also assisted by the Judge Advocate-General in matters affecting military law and international law in its military aspect.

The third P.S.O. is the Quartermaster-General, who controls all rail and sea movement, both of personnel and stores, within and outside the country. He also deals with the quartermaster problems of the Army as well as labour, canteen, fire and postal services.

The Master-General of the Ordnance, who is the fourth P.S.O., is responsible for the storage, care and preservation and issue of all kinds of equipment for troops. The Directorate of Electrical and Mechanical Engineering is also under the M.G.O.

The Engineer-in-Chief is the head of the Corps of Engineers and of the Military Engineering Service. The E-in-C's Branch gives technical advice on all engineering matters to the three Service Headquarters.

The Military Secretary handles confidential reports of officers and maintains their personal records.

The M. S. Branch is also responsible for postings and transfers, promotion and retirement of officers and the grant of honorary ranks and all types of commissions.

Under the Army H.Q., the Indian Army is organised into three Commands—Eastern, Western and Southern, each being under a General Officer Commanding-in-Chief of the rank of Lieutenant-General. The Commands are divided into Areas, each under the command of a G.O.C. of the rank of Major-General, and the Areas, in their turn, are sub-divided into Sub-Areas each under the command of a Brigadier.

The Army consists of a number of arms and services. They are Infantry, Armoured Corps, Regiment of Artillery, Corps of Engineers, Corps of Signals, Army Service Corps, Army Medical Corps, Army Dental Corps, Corps of Electrical and Mechanical Engineers, Army Education Corps, Remounts, Veterinary and Farms Corps, Corps of Military Police and Defence Security Corps.

An important technical arm of the Army, the Corps of Electrical and Mechanical Engineers has come to constitute a vital functioning limb of the defence set-up. Formed in 1943 as a repair organisation, it has since rebuilt all the mechanical, electrical and optical equipment of the Army and kept them in a 'fighting-fit' condition. It has also adapted itself to a minor-scale manufacturing programme because of the non-availability of spare-parts from abroad.

The Corps is manned by specialist officers and men who have received intensive training in the various aspects of engineering and acquired specialisation in certain fields. Some of the items designed and or manufactured by them are calibrating instruments, jigs, dies and tools, spares of automobiles, armoured vehicles and earth-moving equipment, castings and forgings and general engineering manufactures.

TERRITORIAL ARMY

As no country can afford to maintain a large standing fighting force in peace-time without straining its resources in men and material, a Territorial Army was formed in India, in 1940 to serve as a second line of defence.

The Territorial Army Act, 1948, was passed by Parliament in September 1948 and the Army was inaugurated in October 1949 when recruitment was thrown open.

The Territorial Army consists of various arms and services, i.e., the Regiment of Artillery, including anti-aircraft and coastal defence units, the Corps of Engineers, including port and railway units, the Corps of Signals, including P. and T. units, Infantry, the Medical Corps and the Corps of Electrical and Mechanical Engineers. The units raised are of two types, i.e., provincial units recruited from rural areas which undergo annual training of two to three months' duration at a stretch, and urban units recruited from large towns where Territorial Army units have been raised. They undergo training on the weekly drill system, i.e. in the evenings, Sundays and holidays with a short camp of not less than four consecutive days.

All able-bodied persons, from unskilled labourers to highly qualified technicians, provided they are citizens of India, are eligible for recruitment. The age limits are 18 and 35 years, relaxable in the case of ex-Service (Army, Navy

and Air Force) personnel and civilians possessing technical qualifications. Government servants and employees of private concerns are also eligible to join the Territorial Army.

The country has been divided into five zones for purposes of recruitment which is done on a zonal basis, i.e. only residents of the zone are recruited in the units which are raised from that zone. However, in the case of urban units, the residents of cities where such units are located are eligible to join.

The role of the Territorial Army is to

- (i) relieve the Regular Army of static duties and support the civil power if required.
- (ii) provide coastal defence and anti-aircraft units.
- (iii) provide units for the Regular Army if and when required.

When embodied, called out or under training, Territorial Army personnel receive the same pay and allowances as are admissible to the corresponding ranks of the Regular Army. It is obligatory for every civilian employer to reinstate a member of the Territorial Army in his civilian post on termination of his military training.

In order to provide an incentive to Territorial Army personnel for hard and meritorious work, 2½ per cent of the actual vacancies available at the Military College are reserved for such personnel. On successful completion of the course at the College they are to be granted regular commissions in the Army.

No officer or enrolled person is required to perform military service beyond the limits of India, save under a general or special order of the Central Government.

As a result of provincialisation of a few units of the Territorial Army, the arrangement of training in batches, the attendance in the units considerably rose during 1957-58. Recruitment also showed marked improvement. A Territorial Army Reserve was created.

LOK SAHAYAK SENA

Ever since Independence, there has been a persistent demand in the country for imparting military training to the people. To meet these aspirations, a scheme known as the Auxiliary Territorial Force was introduced in 1950, with the aim of giving elementary military training to as large a number of people as possible.

Under this scheme, 13,000 people were trained during 1953-54. Later, when it was decided to enlarge the scope of the scheme, the ATF was wound up and its place taken by the National Volunteer Force, since re-designated Lok Sahayak Sena.

The L.S.S. was inaugurated on May 1, 1955, to train five lakh men in five years or less. All able-bodied male citizens between 18 and 40 years, except ex-servicemen and N.C.C. cadets, are eligible to join this force. The object is not to raise a force for the defence of the country but to get people interested in national service and to inculcate in them a sense of discipline, self-reliance and responsibility.

Training in this force is imparted at camps organised throughout the country. The duration of a training camp is 30 days at which a maximum of 325 trainees are recruited. Training in this force includes drill, rifle training, elementary field engineering, first aid, hygiene and education.

For the duration of the camp, trainees are allowed free rations, accommodation, medical facilities and uniform. At the conclusion of 30 days training, each trainee is paid Rs. 15 as an out-of-pocket allowance.

Now in the third year of its existence, the L.S.S. has so far held 713 camps and trained a total of 3,10,000 people (Sept. 1958).

ARMY SCHOOLS

Recruitment for the permanent cadre of commissioned ranks in the Army is done through the National Defence Academy, Khadakvasla,

and the Military College, Dehra Dun. After completion of their three-year course at the N.D.A. Army cadets have to spend another one year at the Military College before being commissioned. Direct admission to the College at higher age-levels also continues, though the number of cadets so taken is limited.

The Military College at present conducts courses for ex-N.D.A., direct-entry and N.C.C. cadets, serving personnel, and technical graduates. Regular and direct-entry cadets commissioned in the technical branches are sent on specialised post-commission courses. The technical graduates' course was specially introduced in January 1948 as a temporary measure to give military training to qualified technicians and engineers for the Corps of Engineers, the Corps of Signals and the Corps of Electrical and Mechanical Engineers to cope with the increased requirements of technicians for the Army.

The Armoured Corps Centre and School at Ahmednagar trains recruits as well as regimental instructors. The School of Artillery at Deolali provides training in the field, anti-tank, anti-aircraft and coastal artillery branches. The Army Ordnance School at Jabalpur imparts specialised training to all officers and ORs in identification, handling and storage of various types of items, including ammunition and explosives.

The Infantry School at Mhow is the home of infantry doctrines and a centre for developing infantry weapons. The School also conducts courses for senior officers and junior commanders of all corps in the Army. The Army Service Corps has two schools, one at Meerut and the other at Bangalore, giving training in organisation and administration, animal transport, mechanical transport and supplies. The Army Medical Corps has its training centres at Lucknow and Poona.

The College of Military Engineering at Kirkee, near Poona, trains officers of the Corps of Engineers, the Corps of Signals and the Corps of Electrical and Mechanical Engineers to the degree standard in civil, tele-communication and electrical and mechanical engineering respectively.

The Madras, Bombay and Bengal Engineer Groups at Bangalore, Poona and Roorkee provide basic technical and specialised Corps training to officers and ORs of the Corps of Engineers as also civilian officers of the Military Engineering Service.

The Corps of Electrical and Mechanical Engineers has its training centre at Secunderabad, while the School of Signals, which gives technical training in tele-communication engineering to personnel of the Corps of Signals, is situated at Mhow. The Army Signals School, which trains officers and ORs of all arms as instructors in regimental signals, is located at Jabalpur.

The other training institutions in the Army are the Remounts, Veterinary and Farms Centre and School at Meerut, the Education Corps School at Pachmarhi, and the Intelligence Corps School and the Physical Training School, both at Poona.

The various commissioned ranks in the Army from the top downwards are: General, Lieutenant-General, Major-General, Brigadier, Colonel, Lieutenant Colonel, Major, Captain, Lieutenant and Second Lieutenant. The ranks of the Junior Commissioned Officers and other ranks respectively are Subedar-Major/Risaldar-Major, Subedar/Bisikar, and Jemadar/Dafadar, and Havildar, Naik, Lance-Naik and Sepoy/Sowar.

INDIAN NAVY

The Naval HQ, under the Chief of the Naval Staff, exercises control over the Indian Navy through the following four operational and administrative commands:

1. Flag Officer Commanding, Indian Fleet.
2. Flag Officer, Bombay.
3. Commodore-in-Charge, Cochin.
4. Commodore, East Coast, Vishakhapatnam.

Today, the Indian Fleet consists of I.N.S. MYSOKE, a cruiser (Flagship of the Navy), the cruiser I.N.S. DELHI, two Destroyer Squadrons (I.N.S. RAJPUT, RAJIT, RANA, GODAVARI, GOMATI and GANGA), one Frigate Squadron* (I.N.S. CAUVERY, KISTNA and TIR), and three Minesweeping Squadrons (I.N.S. BOMBAY, KONKAN, MADRAS, RAJ-PUTANA, BENGAL, ROHILKHAND, BANSEIN, BIMLIPATAM, KARWAR, KAKI-NADA, CANNANORE and CUDDALORE). In addition, the Fleet has some survey ships, a tanker and some auxiliary craft.

The Fleet is being expanded and the programme of acquisition of ships implemented in stages. The anti-submarine and anti-aircraft frigates of the latest type acquired by the Navy in the U.K. include I.N.S. BRAHMAPUTRA, KHUKRI, BEAS, TALWAR, TRISHUL, KIRPAN and KUTHAR.

It is proposed to build certain simpler types of naval vessels in India. Orders have been placed with the Hindustan Shipyard, Ltd., for a survey ship and a mooring vessel has already been launched and named I.N.S. DHRU'VAK.

The survey unit of the Navy, which now comprises I.N.S. INVESTIGATOR, JUMNA and SUTLEJ, carries out the necessary survey of India's coast and approaches to harbours. A new survey ship has been ordered.

Extensive surveys of major ports, like Bombay and Madras, have already been completed. With the help of the data provided by such surveys, charts are being prepared by the Hydrographic Office at Dehra Dun.

The Naval Dockyard, which came into being in 1750, has constructed some of the finest ships for the Royal Navy. A 1,000-ton frigate built at the Dockyard in 1870, which was originally named 'Trincomalee', is still being used by the Nautical Committee of the U.K.

The Dockyard is now equipped with a foundry, boiler, engine and ship-fitting shops, electronic and radar workshops, blacksmith, plater, joiner and carpentry shops, soil-making lofts, machine-shops, and gun-mounting and torpedo workshops. Its main function is to carry out all types of major repairs of ships of the Navy and the associated harbour craft services. For this purpose, it has under its control the Naval Stores Depot, the Spare Parts Distributing Centre and the Naval Armament Depot.

The armament depot of the Indian Navy, the first of its kind to be set up in peace time, was opened at Alwaye on September 19, 1956, by Vice-Admiral Katari, Chief of the Naval Staff.

NAVAL AVIATION

The Naval Air Arm, which is one of the youngest branches of the Navy, came into being in 1948 for training aircrew, followed soon after by the setting up of a Naval Air Station at Cochin. Later, the formation of a Fleet Requirements Unit was approved, aircraft, equipment and spares acquired and officers and ratings deputed for training courses abroad. The civil airfield at Cochin was acquired for the Navy in 1953 to be converted into the first Naval Air Station. Soon after, the first batch of Sealand aircraft were purchased from the U.K. and later the station was named I.N.S. GARUDA. Early in 1955, a number of Firefly target-towing aircraft were obtained from the U.K. for providing gunnery-training facilities for the Fleet. The strength of the Fleet Requirements Unit was further augmented when three HT-2 aircraft were acquired from HAL to give instructional training to aircrew and other personnel. Now a jet flight is being added to the Fleet Air Arm with a number of jet aircraft.

As a result of the latest decision of the Government to acquire H.M.S. HERCULES, an aircraft-carrier, together with a fleet of operational aircraft, the future of naval aviation in India is assured. The HERCULES, with a 15,700-ton displacement, is at present being re-fitted and modernised in the U.K. and will become available in a few years. Meanwhile, the question of

* Now two: The I.N.S. BRAHMAPUTRA and KHUKRI form another squadron. See below.

manning the carrier and training its naval aircrew is engaging the attention of the Government. As a first step, a Naval Air Training School has been set up at Cochin to train ratings in the maintenance and repair of aircraft. At the same time, the Government are considering setting up a School for Naval Airmen for training non-technical personnel.

To meet the meteorological needs of the Fleet Requirements Unit, a Naval Weather Services Organisation, manned by trained instructor officers, was established at the GARUDA towards the end of 1952. Since then, more and more instructor officers have been trained to take over meteorological duties, both ashore and aboard ships. This organisation now also conducts courses of instruction in meteorology for naval ratings.

The training of other naval personnel is carried out in the shore establishments of I.N.S. VENDURUTHI, Cochin, I.N.S. CIRCARS, Vishakapatnam, I.N.S. ANGER, Bombay, I.N.S. KUNJALI, Bombay, I.N.S. SHIVAJI, Lonavla, I.N.S. VALSURA, Jamnagar, and I.N.S. HANLA, Bombay. I.N.S. ASVINI at Bombay and I.N.S. SANJIVANI at Cochin are the two naval hospitals.

A memorable cruise in 1954 took the Flagship I.N.S. MYSORE to China, Japan and North Viet-Nam.

The various ranks in the Navy from the top downwards are: Admiral, Vice-Admiral, Rear-Admiral, Commodore, Captain, Commander, Lieut.-Commander, Lieutenant, Sub-Lieutenant, Branch List Officer, Midshipman, Chief Petty Officer, Petty Officer, Leading Rate, Able Rate and Ordinary Rate.

A Bill to consolidate and amend the law relating to the government of the Navy has been passed in Parliament.

INDIAN AIR FORCE

The Air HQ is divided into three main branches—Air Branch, which deals with operations, training, policy and plans, signals, reserves and intelligence, Administration Branch and Maintenance Branch. Each is under a Branch P.S.O. who, in turn, has several Directorates under him.

The Indian Air Force is, in the main, divided into three major formations, namely Operational, Training and Maintenance Commands under the control of the Air HQ.

The Operational Command controls all flying units—fighter, bomber, reconnaissance and air-transport squadrons. The Training Command has under its control training schools and colleges for both officers and airmen for technical and non-technical ground training and for aircrew flying training. The Maintenance Com-

mand controls all technical and equipment units in the I.A.F.

The three Commands exercise control through their Wings and Stations located in various parts of the country. Under each Wing and Station come various flying, training, technical or other static units.

The different types of aircraft used by the IAF:

Training: Tiger-Moth, Percival Prentice, HT 2, Harvard, Spitfire and Vampire.

Fighter: Vampire, Toofani Ouragan) Mystere, Hunter and Gnat.

Transport: Dakota, Devon, C-119 (Boxcar), Otter, Viscount, Ilyushin and Helicopter.

Bomber: Liberator, Canberra.

Reconnaissance: Spitfire, Auster, Liberator, Canberra, Dakota and Harvard.

During the past few years, this youngest Defence Service, which celebrated its Silver Jubilee on April 1, 1958, has attained self-sufficiency in training its personnel for flying and technical and non-technical duties.

Consequent on certain changes in their functional scope, some of the major Air Force training establishments have recently been redesignated. The Air Force Station at Hyderabad provides advanced training to aircrew. The Air Force Flying College at Jodhpur is the nursery of pilots, navigators and air-signallers. The Air Force Administrative College at Coimbatore trains officers of the ground duty branches. The Air Force Technical College at Jalahalli, near Bangalore, imparts training to engineering officers and technical airmen of certain advanced signals trades. The No. 1 Ground Training School at Jalahalli trains non-technical airmen. The No. 2 Ground Training School at Tambaram (Madras) trains technical tradesmen (airmen). The No. 3 Ground Training School at Jalahalli is intended for airmen trainees of higher signals trades.

The Service has also achieved a large measure of self-sufficiency in the field of training and only a small number of officers are now sent abroad for specialised courses not available in this country.

For advanced and applied flying training, a Jet Training Wing and a Transport Training Wing have been set up at Hakimpet and Begumpet as part of the Air Force Station, Hyderabad. On successful completion of their one-year training at the Air Force Flying College, Jodhpur, pupil aircrew have now to undergo a year's training either at Hakimpet or Begumpet before being awarded their wings and commissioned.

A Land-Air Warfare School is in the process of establishment (Aug. 1958). To train officers in aero-medicine, a school of Aviation Medicine has been started at Bangalore.

The I.A.F. Paratroopers' Training School at Agra, instituted in 1949, continues to train paratroopers for the Army, personnel for the I.A.F. Para-Medical Flights and instructors for the School itself.

Now armed with the latest jet trans-sonic aircraft, the Air Force has made rapid headway in the sphere of technical development. It can today boast of an organisation not merely performing maintenance tasks but also participating in research and production activity. It comprises a net work of repair and manufacturing units backed by a chain of equipment and storage depots.

Earliest and foremost of these units is the Base Repair Depot. Since its establishment, soon after Independence, as a nucleus of the Air Force repair organisation, it has grown in scope and size. It has since assembled new aircraft, sent back into service aircraft after reconditioning, and reclaimed with the assistance of the H.A.L., virtually "dead" Liberators and restored them to operational fitness. Today, the various functions of the B.R.D. are erection of new aircraft, periodical overhaul of planes in use, repair of damaged aircraft, overhaul of aero-engines and rectification of defects in engines.

In pursuance of the Reserve and Auxiliary Air Forces Act of 1952, five Auxiliary Air Force Squadrons have so far been raised at Delhi, Bombay, Calcutta, Allahabad and Madras. Similar auxiliary squadrons will be formed in other principal cities of India.

Since Independence, the Air Force has been entrusted with a number of national duties which may well be termed as full-fledged operations in peace-time. Some of these tasks were airlift of Indian personnel of the International Supervisory Commissions in Indo-China, air-dropping of foodgrains and medical supplies in the North-East Frontier Agency and other places affected by floods and other natural calamities and carrying out of photographic surveys to assist in the planning and development of hydro-electric schemes, oil prospecting in Rajasthan, Jwalamukhi and Cambay and other projects under the Five-Year Plans. A Flight of I.A.F. transport aircraft was rushed to Ceylon when the Island was hit by unprecedented floods in December 1957. It was able to organise airlift of foodgrains and other supplies to the affected areas on an extensive scale.

The various commissioned ranks in the Air Force from the top downwards are: Air Chief Marshal, Air Marshal, Air Vice-Marshal, Air Commodore, Group Captain, Wing Commander, Squadron Leader, Flight Lieutenant, Flying Officer and Pilot Officer.

The men are ranked as Master Warrant Officer, Warrant Officer, Flight Sergeant, Sergeant, Corporal, Leading Aircraftman, and Aircraftman Class I and Aircraftman Class II.

SOCIAL WELFARE IN INDIA

THE period under British rule (1800-1947) witnessed a destruction of the old social structure in India. In the new structure that emerged a number of reforms and institutions were introduced by bodies like the Brahmo Samaj (associated with the name of Raja Ram Mohan Roy), the Prarthana Samaj, the Deccan Education Society and the All-India Social Reform Association (Justice M. G. Ranade), the Ramkrishna Mission (Swami Vivekananda), the Servants of India Society (G. K. Gokhale) and the Arya Samaj (Dayanand Saraswati). Though these organisations were in the nature of religious orders, they took it as a part of their faith to serve the needy and the suffering. The Arya Samaj and the Ramkrishna Mission sponsored social reforms, established orphanages, widows' homes, free dis-

pensaries and relief centres in periods of emergency. The Servants of India Society is especially notable for its ramifications in the fields of labour, tribal welfare, youth welfare and emergency and relief work. An impetus to women's welfare was given by D. K. Karve's Women's University and G. K. Devadhar's Seva Sadan in Poona.

During this period pioneering work in many neglected fields of service, e.g. founding homes, leper asylums and institutions for the maimed and the handicapped, was undertaken by Christian missionaries in the country.

By 1920 Mahatma Gandhi's contribution began to gain recognition throughout the country. He provided for a number of constructive social welfare programmes through organisations like

the Harijan Sewak Sangh, All-India Village Industries Association, Charika Sangh, the Hindustani Nai Talimi Sangh, Goseva Sangh, and the Kasturba Gandhi National Memorial Trust, etc. His constructive programme also included dignity of manual labour and labour welfare, prohibition of alcohol, drugs and gambling, Tribal welfare and leprosy relief.

The late '30s saw the formation of the first popular Ministries in eleven provinces in India.

During the same period professional social work began to be recognised with the establishment of the Tata Institute of Social Sciences in 1936.

The new profession generally covers the following fields of social work: Community Welfare Services; Family, Child and Youth

Welfare Service; Public Welfare Administration; Social Security Services; Services for the mal-adjusted and handicapped groups; Social Defence and Correctional Administration; Services for Emergency Relief and Rehabilitation; Social Legislation and Social Action; Social Research; Training in Social Work; Tribal Welfare and Rural Welfare.

The establishment of the Indian Conference of Social Work at a meeting of over 450 social workers assembled in Bombay in November 1947 marks a significant development in the field of social work in India. The Conference undertakes and promotes the study of social problems and endeavours to foster co-operation, collaboration and co-ordination amongst social service agencies in India and abroad. It has held sessions in Bombay (1947), Madras (1948), Delhi (1949), Jamshedpur (1950), Calcutta (1951), Hyderabad (1953), Lucknow (1954), Bangalore (1955), Jaipur (1956) and its Decennial Anniversary Session in Madras (1957).

The I.C.S.W. was planning to hold its third national seminar, the subject being urban community development in May 1959.

In 1952, it enabled the International Conference of Social Work to hold its Sixth Session at Madras—the first International Conference on Asian soil.

The aspirations of the Indian people towards State responsibility for social welfare are reflected in Part IV of the Constitution which lays down the "Directive Principles of State Policy", as follows:—

"The State shall strive to promote the welfare of the people by securing and protecting as effectively as it may, a social order in which justice, social, economic, and political, shall inform all the institutions of the national life."

SOCIAL LEGISLATION

Social legislation on an all-India scale dates back to 1843 when the first law abolishing slavery was passed. The earlier laws sought to reform the evil social practices existing at the time, practices such as Sati, infanticide, and child marriage. Later, social legislation began to assume a more positive and constructive role. Laws for better working conditions in factories, laws providing maternity benefits, for the abolition of traffic in women and children, and laws for the protection and care of destitute and delinquent children have all received attention in the first half of this century.

According to the present Constitution, social legislation can be formulated and implemented both by the Central and State Governments. Most social subjects are on the concurrent list, i.e. they can be legislated upon by the Central or State Governments. These subjects include: marriage and divorce, social security and social insurance, economic and social planning, welfare of labour, charities and charitable institutions, vagrancy and mental deficiency.

Prison Reform Bills and Borstal Institutions are subjects in the State list. An informative volume entitled "Social Legislation", which contains detailed information regarding the laws pertaining to women, children, handicapped groups and social defence was published in 1956 by the Planning Commission of the Government of India.

In India, the Central Government does not have a special Ministry or department for social welfare. The Ministries of Health, Education, Labour, Home, Rehabilitation, Agriculture, Community Development and the Office of the Commissioner for Scheduled Castes and Tribes undertake several important social services. The States of Assam, Andhra Pradesh, Bombay, Madhya Pradesh, Punjab, Rajasthan, Uttar Pradesh and West Bengal have Departments of Social Welfare, whereas Madras possesses a Women's Welfare Department.

The expenditure allocated to Social Services in the first Five-Year Plan period was 533 crores of rupees out of a total outlay of 2,356 crores, which works out to 23 per cent, whereas in the Second Five-Year Plan, out of a total outlay of 4,800 crores of rupees 863 crores that is

18 per cent have been earmarked for Social Services, including Housing, Rehabilitation, etc. in the revised allocations.

To the above amount we could also add the provision of 90 crores in the First Plan period for community development and 200 crores in the Second Plan period, both of which work out to four per cent of the total outlay, respectively.

PLAN OUTLAY BY MAJOR HEADS OF DEVELOPMENT

	First Plan Total Provision (Rs. crores)	Second Plan Total Provision (Rs. crores)
(a) Education	164	285
(b) Health (including water supply and sanitation programme) ..	140	255
(c) Labour & Labour Welfare, Welfare of Backward Classes, Scheduled Tribes, Social Welfare	44	133
(d) Housing	49	100
(e) Rehabilitation ..	136	90
Total	533	863

SOME ACTS

Since 1947 there has been an unprecedented increase in social legislation both at the national and the State levels.

Some of the laws which are applicable to the entire country are the Industrial Disputes Act, 1947; The Factories Act, 1948; The Coal Mines Provident Fund and Bonus Schemes Act, 1948; Minimum Wage Act, 1948; Employees State Insurance Act, 1948; The Plantation Labour Act, 1951; The Mines Act and the Provident Fund Act, 1952.

Two Acts were passed to remove caste discrimination, namely, the Caste Disabilities Removal Act XXI of 1950 and the Untouchability Offences Act XXII of 1955.

Three laws introducing changes in Hindu Law governing Marriage and Succession have been passed since 1954, namely, The Special Marriage Act 43 of 1954; The Hindu Marriage Act XXV of 1955 and the Hindu Succession Act XXX of 1956.

Traffic in Women

The Suppression of Immoral Traffic in Women and Girls Act 1956 was implemented in most States in May 1958. It applies to the whole of India, and from the date of the coming into force of this Act, all other State Acts relating to the suppression of immoral traffic in women and girls or to the prevention of prostitution stand repealed.

Some institutions concerned with this aspect of the problem are:

The Bombay State: Women's Council Rescue Home, Bombay Vigilance Association Shelter, League of Mercy Shelter, Salvation Army Industrial Institute for Women, Shraddham and Anath Mahilashram and St. Catherine's Home (all in Bombay City).

In other districts of Bombay State, St. Crispin's Home (Poon), Shri Seth Masukhlal (Thagnal) Hindu Widhwa Ashram, Wasdeo Babaji Nowrangay Orphanage, Vikas Griha (Ahmedabad), Anath Mahilashram, Mahila Sevagram, Hindu Anath Mahilashram, Vikas Griha (Junagadh).

In Madras: The Stree Sadan Rescue and Training Home, Government Vigilance Home, Good Shepherd Home.

In Bengal: The Fendal Home and All Bengal Women's Union Home.

Delhi: Ashoka Ashram.

Delhi: Nari Niketan

Bihar: Bharatiya Bidhwasram, Ananthalya.

Mysore: Abhaya Ashram and Good Shepherd Home.

U.P.: The Kushalbagh Mission Orphanage and Salvation Army Home.

About 800 Homes and 370 Rescue Shelters in the country attempt the rehabilitation of fallen women.

A sum of rupees three crores is allotted to root out traffic in women and girls.

State Homes for Women and Reception Centres for temporary stay have been organised in various parts of the country by the Central Social Welfare Board.

From the time the Act was enforced on May 1, 1958 to Sept. 1, 1958 the Central Social Welfare Board set up 15 protective homes in six States and Delhi for about 725 persons.

State-wise, the accommodation available was: 100 in Nari Rudhar Samiti, Hyderabad, Andhra Pradesh; 200 in a rescue home and four shelters in Kerala; 100 in Sri Sadana Rescue Home, Madras City and 50 in Meenakshi Sadnam, Madurai, Madras; 45 in two homes in West Bengal; 100 in Nari Niketan in Delhi; 100 women in two homes in Mysore, and 25 women in two homes in Punjab.

There were no brothels in Himachal Pradesh and Manipur. The Laccadive, Minicoy and Amindivi Islands were also free from traffic in women and children.

The Central Social Welfare Board appointed an Advisory Committee under the chairmanship of Mrs. Dhanvanti Rama Rau to study the problem of social and moral hygiene in the country.

The Report observes that prostitution is mainly an urban problem and as many as 85-8% of women come from the rural areas in the age group 10 to 20. The causes that lead to prostitution are:—55-4% economic stress, 27-7% disharmony or family mal-adjustment, and 6-9% social and religious practices. Figures for kidnapping and seducing were not available.

It is the view of the Committee that vigilance or preventive work is very scanty and the standard of rescue work by voluntary institutions needs to be improved.

As a result of the recommendation of the Advisory Committee, appointed by the Board, a programme of social and moral hygiene and after-care services has been drawn up for the Second Plan.

Under this, 80 institutions would be set up in groups of five each. One of the institutions will be for the rehabilitation of women rescued from moral danger. Two institutions will be for persons discharged from correctional institutions and the remaining two, for persons discharged from non-correctional institutions.

In addition, there will be a shelter in each district to receive and transmit persons to these after-care centres.

Each institution will have a production unit on a co-operative basis attached to it.

The capacity of each institution will be a hundred and that of the production unit five hundred.

This scheme will also be run by Managing Committees consisting of officials and non-officials.

A total provision of Rs. 9.5 crores has been made in the plans of the appropriate Ministries in the Government of India and also in the State plans.

A committee under the chairmanship of Mr. M. S. Gore, Principal, Delhi School of Social Work, has a report on after-care programme. This Committee was set up by the Central Social Welfare Board.

The Association for Moral & Social Hygiene in India which was founded in 1886 by Keshab Chandra Sen has its headquarters in New Delhi and several State branches which in turn have District Branches. It works through various committees, the most important of which are Legal, Rescue and Rehabilitation, Preventive,

Research and Education. It also holds conferences on all India and State basis. Its strength consists in the fact that most of the voluntary agencies doing similar work are affiliated to it and it also receives the active co-operation of the police and other Governmental bodies.

Children, Beggars

Children's Acts in relation to delinquency are in force in the States of Andhra Pradesh, Bombay, Madhya Pradesh, Madras, Mysore, Punjab, Kerala, U.P. and West Bengal.

The Bombay Act was extended to the former States of Ajmer and Delhi.

The Borstal Schools Acts, which are slightly different in scope, are in operation in the States of Andhra, Bombay, Madras, Mysore, Punjab, U.P., West Bengal and Kerala.

The Reformatory Schools Act of 1907 has also been enforced in all the major States and some Union Territories.

There are 67 Remand Homes, 49 certified schools, 7 reformatory schools, 8 borstal schools and 8 juvenile jails in the country (Dec. 1958).

Besides formal education, vocational training in a number of trades is imparted to the inmates of the three types of institutions referred to above. Others provide follow-up services.

A new experiment in preventive correction was started in Bombay City by the Children's Aid Society under its Juvenile Service Bureau.

The Criminal Procedure Code treats vagrants and vagabonds alike and provides penalties under Sections 55 (i) (b) and 109 (b).

Beggars may be proceeded against under Section 133 as those committing public nuisance.

Beggary within railway premises was prohibited by law as from February 15, 1941.

The following special Acts have been passed to prohibit begging in public places:

- The Bombay Prevention of Beggary Act, 1945.
- The Bengal Vagrancy Act, 1943.
- The Bihar Prevention of Beggary Act, 1952.
- The Madras Prevention of Beggary Act, 1945.
- The Cochin Vagrancy Act, 1945.
- The Hyderabad Prevention of Beggary Act, 1941.
- The Mysore Prevention of Beggary Act, 1944.
- The Travancore Prohibition of Begging Act, 1945.
- The Bhopal Prevention of Beggary Act, 1917.

Begging is also prohibited in Madhya Pradesh, Punjab and Uttar Pradesh under the respective Municipalities Acts. The Police Acts of Bombay, Calcutta and Madras City also provide measures against begging.

There are institutions in the States for the custody, care and assistance of beggars in their rehabilitation.

There are 18 certified institutions with a total capacity for 2,000 beggars in Bombay. West Bengal has 5 Beggar Homes with an accommodation for 1,900. There are 7 similar institutions in Madras and 8 including 3 relief settlements in Kerala. There is a Beggar Home each in the States of U.P., Madhya Pradesh, Mysore and the Union Territory of Delhi. The inmates of these Homes are provided with food, clothing, education facilities for physical culture and vocational training.

VOLUNTARY SOCIAL WORK

The groups of voluntary social work in India largely fall under the following heads: Administrators; Professional social workers; Missionaries; The Gandhian social workers; and Voluntary social workers belonging to the various private agencies.

Of these the religious believe in the traditional form of charity, the Missionaries in institutionalised social work, the Gandhians in the 14-point constructive programme.

The group of professionally trained social workers is small though most compact. This group consists of some 1,000 alumni and teachers of the following post-graduate schools of social work in India:

The Tata Institute of Social Sciences, Deonar, Chembur, Bombay 28; Delhi School of Social Work, 8, University Road, Delhi 8; the Faculty of Social Work of the M. S. University of Baroda, Camp Road, Baroda; Shri Kashi Vidyapeeth, Banaras, Chavni, Banaras 2; Madras School of Social Work, 1, Jarrett's Gardens (upper flat), 23-24, Cass Major Road, Egmore, Madras 8; The All India Institute of Social Welfare and Business Management, College Square West, Calcutta 7. The J. K. Institute of Sociology and Human Relations, Lucknow University, Lucknow also imparts training in social work, while the Patna University has a department to train social workers for industrial welfare work.

Voluntary Social Service Agencies operating on an All-India basis are mentioned below:—

Child Welfare

Balkan-Ji-Bari (6-A, Cooperage, Bombay 1); Society for the Protection of Children in India (2-B, Camac Street, Calcutta); Indian Council for Child Welfare, Room 14-15, Block 'A', 'B' Barracks, Queensway, New Delhi; Indian Council for Child Education (Sumanas, 29, Edward Elliott Road, Madras 4).

Youth Welfare

Y.M.C.A. (5, Russel Street, Calcutta 16); Y.W.C.A. (Parliament Road, New Delhi); Bharat Scouts and Guides Association (Regal Building, Parliament Street, New Delhi).

Women's and Family Welfare

All India Women's Conference (6, Bhagwandas Road, New Delhi); Family Planning Association of India (Metropolitan House, Dadaboy Naoroji Road, Bombay 1); National Council of Women in India (G Block, Western House, Curzon Road, New Delhi); Kasturba Gandhi National Memorial Trust (Kasturba Gram, P.O. Indore, Madhya Pradesh).

Health

Tuberculosis Association of India (20, Red Cross Road, New Delhi 2); Indian Red Cross Society (20, Red Cross Road, New Delhi 2); All India Cancer Prevention Society (Tata Memorial Hospital, Parel, Bombay 12); Hind Kushi Niwaran Sangh (Red Cross Road, New Delhi); Akhil Bharat Sharirik Sikshan Maha-Mandal (Tilak Road, Nagpur, Bombay State).

Rehabilitation of the Handicapped

Convention of the Teachers of the Deaf in India (50, Bondel Road, Ballygunj, Calcutta); All India Light House for the Blind (89, Elliot Road, Calcutta); National Association for the Blind (Victoria Memorial Blind School, Tardoo, Bombay 7); All India Blind Relief Society (11-F, Lalpatnagar, New Delhi).

Rural Welfare

Sarva Sewa Sangh (K39-4 Golghar, Varanasi, U.P.); India Village Service (I.V.S. House, Marhara, Dist. Etah, U.P.).

General Social Welfare

Servants of India Society (Poona 4); Ramkrishna Mission (Belur, Dist. Howrah); Gandhi Memorial Fund (5, Mansingh Road, New Delhi); Salvation Army (Moreland Road, Bombay 8); Friends' Service Unit (1, Upperwood Street, Calcutta 16); All India Seva Samiti (Seva Samiti Building, Allahabad); Indian Co-operative Union Ltd. (American Barracks, Queensway, New Delhi).

Rural Women's Welfare

Kasturba Gandhi National Memorial Trust (Kasturbagram, Indore, Madhya Pradesh).

Relief and Rehabilitation

United Council of Relief and Welfare (Rashtrapati Bhavan, New Delhi).

Social Education

Indian Adult Education Society (20, Fais Bazar, Delhi); Nai Talim Sangh (Wardha, Bombay); Janta Mitta (Okhla, Delhi).

Welfare of Under-Privileged Groups

Harijan Sevak Sangh (Kingsway, Delhi); Shiksha Adhineti Sevak Sangh (Kingsway, Delhi).

Social Defence

All India Crime Prevention Society (Behari Niwas, Kanpur, U.P.); Association for Moral and Social Hygiene in India (Room No. 211, 'P' Block, Raisina Road, New Delhi).

Co-ordination

The national organisation for the co-ordination of all welfare services is the Indian Conference of Social Work located at 6/A, Cooperage, Bombay 1.

There is also a South-East Asia Regional Office of the International Conference of Social Work which has been established in conjunction with the Indian Conference of Social Work in Bombay.

International Welfare Agencies in India

The following are some of the International agencies and organisations working in the country: International Conference of Social Work (South-East Asia Regional Office (6/A, Cooperage, Bombay-1); Ford Foundation (52, Ferintosh Road, New Delhi); World Health Organisation (S.E.A. Office, Patiala House, Hardinge Avenue, New Delhi); Rockefeller Foundation (20/39, Diplomatic Enclave, Kautilya Marg, New Delhi); International Labour Organisation, Indian Branch (Mandi House, New Delhi); International Union for Child Welfare (Consultant for Far East Asia, Rooms Nos. 14 & 15, Block A, Barracks B, Queensway, New Delhi); United Nations International Children's Emergency Fund (UNICEF House, 11, Jor Bagh, Delhi); United Nations Educational, Scientific and Cultural Organisation (Old Mill Road, New Delhi); Food and Agricultural Organisation, U.N.O. 21, Curzon Road, New Delhi.

Bhoodan Movement

Special mention must be made of the Bhoodan Movement initiated by Acharya Vinoba Bhave, one of the ablest disciples of Gandhiji. He is effecting a silent but nevertheless remarkable social revolution within the country by the voluntary gift of land (Bhoodan), wealth (Samptidan), labour (Shramdan) and life (Jeevandan).

FAMILY PLANNING BOARD

On 1st September 1956 a Family Planning Board was set up, by the Union Ministry of Health to direct the family planning programme in the Second Five-Year Plan period. The Board consists of members whose term of office will normally be for five years, under the Chairmanship of the Union Minister for Health.

The Government of India have made a provision of Rs. 497 lakhs (Rs. 400 lakhs at the Centre and 97 lakhs in the States) for family planning work. The Board advises on various matters and the recommendations of the Board will be implemented by the Ministry of Health.

The programme for the Second Plan is 500 clinics in urban areas and 2,000 in rural areas. As far as possible there should be one clinic in every maternity and child welfare centre, primary health centre, dispensary, hospital and medical teaching institution.

As on 7th December 1958, there were in all 812 clinics. Trained personnel numbered 1,117, while about 2,370 school teachers had also been trained.

It was estimated that upto March 1959, the Centre would have incurred an expenditure of Rs. 78-60 lakhs.

Three main Institutes have been set up by the Government of India to help promotion of family planning.

One is a Family Planning Training and Research Centre with Dr. Subhila S. Gore as Officer-in-charge. This Centre started functioning in the middle of 1957, and trains doctors, health visitors, nurses and social workers to run family planning services in an integrated manner, including clinical work, educational propaganda and general family welfare. The trainees, who are specially deputed by Government or voluntary agencies, are in turn expected to train workers in their own States.

Second, a Contraceptive Testing Unit under Dr. V. B. Khastekar has been set up in the laboratories of the Indian Cancer Research

Centre, Parel, Bombay. This Unit tests all contraceptives and only those which fulfil certain scientific criteria are then approved for use in family planning clinics.

The third Institute, which is situated in the premises of the Tata Institute of Social Sciences, Chembur, Bombay, is the Demographic Training and Research Centre, jointly sponsored by the Government of India, the Sir Dorabji Tata Trust and the United Nations. This Institute, under Dr. K. C. K. E. Raja, gives post-graduate training in demographic studies to students from India as well as South-East Asian countries.

All the State Governments except Jammu and Kashmir have appointed Family Planning Boards, with whole-time Family Planning Officers in some cases.

The Health Departments of States are introducing family planning services in the rural primary health centres, and also in urban hospitals and dispensaries, with Central Government aid.

Several voluntary agencies also, have included family planning in their programmes of work, such as the All India Women's Conference, the Red Cross Society, the Bharat Sevak Samaj, etc.

The Family Planning Association of India is the leading voluntary and specialised agency in this field under the Chairmanship of Shrimati Dhanvanthi Rama Rau.

It has its Headquarters in Bombay and has 15 Branches in different parts of the country and has a programme for opening clinics, training personnel, promoting medical and sociological research, and conducting an educational programme at all levels by way of lectures, group meetings, home visits, publications of literatures and film shows.

It publishes a monthly Bulletin, "Planned Parenthood", and a quarterly magazine, the "Journal of Family Welfare". It has organised three All India Conferences on Family Planning and International Conferences in 1952 and in February 1959. It is a founder-member of and is affiliated to the International Planned Parenthood Federation where 22 countries are represented.

The Madras Government has a number of schemes for sterilization:

1. Scheme for payment of subsidy to selected private medical practitioners in Madras City for vasectomy operations for a period of one year.

Under the scheme, four private medical practitioners having enough surgical experience and nursing home facilities had been appointed.

(ii) Scheme of payment of special remuneration of Rs. 2- for each case operated to the canvassers and tutors in family planning.

(iii) Scheme in Madras City called the 'Madras City Public Employees Family Welfare Scheme' under which concessions had been extended to public employees in Madras City, seeking surgical methods of family planning.

Under this scheme, public employees in Madras City who had attained the age of 32 in the case of men, and 26 in the case of women, and who had not less than three living children were eligible to avail of the concessions extended under the scheme. For men undergoing vasectomy operation a cash grant of Rs. 15 each, and for women undergoing salpingectomy operation a cash grant of Rs. 25 each was payable under this scheme.

(iv) The Director, Indian Institute for Population Studies, Madras, was directed to conduct an attitude survey of fathers under the Madras City Public Employees' Family Welfare Scheme for which a sum of Rs. 1,500 was sanctioned as grant.

CENTRAL SOCIAL WELFARE BOARD

The Central Social Welfare Board was set up in August 1953 as an autonomous body under the general administrative charge of the Union Ministry of Education to promote programmes of social welfare under the First Five-Year Plan.

It has two main functions:

1. to afford financial assistance to existing welfare organizations

2. to sponsor and aid new welfare services in uncovered areas where they are needed.

About the first of the two objects mentioned above, a sum of Rs. three crores has been set apart for grant-in-aid to welfare organizations in the Second Plan.

To institutions of good standing grants are given on an assured basis for a continued period of five years. To smaller organizations grants are given on a yearly basis.

Budget (1957-58): Rs. 1.74 crores; 1956-57: Rs. 1.25 crores.

Over 4,500 institutions have so far been aided by the Board.

More precise figures are:

Between 1953 when the Board was set up and March 1958, 4,043 institutions for child welfare, women's welfare, welfare of the handicapped and general welfare were sanctioned grants amounting to Rs. 1,28,84,408 for a year at a time.

504 institutions received long-term grants amounting to Rs. 1,02,87,850 sanctioned upto March 1958 to be utilised upto March 1961.

In fulfilment of the second of its functions the Board has sanctioned the following schemes:

Welfare Extension Projects in rural areas for women and children; Urban Family Welfare projects; After-care Programmes.

There are also in being a pilot welfare extension project in urban areas; a programme for coaching women in rural areas to acquire the necessary educational qualification to serve as welfare workers; the provision of basic welfare services in gramdan villages.

The object of the Welfare Extension Projects is to provide basic welfare service to women, children and the handicapped.

From April 1957 the projects have been tied up with the larger community development projects. Each of these projects now covers the same 100 villages as the community development block and has on an average 14 to 17 centres.

The budget for three years for a welfare extension project of this type is about Rs. 1.33 lakhs.

The Second Plan provision is Rs. 8.6 crores.

It is estimated that at the end of the Second Plan period (March 1961) there would be 1,550 projects of this type, with 13,250 centres, covering 1,19,000 villages with a total population of 71.5 million. The total expenditure would amount to a little over Rs. 15 crores and the contribution of the Board would be Rs. 7.4 crores.

The total number of persons to be trained would be about 6,800 *Gram sevikas* and 1,320 midwives. The provision for this is Rs. 50 lakhs.

All welfare work relating to women and children in community development areas is now under the charge of the Board.

The projects started before 1957, are independent of the Community Development programmes.

Each of the projects covers 25 villages with a population of 20,000.

The target was one project per District or 330 in all by the end of the First Plan, and three more per District or 990 more in all during the Second Plan, thus bringing the total to 1,320 projects. Each project was to have five centres so that at least five villages together had one centre.

The activities at a centre include Balwadi (Creches-cum-pre-basic schools), maternity services, craft classes, social education for women and cultural facilities.

At each centre there is a *gram Sevika*, a craft instructor and a dai. At project level there are a mid-wife and a *mukhya sevika*.

The annual expenditure on each of these pre-1957 projects is about Rs. 25,000. The Board contributes 50 per cent of the expenditure, the

State Government 25 per cent, and local contributions make up the balance.

As on March 31, 1958, the Board had 435 Welfare Extension Projects (original pattern) through 2,027 centres covering 10,546 villages and a population of 92.49 lakhs.

47 projects had been sanctioned covering 4,700 villages and a population of 80.55 lakhs.

The urban Family Welfare schemes are really intended to give economic help to women of lower middle class families. Industrial Co-operatives are formed for starting small-scale industries in selected urban areas to employ about 500 women each. A woman was expected to earn about one and a half rupees a day. The aim is to set up about 20 units to benefit 10,000 families by the end of the Second Plan.

There are at present five units benefiting 2,500 families in Delhi, Hyderabad, Vijayawada and Poona.

The Ministry of Commerce and Industry provides trained personnel and also marketing facilities.

The Social Welfare Board has also decided to set up 100 Pilot Welfare Extension Projects in urban areas to provide welfare services. Each project will cover about 500 families of about 2,500 individuals. Rs. 25 lakhs have been set apart for the rest of the Plan period.

By December 1958, 56 projects had been sanctioned and some had started working.

The quota is seven for each State except Bombay which has 12.

The assistance of organizations like the Social Service Leagues, the Red Cross Society, Bharat Sevak Samaj, Rotary Club, the Ramakrishna Mission have been enlisted.

One of the most important achievements of the Board has been in the provision of after-care services. These are intended to complete the process begun in Care Institutions. State Homes have been set up to provide temporary residential facilities, organize work centres, give advice and help, negotiate the placement of those coming out of Care Institutions and ensure their social and vocational rehabilitation.

As already mentioned the setting up of these Homes with facilities for guidance, legal aid and so on was recommended by the Advisory Committee on After-care programme. The Production Unit attached to each Home would be conducted by the Ministry of Commerce and Industry.

By December 1958 the Board had 25 Homes and 46 shelters.

But only 9 Production Units had been sanctioned by the Ministry of Commerce and Industry.

It is estimated that by the end of the Second Plan there would be 80 Homes (and 80 Production Units) and 330 Shelters covering 40,000 persons.

About the provision of coaching for eligible women in rural areas to enable them to take the qualifying examination for *gram sevikas*, this arose because there was difficulty in finding the appropriate type of person.

It has, therefore, been decided that mature women with a knowledge of rural conditions and aptitude for learning and teaching should be given opportunities to acquire the minimum educational qualifications required to qualify them for posts of instructors and *gram sevikas* in the least possible time.

For this purpose 28 schemes had been sanctioned till December 1958.

Two other projects just taken up (December 1958) are:

Shelters for the homeless. These will be implemented by the Bharat Sevak Samaj. Shelters which will have recreational and educational facilities will be open between the hours 7-30 P.M. and 7 A.M. for a nominal payment.

Holiday Homes for children (between the ages of 8 and 16) in hillstations. The schemes will be implemented through the Indian Council of Child Welfare.

THE CO-OPERATIVE MOVEMENT

DURING 1956-57 the number of co-operative societies of all types rose from 240,395 to 244,799, the percentage increase being as low as 1.8 compared to 9.6 in 1955-56, 10.4 in 1954-55 and 4.8 in 1953-54.

Primary agricultural credit and non-credit societies accounted for most of the increase. The former, which numbered 1,61,510 at the end of June 1957 forming 65.9 per cent of the total number of societies, constituted numerically the most important single class of co-operative institutions in the country as in earlier years.

The membership of primary societies increased by 10 per cent from 1.76 lakhs at the commencement of the period under review to 1.94 lakhs at the end of 1956-57. The rate of increase was of the same order as in 1955-56; but taking into account the decline in membership of 2.75 lakhs consequent on the nationalization of life insurance societies the percentage increase in 1956-57 was higher at about 12.

As in previous years much of the increase was in the membership of the primary agricultural credit societies, the number of new members being 13.26 lakhs. Assuming that an average family comprises five members, it may be estimated that by the end of 1956-57 roughly 9.69 lakhs, or nearly 25 per cent of the population was served by co-operatives compared to 8.81 lakhs or 22.8 per cent of the population at the commencement of the period. Allowance will, however, have to be made for individuals being members of more than one society.

During 1956-57 the working capital of all types of co-operative societies rose by Rs. 98.85 crores to Rs. 567.67 crores, recording an increase of 21 per cent as against a rise of 20 per cent during 1955-56.

The percentage of owned funds (paid-up capital and reserves) and deposits to working capital

was 26.9 and 34.7 respectively, compared to 29.8 and 37.4 respectively at the close of 1955-56.

The outstandings at Rs. 25.76 crores in respect of advances made by the Reserve Bank were higher as compared to the previous year by Rs. 11.68 crores. There were significant increases in the outstandings in respect of loans from co-operative banks, government and other sources, which stood at Rs. 111.56 crores, Rs. 33.91 crores and Rs. 15.06 crores respectively at the close of 1956-57.

CREDIT STRUCTURE

The following table gives data relating to the loans advanced by primary co-operative societies of all types during the last three years:

Crores of rupees			
Item	1954-55	1955-56	1956-57
Advances ..	111.15	140.78	173.16
Recoveries ..	99.15	118.70	143.21
Outstandings ..	128.34	149.06	187.15
Overdues ..	21.82	22.63	24.18
(4) as percentage of (3) ..	17.0	15.1	12.9

The advances made during 1956-57 by primary societies were 23 per cent higher than during 1955-56.

Bombay accounted for Rs. 63.20 crores or 36.5 per cent of the aggregate advances.

The following table gives comparative statistics for 1955-56 and 1956-57 in regard to state co-operative banks, central co-operative banks and agricultural credit societies.

Amount in crores of rupees

Item	State co-operative banks		Central co-operative banks		Primary agricultural credit societies	
	1955-56	1956-57	1955-56	1956-57	1955-56	1956-57
1	2	3	4	5	6	7
Number ..	24	23	478	451	1,59,939	1,61,510
Membership (in thousands) ..	30	33	3.00	3.11	77.91	87.33
Advances ..	67.86	123.71	79.83	100.80	49.62	67.33
Repayments ..	57.57	110.62	68.19	65.33	38.25	51.05
Outstandings ..	34.77	49.62	54.34	71.90	59.84	76.82
Working capital ..	63.34	79.54	92.67	110.26	79.10	98.30
Owned funds ..	7.65	8.78	15.15	18.45	29.25	33.31
Deposits ..	36.67	38.39	55.71	58.48	7.05	8.05
Other borrowings ..	19.02	32.37	21.80	33.33	42.80	56.94

STATE CO-OPERATIVE BANKS

Following the territorial readjustment and integration effected under the States Reorganization Act 1956, the Manipur and Tripura State Co-operative Banks were newly formed, the Madhya Pradesh State Co-operative Bank was reconstituted into the Vidarbha and the Mahakoshal State Co-operative Banks while the Ajmer, Bhopal, Coorg and Vindhya Pradesh State Co-operative Banks ceased to be apex banks.

Consequently the number of state co-operative banks at the end of June 1957 stood at 23 compared to 24 a year before.

Of these, three state co-operative banks were functioning in Bombay and two each in Andhra, Madhya Pradesh and Punjab.

During 1956-57, the membership of the state co-operative banks declined from 36,394 to 33,440. Part of the decline is due to the exclusion of Ajmer, Bhopal, Coorg and Vindhya Pradesh co-operative banks from the list of state co-operative banks.

The paid-up capital and statutory reserves of the banks rose from Rs. 4.37 crores and Rs. 1.42 crores respectively at the commencement of the year to Rs. 5.31 crores and Rs. 1.46 crores respectively at the close of 1956-57.

The advances of state co-operative banks to their member banks and societies recorded an impressive rise during the year when they aggregated Rs. 113.77 crores against Rs. 58.10 crores during the previous year.

The advances to individuals amounted to Rs. 9.94 crores, the increase relatively to the year 1955-56 being negligible.

The overdues increased from Rs. 3.70 crores at the end of 1955-56 to Rs. 4.10 crores at the end of 1956-57.

The percentage of overdues to outstandings was 13.2 in the case of individuals and 7.9 in respect of societies against 10.2 and 10.7 respectively at the end of 1955-56.

Of the total investments of Rs. 19.96 crores at the end of 1956-57, Rs. 16.29 crores or approxi-

mately 82 per cent consisted of government and other trustee securities.

CENTRAL CO-OPERATIVE BANKS AND BANKING UNIONS

The declining trend in the number of central co-operative banks and banking unions continued during the year under review and the number of banks fell from 478 to 451, the smaller banks merging with adjacent larger banks.

Though the number of banks declined by 27, their membership rose from 3 lakhs to 3.11 lakhs during the year, comprising 1.47 lakh individuals and 1.64 lakh societies.

The working capital of the banks rose from Rs. 92.67 crores at the end of June 1956 to Rs. 110.26 crores at the end of June 1957. The central banks in Andhra, Bombay, Madras and Punjab accounted for over 62 per cent of the total working capital.

The owned funds of the central banks increased by about 22 per cent at the end of 1956-57.

Of the total deposits of Rs. 58.48 crores over 32 per cent was from co-operative societies and the rest from individuals and other sources. The increase in the deposits during the year was slight, being less than 5 per cent. On 30 June 1957, deposits constituted 53 per cent of the working capital compared to 60 per cent at the commencement of the period under review.

Loans advanced to individuals during 1956-57 rose by Rs. 6.52 crores to Rs. 15.96 crores.

There was also an increase of nearly 11 per cent in the loans due by individuals on 30 June 1957 compared to the position a year before. This is a discouraging feature as the proper function of a central bank is to finance affiliated societies.

Loans advanced to banks and societies during 1956-57 amounted to Rs. 84.84 crores representing an increase of 20.5 per cent over the previous year. Of this amount Rs. 25.20 crores was advanced by the central co-operative banks in Bombay.

At the end of 1956-57 the overdues amounted to Rs. 9.34 crores compared to Rs. 7.88 crores at the beginning of the year and constituted nearly 13 per cent of the outstanding loans compared to about 15 per cent in the previous year. The position of the overdues was particularly bad in the case of the central banks in Bihar, where they constituted over 44 per cent of the outstandings on 30 June 1957.

The investments of the banks aggregated Rs. 29.05 crores of which Rs. 15.65 crores were investments in trustee securities.

The average working capital per bank more than doubled itself during the period 1951-57. There was also some improvement in the average amount of loans advanced per bank.

AGRICULTURAL CREDIT SOCIETIES

Agricultural credit societies constitute the most important sector of the co-operative movement in the country. At the end of 1956-57 there were 161,510 such societies with a membership of 91.2 lakhs compared to 159,939 societies with a membership of 77.9 lakhs at the beginning of the year.

Nine out of every 16 societies were unlimited liability societies. As between the different states, Uttar Pradesh had the largest number of societies, viz. 42,646 which was more than double the number of societies in Bombay which ranked second with 17,812 societies.

The working capital of the agricultural credit societies rose by Rs. 19.20 crores to Rs. 98.30 crores during the year under review compared to an increase of Rs. 16.17 crores during 1955-56.

Borrowings from state or central banks, which stood at Rs. 55.90 crores as on 30 June 1957, formed the most important item of the working capital of these societies.

Deposits amounted to Rs. 8.05 crores at the end of 1956-57 against Rs. 7.05 crores at the commencement of the year. Of the total deposits, Rs. 4.04 crores or more than half was accounted for by Punjab and Bombay.

During 1956-57 loans advanced by agricultural credit societies rose to Rs. 67.33 crores from Rs. 49.62 crores during 1955-56 while the outstandings of loans stood at Rs. 76.82 crores at the end of June 1957 compared to Rs. 59.84 crores at the beginning of the year.

Overdues constituted about 22 per cent of the outstandings on 30 June 1957 against 25 per cent at the end of 1955-56.

The all-India averages in respect of membership, share capital, deposits, working capital and loans of agricultural credit societies are given in the following table:

Item	Amount in rupees	
	1955-56	1956-57
1. Membership per society	49	56
2. Working capital per society	4,946	6,086
3. Share capital		
(i) per society	1,051	1,228
(ii) per member	22	22
4. Deposits		
(i) per society	441	496
(ii) per member	9	9
5. Loan advanced per member	64	74

GRAIN BANKS

At the close of the year 1956-57 there were 8,191 grain banks with a membership of 7.62 lakhs and a working capital of Rs. 2.67 crores compared to 4,169 grain banks with a membership of 7.30 lakhs and a working capital of Rs. 2.42 crores at the end of the previous year.

Over 91 per cent of the banks were concentrated in Andhra, Bombay and Mysore.

The grain-loans advanced by the banks during 1956-57 amounted to Rs. 50.65 lakhs compared to Rs. 56.42 lakhs during the previous year.

Overdues, which amounted to Rs. 80.47 lakhs, constituted 68.5 per cent of the outstandings on 30 June 1957.

AGRICULTURAL CO-OPERATIVES

A Working Group on Agricultural Co-operatives, set up in pursuance of a National Development Council's decision on the subject which met in Jan. 1959 is believed generally to favour the establishment of multi-purpose societies at the village level, though Reserve Bank representatives strongly opposed the inclusion of credit and many other functions in their purview.

The Reserve Bank appeared to be of the view that primary societies should concern themselves exclusively with extension, management and service functions, leaving credit, co-operative farming and tube-wells to other bodies.

Credit in particular, according to this scheme, should be entrusted to large and independent bodies, serving eight to ten villages each. The primary societies would be responsible for processing all loan applications and for recovery work.

In the opinion of the Working Group generally, this would weaken the co-operative movement and defeat the object of the programme proposed. The Group hoped to finalise its report in Feb. 1959, leaving the decision on this crucial and other matters to the Government.

Another objection to the Reserve Bank proposal was that while excluding primary societies from all power and influence—the peasant would naturally look upon them as mere obstacles in the way of credit, which was his main need—it would saddle them with the

responsibility of effecting recoveries and maintaining accounts. Even the service functions of these societies would be severely affected, credit for the purchase of items like seed, fertiliser and implements having to be sanctioned by a different body.

The Reserve Bank's view was that it needed a certain degree of security and administrative efficiency before it could entrust its funds to a body. This would not be forthcoming among the primary societies for some time to come. Ventures like co-operative farming and tube-wells should be excluded from the purview of these institutions because of the financial risk involved.

The group was understood generally to be agreed that share participation by the Government should be avoided. Although this would reduce the credit available, official control and supervision which was a necessary accompaniment of such participation, was an evil that was to be combated if initiative was to be fostered among the community. Instead, large-scale societies and well-to-do farmers should be invited to come forward and help. All production 'taccavi' should be diverted to the co-operative banks, only distress 'taccavi' being distributed by the Government directly.

"De-officialisation" of the co-operative machinery was to begin straightway. Official chairmen of central banks were to be replaced by non-officials, the Government retaining only registration and auditing and some other allied functions.

One of the points emphasised by the Working Group was the need for a trained corps of co-operative cadre, who apart from discharging accounting and other similar functions, should act as the spearhead of the movement in the villages. This should be the responsibility of co-operative associations or unions themselves, not of the Government.

The Group had devoted some attention to the question of training. It had come to the conclusion that the present institutions—six by the Reserve Bank, eight by the Union Government and about 40 by the States—were inadequate in view of the target of 20 million members and had urged the committee on co-operative training to get down to the task of expanding these facilities.

Finally, the Group was of the opinion that the programme of expansion should proceed side by side with advice to improve and consolidate existing societies.

In Nov. 1958 a conference of Registrars of co-operative Societies dealt with a number of issues arising from a co-operative programme decided by the National Development Council.

Among other things, the conference helped to emphasise the need for a flexible approach to the problem.

The consensus of opinion on the much debated question of the character and size of the co-operative society was that a viable unit would have to embrace three villages instead of one. Similarly, it was agreed that while these societies should, as a rule, have limited liability, States like Madras, which had successfully worked the unlimited liability type, should have the option to continue the system.

With regard to credit, the general opinion was that in view of the expanded scope of the proposed societies in this respect, Government help, at present given as taccavi or in other forms, should be channelled into the co-operative structure, thus strengthening its resources, which would be helped further by proper co-ordination with the small savings drive.

The Registrars, who have returned to their States with a livelier appreciation of the scope and demands of the new programme, were expected to discuss the matter further with their departments, and if necessary, with the respective Chief Ministers, who were a party to the N.D.C. decision.

The Registrars were occupied during the conference with the new emphasis on the small-sized society, which constitutes a basic change for the States, particularly like Uttar Pradesh, which had in recent years plumped for large societies in a big way. It was felt that while the emphasis had hitherto erred on the side of size, the N.D.C. resolution had swung too far to the other extreme. It was felt that the limit of 1,000 members need not be observed too rigidly.

With regard to the scope and functioning of these societies, the conclusion appeared to have been that a single multi-purpose unit should look after credit, supply of fertilisers, seeds and implements and processing and marketing of produce. Functional co-operatives, concerned with items like soil conservation and contour bunding, involving as they do in many cases, a large number of villages, might come in later as supplementaries if the basic units were unable to take up the work.

Processing was added as an important function of the marketing co-operative. Great importance was attached to the marketing societies because they would, in course of time, become an integral part of the Government's programme for the nationalisation of the wholesale trade in food grains.

The Second Plan target for marketing co-operatives is 1,900, of which 1,000 were expected to be established by the end of 1958. It was suggested that the States should try and set up the remaining 9,000 during 1959 itself, in which case the Centre would be prepared to consider additional financial help.

NON-AGRICULTURAL CREDIT SOCIETIES

The non-agricultural credit societies comprise urban banks, employees' credit societies and other special types of credit societies which cater for the banking and credit requirements of urban people.

These societies numbered 10,150 at the end of June 1957 compared to 10,003 at the commencement of the year.

More than 50 per cent of these societies were concentrated in Punjab, Bombay and Mysore.

Their membership rose by 1.66 lakhs to 32.39 lakhs during 1956-57.

The paid-up capital and reserves of these societies amounted to Rs. 20.64 crores and Rs. 9.48 crores respectively on 30 June 1957 compared to Rs. 19.09 crores and Rs. 8.98 crores respectively at the beginning of the year.

Their working capital recorded a fairly large increase from Rs. 85.74 crores at the beginning of the year to Rs. 100.41 crores at the end of June 1957.

Loans advanced during 1956-57 amounted to Rs. 82.07 crores and represented an increase of Rs. 10.01 crores over the amount advanced during the preceding year.

On 30 June 1957, the loans due by individuals amounted to Rs. 74.99 crores and the overdues formed 8.2 per cent of this amount.

Investments in trustee securities amounted to Rs. 12.58 crores at the end of 1956-57.

The deposits held by these societies have been rising steadily and, on 30 June 1957, they amounted to Rs. 64.89 crores compared to Rs. 53.84 crores a year before.

The non-agricultural credit societies in Bombay accounted for a little over 49 per cent of the total deposits.

Having adequate resources of their own, the societies generally did not have to borrow to any appreciable extent from outside sources. Thus, at the end of June 1957, the borrowings of these societies amounted to only Rs. 5.80 crores.

LAND MORTGAGE BANKS

There were 12 central land mortgage banks with a membership of 116,145 individuals and 419 banks at the end of 1956-57 compared to 9 banks with a membership of 50,599 individuals and 401 banks at the end of the previous year.

The paid-up share capital and reserves of the banks amounted to Rs. 1.09 lakhs and Rs. 62 lakhs respectively at the end of 1956-57.

The working capital of the banks is built up mainly by floating debentures which are guaranteed as to repayment of principal and payment of interest by the respective state governments.

The debentures outstanding on 30 June 1957 amounted to Rs. 16.96 crores compared to Rs. 14.94 crores at the end of June 1956.

The loans advanced by the banks during 1956-57 amounted to Rs. 3.30 crores, while outstanding on 30 June 1957 stood at Rs. 14.94 crores against Rs. 13.08 crores at the end of the previous year.

Sinking fund investments amounted to Rs. 4.94 crores at the end of 1956-57.

During the year under review the number of primary land mortgage banks rose by 24 to 236 and their membership by 19,759 to 3.34 lakhs.

During the same period the paid-up capital of these banks rose from Rs. 55.64 lakhs to Rs. 98.70 lakhs.

Borrowings from central land mortgage banks and loans due by individuals stood at Rs. 10.94 crores and Rs. 11.51 crores respectively on 30 June 1957.

STATE ASSISTANCE

The following table shows the assistance given by the State Governments to the different types of co-operative institutions in the form of contribution to their paid-up share capital.

Lakhs of rupees

State	State co-operative banks	Central co-operative banks	Primary agricultural societies	Central land mortgage banks	Marketing Societies		Others	Total
					State and central	Primary		
Andhra	4.29	6.00	8.24	1.00	0.13	0.90	..	20.56
Assam	15.00	0.80	..	4.00	1.00	20.50

Total	2,20.12	1,26.27	3,28.21	18.75	18.45	13.78	48.04	7,73.62

NON-CREDIT SOCIETIES

The number and membership of the state non-credit societies declined from 82 and 22,894 at the end of June 1956 to 56 and 15,644 at the close of 1956-57.

On 30 June 1957 their paid-up share capital was also less at Rs. 1.70 crores compared to Rs. 1.82 crores at the end of the preceding year.

The turnover of these societies during 1956-57 was of the value of Rs. 14.52 crores which was more or less of the same order as during 1955-56.

On 30 June 1957 the central non-credit societies numbered 2,947 and their membership consisted of 20.49 lakh individuals and 74,024 societies. The corresponding figures on 30 June 1956 were 2,764, 18.48 lakhs and 67,046 respectively.

Their turnover for the year 1956-57 aggregated Rs. 71.46 crores which exceeded the turnover for the preceding year by Rs. 13.61 crores.

At the end of June 1957 there were 31,905 agricultural non-credit societies of all types with a membership of 27.58 lakhs and a working capital of Rs. 44.73 crores compared to 30,268 societies with a membership of 25.92 lakhs and a working capital of Rs. 28.41 crores at the commencement of the year.

Their turnover during 1956-57 was of the value of Rs. 43.96 crores compared to Rs. 31.16 crores during the preceding year.

Out of the 31,905 agricultural non-credit societies 9,731 were agricultural marketing societies. The membership of the marketing societies rose by 2.67 lakhs to 7.51 lakhs during the year under report.

The sales effected by these societies during 1956-57 were valued at Rs. 24.51 crores against Rs. 15.23 crores during the preceding year.

On 30 June 1957, the number, membership and working capital of the non-agricultural non-credit societies stood at 23,622, 31.64 lakhs and Rs. 60.89 crores against 27,745, 33.23 lakhs and Rs. 58.13 crores at the beginning of the year.

Their turnover during the year under review was of the value of Rs. 61.89 crores compared to Rs. 44.78 crores during 1955-56.

The number of supervising unions rose from 568 to 650 during the year under review but the number of societies affiliated to them fell steeply from 29,550 to 31,136, and in the result,

their income also declined to Rs. 13.81 lakhs from Rs. 14.94 lakhs during the preceding year.

The number of supervisors employed by them was also less at 1,410 compared to 1,536 at the commencement of the year.

The number of state unions and institutes declined by 4 during 1956-57.

The total number of societies affiliated to them was 39,172 of which 38,677 were primary societies and the rest, viz. 495 were central societies.

Of their total income of Rs. 47.70 lakhs, grant from government and fees or subscriptions from affiliated societies amounted to Rs. 39.08 lakhs and Rs. 1.00 lakh respectively.

Life insurance societies have been integrated with the Life Insurance Corporation of India.

Thus at the end of June 1957 there were only 6 insurance societies comprising 4 fire and general insurance societies and 2 motor insurance societies in the co-operative fold.

SOCIETIES UNDER LIQUIDATION

There were 13,372 societies under liquidation at the end of June 1956. During 1956-57, 2,258 societies were brought under liquidation and the accounts of 1,670 societies were finally wound up.

The value of assets realised and liabilities paid off during 1956-57 amounted to Rs. 64.46 lakhs and Rs. 49.37 lakhs respectively against Rs. 42.46 lakhs and Rs. 32.56 lakhs respectively during the preceding year.

At the end of 1956-57, 13,960 societies, were under liquidation.

As on the same date the liabilities and assets of the societies under liquidation amounted to Rs. 6.25 crores and Rs. 5.31 crores respectively against Rs. 5.93 crores and Rs. 4.78 crores at the beginning of the year 1956-57.

TRAINING OF CO-OPERATIVE PERSONNEL

Position : June 1958.
The drive for training a large number of persons to meet the needs of growing co-operative programme in the Second Five-Year Plan is making headway according to schedule.

Already about 14,000 candidates have been trained to take up positions as managers, accountants, supervisors and auditors in co-operative societies. Additional 15,000 will be trained during the remaining three years of the

Second Plan at the 47 schools spread in 14 States and 2 Union Territories. Candidates from Tripura and Himachal Pradesh, which have no training facilities, will be trained at schools in West Bengal and Delhi respectively.

For encouraging development of cooperation in Community Development Blocks, 1,220 Block Level Co-operative Officers have been trained and 700-800 more are expected to be trained annually.

Training to all ranks of co-operative personnel is provided by a Central Committee set up in 1953 by the Government of India in collaboration with the Reserve Bank.

Technical Staff

Progress has also been made in the training of technical staff for specialised agencies like marketing unions, Land Mortgage Banks and warehouses. Five regional training centres, providing special courses in co-operative marketing, at Poona, Madras, Meerut, Ranchi and Indore, have completed training of 347 persons; besides 109 are at present attending courses.

In co-operative land mortgage banking, training has been given to 148 persons at the Madras Centre and about 40 persons are under training.

Twenty persons selected for appointment as warehousemen and technical assistants at the nine warehouses set up so far were given reorientation training before posting.

Of the 400 senior personnel required for manning co-operative departments and institutions in the States, 310 have been trained and 37 are under training at the All-India Co-operative Training College, Poona. Besides, 641 "intermediate personnel", like Co-operative Sub-Registrars, have completed training and 214 are at present attending courses.

55 centres were set up in N.E.S. and Community Development Blocks during 1957-58 for the education of members and office-bearers. Earlier, this method had been tried in six pilot areas in Delhi, Bihar, Madhya Pradesh and Bombay. Already 84,378 members and office-bearers of co-operative societies have been given education in the principles and practice of co-operation. The ultimate object is to impart such knowledge to 20,000 office-bearers, 1,50,000 members of Managing Committees and 7.5 lakh members of societies.

NET RESULT

The net results of the operations of different types of societies during the year under review are given in the following tables.

Amounts in lakhs of rupees

Type of society	1955-56				1956-57			
	PROFIT		LOSS		PROFIT		LOSS	
	No. of societies	Amount	No. of societies	Amount	No. of societies	Amount	No. of societies	Amount

¹ Including grain banks.

The overwhelming majority of the credit societies are in the former Part A States, a fact that shows that they are not evenly distributed over the country.

The crucial problem here is making credit available to the average cultivator at rates which he can actually afford. The rates are high ranging as they do between 12½% and 24%, though there are States where the rate ranges between 6½% and 9%.

In answer to a question in Parliament it was stated that the rural credit target provided for 1958-59 was Rs. 140 crores. During 1956-57 it was Rs. 65 crores, in 1957-58 it was Rs. 100 crores.

In summing up the whole movement, it may be noticed that there was an all round improvement in the profits made by co-operative societies during 1956-57 compared to the previous year. The increase was, however, not uniform as between the different types of societies.

The largest increase was noticed in the case of primary agricultural non-credit societies whose profits rose from Rs. 69 lakhs in 1955-56 to Rs. 1.65 lakhs in the current year.

Simultaneously with the increase in profits, losses made by the societies too have shown an increase, particularly in the case of primary non-agricultural non-credit societies.

In the case of central co-operative banks the number of banks showing a loss declined from 61 to 46 but the amount of loss incurred by the 46 banks at Rs. 9 lakhs was 50 per cent in excess of that incurred by all the 61 banks in 1955-56.

PUBLIC HEALTH

MATTERS connected with health fall largely in the State field.

The Centre is, however, directly responsible even for State subjects in the Centrally administered areas of Manipur, Delhi, Tripura and Himachal Pradesh.

The Central Government's function in regard to matters which are primarily the responsibility of States themselves, can be stated to be co-ordination, the collection and supply of information, supply of expert technical assistance and advice, and such other assistance as can be given for the promotion of the health and well-being of the country.

A Central Health Service has been sanctioned; when fully constituted it will comprise about 350 Class I posts and an equal number of class II posts.

CENSUS

In 1956, it was estimated, there were about 10,000 medical institutions and about 125,000 beds. This would represent an increase during the First Plan of about 16 per cent in institutions and 10 per cent in beds.

The number of doctors was a little under 70,000 and of dental surgeons about 700.

The total outlay on public health during the First Plan was about Rs. 101 crores.

Second Plan: Rs. 256 crores.

The main facts (based on 1951 census reports) are given below:

About 380,000 persons are engaged in medical and health services in the country as a whole. Out of this 230,000 live in towns and 150,000 live in villages. These may be divided as follows (exclusive of five Districts in Bihar):

Registered medical practitioners (91,930); Vaidis, hakims and those not registered (96,147); Compounders (38,407); Nurses (31,517); Midwives (23,938); Vaccinators (5,928); Dentists (3,283); Others engaged in hospitals and private establishments rendering medical or health services but not including scavengers or sanitary staff (72,970).

Number of hospitals, 8,601 (1951); no. of beds, 113,557 (1951); no. of nursing homes, 500 (1952); no. of medical colleges (including 3 dental colleges, 3 nursing, one pharmacy), 34 (1952); no. of colleges for indigenous systems, 50 (1952); no. of special institutions (e.g., radiological) conducted by private agencies, 195; no. of maternity and child welfare centres (urban) 664, (rural) 418 (1947); no. of trained visitors (urban) 231, (rural) 136 (1947); no. of trained midwives (urban) 922, (rural) 255 (1947); no. of trained dais (urban) 1,264, (rural) 1,387 (1917).

VITAL STATISTICS

The registered birth rates, death rates and infant mortality rates are given below:

	Birth rate.	Death rate.	Infant Mortality rate.
1930 ..	33.0	23.0	149
1940 ..	33.0	22.0	160
1947 ..	26.6	19.7	144
1948 ..	25.4	17.1	130
1949 ..	26.7	15.8	123
1950 ..	24.4	16.6	127
1953 ..	24.8	13.0	119
1954 ..	24.4	12.5	109
1955* ..	27.0	11.7	100
1956† ..	25.2	11.4	104

Note: Figs. for 1930 and 1940 relate to British Indian provinces. The rest relate to former Part 'A' States and Delhi, Ajmer, Coorg.

* Excludes Bihar, M.P., Orissa.

† Figures are provisional. This also excludes Bihar, M.P., Orissa and Coorg.

The infant mortality rates in some of the Indian cities per mille of live births are given below.

Name of the City	1956*	1957*
Ahmedabad ..	N.A.	149
Bombay ..	N.A.	110
Calcutta ..	129	N.A.
Delhi ..	79	N.A.
Lucknow ..	96	97
Madras ..	145	N.A.
Nagpur ..	N.A.	73

N.A. = Not available.

* Figures are provisional.

The following paragraph gives the maternal death-rate (deaths per 1,000 of live and stillbirths) for 1955 in some major towns in India.

Ahmedabad, 0.6; Bombay, 1.0; Calcutta, 2.6; Delhi City, 1.7; Lucknow, 1.6; Madras, 2.3.

TROPICAL DISEASES

The following table gives the number of deaths and rates (number of deaths for every 1,000 of the population) from different diseases recorded in former Part 'A' States excluding Assam, Delhi, Coorg, Ajmer and Mysore.

	1955*		1956†

Also, figures are provisional.

Veneral Diseases: Syphilis occurs in sporadic venereal and endemic non-venereal forms. Gonorrhoea is widely prevalent. Other venereal diseases like Chancroid, Lymphogranuloma Venereum and Granuloma Inguinale are localised in their distribution.

In large cities and industrial areas, prevalence of venereal diseases is estimated to be 5 to 7 per cent of the population for syphilis alone.

The problem in rural areas is not defined from limited surveys conducted in recent years. It appears that sub-Himalayan tracts extending from Kashmir in the West to Assam in the East have a high incidence of syphilis.

Yaws is found in some of the districts of Orissa, Madhya Pradesh, Andhra Pradesh and Bombay.

West Bengal and Himachal Pradesh have full time V. D. control officers. Anti-Yaws Campaigns are in progress in the States of Orissa, Madhya Pradesh and Andhra Pradesh with the assistance of WHO and or UNICEF.

In 1949, Government of India set up in collaboration with the World Health Organisation a Venereal Disease Demonstration Centre in Himachal Pradesh. Besides survey and mass treatment among the people, the Centre was engaged in the training of personnel. Seventeen Teams from different States participated in the training programme at the end of which each

team was supplied with laboratory equipment and penicillin by the UNICEF to establish control activities in the States.

Veneral disease control was included in the First Five Year Plan. Some States had already developed limited control facilities. The Himachal Pradesh administration established a full scale Venereal Disease Organisation at Simla. A Venereal Disease Training and Demonstration Centre was established at Safdarjung Hospital in New Delhi in March 1954. The Venereal Disease Department of the Madras General Hospital was upgraded in 1952. These Training Centres provide improved training facilities.

A Cardiolipin production unit and a Penicillin production unit were established in co-operation with WHO and UNICEF.

On the advice of the Health Panel of the Planning Commission, the Government of India have provided in their Second Plan for the establishment, in association with the State Governments, of:—1. A Central V. D. Organisation; 2. 8 Clinics and Laboratories at the headquarters of the States; 3. 75 Clinics at district headquarters; 4. Strengthening of State Venereal Disease Organisation; 5. Mass survey and treatment programmes in highly infected areas; 6. Free supply of penicillin; 7. Training of Personnel.

The Government of India will meet 75 per cent of the non-recurring expenditure subject to a maximum of Rs. 15,000 per clinic and 50 per cent of the recurring expenditure subject to a maximum of Rs. 15,000 per clinic per year. The Government of India are also arranging for a free supply of PAM (penicillin) worth Rs. 20,23,000 during the Plan period and antigens during the first two years of the Plan period. The scheme will cost Rs. 58,67,000 to the Government of India and Rs. 84.28 lakhs to State Governments.

A Central V. D. Organisation was established in November 1957 with a view to co-ordinating the activities of the different States.

So far (upto Sep. 1958) a total of 8 headquarters clinics and 35 District clinics have been established in the different States. Intensive control schemes which include field survey and mass treatment have been initiated in the Mahasu district of Himachal Pradesh and Ankola and Gulbarga of Mysore.

Facilities for the diagnosis and treatment of venereal diseases are available at certain V.D. clinics at various ports for seamen. The Government of India also ratified in 1954 the Brussels Agreement of 1924 which provides for services for the treatment of Venereal Diseases of all merchant seamen or watermen at ports irrespective of nationality.

With a view to standardizing Serological Tests for syphilis procedures it is proposed to implement a National Interlaboratory Annual S.T.N. Evaluation.

Cancer: The number of persons who die of cancer annually is believed to be in the neighbourhood of 2 lakhs.

There are only two institutions exclusively for the treatment of cancer in India: Tata Memorial Hospital at Bombay and the Chittaranjan Hospital at Calcutta. Both are now under the Central Government.

There are 40 general hospitals in the country where facilities for cancer treatment are available.

There are three in the Punjab (Amritsar, Gurdaspur, Patiala), four in U.P. (Agra, Lucknow, Allahabad), four in Madras (Madras and Madurai), six in Bombay (Bombay, Ahmedabad, Bhavnagar, Jamnagar, Nagpur), four in Mysore (Bangalore, Mysore, Mangalore), three in Kerala (Trivandrum and Ernakulam), two in Assam (Dibrugarh and Shillong), four in Rajasthan (Jaipur, Bikaner, Jodhpur, Ajmer), one in Orissa (Cuttack), one in Bihar (Patna), four in West Bengal (all in Calcutta), two in Delhi and two in Andhra Pradesh (Visakhapatnam, Hyderabad).

The Government of India have arranged for three Cobalt Bomb Therapy Units under the Colombo Plan for supply to the Tata Memorial Hospital, Bombay, the Chittaranjan National Cancer Research Centre, Calcutta, and the Christian Medical College, Ludhiana. It is understood that two more units will be made available from Canada under the Colombo Plan.

Research is conducted at the Cancer Research Centre at the Tata Memorial Hospital in Bombay, the Chittaranjan National Cancer Research Centre, Calcutta; and the Cancer Institute, Madras. The Indian Cancer Society has its headquarters in Bombay and its divisional headquarters in Calcutta and Madras as shown above.

Under the Second Five-Year Plan Rs. 35 lakhs have been provided to establish cancer wards and units in certain hospitals.

PUBLIC HEALTH AGENCIES

A Central Council of Health exists with the Union Health Minister as chairman and State Health Ministers as members.

Dr. T. R. Tewari, Director, Contributory Health Service Scheme, is the Secretary of the Council. The Council is an advisory body and in that capacity performs the following duties:—(a) to consider and recommend broad lines of policy in regard to matters concerning health

in all its aspects, such as the provision of remedial and preventive care, environmental hygiene, nutrition, health education and the promotion of facilities for training and research; (b) to make proposals for legislation in fields of activity relating to medical and public health matters, laying down the pattern of development for the country as a whole; (c) to examine the whole field of possible co-operation on a wide basis in regard to inter-State quarantine during times of festivals, outbreaks of epidemic diseases and serious calamities such as earthquakes and famines and to draw up a common programme of action.

The body in charge of research is the Indian Council of Medical Research.

(For a list of research institutions see under Research.)

A sum of Rs. 4 crores is provided for research programmes.

The annual grant to the Council amounts to Rs. 12 lakhs.

The following medical bodies are in existence: The Indian Medical Council, the Indian Nursing Council, the Dental Council of India and the Pharmacy Council of India.

The object is to control and regulate the respective professions and standards of qualification.

There are State Pharmacy Councils in Punjab, W. Bengal, Bombay, Madras, Bihar, U.P. Delhi and M.P.

Among important Acts in force are Vaccination Act, Drugs Act of 1940, Drugs Rules of 1945. Then there are the Indian Medical Council Act, the Nursing Act of 1947, the Dentist Act, the Pharmacy Act.

There are four main medical depots—one each at Bombay, Calcutta, Karnal and Madras. The depots at Bombay and Madras have factories attached to them.

CONTROL OF DISEASES

Steps are being taken to control a number of diseases that are rampant.

Malaria

National Malaria Control Programme was launched with effect from April, 1953.

In 1956-57 the control programme covered a population of 19.53 millions.

The incidence of malaria dropped from 63 million in 1953-54 to 21 million in 1956-57, a drop of about 66 per cent.

The expenditure incurred by the Central Government from 1953-58 was Rs. 297.30 lakhs.

From April 1, 1958 it was decided to convert this control programme to one of eradication of malaria. This was calculated to be ultimately cheaper than continued control measures. In about six years the programme will cover almost the entire population of the country.

It aims at reducing the parasite reservoir in human beings to such a negligible degree that once that has been achieved there will be no danger of resumption of local transmission.

There are two phases of this programme. The attack phase, and maintenance or surveillance phase. During the attack phase the central idea is to spray twice a year every human habitation and cattle shed in the areas where malaria is endemic.

Estimates show that 23 crores people live in such areas and 230 units, each designed to protect 10 lakh people, will be operating therein.

Intensive insecticide spraying will be carried out for three consecutive years from 1958-59 to 1960-61.

Sixteen crores of people living in areas where malaria transmission is known to occur in such a low degree as not to constitute a health problem, would also be protected under the Programme. All such areas will be brought within the ambit of spraying operations for 2 years from 1960-61 when 160 additional units will be established to cover them. Only one round of

spray will afford adequate protection in these areas. Thus by 1960-61, the entire country will be covered by the spraying operations.

During the surveillance phase, a special staff will help watch for cases when spraying operations are decided to be interrupted. This staff will make house to house visits detecting residual malaria cases, taking blood tests etc. The important factor of this phase is that the surveillance staff will go into operation by 1960-61, i.e. one year prior to the contemplated interruption of spraying. The data covered will help determine the advisability of stopping spraying operations during the next season. Even where this is done, vigilance will continue for a further period of three years. After this the responsibility for surveillance will fall on the local public health administration.

The estimated cost of the eradication programme during the current and next plan period will be about Rs. 63.24 crores whereas a control programme for the same period is expected to cost about Rs. 52.02 crores.

The eradication programme does not aim at eradication of mosquitoes, which may continue to thrive, with this difference that they will cease to be the transmitters of malaria infection.

For the supply of DDT, which is one of the principal insecticides used in the control and also the eradication programme, a DDT plant, jointly sponsored by the UNICEF, WHO and the Government of India, was set up at Delhi in 1955 at a cost of Rs. 40.33 lakhs, with a production capacity of 700 tons of DDT annually. In 1957-58 it produced 720 tons of DDT 50 per cent and 315 tons of DDT technical. To meet the increased demand for DDT under the eradication programme, it is proposed to step up the capacity of the plant to 1,400 tons annually.

A second DDT plant, to produce 1,400 tons of DDT, technical equivalent to 2,800 tons of DDT 50 per cent set up at Alwaye, Kerala State, has gone into production.

The standard spraying equipment is now being produced locally to meet the entire requirements of the country.

Training facilities at the Malaria Institute of India, Delhi has been intensified since the year 1953-54. 257 medical officers, 616 Malaria Inspectors, 67 Malaria Engineers and 32 Medical Entomologists have been trained.

The expenditure during the Second Five Year Plan period is estimated to be Rs. 55.72 crores including 2 years of control operations and 3 years of eradication operations. During the years 1956-57 and 1957-58, an expenditure of Rs. 12.15 crores was incurred.

Filaria

Among mosquito-borne diseases filaria is second only to malaria. No satisfactory cure has been found for this disease. What is aimed at is the control of the carrier species, and anti-mosquito measures have to continue for five years before results become apparent.

The National Filaria Control programme had 13 control units and 22 survey units allotted during the first Plan. Thirty-three more have been allotted, 13 during the year 1956-57 and 20 during 1957-58.

In view of the tight foreign exchange position in the country and the absence of aid from the USTCM, it is decided, on the advice of the Planning Commission, that the programme should be continued at the existing level and no new Filaria Control units should be allotted during the remaining period of Second Five Year Plan.

Filaria survey with the object of delimiting the extent of the filariasis problem and to collect the pre-control data have been in progress in all States except Assam and West Bengal.

Upto 31st Oct. 1958 representative sample of nearly 20.8 million persons residing in places known to be or suspected to be filarial had been surveyed.

Mass drug administration with Diethylcarbamazine (Hetrasan) is in progress as part of the control programme.

About 20-04 lakh persons have been treated.

Anti-mosquito measures are in progress in all States except Assam and West Bengal. About 7 million persons have been protected by residual spraying with Dieldrin 50 per cent W.W.P.

A course of training in filariology is being arranged at the Malaria Institute of India, Delhi and another at Ernakulam in January 1959.

So far 70 medical officers and 109 filaria inspectors have been trained.

The National Filaria Control Programme will cost 9 crores of rupees during the Second Five-Year Plan (Central Rs. 6 crores, States Rs. 3 crores).

Leprosy

An estimate made in 1953 put the number of lepers in India at over 15 lakhs.

The areas of highest incidence are Andhra, Assam, Bihar, M.P., Madras, Kerala, some parts of U.P., and Bombay.

The necessity of new legislation is urgently felt as the Lepser Act of 1928 has not been effective in checking leprosy.

State Governments favour the redesignation of 'leprosy clinics' as 'skin clinics'.

A number of bodies are fighting to control leprosy—Mission to Lepers, Hind Kshat Nivaran Sangh (formerly Indian Council of the British Empire Leprosy Relief Association), Gandhi Memorial Leprosy Foundation, Kasturba Gandhi Trust, Maharogi Sewa Mandal.

The Mission runs 50 leper homes with about 10,000 inmates and gets grants from State Governments.

The Sangh has as its president the President of the Indian Republic.

The Sangh has its headquarters in New Delhi and branches in 11 States.

The Sangh's activities include financial assistance to leprosy homes and clinics, propaganda through publication of posters and other material, assistance in the training of medical workers and physiotherapists, and publication of the quarterly journal "Leprosy in India".

Isolation of leprosy cases in special leprosy homes was regarded in the past as the main method of control of leprosy in endemic areas. Such institutional isolation has not however yielded the results expected of it.

With the discovery of sulphone therapy in leprosy, a new approach is now available for the control of the disease. Apart from clinical improvement, sulphone therapy brings about a gradual reduction in the number of leprosy bacilli in the skin, and, by promoting healing of ulcers in nose and elsewhere. It also reduces infective discharge from patients.

The only sure method of preventing contact with infective cases is the isolation of cases in leprosy hospitals, sanatoria, or colonies. There are in all about 152 colonies, homes, asylums and hospitals for the treatment of leprosy patients and the number of beds provided is estimated at 19,600.

Treatment in out-patient leprosy clinics is also available in various parts of India. The number of such clinics is approximately 1,203 and the total number of cases taking treatment therein is roughly 1,20,000 per year.

Under the Leprosy Control Scheme of the Government of India included in the First Five-Year Plan at a cost of Rs. 30 lakhs to the Central Government alone, 4 treatment and study centres and 36 subsidiary centres were sanctioned in different States. Till the end of March 1956 four treatment and study centres and 29 subsidiary centres were established.

The scheme has been continued in a more expanded form in the Second Plan. An amount of Rs. 408.48 lakhs has been allocated for this purpose in the States' plans. The non-recurring expenditure will be borne in its entirety by the Central Government and the recurring expenditure shared on a 50-50 basis.

A hundred additional subsidiary centres during the Second Plan are due to be established. Upto end of March 1959, 62 Centres are planned for the States.

The total number of centres functioning till the end of June 1958 including those established during the First Plan was 67 covering a population of 56 lakhs.

A scheme for the training of Medical Officers in Leprosy has been sanctioned.

A Central Leprosy Teaching and Research Institute has been established at Tirumani in Madras State in association with the Lady Willington Leprosy Sanatorium, Tirumani and the Silver Jubilee Childrens Clinic for Child Leprosy, Saidapet.

A sum of Rs. 25.00 lakhs has been provided for this Institute during the Second Five-Year Plan.

Tuberculosis

Mortality figures for cities show a tuberculosis death-rate ranging from 200 to 450 per 100,000 as far as can be ascertained. Little information is available from rural areas but certain investigations have shown that in small towns the infection rate is nearly as high as in the larger cities, and that in the villages it is lower though considerable.

It can be safely estimated that there are at least 500,000 deaths from tuberculosis annually. If the ratio of 5 cases of active tuberculosis to one death from tuberculosis is accepted, there will be, at least, 2,500,000 active cases of tuberculosis in India.

A national tuberculosis survey on a sample basis has just been completed. The final report is expected to provide reliable data.

A preliminary estimate puts the incidence at 2 per cent.

The survey was conducted by the Indian Council of Medical Research in cities, small towns and villages—Hyderabad, Calcutta, Delhi, Madanapalle, Trivandrum, Patna.

The tentative findings of the survey in brief are: 1. The morbidity of T.B. varies from 7 to 30 per thousand persons in different areas; 2. The prevalence of T.B. in villages, small towns and cities is not so marked as originally expected; 3. The morbidity rates are lower for females than for males; 4. The prevalence of T.B. among the persons of the age group of 45 years and above was considerably higher than for the age group of 5 to 34 years; and 5. Bacteriologically positive cases varied from 1 to 11 per thousand persons in different areas.

The Government of India has an Adviser in Tuberculosis in its Directorate-General of Health Services. He advises the Central Government and the various State Governments on tuberculosis policy and helps in co-ordinating various tuberculosis schemes. He is also Technical Adviser to the Tuberculosis Association of India.

Prophylactic (BCG) Vaccination against tuberculosis was introduced in India in August, 1948 with the assistance of WHO. The mass campaign was started in April, 1951 and is now (Jan. 1959) in progress in all the States except the Andamans, Pondicherry and the Laccadives. Upto the end of Aug. 1958, about 11.3 crore persons had been tuberculin tested of whom about 3.9 crores were vaccinated with BCG and thus given protection against tuberculosis.

The target is to cover the whole of the susceptible population of 170 millions by 1960-61.

The contribution of UNICEF and WHO would amount to over 1.48 mln. dollars upto the

end of 1958 to cover the services of the international personnel and provision of equipment and supplies consisting of vaccination equipment and vehicles, film projectors, public address equipment, etc.

There were in Oct. 1958, 157 technicians' teams, each team consisting of one team leader (medical or non-medical) and six technicians in one team.

In furtherance of the object of introducing B.C.G. Vaccination in India, a laboratory for the manufacture of this vaccine was established by the Government of India at the King Institute, Guindy, in 1949. It supplies vaccine not only to centres in India but also to centres in South-East Asia.

In order to find out if it is possible to obviate certain difficulties experienced in the use of the liquid vaccine, a freeze drying vaccine plant for manufacturing and using dry vaccine has been installed as a pilot project.

There are at present five anti-tuberculosis demonstration and teaching centres, one each at New Delhi, Patna, Trivandrum, Madras and Nagpur. The Madras centre which was established in 1956 is beginning its career with an important research project namely the study of the role of modern tubercular drugs in the prevention of the spread of tuberculosis.

In the Second Plan it is proposed to establish ten more centres.

It is proposed to establish or upgrade about 300 TB Clinics during the Second Plan so as to have at least one Clinic in each District.

Attached to the Delhi University is the 'Patel Chest Institute' for teaching and research in T.B. and other diseases of the chest.

The needs of tuberculous children could not be attended to till recently, but now two hospitals for tuberculosis children have been established, one in Delhi and the other at Arogyavaram in Andhra State.

According to the latest available figures there are for the treatment of T.B. patients, 69 sanatoria, 71 hospitals, 300 clinics, 160 wards with a strength of 22,185 beds.

These beds are meant mostly for giving treatment. Beds for isolating advanced cases of T.B. for whom such treatment is not possible, have so far been negligible, and it is proposed to establish at least 4,000 beds for the isolation of such cases during the Second Plan period.

There are about ten After Care and Rehabilitation Centres for ex-tuberculosis patients, and it may be possible to establish 8 more rehabilitation centres during the Second Five-Year Plan period.

The Government of India have also provided for research in various aspects of tuberculosis by providing funds for the purpose to the Indian Council of Medical Research.

Various international bodies also co-operate with the I.C.M.R. in conducting this research on sound lines.

Goitre, Trachoma

The scheme for goitre control envisages estimation of the problem, the supply of iodized salts and the assessment of the results of iodine prophylaxis.

The Goitre Pilot Survey Project, Punjab, will undertake routine estimation of iodine in fortified salts. Iodized salt will be made available to the selected areas for human consumption at the same price as ordinary salt. The cost of iodination of salt will be met by the Union Government.

The Ministry of Health has appointed an Officer on Special Duty to supervise the programme.

The estimated cost is about Rs. 18 lakhs. Two field units will cover a population of 67.5 lakhs in the Second Plan period.

UNICEF assistance of 15,000 dollars was sanctioned at the UNICEF Executive Board meeting in March 1957.

The Executive Board at their meeting in September, 1955 recommended a further allocation of \$27,500 for the provision of additional equipment for the iodination of salt. It is now proposed to install at Sambhar one bigger plant capable of producing 6 tons of iodised salt per hour instead of 5 smaller plants originally proposed.

A Trachoma Pilot Project, has now been instituted at Aligarh.

Maternity

The maternal and child mortality as already indicated is high—the maternity death rate is over 12 and infant mortality about 108.

It is now recognised that Maternity and Child Welfare is an important service. Fourteen States have established posts of Assistant Director of Health Services to direct Maternity & Child Welfare Services in the States of Orissa, Assam, Delhi, U.P., Punjab, Madhya Pradesh, Bihar, Andhra, Himachal Pradesh, Kerala, Bombay, Rajasthan, Mysore and Kashmir. The Union Govt. has an officer in the Directorate General of Health Services who assists States in Maternity & Child Welfare activities.

Non-official bodies engaged in welfare work are the Indian Council for Child Welfare, New Delhi; The Kasturba Gandhi Memorial Trust; and the Indian Red Cross which has a special bureau. State bodies include Bombay Mothers and Children Welfare Society, The Bihar Mother and Children Committee.

The Central Social and Welfare Board assists the State Boards in promoting Maternity and child welfare services. As a result, a large number of agencies undertake services for mothers and children and training programmes for staffing the services with trained personnel.

The total number of maternity and child health centres has now increased to over 3,500. Besides, 750 primary health centres also provide these services.

A sum of Rs. 50 lakhs was earmarked by the Government of India in the First Five-Year Plan for establishing Maternal and Child Health Centres in rural areas of the States.

This sum was utilised by the States, and 201 Maternity and Child Welfare Units, each serving a population of 60,000 to 70,000, were established and will be brought under primary health centres when the latter are developed.

The large bulk of midwifery services in the villages will continue to be rendered by *dais* already practising in the villages. Under the Second Five-Year Plan a short six months course has been designed to orient them in modern techniques of asepsis, and make better and fuller use of their services, and provision has been made in the Plan for training 34,000 *dais*. A sum of Rs. 90 lakhs has been provided in the Plan for the purpose.

A sum of Rs. 45 lakhs has been provided in the Second Five-Year Plan to assist medical colleges to improve paediatric training so that medical personnel can, during the training receive adequate instruction in paediatrics and are better equipped to play their role in Child Health Services.

The centres earmarked for assistance are Hyderabad, Trivandrum, Bombay, Darbhanga and Agra.

The scope for expansion of services is vast. The programmes so far undertaken are effective as indicated by reduction in mortality. The maternal and infant mortality continue to show a downward trend. The former is 12 per 1,000 live births in rural areas and 6 in urban areas whereas the infant mortality is 108 per 1,000 live births.

The programme of training Auxiliary Nurse-Midwives for Community Development Projects, was launched during the year 1954.

One hundred training centres in the various States have been approved by the Government of India to undertake the training under the scheme. Two thousand two hundred and seventy-seven students have been enrolled. Of these 685 have since qualified. A total sum of Rs. 13.90 lakhs has been paid by the Central Government towards the implementation of the scheme.

Nine training centres, one each in Andhra, Kerala, Orissa, Madhya Pradesh, Punjab and two each in Madras and Rajasthan have been approved by the Government of India to undertake the scheme for the integration of Public Health with the Basic course in Nursing.

A total sum of Rs. 6.56 lakhs has been paid by the Central Government to these centres. The training in all the above 9 approved centres has since started.

It has been decided to extend the scheme for the integration of Public Health with the Basic Course in Nursing to another 10 schools during the remaining two years of the Second Five Year Plan. Proposals from the State Governments have been called for and it is expected that from the year 1959-60 the additional 10 centres will also start functioning.

DEFECTIVES

The last census of handicapped persons (blind, deaf, crippled, mentally retarded, etc.), took place in 1931. These put the number of blind at about 600,000 and the number of deaf and hard-of-hearing at 230,000.

It is estimated that today the total number of blind is about 2,000,000 and the deaf about 700,000.

There is a Training Centre for the Adult Blind at Dehra Dun to impart vocational training. It imparts training in cottage-industry-type handicrafts to about 170 adult blind. There is also a common Braille code for Indian languages known as Bharati Braille. The Central Braille Printing Press at Dehra Dun has already published several Braille books in English, Hindi and other regional languages.

There are in all 75 institutions for the blind and 44 for the deaf and 4 for the mentally handicapped. Four institutions cater for the orthopaedically handicapped children. About 2,000 blind children and adults and about 2,000 deaf children and adults receive training at these institutions.

The Government of India give scholarships to blind and deaf persons over the age of 16 in order to help them to undertake higher academic education, or professional, vocational or technical training in normal institutions of learning. Scholarships are also awarded to orthopaedically handicapped children and adults.

The number of scholarships awarded at present is 350.

In September, 1955 the Government of India appointed a National Advisory Council for the Education of the Handicapped to advise Government, to formulate new schemes, and to serve as liaison between Government and voluntary bodies.

One of the most difficult problems in the welfare of the handicapped is to secure employment for suitably trained handicapped persons. In order to deal with this problem the Government of India propose to establish a special organisation during the Second Plan period to assist handicapped persons in finding employment in the public services, industry and commerce.

Mental Diseases

The number of mental cases is about one million, mental defectives one and a half million, of psycho-neurotics about three million.

There are at present four institutions for mentally retarded children.

These are:

The Heaven School, Modi Minar, Char Bangla (near Vereeva), Bombay.

Hermini Villa, St. Andrew's Road, Bandra, Bombay 20.

School for the Training and Care of Children in Need of Special Care, Sewree Hill, Sewree, Bombay.

B.M. School of Psychology and Child Development, Ahmedabad.

At present there are 32 mental hospitals with accommodation for about 20,000 patients.

The Mysore Government Mental Hospital at Bangalore and the Hospital for Mental Diseases at Ranchi are the ones which are best equipped.

The following is a list of mental hospitals in India:

Mental Hospital, Taspur; Inter-Provincial Mental Hospital, Kanke, Ranchi; Indian Mental Hospital, Kanke, Ranchi; N. M. Mental Hospital, Thana (Bombay); Mental Hospital, Ratnagiri (Bombay); Central Mental Hospital, Yeravda; Mental Hospital, Ahmedabad; Mental Hospital, Dharwar; Mental Hospital, Baroda; Mental Hospital, Nagpur; Government Mental Hospital, Madras; Government Mental Hospital, Wafair; Government Mental Hospital, Kozhikode; Punjab Mental Hospital, Amritsar; Mental Hospital, Agra; Mental Hospital, Bareilly; Mental Hospital, Banaras; Mental Hospital, Mankunda, Calcutta; Lambini Park Mental Hospital, P.O. Tiljala, 24 Parganas; Bangi-unmad Ashram, 29-A, Vivekananda Road, Dum Dum; Mental Observation Ward, Bhawanipur, Calcutta; Mental Hospital, Jaina; Mental Hospital, Srinagar; Mental Hospital, Lashkar; Mental Hospital, Bongaiga, Indore; Mental Hospital, Bangalore; Mental Hospital, Jaipur; Mental Hospital, Jodhpur; Mental Hospital, Udaipur; Mental Hospital, Bhavnagar; Mental Hospital, Trivandrum; Mental Hospital, Trichur.

The Hospital for Mental Diseases, Ranchi which was under the administrative control of a Board of Trustees was taken over by the Government of India, with effect from the 1st June, 1954 with a view to reorganising it and making it a model centre for treatment.

The Health Survey & Development Committee in 1946 considering the magnitude of the problem of mental ill-health in India and the extent to which remedial and preventive measures should be developed, found that the provision for mental health facilities were wholly inadequate, that the mental hospitals were under staffed and no medical staff specially trained in psychiatry were available to staff the mental hospitals. Training facilities in this special field for doctors and non-medical workers were inadequate. Hence the Committee emphasised that the paramount need of India in the field of mental health is the production of an adequate number of medical and auxiliary personnel trained in the various aspects of mental health.

In view of the Committee's findings and based on the short term proposals made by Prof. Mayer-Gross, W.H.O. Consultant in Psychiatry and Dr. M. V. Govindaswamy, the Government of India in collaboration with the Government of Mysore established the All-India Institute of Mental Health at Bangalore to work in close association with the Mental Hospital, Bangalore.

The Mental Hospital, Bangalore had built up certain traditions in the matter of undergraduate and post-graduate teaching and research and hence upgraded it for the purpose.

The Institute came into being on 15th September 1954 with the appointment of Dr. M. V. Govindaswamy as its first Director.

The chief objects of the Institute are: To plan and conduct research projects and problems relating to promotion of mental health and the cure and prevention of mental diseases; To train psychiatrists, psychiatric nurses, occupational therapists and other personnel required to staff various mental hospitals and psychiatric clinics in general hospitals; To train psychologists and psychiatric social workers; To conduct survey in selected urban and rural areas on the

incidence of mental morbidity and the biological and ecological factors that are responsible for mental morbidity.

The course for the post-graduate Diploma in Psychological Medicine (D.P.M.) and Medical (Clinical) Psychology were started on 3rd January 1955. A post-graduate course in Psychiatric Nursing was also started in 1956 January.

The development of mental health services in India is envisaged at this Institute under the Second Five Year Plan, and a sum of Rs. 26 lakhs has been made available for this purpose. The chief measures contemplated as part of the plan are: To start and render assistance in the starting of Guidance and Counselling centres in selected rural and urban areas; To open psychiatric wards in general hospitals and staff them adequately with properly trained personnel; to establish Child Guidance Centres in different parts of the city; To train teachers and educate the public in the principles and methods of mental hygiene, all of which are intended to bring the problem of mental ill-health in the country under control.

PUBLIC HEALTH MEASURES

Primary Health Units form the corner-stone of the health-care policy of the Government in the rural areas.

There were 725 health units in the community development areas at the end of the First Plan.

During the Second Plan it is proposed to establish 2,000 primary health centres in the National Extension areas in the States.

State Governments also propose to convert some of the existing dispensaries into primary health units and to set up a number of secondary health units.

The Second Plan provides about Rs. 19 crores for this programme.

There is medical coverage for industrial labour through the Employees' State Insurance Scheme (See under 'Labour' for details).

The Government of India sanctioned the establishment of 27 Dental Clinics during 1956-57, 26 Dental Clinics during 1957-58 and 25 Dental Clinics during 1958-59 (upto September, 1959). 350 Dental Clinics are proposed to be established during the whole of the Second Five Year Plan period.

A Contributory Health Service Scheme for Central Government servants in Delhi and New Delhi which was introduced on an experimental basis in 1954, has been placed on a permanent footing in response to popular demand. With a view to improving the services, a re-organization and expansion programme of the scheme has been taken in hand. At present 26 static and 3 mobile dispensaries function under the Scheme and it is proposed to open 4 more new dispensaries. The strength of the medical and other ancillary staff has also been increased.

The number of Medical Officers sanctioned under the Scheme at present is 141 including 30 specialists. The Scheme has proved to be very popular and more and more persons are taking advantage of the services provided under it.

The daily average attendance in the C.H.S. dispensaries which was 4,504 during 1954, now ranges from 10,000 to 15,000 cases daily. The total attendance in the dispensaries during 1957 was 3,250,930. The expenditure incurred on the Scheme during 1957-58 amounted to Rs. 40.74 lakhs. In view of the usefulness of the Scheme there is a demand from a number of semi-Government organizations for its extension to those organizations.

The States have provided Rs. 237.24 lakhs in the Revised Plan for the development of the Public Health Laboratory Services. Out of this amount Rs. 180.54 lakhs are provided for opening new laboratories and Rs. 56.40 lakhs for expanding the existing laboratories.

The Government of India contributes 75 per cent of the non-recurring expenditure (including building expenditure) and 50 per cent of recurring expenditure. During the year 1958-59 a

provision of Rs. 8.0 lakhs has been made in the budget as the Central Government's share of the expenditure. Under the Scheme Rs. 2,18,480 was paid during 1957-58 as grants-in-aid to the States as follows (in Rs.):

Orissa 8,000; Andhra 20,500; Rajasthan 35,000; Uttar Pradesh 20,000; Kerala 8,000; Bihar 49,000; Madras 39,500; Jammu & Kashmir 9,300; Mysore 29,250; Total: Rs. 2,18,480.

The number of laboratories established is as follows. The first number refers to Principal Laboratories and the second to Regional Laboratories (1, —), Andhra (1, 7), Rajasthan (—, 10), U.P. (—, 4), Bihar (1, 6), Madras (—, 2), M.P. (1, 1), Kashmir (—, 7), Mysore (—, 4), H.P. (1, 4), Bombay (—, 1).

The Second Plan target is 15 principal and 122 regional laboratories.

Water Supply

Protected water supply is one of the most important factors in sanitation.

At the beginning of the First Five-Year Plan 128 towns with a population each of exceeding 60,000, 60 towns with population each between 30,000 and 50,000, and 210 towns with population each below 30,000 had protected water-supply.

Under the National Water Supply and Sanitation Programme Rs. 12.9 crores for urban water supply schemes and Rs. 6.0 crores for rural schemes were provided.

Upto March 1956, 194 urban water supply schemes and 54 Drainage schemes were approved for execution in 17 States and the expenditure incurred was Rs. 8.3 crores. 134 schemes for rural areas were approved in 19 States and grant-in-aid totalling Rs. 2.8 crores were sanctioned upto March 1956.

In March 1959 there were in progress 276 urban and 206 rural schemes in progress.

This programme was assisted to the extent of 6,374,830 dollars in equipment and material under the United States Technical Co-operation Mission programme.

The following sums were paid to the various States for rural and urban schemes under the National Water Supply and Sanitation Scheme in 1957-58:—

State	Schemes	
	Urban	Rural
	In lakhs of Rupees	
Andhra Pradesh ..	56.00	22.89
Assam ..	5.00	7.71
Bihar ..	89.50	3.00
Bombay ..	50.00	13.00
Jammu & Kashmir ..	5.00	2.50
Kerala ..	70.00	6.61
Madhya Pradesh ..	5.00	23.77
Madras ..	125.00	6.12
Mysore ..	102.55	26.80
Orissa ..	8.00	12.99
Punjab ..	10.00	5.00
Rajasthan ..	45.00	27.30
Uttar Pradesh ..	131.00	7.00
West Bengal ..	12.50	9.82
Total ..	714.55	174.50

Some of the Corporations in the country have been given loans for 1957-58, totalling Rs. 52.50 lakhs.

Second Plan: Central allotment for urban schemes: Rs. 30 crores. States' allotment: Rs. 23 crores for urban and Rs. 28 crores for rural.

Allotment for 1954-59: Rs. 850 lakhs for urban, Rs. 50 lakhs for Corporations, Rs. 200 lakhs for rural water supply.

INDIGENOUS SYSTEMS

The general policy of the Government is that there should be only one system—the allopathic—and that steps should be taken to eradicate quackery from the indigenous systems and put them on a more scientific basis. It is held that in any reorganized training anatomy, physiology and surgery should be part of the curriculum.

The basic reports on the subject are the reports of the Chopra Committee set up in December 1946 (to enquire into the facilities available for training and research and need for control), and the Pandit Committee set up in 1949 to work out the details concerning research in the ayurvedic and unani systems.

A Homoeopathic Enquiry Committee was also set up in 1946 November to recommend measures for the control and development of homoeopathy.

The Committee appointed by the Government of India to report on the question of establishing uniform standards in respect of education and regulation of practice of vaidyas, hakims and homoeopaths has also published its report.

Among the recommendations are: five and a half years course of study inclusive of one year's internship with at least three months training in the rural areas; all members of the medical profession whatever the system they practice should enjoy an equal status; the existing institutions should be up-graded; new text-books should be written; post-graduate study and research facilities should be available; there should be separate Directorates for ayurvedic and unani, and for the homoeopathic systems.

A committee consisting of Dr. K. N. Udupa, Surgical Specialist, Himachal Pradesh (Chairman); Mr. Kaladi K. Parameswaran Pillai, Research Professor in Ayurveda, Government Ayurvedic College, Trivandrum (Member); and Mr. R. Narasimhan, Under-Secretary to the Government of India Ministry of Health (Member-Secretary) was appointed to assess the present status of the Ayurvedic System. It presented its report on Jan. 27, 1959.

Among the recommendations are the setting up of a Central Council of Indian Medicine and a Central Council of Ayurvedic Research for planning and co-ordination.

The committee has made suggestions regarding the improvement of Ayurvedic training, research, pharmaceutical concerns and the status of Ayurvedic practitioners. The committee went into the question of the position of Ayurveda in great detail and collected valuable statistics. It is understood that the committee has observed that for the time being training in both the integrated and *shudha* Ayurvedic systems may have to continue.

The committee observes that the establishment of a Chair of Indian Medicine in modern medical colleges will definitely tend to create an interest in the Ayurvedic System of Medicine in students of modern medicine and will incidentally clear the prejudice at present existing among modern medical men against Ayurveda.

It is understood that the committee has made suggestions regarding a new method of approach in the field of research. The present research may briefly be described as diagnosis and treatment both on Ayurvedic lines. It has been suggested that research can be four-fold *viz.*, diagnosis and treatment on Ayurvedic lines, diagnosis on Ayurvedic lines and treatment on modern lines, diagnosis on modern lines and treatment on Ayurvedic lines and lastly diagnosis and treatment on modern lines as a control measure. More model post-graduate-cum-research centres have been suggested by the committee under the control of the Central as well as State Governments.

The report, it is understood, states that more than Rs. 6 crores worth of Ayurvedic medicines are being manufactured and consumed in the country today, although no standards in the matter of raw materials or in the process of preparation have been laid down so far. Remedies for these drawbacks have been suggested by the committee.

Since independence there has been an increase in the number of Ayurvedic colleges and pharmaceutical concerns and greater control over the registration of Ayurvedic practitioners. The committee feels that it is time to consolidate the position of Ayurveda on a stronger foundation. It has suggested that Government should make a clear declaration of policy in regard to the place of Ayurveda in the country for providing medical relief.

There are about 50 colleges which afford a training in the indigenous systems of medicine and about 8 in homeopathy.

Research is conducted at the School of Tropical Medicine, Calcutta; Central Drug Research Institute, Lucknow; the Drugs Research Laboratory in Jammu, and the Central Research Institute in Indigenous Systems of Medicine, the Ayurvedic Research Institute under the Thakurdatta Sharma Dharmarth Trust. There is also a Board in Bombay to promote research.

The Union Ministry of Health has published what is the first complete national pharmacopoeia of India. It gives information about the standards to be prescribed and tests to be used to establish the identity and purity of a number of indigenous medicinal preparations.

The question of the establishment of a Central Indian Medical Plants Organisation is under Government's consideration. The main functions of this organisation would be the collection, grading and systematic cultivation of wild growing medicinal plants in India.

Under the First Plan the States had an allotment of Rs. 95.23 lakhs to provide training and Rs. 1.06 crores for hospitals and dispensaries.

Under the Second Five-Year Plan, the States have provided Rs. 554.59 lakhs in their revised Plans. Rs. 62.2 lakhs have been provided for opening of new colleges of indigenous medicine and attached hospitals.

The provision for expansion of existing colleges and attached hospitals is Rs. 181.51 lakhs and Rs. 6.93 lakhs respectively. Under 'Miscellaneous Schemes' the provision for research and training is Rs. 14.17 lakhs and Rs. 6.925 lakhs respectively.

In addition to this assistance, the Centre has provided Rs. 100 lakhs for upgrading of colleges of indigenous medicine and research.

DRUGS

A Drugs Act—passed in 1940 and applied in 1947—is now in force in the whole country except Kashmir.

The Act regulates the import into, and the manufacture and distribution of drugs.

The control over import is exercised at the ports of Bombay, Calcutta, Cochin and Madras by an organisation under the Drugs Controller.

There is a Central Drugs Laboratory in Calcutta set up in 1947 under the Drugs Control Act.

A Drugs Technical Advisory Board advises the Central and States Government on technical matters.

A Drugs Consultative Committee advises on how to bring uniformity in the administration of the Act.

The Indian Pharmacopoeia Committee helps to keep the Indian Pharmacopoeia first published in 1955 up-to-date.

A National Formulary Committee constituted to prepare a list of essential drugs and their formulation has completed its task and has submitted a report to the Ministry of Health.

The Drugs and Magic Remedies (Objectionable Advertisements) Act, 1954 is in force to protect people from self-medication from magic remedies advertised in the lay press. The Act is administered by the State Government while the Rules are framed by the Central Government.

The most important step taken in the field of production was the establishment of a Penicillin Factory in the public sector. The Hindustan Antibiotic Ltd., Pimpri, went into trial production in March, 1955. Regular production of Penicillin was commenced from August, 1955. The factory has already achieved a production capacity of 22 million mega units of Penicillin.

The leader of the Soviet Expert Team on Drugs and Pharmaceuticals, Mr. A. G. Nadradae, presented a report on the development of the basic drug industry in India to Government in October 1955.

The Expert Team arrived in India in the beginning of August at the invitation of the Government of India to advise on the development of the drugs and pharmaceutical industry. The experts had discussions with an Indian technical team headed by Dr. A. Nagaraja Rao, Joint Secretary, Ministry of Commerce and Industry, and also toured different parts of the country to study the progress achieved by the Indian pharmaceutical industry.

(See article on Chemical Industry for projects arising from this).

Hormones

Two firms have installed capacities for the manufacture of synthetic hormones starting from imported intermediates. The rate of production is expected to be about 50 to 60 kgs. per annum for each of the hormones, viz. Testosterone, Progesterone, Ethisterone, etc. Two other firms have been licensed to produce about 250 kgs. of synthetic hormones.

Vitamins

Two schemes for the manufacture of Vitamin A, with a capacity of 10 m.m.u. each, have been licensed under the Industries (Dev. & Reg.) Act, 1951, and are expected to go into production by early 1959. Two firms have been licensed to take up the production of Vitamin B₁. Another scheme for the production of certain other vitamins like B₆, C, is under consideration of the Government.

Antibiotics

Messrs. Hindustan Antibiotics, as already mentioned, went into trial production in March, 1955. Regular production of Penicillin was commenced from August, 1955. The factory has already achieved production at a rate of 22 m.m.u. per annum for all sorts of penicillin. Penicillin 'V', which is also produced there, is sufficient to meet the country's requirements. They have also been licensed to take up the production of Streptomycin at a rate of 45 tons per annum.

Besides Messrs. Hindustan Antibiotics Private Limited, Pimpri, two other firms have also been licensed to produce penicillin.

Chloramphenicol, another antibiotic, is being produced by a firm in Bombay.

Two other firms in Bombay, have also been licensed to manufacture Chloramphenicol.

Chlortetracycline is produced by a firm in Bombay which has also started the production of Tetracycline.

Sulpha Drugs

A number of other firms produce sulpha drugs in the country. All these units combined together have a production capacity of about 400,000 kgs. per annum.

The Haffkine Institute also manufactures sulpha drugs and a large number of vaccines and sera.

Anti-T.B. Drugs

Messrs. Sarabhai Chemicals, Baroda, Messrs. Dumex Private Limited, Bombay and several other firms produce I.N.H. The estimated total annual production capacity for I.N.H. is 30,000 kgs.

P.A.S. is produced by Messrs. Bio-Chemical and Synthetic, Products Hyderabad, with a capacity of 60 tons per annum. Messrs. Dumex Private Limited have also been licensed to produce P.A.S. and its salts with a capacity of 60 tons per annum. Besides, two other firms are also engaged in the manufacture of P.A.S. salts.

Anti-Malarial Drugs

Chlorquin and Amodiaquin (Camoquin) are being produced in the country on a small scale. A scheme for the manufacture of another anti-malarial drug, Pyrimethamine, has also been licensed.

Quinine salts are being manufactured by the Government factories in Madras and Bengal.

Anti-Diabetic Drugs

Synthetic oral anti-diabetic drugs, like, Tolbutamide and Carbutamide, are being manufactured in the country on a small scale at present. Schemes for additional capacities have also been approved by the Government.

D.D.T. & B.E.C.

The production of D.D.T. is being stepped up from 700 tons to 1,400 tons at Hindustan Insecticides Private Limited, Delhi. A second D.D.T. factory at Alwaye in Kerala is expected to produce another 1,400 tons per annum. The present capacity for the production of Benzene Hexachloride is 3,200 tons per annum.

Anti-Leprosy Drugs

Three firms have installed capacities for the production of anti-leprosy drugs, namely, D.D.S. and its derivatives, with a capacity of 7,500 kgs. per annum.

Surgeons' Requisites

Two firms have been licensed under the Industries (Development and Regulation) Act to produce surgical and medicated adhesive tapes, plasters, bandages, sutures etc. The interim manufacture of such items has already been undertaken.

FAMILY PLANNING

The total expenditure during the First Five-Year Plan comes to Rs. 15.82 lakhs, i.e. about 24 per cent of the total provision, Rs. 65 lakhs.

During the First Plan Period efforts were directed to the building up of an active public opinion in favour of family planning and promotion of family planning advice and service on the basis of existing knowledge. Demographic as well as medical and biological studies were also carried out.

The allotment during the Second Plan is Rs. 497 lakhs and the total budget provision during 1956-57, 1957-58 and 1958-59 is Rs. 101 lakhs.

The amount sanctioned upto Jan. 1959 by the Central Government was Rs. 41.41 lakhs.

Four thousand nine hundred and twenty-three (4,923) persons were operated on for vasectomy during 1956, 7,423 for sterilization, and 87,464 women were treated for contraception.

It is estimated that about 30 lakhs of couple were contacted, 6.5 lakh couples on their own.

All contraceptives are distributed at the clinics in rural and urban areas free to people whose monthly income is less than Rs. 100, at half price to people with monthly income between Rs. 100 and Rs. 200, and at cost price to people whose monthly income is more than Rs. 200. In addition sheaths and foam tablets are distributed free to all in the rural clinics.

Training Programme includes:—A centre for potential instructors established in Bombay in March, 1957; A rural Training, Demonstration and Experimental Centre developed in Ramnagar as from August, 1957; A pilot touring training team formed by the Family Planning Association of India, Bombay with financial assistance from Central Government and 10 additional touring teams to be formed in the near future; One training centre each for welfare workers in Andhra Pradesh, Kerala, Bombay, Uttar Pradesh and West Bengal; Development of 42 well established urban clinics into Regional Training Centres; Conducting ad-hoc training courses wherever facilities exist; Incorporation of Family Planning in normal teaching programmes in training Institutions for doctors and medical auxiliaries.

Sixty-seven persons were trained in family planning methods during the First Plan Period. During the Second Plan 1,093 persons had been trained upto September, 1958.

Education programme includes:—Scheme to collect detailed knowledge of the factors which are responsible for community attitudes, beliefs and behaviour pattern; Identification of natural

groups and natural group leaders and use of these as a channel of communication; Preparation and testing of basic materials and methods for mass communication; community education; imparting specific technical knowledge and skills, training a corps of competent workers.

Ninety thousand posters and pamphlets were printed during the First Plan period. 3,90,000 posters; 1,10,000 pamphlets; 1,60,000 folders on various aspects of family planning have been published during the Second Plan period. These are distributed free to the States, local bodies and voluntary organizations conducting family planning clinics. Exhibitions are held in a number of places. Films are distributed and radio programmes broadcast.

Research programme includes study of human fertility and its control and population problems.

Twenty-five Medical, Biological and Demographic Research Programmes were supported at a cost of Rs. 12.71 lakhs.

Medical and biological research includes development of ideal contraceptives.

Research in contraceptives is in progress at the All India Institute of Hygiene and Public Health, Calcutta, Indian Cancer Research Centre, Bombay and Pharmacology Department, Lucknow University.

Family Planning Officers are being appointed at State headquarters. Full time Family Planning Officers have been appointed in the States of Andhra, Kerala, Madras, Mysore, Punjab, Rajasthan, Uttar Pradesh, and West Bengal. The M.C.H. Officer in Assam, Bihar, Himachal Pradesh, Jammu and Kashmir are looking after the work of family planning in the respective States. The work of family planning in Delhi is being looked after by the Assistant Deputy Health Officer of the Delhi Corporation. In Bombay State the post is temporarily held by a part-time officer.

The following steps were proposed to be taken by Government to popularise Family Planning during the remaining period of the Second Five-Year Plan: (i) to integrate as early as possible Family Planning Service with medical and health services of the country; (ii) to provide training centres for family planning in medical teaching institutions and schools of social sciences; (iii) to appoint Family Planning Education Leaders; (iv) to start Family Planning Training Touring Teams and orientation camps; and (v) to make all out efforts to be self-sufficient in the matter of supply of contraceptives by producing all kinds of contraceptives in the country.

AUXILIARY WORKERS

In order to meet extreme shortage of doctors in the country as a whole and particularly in the rural areas, it was proposed to introduce a new type of Auxiliary Medical and Public Health Worker.

He would not be entrusted with diagnosis and treatment of diseases beyond what is necessary as a part of ordinary first-aid work, and the training should be such as to enable him to assist the health authorities, in as large a measure as possible, in preventive measures including sanitation, health education, etc. The syllabus of training throws more emphasis on the preventive aspects of the training, rather than the curative side.

During training it was proposed to give the trainees free lodging and a stipend of Rs. 50 p.m.

The Government of India have approved the establishment of training centres at the following institutions:— Public Health Institute, Patna (Bihar), Medical College, Vithakapattam (Andhra), S.M.S. Medical College, Jaipur (Rajasthan).

NURSING

At the end of the year 1957 there were 28,470 registered nurses and 31,412 registered midwives, 939 registered health visitors and 587 auxiliary nurse-midwives. The total number of qualified health visitors in India on 31st Dec. 1957 was over 1,700. Separate figures for urban and rural areas are not available.

The Health Survey and Development Committee recommended that there should be a ratio of one nurse to 500 of population, and one midwife for every 100 births. On this basis, the total requirements for nurses would be 7,00,000 and 1,60,000 midwives for the present number of births in the country.

The Second Plan targets were: Nurses 31,000; Midwives 32,000; Health Visitors 3,200; dais and nurse-dais 41,000.

The number of nurses and midwives available in India falls far short of actual requirements. In order to meet the increasing demand for health personnel in connection with the expansion of health programmes under Community Development Projects a scheme for the training of about 6,000 additional auxiliary nurse-midwives has been included in the Second Five-Year Plan at an estimated cost of Rs. 69 lakhs to be shared by the Central and State Governments concerned.

635 auxiliary nurse-midwives have been trained under this programme and Rs. 12.9 lakhs have been expended under this scheme upto March 1958.

Training in nursing is offered in centres attached to almost all large hospitals. The Nursing Colleges at Delhi and Vellore offer a higher basic course leading to a B.Sc. degree in nursing.

The number of training institutions for nursing personnel and of students under training at the end of 1957 were as follows (The second figure gives the number of trainees):—

Nurses: 198—8,500; Midwives: 249—3,300; Health Visitors: 18—629; Auxiliary Nurse-Midwives: 89—2,000.

The training of health visitors is being given at 21 Schools for Health Visitors. About 1,000 students are under training at present. To double the number of students under training the Lady Reading Health School, Delhi, under the Central Government and 8 other Health Schools in the States have been expanded.

Over 1,700 trained lady health visitors will be available during the Second Plan period to staff maternity and child welfare centres—one of the most vital needs for the provision of adequate health protection to rural population—under the Community Development Programme.

In addition to the above, the nurse-midwives are being given a short course in public health nursing at the Sirur Health Unit, Poona, the Health Unit, Singur, and in Bihar and Madhya Pradesh, and are employed in place of Health Visitors. Upto March, 1958, 264 nurse-midwives qualified from the Health Unit in Sirur.

FIVE-YEAR PLANS

The total provision for Health schemes in the First Five-Year Plan was Rs. 140 crores: Rs. 101 crores were provided by the States and Rs. 39 crores by the Centre. During the period 1951-54 expenditure on medical and public health amounted to Rs. 105.46 crores which is about 75 per cent of the planned outlay.

The progress under broad heads of development is given below.

Rs. 30 crores were provided by the States in their plans for water supply and sanitation of which Rs. 14 crores were meant for rural and Rs. 16 crores for urban areas.

For the urban areas 196 water supply and 58 sewage schemes were sanctioned. The total amount of money sanctioned was Rs. 12.80 crores and the money paid was Rs. 8.3 crores. The number of water supply schemes actually taken in hand was 187 and of sewage schemes 42 in March 1956.

In the rural areas 124 schemes were sanctioned. The total amount of money sanctioned was Rs. 5.8 crores, and the money paid Rs. 2.8 crores upto March 1956.

The urban programme has been more successful than rural, but even here some of the schemes were just getting started and the majority only about 40 to 50 per cent complete in March 1956.

During the First Plan the number of doctors went up by 11,000, of nurses by 5,000, of midwives by 5,000 and of health assistants by 500.

It is calculated that at the end of the Second Plan the country would still be short of 850 doctors.

It is expected that at the end of the Second Plan the number of institutions for medical treatment is likely to be about 12,600 and of beds about 1,85,000, being an increase of about 25 per cent and 24 per cent respectively. A sum of Rs. 45 crores has been provided for this purpose.

Adequate health protection to the rural population is the most outstanding feature of the Second Five Year Plan programme—the establishment of more primary health units in as many development blocks as possible. The primary health centre is the cornerstone of the health-care organization of the rural population. While 725 health units were set up in the First Plan, it is hoped that with a provision of about Rs. 23 crores, 3,000 health units will be started in the Second Plan.

The State Governments opened 184 and 326 primary health centres during 1956-57 and 1957-58 respectively with the help of ad hoc grants from the Centre.

In the Second Plan a sum of Rs. 130 crores is set apart to ensure water supply in urban areas under the National Water Supply and Sanitation Programme.

Two hundred and seventy-five schemes estimated to cost Rs. 55.8 crores are under execution. Nine water supply and drainage schemes costing about Rs. 634 lakhs are being executed by Corporations. For rural areas, the States have been allotted a sum of Rs. 23 crores and till March 1958, the Union Government incurred an expenditure of about Rs. 260 lakhs in this direction. The number of schemes in hand is 136, and their total cost is about Rs. 1,487 lakhs.

Arrangements have also been made for training public health engineers, overseers, sanitary inspectors for which a sum of Rs. 50 lakhs is earmarked in the Plan.

There are only about 700 dental surgeons in the country. The six dental colleges that exist are not properly staffed, equipped or housed. It is, therefore, intended as a first step to raise the dental colleges to the required standard and to double the number of admissions. Andhra, Bihar, Madhya Pradesh, Punjab and Kerala have plans to open new dental colleges in the Second Plan while West Bengal has provided for the expansion of existing colleges. The provision for dental education in the Plan is Rs. 2 crores.

Other schemes include dental clinics in district hospitals, development of public health, laboratory services and school health service and school feeding.

Fifty-four dental clinics in various States were sanctioned by the Government of India during 1954-55 against the Plan target of 850.

Funds have been set apart in the 1958-59 Budget for launching a pilot project under the scheme for school health services, including school nutrition service.

About the utilisation of funds, against the total Plan allocation for each State, it was officially estimated that one State would have used over 50 per cent by the end of this financial year, four over 40 per cent, five between 30 and 40 per cent and the rest less than 30 per cent.

The overall average of utilisation of provision made in the Central Plan for assistance to the States for various schemes was 49 per cent, ranging from 4.5 per cent to 74 per cent.

MEDICAL EDUCATION

There were at the end of 1947, 45 medical colleges with an admission capacity of 4,100.

The Second Plan underlines the expansion of facilities for medical education. Admissions have gone up from 2,500 in 1950-51 to 3,750 in 1957. About 15,500 doctors are expected to qualify during the Second Plan period, adding

to the present strength of 70,000 against the country's estimated requirement of 90,000. A provision of Rs. 20 crores has been made for this purpose.

There are six dental Colleges in the country and 700 dental surgeons.

Below we give a list of medical and dental colleges:

The Andhra Medical College, Vishakhapatnam.
The Assam Medical College, Dibrugarh.
The B. J. Medical College, Ahmedabad.
The B. J. Medical College, Poona.
The Baroda Medical College, Baroda.
The Christian Medical College, Ludhiana.
The Christian Medical College, Vellore.
The Darbhanga Medical College, Laharsai (Bihar).
The Gajra Raja Medical College, Gwalior.
The Grant Medical College, Bombay.
The Gunter Medical College, Gunter.
Karnatak Medical College, Hubli.
The Kasturba Medical College, Manipal (South Kanara Dt., Mysore State).
The Lady Hardinge Medical College for Women, New Delhi.
The Madras Medical College, Madras.
The Mahatma Gandhi Memorial Medical College, Indore.
The Medical College, Kanpur.
The Medical College, Ranchi.
The Amritsar Medical College, Amritsar.
The Calcutta Medical College, Calcutta.
The Medical College, Mysore.
The Nagpur Medical College, Nagpur.
The Government Medical College, Patiala.
The Trivandrum Medical College, Trivandrum.
The National Medical Institute, Calcutta.
The Niranjan Sarkar Medical College, Calcutta.
The Osmania Medical College, Hyderabad.
The Prince of Wales Medical College, Patna.
The R. G. Kar Medical College, Calcutta.
The Medical College, Agra.
The Sawai Man Singh Medical College, Jaipur.
The Seth G. S. Medical College, Bombay.
The Srim Chandra Bhang Medical College, Cuttack.
The Stanley Medical College, Madras.
The Topiwala National Medical College, Bombay.
The Medical College, Bangalore.
The Gandhi Medical College, Bhopal.
The Jabalpur Medical College, Jabalpur.
The Jammagar Medical College, Jammagar.
The King George's Medical College, Lucknow.
The Madurai Medical College, Madurai.
All-India Institute of Medical Sciences, Saffdarjung, New Delhi.
Aurangabad Medical College, Aurangabad (Bombay).
Medical College, Kurnool (Andhra).
Medical College, Pondicherry.
The Gandhi Medical College, Hyderabad.
The Medical College, Kozhikode.
The Bankura Samadilal Medical College, Bankura (W. Bengal).
The Maulana And Memorial Medical College, New Delhi.
Kakinada Medical College, Kakinada.

Medical Schools
The Arya Medical School, Ludhiana.
The University Medical School, Bangalore.

Dental Colleges
The Calcutta Dental College, Calcutta.

The Dental College, Amritsar.
The King George's Medical College (Dental Wing), Lucknow.
The Madras Medical College (Dental Wing), Madras.
The Nair Hospital Dental College, Bombay.
The Sir Currimbhoy Ibrahim Memorial Hospital and Dental College, Bombay.
Government Medical College (Dental Wing), Patiala.

Others
The All-India Institute of Hygiene and Public Health, Calcutta.
The College of Nursing, Delhi.
The Malaria Institute of India, Delhi.
The School of Tropical Medicine, Calcutta.
Sri Vallabhbhai Patel Chest Institute, Delhi.
All-India Institute of Mental Health, Bangalore.

AYURVEDIC AND UNANI INSTITUTIONS

Below we give a list of Ayurvedic institutions (it is not an exhaustive list):

Ayurvedic College, Gushati, Assam.
Gopabandhu Ayurvedic Institute, Puri, Orissa.
The Asada Tibbia College, Bhopal.
Shri Narain Prasad Awasthi Ayurvedic School, Raipur (M.P.).
Ayurvedic Vidyalaya, Jammagar, Saurashtra.
Ayurvedic Medical School, Bhavnagar, Saurashtra.
Govt. Ayurvedic College, Gwalior (M.P.).
Shri Raj Kumar Singh Ayurvedic College, Indore (M.P.).
Nizam's Tibbi College, Hyderabad.
Govt. Ayurvedic College, Hyderabad.
Govt. Aided S.Y.N.A. Ayurvedic College, Bhagalpur, Bihar.
Govt. Ayurvedic College, Patna.
Govt. Tibbi College, Patna.
Ayodhya Shiva Kumari Ayurvedic College, Boganur, Monghyr, Bihar.
Ayurvedic Vibhag Vidyalaya, Patiala.
Shri Dhanwantri College, Sangur, Punjab.
Shri Ayurved Vidyalaya, Barnala, Punjab.
Shri Venkateswara Ayurvedic Kalasala, Vijaywada, Krishna District, Andhra Pradesh.
Shri Ram Mohan Ayurvedic College, Gunter.
Aryavaidyapattasala, Kottakkal, Kerala.
The Venkataramana Dy & Ayurvedic College, Mysore, Madras.
College of Indigenous Medicine, Kilpank, Madras.
Madhava Memorial Ayurvedic College, Cannanore.
Keralasaya Ayurvedic Mahapatasala, Shoranur.
Akhila Travancore Siddhamruth, Kalluore & Siddha Medical Training College.
Govt. Ayurvedic College, Trivandrum.
J. S. Maha Gujarat Ayurvedic Medical College, Nadiad.
Shri Oshhavi N. Ayurvedic Mahavidyalaya, Surat.
Ayurveda Mahavidyalaya, Poona.
Aryanga Vaidyak Mahavidyalaya, Satara City.
Ayurveda Vidyalaya, Jammagar.
R. A. Fodor Medical College (Ayurvedic), Worli, Bombay.
Ayurved Mahavidyalaya, Ahmednagar.
Jamini Bhushan Ashtanga Ayurved Vidyalaya (College), Calcutta.
Vishvanath Ayurvedic Mahavidyalaya (College), Calcutta.
Shyamadar Vaidya Shastrapith (College), Calcutta.
Govt. Ayurvedic College, Jaipur.
Maharaja Ayurvedic College, Udayapur.

Rajputana Ayurvedic & Unani Tibbi College, Jaipur.
Dayanand Ayurvedic College, Amritsar.
Govt. Ayurvedic & Unani College, Mysore.
Ayurvedic College, Hindu University, Banaras.
Ayurvedic College, Lucknow University, Lucknow.
Ayurvedic College, Gurukul University, Kangri.
Ayurvedic College, Gurukul Vrinadaban, Distt. Mathura (U.P.).
Budolkhand Ayurvedic College & University, Jhansi.
Rishikul Ayurvedic College, Harwar.
Lalit Hari Ayurvedic College, Filibhit.
Kanya Kumbha Ayurvedic College, Lucknow.
Ram Sahai Ayurvedic College, Meerut.
Lekh Ram Ayurvedic College, Dorli (Distt. Meerut), (U.P.).
Ayurvedic College, Dehra Dun.
Arjuna Ayurveda Vidyalaya, Banaras.
Baldeo Ayurvedic College, Baragon, Banaras.
Ayurvedic College, Farrukhabad.
Narendra Vidya Mandir, Kirooli (Distt. Agra).
Moolchand Rastogi Ayurvedic College, Lucknow.
Uttra Khand Vidyapith Vidyalaya, Guptakashi (Distt. Garhwal).
Tibbia College, M.U., Aligarh.
Takmil-ul-Tib College, Lucknow.
Unani Medical College, Himmat Ganj, Allahabad.
Tibbia College, Saharanpur.
Darshanand Ayurvedic College, Banaras.
Shiv Ganga Ayurveda Mahavidyalaya, Madhubani, Bihar.
The Suddha Ayurved Vidyalaya, Sion, Bombay.
The Funarvasu Ayurved Vidyalaya, Bombay.
The Ashtang Ayurved Mahavidyalaya, Poona.
The Karnatak Ayurved Vidyalaya, Belgaum, Mysore.
The Suddha Ayurved Vidyalaya, Hubli.
The Suddha Ayurved Vidyalaya, Nasik.
The Suddha Ayurved Vidyalaya, Bilapur.
Vidarbha Ayurveda Mahavidyalaya, Amravati.
Government Ayurvedic College, Raipur.
Bidyabhushan Sanskrit College, Bolangir, Orissa.
Sanskrit College, Parlakimedi, Orissa.
Sada Siv Sanskrit College, Puri, Orissa.
Dayanand Ayurvedic College, Jullundur.
Ayurvedic College, Sikar.
Ayurvedic College, Bikaner.
Gurukul Vishwa Vidhyalaya, Virmadaban.
State Ayurvedic College, Lucknow.
Nabadwip Ayurvedic College, P.O. Nabadwip, District Nadia, West Bengal.
Vaidya Sastrapith Parasad College, Calcutta.
Ayurvedic Sewak Sangh Vaidyak Pathshala, P.O. Contal, Midnapore.
Banwari Lal Ayurvedic Vidyalaya, Delhi.
Jamia Tibbia College, Delhi.
Dharma Samaj Sanskrit College, Munshargarh, Bihar.
Shudha Ayurved Vidyalaya, Malbipole, Baroda.
Shri Ayurved Mahavidyalaya, Samanvaya Ragnalaya Mahal, Nagpur.
Ayurved Medical College, Nanded, Bombay.
Radhakrishan Toshniwal Ayurved Mahavidyalaya, Akola.
Government Ayurvedic College, Dabala.
Birja Sanskrit (Ayurvedic) College, Filani.
Meerut Ayurvedic College, Nanchandi, Meerut.
Ayurvedic College, Atarra, District Bandi.
Mahila Ayurvedic College, Meerut.
Divedi Ayurvedic College, Kanpur.

Ayurvedya Partisthan, 123, Hariash Mookerjee Road, Calcutta-26.

Dayanand Ayurvedic Kanaya Mahavidyalaya, Delhi.

Government College of Indian Medicine, Mysore.
Taranath Ayurveda Vidyapeetha, Bellary (Mysore).

SPECIAL TRAINING

Post-graduate medical education facilities are now available at the following institutions:

1. Osmania Medical College, Hyderabad—M.D.; M.S.; D.G.O.; D.O.; Dip. Anaesthesia.
2. Grant Medical College, Bombay—M.D. (medicine, pathology, midwifery, gynaecology, pediatrics, T.B., pharmacology); M.S. (gen. surgery, ophthalmology, E.N.T., orthopaedics); D.F.H.; D.M.B.E.; D.F.M.; D.A.; D.V.D.; M.Sc. (biochemistry); M.Sc. (microbiology); M.Sc. (medical); Ph.D. (Biochemistry, Microbiology); M.Sc. (Med.); Ph.D. (Med.).
3. College of Physicians and Surgeons, Bombay—D.O.M.S.; D.A.; D.D.V.; D.P.B.; D.G.O.; F.C.P.S.; D.P.M.; D.C.H.; D.O.B.L.; D. Ortho.
4. Topiwala National Medical College, Bombay—M.D. (Medicine, pathology, bacteriology, obstetrics, gynaecology, pediatrics); M.S. (surgery); B.Sc. (medical); D.A.; D.P.M. Also diplomas of the College of Physicians and Surgeons.
5. B. J. Medical College, Poona—M.D. (medicine); M.D. (midwifery, gynaecology); M.D. (pathology); M.D. (pharmacology); M.S. (surgery). Also diploma courses of the College of Physicians and Surgeons.
6. B. J. Medical College, Ahmedabad—M.D. (medicine); M.S.; M.C.P.S.; B.Sc.; M.Sc. (Medical); D.P.B.; D.Ana.; D.D.V.; D.O.M.S.; D.G.O.; D.C.H.; D.O.B.L.; F.C.P.S.; F.R.C.S.
7. Medical College, Nagpur—M.D. (medicine); M.S. (surgery); M.O. (obstetrics, gynaecology); M.Sc. (medical, anatomy, pharmacology, physiology, pathology, bacteriology); M.B.; M.O.; D.O.; Ph.D.
8. Stanley Medical College, Madras—M.D. (gen. medicine); M.S. (gen. surgery); M.Sc. (anatomy, physiology, pharmacology); Ph.D. (anatomy); D.G.O.
9. Christian Medical College, Vellore (Madras State)—M.D. (medicine, pathology); M.S. (gen. surgery); D.G.O.; T.D.D.; M.Sc. (Pharmacology); M.Sc. (Anatomy).
10. Seth G. S. Medical College, Bombay—M.D.; M.S.; D.A.; D.M.B.E.; D.V.D.; M.Sc.; Ph.D.; D.F.H.
11. Medical College, Amritsar—M.S.; D.T.D.; D.O.M.S.; B.Pharm; M.D.
12. S. M. S. Medical College, Jaipur—M.D. (medical, pathology, bacteriology); M.S. (surgery, ophthalmology); M.Sc. (anatomy, physiology, pharmacology); Ph.D.; D.Sc.
13. All-India Institute of Hygiene and Public Health, Calcutta—D.P.H.; L.P.H.; D.M.C.W. (Dip. in Maternity and Child Welfare); certificate in Maternal and Child Health; Dip. Diet; D.I.H.; Dip. in Nutrition; D.Sc. (Public Health);

D.N.; M.E. (P.H.); Certificate courses in Public Health, Nursing, Biometry Technique; Nutrition, Lab. technique, Industrial hygiene, etc.

14. Calcutta School of Tropical Medicine, Calcutta—D.T.M. & H.; L.T.M.; D.C.F.

15. R. G. Kar Medical College, Calcutta—D.G.O.; D.O.M.S.; D.A.

16. Medical College, Agra—M.D.; M.S., D.C.H.; D.O.M.S.

17. Medical College, Lucknow—M.D. (medical, pathology, physics, forensic medicine, social med. and pub. health, pharmacology, tuberculosis, radiology); M.S. (surgical, ophthalmology, obstetrics, gynaecology, anatomy, orthomology, surgical, E.N.T.); D.M.B.E. (medical, radiology and electricity); D.L.O. (laryngology, otology); D.T.D. (tuberculosis); D.O.M.S. (ophthalmic, medicine and surgical); D.G.O. (gynaecology, obstetrics); D.C.F. (clinical pathology); D. Orth. Sur. (orthopaedic surgery).

18. Institute of Ophthalmology, Aligarh Muslim University, Aligarh—D.O.

19. Lady Hardinge Medical College, New Delhi—M.D. (medicine, pathology, obstetrics, gynaecology); M.S.; M.Sc.

20. Vallabhbhai Patel Chest Institute, Delhi—D.T.D.

21. Medical College, Baroda—M.S.; M.D.; D.Ped.; D.O.; D.V. & D.; D.A.; D.M.B.E.; T.D.D.; D.L.O.

22. All-India Institute of Mental Health, Bangalore—D.P.M.; D.M.P.; D.P.N.

23. M.G.M. Medical College, Indore—M.D.; M.S.; D.C.H.; T.D.; D.O.M.S.

24. G.R. Medical College, Gwalior—M.D.; M.S.; D.M.B.E.

25. Madras Medical College, Madras—Dip. in Radiology, in Clinical Lab. Science; L.P.H.; Dip. in Maternity and Child Welfare; D.M.B.; T.D.D.

26. Barnard Inst. of Radiology, General Hospital, Madras—D.M.B.; Dark Room Technique (Certificate); Radiographers.

27. Medical College, Calcutta—T.D.D.; D.G.O.; D.O.M.S.

28. P.W. Medical College, Patna—M.S.; M.D.; D.T.D.; D.C.H.; D.O.; D.L.O.; D.A.; D.C.F.

29. All India Institute of Medical Sciences, New Delhi—Post-graduate training in Orthopaedic Surgery.

30. Andhra Medical College, Visakhapatnam—M.D.; M.S.; M.Sc.; D.G.O.; D.L.O.; D.O.D.V.; T.D.D.; D.C.H.; D.C.F.

31. Medical College, Mysore—M.Sc. (Biochemistry); T.D.D.

32. Medical College, Guntur—Post graduate studies in all Branches of M.D. and M.S.

Training in Nursing is offered, as already mentioned, in most of the hospitals. The College of Nursing, New Delhi, offers higher training in B.Sc. (Honours) course in Nursing and the following post certificate courses:—Ward Sisters course; Nursing Administration course; Sister Tutors course; Midwife Tutors course.

The School of Nursing, Christian Medical College, Vellore, provides training in B.Sc. (Nursing) course in Nursing and post-graduate course in Teaching and Supervision.

Health Visitors are trained in Bombay, Calcutta, Delhi, Hyderabad, Madras, Lucknow, Nagpur, Poona, Ludhiana, Amritsar, Visakhapatnam, Indore, Patna, Ranchi, Trivandrum, Allahabad, Bareilly, Srinagar, Khod and Rajkot.

Courses in malaria are conducted at the Malaria Institute of India.

Pharmacy

Facilities for training in pharmacy are being developed or improved in the following institutions:—

Department of Pharmaceutics, Andhra University; Department of Pharmacy, Saugor University; Department of Pharmacy, Banaras Hindu University; Department of Pharmacy, Punjab University; Department of Pharmacy, Medical College, Madras; Department of Pharmacy, Birla College of Science, Pilani; L. M. College of Pharmacy, Ahmedabad; Department of Chemical Technology, Bombay University.

The total cost of the scheme for the above institutions is of the order of non-recurring Rs. 13.5 lakhs and recurring Rs. 1.73 lakhs.

The Central Government or the University Grants Commission have agreed to provide about Rs. 9.81 lakhs of the non-recurring cost and Rs. 70,000 of the recurring cost.

When the scheme is fully implemented, facilities will be available for an annual admission of about 200 candidates for a three-year degree course in pharmacy.

The All-India Council for Technical Education has recommended that efforts should be made for developing at least one centre in each major State for training in pharmacy. Accordingly, those States which do not have such training facilities at present have been addressed by the Central Government regarding the setting up of necessary centres.

The All-India Council is also examining the question of developing facilities for training in pharmaceuticals technology in certain selected institutions which are conducting courses in chemical engineering and chemical technology.

A course of study in Pharmacy aimed at training pharmacists who will be eligible for registration under the Pharmacy Act is being provided by the following institutions:—

1. Medical College, Amritsar.
2. L. M. College of Pharmacy, Ahmedabad.
3. Birla College, Pilani.
4. D.A.V. College, Kanpur.
5. Madras Medical College, Madras.
6. Pharmacy Training Centre, Jalpaiguri.
7. Bombay College of Pharmacy, Bombay.

The pharmacy Council of India has approved, these courses of study under Section 12 of the Indian Pharmacy Act, 1948.

LABOUR

THE achievement of Independence and the emergence of India as a Republic wedded to the idea of a welfare State has made the welfare of the working classes a prime responsibility of the State. Several administrative and legislative measures of far-reaching significance have already been introduced in the country. Health, education, housing and social welfare for the masses find a prominent place in the First and Second Five Year Plans.

The general position in 1955-56 was as follows:—

Total Labour Force	129,800,000
(men 68,709,000; women 40,800,000).	
No. employed in factories coming under the Factories Act of 1948	2,882,909
No. of trade unions on register	7,845
No. of trade unions which submitted returns of membership	8,911
No. of members of trade unions submitting returns	2,225,810

The Central co-ordinating authority in India for questions connected with labour legislation is the Ministry of Labour and Employment of the Government of India with the Labour Minister in charge. The administration of matters, connected with the English and Indian Merchant Shipping Acts, the Mercantile Marine Department and Indian Seamen is with the Ministry of Transport and Communications. In respect of all the Railways, the Labour Minister is responsible for the administration of the Payment of Wages Act, 1936, trade disputes, hours of work for employees not covered by the Factories Act and regulation of employment of children. He is also responsible for regulation of labour and safety in respect of mines and oilfields; trade disputes in industries, businesses or undertakings carried on by the Central Government, and inter-State migration.

Among the more important Acts that govern labour conditions and relations in India are the following: 1. Indian Factories Act, 1948; 2. Indian Mines Act; 3. Payment of Wages Act; 4. Minimum Wages Act; 5. Workmen's Compensation Act; 6. Maternity Benefit Act (States); 7. Indian Trades Union Act; 8. Industrial Disputes Act; 9. Industrial Disputes (Appellate Tribunal) Act; 10. Shop Assistants' Act (States); 11. Employees' State Insurance Act; 12. Collection of Statistics Act; 13. Employees Provident Funds Act.

FACTORIES ACT, 1948

The Act covers all industrial establishments employing 10 or more workers and using power and establishments employing 20 or more workers and not using power. The State Governments have been empowered to apply the provisions of the Act to any premises, irrespective of the number of persons employed, where a manufacturing process is carried on with or without the aid of power, except where the work is done by the worker solely with the aid of his family.

The Act prescribes that every factory should be kept clean and free from effluvia arising from drains, privies, etc., and lays down stipulations regarding sweeping, cleaning, disinfecting, white-washing, ventilation, temperature, drinking water, latrines, etc.

In existing factories 350 cubic feet of space should be provided for every workman. In new factories to be built the space for each workman should be 500 cubic feet.

Elaborate provision regarding safety such as fencing of machinery, etc., has been laid down. Women and children are prohibited from employment on certain types of machinery.

Washing facilities for the workers, appliances for first-aid, rest shelters, canteens, etc., are prescribed under the Act. In every factory where 500 or more workers are employed the employer shall employ Welfare Officers.

Weekly hours of work have been fixed at 48 and daily hours at 9. The maximum spread-over allowed is 10½ hours. No worker shall

work for more than 5 hours before he has had an interval for rest of at least half an hour.

Payment for overtime has been prescribed at double ordinary rate of wages.

No woman shall be employed in any factory except between the hours of 6 a.m. and 7 p.m.

A weekly day of rest has also been prescribed.

No child who has not completed his fourteenth year shall be required or allowed to work in any factory. A child who has completed his fourteenth year or an adolescent (a person who has not completed his eighteenth year) shall not be allowed to work in a factory unless a certificate of fitness by a certifying surgeon is in the custody of the manager of the factory and he carries while at work a token giving reference to such certificate. No 'child' shall be employed or permitted to work in any factory for more than 4½ hours in a day or between the hours of 7 p.m. and 6 a.m.

Every adult worker who has completed a period of 12 months' continuous service in a factory (later amended, see below) shall be allowed during the subsequent period of 12 months leave with wages including dearness allowance for a period calculated at the rate of one day for every 30 days of work performed by him during the previous 12 months, subject to a minimum of 10 days. In the case of children the leave should be at the rate of one day for every 15 days of work subject to a minimum of 14 days.

It may be added here that the recent tendency for many units particularly in south India has been to allow holidays with pay in excess of the minimum stipulated.

In many awards given by Adjudicators leave with pay up to 14 days has been granted.

Where any worker in a factory contracts any disease specified in the schedule appended to the Act, the manager of the factory shall send notice thereof to such authorities, and in such form and within such time, as may be prescribed.

The administration of the Act is left to the State Governments. The Central Government have set up an advisory organisation, namely the Office of the Chief Adviser, Factories.

The Act was amended in 1954. Under this amendment eligibility for leave with pay would be 240 days' service during a calendar year. Proportionate leave will be granted to those whose service starts after the beginning of the calendar year.

The annual leave with wages will be exclusive of holidays during or immediately before or after the period of leave.

The leave can be carried forward from one calendar year to another provided the maximum does not exceed 30 days in the case of an adult and 40 days in the case of a child.

No prior notice will be necessary when a worker requires leave to cover a period of illness.

The Act permits six hours' work at a stretch without any interval when the total number of hours to be worked on any day in a shift does not exceed six.

It also permits newspaper printing presses to work their entire night shift of six hours at a stretch.

It allows a worker a maximum of 50 overtime hours in a quarter year which is deemed to have begun on the first day of January, April, July or October.

It enables continuous employment of workers in case some of the subsequent shift workers do not turn up in time.

For the purpose of computing the rate of wages of a person who takes advantage of the concessional sale of foodgrains and other articles the basis will be the maximum ration admissible to a standard family of a specific number of consumption units.

Women and children are prohibited from working in factories at night.

Women and children are also prohibited from cleaning, lubricating or adjusting any prime mover of transmission machinery while it is in motion if such work exposes them to risk of injury.

FACTORY STATISTICS

Under the provisions of the Factories Act, 1948, registered factories submit annual and half yearly returns on employment to the Chief Inspectors of Factories in the various States. All-India figures are compiled by the Labour Bureau and are published in the Indian Labour Gazette.

The number of factories on registers in the areas covered by the States during 1955 and 1956 were 30,148 and 34,274 respectively.

The following table sets out the statistics of the average daily numbers of persons employed in factories during the year 1956.

WORKERS EMPLOYED 1956.

Industry	Average Number of Workers Employed Daily
Processes allied to agriculture (Gins and Presses)	110,000
Food except beverages	252,987
Beverages	5,692
Tobacco	147,616
Textiles	1,134,360
Footwear, other wearing apparel and made up textile goods	13,105
Wood and Cork except furniture	21,310
Furniture and fixture	886
Paper and paper products	23,258
Printing, publishing and allied industries	77,496
Leather and leather products (except footwear)	19,988
Rubber and rubber products	26,309
Chemicals and Chemical products	87,033
Products of petroleum and coal	15,010
Non-metallic mineral products (except products of petroleum and coal)	106,302
Basic metal industries	102,297
Metal products (except machinery and transport equipment)	69,636
Machinery (except electrical machinery)	114,224
Electrical machinery, apparatus, appliances and supplies	24,252
Transport equipment	229,436
Miscellaneous industries	131,841
Electricity, gas and steam	27,308
Water and sanitary services	5,251
Recreation services (Cinema Studios)	3,688
Personal services (Laundries, dyeing, cleaning)	11,368
Total	2,882,909

MINES ACT

With a view to amending and consolidating the law relating to the regulation of labour and safety in mines, the Mines Act, 1952 was passed and brought into force from July 1953. The Act extends to the whole of India except Jammu and Kashmir. The Act restricts the hours of work for adults to 9 per day and 48 per week above ground and 8 per day and 48 per week below ground. Overtime work below ground should be paid for at twice the ordinary rate and above ground at 1½ times the ordinary rate. The Act prohibits the employment of children

below 15 years of age. It also prohibits the employment of women in any part of a mine which is below the ground level. Women can be employed above ground only between the hours of 6 a.m. and 7 p.m. Adolescents who have not completed 18 years of age are not allowed to work underground unless they are certified fit to work as adults. Adolescents not certified fit to work as adults should not be allowed to work for more than 4½ hours a day. Annual leave with wages for a period of 14 days in a year in the case of monthly-paid employees and 7 days in the case of weekly-paid employees and piece workers is granted to the workers. Provisions relating to health and safety are laid

down in the Act, besides which the Central Government may direct that the Health and Safety provisions under the Factories Act, 1948 shall apply to all mines and the precincts thereof.

MINING STATISTICS

Figures are published in a Monthly Bulletin which is issued by the Chief Inspector of Mines. The average daily number of workers employed in mines in 1939, 1951, 1952, 1953 and 1954 was 298,680; 546,048; 559,196; 563,968 and 568,254 respectively. The available figures are given in the following table :—

EMPLOYMENT IN MINES IN 1954

(Figures for the Indian Union)

For later figures for all-India see under 'Mines and Minerals'.

State*	Under-ground Men	Open workings		Surface		Total
		Men	Women	Men	Women	
Andhra	3,360	7,306	3,902	1,714	1,435	17,640

* Old States existing before the reorganisation on November 1, 1956.

PAYMENT OF WAGES ACT

The Act applies only to wages and salaries which average below Rs. 400 per month.

For the purpose of the Act "wages" means all remuneration capable of being expressed in terms of money and includes any sum payable under an award or settlement, any remuneration for overtime work or holidays and bonus but does not include the value of housing, employer's contributions to pension or provident funds or travelling allowance.

No wage period is to exceed one month and wages are to be paid within a prescribed time not exceeding 10 days from the end of the wage period. All wages are to be paid in coin and, or currency notes. Fines are not to exceed half anna in the rupee. Permissible deductions from wages have also been specified.

The administration of the Act, as far as factories are concerned, has been entrusted to the Inspectors of Factories in the States. In regard to persons employed in mines and in railways the responsibility of administering the Act rests upon the Chief Labour Commissioner (Central).

MINIMUM WAGES ACT, 1948

The Act covers the following industries or types of establishments. Woolen carpet making or shawl weaving; rice, flour or dal mills; tobacco manufactories (including bidi making); plantations; oil mills; employment under any local authority; road construction or building operations; stone breaking or stone crushing; lace manufactories; mica works; public motor transport; tanneries and leather manufactories; and agriculture. The appropriate Governments can extend the application of the Act to any

industry wherein, in their opinion, minimum wages should statutorily be fixed.

The Act requires the Central or State Governments, as the case may be, to fix minimum rates of wages payable to persons employed in the industries mentioned above.

The Act provides for the fixation of minimum time rates, minimum piece rates, guaranteed time rates and overtime rates appropriate to different occupations, or localities and for adults, adolescents, children and apprentices. The minimum rate may consist of a basic rate and a cost of living allowance and/or cash value of concessions or it may be an all-inclusive rate.

The Act authorises the appropriate Governments to appoint Committees and Sub-Committees to hold inquiries and advise them to fix minimum rates of wages in respect of any scheduled employment or for the revision of these rates. They may also appoint an Advisory Board for co-ordinating the work of various Committees and also to advise Government generally in the matter of fixing or revising minimum rates of wages.

The Central Government have set up a Central Advisory Board for advising the Central and State Governments and for co-ordinating the work of State Advisory Boards. The Committees and Sub-Committees as well as the Central and State Advisory Boards are to consist of equal number of representatives of employers and employees, and of independent persons not exceeding a third of the total number of members.

The Central or the State Governments, as the case may be, can fix the number of hours of work per day, provide for a weekly holiday, etc., in regard to any employment in which minimum wages have been fixed under the Act.

WORKMEN'S COMPENSATION ACT

Under the Act payment of compensation has been made obligatory on all employers whose employees come within its scope, and injured workmen or the dependents of those killed can obtain compensation in all cases where personal injury has been caused by accident arising out of and in the course of employment and where, except in the case of injury resulting in death, the accident is not directly attributable to the workman having been at the time of the accident under the influence of drink or drugs or to wilful disobedience of rules or orders or wilful disregard of safety devices.

Besides bodily injuries the contracting of certain occupational diseases such as anthrax and mercury, lead and phosphorus poisoning were deemed and treated for the purposes of compensation, as injuries caused by accident, provided however, that the worker concerned was in the service of the same employer for more than six months.

The main provisions of the Workmen's Compensation Act as it stands today are as follows:

In all cases persons employed in an administrative or clerical capacity and those whose monthly earnings exceed Rs. 400 (except Railway Servants) are excluded.

As far as seamen are concerned, those employed on ships registered in India are covered. But if accidents take place within the three mile limit of the territorial waters the Act applies even to those employed on ships not registered in India.

Not only workmen employed within the precincts of a factory or a mine but also men engaged in any kind of work incidental to or connected with a factory or any mining operation are entitled to the benefits of the Act.

Any person who is covered by the Employees' State Insurance Act, 1948, and who is entitled to receive disablement or dependent's benefit from the Employees' State Insurance Corporation is not entitled to claim any compensation from the employer under this Act.

The amount of compensation payable depends, in the case of death, on the average monthly wages of the deceased workman and in the case of an injured workman both on the average monthly wages and the extent of disablement. The term 'wages' includes overtime pay and the value of any concessions or benefits in the form of food, clothing, free quarters, etc.

The amounts of compensation payable in the case of an injured workman whose monthly wages are not more than Rs. 10 are Rs. 500 for death, Rs. 700 for permanent total, and half the monthly wages for temporary disablement. For a workman whose monthly wages are between Rs. 10 and Rs. 50, the corresponding figures are Rs. 1,000, Rs. 2,500 and Rs. 15 respectively. The maxima for persons earning over Rs. 500 per month are Rs. 4,500, Rs. 6,500 and Rs. 30 per month respectively. In the case of miners the amounts of compensation for death and for permanent total disablement are at the uniform rate of Rs. 200 and Rs. 1,300 respectively, and half the monthly wage for temporary disablement.

The interests of dependents in cases of fatal accidents have been safeguarded by ensuring that (1) all cases of fatal accidents should be brought to the notice of the Commissioner; (2) in all cases where an employer admits liability the amount of compensation payable is to be promptly deposited with the Commissioner; and (3) in cases where the employer disclaims liability and there are good grounds for believing compensation to be payable, the dependents get the information necessary to enable them to judge if they should make a claim or not.

An employer is permitted to make to any dependent advances on account of compensation not exceeding an aggregate of one hundred rupees.

The Act is administered by Commissioners appointed by State Governments. In areas in which the Employees' State Insurance Scheme has been implemented, the payment of workmen's compensation is the responsibility of the E.S.I. Corporation.

The Workmen's Compensation Act was first enacted as already mentioned in 1923 and has since undergone a number of important amendments. The basic structure of the Act, however, has remained more or less the same and a comprehensive amendment of the Act has been for long under consideration.

The basic points relating to such an amendment were: a revision of the current rates of compensation; and extension of its coverage by raising the present wage limit from Rs. 400 to Rs. 500.

These two important matters were before an Actuarial Committee, which went into the question of the financial burden any such proposal would impose on the industry. It is proposed to take up these amendments when the Committee's findings have been fully considered.

An Amendment Bill—Workmen's Compensation Amendment Bill 1956—was passed by Parliament in Feb. 1959.

The Amendment aims broadly speaking at the following:

The removal of distinction between adult and minor in the matter of compensation; the waiting period during which the worker is not entitled to compensation would be reduced from seven to five; if the disablement lasts 28 days or more there would be no waiting period; if payment of compensation is delayed more than one month from the due date an interest of 6 per cent would be levied on the employer; there would be a penal compensation of 50 per cent if the delay in payment was not justified; the time limit for filing claims would be raised from one year to two years, delays in this might also be condoned; in case of transfer of assets of factory compensation would be the first charge; failure to carry out provisions of the Act would entail a penalty of Rs. 500 as against Rs. 100; factory inspectors and mine inspectors could be authorized to file claims; the number of injuries mentioned in the schedule would be raised from 14 to 24; the definition of workman would be enlarged; the definition of establishments to which the Act refers would also be enlarged; the schedule relating to occupational diseases would also be amended.

STATISTICS

An annual note on the working of the Act is published regularly in the *Indian Labour Gazette*.

The latest available statistics on the subject will be found in the following table:—

Year	Total number of cases	Total compensation paid
		Rs.
1947	56,574	23,26,495
1948	66,776	42,30,068
1949	60,511	32,17,168
1950	61,955	37,57,375
1951	65,123	39,06,252
1952	56,734	36,57,355
1953	61,742	41,38,330
1954	66,118	44,25,068
1955	75,793	50,57,194
1956	61,610	31,53,557

Facilities for accident insurance are now being provided by a number of leading insurance companies in the country and the most important of these are the Claims Bureau in Calcutta and Madras.

The table below shows the accident rate per thousand workers and the average compensation paid in the main industry groups during 1956.

MATERNITY BENEFIT ACT

The first Maternity Benefit Act in India was passed by the Government of the former Bombay State in 1929. After that, Maternity Benefit Acts were passed by the Governments of all the pre-reorganization Part "A" States; Hyderabad, Madhya Bharat, Mysore, Rajasthan, Saurashtra and Travancore-Cochin among Part "B" States; Ajmer, Bhopal, Delhi and Tripura among the pre-reorganization Part "C" States had similar Acts.

The West Bengal Legislature passed a separate Act in 1948 for women employed in tea-plantations under the title of the West Bengal Maternity Benefit (Tea Estates) Act, 1948.

The Government of India passed the Mines Maternity Benefit Act in 1941.

The scope, qualifying conditions and rate of benefit are not uniform under the various State Acts.

The qualifying period of service is generally 9 months.

The rate of benefit is annas eight per day in Madras and Andhra under the Acts. In the Hyderabad Act and the Mines Benefit Act the rate is Ann. 12 or average daily earnings whichever is more. In Orissa, it is the actual daily wage or salary subject to a maximum of Ann. 12 per day. The Travancore-Cochin and West Bengal (Tea Estates) Acts provide for Rs. 5-4-0 per week. Women workers on plantations in Assam receive under the Act Ann. 11 Pies 6 per day in addition to the usual food concessions and women in other industries in the State get their average weekly earnings subject to a minimum of Rs. 2. Although maternity benefit legislation does not apply to plantations in other parts of South India, the employers' associations have recommended payment of benefit on a voluntary basis at the rate of Ann. 12 per day for a period of 8 weeks.

The Mines Maternity Benefit Act and the Assam, Bihar and U.P. Acts provide for some additional benefits which take the form of free medical treatment, maternity bonus, provision of creches, additional rest intervals for nursing mothers, etc. In the Central Act for women employed in mines and in the U.P. and Bihar Acts, an additional bonus of Rs. 3 and in Rajasthan Rs. 5 is paid if the woman avail themselves of the services of a qualified mid-wife. But if such assistance is provided by or in an institution of an employer, the bonus is not paid.

The U.P. and Bihar Acts lay down that factories employing 50 or more women or where women employed form 25 per cent. or more of the workers, should maintain creches, and appoint female attendants to look after the children.

The administration of the Acts in the States is the responsibility of the Factory Inspectors. The enforcement of the Mines Maternity Benefit Act in the coal mines is the responsibility of the Coal Mines Welfare Commissioner. In other mines, it is administered by the Chief Inspector of Mines.

MATERNITY BENEFIT IN THE VARIOUS STATES AND MINES DURING 1956

States.	Average No. of women employed.	No. of women who claimed maternity benefit	No. of women who were paid maternity benefit in full or in part.	No. of cases in which a bonus was given or maternity benefit was paid for miscarriage or death.	Total amount paid.
					Rs.
Andhra	64,416	690	628	8	13,047

The INTUC figures are as on Feb. 1956, the AITUC for March 1956, the HMS for March 1955 and UTUC for March 1958. The figures were supplied by the parties: they are not official figures.

TRADE UNIONS ACT, 1926

This Act was brought into operation with effect from 1st June 1927 and was slightly amended in 1928.

Apart from the necessary provisions for administration and penalties, the Indian Trade Unions Act, 1926, makes provision for three matters: (1) conditions governing the registration of trade unions; (2) the obligations to which a trade union is subject after registration; and (3) the rights and privileges accorded to registered unions. 'Trade Union' has been defined in such a way as to cover both combinations of workers and of employers but not of workers and employers. Persons under the age of 15 are debarred from membership of any registered union.

The administration of the Act is entirely on a State basis and each State Government is required to appoint a Registrar of Trade Unions. Any seven or more members of a union can apply for registration but no union can be registered unless at least fifty per cent of the executive consist of members actually engaged in the unit or group of units which the union proposes to cover.

The general funds of registered trade unions cannot be spent on objects other than those specified in Section 15 of the Act nor on political objects; but the Act makes provision for the creation of a separate political fund, subscription to which may be collected from such members as voluntarily desire to contribute to it. All registered unions are required to submit annually to the Registrar duly audited statements of accounts in prescribed forms together with changes in officers and the executive and a copy of the rules corrected up to date.

A registered trade union is immune from prosecution for criminal conspiracy in respect of an agreement, unless it is one to commit an offence, made between its members for the furtherance of a trade dispute or for restraint of trade and from any legal difficulties arising therefrom.

INDUSTRIAL DISPUTES ACT

The Act provides for the setting up of two types of organizations, namely, (1) Works Committees and (2) Industrial Tribunals for the prevention or settlement of disputes. It makes conciliation compulsory in all disputes in public utility services and optional in other cases.

Section 22 of the Act declares any strike or lock-out in a public utility service to be illegal if it is commenced or declared (i) without giving to the employer or employees, as the case may be, a notice of strike or lock-out in a prescribed manner, within six weeks before striking or declaring a lock-out, or (ii) within 14 days of giving such notice, or (iii) before the expiry of the date of strike specified in any such notice; or (iv) during the pendency of any conciliation proceedings before a conciliation officer and 7 days after the conclusion of such proceedings, etc. The Act also prohibits certain other strikes and lock-outs and declares them illegal if commenced or declared during the pendency of (i) conciliation proceedings before a Board and 7 days after the conclusion of such proceedings; (ii) proceedings before a Tribunal and 3 months after the conclusion of such proceedings; or (iii) during any period in which a settlement or award is in operation, in respect of any of the matters covered by the settlement or award.

The Act was amended once in 1946 and twice in 1950. It now provides that no workman, who has been in continuous employment for more than a year, shall be retrenched unless he has been given a month's notice or wages in lieu thereof and also compensation calculated at the rate of 15 days' average pay for every completed year of service. If a workman who has put in more than a year's continuous service is laid off, he is required to be paid compensation which should be equal to 50 per cent. of the total of basic wages and dearness allowances for a maximum of 45 days in a year unless periods of lay-off after the first 45 days are of the duration of one week or more on each occasion.

According to a decision of the Supreme Court in November 1946 on retrenchment compensation, workers cannot, under the Act, claim compensation for retrenchment in case of bona fide closure of business or termination of their services by the employer on the business being sold to another employer.

The definition of the term "workman" has been extended to cover technical personnel and supervisory staff drawing upto Rs. 500 per month.

The machinery for adjudication of disputes has been reconstituted and a three-tier machinery consisting of National Tribunals, Industrial Tribunals and Labour Courts is brought into being. Functions of these tribunals are demarcated and the importance of the dispute will determine which tribunal should adjudicate upon it. The tribunals are authorised to appoint experts having special knowledge as assessors to advise them. Schedules covering subjects which should go before each tribunal are attached to the Act.

Every employer who proposes to effect any change in the conditions of service of his workmen in respect of wages, hours of work, rationalisation, shift-working, increase or reduction in complement, etc. is required to give 3 weeks' prior notice to the workmen concerned.

The Act also provides for voluntary reference of disputes to arbitration by agreement between the employer and the workmen. Such a reference may be made to the Tribunals constituted under the Act.

All State Acts relating to the settlement or adjudication of disputes are expressly saved and the Industrial Disputes Act will not override them.

STATISTICS

A decrease of 26.7 per cent in time-loss due to industrial disputes in the country was recorded during 1957.

Also during the year, a maximum number of disputes terminated as a result of Government's intervention i.e., by conciliation or mediation.

The average duration of a dispute also declined to 7.8 days from 9.8 in 1956.

Sixty-one per cent of the total time-loss occurred in the manufacturing sector as compared to 70 per cent in the previous year. In this sector, time-loss recorded by cotton mills was nearly 57.9 per cent of the total as against 41 per cent in 1956. Next in order came Jute mills (10.6 per cent), Engineering (9.7 per cent) and Iron and Steel (8.7 per cent). Mining and quarrying also recorded a considerable time-loss during the year, accounting for nearly 18.9 per cent of the total time-loss in all industries.

About two-thirds of the disputes did not last more than 5 days. Among these, there were a large number of strikes lasting 'a day or less'. Only 7.1 per cent of the disputes lasted more than 30 days.

Nearly 25 per cent of the disputes during 1957 were unsuccessful from the point of view of employees, 30 per cent were decided in their favour and another 15 per cent resulted in their favour partially. In a little over 20 per cent cases, workers resumed without any final decision having been reached.

The Union Ministry of Labour and Employment set up in June 1956 a tripartite committee at the Centre to evaluate the implementation of awards, agreements and settlements. This followed the recommendation made by the Standing Labour Committee that machinery for this purpose should be at different levels and should be tripartite in character.

Following the example of the Centre, several State Governments also set up machinery for evaluating implementation of labour awards, agreements and settlements.

About 400 cases of non-implementation of awards, agreements and settlements were reported to the Evaluation and Implementation Division of the Labour Ministry till Aug. 1956. Of these, 144 or, about 36 per cent, were pending in courts. Of the rest, 25 cases were settled either through the intervention of State Governments of the H. and I. Division. The remaining cases were at different stages of examination and implementation.

As regards non-implementation of labour enactments, 512 cases were reported. These were brought to the notice of the authorities concerned and action was being taken to investigate them and to secure implementation.

The following table sets out the number of disputes in some of the years since 1948, the number of persons affected by these disputes and the total time lost in man-days:

Year	Number of disputes	Number of workpeople involved	Number of man-days lost
1948 ..	1,259	1,059,120	7,337,173
1949 ..	920	685,457	6,000,595
1950 ..	814	719,853	12,806,704
1951 ..	1,071	691,321	3,515,923
1952 ..	963	809,245	3,234,961
1953 ..	772	466,607	3,283,008
1954 ..	840	477,123	3,572,630
1955 ..	1,166	527,767	5,697,845
1956 ..	1,203	715,120	6,992,040
1957 ..	1,522	666,253	5,905,083

An analysis of the disputes for the year 1957 by States is given in the following table:—

State	No. of disputes	No. of workers involved	No. of man-days lost
Andhra ..	81	21,564	2,32,360
Assam ..	25	17,402	1,15,652
Bihar ..	116	80,811	9,62,277

Classification of the disputes by causes shows that wages, allowances and bonus involved 50.3 per cent of the workers and 44.8 per cent of the man-days lost; personnel, 21.9 per cent of the workers and 19.0 per cent of man-days; leave and hours of work, 8.6 per cent workers and 1.8 per cent man-days; retrenchment, 2.7 per cent workers and 7.5 per cent man-days; others 18.9 per cent workers and 23.1 per cent man-days; not known 2.7 per cent workers and 3.0 per cent man-days.

Statistics presented in this section relate to industrial disputes which have resulted in work-stoppages involving 10 or more workers.

APPELLATE TRIBUNAL ACT, 1950

The Industrial Disputes (Appellate Tribunal) Act, 1950 was repealed by the Industrial Disputes (Amendment and Miscellaneous Provisions) Act, 1956 with effect from 1st September 1956. After that date no appeals were to be

entertained. Pending appeals were however, to be disposed of by the Appellate Tribunal as if the Act had not been repealed.

On 20th June 1956 the number of appeals pending with the Labour Appellate Tribunal was 593 of which no less than 145 were more than one year old.

By March 1959 all but one had been disposed of and it was expected that the Tribunal would cease to exist at any time.

COLLECTIVE AGREEMENTS

Some recent examples of collective agreements are given below.

The Ahmedabad Millowners' Association and the Textile Labour Association signed two collective agreements on 27th June 1955. The first Agreement provides that disputes between a member-mill of the Association and the Trade Union shall be settled by mutual negotiations and if negotiations fail by arbitration.

The second Agreement lays down the formula for grant of bonus.

The Bombay Millowners' Association and the Rashtriya Mill Mandor Sangh, Bombay also reached a similar agreement. The Bonus Agreement which was signed on 1st March 1956, was to cover the period 1952 to 1957. The pact provides for the appointment of a Commission to investigate into the requirements of industry for rehabilitation and modernisation. Finally and though this does not form a part of the Agreement, the Association has agreed to pay a sum of Rs. 50 lakhs towards industrial housing which will enable 4,000 tenements to be built.

The machinery for settlement of disputes, an agreement regarding which was signed between the parties on 18th September 1956 consists of a Committee of Assessors and a Board of Arbitrators.

There is a tendency for these agreements to be copied with appropriate changes in other centres in India.

The agreement between the Tata Iron and Steel Co. Ltd. and the Tata Workers Union reached on 8th January 1956, was to remain in force for 3 years. The most distinctive feature of the agreement is that it provides, *inter alia*, for union security, workers' participation in management and recognition of the union as the sole bargaining agent.

The Company accepts the principle of union membership security system and the collection of union dues through the pay-roll. The Union recognises the right of the Company to take disciplinary action and lay down personnel policies.

With a view to the improvement of productivity, the parties agree on the need for establishment of a standard force in each department, on the assurance that no employee will be retrenched and that if they are transferred to other jobs after training their earnings will not be adversely affected.

The agreement stipulates that a programme of job evaluation should jointly be undertaken in order to eliminate inequities in the structure of wages and other emoluments.

In a supplementary agreement reached on 6th August 1956 machinery has been devised to associate works employees with Management in the working of the industry.

A five-year Agreement between the Indian Aluminium Company Limited, Calcutta and the workers represented by the Indian Aluminium Bazar Works Employees Union was reached on the 31st August 1956.

The representatives of the planters and workmen employed in the plantations in Madras State reached an agreement on 7th January 1958 resolving all disputes relating to bonus upto the year 1954.

An agreement was reached between the Mysore Government Road Transport Department and its employees which came into force from 1st April 1957. As a result of the agreement pay scales, rates of dearness allowance and

contribution to the provident fund and the period of annual leave were revised. A Joint Committee consisting of management and the Federation of Road Transport Employees was constituted for proper implementation of the agreement.

A similar agreement was reached between the Associated Cement Companies, Bombay and the employees in six of their factories situated at Ramnagar (M.P.), Keymore (M.P.), Surajpur (Punjab), Jhinkpani (Bihar), Sindri (Bihar) and Shahabad (Mysore).

WORKING JOURNALISTS' ACT (See under article on the Press)

THE EMPLOYEES' PROVIDENT FUNDS ACT, 1952

The existing Acts under which workers get provident fund benefits are: Employees' Provident Fund Act, Coal Mines Provident Fund and Bonus Schemes Act and the Assam Tea Plantations Provident Fund Scheme Act.

The Employees' Provident Fund Act, 1952 was enacted to provide for the institution of provident funds for employees in factories and other establishments. It applies to factories employing fifty or more persons in the cement, cigarettes, electrical, mechanical or general engineering products, iron and steel, textiles (made wholly or in part of cotton, wool, jute or silk whether natural or artificial) industries.

The Scheme framed under the Act requires the employer and the employee to contribute at the rate of 6½ per cent of the basic wages and the dearness allowance. The Scheme which was enforced on 1st November 1952 applies to employees whose basic pay does not exceed Rs. 300 per month.

The Act does not apply to any factory established before or after 1st November 1952 unless three years have elapsed since its establishment. The Central Government is also empowered to exempt any class of factories having regard to the financial position or other circumstances of the case by a notification in the Official Gazette.

The Scheme provides for prompt settlement of claims in case of retirement, migration, death or other circumstances. Withdrawals from the Fund are permitted subject to fulfilment of certain conditions, for payment towards a policy of life insurance.

The Scheme is administered by a Central Board of Trustees which is tripartite in character. The Central Provident Fund Commissioner is the Chief Executive Officer and is assisted by Regional Commissioners for different regions. The Act aims at the decentralisation of the administration of the Scheme by setting up State Boards with the State Commissioners as Chief Executive Officers.

Section 17 of the Act empowers the appropriate Government to exempt from the operation of all or any of the provisions of the scheme factories which provide provident fund benefits which are equal to the benefits provided under the Act, or factories where the employees are in enjoyment of benefits in the nature of provident fund, pension or gratuity which the appropriate Government considers are, on the whole, not less favourable to such employees than the benefits provided under the Act.

Since July 1957 however, the limit of eligibility to the membership of the Fund has been raised to Rs. 500 per month inclusive of dearness allowance and cost value of food concessions.

On May 18, 1954 the Act became applicable to establishments owned by Government or a local authority as a consequence of an amendment to the original Act.

On April 30, 1959 it became applicable to motor transport workers. It is estimated that 14,000 would benefit.

The total number of establishments brought under the Act by the end of March, 1958* was about 6,524 having about 29.56 lakh subscribers, of whom 24.12 lakh were receiving benefit. Monthly contributions were Rs. 2.47 crores.

The subscribers in the tea-estates of Assam were an additional 4.8 lakh.

At the end of 1957 the total collection of subscription was Rs. 102 crores. The contribution for 1957 was Rs. 29.60 crores.

In January 1959 the total collection was Rs. 131.4 crores.

To supervise the administration of the scheme, the Central Government constituted Regional Commissioners in the States of Bombay, Bihar, Madras, Madhya Pradesh, Uttar Pradesh and West Bengal.

In February 1959 the Government of India announced an amendment to the Employees Provident Fund scheme.

Workers will be allowed to contribute upto 8½ per cent of their basic wage and dearness allowance to the Provident Fund if they so desire.

The amendment will be effective retrospectively from November 1, 1956. This has been done in view of the fact that workers in plantations in the south were allowed, as a special case, to contribute at the enhanced rate of 8½ per cent pending amendment of the scheme.

Employers, however, will continue to contribute at the existing rate of 6½ per cent.

Meanwhile, the Government of India will carry out a survey, industry-wise, to ascertain if the industries covered by the Act can bear the additional financial burden as a result of enhancement of the rate of contribution to 8½ per cent.

Provident fund for workers in the coal industry was introduced by an Ordinance, namely, the Coal Mines Provident Fund and Bonus Schemes Ordinance, promulgated in December 1948. The Ordinance was later repealed by an Act which authorised the Central Government to frame a scheme for bonus and another for provident fund in coal mines.

The scheme applies to the coal mines, in Bihar, West Bengal, Orissa, Madhya Pradesh, Assam, Rajasthan and Andhra.

The rate of contribution is one anna per rupee of the total of basic wages, dearness allowance and value of food concessions in cash or in kind. An equal contribution is paid by the employer. About 3.42 lakhs of workers are members of the Fund. In the middle of 1956, the provisions relating to forfeiture of employer's contribution to the provident fund were liberalised. The employer's contribution will now not be forfeited in the case of members who retire after reaching the age of 50 years though they have not completed 5 years service as members. The proportion of forfeiture of employer's contribution for varying periods of service has also been reduced. There will be no forfeiture at all in the case of employees who have been members of the fund for 15 years or more.

The Coal Mines Provident Fund Scheme had at the end of 1957 54 membership of about 3.42 lakhs and the accumulation was Rs. 11 crores.

TEA DISTRICTS EMIGRANT LABOUR ACT

The Tea Districts Emigrant Labour Act, 1932, was brought into effect from the 1st of October 1933.

State Governments are empowered, subject to the control of the Government of India to impose control over the forwarding of assisted emigrants (chapter III) or over both their recruitment and their forwarding as occasion may dictate (chapters III and IV).

The forwarding of recruits to Assam must be made through the prescribed routes where arrangements for feeding, rest and medical treatment have been made and by authorised forwarding agents. It is made unlawful to assist persons under 16 to migrate unless they are accompanied by their parents or guardians. A married woman who is living with her husband may only be assisted to emigrate with the consent of the husband.

Repatriation.—It is provided that where an employer fails to make all the necessary arrangements for the repatriation of a worker within fifteen days from the date on which a right of repatriation arises to an emigrant labourer, the Controller may direct the employer to despatch such labourer and his family or to pay him such compensation as may be prescribed within such period as the Controller may fix (sections 13 and 15).

Section 2 of the Act makes provision for the appointment of a Controller of Emigrant Labour with some staff and possibly one or more Deputy Controllers for supervising the general administration of the system which the Act seeks to establish. The charges for this establishment are to be met from an annual cess called the Emigrants Labour Cess which is to be levied at such rate not exceeding Rs. 9 per emigrant as the Central Government may determine for each year of levy.

The cess is collected by the Controller by the sale of certificates of emigration. Every assisted emigrant has to be provided by the employing interest on whose behalf he was recruited with such a certificate. All particulars about the emigrant together with a running record of the details of his employment in Assam are given on it. Failure to provide a certificate is punishable with a fine which may extend to Rs. 500. The rate of the cess is fixed at Rs. 6.

According to the statistics collected under the Act the labour force in Assam in 1954 consisted of 349,982 adults and 336,689 children.

The number of new emigrants dropped from 34,593 in 1952 to 3,881 in 1953 and to 534 in 1954. The acute fall since 1953 is due to the request made to employers by the Government of Assam not to recruit labour from outside the State but to meet their requirements by transfer of labour from gardens having surplus workers.

The number of emigrants repatriated and of those who postponed their right to repatriation during the year 1954 was 17,641 and 19,960 respectively.

PLANTATION LABOUR ACT, 1951

The Plantation Labour Act was passed by the Government of India in 1951 with a view to ameliorating the working and living conditions of about 12 lakhs of workers employed in plantations. The Act applies to tea, coffee, rubber and cinchona plantations and the State Governments have been empowered to extend it to any other class of plantations. Some of the provisions of the Act were for the first time enforced in April 1954 and by the end of 1957, most of the provisions of the Act had been implemented in all the States except Punjab.

The Act fixes the maximum weekly hours of work for adults at 54 and for adolescents and children at 44, and also prescribes the daily hours of work, spread over and rest interval. Grant of leave with wages at the rate of one day for every 20 days of work for adults and for every 15 days of work for young persons has been provided.

The more important provisions of the Act in respect of health and welfare relate to supply of drinking water, provision of housing and medical facilities, establishment of canteens, maintenance of creches and appointment of Welfare Officers.

In the Second Plan Rs. 2 crores are allotted for welfare schemes.

Names of States showing within brackets the dates from which the plantation labour rules were effected in the respective States, the number of estates covered and the number of workers employed in the estates:

Assam (Jan. 19, 1956; 608 estates; 4,85,917 workers).

Bihar (Dec. 26, 1955; 12 estates; 800 workers).

Kerala (Aug. 23, 1956; —; —).

Madras (Dec. 28, 1956; —; —).

* In Feb. 1959, 24.6 lakh workers in 6,815 establishments over 38 industries. † — = not available.

Mysore (Oct. 1956; 700 estates; 78,000 workers).

Uttar Pradesh (March 30, 1957; 16 estates; 2,000 workers).

West Bengal (Nov. 22, 1956; 283 estates; 1,37,281 workers).

Tripura (Sept. 12, 1955; 55 estates; 11,000 workers).

SHOPS AND COMMERCIAL ESTABLISHMENTS ACTS

Subject to certain exceptions the Acts apply to shops, commercial establishments, restaurants and places of amusement in certain selected urban centres. Some employees such as those employed in a confidential capacity and those whose work is of an intermittent character are excluded from the scope of the Acts.

The Bombay, Madhya Pradesh and Assam Acts have fixed daily hours of work at nine. In the U.P. and Madras Acts the daily hours are eight while in the West Bengal and the Punjab Acts a ten-hour day has been prescribed. Rest intervals, of half an hour are prescribed in the West Bengal, U.P. and the Punjab Acts while an hour's interval has been granted in the Assam, Bombay, U.P. and Madras Acts. Opening and closing hours have also been fixed by the Acts. The Assam and West Bengal Acts, however, prescribe only closing hours. Most of the Acts also fix the maximum overtime work that can be taken from the employees. In some cases slightly different hours of work have been fixed for employees of commercial establishments, restaurants and places of amusement.

Provision has been made in all the Acts for weekly closure of shops and establishments although in some Acts, for example the Bombay and Assam Acts, theatres, hotels, etc. are exempted from this provision. In addition to the weekly holiday, provision for privilege leave of 12 to 15 days in a year has been made in all the Acts. The Assam, West Bengal, Madras and U.P. Acts make further provision for casual leave and sick leave of 10 to 12 days and 12 to 30 days respectively.

All the Acts, except the Bengal Act, have made provision for the regulation of employment of children and young persons. The minimum age for the employment of children in the Assam, and Madhya Pradesh Acts is 12 while in the Madras and U.P. Acts it is 14. The hours of work for children and young persons are 7 per day in the Punjab, Madras and Madhya Pradesh Acts and 6 in the Bombay and U.P. Acts. Children cannot work after 7 p.m. according to the Bombay, Madras and the Punjab Acts and after 9 p.m. according to the Madhya Pradesh Act.

By the Madras and U.P. Acts the wage period should not exceed one month and by the Punjab Act it should not exceed a fortnight. The Assam Act fixes the wage period at one month. After they become due wages should be paid within

10 days in Assam and West Bengal, 7 days in U.P. and 5 days in Madras. In the area covered by the former Punjab wages should be paid on demand at the expiry of the wage period. Overtime wages are payable at twice the ordinary rates in Madras, U.P. and the Punjab, at one and a half times in Bombay and the area covered by the former Madhya Pradesh and at one and a quarter times the ordinary rate in West Bengal. Hotels, restaurants and other eating places in Bombay are, however, required to pay overtime wages at twice the ordinary rate. Fines and deductions are regulated under the Madras and U.P. Acts.

One month's previous notice or one month's wages in lieu of notice before discharge is stipulated in the Acts of U.P., Punjab, Madras and Madhya Pradesh. The Bombay Act provides for only 14 days' notice or pay in lieu thereof. The Madras and Bombay Acts make provisions relating to cleanliness, ventilation lighting and precautions against fire in establishments covered by the Acts.

The total number of establishments covered by the various State Acts and the persons employed therein were 917,392 and 1,149,423 respectively during the year 1955.

The Weekly Holidays Act, 1942 provides for a weekly closure of shops and for the grant of a weekly holiday to employees. The Act has been in force in the areas of the former Bihar, Ajmer, Coorg, Orissa, Raja-Than, Vindhya Pradesh and Hyderabad States.

INDUSTRIAL EMPLOYMENT (STANDING ORDERS) ACT, 1946

The Industrial Employment (Standing Orders) Act, 1946 which applies to industrial establishments employing 100 or more workers provides for the framing of Standing Orders laying down the conditions of employment of workers employed in the establishments.

The Act extends to the whole of India except the State of Jammu and Kashmir, and is administered both by the Central and State Governments.

So far as the Central Government is concerned it is responsible for administering the Act on railways, major ports, mines, oil-fields and other establishments under its control. Both the Central and the State Governments have been empowered to extend the scope of the Act to establishments in any industry employing less than 100 workers or to any other class or classes of establishments or to exempt any establishment from any of the provisions of the Act.

The total number of establishments coming within the purview of the Act at the end of 1956 was 9,356 of which 7,909 establishments with 29.14 lakh workers belonged to the State sphere and 1,547 with 5.78 lakh workers, to the Central sphere. The employment strength of all these establishments was over 35 lakhs.

The number of establishments which had certified Standing Orders in both the spheres at the end of 1956 was 8,149 which formed 66 per cent of the total covered. Of these 5,131 were in the State sphere and 1,018 in the Central sphere.

The percentage of workers having certified Standing Orders to the total number of employees came to 92.

COLLECTION OF STATISTICS ACT, 1953

This Act which replaces and embodies the main provisions of the Industrial Statistics Act is designed to facilitate the collection of statistics of certain kinds relating to industries, trade and commerce. It empowers the Central and the State Governments to direct that statistics shall be collected about—

- any matter relating to any industry or class of industries,
- any matter relating to any commercial or industrial concern or class of commercial or industrial concerns and in particular any matter relating to factories, and
- any of the following matters, so far as they relate to the welfare of labour and the conditions of labour, namely, (1) price of commodities, (2) attendance, (3) living conditions including housing, water supply and sanitation, (4) indebtedness, (5) rents of dwelling houses, (6) wages and other earnings, (7) provident fund and other funds, (8) benefits and amenities provided for labour, (9) hours of work, (10) employment and unemployment, (11) industrial and labour disputes, (12) labour turnover, and (13) trade unions.

The Central or State Government can appoint an officer to be the Statistics Authority for the purpose of collecting any statistics and such authority has the power to call upon the owner of an industrial or commercial concern to furnish the necessary information. He has also the right of access to any relevant records or documents in the possession of any person required to furnish the information and can enter any premises where he believes such records or documents are kept for the purpose of inspecting them or taking copies. The Act prescribes penalties for improper disclosure of information or returns or for wilfully furnishing false information.

WAGES

No serial statistics of wages and earnings are available in India except for those compiled under the Payment of Wages Act. The returns under the Act, however, relate only to persons in receipt of wages and salaries of Rs. 200 per month.

† That is, before the reorganization in Nov. 1956.

AVERAGE ANNUAL EARNINGS OF FACTORY EMPLOYEES DRAWING LESS THAN Rs. 200 PER MONTH.

By an award of the All-India Industrial Tribunal (Colliery Disputes) which was published on the 26th May 1956 and which came into force from that date, the minimum daily wages of the lowest category of male and female workers were fixed as under :

	Male Workers	Female Workers
	Rs. a. p.	Rs. a. p.
Basic wages ..	0 15 0	0 11 3
Dearness Allowance (150 per cent) ..	1 6 6	1 0 11
	2 5 6	1 12 2

Inclusive of the statutory bonus, the minimum wage will be Rs. 2-10-6 for male and Rs. 1-15-11 for female workers. Those working underground will get an allowance of 12½ per cent of basic wages.

The Chief Inspector of Mines in his Monthly Coal Bulletin publishes figures of average weekly earnings of certain categories of workers in different coalfields. The position in Dec. 1955 (the latest available information) is given in the table below :

AVERAGE WEEKLY EARNINGS IN COAL MINES.* (December, 1955).

Category	Assam	Raniganj	Jharia	Madhya Pradesh	Rewa	Orissa	Hyderabad	Rajasthan	Indian Union
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

The average weekly earning of miners and loaders in December 1957 were Rs. 19 53 for Jharia and Rs. 19 88 for Raniganj with an average for 1957 of Rs. 20 46 for Jharia and Rs. 19 53 for Raniganj.

Employees of about 228 plantation estates in the districts of the Nilgiris, Malabar, Coimbatore, Salem, Madurai and Tirunelveli : the rate for first and second grade workers are Rs. 2-4-0 and Rs. 1-12-0 respectively while a child worker gets Re. 1 per day.

DEARNESS ALLOWANCE

The scale of the allowance varies not only from centre to centre and industry to industry, but also, except where these matters are adjudicated upon, from unit to unit in the same industry at the same centre.

Several Adjudicators have granted dearness allowance either at the Bombay Millowners' Association scale which was Rs. 84 90 in November 1953, or at a percentage, varying from 66½ per cent to 85 per cent, of that scale. The rate of dearness allowance payable to Bombay City cotton mill workers itself was increased by a decision of the Labour Appellate Tribunal by 5 per cent when the Bombay Cost of Living Index Number is between 326 and 335; by 7½ per cent when it is between 336 and 350; and by 10 per cent when it is above 350. The enhanced rate was given retrospective effect from May 1953; the average dearness allowance for a month of 26 working days now comes to Rs. 63 75 for 1956 and Rs. 74 00 for 1957.

BONUS

As in the case of dearness allowances the practice in regard to the quantum of profit bonus varies from centre to centre and industry to industry.

A five-year agreement to settle the problem of bonus for about 250,000 textile workers in Bombay City was entered into on 1st March, 1956 between the Bombay Millowners' Association and the Rashtriya Mill Mandoc

Sangh. The agreement will assure the workers of both profit and non-profit making mills a bonus ranging from 15 days to 3 months' basic wages for every year of service for 5 years from 1953 to 1957 both years inclusive. The quantum of bonus will be decided by the profit made by each unit. Mills whose bonus disputes for 1952 were pending before the courts were also covered by the agreement for that year. There were 20 of these employing about a third of the textile labour.

The amount of bonus paid for the year 1956 was Rs. 3 crores. 28 Mills paid bonus equivalent to 3 months' basic wages.

The Textile Labour Association and the Ahmedabad Millowners' Association have also entered into an agreement laying down a procedure for the grant of bonus. This agreement applies to all member mills of the Association in Ahmedabad, in respect of bonus claims for the years 1953 to 1957.

No bonus has so far been paid in the jute mill industry in West Bengal.

The dockyards in West Bengal generally pay an annual bonus amounting to a month's wages.

The Tata Iron and Steel Co. at Jamshedpur pay a good attendance bonus amounting to 10 to 12 per cent of basic wages and a performance bonus of 10 to 50 per cent of basic wages is also given to workers. To the latter, however, only skilled and semi-skilled workers are entitled. Under the Company's revised Profit Sharing

Scheme, the employees are entitled to a share of 27½ per cent of the annual net profit of the company and such share is credited to and/or distributed among the employees of the company in proportion to the basic salaries and wages earned or deemed to be earned by such employees respectively during the year in which such net profits were earned by the Company. The Indian Iron and Steel Company pays bonus at the rate of 2 days' wages for every one per cent dividend declared by the Company.

The Board of Conciliation appointed for the coal-mining industry recommended the grant of an annual bonus equal to four months' basic wages, split into two parts. An attendance bonus of two months' basic wages to those fulfilling specified minimum attendance requirements, and a production bonus related to output and basic earnings and subject to their qualifying for it on the basis of a minimum attendance of 66 days per quarter in the case of surface workers and 64 days per quarter in the case of underground workers in the case of collieries in Bihar and West Bengal. Bonus on the above basis is also to be paid, according to the Fact-Finding Committee's recommendations subject to a minimum attendance of 60 and 66 days in a quarter in the case of underground and surface workers respectively in Madhya Pradesh, Andhra and Orissa collieries. In Assam, the existing rate of bonus has been raised by fifty per cent so as to raise the amount of bonus earned to a sum equal to four months' wages per year.

The demand for bonus made by the Sindh Fertiliser Factory was not conceded, but the Government decided to give on an *ad hoc* basis a sum of Rs. 16 lakhs, partly in cash and partly in the form of special amenities.

Agreements dated 18th May 1955 were reached between the managements of Burmah-Shell Oil Storage and Distributing Co., Standard-Vacuum Oil Co., Caltex (India) and the Indo-Burma Petroleum Co. on the one hand and the clerical staff, labour, service, watch and ward and transport employees in the Companies' establishments in Greater Bombay regarding payment of bonus equivalent to 7/24 of basic salary earned during the year 1954 to clerical staff and 9/24 to the other employees.

MODES OF PAYMENT

As for wages, allowing for minor differences and considering the major industries and the important centres it can be stated that in the jute industry in West Bengal and in the plantations the wages are generally paid weekly. The system of wage payment in the cotton textile industry in Bombay City and Sholapur is monthly. A peculiarity of Ahmedabad is that the wages are paid per *Aspa* which varies from 14 to 16 days. The month is the accepted wage period for the railways. In some concerns wages

are paid daily to certain types of workers, weekly to others, fortnightly to yet others and monthly generally to the clerical and supervisory staff.

Mining labour is mostly paid on a weekly basis.

A study was made by the Labour Bureau of the Government of India of wage periods in factories covering about 7½ lakhs workers in the former Part 'A' States of Andhra, Bihar, Bombay, Madhya Pradesh, Madras and the Punjab where the total employment is over 16 lakhs; about ½ lakh of workers in Part 'B' States of Hyderabad, Saurashtra and PEPSU out of a total of 1½ lakhs; and almost the entire employment of about ½ lakh workers in Delhi, Ajmer, Bhopal and Coorg. The study showed that 81.2 per cent of the workers were paid monthly, 3.7 per cent fortnightly and 15.1 per cent weekly. In the textiles the percentage of monthly paid workers was as high as 95.7 per cent. The industries in which the proportion of weekly paid workers is higher than that of monthly paid workers were food (except beverages), tobacco, wood, cork and non-metallic mineral products.

An interesting departure from normal practice was recently suggested by the Ministry of Labour.

The Union Ministry of Labour and Employment has recommended that all State-owned

industrial undertakings should try to increase productivity by introducing the system of payment by results as recommended by the Planning Commission.

The Labour Ministry circulated a memorandum in November 1957 directing those Ministries of the Government of India employing industrial labour to investigate the possibilities of bipartite agreements at the unit level in all industrial undertakings under their control to give effect to this system of payment of wages.

The Planning Commission had recommended that in addition to a basic minimum wage, all extra earnings of the workers should be based on a piece-rate system to step up productivity.

The Commission added, however, that adequate measures should be taken to avoid fatigue and undue speed-up of production.

A piece-rate scheme has been functioning for some years with success in Bombay port and has been extended to Madras. The private sector has made a beginning, notably at the Tata Steel Works, Jamshedpur.

At Jamshedpur, where the piece-rate scheme was introduced after the 1958 strike, it was made clear that wages could be stepped up only in line with increasing production.

INDEX OF EARNINGS (1939 - 1954)

Year	All India Consumer Price Index	Factory workers		Miners	
		Index of earnings	Index of real earnings	Index of earnings	Index of real earnings
1946	285	206.6	73.2	250.7	88.0
1947	323	253.2	78.4	342.8	106.1
1948	360	304.0	84.4	361.8	100.5
1949	371	340.3	91.7	378.2	101.4
1950	371	334.2	90.1	391.9	105.6
1951	387	356.8	92.2	413.0	106.7
1952	379	385.5	101.8	436.9	115.3
1953	395	384.6	99.9	437.4	113.6
1954	371	381.2	102.7	441.9	119.1

CENTRAL PAY COMMISSION

On 21st August 1957, the Government of India appointed a 6-member Commission of Enquiry under the Chairmanship of Mr. Justice B. Jagannath Das, Judge of the Supreme Court to examine the structure of emoluments and conditions of service of Central Government employees and recommend changes therein.

The Commission is required to recommend, in particular, the extent to which benefits could be given in the shape of amenities and facilities.

In making their recommendations, the Commission will take into account the historical background, the economic conditions and the implications and requirements of developmental planning, and the disparities in the standards of remuneration and conditions of service between the Central Government employees and employees of State Governments and local bodies.

A Central Wage Board for the cotton textile industry has been appointed by the Government of India to evolve a wage structure based on the principles of fair wages as enunciated in the Fair Wages Committee Report.

The Board consists of two independent members, two representatives each of employers and workers with an independent Chairman.

In evolving the wage structure the Board will take into consideration the needs of the industry in a developing economy, the requirements of social justice and the need for adjusting wage differentials in such a manner as to provide incentives to workers for advancing their skill.

The Board will also bear in mind the desirability of extending the system of payment by results keeping in view the safeguards against overwork and undue speed.

There is also a similar Wage Board for the sugar industry and the cement industry.

The Wage Board for the sugar industry recommended interim relief in Feb. 1959.

HOURS OF WORK

The most important happening in regard to hours of work in factories was the reduction of the weekly hours of work for adults to 48.

Actually, in many industries in this country the hours of work were not in excess of 8 per day. In the coal-mines in Bihar and West Bengal the workers seldom work for more than five to six hours in the day or for more than four to five days in the week. According to an investigation the average weekly attendance of a coal-miner was 4.56 days. The cotton textile industry in almost all centres normally works a uniform 8-hour day.

In all cases where continuous production is necessary such as in electricity generating plants and certain water pumping stations, cement factories, etc., work is arranged on a system of three shifts—the different shifts changing over every week or fortnight. The change-over is so arranged that every workman gets a rest period of at least twenty-four continuous hours once in one week.

As far as railways are concerned, hours of work in railway workshops are regulated by the Indian Factories Act. Most of the larger running sheds have also recently been classified as factories and work in these large sheds is arranged on the basis of three shifts of 8 hours each. In the smaller sheds where work is of a fairly intermittent character, systems of two shifts of 12 hours each obtain but the work of the individual is so arranged as not to work each operative for more than 8 hours.

The question of hours of work of railway servants was one of the points submitted for adjudication to the late Justice Rajadhyaksha of the Bombay High Court who made the following recommendations:

The employment of railway servants under the Hours of Employment Regulations should be classified under any one of the following heads:

- (i) Intensive.
- (ii) Continuous.
- (iii) Essentially Intermittent.
- (iv) Excluded.

(i) The statutory limit of weekly hours for persons whose employment is classified as intensive should be fixed at 75 hours a week on the average in a month;

(ii) The statutory maximum limit for the employment of continuous workers should be fixed at 84 hours a week on the average in a month;

(iii) The statutory maximum for staff classified as essentially intermittent should be 7½ hours a week; and

(iv) For excluded workers no statutory minimum limit can be prescribed but this should not absolve the Administrations of their responsibility on humanitarian grounds, of seeing that unreasonable conditions are not imposed. The Government of India accepted these recommendations and by an Order dated 15th June 1948 declared them binding for a period of three years. These regulations are still in force.

The Plantations Labour Act, 1951 has restricted hours of work to 54 per week for adults and 40 per week for children and adolescents.

COST OF LIVING

The Government of India has sponsored family budget inquiries—the enquiry started in Sept. 1958—covering factory workers, miners and plantation labour with a view to compiling a new series of consumer price index numbers on a uniform basis.

It is stated that the existing series of consumer price index numbers are based on old and out-of-date inquiries and, therefore, do not reflect correctly the present cost of living of industrial workers.

The enquiry is undertaken by the Labour Bureau of the Central Government with the help of the National Sample Survey Organisation which will do the field work.

The survey will take about a year to complete.

The selected centres are:

Factory Centres: Digboi, Jamshedpur, Monghyr, Jamalpur, Bombay, Ahmedabad, Nagpur, Bhavnagar, Sholapur, Bhopal, Indore, Gwalior, Madras, Madurai, Coimbatore, Guntur, Hyderabad, Sambalpur, Kanpur, Varanasi, Saharanpur, Calcutta, Howrah, Asansol, Bangalore, Alwaye, Alleppey, Amritsar, Jamunaganar, Jaipur, Ajmer, Delhi and Srinagar.

Mining Centres: Jharia, Kodarma, Naomundi, Balghat, Godur, Barbil, Raniganj and Kolar Gold Fields.

Plantation: Lahar, Rangapara, Mariani, Doondooma, Coonoor, Darjeeling, Jaipalguri, Chikmagalur, Amnathi and Mundakkayam.

INDEX FIGURES

Owing to the variations in the method of compilation of these indices, they are not strictly comparable, but the table below shows the movement of the working class consumer price index numbers in selected centres for the twelve months of the year 1957:—

(Base shifted to August 1949 = 100).

STATE	BOMBAY					MADRAS	MYSORE			ANDHRA	KERALA		UTTAR PRADESH

* Provisional.

The original base for all these series is calendar year 1944 except as follows:

(i) Madras Plantation Centres—January to June 1949. (ii) Bhopal—Calendar year 1951. (iii) Brewar—August 1951 to July 1952. (iv) Satna and Mercara—Calendar year 1953. The group House Rent is not included in the indices for Jharia, Mercara and Madras Plantation Centres. In all other centres, it is kept constant at 100.

The group fuel and lighting is not included in the index for Madras Plantation Centres as the priced items of this group have been included in the miscellaneous group.

The Bombay Labour Office carried out two family budget enquiries for working classes in Bombay City, one in 1921-22 and the other in 1932-33 and the results were published in the years 1923 and 1935 respectively. Similar enquiries were also conducted in Ahmedabad and Sholapur cities and

the results of both these enquiries were published in the year 1923. In Madras, the Director of Industries published in 1936 the results of an inquiry into the family budgets of industrial workers in organized and unorganized industries in Madras City conducted under the direction of the Commissioner of Labour. A number of

family budgets were also collected at Kanpur, Nagpur and Jabalpur with the object of compiling cost of living indices.

A table showing the main results of these enquiries was given in previous editions of the book.

COMPOSITION OF THE FAMILY, AVERAGE WEEKLY INCOME AND EXPENDITURE OF THE FAMILY AND THE ACTUAL AND PERCENTAGE DISTRIBUTION OF EXPENDITURE ON DIFFERENT GROUPS

EMPLOYMENT

Many of the larger and more progressive concerns have Labour Officers who are directly responsible for all new recruitment.

The Millowners' Association, Bombay conducts special classes for the training of Mill Labour Officers and actively supervises and controls the work done by all such Officers where they have been appointed through the Association. Following the example of the Millowners' Association, Bombay, the University of Calcutta, in co-operation with the Indian Jute Mills Association, has a special course of social work for giving suitable training to Labour Welfare Officers engaged in jute mills. Among other institutions imparting training for Labour Officers mention may be made of the Tata Institute of

Social Sciences, Bombay; Institute for Training of Welfare Workers, Bombay; Delhi School of Social Work, Delhi; Institute of Social Sciences, Banaras; Xavier Labour Relations Institute, Jamshedpur; Department of Labour and Social Welfare, Patna University; J. K. Institute of Sociology and Human Relations, Lucknow University, and the training course conducted by the Madhya Bharat Millowners' Association, Indore.

Employment Exchange

The Directorate-General of Resettlement and Employment set up by the Government of India organises technical training.

There were on an average 433 training centres in 1957 and the number of persons undergoing training in these centres was as follows:—

Technical training ..	11,181
Vocational training ..	1,686 (532 women)
Apprenticeship training ..	881

TOTAL .. 13,748

The number of registered unemployed was 11,95,926 in Jan 1959. This was 12,627 more than in the previous month. 19,255 persons were helped to secure jobs. 28,713 vacancies were notified. Of the placements 4,838 were under the Central Government, 9,506 under the State Governments and 3,361 under quasi-Government establishments.

The number of exchanges is to be increased from 135 at the commencement of the Second Five-Year Plan to 230 by its end—to provide in course of time an exchange in each district as recommended by the Shiva Rao Committee.

The number of exchanges in March 1959 was 207.

Government has also devised a scheme for collection of employment market information so as to be in a better position to advise on further manpower requirements.

Also a scheme for development of vocational guidance has been undertaken and 8 Units out of 63 have been opened. 50 career pamphlets were published and distributed to all secondary schools.

There is now a 30-member Central Committee on Employment to advise the Ministry of Labour

and Employment on matters relating to employment, the creation of employment opportunities and the working of the National Employment Service.

Mr. Gulzar Lal Nanda is the Chairman of the Committee, which consists of representatives of all State Governments and of central trade unions and employers' organisations. The Director-General of Resettlement and Employment is the Secretary.

The Committee will study employment information and assess employment and unemployment trends both in urban and rural areas and suggest measures for expanding employment opportunities. It will advise the Ministry on the development of the National Employment Service, deployment of personnel retrenched on the completion of development

projects and development of Youth Employment Service and employment counselling at Exchanges.

It will also consider special programmes relating to educated unemployed.

Besides, the Committee will assess the requirements of trained craftsmen and advise the National Council for Training in Vocational Trades on this matter.

A SURVEY

A study of trends by the National Employment Service of the Ministry of Labour in the number and types of employment-seekers during the period 1952-57 has shown that employment opportunities generated by the Five-Year Plans have helped reduce the volume of unemployment. Although the number of applicants on the Live

Registers of Employment Exchanges had been increasing steadily throughout this period, the rate of increase went down from 8,344 per month in 1955 to 6,012 in 1957.

The findings of the study, however, support the general belief that the number of job opportunities that are occurring is failing to keep pace with the growing labour force of the country.

Though the number of vacancies increased, the number of applicants available per 100 vacancies was throughout the period at a level higher than 2,000.

For the purpose of the study, applicants on the Live Register were classified broadly into 7 occupational groups: Industrial/supervisory, skilled and semi-skilled, educational, clerical, domestic service, unskilled and others.

As regards the industrial supervisory group, the study showed that applicants belonging to this group were absorbed in employment fairly readily, thus preventing the Live Register from swelling up. It also brought out the fact that the supply of applicants in this group was limited. During 1957, the percentage of vacancies cancelled due to non-availability of suitable applicants in this category was as high as 40 per cent as against 12 per cent in the case of all other categories of personnel.

The Live Register in respect of skilled and semi-skilled personnel increased, but the rate of increase slowed down after 1955 until 1957. This indicated a comparatively high rate of absorption of technical personnel entering the labour market. There was quite a pronounced shortage in respect of this category of applicants, the percentage of vacancies cancelled due to shortage being 19 per cent during 1957. The bulk of the registrants in this group were semi-skilled and often did not answer to the specifications laid down by employers.

The number of persons desirous of taking up the teaching and other allied occupations showed a rapid rise during the period under study. The increase was particularly marked during 1957. The rate of increase in respect of trained teachers was much greater than in the case of untrained personnel.

A more fundamental reason for the rapid increase in the number of persons wanting to take up teaching seemed to be that the profession was becoming more popular among applicants of the 'white-collar' group. The swelling Live Register in respect of educational personnel should not, therefore, lead one to the conclusion that unemployment among these applicants was necessarily on the increase.

Next to the unskilled group, the clerical group formed the largest component of the Live Register. The size of the clerical group increased steadily except for a short period in the middle of 1956. The study showed that this rate of growth would not change so long as young persons preferred 'white-collar' jobs or until alternative occupations were open to them.

As regards the domestic service group, the Live Register showed a steady upward trend during the period. The applicants registered for domestic service, however, had in mind work in establishments under public ownership and not under private individuals.

The unskilled category constituted the largest single group on the Live Register and as such the trend of the total Live Register was largely governed by variations in the size of this group. The unskilled group constituted about 50 per cent of the total Live Register.

An interesting finding was that the Live Register exhibited seasonal fluctuations, January and August being the peak months and April and November the troughs.

During the period under study, the rate of increase in placements was greatest in regard to the educational group, followed by the clerical group. There was practically no increase in the level of placements of skilled and semi-skilled personnel through the employment service. In

regard to unskilled persons, there was a slight fall in the number of persons placed every month.

A pilot scheme to help the educated unemployed enter into avenues of employment other than 'white collar' jobs was sanctioned by the Government of India in February 1957.

Under the scheme, four work and orientation centres were to be set up in the country, one each in the States of Kerala, Delhi, West Bengal and Uttar Pradesh.

At each of the proposed work and orientation centres 250 educated unemployed of the matriculation to university standard and registered with the exchanges will be given an orientation course for about six months. They will also be paid a stipend.

The centres will give vocational counselling, manual work and some theoretical and practical instruction in occupations selected with reference to the aptitudes of the participants. The plans of Government to develop small scale industries, the loans available and the facilities accessible to co-operative societies will also be explained at the centres.

The scheme will not guarantee subsequent placement in life, though some may get placed in positions in which shortages are felt. The instruction and orientation given, however, will be directed to giving them the necessary 'know how' to set up business either by themselves as entrepreneurs or in co-operatives.

The centres will be guided by Local Advisory Committees, consisting of officials and non-officials and will maintain close liaison with important local employers. The centres will be organised and administered by the State Governments.

WOMEN LABOUR FORCE

During the 50 year period 1901-51, there was greater loss of work opportunities for women in the non-agricultural sectors of the economy than in agriculture.

This is revealed by a study jointly undertaken by the Labour Bureau, Government of India, and the Labour and Employment Division, Planning Commission, of trends in employment of women since 1901. In carrying out the study, some reliance had to be placed on census data, which has its limitations. However, an attempt has been made to overcome these limitations and to secure a certain degree of comparability.

The study showed that the number of working females declined from 43.0 millions in 1911 to 40.7 million in 1951 while the female population during the same period increased from 149.9 million to 173.4 million. In other words, there was a decrease of about 2.3 million working women as against the actual increase of 23.5 million female population.

During 1901-51, participation of women, in absolute numbers, in the cultivation of owned and unowned lands substantially increased with the exception of the year 1931.

In relative terms, i.e., in terms of their engagement in 10,000 of the total population (male and female combined), the study showed that women's participation in cultivation of land and their employment as agricultural labour had not undergone significant changes, although there were variations from one decade to the other.

The place of women as rentiers, however, suffered during the period.

The study further revealed that a general decrease had taken place, in absolute numbers as well as relatively, in women engaged in production other than cultivation, commerce and other services and miscellaneous sources.

Transport, however, recorded a rise in women's employment.

During the 50 year period, increases had taken place in women's employment in coal mining, tobacco, iron and steel and non-ferrous

metal industries, transport equipment, bricks tiles and other structural clay products, furniture and fixtures, paper and paper products, printing and allied industries, educational services and research, municipalities and local boards, hotels, restaurants and tea houses and legal business services.

Their employment, however, recorded a decrease in miscellaneous food industries, grains and pulses, non-metallic mineral products, retail trade in fuel, sanitary works and services and laundry and laundry services.

The latest information available regarding organised employment i.e., for 1956 has also been incorporated in the study.

During the 6 year period 1950-56, trends in women employment in different industrial groups were not uniform. While the employment in tobacco industries and chemicals and chemical products had been on the increase, employment in wood and furniture industries, paper and paper products, textiles and basic metal industries had been going down. In other industrial groups, namely, processes allied to agriculture, food except beverages and non-metallic mineral products, women's employment had been, more or less, stationary.

In the textile groups, the decrease in jute industry was marked in so far as women's employment decreased from 37,000 in 1950 to 21,000 in 1956. The employment position in 'bidi' and match industries was good.

There had been a significant fall in women's employment in cashewnut industry and in tea factories.

In the mining sector, women's employment had considerably increased in manganese and iron ore mining and witnessed a fall in their employment in coal and mica mining.

In plantations, there was a decrease in women's employment from 2.48 lakhs in 1950-51 to 1.66 lakhs in 1956-57, but this decline was almost proportionate to the fall in the total number of adult workers, both males and females.

EMPLOYMENT IN FOREIGN COMPANIES

The position in regard to employment of Indians and non-Indians on salaries of Rs. 1,000 and above in foreign concerns on the 1st January each year was as follows:—

Year	Indians	Foreigners	Total
1947	504	5,844	6,348
1948	742	6,380	7,122
1949	1,045	6,709	7,754
1950	1,406	6,871	8,277
1951	1,784	6,953	8,737
1952	2,290	7,104	9,394
1953	3,346	7,008	10,354
1954	3,996	6,810	10,806
1955	4,645	6,566	11,211
1956	5,614	6,025	11,639
1957	6,704	5,652	12,356

The percentage of Indians which was 7.9 in 1947 and 20.4 in 1951 increased to 41.6 in 1956, 48.2 in 1957 and to 54.3 in 1958.

In the salary group of Rs. 1,000 to Rs. 1,500 Indians occupied 54.2 per cent of the posts in 1956 as against 77.7 per cent in 1957.

In the next salary group of Rs. 1,501 to Rs. 2,000, 62.2 per cent of the posts were manned by Indians as against 54.2 in 1957. In the salary group of Rs. 2,001 to Rs. 3,000, 36.8 per cent of the posts were filled by Indians as compared to 29.4 per cent in 1957. In the next higher salary group of Rs. 3,001 to Rs. 5,000, Indians occupied 16.4 per cent of the total number of posts as against 13.7 per cent in the preceding year.

In the highest salary group of Rs. 5,001 and above Indians held 6.0 per cent of the posts as against 5.1 per cent in the year before.

The total monthly "wage-bill" for the 12,856 persons employed in the foreign owned/controlled firms in posts carrying salaries of Rs. 1,000 and above per annum, works out to about Rs. 2.85 crores. Out of this about Rs. 1.08 crores are being paid to Indians, who account for 54.3 per cent of the total employment as against Rs. 1.77 crores to non-Indians forming 45.7 per cent. The percentages of this total "wage-bill" paid to Indians and non-Indians in each of the five salary groups are given in the table below :

Salary Groups	Indians	Non-Indians	Total
Rs. 1,000 to Rs. 1,500	16.1	3.1	19.2
Rs. 1,501 to Rs. 2,000	8.5	5.3	13.8
Rs. 2,001 to Rs. 3,000	8.2	14.5	22.7
Rs. 3,001 to Rs. 5,000	4.3	22.2	26.5
Rs. 5,001 and above	0.9	16.9	17.8
Total (All Salary Groups)	38.0	62.0	100.0
	(Rs. 108.44 lakhs)	(Rs. 176.97 lakhs)	(Rs. 285.41 lakhs)

The proportion of non-Indians in the salary groups of Rs. 1,000 and above has declined in all the groups of companies during the current year. In 1958, none of the groups of firms had three-fourths or more of the staff earning Rs. 1,000 and above, as foreigners. In 1957, there were two such groups of firms.

Foreigners held more than half but less than three-fourths of the posts in the following six groups of foreign companies as on January 1, 1958: (i) Plantation and Allied Companies (74.4 per cent), (ii) Jute Mills and Presses (72.9 per cent), (iii) Banking (68.3 per cent), (iv) Transit and Transport (65.2 per cent), (v) Other Minerals, Bulkling Materials, etc. (53.0 per cent), and (vi) Managing Agency companies (51.0 per cent). On January 1, 1957

there were seven groups of firms in this category.

The proportion of foreigners is less than half in the remaining 14 groups of companies, viz. (i) Other Agents, Merchants, Shippers, Import/Export firms (49.2 per cent), (ii) Automobiles Dealers and Manufacturers (49.1 per cent), (iii) Insurance companies (48.1), (iv) Sugar and Breweries (44.0 per cent), (v) Machinery, Equipment, Tools, Engineering, etc. (40.9 per cent), (vi) Cotton Mills and Presses (38.0 per cent), (vii) Printing, Publishing, Stationery and Allied Trades (37.1 per cent), (viii) Metals including Iron and Steel (31.7 per cent), (ix) Coal companies (30.7 per cent), (x) Chemicals and Allied Trades (30.1 per cent), (xi) Oil Companies (27.7 per cent), (xii) Leather, Rubber (Trading and Manufacture) (22.0 per cent), (xiii) Public

Utility Companies (21.9 per cent), (xiv) all other Miscellaneous Companies (41.3 per cent).

Of the total of 5,652 foreigners employed in foreign controlled concerns in 1958, 4,927 (87.2 per cent) are British. Americans constitute 3.5 per cent, their number being 200 in 1958. Italians, Germans, Australians, Chinese, Norwegians and Ceylonese have recorded small increases in their number as against a diminution in the number of Britisbers, Americans, Swiss, Greeks, Danish, French, New Zealanders, Dutch, Swedish, Austrians, Czechs, Japanese and Pakistanis.

ABSENTEEISM

One of the commoner complaints of Indian industrialists has been the high percentage of absenteeism and the large labour turnover in Indian factories, mines, etc. The percentage of absenteeism amounts to about 8 to 15 per cent in factories, about 10 to 15 per cent in mines and about 20 per cent in plantations. It is noteworthy that in factories in which the conditions of work and wages are satisfactory and also where there is a system of granting leave with pay apart from the statutory holidays with pay, the incidence of absenteeism is not so high as is otherwise the case.

A study is being conducted by the Steering Group on Wages to find whether the payment of attendance bonus to workers in collieries every week or month instead of every quarter as at present would encourage better attendance.

The available statistical data on absenteeism in certain types of concerns for the years 1951, 1952, 1953, 1954, 1955, 1956 and the twelve months of 1957 are given in the tabular statement below :—

ABSENTEEISM IN MANUFACTURING INDUSTRIES IN INDIA

(Percentage of man-shifts lost to man-shifts scheduled to work)

Period	Cotton Mill Industry							Woolen Industry	
	Bombay	Ahmedabad	Sholapur	Madras	Madura	Coimbatore	Kanpur	Kanpur	Dharawal

EMPLOYEES' STATE INSURANCE CORPORATION

Head Office : 24-3, Asaf Ali Road, New Delhi
 Delhi Regional Office : B-9, Pusa Road.
 Kanpur Regional Office : 7-202, Swarup Nagar
 Bombay Regional Office : Scheme C, Plot No 3, Colaba Road, Bombay 5
 Madras Regional Office : 2, Sir Desikachari Road, Mylapore, Madras 4
 Calcutta Regional Office : 64, Ganesh Chandra Avenue, Calcutta 13
 Indore Regional Office : 65 Race Course Road, Indore
 Jaipur Regional Office : A. K. Mukerjee Building, Railway Station Road
 Hyderabad Regional Office : Mohamadi Block 462 (a), 14, Kavadiguda Road, Secunderabad
 Trichur Regional Office : XXIV 273, Machin-gal Lane, Trichur
 Amritsar Regional Office : 160 13, Hide Market
 Bangalore Regional Office : 13, Kumara Park Extension, Bangalore 1

It may be mentioned at the outset that the Central Government is working out a comprehensive social security insurance scheme for the five million industrial workers of the country. The scheme will amalgamate health, life insurance, provident fund, gratuity and old age pension. This work is in progress (See below for report of Study Group)

The Employees' State Insurance Act, 1948 applies to all factories including factories belonging to Government other than seasonal factories and covers employees in receipt of wages or salaries up to Rs. 400 per month. The administration of the Act is entrusted to an autonomous body called the Employees' State Insurance Corporation. A Standing Committee is to act as the executive of the Corporation. There is also a Medical Benefit Council to advise the Corporation on matters relating to administration of medical benefit, certification, etc. All these bodies are tripartite in character. The scheme is contributory but the Central Government is to make an annual grant to the Corporation during the first five years of a sum equivalent to 5 per cent of the administrative expenses of the Corporation.

As on September 1958 the scheme covered 13.38 lakh employees in 65 industrial centres.* (See below for details.)

During the Second Plan it is proposed to implement the scheme in every industrial centre which has a concentration of 1,500 factory workers, thus carrying the benefits of the scheme to about 2,200,000 employees.

During 1957-58 about 34,000 new employees and of 1957-58 were Rs. 13.90 crores.

The amount collected for health insurance during the year was Rs. 6.8 crores, and the amount spent was Rs. 4.4 crores.

The surplus funds with the Corporation at the end of 1957-58 were Rs. 13.90 crores.

The rates of contribution payable in respect of an employee have been fixed as follows :—

Group of employees	Employees' contribution (recoverable from employees)			Employers' contribution			Total contribution (employees' and employers' contribution)		
	Rs.	As.	Ps.	Rs.	As.	Ps.	Rs.	As.	Ps.
1. Employees whose average daily wages are below Rs. 1	N'd			0	7	0	0	7	0
2. Employees whose average daily wages are Rs. 1 and above but below Rs. 1-8-0	0	2	0	0	7	0	0	9	0
3. Employees whose average daily wages are Rs. 1-8-0 and above but below Rs. 2-0-0	0	4	0	0	8	0	0	12	0
4. Employees whose average daily wages are Rs. 2-0-0 and above but below Rs. 3-0-0	0	6	0	0	12	0	1	2	0
5. Employees whose average daily wages are Rs. 3-0-0 and above but below Rs. 4-0-0	0	8	0	1	0	0	1	8	0
6. Employees whose average daily wages are Rs. 4-0-0 and above but below Rs. 6-0-0	0	11	0	1	6	0	2	1	0
7. Employees whose average daily wages are Rs. 6-0-0 and above but below Rs. 8-0-0	0	15	0	1	14	0	2	13	0
8. Employees whose average daily wages are Rs. 8-0-0 and above	1	4	0	2	8	0	3	12	0

The insured persons are entitled to the following benefits :

(i) sickness benefit, (ii) maternity benefit, (iii) disablement benefit, (iv) dependents benefit and (v) medical benefit.

Amounts (Rs.) distributed in form of cash benefits in 1957-58 are as follows :—

State	Rs. '000				
	Sickness Benefit	Maternity Benefit	Temporary Disablement Benefit	Permanent Disablement Benefit	Dependent Benefit
1	2	3	4	5	6
Andhra	385	29	23	3	3
Bihar	—	—	2	—	—
Bombay	8,045	241	696	155	70
Delhi	794	4	78	52	9

Madhya Pradesh	1,186	38	78	12	4
Madras	1,443	130	110	10	7
Punjab	134	2	26	16	8
Rajasthan	40	4	8	—	—
Uttar Pradesh	1,466	2	121	32	11
West Bengal	2,874	38	317	28	19
Total	16,812	515	1,478	309	133

* In Feb. 1959 it was in force in 73 centres.

The scheme was inaugurated in Kanpur and Delhi on 24th February 1958.

The scheme covered upto September 1958, 13-38 lakh employees.

The number of employees covered in different areas are :

Delhi (47,000); Kanpur (90,000); seven cities of the Punjab State (38,000) :—namely, Amritsar (including Chhehrata), Ambala, Batala, Bhiwani, Jagadhri-Abdullapur, Jullundur and Ludhiana; Nagpur (24,000); Greater Bombay (490,000); Coimbatore (45,000); Indore, Gwalior, Ujjain and Ratlam (59,000); Hyderabad and Secunderabad (14,000); Calcutta City and Howrah District (250,000); seven industrial centres of Andhra State (13,000)—namely, Vishakhapatnam, Chittivalasa, Nellimarla, Guntur, Mangalagiri, Eluru and Vijayawada; and Madras City and suburbs (51,000); Agra, Saharanpur and Lucknow (22,000); Akola and Hinganghat (10,500); Quilon, Alleppey, Ernakulam, Alwaye and Trichur (30,500); Madurai, Ambasamudram and Tuticorin (38,000). Six cities of Rajasthan: Jaipur, Jodhpur, Pali, Bikaner, Bhilwara, Lakheri (11,500); Bawar (8,000); Burhanpur (4,000); Allahabad, Varanasi, Rampur and Kalyanpur (11,500); Patna, Kati-

har, Monghyr and Samastipur areas of Bihar (15,500); Sawai-Madhopur (Rajasthan) (2,500); Hathras, Aligarh, Bareilly and Shikohabad (11,000); Trivandrum (Kerala) (4,000); Bangalore (Mysore) (50,000).

A scheme to liberalise benefits to insured workers suffering from T.B. was put into force from 1st June 1958. After exhausting his sickness benefit of 56 days, an insured person suffering from T.B. who has put in two years continuous service in a factory will get additional sickness benefit at half the sickness benefit rate subject to a minimum of Annas 12 and a maximum of sickness benefit rates for 18 weeks more. Insured persons with three years continuous service will receive free medical treatment for an extra period of about one year.

The insured persons who had to undergo amputations due to employment injuries or otherwise, are provided with artificial limbs at the cost of the scheme. Upto 31st March 1958, 38 insured persons were fitted with artificial limbs.

The Government of India later decided to extend medical care under the scheme to families of the insured persons without raising the employers' contributions.

The scheme was extended to families in Bangalore with effect from 27th July 1958—the first place in which the scheme was so extended—and the families of insured persons in the already implemented areas of Bihar were provided with medical care with effect from 2nd October 1958.

The families become entitled to medical care 13 weeks after the insured person entitled to benefits under the scheme.

The position in April 1958 was that only Uttar Pradesh and West Bengal of the States in the country were opposed to the extension of the scheme to the families of insured persons.

Hospitals exclusively for the use of insured persons are now available in Madras and Bangalore.

In Bombay, Calcutta, Kanpur, Bangalore and Madras, plans for the construction of new hospitals are in various stages of development.

A sum of Rs. 5.75 crores is being spent on the construction of new hospitals.

In addition, a sum of Rs. 5.25 crores is likely to be spent on construction of a number of dispensaries at various industrial centres falling under the scheme.

Sickness and Maternity Benefits became payable from the date of commencement of the first benefit period and the remaining three benefits from the date of implementation in each area which are indicated below :—

State	Area	Date of Implementation	Date of commencement of first benefit period
1	2	3	4
Union Territory of Delhi	Union Territory of Delhi	24- 2-1952	23-11-1952
Punjab	Ambala, Amritsar (Chhehrata), Batala, Bhiwani, Jamnagar, Jullundur and Ludhiana	17- 5-1953	14- 2-1954

SOCIAL SECURITY REPORT

The Study Group on Social Security set up by the Government of India in August 1957 to which mention is made at the beginning of this section made a report in December, 1958.

The Study Group was set up in pursuance of one of the recommendations on labour policy in the Second Five-Year Plan.

The Chairman was Mr. V. K. R. Menon, Director, International Labour Office (India Branch).

The most important recommendation is an old age, invalidity and survivorship pension-gratuity scheme in the place of the present provident fund schemes for workers.

This will involve the payment of a small gratuity sufficient to meet the needs of workers, and using the rest of the resources towards giving the maximum pensionary benefits.

The Group has recommended that in order to provide pensions of reasonable amounts, the

resources should be augmented by increasing the present rate of contributions of workers and employees to the provident fund from 6½ per cent to 8½ per cent. While the statutory amendments and administrative arrangements required for introducing a pension scheme will take time, the increase of provident fund contributions to 8½ per cent should come into effect immediately. Delay in effecting the increase, the Group points out, will adversely affect the insured workers, as a year of contribution at the existing rate of 6½ per cent will be taken as only nine months for reckoning length of service.

As regards the Employees' State Insurance Scheme, the Group has recommended that the quantum of cash benefits at present granted under the Act should be augmented as follows :

- sickness benefit should be payable upto a maximum period of 13 weeks in any three benefit periods of 26 or 27 weeks each ;
- extended sickness benefit, at full normal benefit rate, may be granted in case of

tuberculosis or other prescribed long term diseases for a further period of 39 weeks but only to such persons as have completed at least two years of qualifying service; and

- maternity benefit rate should be raised so as to be equal to the full average wage of the insured woman and subject to a minimum of one rupee per day.

The Group has stated that there is considerable scope for improving the standard of medical care and treatment for workers covered by the Employees' State Insurance Act.

The provision of medical care and treatment for families of workers is urgently needed as it is this omission that has brought in quite legitimate criticism from organisations of workers and individual workers themselves.

All these improvements could be provided only if substantial additional funds are available. For this purpose, the Group has suggested that

the levy on employers should be increased to the maximum that the law already provides for. While the statutory maximum works out at 4½ per cent of the total wage bill, at present only 1½ per cent are paid by employers in areas where the scheme has been implemented. The Group has stated that the justification which existed for levying contributions at lesser rates has, with the considerable extension of the scheme, lost much of its force.

The Group has recommended the setting up of a single agency which should, as a first step, assume administrative responsibility for the Employees' State Insurance Act and the Provident Fund Acts. In the case of workers covered by both the Employees' State Insurance Act and one of the Provident Fund Acts, employers will pay to this agency, in one single payment, contributions, due under both.

The Group has further stated that it should be the aim to make the coverage under the two enactments identical as far as practicable and in stages by a prescribed target date.

As a step towards facilitating this, the Group has recommended the deletion of the provision in the Employees' Provident Funds Act under which newly established factories are exempted from its provisions for the first three years.

Thus, in the case of factories where workers are covered for the full range of benefits under the Employees' State Insurance Act and the proposed scheme of old age, invalidity and survivorship pension-cum-gratuity, the rates of contributions will work out to about 13 per cent (4½ per cent plus 8½ per cent) by employers and 10½ per cent (2½ per cent plus 8½ per cent) by employees.

In its report, the Group has stated that under existing conditions any large extension of social security measures will not be possible either in terms of coverage or actual benefits.

The aim should be to improve upon existing measures and to simplify administrative procedure, restricting additional financial levy for the time being to what is required for this limited purpose.

The Group has stated that while the provisions in the Industrial Disputes Act relating to compensation on retrenchment and lay-off have afforded some relief and acted as a deterrent to hasty retrenchment, certain unsatisfactory features have nevertheless been revealed.

The permanent remedy may be in the form of a scheme of unemployment benefit but a scheme of this type will not be practicable for some time to come. Till then, improvements should rather be in the direction of avoiding closures and consequent retrenchment, as far as possible for example, by creating a fund through which industrial units in temporary difficulties can be assisted and kept running where such a course is in the interests of the workers and the public at large.

ACCIDENTS

The Mill-owners' Association, Bombay, has done a considerable amount of good work of a pioneering character in connection with Safety-First measures. Working in conjunction with the Safety-First Association of India, the Association drew up a Safety Code for the Cotton Textile Industry and this Code was published and put into operation from August 1940.

The Indian Factories Act requires the manager to report all accidents which cause death or bodily injury whereby the person injured is prevented from returning to his work in the factory during the 48 hours next after the occurrence of the accident.

It is the duty of the Inspector of Factories to make an investigation as soon as possible into the causes of and the responsibility for a fatal or serious accident, and to take steps for the prosecution of the person concerned if it is found that the death or serious injury resulted from any infringement of the provisions of the Act or of the rules framed under the Act.

The Department of Mines has been strengthened to facilitate more frequent inspection of mines. As an emergency measure, the Coal Mines (Temporary) Regulations, 1955 have been promulgated for the prevention of apprehended danger and for the speedy remedy of the con-

ditions likely to cause danger. The entire codes of coal and non-coal mines regulations are being revised to provide for more comprehensive measures for safety in mines.

Figures for the year 1939 and 1941 to 1954 are given in the table below.

Year	FACTORIES				MINES			
	Fatal	Serious	Minor	Total	Fatal	Serious	Minor	Total
1939	221	5,837	29,948	36,006	284	1,410	10,584	12,280
1941	271	8,374	40,091	48,736	303	1,489	10,969	12,761
1942	323	9,111	44,740	54,174	342	1,484	10,871	12,697
1943	361	10,016	48,799	59,176	328	1,509	9,000	10,837
1944	348	10,638	56,336	67,322	365	1,568	8,946	10,879
1945	342	11,006	58,775	70,123	307	1,441	8,724	10,472
1946*	252	8,423	48,480	57,155	328	1,375	9,812	10,915
1947†	214	8,675	49,892	58,781	283	1,460	8,187	9,850
1948	259	9,132	58,673	68,064	272	1,295	8,518	10,085
1949	194	6,513	46,902	53,609	271	1,558	16,529	18,358
1950‡	248	72,164	—	72,412	273	2,033	15,516	17,822
1951	234	75,713	—	75,947	425	2,658	N.A.	3,998‡
1952	257	91,033	—	91,290	453	3,897	N.A.	4,340
1953	256	93,481	—	93,687	388	4,286	N.A.	4,674
1954	297	92,709	—	92,976	407	4,491	N.A.	4,898

During 1957 out of 6.3 lakh workers employed in all mines, 254 persons were killed due to accidents as against 333 in 1956. The annual average of deaths caused by accidents for the previous five years was 392.

The fatality rate per thousand workers in 1957 worked out to 0.40, which was 25 per cent less than the 1956 figure of 0.53. The average figure for the previous five years was 0.67.

In coal mines, which employ about 3.5 lakh persons, the reduction in the fatality rate was even greater.

The number of persons killed as a result of accidents during 1957 was 179 as compared with 259 in 1956 and an annual average of 316 for the previous five years.

The fatality rate per thousand persons employed in coal mines was 0.51 for 1957, which was 30 per cent lower than the 1956 figure of 0.73. The 1957 rate compared even more favourably with the average figure of 0.91 for the five years prior to 1956.

During 1957, the number of persons injured in mine accidents was 3,515 as against 4,281 in 1956 and an average of 4,266 during the previous five years.

The fatality plus injury rate declined from 7.33 in 1956 to 5.90 in 1957, recording a fall of 20 per cent. The average rate for the previous five years was 7.89.

In the case of coal mines, there was a reduction of 12 per cent from 8.83 in 1956 to 7.81 in 1957. The figure for the previous five years was 9.01.

* Excluding the Punjab and the N.W.F.P. in the case of factories.

† From 1950 onwards figures for Serious and Minor accidents have been combined into Non-fatal accidents.

‡ The figures relate to 12 States of the Indian Union, known as Provinces before the 1950 constitution whereas the previous figures relate to the pre-partition British India.

§ Excluding Punjab and West Bengal in the case of factories.

|| Since Statistics for minor injuries are incomplete, total figures for 1951 onwards in respect of mines are not strictly comparable with those for the previous years.

N.A. Not available.

WELFARE ACTIVITIES

The Reports of the Labour Investigation Committee on labour conditions in 36 industries as also their Main Report as well as the issues of the Indian Labour Year Book published by the Labour Bureau of the Government of India contain detailed and comprehensive information regarding labour welfare undertaken in various States and industries.

Until recently the Government of India had not undertaken any activities to promote the welfare of industrial labour employed in Central concerns. Recently, however, they have done a great deal in this respect. Welfare Funds have been instituted in coal and mica mines. The Central Government have issued directives to all employing departments to constitute Labour Welfare Funds in all Government undertakings. The Fund is to be utilised for providing indoor and outdoor recreation, reading rooms, etc., to workmen employed in the undertakings. The Fund will be financed partly by Government grants.

Welfare work had been done directly by a number of State Governments.

HOUSING

In the past the policy of Government as well as of industrial employers was to leave the matter of housing more or less in the hands of private enterprise. The rapid growth in industrial employment made the housing problem serious and the influx of large numbers of workers to urban centres during the war further aggravated the situation.

In April 1948 the Government of India announced as part of their industrial policy a scheme for the construction of a million workers' houses to be completed within a period of ten years but on account of financial stringency much headway could not be made in the furtherance of the scheme.

The Government of India introduced a Subsidised Industrial Housing Scheme in 1952. Under the Scheme, houses are to be constructed for industrial workers through the agency of State Governments, Statutory Housing Boards, employers and registered co-operative housing societies of industrial workers. The Central Government would assist financially these agencies both in the form of subsidies and loans. For housing schemes undertaken by State Governments or Housing Boards the subsidy will be to the extent of 50 per cent of the cost of construction and the loan also to the extent of 50 per cent. In the case of other housing schemes the subsidy and loan will be to the extent of 25 per cent and 75 per cent respectively. The Government of India also allotted during 1952-53 a sum of Rs. 716-685 lakhs for the industrial housing scheme. As a result of the review of the working of the scheme during 1952-53 certain important modifications were later made in the scheme.

The scale of financial assistance to the employers and workers' co-operatives under the Government of India Subsidised Housing Scheme was liberalised for the period 1953-1954. The percentage of loan payable to co-operatives under the original scheme was 87½. This was raised to 50 to offer better incentive to workers.

co-operatives. The employers and workers' co-operatives may get as much as 25 per cent of the approved cost of a project as subsidy; in addition 7½ per cent of the cost is advanced as loan to employers and 50 per cent as loan to co-operatives. The loan to employers is repayable in 15 years and bears an interest of 4½ per cent. In the case of workers' co-operatives, the period is 25 years and the rate of interest 4½ per cent.

The draft outline of the Second Five-Year Plan gives rough figures of the total number of houses constructed during the First Plan period in the public and private sectors, as follows:—

Public construction	No. of houses/tenements
Industrial Housing	77,000
Low Income Group Housing	40,000
Refugee Housing	323,000
Housing by Central and State Governments	800,000
Total	740,000
Estimated Private Construction	750,000
Grand Total	1,490,000

The total provision under the Second Plan is Rs. 45 crores. About 1,25,000 tenements are expected to be built.

Up to the end of January 1958, it is estimated some 66,700 houses were built under this scheme out of 91,250 authorized.

Up to January 1958 the total financial aid sanctioned was Rs. 25.79 crores and the amount dispersed Rs. 17.32 crores. Up to the end of April the amount sanctioned was Rs. 28.63 crores.

The amount of loan allocated by the Central Government for 1958-59 was Rs. 2.5 crores and the subsidy Rs. 2 crores, making a total of Rs. 4.5 crores.

AMENITIES

Section 47 of the Factories Act, 1948 makes it obligatory for all factories employing more than 150 workers to provide adequate shelters and a suitable lunch room for the use of workers during periods of rest. Almost all large industrial establishments had provided tiffin rooms and rest shelters for their workmen. Most concerns had also permitted the establishment of tea stalls on the premises but apart from this, little effort had been made to run co-operative canteens on the lines of those which are associated with most of the large factories in the West.

The Act of 1948 provides for the setting up of canteens in factories that employ more than 50 women.

Except for the Ahmedabad Textile Labour Association, the Railwaymen's Unions, and the Mandor Sabha of Indore, labour unions have not done much by way of labour welfare. This has been due largely to lack of funds. Some of the Railwaymen's Unions have organized co-operative societies, and various kinds of funds for the provision of specific benefits, such as, legal defence, death and retirement benefits, unemployment and sickness benefits and life insurance, etc.

In 1939, the Bombay Government first organised model welfare centres. In July 1953, the Government of Bombay transferred all welfare activities to the Bombay Labour Welfare Board constituted under the Labour Welfare Fund Act, 1953.

Welfare centres were also opened in the areas covered by the pre-reorganization States of Assam, Bihar, Madhya Pradesh, Punjab, U.P., West Bengal, Hyderabad, Madhya Bharat, Mysore, Rajasthan, Saurashtra, Travancore-Cochin, Delhi and Tripura.

Although the Factories Act requires that provision should be made for washing especially in factories where workers come into contact with injurious or obnoxious substances, very little effective provision exists in this regard because most factories only provide water for washing but not soap, soda, towels, etc. As for bathing facilities, extremely few employers provide this amenity. Section 42 of the Factories Act, 1948 provides for the maintenance of such facilities in every factory.

Other types of welfare work done by factories relate to the provision of recreational facilities, amenities for the education of workers and their children, the provision of cost price grain shops, the establishment of co-operative societies, etc.

On railways there are educational facilities for the children of the employees mostly free of charge. Staff Benefit Funds have also been created which give monetary help to the children and widows of the deceased employees.

Medical facilities provided by employers range from first-aid posts and dispensaries to first-class hospitals.

The total amount of money spent by the Central Government on labour welfare except for railways during the year 1956-57 : Rs. 157.10 lakhs.

The amount spent by Railways on staff benefit (fund) during 1957-58 : Rs. 25.60 lakhs.

COAL MINES WELFARE FUND

This Fund was constituted under the Coal Mines Labour Welfare Fund Act of 1947. The principal objects for which this fund is to be utilised are defined in the Act. These are: (1) the improvement of standards of living including housing and nutrition, the amelioration of social conditions and the provision of recreational facilities for the benefit of the labour employed in the coal mining industry; (2) the provision of transport to and from work; (3) the improvement of educational facilities; (4) the provision of improvement of supplies of water; and (5) the improvement of public health and sanitation, the prevention of disease, the provision of medical facilities and the improvement of existing medical facilities. The Act makes provision for the appointment of an Advisory Committee consisting of Government Officers and an equal number of members representing colliery owners and workers employed in the coal mining industry of whom one has to be a woman.

Both the cost of administration of the fund and the salaries and allowances of the officers appointed in connection therewith are to be defrayed from the fund itself.

At present a cess of six annas per ton of coal or coke has been levied for being credited to the welfare fund. The principal activities of the fund which are financed out of this cess are:—

- (i) Housing
- (ii) Hospitals
- (iii) Prevention of disease
- (iv) Water supply
- (v) Pit-head baths and canteens and others.

The cess is now being apportioned between the Housing Account and the General Welfare Account of the fund in the ratio 2:7. A Coal Mines Labour Housing Board consisting of eight members has been set up.

The fund gives certain grants and subsidies to various other funds such as the Lepor Fund.

Regional hospitals and maternity child welfare centres at Katras and Thara in the Jharli coalfield and Chora and Searosole in the Raniganj coalfield have been opened. A central hospital for Jharli coalfield has been opened and the construction of a central hospital for the Raniganj coalfield has started.

The total number of patients treated in the 4 Regional Hospitals during the year 1956-57 was 107,000. The Fund runs 50 Adult Education Centres attended by more than 4,000 workers. 47 welfare centres for women and children were functioning in different coal-fields.

For the prevention of disease, grants are being made to the Mines Boards of Health and a scheme for the treatment of tuberculosis has been drawn up. Anti-malaria work is also in full progress.

The construction of pit-head baths and of canteens has now been made compulsory.

A scheme of domiciliary treatment to coal mines workers in Bihar and West Bengal suffering from T.B., was introduced in June 1958. In addition to free treatment, the Fund will give grant-in-aid for special diet at rates upto a maximum of Rs. 50 per month per worker for a maximum period of 6 months. If the patient happens to be the only earning member of the family he will receive upto Rs. 50 per month as subsistence allowance.

Since 1955 twenty Miners Institutes have been opened in coal mine areas for providing recreational and educational facilities to workers.

So far the Fund has constructed over 2,100 houses for coal-miners. 300 collieries had canteens benefiting about 16,215 children and pithead baths had been built in 183 collieries providing arrangement for about 2 lakh labourers.

During the year 1956-57 a sum of Rs. 59.35 lakhs was spent on various activities.

Mica Mines Labour Welfare Fund.—The Mica Mines Labour Welfare Fund Act, 1946, which was designed to constitute a similar fund for the benefit of mica workers, provides for the levy of an ad valorem duty not exceeding 6½ per cent on all mica exported from India. Under the Act Advisory Committees for Bihar, Madras, and Rajasthan were constituted. In Madras three dispensaries have been started for use by mica miners and five radio sets have been installed in selected mica mining centres.

In June 1956, the Fund was running 13 primary schools, one middle school and 10 adult education schools at its own expense and was giving financial and other aids in the shape of buildings, furniture, books, etc. to 10 schools.

During the year 1957 the Fund conducted 5 dispensaries each in Bihar and Rajasthan and 3 in Andhra. Besides, there were 4 mobile medical units in Rajasthan, and one each in Bihar, Andhra and Ajmer.

There were 2 maternity centres in Ajmer, 4 in Andhra, 2 in Bihar and 5 in Rajasthan.

During 1957, the Fund also maintained six elementary schools in Andhra and one middle school at Kalkchedu. The number of children attending these schools was 566. Scholarships were granted to 65 students for studying in secondary schools and colleges.

In Bihar, 4 multi-purpose institutes were being maintained by the Fund during 1957. In Rajasthan 3 primary schools continued to function.

Recreational facilities for mica miners are also being provided in all the 4 States.

WORKERS' EDUCATION

The Government of India in co-operation with the Ford Foundation appointed an International Team to suggest steps to be taken for (a) education of trade union representatives in the techniques of trade union organisation, management and financing, (b) education of union members for intelligent participation in union affairs and (c) education of union representatives in responsible and effective participation in management.

The Team submitted its report in June 1957.

The main recommendations of the Team are:

1. A central board with semi-autonomous authority and having a sufficiently representative character should be established for the purpose of formulating the policy and administering the educational programmes.
2. A similar board should be established in States or Regions and in important industrial centres.
3. The objective of workers' education programme should be to provide to any worker who wishes the opportunity to understand what a trade union is and how it operates and to develop the necessary skill, confidence and knowledge to participate in any level of trade union activity.

4. The nature of instruction should aim at inculcating knowledge of the structure, functions and traditions of trade unions; first hand experience regarding conducting of meetings, negotiations with employers and participation in welfare development programmes; and acquaintance with labour laws and regulations as well as workers' participation in management.

5. To make workers' education really effective and continuous, it should be conceived of as a life saving process and large variety of courses and conferences differing in duration and in their venue should be adopted.

6. Programme of training of teachers and teacher-administrators should be inaugurated forthwith.

A Central Board for Workers' Education was constituted by the Central Government in November 1958.

A batch of about 50 teacher-administrators has also been trained under the scheme. These teacher-administrators will now train worker-teachers who in turn will conduct classes for workers.

The second phase of this programme—the training of worker-teachers—was expected to start in April 1959. The teacher-administrators trained in the first phase are to train the worker-teachers.

A sum of Rs. 60 lakhs has been provided in the Second Plan for the education scheme.

Evening Classes Training

The Government of India have also decided to start evening classes at important centres like Bombay, Bangalore, Calcutta and Kanpur to help industrial workers to better their prospects.

About 10,000 workers are expected to benefit under the scheme during the second Five Year Plan period.

The subjects of instruction will be shop arithmetic, blue-print reading and trade theory.

The evening classes will be held for 2 hours thrice a week and the course will be of two years' duration. Any literate worker sponsored by the employer will be eligible for training.

The Labour Welfare Institute in Bombay started a pilot project on workers' education in Nov. 1954.

Similarly, in pursuance of the recommendation of the Shiv Rao Committee, the Ministry of Labour, Government of India, have formulated the Pre-employment In-Plant Training (Apprenticeship) Scheme.

The scheme was expected to be implemented first in cities like Bombay, Calcutta and Gwalior in 1957 with 675 seats.

By the end of the second Five Year Plan the number of seats will be increased to 5,000 in all States. The Planning Commission has included a sum of Rs. 49.6 lakhs in the Plan for organising apprenticeship programmes. The expenditure will be shared between the Government of India and the participating States in the ratio of 6 : 4.

PENSIONS, GRATUITIES

All monthly and time-rated workmen in the industrial establishments of Government are entitled to pensions on retirement provided that a minimum of ten years' service has been put in. On the railways an employee can opt for a pension if he so desired. Outside Government concerns, pensions on retirement are almost non-existent.

A study set up by the Government of India suggested in December 1958 the conversion of existing provident fund schemes for workers into a statutory pensions scheme, as part of an old-age invalidity and survivorship pension-gratuity.

All employees of local and public bodies and a few of the larger public companies receive gratuities on retirement. Gratuities are also paid to non-pensionable workers who have put in not less than thirty years' service in Government concerns.

† Pre-reorganization.

In all cases specified periods of qualifying service have to be put in before gratuities can be earned. The rules of individual administrations vary widely but the most generally accepted principle is half a month's pay for each year of service limited to fifteen months' pay in all. Permanent Government servants who have put in less than ten years' active service are entitled to gratuity if they are compelled to retire on medical certificate.

The workers in Jute Mills in West Bengal have been awarded gratuity by the Industrial Tribunal on the following lines: On retirement, resignation or retrenchment after 15 years' service: $\frac{1}{2}$ month's basic wages per year of service subject to a maximum of 15 months' basic wages. On reaching the age of superannuation or termination or retirement on medical grounds and on death: $\frac{1}{2}$ a month per year of service with a maximum of 15 months' basic wages.

The Industrial Court, Bombay, has awarded gratuity to the workers in cotton textile mills in Bombay and Ahmedabad. The terms of the awards are the same as in the Jute Industry with this difference that the rate of gratuity is one month's basic wages per year of service prior to the introduction of the Employees Provident Funds Scheme on 1st November 1952 and half-a-month's wages thereafter.

A similar award was given for textile workers in Ahmedabad. The scheme came into operation on 15th September 1957.

For the period for which provident fund has been in operation no gratuity will be payable.

Schemes of gratuity have been introduced in several engineering concerns by awards of Tribunals, the pattern followed being similar to that in the case of the Jute mills.

A few large industrial establishments in India have started their own Retirement Benefit schemes where an account is opened for every individual worker to which a fortnight's or 13 days' pay is credited every year. Interest is allowed and the amount standing to a worker's credit is paid to him on retirement.

Compulsory contributory schemes are provided in many establishments.

AGRICULTURAL LABOUR

A second all-India agricultural labour enquiry ended in Feb. 1959. The Labour Ministry is now drawing up the report. The first enquiry was conducted in 1950-51. The findings are outlined below.

Out of 54 million rural families in India nearly 17.6 million are those of agricultural labourers having an average annual income of Rs. 447 per family as against an expenditure of Rs. 468, according to an inquiry into the working and living conditions of agricultural labour conducted by the Union Labour Ministry in 800 villages representative of the Indian Union.

The object of the agricultural Labour Enquiry was to collect data on employment, earnings, cost of living, living standards and indebtedness of agricultural labourers in the Indian Union with a view to considering what protective and ameliorative measures, including the fixation of minimum wages, should be undertaken to improve conditions.

The enquiry was conducted in three stages viz. General Village, General Family and Intensive Family Surveys in about 600 villages selected on the principles of stratified random sampling. The General Family Survey covered 104,000 families and the Intensive Survey about 11,000 agricultural labour families. The data collected during the Intensive Family Survey related to the year March 1950 to February 1951. For administrative convenience the inquiry was divided into six zones namely, North, East, South, West, Central and North-West, which corresponded with the Census Zones of 1951.

FINDINGS

The more important findings of the Enquiry are summarised below—

Earning Strength.—On an average the total earning strength (which included helpers) per family was about 2.6. Work was done by almost all the men and a little over half the women and the children above 10 years of age. The proportion of women was more in south, west and central India.

Employment.—The Zonal differences in the average number of days employed on wages were considerable. Male agricultural labourers were employed for 289 days in North, 245 in Central, 224 in East, 202 in North West, 196 in West and 181 in South India.

Most women undertook casual employment mainly to supplement the family income. The average employment of women workers was 120 days in agricultural and 14 in non-agricultural labour. Of the total number of man days worked by casual labourers, men contributed 62 per cent, women 35 per cent and children the remaining 3 per cent.

Unemployment.—In the Indian Union as a whole as many as 97 per cent of the attached workers reported wage-paid employment every month; and on the average they were unemployed for only 19 days during the year. The problem of unemployment concerned essentially the casual workers, of whom 82 per cent at a monthly average reported unemployment during an average of 8 days per month. On the average in the whole of India, an agricultural worker had paid employment for 218 days in the year, cultivated his own land for 49 days and was unemployed for 98 days.

Wages.—The actual payment of wages was made in a variety of ways, wages in cash and in kind, wages partly in cash and partly in kind, payment on time basis and on a piece basis, with or without perquisites in the form of mid-day meal, tea or tobacco.

Of the total man days worked by adult casual workers in the Indian Union, payment on a piece basis accounted for only 5.5 per cent. Time wages amounted to 94.5 per cent.

In the total wage employment in agriculture 57.7 per cent of the man days were paid in cash, 32.2 per cent in kind and the balance 10.1 per cent partly in cash and partly in kind. The practice of supplying perquisites prevailed to the extent of 33 per cent of the total man days worked by adult workers.

The average daily wage rate of the casual worker was found to be 17.5 annas for the whole of India. It was 23 annas in the North-West, 20 in the East, 19 in the North, 18 in the West, 16 in the South and 13 in Central India.

The average daily wage of women workers amounted to 62 per cent of the men's average daily wages. The wage rates of women workers in South, West and Central India were proportionately much lower than in other zones.

Of the male workers about 58 per cent could secure additional non-agricultural employment during an average of 56 days per annum. Among women about 34 per cent were employed on non-agricultural labour for an average of about 41 days a year.

Unlike casual workers attached workers, who were mostly men, received fixed wages that were generally for a period of one year irrespective of the seasonal nature of the work.

Minimum wage rates have so far been fixed for agricultural workers under the Minimum Wages Act, 1948 by the States of Punjab, Delhi, Himachal Pradesh, Uttar Pradesh, Bihar, Assam and Rajasthan, in Kutch, in Bombay, in Coorg, in Mysore, and in the former Vindhya Pradesh area in Madhya Pradesh.

In the Indian Union as a whole children formed 4.6 per cent of the total agricultural labour force. On the average they were employed for 150 days in agricultural and 18 days in non-agricultural work during the year. The daily wage was 11.1 annas in agricultural and 9.9 in non-agricultural employment.

Income.—The family had as an economic unit various sources of income, including agricultural and non-agricultural labour, the cultivation of its own land, and occupations other than farming. The average annual income per family worked out to Rs. 447 of which Rs. 287 accrued from agricultural labour. About 57 per cent of the total income from agricultural wages accrued from cash payments and the remaining 43 per cent from payment in kind, including perquisites.

The average income of an attached worker's family was Rs. 489 and that of a casual worker's family Rs. 442.

Cost of Living.—The income of the agricultural labour families being low, it was the necessity to subsist that guided their expenditure and there was hardly any problem of preference as regards goods and services on which money should be expended.

With an all India average income of Rs. 447 the expenditure per agricultural labour family was Rs. 464 including Rs. 7 on ceremonies. There was thus a deficit of Rs. 14 on consumption alone. Of the 461 rupees spent on recurring items of expenditure, Rs. 303 (65.3 per cent) was spent on food, Rs. 29 (6.3 per cent) on clothing, totalling 91.6 per cent on food and clothing alone. Considered by zones, the annual income per family was Rs. 551 for North, Rs. 508 for East, Rs. 382 for South, Rs. 391 for West, Rs. 417 for Central, and Rs. 651 for North-West.

Taking the Indian Union as a whole the calorie intake of an agricultural worker was 2,230 and thus short of the normal requirement (3,000 calories) by about 25 per cent.

Indebtedness.—About 45 per cent of the agricultural labour families were indebted, the average debt per family being Rs. 47. Taking into account only the indebted families, the average debt was Rs. 105. The percentage of indebted families was the highest in North-West (75.8) and lowest in North. The percentage of casual workers families in debt was 44 and of attached workers families 51. The amount of debt per indebted family was Rs. 100 for casual workers and Rs. 143 for attached workers. The higher indebtedness of the latter was accounted for by the fact that it was easier for them to secure loans from their employers, generally as advances from wages. Debts were incurred mainly for production, consumption and social purposes, the debt on consumption alone being Rs. 74 out of an average debt of Rs. 105 per indebted family.

The biggest single source of borrowing was moneylenders, next in importance came employers. The amounts borrowed were Rs. 38 from the former and Rs. 22 from the latter. Shopkeepers lent Rs. 6 and Co-operative Societies only Rs. 1.

CENTRAL LABOUR INSTITUTE

As a step towards meeting the need for an agency designed to afford facilities for the scientific study of the various aspects of industrial development as relating to the human factor, the Planning Commission, as part of the First Five Year Plan, recommended the establishment of a National Museum of Industrial Safety, Health and Welfare. The Museum is to serve as a nucleus of an Institute for conducting specialised courses of training and education in labour problems.

The Institute will be a composite one, comprising (1) a Museum of Industrial Safety, Health and Welfare, (2) an Industrial Hygiene Laboratory, (3) a Training Centre, (4) a Library-Information Centre, (5) a Productivity Centre, and (6) a Training-within-Industry Centre.

A course in Training-within-Industry has started functioning with a well-equipped staff. It provides facilities for the training of nominees of industrial concerns as T.W.I. instructors. The Centre which is designed to cater to the needs of the industry in the country is at present located in the Industrial Assurance Building,

Churchgate, Bombay 1, and is under the direction of Mr. P. K. Sathe, Deputy Adviser (Factories), Ministry of Labour, Government of India.

The Government of Bombay have made available free of cost a 13 acre plot of land on the Kuria Hills just behind the Santa Cruz Aerodrome at Bombay. A capital grant of Rs. 10 lakhs has been sanctioned by the Central Government for the construction of the main Institute building. An Operational Agreement has been signed between the U.S. Government and the Government of India under which a sum of \$100,000 has been made available for the purchase of plant, equipment and technical publications of the Institute. The Institute started functioning in the middle of 1957.

TRIPARTITE LABOUR MACHINERY

The Tripartite Labour Machinery at the centre consists of (a) Indian Labour Conference, (b) Standing Labour Committees and (c) Industrial Committees. Besides, there are such bodies as the Joint Consultative Board, the Central Advisory Council, the Labour Ministers' Conference etc.

INDIAN LABOUR CONFERENCE

The Indian Labour Conference is composed of 24 members representing the Central and State Governments and 9 members each representing the employers and workers, nominated by the Government of India in consultation with the all-India organisations of employers and workers.

The function of the Conference as laid down at the fourth Indian Labour Conference is to "advise the Government of India on any matters referred to for advice taking into account suggestions made by the Provincial Governments, States and Chamber of Princes and the representative organisations of employers and workers recognised for the purpose of the Conference".

The Indian Labour Conference had held 16 sessions upto May 1958. No meetings were held in 1946, 1949 and 1953.

The 16th session of the Indian Labour Conference was held at Nainital on 19th and 20th May 1958 with Mr. Gulzarilal Nanda, Minister for Labour & Employment in the chair. The conference approved the guiding principles regarding grievance procedure evolved by a Sub-Committee at the earlier conference and requested the Sub-Committee to draft a simple and flexible grievance procedure in accordance with these principles.

The consensus of opinion at the conference was that the time was not appropriate for suspension of adjudication as a method of resolving disputes.

Criteria for voluntary recognition of trade unions by employers were laid down.

The conference also discussed the closure of units and unemployment in various industries such as cotton textiles, jute, plantations and engineering and recommended the steps that should be taken to avoid hardships. In particular, the conference recommended that two months' notice should be given to the workers regarding closure of a shift and three months' notice regarding total closure.

Government should, as far as possible, work closed units as a measure of unemployment relief pending the completion of liquidation proceedings or transfer of ownership.

The Session adopted, with certain amendments, the Code of Discipline in Industry evolved by the Standing Labour Committee in October 1957. The Code lays down certain do's and don'ts both for managements and unions with a view to ensuring better discipline in industry and includes (1) no strike or lock-out without notice and no go-slow tactics, (2) no acts of violence, intimidation or coercion, (3) utilisation of exist-

ing machinery for settlement of disputes and (4) speedy implementation of awards and agreements.

A model procedure for the redress of grievances was evolved and accepted by both parties.

The Code also provides for sanctions against breaches of the Code. The sanctions will be enforced by the Central Organizations of employers and workers against the constituent units.

The sanctions are : ask the unit to explain the infringement of the code ; give notice to the unit to set right the infringement within a specified period ; warn and in cases of a more serious infringement, censure the unit concerned ; impose on the unit any other penalty open to the organisation ; disaffiliate the unit from its membership in case of persistent violation of the code.

The Central Ministry of Labour has established a separate Evaluation and Implementation Division to enquire into breaches of the Code and to expedite implementation of Labour Awards.

The Ministry has also set up a Central Committee consisting of 4 representatives each of employers and employees and an equal number of officials. Similar Committees at the State level have been formed in U.P., West Bengal, Punjab and Rajasthan.

Some of the more recent major strikes were taken up for investigation in the context of the Code of Discipline. Inquiry was completed in regard to the Premier Automobile dispute (Jan. to July 1958) in Bombay, and its sequel, the one-day general strike in Bombay on July 25, 1958. Preliminary steps were also taken to conduct an inquiry into the Calcutta Tram Strike during August-September 1958.

In February 1959 the Labour Ministry also ordered an enquiry into the strike in the plantations at Munnar in Kerala in October, 1958. This was to be conducted by Mr. R. L. Mehta, I.C.S., Joint Secretary in the Ministry.

Code of Efficiency

As a sequel to the code of discipline in industry, the Union Labour Ministry has now (March, 1959) drawn up a draft code of efficiency and welfare which has been circulated to central organisations of employers and workers.

While the objective of the former is to bring about greater industrial harmony, the code of efficiency will aim at improving productivity and production.

This move reflects the increasing concern felt on account of substantial production losses as a result of strikes and lockouts.

The question of reducing industrial costs through increased efficiency has assumed importance in the context of the export drive, the surpluses required by industry, further development and consumer prices.

In a letter to the presidents of the employers' and workers' organisations regarding the new code, the Labour Minister, Mr. Nanda, urged that payments should more and more be linked with production and suitable incentive schemes should be devised in consultation with workers themselves.

He also emphasised that an assurance should be given, "that the workers will have a fair and adequate share in the benefit of increased production and productivity."

The draft code lays down that managements and trade unions should agree to withdraw cases of labour disputes pending before courts with a view to reaching mutual settlements, work out incentive payment schemes, suggestion schemes and set up joint production committees.

The incentive payment schemes, while protecting the health and interest of the workers, should be designed to maximise production. Under the suggestion schemes, proposals made by workers to save wastage and improve output

could be carefully considered and suitably rewarded. As regards joint production committees, the code provides that, wherever possible, they should be set up either independently or as sub-committees of joint councils of management.

The code urges managements to agree to the following further points:

1. Employees should be offered reasonable wages and provisions for economic security after retirement.
2. Staff policies should be rationalised to afford reasonable prospects of promotion to workers.
3. Efforts should be made to provide safe and healthy working conditions, reasonable amenities in the place of work and suitable housing or transport facilities wherever possible.
4. They should maintain machinery and equipment in sound working condition.
5. There should be adequate provision for training of workers, supervisors, and middle-management personnel.
6. The management should be rationalised to avoid waste and inefficiency.

The code also calls upon trade unions to agree to the following points:

- (a) They should not resort to methods of protest that might affect production.
- (b) Inter-union rivalry should not be allowed to interfere with efficiency and production.
- (c) Every effort should be made to reduce absenteeism and labour turnover.
- (d) They should initiate suitable steps for educating the workers in their rights and responsibilities and on their relation to production.
- (e) They will only make reasonable demands on industry, keeping in view the need to maintain competitive costs of production and in the larger interests of the economy.
- (f) They will actively support schemes of rationalisation subject to the conditions agreed to at the 15th session of the Indian Labour Conference.

STANDING LABOUR COMMITTEE

The Standing Labour Committee was constituted by a resolution of the Indian Labour Conference adopted in August 1952. At present the Committee consists of 5 representatives each of the employers and workers and 12 representatives of the Governments. The representatives are nominated by the Government of India in consultation with the all-India organisations of employers and workers.

The function of the Committee is to consider and examine such questions as may be referred to it by the Plenary Conference or the Central Government.

The Committee has met 17 times so far, the last session being the one held in Bombay in November 1958.

Both the Conference and the Committee have so far considered no less than 80 items each and besides promoting such legislation as Industrial Employment (Standing Orders) Act, 1946, Minimum Wages Act, 1948, and the Employees' Provident Funds Act, 1952, they were responsible for the appointment of the Labour Investigation Committee, introduction of health insurance schemes for industrial workers etc.

At the October-November session in Bombay the Committee recommended that workers' and employers' organisations should evolve, as early as possible, machinery for screening cases wherein recourse to law courts was contemplated.

Workers' and employers' organisations should advise their constituents to report only specific and genuine cases of non-implementation of awards, agreements etc to the Evaluation and Implementation Division of the Ministry of Labour and Employment.

State Governments which had not yet set up Implementation Committees at State and local levels were requested to do so as early as possible.

It was also decided that an analysis of the cases of appeals to High Courts and the Supreme Court against industrial awards should be undertaken by the Centre as well as the State Governments in their respective spheres.

The Committee approved of a proposal to depute an observer or a team of observers to study major strikes from the point of the Code of Discipline which had been unanimously accepted by the employers' and workers' organisations. The question whether the team should be official, non-official or mixed would be determined by Government on the merits of each case. It was also felt that similar studies might be undertaken, wherever necessary, in other cases involving infringement of the Code of Discipline.

The Committee reviewed the working of the Employees' State Insurance Scheme and expressed the view that the extension of the Scheme to the present coverable population should be completed by the end of the Second Five Year Plan.

Four industries—sugar, jute, cement and heavy chemicals specially fertilisers—have been selected by the Steering Group on Wages (of the Workers' Participation in Management Sub-Committee) for conducting a study of replacement costs.

The Group met in New Delhi on September 19, 1958.

The study is to be entrusted to the National Council of Applied Economic Research.

The object is to formulate a uniform and acceptable method of calculating replacement and modernisation needs of industry to help remove an important source of friction in industrial relations.

As regards the wage map of India, the Steering Group agreed that to begin with wage maps for selected industrial centres should be drawn up.

The Steering Group also approved the Labour Ministry's proposal to carry out a statistical survey of the pattern of absenteeism among colliery workers.

The purpose of the survey is to find out whether payment of attendance bonus to workers every week or month instead of every quarter, as at present, would be better from the point of view of encouraging better attendance and better performance on the part of workers.

The Steering Group also considered the question of wage costs and appointed a sub-committee to examine the matter thoroughly.

A Committee set up by the Standing Labour Committee considered at a meeting in January 1959, 201 proposals received from State Governments and the all-India organisations of employers and workers about amendments to the Industrial Disputes Act, 1947. There was agreement on several suggestions intended to improve the working of the Act. One of the important agreements arrived at by the Committee is intended to make the principal employer responsible even for the workmen engaged by contractors. Provisions relating to retrenchment and lay-off were examined at length and the Committee was of the opinion that these provisions should not be changed unless there was bipartite agreement for doing so.

INDUSTRIAL COMMITTEES

The Eighth Session of the Indian Labour Conference decided to establish Industrial Committees to discuss various specific problems special to industries covered by them and submit their reports to the Conference. The first Industrial Committee to be set up in pursuance of the decision was that on Plantations in January 1947. In 1948 Industrial Committees were set up for four important industries viz. Cotton Textiles, Coal Mining, Cement and Leather goods, and in 1949 for Building and Construction industry. There is no uniformity in the representation accorded to Government, employers and workers in these Committees but the representation given to employers and workers is equal in all cases.

Barring the Plantation Committee which has met seven times so far, the other Committees have not been very active. The Plantation Labour Act, 1961, the extension of the Industrial Disputes (Amendment) Act, 1958 relating to lay-off and retrenchment compensation to

plantation labour, grant of sickness benefit of two weeks in a year are some of the achievements of this Committee.

JOINT CONSULTATIVE BOARD

The Joint Consultative Board for Industry and Labour was constituted to promote agreements between employers and workers and to ensure their proper implementation following a recommendation in that regard made by the Development Committee on Industries in 1951. The Board as originally constituted consisted of three representatives each of employers and workers with the Union Minister for Planning as Chairman. Since February 1954 the Board has been reconstituted as a purely bi-partite body and it now consists of 8 members, 4 representing employers and 4 workers. It considers such questions as rationalisation, productivity studies, payment by results, association of workers with management, etc. At its last meeting held in September 1958 the Board decided to set up a subsidiary Joint Consultative Board for the Cotton Textile Industry.

TRIPARTITE MACHINERY IN THE STATES

Bombay was the first State to set up a tripartite Labour Advisory Board in March 1947. This example was followed by Uttar Pradesh, Bihar, West Bengal, Madras, etc.

The function of these boards is to help maintain harmonious industrial relations and advise Government on matters affecting labour.

WORKERS' PARTICIPATION IN MANAGEMENT

A study group set up to report on the question of workers' participation in management published its report at the end of May 1957.

The study group was led by the Secretary to Government, Ministry of Labour (at the time Mr. Vishnu Sahay).

The main recommendation of the group is that the Government of India should put through enabling Legislation to direct selected industries to operate given schemes relating to workers' participation in management.

The report emphasises that management councils should not rival trade unions. A demarcation of functions is necessary and collective bargaining matters touching wages, bonus and workers' grievances should be left to the latter.

The objective of the joint councils should be to collaborate in raising productivity, provide a means of communication, improve working and living conditions, encourage suggestions and assist in the administration of laws and agreements.

The councils may be consulted on matters such as alterations in standing orders, retrenchment, rationalisation, closure, or reduction of operations, introduction of new methods, procedures for engagement of labour and punishment.

They can also receive information and make suggestions about the general economic position of the concern, market trends, production and sales programmes, organisation, methods of manufacture and the balance sheet.

To counteract the danger of apathy, it is suggested that the councils of management may also be given some administrative responsibility. These may cover the administration of welfare schemes, the supervision of safety measures, the operation of training and apprenticeship schemes, the preparation of working-day and holiday schedules and payment of rewards for valuable suggestions.

On balance, legislation may help to create the climate and the necessary sense of obligation.

Government should have the power to decide where the law should be applied. The consideration that will apply may be a minimum size of industry in terms of employment, the absence of rival unions, and the stability of the industry.

It should not apply to industries that are complex or in which the workers have to be protected under the Minimum Wages Act.

For undertakings spread over several places, there may be separate councils at the local, regional and national levels.

The report suggests the inclusion of technicians in the joint councils and stresses the importance of workers' education in schemes of labour participation in management. The workers must have knowledge of their industry and some general economic background apart from mere industrial skill to participate usefully and effectively.

The study group has, therefore, recommended that the Government should undertake the responsibility for organising a sustained educational campaign in collaboration with the unions and employers' organizations.

As already mentioned the Indian Labour Conference which met in July 1957 appointed a tripartite Committee to compile a list of major industries in the public and private sectors in which workers' participation in management could be introduced.

This Committee compiled a list early in August.

The industries selected from the private sector are: cotton textiles, jute, engineering, chemicals, tobacco, paper, sugar, cement, mines and plantations.

Those from the public sector include: railway workshops and yards, posts and telegraphs, ports, shipyards, transport workshops, mines, printing presses and electricity undertakings.

The committee decided that the State Governments should also be requested to name suitable industrial undertakings under their control for inclusion in this experiment of workers' participation in industrial management.

The criteria for selecting undertakings where the scheme can be introduced include: (a) The undertaking should have a well-established, strong trade union functioning; (b) The size of the undertaking in terms of employment should be at least 500 workers; (c) The employer should be a member of one of the leading employers' organizations so far as the private sector is concerned; likewise, the trade union should be related to one of the central federations; and (d) The undertaking should have had a fair record of industrial relations.

A seminar on labour-management co-operation was held in New Delhi on 31st Jan. 1957. Workers' and employers' representatives from more than 30 units attended the seminar.

It was agreed that the councils will administer welfare activities and supervise safety measures and schedules of work and holidays. They will discuss and make suggestions with regard to the economic situation of the concern, production and sales programmes and the general running of the undertaking. They will be consulted by the management in the administration of standing orders and about closures or reduction in operations.

The total membership shall range between 6 and 12 and decisions have to be unanimous to be valid. The trade union shall elect half the members, the other half being nominated by the management. One non-employee member can be elected except where the management is agreeable to this limit being raised to two, which is the maximum.

The council shall hold office for two years. The posts of chairman and vice-chairman shall rotate between the workers' and management's representatives.

Position in 1958

The position in September 1958 was as follows: The total number of factories which had set up joint councils of management was 14.

Twenty-four other factories had announced their decision to set up joint councils.

Among the factories in the private sector which implemented the decision on workers' participation in management were:

1. The Simpson Group in Madras
2. Tata Iron and Steel Co., Jamshedpur
3. Modi Spinning and Weaving Mills, Modinagar, U.P.
4. The Bombay Silk Mills, Bombay
5. The Malabar Iron and Steel Castings, Bombay
6. The Devdoyal Cable Industries, Bombay.
7. The Rajhumar Textile Mills, Indore.

Twelve undertakings in the public sector have been selected for labour participation in management.

The undertakings under the Central Government are:—

Argada Colliery, P.O. Argada, District Hazaribagh, Bihar;
Hindustan Machine Tools Factory, Bangalore;
Eastern Railway Printing Press, Calcutta.

The undertakings under the State Governments are:—

State Transport, Madras;
State Transport, Trivandrum;
P.W.D. Workshop, Trivandrum;
Government—Ceramic Concerns, Kundra;
State Transport Corporation, Bombay;
Government Central Press, Bombay;
Printing and Stationery, Chandigarh;
Roadways, Madhya Bharat; Leather Factory, Gwalior; and
Electricity Corporation, West Bengal.

A meeting of the Workers' Participation Subcommittee in Delhi in Sept. 1958 reviewed the progress made generally in this direction and came to the conclusion that this left much to be desired. Every effort, it said, should be made to bring in more units into the scheme.

Further, it decided that the Government should be relieved of the responsibility of pushing the scheme. This should henceforth be taken up by workers' and employers' organizations, which should also periodically report to the Government on the subject.

LABOUR ADMINISTRATION

Apart from the main Secretariat of the Ministry of Labour it has several attached and subordinate offices. The activities of some of these have been described in the relevant sections, such as Miners' Welfare Fund, and notes on some others are briefly given below.

Labour Bureau.—To meet the ever growing needs of Government, industry and labour for accurate and reliable information relating to labour conditions, labour legislation, etc., the Central Government established on 1st October 1946, a Labour Bureau.

Among other things the Bureau edits the *Indian Labour Gazette* and the *Year Book*.

Chief Labour Commissioner.—The Central Government, in the Ministry of Labour, have also appointed a Chief Labour Commissioner. This officer is in charge of industrial relations and consultation, labour welfare, operation of labour laws, and maintenance of information regarding wage rates and conditions of work in Central undertakings. There are a number of deputies working under him known as Regional Commissioners.

Chief Adviser of Factories.—In order to ensure uniformity in the administration of the Indian Factories Act and to improve conditions generally in Indian factories, the Government of India have appointed an officer designated the Chief Adviser of Factories. The Chief Adviser has a number of deputies, including deputies who attend to matters relating to the health of the workers and the sanitation and cleanliness of factories.

INDIA AND THE I.L.O.

India joined this organization at the very start and since 1923 has been one of the eight countries of chief industrial importance and as such has been allotted a permanent seat on the Governing Body of the Organization. India also contributes liberally towards the finances of the Organization. For 1959 India's contribution amounts to U.S. \$223,191 which is 8.22 per cent. of the total contribution of all member States. India's share in the appointments of the office is, however, somewhat inadequate.

At the headquarters in Geneva the number of Indian nationals employed in 1959 as Assistant Members of Division and above is 13. Among these the highest post is held by Mr. B. Raghunath Rao who is the senior-most Assistant Director General. The Indian Branches at New

Delhi employs 19 persons including the Director. The Asian Field Office of the I.L.O. at Bangalore which has been supervising the technical assistance programme in countries of South and East Asia employs 15 Indians.

India was the venue of the Fourth Asian regional Conference of the I.L.O. in November 1957. The Conference which was presided over by Mr. G. L. Nanda, Union Minister for Labour and Employment, was attended by 187 Government, Employers' and Workers' delegates and their advisers and 21 countries sent their observers.

This Conference besides the Report of the Director-General, discussed labour and social problems of small-scale and handicraft industries; conditions of life and work of share-croppers, tenants, farmers and similar categories of semi-independent workers in Agriculture; and labour-management relations.

Among others, the conference adopted a resolution which expressed the hope that Asian Governments will invite the trade unions and employers' organizations to assist in the elaboration of economic development programmes, in their implementation and in the preparation of labour legislation.

India has so far ratified 25 out of the 107 Conventions adopted by the International Labour Organisation. She has in addition incorporated into her national legislation the essential features of many other Conventions.

The following is a list of Conventions ratified by India together with the dates of ratification within brackets:—

1. No. 1 Hours of Work (Industry), 1919 (14-7-1921).
2. No. 2 Unemployment, 1919 (14-7-1921).
3. No. 4 Night Work (Women), 1919 (14-7-1921).
4. No. 5 Minimum Age (Industry), 1919 (9-9-1935).
5. No. 6 Night Work of Young Persons (Industry), 1919 (14-7-1921).
6. No. 11 Right of Association (Agriculture), 1921 (11-5-1923).
7. No. 14 Weekly Rest (Industry), 1921 (11-5-1923).
8. No. 15 Minimum Age (Trimmers & Stokers), 1929 (10-12-1922).
9. No. 16 Medical Examination of Young Persons (Sea), 1921 (20-11-1922).
10. No. 18 Workmen's Compensation (Occupational Diseases), 1925 (30-9-1927).
11. No. 19 Equality of Treatment (Accident Compensation), 1925 (30-9-1927).
12. No. 21 Inspection of Emigrants, 1926 (14-1-1928).
13. No. 22 Seamen's Articles of Agreement, 1926 (31-10-1932).
14. No. 26 Minimum Wage-Fixing Machinery, 1928 (10-1-1935).
15. No. 27 Marking of Weight (Packages Transported by Vessels), 1929 (7-9-1931).
16. No. 29 Forced Labour, 1930 (30-11-1934).
17. No. 32 Protection Against Accidents (Dockers) (Revised), 1932 (10-2-1947).
18. No. 41 Night Work (Women) (Revised), 1934 (21-11-1935).
19. No. 45 Underground Work (Women) 1935 (25-3-1938).
20. No. 80 Final Articles Revision, 1946 (17-11-1947).
21. No. 81 Labour Inspection, 1947 (2-4-1949).
22. No. 89 Night Work (Women) (Revised), 1948 (27-2-1950).
23. No. 90 Night Work of Young Persons (Industry) (Revised), 1948 (27-2-1950).
24. No. 100 Equal Remuneration for Men and Women Workers (25-6-56).
25. No. 107 Indigenous and Tribal Population, protection and integration (29-9-1954).

† Conventions containing special provisions applicable to India.

● Ratification denounced.

FORESTS

TOTAL Forests: 280,896 sq. miles.
Percentage of Forests to Land: 22.3.

Average annual revenue: Rs 24.3 crores (average of 1952-53, 1953-54 and 1954-55).

Allotment under First Five-Year Plan: Rs. 9.89 crores.

Under Second Plan: Rs 21.67 crores.

Forest area in India is relatively small, the forests are unevenly distributed and the production is also proportionately low, being only 2.5 c.ft. per acre per year as compared to 56.8 c.ft. in France, 37.0 c.ft. in Japan and 18.0 c.ft. in U.S.A.

Systematic management and administration of forests in India dates back to over a century. The first enunciation of policy was in 1894, when forests were classified into four classes: (a) protection forests; (b) timber forests; (c) minor forests; and (d) pasture lands.

The limited outlook of this policy was enlarged upon by the Government of India, and the new forest policy laid down in 1952 provides for the following:

(1) An objective of one-third of all land in the country under forests, with a larger proportion in the hills (2) per cent in plains, 60 per cent in hills); (2) the reconditioning of our mountainous regions, river valleys and coastal lands by preserving and establishing protection forests; (3) the immobilisation of deserts and shifting sands; (4) sustained yield management of national forests, aiming at national self-sufficiency; (5) regulated development and utilisation of village forests; (6) development of tree lands more systematically; (7) State control over and guidance of working of private forests; (8) preservation of wild life; and (9) for State policies to be in conformity with the general principles laid down in the National Forest Policy.

Most of the country's forests are worked according to Forest Working Plans prepared by special staff. On the basis of present conditions and past working, these plans lay down, for a 10-15-year period at a time, silvicultural systems, schedules for thinning and other cultural work, methods of management, staff requirements and exploitation programmes, besides development schemes for roads, buildings.

The formation of forest plantations involving a long-term policy for increased production, is now-a-days an important feature of Indian Forestry, e.g. the very valuable and extensive plantations of Teak, Bluegum, Wattle, Casuarina, Sal, Deodar, as also evergreen species and softwoods for matches.

'Forests' are a State subject.

The Government of India, however, are responsible for forest research and forest education. The Ministry of Agriculture in the Government of India co-ordinates forest activities in the country, but no forests are directly worked by it except the Andaman forests. The Inspector-General of Forests is their technical adviser in forest matters.

All States have separate Forest Departments. Usually a Chief Conservator of Forests (C.C.F.) heads the Department.

For purposes of administration the States are divided into one or more Forest Circles, each in charge of a Conservator of Forests.

Each Circle is in turn divided into four to eight Divisions, each under a Divisional Forest Officer. The unit of administration and execution of forest works is the Forest Range, managed by a Range Forest Officer. Four to eight of these

are included in each Division. A Division may be co-extensive with Civil districts or larger or smaller than them depending on the importance of the locality and extent of forests in them.

EDUCATION AND RESEARCH

Forest research and education are centralised in one large institution known as the Forest Research Institute and Colleges located at Dehra Dun.

The Forest Research Institute as such came into being in 1906 as an adjunct to the Imperial Forest College, as it was then called. Through progressive stages of development the Institute has now attained a position which has earned for it international prestige as evidenced by its recognition by the Food and Agricultural Organisation of the United Nations as a Centre for training in Forestry for South-East Asia.

The Forest Research Institute and Colleges are under the administrative control of the Ministry of Food and Agriculture of the Government of India. Its administrative Head is designated the President.

The education wing of the Institute comprising three Colleges is in the charge of the Director of Forest Education.

The Indian Forest College trains recruits of the State Governments to their gazetted forest services. The course stretches over a period of three years.

The Northern Forest Rangers' College (Dehra Dun) and the Southern Forest Rangers' College (located in Coimbatore) offer training for two years to rangers selected by State Governments in the northern and southern regions of the country respectively.

The research wing of the Institute is organised under two main heads—biological and utilisation. Research on the biological side pertains to the rearing and protection of forests and is conducted in the Silviculture, Botany, Mycology and Entomology branches while that on the utilisation of forest products is undertaken in the Wood Anatomy, Wood Seasoning, Wood Preservation, Composite Wood, Timber Mechanics, Timber Engineering, Minor Forest Products, Chemistry of Forest Products and Cellulose and Paper and Logging Branches.

Under the reorganisation at the instance of the Government of India, which came into effect from 1st November 1957, the branches of the Institute were grouped into eight divisions.

Silviculture is under the direction of a Silviculturist. Much of the actual research is, however, decentralised and done by local State silviculturists in the States, but the Central Silviculturist co-ordinates their work, does all the statistical computing and acts as an information bureau on silvicultural matters for the whole of India.

The Institute also runs a Service Branch, a Statistical Branch and a Publicity and Liaison Branch.

An advanced Diploma course in Pulp and Paper technology, the duration of which is one academic year was started in August, 1957 in the Cellulose and Paper Branch of the Institute. The minimum qualification for admission to the course is a degree in Chemical Engineering.

In pursuance of the decision of the Government of India to establish a regional Centre for forest research in the south, the administrative control of the Forest Products Laboratory, Bangalore, was transferred to the Forest Research Institute and Colleges from April 1957, and it now functions as a nucleus for this centre.

In 1958 an Editorial Board was established at the Institute for the purpose of revision of certain books on forestry.

A large number of bulletins and other publications are issued by the Forest Research Institute. Of these a list can be obtained from the Publicity and Liaison Officer, Forest Research Institute, New Forest, Dehra Dun.

FOREST PRODUCE

Forest produce is divided into two main heads—(1) Major produce, i.e., timber and firewood, and (2) Minor produce, comprising all other products, such as bamboo, cane, leaves, fruits, fibres, grasses, gums, resins, essential oils, medicinal and poisonous plants, fatty oils and fats, dyes, tans and animal and mineral products.

The annual outturn of timber and fuel from all sources averages about 2,696 million cubic feet.

The bulk of the timber supply is used for railway sleepers, constructional requirements, furniture, plywood (especially for tea chests), matches, etc.; but the country imports timber for specialised uses such as jute and textile mill accessories.

Exports from India are limited to selected rosewood logs for high grade furniture to Europe, teak poles for the Middle East and a few other items. Up-to-date, Indian rural economy (and perhaps only to a slightly less extent even its urban population) depends on wood fuel, much of which is derived from the forests. The large-scale use of bamboos and some forest grasses in the expanding paper industry, the exports of sandalwood and its oil and the development of medicinal plants deserve mention in connection with the utilisation of other forest produce.

In the Andamans, the North Andaman forests are leased out to a private agency for working the virgin forests of these islands. The Middle and South Andamans continue to be worked departmentally, mainly to meet the needs of the mainland especially for matchwood and plywood logs. The Andamans also contribute in an increasing measure (by restricting on exports abroad) towards the needs of railways, etc. on the mainland for Palauk, Gurjan and other hardwoods.

Nearly two million people are estimated to be employed on forest work; but the figures are probably below the actuals, as much forest labour is not full-time labour, devoting seven or eight months in the year to agriculture and the rest to forest work.

The general practice of the Forest Departments in the various States is to dispose of standing timber and forest produce by open auctions. Departmental conversion and sales of the produce itself are resorted to only where special considerations necessitate them, e.g. working of sandalwood because of its great value.

Timber production in India is not sufficient to meet internal needs. While foreign markets could be readily developed for Indian timber, exports are limited to small quantities of ornamental timbers for European countries, teak poles for the Middle East from the west coast and traditional drapachoes to markets in Pakistan.

Exports are regulated by quotas which are periodically re-examined.

Imports are regulated by protective or revenue duties and are restricted to such specialised items as are not readily obtainable from local production.

Revenue, Expenditure and Surplus of Forests in India (1954-55) (Rupees in thousands)

State (existing before the reorganization).	Revenue	Expenditure	Surplus
Andhra	89.13	31.00	8.13
Assam	67.07	52.91	14.16

Figures for the present Punjab can be got by adding figures for the old Punjab and PEPSU.

Approximate figures for Rajasthan can be got by adding figures for Rajasthan and Ajmer.

For the rest of the States figures are given where available under individual States.

SECOND FIVE-YEAR PLAN

In the Second Five-Year Plan, forest development will be co-ordinated and assisted by the Centre on a large scale, in the period 1956-61. States have adopted many schemes for raising commercial, industrial and fuel plantations, for increased output of timber and other produce, for afforestation of degraded forests and waste lands, for making forests more accessible for extensive working, for conservation of wild life and for amenities for forest labour and staff.

On all this an expenditure of about Rs. 20-02 crores is proposed and the Centre will help the States with loans and grants. The Government of India has also plans for an expenditure of over Rs. 2 crores for expanding their research and training organizations.

The general aim is to rehabilitate about 2.9 lakh acres of degraded forests, and to bring 80,000 acres under commercial species like teak etc., 13,000 acres under wattle and blue gum, 2,000 acres under medicinal plants, 190,000 acres under industrial timbers and 90,000 acres under matchwood plantations.

A Forestry Commission might be set up for management and development.

Achievement under the first Plan includes: bringing under State control about 20 million acres of forest land which, before abolition of zamindari in 1952, was under private management, construction and improvement of about 3,000 miles of forest roads, plantation and rehabilitation of 75,000 acres, out of which matchwood plantations increased at the rate of 3,000 acres a year.

AGRICULTURE

INDIA is predominantly an agricultural country. About half of the country's national income is derived from agriculture and allied activities which absorb nearly 3 of its working force (of about 152 million in 1956 inclusive of dependents).

Some major facts about Indian agriculture (1955-56): Area of India, 806 mil. acres; area available for land utilisation, 719 mil. acres (rest is mostly unsuitable for cultivation); uncultivated area 403 mil. acres (forest 125 mil. acres, area not available for cultivation 118 mil. acres, other uncultivated area 100 mil. acres and fallow 60 mil. acres); area actually sown 318 mil. acres; total cropped area taking into account area sown more than once 362 mil. acres; area sown with foodgrains 271 mil. acres*; area sown with non-food crops 91 mil. acres; total area irrigated 56 mil. acres.

India virtually holds the monopoly in lac, leads the world in groundnut and tea production, and is the second largest producer of rice, jute, raw-sugar, rape, sesamum and castor seeds.

* Includes sugarcane.

The gross value of the agricultural commodities produced in the country (1950-51) was Rs. 48,000 million (and net value Rs. 41,120 million).

The values of the principal crops were:—
Rice: Rs. 11,990 million; Wheat: Rs. 3,340 million; Barley: Rs. 800 million; Jowar: Rs. 1,940 million; Bajra: Rs. 810 million; Gram: Rs. 1,470 million; Arhar: Rs. 830 million; Coconut: Rs. 700 million; Groundnut: Rs. 2,160 million; Rape and Mustard: Rs. 660 million; Chillies: Rs. 680 million; Tobacco: Rs. 710 million; Sugarcane: Rs. 3,050 million; and Cotton: Rs. 1,130 million.

Average rainfall 48"; deficiency of 25 per cent is classed dry; deficiency of 60 per cent severe drought; usually one year in five is a dry year, one in ten, a year of severe drought, one in 20 to 25 years widespread severe drought.

Out of the total cultivated area in the Indian Union of 362 million acres about 56.2 million acres are irrigated annually. Of this area 23.2 million acres are irrigated by canals, 10.9 million acres by tanks, 16.6 million acres by

wells, and 5.4 million acres from other sources. The percentage of irrigated area to total cultivated area is, however, small, being only a little over 17 per cent. Protective irrigation works have made agriculture stable instead of precarious in many districts.

About one-fourth of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet.

Tank irrigation is common in central, eastern and southern India.

Construction of temporary Bandharas across streams and small rivers after heavy monsoon period is over, is also common in parts of Bombay and Madras States for irrigation during the drier Rabi period.

The great bulk of agricultural land in India is deficient in organic matter. In India, cattle dung is largely utilised as village fuel and only about 40 per cent of it is used for manurial purposes.

The following table will show the area under principal crops and the yield:

AREA AND PRODUCTION

Crops	Area in '000 acres		Production in '000 tons*		Average yield per acre in lbs.	
	1956-57	1957-58	1956-57	1957-58	1956-57	1957-58

* See Note below.

Notes.—Data for 1956-57 and 1957-58, relate to Partially Revised and Final Estimates respectively and are subject to revision:—(a) Production of rice is in terms of cleaned rice; groundnut as unshelled nuts; sugarcane as raw sugar or gur; cotton as lint in thousand bales (of 500 lbs.) and jute and mesta as dry fibre in thousand bales (400 lbs.); coconut as thousand nuts (the average yield being in the number of nuts). (b) Area and production of pepper, ginger, and turmeric are in terms of 100 acres and 100 tons respectively. (c) Area and production of tea, coffee, and rubber are in terms of 1,000 acres and 1,000 lbs. and those of tea and rubber relate to calendar years. (d) Acreage under opium is in terms of acres and production in maunds (of 82 2/7 lbs.). This also applies to lac.

INDEX OF PRODUCTION—ALL COMMODITIES

Year	INDEX NUMBERS OF PRODUCTION		
	Foodgrains.	Non-foodgrains.	All commodities.
1949-50	100.0	100.0	100.0
1950-51	90.8	105.9	95.6
1951-52	91.1	110.5	97.8
1952-53	101.1	103.8	102.0

* Based on provisional estimates.

Notes.—The indices for 1956-57 are based on partially Revised Estimates and those for 1957-58 on Final Estimates. They are, therefore, subject to revision.

The agricultural season is divided into two main sub-divisions the Kharif season of the monsoon and the Rabi season of the cold weather. This is not well-marked in the extreme east or extreme south.

The ground is generally prepared for cultivation in April and May for kharif crops, and by the end of October or early November for rabi crops, i.e., after the kharif crops have been harvested. Kharif crops are sown in the monsoon, generally after the first shower. The usual time for sowing of rabi crops is the middle of November. The crops are harvested from the middle of March to the end of April.

The chief Kharif crops are: rice, jowar, bajra, maize, cotton, sugarcane, sesamum and groundnut. The chief Rabi crops are: wheat, barley, tea, gram, linseed, rape and mustard; and in south India rice, jowar and cotton.

The harvest comes on the market as follows: Kharif crop (Nov. 1), Rabi crop (May 1), Rice (Nov. 1), Wheat (May 1), Sugarcane (Nov. 1), Cotton (Sept. 1), Jute (July 1), Kharif oil-seeds (Nov. 1), Rabi oil-seeds (April 1), Tea (Jan. 1), Coffee (July 1), Sugar (Jan. 1).

RICE

Rice crop occupies the largest area in the Indian Union, over 79 million acres giving 25 million tons of rice.

Madras, Bihar, Bengal, Orissa, Madhya Pradesh, Uttar Pradesh, Assam, Andhra and Bombay are the main rice growing States and

The statistics about Japanese method of production are given below:

	1954-55	1955-56	1956-57	1957-58
Area under Japanese Method (in Million acres)	1 320	2 096	2 374	3 997
Additional production (of rice in million tons) due to Japanese Method	0.496	0.89	0.400	1 2
Yield in Maunds per acre (of rice) by				
(a) Japanese Method	23.46	24.89	19.90	19.25
(b) Local Method	12.93	13.33	13.33	10.99

It must be explained that the yield of paddy under the Japanese method of cultivation varies from State to State. Even within the same State it is difficult to calculate the average increase in yield because all the steps suggested in the Japanese method of cultivation are not invariably followed by the cultivators.

In the Second Plan it is proposed to cover 8 million acres with Japanese methods—1.6 mln. acres every year.

The Chinese method is also to be tried at 30 centres in India. A committee is at present (Feb. 1959) selecting the centres. A delegation is expected to go to China in March or April 1959 to study Chinese techniques.

WHEAT

The area under wheat is about 30 million acres and production about 8 million tons. Wheat is grown widely throughout the north as a winter crop. U.P., M.P. and Punjab supplying over 72 per cent of the total output in the country. This crop occupies, on an average, about 10 per cent. of the total cultivated area.

More than one-third of the crop is irrigated.

The crop is generally grown after a summer fallow and except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon. The crop is generally harvested in February to April and the threshing and winnowing go on up till the end of May.

Unfortunately, wheat is subject to a virulent fungus disease called rust, which is the potent factor limiting its larger production in all wheat growing regions of the world, including India. The magnitude of the loss to wheat crop due to this fell disease during periods when it occurs in an epidemic form is very great indeed. In normal years, the loss is about 5 per cent involving about sixty million rupees. In other wheat growing countries, generally, one kind of rust only is a serious menace. Though in peninsular India only black rust is serious, northern India with the largest wheat area has to face the onslaughts of three different

they together claim about 95 per cent of the total rice area in India. About a third of the crop is irrigated, the bulk of the rice is winter crop, i.e., sown in June-July and harvested in November-December, but there are rice grown in different seasons the harvest coming in summer, autumn or winter.

Rice yield in India is, however, one of the lowest in the world. The average yield is a fourth of that of Spain and Italy, a third of Japan, and half of what the Chinese and the American rice farmers obtain. At present 76 research stations spread almost all over the States of the country are working on similar problems of rice. Though about 4,000 distinct types of rice differing in essential characteristics occur in this country, 455 superior strains giving an average of 10 to 20 per cent better yield than the farmers varieties have been evolved. But they cover only a very insignificant percentage of the total rice area: Andhra 70 per cent; Assam 8 per cent; Bengal 10 per cent; M.P. 16 per cent; Orissa 10 per cent; Jammu and Kashmir 10 per cent and U.P. about 12 per cent.

Rice farming practices vary considerably from region to region and even from place to place depending upon such factors as climate, soil type, and rainfall.

Japanese Method

In the last few years the Japanese method has been tried with good results specially in areas of assured water supply. But many individual steps in this were evolved through research in India.

rusts, i.e., black, red and yellow, each with a number of races.

Systematically planned work on the development of rust resistant wheats is being done under the aegis of the Indian Council of Agricultural Research and a large number of rust resistant varieties have been produced.

Besides these, varieties which have greater adaptability and yielding power are also bred.

But the coverage of the total wheat area by the improved varieties is yet to be pushed up. At present improved varieties form only 16 per cent in M.P., 33 per cent in U.P. and about 70 per cent in the Punjab, of the wheat area of the respective States.

MILLETS

Mostly of short duration (2½ to 6 months from seed to seed) millets are grown in localities and in conditions where most of the other cereal crops are not grown, such as poor and infertile soils and low rainfall (of 20-50"). They are associated with the staple diet of lower rather than upper strata of society, and provide the chief cereal supplement for all regions outside the main rice and wheat tracts. Millet stalk form the chief food of the cattle population for about half the year in the millet regions of the country either in green or dry form. Some of them like jowar are grown in substantial areas solely for fodder purposes and special varieties are developed for forage purposes.

Jowar—Among the millets jowar occupies a premier position because of the size of the crop and the economic importance of the grain. Annually about 42 million acres are grown under

this to yield about 8 million tons of grain. Bombay, Madhya Pradesh, Andhra and Rajasthan contribute to about 89 per cent of the national acreage.

Bajra—Bombay, U.P., Rajasthan, and Punjab are the chief growing tracts. The duration of the crop varies from about 2½ to 6 months.

Ragi—Ragi ranks the third in importance among the Millets and occupies over 6 million acres to produce about 1.8 million tons of grain. Its average yield is rather high, 9 mds. per acre. More than half the area is in Mysore, Madras and Andhra. Sixteen improved strains of ragi evolved in Madras and two in Mysore are being grown in these States.

Other Millets—The others grouped under lesser or minor millets form about 1.6 of the total area under millets and are grown in about 12 million acres and yield about 1.8 million tons of grain. Some of them are of regional or local importance only and also of limited consumer demands. The most important among them are Kora or Kangni, Kodon, Cheena or Varagu, Oodalu, and Sawan.

FRUIT AND VEGETABLES

A wide variety of fruit and vegetables is cultivated in the country.

The total area under all fruit at present is about three million acres.

Mango: 1,400,000 acres (primarily in U.P., Andhra, Bombay, M.P., Bengal, Bihar, Madras, Mysore and Kerala).

Citrus (Mosambi, Malta, Santra, Kagzhi Lime and others): total 223 000 acres

Mosambi and Malta: Bombay, M.P., Orissa, Punjab, U.P. and Andhra.

Santra: Andhra, Assam, Mysore, Bombay, M.P., Madras, Bengal, Punjab and Kerala.

Kagzhi Lime: Bihar, Bombay, U.P. and Punjab; (Others: Assam, Bihar and U.P.).

Jack-fruit: 164,000 acres (Bihar, U.P., Kerala and Madras).

Guava: 69,000 acres (U.P., Bihar, M.P. and Bombay).

Grapes: 1,600 acres (Bombay, Andhra, Madras and Himachal Pradesh).

Custard Apple: 110,000 acres (Andhra, Bihar and M.P.).

Pomegranate: 2,000 acres (Bombay and U.P.).

Litchi: 21,000 acres (in the temperate plains of Bihar and U.P.).

Pineapple: 21,000 acres (in the coastal laterite soils of Assam, Bihar, Bengal, U.P. and Kerala).

Temperate Fruits:

Apple: 3,300 acres in the hills of U.P., H.P., Punjab, Madras and in Kashmir.

Pears: 1,200 acres in the hills of U.P., Bihar and in Delhi.

Peaches: 1,200 acres (in the hills of U.P., H.P. and in Kashmir).

Plums: 1,100 acres (in the hills of U.P., Punjab and in Kashmir).

Sapota: 756 acres (Bombay and Andhra).

Fig: 746 acres (Bombay and U.P.).

Phalsa: 250 (Uttar Pradesh).

Date: 889 acres (U.P., Bombay and M.P.).

Apricots: 630 acres (U.P. and H.P.).

Walnuts: 474 acres (U.P., H.P., Punjab and Kashmir).

Other fruit grown in India include Strawberries and Cherries in U.P. and Pashan fruit, Pashan and Mango stem grown elsewhere in the country.

A considerable amount of fruit products of various kinds (jules, squash, jams, etc.) are produced in the country both for home consumption and for export.

The Fruit Products Order promulgated by the Government of India under the Essential Commodities Act of 1955 ensures the manufacture of fruit products of standard quality. As a result, the wastage of fruit has been minimised and the quality of the products improved to a considerable extent.

Fruit products amounting to over 23,000 tons are now manufactured in the country by 810 licensed factories in Amritsar, Bombay, Calcutta, Delhi, Lucknow, Madras, Mathura and other centres.

Five million rupees have been allotted in the Second Five Year Plan for the development of the fruit preservation industry in the country. This includes provision (1) to advance loans through State Governments for setting up five large-scale and 200 small-scale units of fruit and vegetable preservation, (2) to grant subsidies on tin plates used in the canning industry, and (3) to set up regional research stations to investigate problems connected with fruit and vegetable preservation. It is expected that by 1960-61 the average annual production of the industry will increase from 23,000 to 50,000 tons with a corresponding rise in their export from 2,000 to 11,000 tons.

Vegetables

Below are given the area in acres and the States where vegetables are grown.

The total area under vegetables is about 1,459,000 acres

Suran: 1,300 (Bombay); Aroids: 52,000 (Assam, U.P., M.P. and H.P.); Yam: 400 (Bombay); Gourds: 2,800 (Assam, M.P. and Andhra); Cucumber: 12,000 (Assam and U.P.); Water-melon: 2,300 (U.P., Andhra and Assam); Musk-melon: 37,000 (U.P., Punjab, Andhra and Bombay); Squash: 1,600 (Assam and U.P.); Lady's finger: 50,000 (Assam, Bombay, M.P. and Bihar); Brinjal: 91,000 (Assam, Bombay, and M.P.); Other summer vegetables: 175,000 (Madras, Punjab and Andhra); Beans: 22,000 (Assam and M.P.); Carrot: 62,000 (U.P., Bombay and Assam); Beetroot: 4,000 (U.P. and Assam); Radish: 44,000 (Assam, U.P. and Madras); Turnip: 16,300 (Assam and U.P.); Cabbage: 37,500 (Assam, U.P., Punjab, Delhi and Bombay); Cauliflower: 45,000 (Assam, U.P., Punjab, Delhi and Bombay); Brussels sprouts: 700 (Assam and U.P.); Lettuce: 1,000 (Assam and U.P.); Celery: 100 (Assam and U.P.); Spinach: 2,500 (Assam and U.P.); Parsley: 600 (M.P., U.P. and Assam); Mint: 56,000 (Kerala, U.P. and Assam); Methi: 2,100 (U.P., Bombay and Assam); Onion: 54,000 (Bombay, Andhra, Assam and Bihar).

MARKETING

Efficient marketing with the object of providing adequate return to the primary producer is an essential prerequisite of organised agricultural development.

Development of agricultural marketing in India, in the modern sense, dates from 1935 when a Directorate of Marketing and Inspection was established under an Agricultural Marketing Adviser to the Government of India with deputies, senior and junior marketing officers and inspectors to assist him.

It has its counterpart in the States, as in Andhra, West Bengal, Bihar, Bombay, Madras, Mysore and the Punjab.

The basic objective of the organisation is to regulate the markets and educate the farmers in methods of pooling, processing and grading their produce so that they may get an adequate share of the price that the consumer pays.

The main functions of the organisation, therefore, are: (1) Surveys of markets to collect information for development work, (2) Promotion of grading by fixing grade standards and effecting quality control, and the administration of the Fruit Products Order, (3) Organisation of regulated markets, (4) Training in agricultural marketing as well as co-ordination of the working of the

Marketing Acts in the States and other agricultural marketing problems of the country, and also giving advice to the State and the Central Governments.

SURVEYS

Since no programme of marketing development could function till comprehensive information about marketing practices in different parts of the country are available, surveys of market conditions were started soon after the Directorate was set up. As a result, five reports dealing with the production, qualitative and quantitative, internal and external demands, prices and price spreads, standardisation, markets and their operation, distribution channels, and the improvements imperative for the better marketing of 41 agricultural commodities (including cereals and pulses), 12 dealing with live-stock and live-stock products, 24 dealing with special crops have been published.

Ten major commodities among these, have been re-surveyed and reported again.

In addition to these, 13 special bulletins and brochures have been issued on important aspects of production and marketing of specific commodities.

These studies provided the basis for the regulation of markets, the legislative control of forward trading and for the enforcement of weights and measures. They form, also, the basis for all agricultural marketing and development work, in the country.

GRADING AND STANDARDISATION

The Government of India passed the Agricultural Produce (Grading and Marketing) Act of 1937 to promote orderly marketing on the basis of statutory grades.

The Act authorised the Agricultural Marketing Adviser, to fix grade standards for different types and varieties of agricultural produce, prescribe grade designation marks to indicate each quality, and issue certificate of authorisation to persons or co-operative societies to grade and mark with "Agmark" their commodities on the basis of the standards laid down.

The organisation has developed standards for 115 agricultural products so far.

The following important commodities are graded under "Agmark" for consumption within the country: Rice, atta, gur, jaggery, fruit (mangoes, oranges, grapes, apples and sapota), potatoes, cotton, creamery butter, ghee, vegetable oils and eggs.

The following commodities are graded primarily for export purposes: cigarette tobacco, leaf, sunn-hemp fibre, essential oils (sandalwood and lemon-grass oils), wool and bristles.

Extension of compulsory grading for export to the following commodities is envisaged in the Second Five Year Plan: cardamom, pepper, ginger, vegetable oils, oilseeds, hand-picked groundnuts, cashewnuts, goat skins, tanned leather, kapok, lac and myrobalsans.

Grading is voluntary in the case of commodities consumed in the country. But, in the case of exported commodities by a notification issued (under Section 19 of the Sea Customs Act), it is ensured that only after grading would specified commodities be permitted for export.

Grading has given good results. The quantity of graded cotton, for instance, increased from 5,000 bales (valued at about Rs. 20 million) in 1953-54 to 253,000 bales (valued at about Rs. 120 million) in 1955-56. The quantity of graded ghee, similarly, rose from 92,000 maunds in 1952 to 150,000 maunds in 1956.

"Agmark" is now recognised as a symbol of purity and quality.

The expansion of grading with an effective system of quality control has necessitated the establishment of a Central Control Laboratory at Nagpur with eight regional laboratories at Amritsar, Bombay, Calcutta, Cochin, Guntur, Kanpur, Madras and Rajkot.

REGULATED MARKETS

The State Agricultural Produce Market Acts are in force in nine States, namely, Andhra, Bombay, Delhi, Kerala, M.P., Madras, Mysore, Orissa and the Punjab. They ensure the existence of regulated markets where transactions between seller and buyer are fair, and where unauthorised deductions, high rates of commission, etc., are absent.

Of the 1,800 principal markets in the country 523 (Andhra: 78, Bombay: 185, Kerala: 2, Madhya Pradesh: 74, Madras: 18, Mysore: 50, Orissa: 1 and Punjab: 115) are in the category of regulated markets.

By the end of the Second Five Year Plan, it is expected that the rest of the markets in the various States will also be regulated.

The regulated markets are managed by Market Committees consisting of the representatives of the growers, the traders, local bodies and the State Government nominees. Producers are generally in a majority, and in several cases are elected chairmen.

These committees arrange for the enforcement of fair trade practices, viz. fixed market charges, correct weighments, no unauthorised deductions on account of samples, charity, etc.

The open auction system of sales, settlement of disputes, and dissemination of market information are some other important features.

The Committees also provide market yards' facilities for parking carts, rest house for farmers' canteens and godowns and sheds for auctioning the produce. The producer selling in the market is given a slip (showing details of sale proceeds and deduction) and payment is made on the same day.

To extend the scope of the regulated market an advisory service has been set up in the Directorate, to give advice to State Governments and market committees.

One visible benefit of the regulated market has been the reduction in market charges varying from 28 per cent to 69 per cent.

Besides, the producer gets a higher price in an open auction, and by selling his produce in these markets he obtains an additional income of Rs. 2 to 5 per Rs. 100 worth of goods.

One of the main handicaps in the proper development of regulated markets is the inability of many marketing committees to provide central market yards for assembling all the produce and transacting business under proper supervision.

The Government of India has now provided funds in the Second Five Year Plan for rendering financial assistance in the shape of loans to marketing committees.

MARKETING SOCIETIES

An integrated programme of marketing development embracing rural credit, marketing, processing, and warehousing is now proposed in the country, as a result of the recommendations contained in the Rural Credit Survey Report.

The main features of the programme are:— (1) Linking credit with marketing in the form of marketing societies; (2) Developing processing and distribution of farming requisite on co-operative lines, and (3) Promotion of storage and warehousing.

Marketing is closely linked to credit, as it aids in the recovery of the latter. Agricultural credit societies sanction loans on condition that the produce is sold through marketing societies. The latter would deduct the dues, when the produce is sold (or when loans are granted on the pledge of the produce), and pay the balance.

The Second Plan provides for the organisation and development of 1,900 primary and district marketing societies and one apex marketing society for each State and Union Territory.

During 1956-57, 251 marketing societies were either organised or reorganised. For 1957-58, 484 were proposed.

In 1957-58 the Central Government assisted the States in organising and reorganising 399 primary and district marketing societies and 9 apex marketing societies.

In 1956-57 the NCDW Board provided a loan of Rs. 48.27 lakhs to the States to assist them in contributing towards the share capital of co-operative marketing societies.

In 1957-58 the Central Government provided Rs. 70.52 lakhs for this purpose.

In Uttar Pradesh 40 societies marketed during 1956-57, 4 lakh maunds of foodgrains and oilseeds valued at Rs. 70 lakhs. The same year in Madras, 105 marketing societies with a membership of over 1.3 lakhs were responsible for the sale of agricultural produce worth Rs. 171.64 lakhs.

Besides arranging the sale of agricultural produce the primary marketing societies also undertake the supply of agricultural requisites and other essential commodities to members.

In Uttar Pradesh, for example, 1,500 seed stores distributed 15 lakh maunds of improved seeds which was 30 per cent of the total seed requirements. In Orissa 500 grain "goans" undertook seed distribution, and in Punjab marketing societies sold 95 lakh tons of seed.

Nearly 60 per cent of the total quantity of nitrogenous fertilizers is at present being distributed by co-operative societies.

The marketing societies are also being encouraged to take up inter-State export of surplus agricultural commodities.

Processing

Mere sale of agricultural produce through marketing societies as commission agents helps the farmer, only partially, as it does not release the primary producer from the stranglehold of vested interests in processing the produce, prior to selling it.

It has been decided, therefore, that processing should receive adequate attention, along with marketing.

Provision has been made in the Second Five Year Plan for State contribution to share capital and loans for processing units, e.g. sugar factories, cotton gins, jute, barley, rice milling.

Most of these will be established ordinarily by marketing societies in the course of their routine duties, while sugar factories and spinning units will be established independently.

It is expected that there would be 50 co-operative sugar factories, which will account for 20 to 25 per cent of the total production. The total investment on this will be about Rs. 500 million. 15 of these have now gone into production and the rest are expected to function soon (Jan. 1959).

In all licences have been issued for 39 units (Jan. 1959) and the Industrial Development Corporation has provided Rs. 13 crores as loan to meet the capital outlay. Further, the Central Government and the NCDW Board have provided Rs. 3 crores as loans to State Governments for purchase of shares in co-operative sugar factories.

About 45 cotton gins and other processing plants will also be organised on a co-operative basis.

The Second Five Year Plan envisages the establishment of 4,000 godowns by large-sized societies (1,000 godowns (mostly at Mandi centres or centres of trade importance) by marketing societies which are expected to handle about 10 per cent of the marketable surplus of the country, and a number of warehouses by the Warehousing Corporations. This will facilitate the disposal of the produce and prevent distress selling, for the benefit of members.

The primary societies will have godowns of 20,000 to 30,000 tons capacity and the apex

societies 25,000 to 100,000 tons. Besides the marketing of agricultural commodities, the marketing societies arrange for co-operative crop processing plants and also distribute essential farming requisites (viz., seed, implements, fertilisers, etc.).

WAREHOUSES

Facilities for the storage of agricultural produce in the terminal and other markets are unsatisfactory. Private enterprise is shy of investing large sums in building warehouses and godowns.

With a view to the proper organisation of processing and marketing on a co-operative basis a Central Warehousing Corporation with a share capital of Rs. 200 million with its counterparts in the State was established in 1957.

The National Co-operative Development Board set up, as a result of the Agricultural Produce (Development of Warehousing) Corporation Act of 1956 is the advisory body.

The Corporation is empowered to give loans and subsidies for various co-operative development plans (viz., construction of godowns by marketing and credit societies, contribution to the share capital of marketing and processing societies and for the necessary staff requirements).

One of the main functions of the Warehousing Corporation at the Centre and in the States is to acquire and build godowns and warehouses at suitable centres of all-India or State importance, and to run the warehouses for the storage of agricultural produce.

One hundred such warehouses are to be established by the Centre and 250 (with a capacity of 1,000 to 2,000 tons) by the States.

As a result of this, additional storage facilities of 3 to 3½ million tons will be available.

The Central Warehousing Corporation has started 9 warehouses (at Amravati, Gondia, Sangli, Gadag, Devanagere, Bargarh, Warangal, Moga and Chandaul) in hired accommodation.

State Warehousing Corporations have been set up in 14 States (exceptions are Assam and Kerala).

The Second Five Year Plan provides for contribution from State Governments to the share capital of the State Warehousing Corporations.

The assistance is sanctioned by the Warehousing Board. The sanctioned assistance is as follows:—

(Rs. million)

1956-57 for 594 godowns	4.776
1957-58 for 1,451 godowns	14.304

In 1957-58 the Central Government advanced Rs. 1.34 lakhs to the States for the construction of 964 godowns by large sized societies and 435 by marketing societies.

Fourteen godowns with a total capacity for 312,000 tons have been completed in various States. Priority for the construction of another 25 (with a total capacity of 498,000 tons) has been accorded.

As already mentioned, the Second Plan envisages the establishment of 4,000 godowns by large-sized co-operative societies, 1,800 by marketing societies, and a number of warehouses by the Warehousing Corporation.

The present capacity of cold storage in the country is about 2.5 million maunds provided by 200 cold storages most of which are run by private traders. This capacity may go up to 5.0 million maunds by the end of the Second Five Year Plan. The plan has, therefore, provided Rs. 4 million for setting up 8 cold storages.

AGRICULTURAL ECONOMICS

The Directorate of Economics & Statistics is one of the main organisations under the Central Government which deals with all agro-economic problems in the sphere of food and agriculture.

Steps initiated during the First Five-Year Plan continued during the Second Five-Year Plan as well as a provision of Rs. 5 million is provided in the State plans for schemes of improvement of land records and statistics. State plans will be aided on a half and half basis and Rs. 0.8 million is provided in the 1957-58 budget for these purposes.

An amount of Rs. 5,40,000 has been sanctioned to 11 States as the Central share of the expenditure.

A research division has been set up in the Directorate to co-ordinate Farm Management investigations and also to conduct research in production economics.

The statistical wing of the Indian Council of Agricultural Research is a sister organisation, which does fundamental investigation in statistics and also trains statisticians for field work.

The organisation of soil conservation work in the States and Territories is the responsibility of the respective Governments. The co-ordination of work between these is achieved through the agency of the Central Soil Conservation Board which was set up in the Ministry of Food and Agriculture in 1953. Similar boards are also set up in most of the States and Territories.

Altogether seven research-cum-training centres have been established at the following places:—

1. Ootacamund (Madras) for erosion control in the Nilgiri and other hills;
2. Bellary (Mysore) for soil conservation studies in black soils;
3. Kotah (Rajasthan) with sub-centre at Agra for erosion control in the Chambal and Jumaun ravines;
4. Jodhpur (Rajasthan) for afforestation in the Rajasthan desert;
5. Dehra Dun (U.P.) for studying problems of afforestation in the Siwalik hills with the sub-station at Chandigarh (Punjab) for training also (hill torrents);
6. Vasad (in the Gujarat tract of Bombay) for erosion control in the ravines along rivers in Gujarat.
7. Research-cum-training centre at Hazaribagh (in Bihar) under the Damodar Valley Corporation.

The Board sanctioned 114 schemes costing about Rs. 18.0 million in 1956-57, and 156 schemes costing Rs. 21.205 million in 1957-58.

About 4.94 lakh acres were given protection through soil conservation measures.

It is estimated that in the country as a whole about 200 million acres are exposed to erosion. Out of this about 100 million come under land under cultivation.

Rs. 25 crores were allotted in the Second Plan (original) for conservation. The target is three million acres. The staff requirements are estimated at two hundred officers and five thousand assistants.

RESEARCH

The Indian Council of Agricultural Research was created in 1929. The Council is divided into a Governing Body composed of State Ministers of Agriculture, representatives of Parliament and an Advisory Board consisting of experts. The Governing Body is in charge of general affairs and of the funds, while the Advisory Board examines scientific projects submitted to the Governing Body.

To afford relief to the Governing Body in the discharge of its executive functions there is a Standing Committee. The Governing Body is also assisted by a Board of Research and a Board of Extension. The latter is concerned with pilot schemes.

The Minister for Food and Agriculture of the Government of India is the president of the Council.

In general the Council co-ordinates research work, suggests programmes of research, gives financial assistance for approved schemes, and also undertakes schemes of its own.

The annual grants made to I.C.A.R. fall under two main heads:—(a) An annual Government grant for running the administration. This varies from year to year according to requirements, and averages about Rs. 1.35 million a year. (b) Payment of the net proceeds of the cess on agriculture produce. The income from this source is estimated at about Rs. 4.4 million annually.

Besides these, specific grants are made to I.C.A.R. for undertaking certain schemes from time to time. The total estimated expenditure (including the special grant) will be Rs. 5 to 5.5 million annually.

During 1957-58, 720 schemes (agricultural 306, animal husbandry 247, combined 77) were financed by the Council. The expenditure on these amounted to Rs. 9.18, 5.96 and 1.36 million respectively. Rs. 5.6, 4.5 and 7.8 million are provided for these during 1958-59.

In the field of agricultural research, extensive and intensive research was conducted in green manuring of rice, wheat and other crops.

Results proved that in paddy green manure gives the highest yield (31.77 maunds per acre) as against fertilisers which give only 27.21 maunds per acre.

Research in the control of weeds made it possible to prepare a co-ordinated scheme on a model pattern which has been put in operation in Assam, Madhya Pradesh, Bombay, Punjab and Himachal Pradesh.

Several schemes designed to improve the nutrient status of soil were also undertaken. These include soil tests with a view to reclamation of waste land, research on humification of organic matter in relation to physico-chemical properties of soils and a scheme for the standardisation of methods of soil analysis.

For all-round improvement in vegetables, extensive research was conducted in various directions such as hybridisation, agronomic practices and resistance to disease and pests in Punjab, Himachal Pradesh, Uttar Pradesh, Andhra Pradesh, Bombay, West Bengal, Jammu and Kashmir and Delhi.

The vegetables covered were brinjal, tomato, cabbage, cauliflower, bhendi, peas, beans, turnip, gourds and leafy vegetables. Varietal trials were conducted on tuber crops.

Central Committees

A number of Central Committees have been set up to promote the production and marketing of agricultural commodities:

Indian Central Cotton Committee, Bombay.
Indian Central Jute Committee, Calcutta.
Indian Central Tobacco Committee, Madras.
Indian Central Oil-seeds Committee, New Delhi.
Indian Central Coconut Committee, Ernakulam (S. India).

Indian Central Sugarcane Committee, New Delhi.

Indian Central Arecanut Committee, Kozhikode (S. India).

Indian Central Lac Cane Committee, Ranchi (Bihar).

All India Cattle Show Committee, Karnal (Punjab).

A number of research institutes, stations and farms are also maintained by the Central Committees:

The Indian Central Cotton Committee has:

1. Technological Laboratory, Motunga.
2. Institute of Plant Industry, Indore.

The Jute Committee has:

1. Jute Agricultural Research Institute, Barrackpore (West Bengal).
2. Technological Research Laboratories, Tollygunge, Calcutta.

3. Economic Research Station, Indian Central Jute Committee, Calcutta.

The Tobacco Committee has:

1. Central Tobacco Research Institute, Rayachoti.

2. Clear and Cured Tobacco Research Station, Vellore.

3. Kharab and Chewing Tobacco Research Station, Pusa, Bihar.

4. Chewing Tobacco Research Sub-station, Calcutta.

5. Wrapper Tobacco Research Station, Dinahat (West Bengal).

The Coconut Committee has:

1. Central Coconut Research Station, Kavaratti.

2. Central Coconut Research Station, Kanyakulam.

Three regional stations at Thodupuzha, Kumbakonam and Neyyattinkara all in Kerala State. And two more at Rajole in Andhra and Ratnagiri in Bombay.

The Sugar Committee has:

Sugarcane Sub-Station, Karnal (Punjab).

The Indian Central Oil Seeds Committee has two regional centres for research, one at Tindivanam in Madras for the southern region, and the other at Kanpur for the upper India oil seeds.

These Committees are financed by the proceeds of a cess levied on the particular commodity. For instance, for the Cotton Committee there is a cess of Rs. 4 per bale of 400 lb. of cotton; for the Coconut Committee there is a cess of Rs. 6 per cwt. on copra consumed in Indian mills; for the Lac Committee the cess is Rs. 14 per md. of export of lac and Rs. 10 for refuse lac exported; for the Oil-seeds Committee the cess is 1 anna per md. of oil extracted in mills, and annas 2 per md. of oil-seeds.

Research Laboratories

The Ministry of Food and Agriculture maintains directly a number of research laboratories:

1. Indian Agricultural Research Institute, Pusa, New Delhi.

Sub-stations at Karnal (Punjab) and Pusa (Bihar).

2. Central Potato Research Institute, Patna. Laboratory, at Potato Multiplication Sub-division, Bhowali (U.P.).

Laboratory, at Potato Breeding Sub-Station, Shimla.

3. Central Rice Research Institute, Cuttack.

4. Sugar Cane Breeding Institute, Coimbatore. Sub-station at Karnal (Punjab).

5. Central Vegetable Breeding Station, Kulu. P.O. Naggar, District Kangra (Punjab).

Five regional stations for conducting research on fruit and vegetable preservation have been opened in different States of India, one each in Punjab, U.P., Madhya Pradesh, Bombay and West Bengal. This arises out of a recommendation made by the I.C.A.R. Fruit and Vegetable Development Committee. It was recommended that two of these regional stations should be opened in 1957-58 and the other three in 1958-59.

Agricultural Colleges

There are 29 agricultural colleges in India: at (1) Bapatia and (2) Hyderabad (in Andhra); (3) Jorhat (in Assam); (4) Tollyganj (in Bengal); (5) Babour and (6) Ranchi (in Bihar); (7) Anand; (8) Pusa; (9) Nagpur and (10) Akola (in Bombay); (11) Vellayani (in Kerala); (12) Coimbatore (in Madras); (13) Gwalior; (14) Jabalpur and (15) Raipur (in Madhya Pradesh)*; (16) Dharwar and (17) Hebhal (in Mysore); (18) Cuttack (in Orissa); (19) Ludhiana and (20) Amritsar (in Punjab); (21) Jobner and (22) Udaipur (in Rajasthan); (23) Sehore (in M.P.); (24) Allahabad; (25) Banast; (26) Banars; (27) Lakhnau and (28) Kanpur (in Uttar Pradesh); and (29) Delhi. (The Central College of Agriculture) in Delhi Territory.

LAND POLICY

The land policy of the Government of India has been formulated for the promotion of agricultural production and for the provision of social justice in the rural economy. The agrarian reform undertaken by the various State Governments during the past few years fall generally into four broad classes:—

(1) The abolition of intermediaries.

(2) Tenancy reform designed to, (a) Scale down rents to 1/4-1/5 of the produce, (b) to give permanent rights to the tenants (subject to the landlord's right to resume a minimum holding for his personal cultivation within a

limited time) and (c) to enable tenants to acquire ownership of their lands (subject to the landlord's right of resumption for personal cultivation) on payment of moderate compensation to the landlord spread over a period of years.

(3) Fixation of ceiling on holdings.

(4) Reorganisation of agriculture including (a) Consolidation of holdings, (b) Prevention of fragmentation and (c) Development of co-operative village management and co-operative farming.

With the exception of Andhra (Hyderabad) and Punjab no State has so far made provision for regulating the standards of cultivation and management of land and resumption of land in case of failure to maintain these standards. Some of the agricultural legislation in Orissa and Himachal, however, have some provision for this, more or less of an obligatory nature.

ABOLITION OF INTERMEDIARIES

Intermediaries have been abolished practically throughout the country with the exception of a few small pockets. There is no legislation yet for temporarily settled estates in Assam and for certain /nams estates in Madras.

In Orissa legislation for the abolition of intermediaries has not been fully implemented.

The share of the intermediaries who formerly cultivated about 48 per cent of the cultivated area of the country has now been reduced to about 8.5 per cent.

The position with regard to the abolition of intermediaries in the country as a whole is as follows:

	In million acres	Percentage of total area.
Area in which intermediary tenures existed ..	243.8	43
Area in which legislation for the abolition of intermediaries has been passed ..	222.3	40
Area in which the abolition of intermediaries has been effected ..	306.0	38
Area in which intermediaries remain ..	37.8	5

Andhra Pradesh: Intermediaries have been abolished in the former State of Andhra, and *Jafers* have been abolished in the Telangana area. Legislation for the abolition of *inams* (other than religious, charitable and village service *inams*) has been passed.

Assam: Zamindari rights have been abolished over an area of 1.27 million acres, out of 1.7 million acres of permanently settled estates. Subordinate tenures remain as also temporarily settled estates.

Bengal (West): Intermediaries have been abolished.

Bihar: Intermediaries have been abolished.

Bombay: Intermediaries have been abolished in the area covered by the former Bombay State with the exception of religious and charitable *inams*. Intermediaries have been abolished in the Vidarbha and Saurashtra area also. A draft Bill for the abolition of the *jayidari* system in the Kutch area is now under consideration (January 1959).

Jammu and Kashmir: Legislation for the abolition of intermediary interests in land held by occupancy tenants and inferior owners is under consideration.

Kerala: *Mafuzat* estates are abolished. Bills are under consideration for the abolition of intermediary interests in Pandalam (Temple) lands and to acquire the interests of *Jomies*.

Madhya Pradesh: Intermediaries have been abolished in the State except where land is held under *Muzis* and *inams*.

* Also at Sehore in M.P. as shown below.

Madras: Intermediaries have been abolished except in post-1936 *Inams* and minor *Inams*

Mysore: Religious and charitable *Inams* have been abolished in the area of the former Mysore State. Legislation for the abolition of personal and miscellaneous *Inams* has been passed. Proposals for the abolition of *Jagirs* in the Coorg area are under consideration.

Orissa: All *Zamindaris* except a few in the Sundergarh District have been abolished. Some *Inams* and subordinate tenures of intermediary nature however remain.

Rajasthan: Legislation for the resumption of *Jagirs* is under implementation in the former Rajasthan area. Legislation for the abolition of *Zamindaris* and *Bhetti* tenure was passed in December 1954. Legislation for the abolition of intermediaries is in force in the Ajmer area.

Uttar Pradesh: Intermediaries have been abolished (except in the Kumaon Hills where a Bill for this purpose is on hand).

Compensation

Apart from the annual payment to be made to religious and charitable institutions whose Estates were brought under the State, the compensation payable for the acquisition of intermediary rights was estimated at Rs 625 crores (including Rs 9, 86 and 151 crores of rupees for compensation, rehabilitation grants, and for interest payments respectively).

The total amount of compensation paid upto August 1958 is estimated at Rs 89 crores.

The entire position in regard to compensation as in May 1957 is shown by the table below.

States (Pre-organization)	Compensation	Rehabilitation grant	Interest	Total	Amount paid
Andhra Pradesh	90 0	—	—	90 0	33 4
Hyderabad	152 4	—	—	152 4	50 7
Assam	50 0	—	0 3	50 3	0 1
Bengal	140 0	—	140 0	590 0	3 3
Bihar	1 600 0	—	800 0	2 400 0	7 5
Bombay	1 28 9	—	50 0	318 9	1 0
Gauhati	102 0	—	—	102 0	13 0
Madhya Pradesh	48 0	0 4	3 7	52 1	36 4
Madhya Bharat	30 3	36 0	11 9	139 2	27 6
Vindhya Pradesh	10 3	—	4 1	24 0	4 6
Ajmer	14 8	—	1 3	16 7	0 6
Bihar	1 7	—	0 1	0 8	6 0
Mysore	18 0	—	—	53 0	27 6
Orissa	22 0	—	—	14 0	—
Rajasthan	140 0	1 20 0	24 0	105 0	1 4
Uttar Pradesh	600 0	700 0	50 0	1 800 0	20 0
			400 0	1 700 0	445 1
Total	3 701 4	806 4	1 500 0	6 147 8	671 0

The assessment of compensation payment was a complex and difficult task (particularly in States like Assam, Bengal, Bihar and Orissa) due to permanent settlement, non availability of relevant records and also due to the absence of the requisite revenue machinery.

The principles determining the rates of compensation were (i) the total compensation should be financed out of the increase in revenues accruing to State Governments on the abolition of intermediaries and (ii) intermediaries in the lower income groups (who constitute the vast majority) should get a just compensation.

Compensation has been fixed generally as a multiple of the net income accruing to an intermediary at the time of acquisition of his interest which was higher in the case of intermediaries in the lower income groups.

In some States where compensation was fixed as a uniform multiple of net income, a provision was made for payment of rehabilitation grants to intermediaries with small income. Thus in Uttar Pradesh the compensation amount (including the rehabilitation grant) varied between 3 and 24 times the net income and in Bihar between 3 and 20 times the net income.

A considerable part of the compensation amount is payable to small proprietors. Nearly two-fifths of the compensation amount would be payable to intermediaries entitled to Rs 5,000 or less of compensation.

Compensation is payable in cash in Andhra, Bombay, Madhya Pradesh, Madras and Orissa in instalments.

But in Bengal, Bihar, Rajasthan and Uttar Pradesh where the liability was large, compensation took the form of bonds transferable and negotiable in Bihar, Rajasthan and Uttar Pradesh and redeemed in equated instalments (of 15 years in Rajasthan and 40 in Bihar and

The Plan recommendation is that it should not exceed one-fourth or one-fifth of the gross produce.

But the rent fixed however varies with the State.

In the following States the maximum rent is fixed at one-fourth of the gross produce: Assam, parts of Mysore, Orissa, former Hyderabad, the territories of Delhi and Himachal Pradesh.

In the following the maximum is one-sixth: pre-organization Bombay and Rajasthan.

In the following the maximum is fixed at half: former Andhra, West Bengal and Jammu and Kashmir.

In Kerala the agrarian relations Bill before a Select Committee provides for a maximum rent of between one-fourth and one-sixth for paddy lands, and between one-third and one-twentieth for other lands.

In other States the rent is fixed at one third.

The enforcement of laws for the reduction of rent has been difficult as rent regulation cannot be effective unless it is accompanied by security of tenure.

Further regulation of crop share rent is difficult to enforce. Therefore in some States like Andhra and Bombay the maximum rent is fixed as a multiple of land revenue as suggested in the Second Plan.

Security of Tenure: The Second Five Year Plan has recommended that ejectment of tenants and sub-tenants should be avoided except in the case of non payment of rent and misuse of land. A large number of States have already taken steps to protect the tenants by the provision of (i) temporary protection to tenants from eviction till comprehensive Tenancy Act is passed, (ii) fixity of tenure on qualifying basis and also by (iii) allowing resumption by the landlord on a prescribed basis and (iv) giving permanent protection or ownership.

Temporary Protection: Pending enactment of a adequate legislation, ejectment of tenants and sub-tenants have been stayed for varying periods prescribed by law in Andhra, Kerala, Madras, Madhya Pradesh, Manipur, Mysore, Orissa and Punjab.

Fixity of Tenure: A number of States legislated to provide for fixity of tenure and restricted grounds on which landlord could eject them either on a qualifying basis (i.e. tenants holding land for a specified period and or by prescribing conditions for the resumption of limited land by the landlord). Security of tenure on the qualifying basis of occupancy or other conditions have been granted in some States 6-10 years in Andhra, 12 years in Mysore and Bihar, 17 years in Madhya Pradesh and 6-12 years in the Punjab.

Uttar Pradesh. On the other hand in Bengal the bonds were not negotiable and have to be redeemed in 20 years.

TENANCY REFORM

With the abolition of intermediaries the tenures come under two broad categories, i.e. (i) owners who hold land directly from the State, (ii) and the tenants who hold land from owners. Their rights and obligations are regulated under tenancy laws enacted in the States. Thus the multiplicity of tenancy has been considerably reduced, and in the most parts tenants who hold land under intermediaries have now become owners of land.

Scaling down rents: Land revenue assessments: Legislation has been adopted in all States for the regulation of rent.

The following table shows the position about security of tenure.

Position	Area in million acres	Percentage of total
I Complete Security Areas in which landlord is not allowed resumption by ejecting tenants	73 0	9
II Partial Security (a) Area in which landlords' resumption is permitted after leasing a minimum holding to the tenant (b) Area in which a ceiling limit is put on resumable area, but no provision against tenants becoming landless (c) Area in which tenants have temporary protection	278 4	34
III No Security Areas in which no security of tenure exists	103 8	26
	156 0	19
	99 7	12
TOTAL	800 9	100

Resumption: Security of tenure was conferred on tenants subject to landlords' right to resume land for personal cultivation in Bombay, Himachal Pradesh, and Rajasthan. Tenants can retain a minimum holding or a portion thereof, such as half the area in Bombay, $\frac{1}{2}$ in Himachal Pradesh, 5 standard acres in Punjab or a minimum holding with a net income of Rs. 1,200 (exclusive of the cost of the labour and the labour of the family) in Rajasthan. Subject to the above conditions the landlord's right to resume land for personal cultivation is limited to 3 economic holdings (i.e. 12-48 acres) in Bombay, 5 acres in Himachal Pradesh, 20 standard acres in Punjab and the area in excess of the minimum holding to be left with the tenants in Rajasthan.

In other States also a limit has been fixed on the area which a land owner may resume for personal cultivation.

Legislation has been put through in most of the States prescribing a basis for the resumption of the land by the landlords, as shown below: **Assam:** Landlords can resume $\frac{1}{2}$ of the area owned subject to a minimum of $\frac{1}{2}$ acres and a maximum of 33 $\frac{1}{2}$ acres; **Bengal:** Limit on resumption has been placed at $\frac{1}{2}$ of the area owned; **Jammu and Kashmir:** 2-6 acres; **Madras:** Owners with 12 $\frac{1}{2}$ acres of wet land or less can resume for personal cultivation half the area leased, subject to a maximum of 5 acres; and in **Orissa:** Owner has a right to resume an area upto 7 standard acres of wet land or 14 acres of dry land for personal cultivation. But in Bengal with regard to *Bargadars* (crop sharers) the landlord may resume only $\frac{1}{2}$ of the area if it is more than 7 $\frac{1}{2}$ acres, but all, if it is less.

Himachal: $\frac{1}{2}$ upto a maximum of 3 acres; **Andhra:** 3 family holdings; **Mysore:** 50 to 75 per cent; **former Bombay:** $\frac{1}{2}$ upto a maximum of 3 economic holdings; **Hyderabad:** 3 family holdings.

A basis for resumption had to be found to prevent large-scale ejections. In the Second Plan a distinction was made between owners who own a family holding or less and others who own land exceeding a family holding. It was suggested that owners in the former class may be permitted to resume one-half of the area leased, and if thereby a tenant's holding is reduced to less than a basic holding the Government should find extra land for the tenant. About land-owners in the second category resumption is subject to the tenant's right to retain minimum land between a basic and a family holding.

The definition of personal 'cultivation' also presented difficulty. In most State legislation the definition is made specific and comprehensive.

Ownership Right for Tenants: In most States legislation provides for the conferment of ownership right on tenants and in some cases with the option left to the tenants. The right of purchase relates only to areas which a land-owner cannot resume even on grounds of personal cultivation.

In Uttar Pradesh, West Bengal and Delhi all tenants and sub-tenants were brought in direct relation with the State. No compensation was payable by tenants as the State undertook the responsibility for paying compensation to landlords out of the rents recovered from the beneficiary tenants. But in Delhi compensation was recovered from tenants who would be required to pay land revenue to the State.

Restrictions and Conditions: In some States tenants' right to purchase was restricted as follows: **Andhra** (Hyderabad), **Bombay** (Marathwada, Kutch): Only protected tenants were conferred the rights; **Madhya Pradesh** and **Himachal:** Only for occupancy tenants; **Punjab:** Only such tenants of non-resumable areas (in continuous possession for six years) were permitted to buy; **Mysore:** For continuous possession for twelve years; **Bombay:** Only protected tenants. The time limit for purchase was fixed as follows: Where the right to purchase ownership is optional, the tenant can exercise it in time at his discretion. But in

Bombay and Madhya Pradesh (former Madhya Bharat area) the right must be exercised within a prescribed period.

Compensation to Landlords: Compensation payable by tenants for the acquisition of ownership varied from State to State except in the Punjab (where it is fixed at $\frac{1}{2}$ of the average market value), compensation is generally a multiple of rent or land revenue. In **Andhra** (Hyderabad 6-15); **Madhya Pradesh** (Madhya Bharat: 2-3 of the net income of landlord); **Ajmer:** 12; **former Vindhya Pradesh:** 16; **former Madhya Pradesh** (7-10); **Rajasthan** (for unirrigated lands): 10 and **Uttar Pradesh** 10.

In the Travancore part of Kerala it is fixed at eight and a half times the net annual income.

The compensation is fixed as a multiple of the assessment in four States:—**Bombay:** 20-200 times of the assessment; **Delhi:** 20-40; **Himachal Pradesh:** 48 and **Punjab** (PEPSU): 90 times of the assessment. This compensation is generally payable in instalments (except in former Madhya Pradesh) spread over a period of 5-15 years.

The optional right to purchase is seldom exercised. Tenants required persuasion and help. In **Bombay** (Saurashtra) and **Uttar Pradesh** the State Governments had to organise administrative drives to persuade tenants to become owners of land. The State Government (in former Saurashtra) provided even credit facilities amounting to about Rs. 20 million through the Land Mortgage Banks to enable the tenants to acquire ownership rights.

Judged by the amount of land purchased by the tenants and by the number of tenants who acquired ownership, the measures adopted have not produced any significant result. It is evident, tenants do not wish to pay to become landlords unless there are substantial advantages to gain or disadvantages to avoid.

The Second Five Year Plan has recommended that tenants of non-resumable areas should be brought into direct relationship with the State, but the total burden, including land revenue and instalment payments towards purchase price, should not exceed the level of rent recommended in the Plan.

FIXATION OF CEILING

Ceiling on Holding: There is a general movement towards fixing a maximum and minimum on land holdings, as an aspect of land reform. This relates to (1) the absolute amount of land which any individual may hold and (2) the future acquisition of land.

Existing Holding: Legislation was enacted in the following States for the fixation of ceiling on existing holdings:—**Andhra** (Hyderabad): 4 $\frac{1}{2}$ family holdings (18-270 acres); **Bengal:** 25 acres; **Himachal Pradesh:** 30 acres in Chamba (in other areas land assessment at Rs. 125); and **Jammu and Kashmir:** 22 $\frac{1}{2}$ acres.

Punjab: 30 standard acres and for D.P.'s 40 standard acres; **Assam:** 50 acres. But mechanized farms not exceeding 166 $\frac{1}{2}$ acres are exempted.

The legislation is enforced only in **Andhra** (Hyderabad), **Bengal** and **Kashmir**. The Punjab Government has begun implementation of the law to assume management of lands held by owners under personal cultivation in excess of 30 standard acres (50 standard acres for displaced persons). This does not apply to the efficiently managed estates whose break up may lead to a fall in production.

Ceiling has also been applied to lands held by intermediaries in **Madhya Pradesh**, and **Rajasthan** (Ajmer). In **Madhya Pradesh** and **Rajasthan** (Ajmer) it is 50 standard acres.

Future Holdings.—In various States ceiling has been placed on future acquisitions:—**Andhra** (Hyderabad): 3 family holdings (18-180 acres); **Assam:** 50 acres; **Bengal:** 25 acres; **Bombay:** 3 economic holdings (12-48 acres); **Delhi:** 50 standard acres; **Jammu and Kashmir:**

22 $\frac{1}{2}$ acres; **Madhya Pradesh** (Madhya Bharat): 50 acres (and for displaced persons) 40 standard acres; and **Uttar Pradesh:** 30 acres.

Punjab: 30 standard acres and for D.P.'s 40 standard acres.

The idea of ceilings is accepted. Census to collect data have also been held in most States. The ceiling recommended in the Second Plan is three family holdings. To define precisely what a family holding is Government appointed a small group of experts. The group has not yet made its report (Jan. 1959).

As is clear from the foregoing paragraphs legislation exists, the question is really one of implementation.

In view of the discussions that have taken place at the annual session of the party in power, it is likely that the policy will be actively pursued in 1959.

CONSOLIDATION

(a) **Size of Holding:** One of the problems of Indian agriculture is the small size of the average holding and of fragmentation. The average size of a holding for the whole of India is 7.5 acres, but this varies from State to State: **Assam** 5.3 acres, **Bihar** 4.1 acres, **Bombay** 4.8 acres, **M.P.** 13.9 acres, **Madras** 9.7 acres, **Orissa** 5.6 acres, **Punjab** 11.8 acres, **U.P.** 5.3 acres, **W. Bengal** 4.7 acres.

Kashmir 3.8 acres, **Kerala** 2.4 acres, **Mysore** 7.2 acres, **Rajasthan** 16.9 acres.

The majority of the holdings will be less than 5 acres, a great majority indeed less than 2.

The proportion of households that held either no land or less than five acres was about three-fourths, and the total share was about one-sixth of the whole area of cultivated land.

(b) **Consolidation of Holdings:** Consolidation of holding is viewed as a rural development programme, particularly as the prerequisite for optimum land use and food production, for the last two decades. But progress up to so far has been meagre in several parts of the country. The movement towards consolidation of holdings is partly voluntary and partly compulsory. Legislation towards this end has been enacted in the States of **Bombay**, **Madhya Pradesh**, **Punjab**, **Delhi**, **U.P.**, **Jammu and Kashmir**, **Assam** and **Himachal**. Special provision for consolidation of holding has also been incorporated in the Tenancy Acts of **Bengal**, **Bihar**, **Orissa**, **former Hyderabad** and **Ajmer**. Consolidation work has so far been undertaken in **Andhra** (Hyderabad), **Bombay**, **Delhi**, **Himachal Pradesh**, **Jammu and Kashmir**, **Madhya Pradesh**, **Orissa**, **Punjab**, **Rajasthan** and **Uttar Pradesh**. The total area consolidated upto 1956 is about 17.7 million acres as under.

The Second Plan target is 38 million acres. The State plans have a provision of Rs. 3.82 crores for the purpose. The Centre will contribute 50 per cent of the net expenses incurred by each State.

Area consolidated

(In million acres)

States	Upto		Total
	1955-56	1955-56	
Bombay (Pre-reorganisation)	2.12	0.68	2.80
Delhi	0.20	—	0.20
Madhya Pradesh (Pre-reorganisation)	2.89	0.11	3.00
Punjab	6.14	1.18	7.32
Uttar Pradesh	4.30	—	4.30
Total	15.74	1.97	17.71

(b) **Prevention of Fragmentation:** Measures to check sub-division and fragmentation of holdings, relate to putting restriction on partition and transfer below specified limits. Legislation disallowing such partitions has either been enacted or in the process of enactment in the following states. **U.P.** below 6 $\frac{1}{2}$ acres; **former**

Hyderabad below a basic holding ranging from 2-24 acres; Rajasthan below a size to be determined by the State Government; Delhi below 8 standard acres; former Madhya Pradesh below 15 acres; former Bhopal below 15 acres; former Vindhya Pradesh below 5 acres of irrigated or 10 acres of dry land.

Co-operative Farming: The policy is to give encouragement and assistance to farmers to group themselves into voluntary co-operative farming societies.

The ultimate solution of the land problem is co-operative village management.

The Central Government has offered to provide financial assistance towards administrative and advisory staff, and the State Governments have also offered some financial assistance for the purpose.

But, co-operative farming has not made much headway. Before 1955-56 there were 1,135 co-operative farming societies and in 1955-56 1,397. West Bengal: 78; Bombay: 386; Punjab: 347; Rajasthan: 76 and Uttar Pradesh: 108; Bihar: 10; Andhra Pradesh: 45; Assam: 60; Kashmir: 2; Kerala: 18; M.P.: 45; Madras: 26; Mysore: 1; Orissa: 5; Delhi: 17; H.P.: 5; Manipal: 10; Tripura: 10.

The area of land under co-operative cultivation on December 31, 1956 was 1,80,671 acres.

At the end of 1957-58 there were 2,020 co-operative farming societies including joint farming, collective farming, tenant farming and better farming societies.

The number of joint farming societies alone was 1,357 (986 joint, 391 collective).

Following is the State-wise break-up of the co-operative farming societies:—Andhra Pradesh 31; Assam 170; Bihar 27; Bombay 402; Jammu and Kashmir 7; Kerala 55; Madhya Pradesh 140; Madras 37; Mysore 100; Orissa 28; Punjab 478; Rajasthan 105; Uttar Pradesh 255; West Bengal 144; Delhi 22; Manipal 3; and Tripura 12.

During the four years 1954-55 to 1958-59 the Central Government, made grants to the extent of Rs. 3.32 lakhs to State Governments for this work. The State Governments provided assistance for development of co-operative farming societies in various forms, such as loans and subsidies, grant of Government waste lands, concession in land revenue, technical guidance, etc.

The Second Five Year Plan has provided financial assistance amounting to Rs. 138.57 lakhs for the development of co-operative farming.

It is expected that over a period of 10 years, a substantial portion of the agricultural land will be cultivated by co-operative farming.

The National Development Council has recommended that 3,000 co-operative farms should be started during the Second Five Year Plan. There are plans for starting 600 in 1958-59.

The idea is to start with service co-operatives first. It is planned to set up 550,000 service co-operatives in three years, when co-operative farming will begin to spread.

Three regional centres will be set up for training personnel (North and Central, Western, Eastern) in co-operative farming.

Besides co-operative farming, collective farming is undertaken in some States, (i.e. Andhra (Hyderabad), Bombay (Saurashtra), Madhya Pradesh (Bhopal), Mysore (Coorg) and Tripura.

(d) **Agricultural Labour:** About 30-4 per cent of the rural families were agricultural labourers, half of them possessing no land whatsoever, and the other half owning some land. There is tenancy legislation in many States while minimum wages for agricultural workers are fixed in former Ajmer, Delhi, Himachal Pradesh, former Kutch, Patna District of Bihar, Punjab, Coorg and Tripura.

Minimum wages have to be fixed in all States before the end of the Second Plan.

Landless agricultural workers are settled on the Central Mechanized Farm, Bhopal, under a scheme for the settlement of 6,000 families over an area of about 6,800 acres.

Settlement on the Bhopal farm is complete. Here there are 469 families in all, 299 from Bhopal and 200 from Kerala.

At Suratgarh in Rajasthan there is a Russian-sponsored collective farm.

Financial help has been offered to States like U.P. for initial spadework in land utilization such as land reclamation and layout, building tenements, health and social amenities and also administrative staff for the initial stages of 2-3 years. Though the State schemes are not linked up with those on co-operative farming, the purchase, and services in connection with the colonies will be on co-operative basis leaving other aspects to the decision of the colonists. The Second Five Year Plan provided Rs. 150 lakhs for the purpose. But the amount spent was less than Rs. 100 lakhs spent mainly in Uttar Pradesh (in Lakhimpur Kheri and Pilibhit Districts) and in Madhya Pradesh (Bhopal). Small schemes in Andhra, Madras and Mysore also got the support of the Government.

During 1957-58 a loan of Rs. 1,655,000 and a grant of Rs. 487,000 were sanctioned for the States of Assam, Bihar, Kerala, Madhya Pradesh and Orissa for the settlement of 1,185 landless workers on an area of 10,000 acres.

Bhoomis

(See under 'Late Particulars').

The outlay during the Second Plan item-wise is as follows:—

(In million Rs.)

	Centre	States	Total
Agricultural Production	97.0	719.009	816.009
Minor Irrigation	28.0	631.824	659.824
Land Development	50.0	170.205	220.205
Soil Conservation	40.0	155.538	195.538
Warehousing and Marketing	39.0	154.671	193.671
Co-operation	275.664	275.664
Miscellaneous	6.0	87.598	93.598
Village Panchayats	150.502	150.502
Local Development Works	150.0	...	150.000
Total Agriculture	530.00	4,197.441	4,727.441
Animal Husbandry	40.00	342.837	382.837
Dairying and Milk Supply	18.00	156.919	177.919
Total Animal Husbandry	58.00	502.256	560.256
Forests	24.00	247.255	271.255
Fisheries	28.00	79.755	117.755
Total (Grand)	650.00	5,026.710	5,676.710

The targets to be attained are an additional production of 18.4 million tons of foodgrains, 2 million tons of sugar, 2.1 million tons of oilseeds, 2.3 million bales of cotton, and 1.5 million bales of jute, over the estimated production for 1954-55 in the First Five Year Plan.

If the Second Five Year Plan targets are realized agricultural production as a whole would increase by about 25 per cent, the increase in the production of foodgrains being nearly 25 per cent, and that of commercial crops about 34 per cent.

AGRICULTURAL PRODUCTION TARGETS OF THE SECOND FIVE-YEAR PLAN

(In million tons)

Commodity	Estimated Production of 1954-55	Targets for the Second F.Y.P. 1955-61	Additional production over 1954-55	Per cent increase in index of production
Foodgrains	65.0	80.4	15.4	24.0
Sugar (gur)	5.8	7.8	2.0	35.0
Oilseeds	5.5	7.6	2.1	37.0
Cotton*	4.2	6.5	2.3	55.0
Jute*	4.0	5.5	1.5	38.0
Other crops*
All commodities	37.8

* In million bales.

FIRST FIVE-YEAR PLAN

The Plan sought to increase the production of food and raw material and transform the village environment and outlook of the rural population.

The outlay was as follows (Rs. in crores):

Agriculture	199.18
Veterinary, dairying	20.68
Forests	11.17
Co-operation	6.38
Fisheries	4.88
Rural development	11.50
Community Projects	90.00
Local Works	18.00
Programme for scarcity affected areas	15.00
Total	373.74

The targets to be attained were additional production of 7.6 million tons of foodgrains, 1.25 million bales of cotton, 2.09 million bales of jute, 0.7 million tons of sugar, 0.4 million tons of oilseeds.

The major and minor irrigation works were to irrigate 19.7 million acres.

SECOND FIVE-YEAR PLAN

In the Second Plan agricultural programmes are intended to provide adequate food to support the increased population and the raw materials needed for a growing industrial economy and also to make available larger exportable surpluses of agricultural commodities.

This is to be effected through various measures including the following :—

(a) **Land Reclamation & Improvements** :—As against 7.4 million acres to be brought under the plough by the Central and State Governments (1.6 million acres by C.T.O., 1.2 million acres by State Tractor Organisation, and 4.6 million acres by the farmers themselves with State assistance) proposed in the First Five Year Plan, during the Second Five Year Plan, 1.5 million acres are to be reclaimed and land improvement measures are to be undertaken on 2 million acres through Central and State Tractor Organisation, farmers and other agencies.

(b) **Soil Conservation** :—The Second Five-Year Plan has provided Rs. 200 million for soil conservation alone as against a total of Rs. 120 million for forest and soil conservation combined provided in the First Five Year Plan. During the Second Plan soil conservation work is to be undertaken in a concentrated manner over 2 million acres of land in areas seriously affected by soil erosion. The programmes include soil conservation measures for two million acres of agricultural land. Measures for the control of shifting sand-dunes are to be undertaken over an area of 0.35 million acres. Measures such as afforestation, fire control in forests, waste lands, contour bundings, etc. are to be undertaken in important river valleys over an area of about 0.35 million acres, in hilly regions over an area of about 0.17 million acres, in ravine lands over an area of 0.15 acres, and in waste lands over 0.1 million acres.

(c) **Seeds** :—Each State will have seed farms for raising nuclear seeds and multiplying them through registered growers, keeping in view the requirements of the entire area to be served by State farms; 12,000 seed farms with a total area of about 95,000 acres are proposed. Co-operative seed stores will be set up at the headquarters of every national extension block

and similar stores for each group of 20 villages. Fertilisers and other agricultural accessories will also be made available in these stores.

(d) **Irrigation** :—As against 19.7 million acres to be irrigated (by major and minor irrigation projects) in the First Five Year Plan, an additional area of 21 million acres (12 million acres from large and medium projects, and 9 million from minor irrigation projects) is proposed for the Second Five Year Plan.

(e) **Fertilisers and Manures** :—The consumption of nitrogenous fertilisers will be increased from 0.61 million tons (in 1955) to over 1.5 million tons during the Second Plan; phosphate fertilisers consumption will also be stepped up. Utilisation of oilcake (non-edible to livestock) will also be increased. Green manuring practice will receive increased attention in the material practices. Larger utilisation of town compost and sewage too will be adopted.

Horticulture

(f) **Fruits and Vegetables** :—About half a million acres of orchards will be rejuvenated in the different States and about 0.2 million acres of new orchards will be laid during the Second Five Year Plan. Vegetable production will be encouraged, particularly in the neighbourhood of towns by organising nurseries and providing seeds and plants to vegetable growers on credit, and by co-operative marketing organisation of food and vegetable growers. Nuclear potato seed production will be taken up in the different potato growing States. Fruit and vegetable preservation will be encouraged by assistance to the canning industry and by setting up cold storage plants, etc. Export of such products will also be encouraged.

(g) **Marketing** :—Compared with only Rs. 7.5 million in the First Five Year Plan, Rs. 60 million have been earmarked by the Centre for marketing, including warehousing. In addition, separate funds are also provided for

a National Co-operative Development Board and an All-India Warehousing Corporation in State plans. The marketing programmes formulated on the basis of recommendations of the Rural Credit Survey Committee include 1,800 marketing co-operative societies, 280 warehouses and over 1,000 regulated markets.

(h) **Plant Protection** :—Plant protection work will be intensified; existing centres will be strengthened and five new centres will be established.

(i) **Research** :—For increasing the tempo of agricultural research in the States and in the Central Institutes and Commodities Research Stations, Rs. 140 million are provided. Agro-economic research will also be intensified, and two more agro-economic centres will be added to the present four.

(j) **Agricultural Education** :—For the training of village-level-workers, in addition to the existing 54 basic agricultural schools and 44 extension centres, it is proposed to establish 25 new basic agricultural schools, 21 extension centres and 16 basic agricultural wings attached to extension training centres. Additional agricultural colleges will be set up where they are needed, as 5,500 agricultural graduates are needed during the Second Plan. Financial assistance will be provided to State Governments for the establishment of four new agricultural colleges and expansion of training facilities in an equal number of existing agricultural colleges in the country. The financial details are, about 1/4th of the non-recurring expenditure will be provided by the Centre as grant, and the balance as loan, subject to a maximum of Rs. 24 million for a new college and Rs. 0.75 million for the expansion of an existing college. The entire recurring expenditure would be the responsibility of the State Governments concerned. They are, however, obliged to reserve a suitable number of seats in their colleges for students from States without agricultural colleges.

* Not known.

LIVESTOCK

It is estimated that there were about 307 million total livestock in 1953. Of these the cattle formed about 130 million, buffaloes about 45 million, sheep 33.6 million, goats about 54.6 million, horses, ponies about 1.5 million, other livestock (mules, donkeys, camels and pigs) about 0.7 million and poultry about 97.4 million. India has thus about 19 per cent of the world's cattle, about half the world's buffaloes and about 18 per cent of the goats.

In spite of the large number of livestock, the net value of the livestock products in 1950-51 amounted only to about 16 per cent of the income from agriculture.

Live animals worth Rs.1.642 million and Rs. 0.845 million were exported for food during 1957 and the first eight months of 1958 respectively. The imports during the same period were valued at Rs.1.557 million and Rs.0.384 million respectively. Other live animals (excluding monkeys) worth Rs.14.7 million and Rs.5.8 million were exported for non-food purpose during 1957 and 1958 respectively.

Monkeys have been exported recently on a large scale, namely, 100,330 in 1954-55 valued at Rs. 18 lakhs, 106,236 in 1955-56 valued at Rs.29 lakhs, 1,144,090 in 1956-57 valued at Rs.30 lakhs, 190,844 valued at Rs.127.6 lakhs in 1957 and 62,994 valued at Rs.42.5 lakhs in 1958.

CATTLE

For draught purposes cattle are mainly used everywhere though male buffaloes are important as draught animals in the rice tracts and humid parts of the country. For dairy purposes, the buffalo is important, the milk yield being high and the percentage of butter fat considerably above that in cow's milk.

As for the fodder that is required, only two-thirds in the roughage variety and one-third in the concentrate are available.

Among the well-defined breeds of cattle (26 in all), three broad divisions are: dairy and draught cattle and those that serve a dual purpose.

Milk:—The Sahiwal, the best milk breed, are responsive to environment, have an yield of 4,000 lbs. a year. The Sindhi are also responsive to environment, the Gir in Saurashtra and Rajasthan have an yield of 3,700 lbs. a year.

Dual:—The Gale in Madhya Pradesh are draught animals but also good milkers, 3,000 lbs. The Kangayam in the south and south-east of the country are powerful draught animals of average milk yield. The Kanakre, are essentially draught but have milk potentialities (3,000 lbs.): they belong to Gujarat. The best known in this group are the Haryana (Punjab, 3,000 lbs.), Tharparker (Gujarat and Rajasthan, 3,000 lbs.), and Ongole (Andhra).

Draught:—The Amritmahal (Mysore) are poor milkers; then there are the Hallikar (Mysore).

In the order of the productivity of milk we might arrange the cattle as follows: the Sahiwal, the Kanakre, the Ongole.

The best known breeds of buffaloes (26 in all) are the Murrah, Mili and Ravi buffaloes of the Punjab, the Jafferbadi buffaloes of Kathiawad, Mohana of Gujarat, Nagpuri of Vidarbha and the Surti and Pandharpuri, a type of Nagpuri buffaloes of Bombay State. All except the Nagpuri are noted dairy breeds. Murrah, is adapted to all climates. They also yield on an average about 3,000 lbs. of milk for over 300 days in a year.

Generally speaking, buffaloes provide the Indian farmer with milk and ghee while the cow

is only the mother of the working bullock. The buffalo is therefore better fed and looked after. The average annual milk yield of a buffalo is 1,100 lbs. against 413 lbs. of the Indian cow. Further buffalo milk being one and a half times as rich in fat content as cow milk, is more valued for butter and ghee production. Buffaloes are also better utilizers of coarse fodder and are less expensive to keep.

Experience of Government farms is that by better feeding and management the production of village cows can be increased by 50 per cent, whereas that of the buffaloes can be increased only by 15 per cent. In view of the early maturity of the cow and the greater utility of its males for work, cows have more overall utility, but buffaloes are comparatively economical where there is cheap fodder or free grazing in plenty.

LIVESTOCK DEVELOPMENT

Livestock Development is stepped up through special schemes such as Key Villages, Gosadan, and Poultry Development Schemes.

Under the Key Village Scheme by the end of 1955-56, 146 artificial insemination centres and 555 key village units had been established.

In 1956-57 and 1957-58, 26 and 44 artificial insemination centres and 156 and 264 key village units respectively were established.

In 1957-58 a total of 2,39,210 inseminations and 77,802 natural services were performed. This covered 36 per cent of the adult buffalo and cow population.

Legislation for livestock improvement and control of contagious diseases exists in all States (except in Jammu & Kashmir, Tripura, Rajasthan and U.P.) A total of about 848 bulls and 304 buffalo bulls of recognised breeds were located at the artificial insemination centres established during the first plan. In 1956-57 about 1,024 bulls and 332 buffalo bulls were located.

In 1955-56, 37,502 male cattle and in 1956-57, 50,114 male cattle were castrated. During 1954-55 a scheme for subsidizing and rearing selected calves produced in key village areas were also initiated. During 1955-56, 1,673 calves were subsidised in the States of Andhra, Bihar, Bombay, Madras, Kerala, Madhya Pradesh (Ajmer, Bhopal) and Delhi.

In 1956-57, 1,806 calves were subsidised in all States except Assam, Jammu & Kashmir, Mysore, Orissa, Rajasthan and Himachal Pradesh.

Gosadans.—During the First Five Year Plan, 25 gosadans were established, one in Tripura, two each in Mysore and Rajasthan, three each in Bihar and Punjab, four each in Madhya Pradesh and Uttar Pradesh and six in Bombay State.

During 1956-57, eleven gosadans were established, two each in Bihar, Bombay and Madhya Pradesh and five in Uttar Pradesh.

Fourteen gosadans were established in 1957-58, one each in Andhra, Jammu & Kashmir, Orissa and Rajasthan, three each in Madhya Pradesh and Uttar Pradesh, and four in Bombay.

Six gosadans, one each in Madhya Pradesh, Mysore and Orissa and three in Uttar Pradesh had been proposed for 1958-59.

Old infirm and useless cattle are segregated and sent to gosadans located in remote forests and other waste lands where grazing facilities are not fully utilized. All male stock were castrated before admission into the gosadans. The remains of dead animals such as skins,

hides and hoofs, etc. were to be utilized by setting up a small 'charmalaya' at each centre.

SHEEP

It has been estimated that the number of sheep in the country is about 40 million and that the total quantity of wool produced is 54 million lb. annually valued at Rs. 10.5 million. The yield of wool per sheep varies greatly in different parts of the country. In Punjab, Uttar Pradesh and Rajasthan, the annual production per sheep is estimated at between 3.1 lb. and 4 lb., while in the rest of the States it does not exceed 1 lb. The average for the whole of the country is in the neighbourhood of 2 lb. per sheep per year.

Sheep also supply meat worth about Rs. 120 million every year in addition to pelts and manure. Sheep manure is very much valued among other manures as it contains twice as much nitrogen and potassium as are present in cattle manure. An individual sheep contributes 0.5 to 0.7 tons of manure annually.

India still requires large quantities of wool. About 16 million pounds of wool, tops and yarns costing about Rs. 120 million are imported. At the same time, we export about 38 million pounds valued at Rs. 81 million annually.

A sheep and wool development scheme has now been launched on the lines of the key village scheme for cattle improvement, in 250 centres in different states.

Research in sheep breeding is promoted in three major sheep rearing tracts, viz. Temperate Himalayan, North Indian Plains and in the Deccan Plateaux, to evolve strains of sheep which will yield wool for apparel and also for superior types of carpets.

The major wool clip of the country hitherto, was classed as carpet grade, due to its two primary defects viz. extreme hairiness and the presence of 'kemp'. Investigations have shown that both of these could be eliminated by selective breeding, completely in the case of kemp.

In the Himalayan regions and in the western portions of the Deccan plateau, breeding the imported Merino with the local sheep, has shown great promise. Concerted efforts are being made in the plan period at about 200 centres in the rural areas. Each centre will comprise an ewe population of 2,000 to 3,000 which would be systematically developed as nucleus ram producing flocks. A minimum of a thousand rams are to be produced annually after ten years from each centre. The flock owners will be adequately assisted with selected rams, first aid, wool and sheep marketing arrangements and such like.

GOATS

Goats form an integral part of Indian agricultural economy. The goat is the principal source of meat supply; it also provides manure, skin, hair (Mohair) and milk. There are about 57 million goats in India, which is a fourth of the world's goat population. About a fifth of this is used for milk production. Annually about 17 million goats are in demand for human consumption. About 21.9 million pieces of goat skins and hides valued at Rs. 75 million are produced in India, of which skins worth about 37.2 million rupees are exported. Goats are of active habit and multiply rapidly. Goats, unlike sheep, eat up even vegetation containing high tannic acid content which other animals shun. Rajasthan has the largest goat population followed by Bombay, Bihar and U.P.

The important breeds of Indian goats fall under four broad groups:—Himalayan Goats are found in the hills of Kashmir, Punjab and Uttar Pradesh. These are mostly reared for mohair production and also for meat. There

is also the Pashmari goat of Kashmir which produces an undercoat of very fine variety of hair which goes into the manufacture of shawls. The plain goats comprise some of the best mutton and milch animals. Some of the better known breeds are Marwari, Konor and Jamnapari. The last yield 600 lbs. in a lactation of 250 days. Deccan plateau goats yield small quantities of milk and are mostly reared for mutton.

Results from the Punjab and U.P. have shown that selected goat yield (6 to 8 lbs. milk per day going upto even 12 lbs. in U.P.) on an average about 400 lbs. of milk per lactation of 150 days while a few went upto 700 lbs. and even higher.

POULTRY

Poultry-keeping is an important subsidiary industry of the poorer classes. Indigenous poultry of low grade produce on an average 50 small-sized eggs per year.

Even at a low rate of production, the annual contribution of Indian poultry to the country's economy is not less than Rs. 100 million.

At present, the *per capita* consumption of eggs in India is only four per annum as compared with 400 in U.K., U.S.A. or Denmark.

An improved strain of poultry has been evolved at Isatnagar by selective breeding for ten generations which give an average annual egg yield of 150 and sometimes of 234 of the larger egg type.

Poultry Development.—To stimulate poultry development as a subsidiary industry in the rural areas, a pilot project was approved early in 1955.

33 centres have now been established, and are in different stages of development.

50 and 64 new centres were sanctioned for 1956-57 and 1957-58 respectively. During the Second Five Year Plan five regional poultry farms are being opened in Bangalore, Bombay, Bhubaneswar, Delhi and Himachal Pradesh and 300 demonstration extension centres at a total cost of Rs. 25.81 million.

DAIRYING

Like agriculture dairying is one of the major industries in India as milk and milk products contribute not less than Rs. 6,200 million to the national income.

Despite the large vegetarian population and large number of cattle, the dairy industry is still unorganised. Of 200 million cattle and buffaloes, 72 million or 36 per cent are milch animals (females over 3 years). Milk yield is, however, low: Cow 413 lb. per year, buffalo 1,100 lb. Though buffaloes form only 30 per cent. of milch animals, due to their comparatively high yield, they account for 55.9 per cent of the total milk produced. Buffalo milk has butter fat content 6.5 to 7 per cent. as against 4 to 5 per cent of cow.

Gross production of milk is 20.65 million tons, of which 13.2 million tons are marketed, the rest being used for home consumption or fed to calves. *Per capita* daily consumption of milk and milk products varies from 18-89 oz. in the Punjab to 28.4 oz. in Orissa; average 5.5 oz.

Intensive steps are being taken by most States to improve the cattle, both from the view-point of draught and milk production, and many important schemes have been put in operation. Cattle fairs, milk recording projects, cattle breeding farms, cross breeding with imported bulls did not yield good results in the long run. Only Indian bulls are now used for this purpose.

Financial assistance amounting to Rs. 5 225 million had been sanctioned by the Government of India for the various State dairy schemes for 1957-58.

This includes: (a) extension of milk supply to cities viz Chandigarh, Bissar, Agra, Gorakhpur, Gaya, Agartala Karjat, Sholapur, Bangalore and Trivandrum, (b) setting up dry cattle farms in Kerala (Punalur) and Madras (Abbhika-pathi), and buffalo dairy farm at Mysore (Kuri-kuppi), (c) expansion of existing dairy institutions in several States, (d) training of technical personnel in Bihar.

Dairy Development Projects working in the various States are—**Andhra:** Milk supply schemes are introduced at Kurnool and Guntur, **Bengal:** In the Calcutta Milk project about 2,000 milch animals were moved from the city to the Hamingghata Milk Colony. The quantity of milk handled increased from 600 mds daily in 1956 to 750 mds in 1957. Besides toned milk, flavoured vitaminised milk with one per cent fat is being supplied. **Bombay:** A very large colony has been established at Aarey near Bombay City where about 17,500 animals are housed under the most modern conditions and supply milk to Bombay City. A large dairy of similar nature has been established at Anand with the assistance of UNICEF. Another milk preservation plant (in addition to the one at Anand) is being set up at Rajkot with the same assistance to manufacture milk powder. Milk supply schemes are also working at Poona.

Poona milk supply scheme has been expanded and a new dairy was set up to increase the quantity of milk handled to 500 mds daily. **Bihar:** Co-operative milk unions have been set up in 3 towns.

Patna milk scheme is expanded with New Zealand's assistance under Colombo Plan to handle 250 mds milk daily.

The Delhi Milk Scheme is now under the Union Ministry. A 7,000 md milk treatment plant and four rural milk chilling stations have been included in the expansion programme.

The New Zealand Government offered assistance amounting Rs 10.6 million under the Colombo Plan and also the services of a Dairy Consultant for the purpose. **Madhya Pradesh:** The number of dairy units has increased from 7 to 11.

Madras: A number of co-operative milk supply schemes are in operation. These had reached a daily output of over 29,000 maunds in 1955-56. Further, the State Government advances loans to co-operative societies for the purchase of milch cattle. About 2,740 cattle were purchased in this way in 1955-56.

The milk project scheme at Madras is progressing and steps are being taken to set up a cattle colony. (December 1958)

Mysore: Milk supply schemes are taken up at Dharwar and Hubli; **Orissa:** Eight subsidised dairies have been established so far. **Uttar Pradesh:** There are co-operative milk units in 9 towns with well-equipped dairies where milk collected from rural areas is pasteurised prior to distribution.

In addition to assistance for milk projects in Bengal, Bombay, Delhi and Madras, T.C.M. of U.S.A. offered assistance worth 0.57 million dollars in the form of equipment for two milk plants in Bombay and Trivandrum, three rural creameries in Bihar, Bombay and Madhya Pradesh and one milk product factory in the Punjab, and the services of a dairy consultant and technologist.

Research in dairying is done at the National Dairy Research Institute at Karnal and its southern regional station at Bangalore. This Institute also runs courses in Animal Husbandry and Dairying.

Practical training for the technical personnel required for the various dairy projects are provided at Aarey Colony, Khairi Milk Union and at Hamingghata, Bengal.

ANIMAL DISEASES

The chief diseases that the Animal Husbandry and Veterinary Departments have to deal with are glanders and surra in equines, foot and mouth disease, haemorrhagic septicaemia, black quarter and anthrax in ruminants while tuberculosis, John's disease and contagious abortion are assuming greater importance than in the past. Glanders and surra are both scheduled diseases under the Glanders and Farcy Act. Glanders is incurable but surra can now be successfully treated with Naganol or Antypol. This disease (surra) also affects camels, cattle and dogs and in recent years its importance as a bovine disease has been more widely recognised.

A major scourge affecting Indian cattle is Rinderpest which causes a mortality of about 60 per cent resulting in an annual loss of 0.4 million heads of cattle, valued at about 300 million rupees. The first plan had provided Rs. 1.67 million for Rinderpest eradication. The Second Plan has provided Rs. 13.3 million. Because of the eradication campaign of the past, Kerala and Madras are now free from the disease. But, further north, in Andhra Pradesh, Mysore, and Bombay States the disease is prevalent and a pilot scheme to vaccinate and brand about 12 million cattle and buffaloes has been in operation since October, 1954.

The quantity of vaccine produced during the first plan period (October 1954 to March 1956) and the number of animals vaccinated were 7.6 million doses and 5.7 million animals respectively. During 1956-57, 10.573 million doses of vaccine were produced and 5.46 million animals were vaccinated. In 1957-58, 20.11 million doses of vaccine were produced and 14.438 million animals were vaccinated.

Of the diseases of ruminants mentioned, all, with the exception of foot and mouth disease, can now be controlled either by means of sera or by vaccines.

Indian poultry are also subject to several contagious diseases.

According to the FFYP, 650 veterinary dispensaries were established. During 1955-56, 192 dispensaries (including 13 mobile units) were set up.

Research and Educational Institutions

The Chief Research Centres under the Central Government are:—Indian Veterinary Research Institute is situated at two places in Uttar Pradesh, Isatnagar, and at Mukteswar near Bareilly. They undertake both research and training.

The Institute supplies the veterinary demands of the whole of India for sera and vaccines and except for two minor institutions (one in Madras and the other in Mysore), it is the only source in India for these products. The present output of these products meet only 1/3rd of the demands. Recently on the advice of a foreign expert in the manufacture of Biological Products through modern methods, steps are being taken to modernise the equipment and processes.

Similarly, Research in Dairying is done at the Indian Dairy Research Institute, Karnal (Punjab) and at its southern regional station at Bangalore (Mysore). The Indian Dairy Research Institute is the principal educational and research centre in the country in Dairy Science. The Institute gives courses in Animal Husbandry and Dairying.

There are fourteen Veterinary Colleges in India, one each at Gwalior, Patna, Calcutta, Bombay, Mathura, Hyderabad, Madras, Bikaner, Bapatla, Mhow, Cuttack, Trichur and Jabalpur.

LIVESTOCK STATISTICS

The following table shows the estimates of livestock population for 1956 :

(In thousands).

Area	Cattle	Buffaloes	Sheep	Goats	Horses & Ponies	Other Livestock	Total Livestock	Poultry
STATES								
1. Andhra Pradesh	10,958	5,743	7,428	3,601	96	708	28,534	14,058

FOOD

THE areas covered by the Punjab and the former Vindhya Pradesh (now part of Madhya Pradesh) are generally surplus in wheat.

The areas covered by the following States are generally surplus in rice: Orissa, Madhya Pradesh, Andhra, Punjab

From the point of view of food generally the position is roughly as follows:

Surplus areas: Madhya Pradesh, Punjab, Orissa, Andhra.

Self-sufficient areas: U P, Rajasthan, Madras, Mysore

Deficit areas: Bombay, Himachal Pradesh, Bihar, West Bengal, Kerala.

PRODUCTION

Total foodgrains production in the country was as follows: (figures in million tons) 1950-51: 50; 1951-52: 51.17; 1952-53: 58.27; 1953-54: 68.72; 1954-55: 66.60; 1955-56: 65.3; 1956-57: 68.7; 1957-58: 62.0.

The following are the comparative production figures of rice, wheat and barley during 1955-56 to 1957-58:

(000 tons)

Year	Rice	Wheat	Barley*
1957-58 ..	24,821	7,654	2,175
1956-57 ..	23,282	9,314	2,827
1955-56 ..	24,821	8,622	2,175

The production of gram in 1957-58 was 4.8 million tons, and of maize 3 million tons.

For 1958-59 the production of rice is expected to be about 29 million tons.

State-wise details of production in 1957-58 (in 000 tons) are as under:—

Andhra Pradesh 6,142; Assam 1,626; Bengal (West) 4,543; Bihar 3,683; Bombay 7,671; Jammu and Kashmir 376; Kerala 902; Madhya Pradesh 6,047; Madras 4,760; Mysore 3,378; Orissa 2,114; Punjab 5,244; Rajasthan 3,908; Uttar Pradesh 11,136; Andaman and Nicobar Islands 3; Delhi 36; Himachal Pradesh 230; Laccadive, Minicoy and Amindivi Islands (Not known); Manipur 107; Tripura 120.

The index of production of foodgrains for three years is as follows (1949-50 = 100):—

1950-51: 90.5; 1955-56: 115.3; 1956-57: 120.3, 1957-58: 107.3 (final estimates).

The index for rice, wheat, jowar, bajra, maize, ragi, small millets (1949-50 = 100):

	1955-56	1956-57	1957-58
Rice	114.2	119.1	104.5
Wheat	131.3	141.6	116.4
Jowar	96.7	105.9	117.7
Bajra	108.3	92.0	113.6
Ragi	119.7	112.9	113.0
Maize	112.3	132.0	134.4
Small Millets	105.1	101.3	90.7
Barley	118.6	120.9	93.0
Cereals	114.9	119.9	108.3
Gram	138.9	163.2	123.9
Tur	99.4	106.0	75.7
Other pulses	103.9	92.1	85.9
Pulses	118.4	124.5	100.9

The demand and supply of cereals from 1955 to 1957 :

(000 tons).

										1955	1956 (e)	1957
Production (a)										55,734	54,923	57,245
Procurement Net Imports (b)										15	36	230
(c)										232	551	..
(d)										..	2	..
Opening Stocks in Godowns	States	754	155	83
	Centre	556	733	208
	Total	1,310	908	290
Offtake from Godowns	States	449	663	1,003
	Centre	1,161	1,381	1,946
	Total	1,610	2,049	2,949

(a) Production figures refer to the agricultural year (i.e. July-June) and production under 1956 relates to the agricultural year (1955-56).

(b) Excludes quantities taken over from the State Governments to the Central Reserve.

(c) Shows total supplies out of both the imported cereals and internal surpluses.

(d) Shows separately the supplies out of internal surpluses already included under 'c'.

(e) Figures for 1956 are provisional and subject to revision.

The balance sheet of foodgrains distributed by Governments during 1956 and 1957 was as follows :

(in thousand tons)

	1956	1957
Opening Stock with States	158	82
Procurement	36	230
Net Supplies to States	541	—
Total Availability	735	312
Offtake in States	663	1,003
Transfer of Stocks to Centre	35	—
Stocks with States at the end of the year	79	32
Central Sales during the year	1,367	1,946
Central Reserves at the end of the year	735	208

Issue from Central stocks in 1956 : 7.11 lakh tons rice, 0.81 lakh tons coarse grains

The total subsidy or trading loss on foodgrains issued from central stocks between April 1, 1956 and Dec. 31, 1956 was Rs. 43 crores

IMPORTS (1955-56)

In 1956 upto the end of August, 335,566 tons of rice and 1,536,314 tons of wheat were imported.

The imports of foodgrains over the years were as follows :

(figures in million tons)

1950-2.1; 1951-4.7; 1952-3.9; 1953-2.0; 1954-0.806; 1955-0.7; 1956-1.42; 1957-3.58 1958 programme - 2.78 made up of 1.684 million tons of wheat from the United States, 6.31 lakh tons of wheat from Canada, 5,600 tons of wheat from Australia, 3,372 lakh tons rice from Burma, 6,500 tons of rice from Viet Nam, one lakh tons of sorghum from the U.S. and 25,000 tons of corn from the U.S.

The imports of individual grains were as follows :

(in million tons)

	1955	1956	1957
Rice	0.285	0.325	0.736
Wheat (including barley)	0.435	1.095	2.846
Others	—	—	—
TOTAL	0.700	1.420	3.582

Actually imported in 1956 : 31.73 lakh tons valued at Rs. 120.5 crores (rice 3.90 lakh tons).

The cost of import of foodgrains was as follows :

(figures in crores of rupees)

1950-80.6; 1951-216.8; 1952-209.1; 1953-85.96; 1954-47.02; 1955-33.11; 1956-56.84; 1957-16.218.

Countries from which imports were obtained from 1955 to 1957 with quantity (in million tons) and C & F value (in lakhs of rupees) were as follows : The figures are provisional :

Country	1955		1956		1957	
	Quantity	Value	Quantity	Value	Quantity	Value
U.S.A.	0.129	—	0.423	—	2.866	—
Australia	0.306	—	0.617	—	0.161	—
Argentina	—	—	—	—	—	—
Canada	—	—	—	—	0.011	—
U.S.S.R.	—	—	0.40	—	—	—
Pakistan	—	—	0.020	—	0.012	—
Burma	0.285	—	0.274	—	0.509	—
Viet Nam	—	—	—	—	0.007	—
China	—	—	0.046	—	0.014	—
TOTAL	0.700	33.11	1.420	56.34	3.582	16.218

Countries from which imports of individual grains were made in 1957 were as follows :
(in thousand tons)

	Wheat	Rice	Millet
China	—	14	—
U.S.A.	2,674	194	—
Australia	161	—	—
Burma	—	509	—
Viet Nam	—	7	—
Pakistan	—	12	—
Canada	11	—	—
TOTAL	2,846	736	—

The foreign exchange expenditure on import of foodgrains and the total cost of the imports available for the financial years are as follows :

(Rs. million)

Year	Total landed value of imports	Foreign Exchange expenditure
1956-57	1,110	480
1957-58	1,970	280
1958-59	1,110	280
(Budget estimates)		

The Plan provided for an import of 6 million tons of foodgrains costing about Rs. 480 million a year.

The value of foodgrains imported from abroad from April 1, 1956 to Sept. 30, 1956 was Rs. 296.64 crores. The expenditure incurred in foreign currency was Rs. 98.74 crores.

PRICE LEVEL

The movement in the price of some items is shown by the following table of index numbers of wholesale prices:

	1956		1957		1958
	January	December	January	December	January
All commodities	95.8	107.9	107.2	107.0	106.0
Food Articles	89.4	104.8	108.2	104.0	123.5
Cereals	80.0	97.0	98.0	98.0	97.0
Pulses	76.0	87.0	86.0	80.0	80.0
Rice	77.0	83.0	81.0	102.0	101.0
Wheat	85.0	94.0	94.0	86.0	86.0
Jowar	88.0	127.0	119.0	109.0	108.0
Bajra	98.0	123.0	132.0	117.0	114.0
Ragi	80.0	97.0	97.0	100.0	103.0
Gram	87.0	77.0	78.0	73.0	64.0
Arhar	85.0	82.0	83.0	86.0	74.0

The price position was difficult June to Sept. 1958.

STATE TRADING

A notable decision made by the National Development Council at its meeting in 1956 January is that the State should take over the wholesale trade in foodgrains.

Detailed plans were still being worked out when the article was prepared (February 1959).

1958—A REVIEW

Production figures from 1949 to 1958 show that while there were bad years (i.e., 1950-52), the broad trend of production has been in the upward direction. The index number of production rose from 100 in 1949-50 to 120.6 in 1956-57, an increase of 20.6 per cent.

Production was seriously affected, however, during 1957-58, by drought in the central and north-eastern parts of the country particularly in Assam, Bengal, Bihar, Orissa, eastern U.P., Madhya Pradesh, and Rajasthan.

The production of rice during the 1957-58 season, therefore, decreased by about 3.46 million tons (the actual production during the year and the previous year being 24.82, and 28.28 million tons respectively). Though this short-fall in the rice production was made up partially by the increase in the production of other cereals especially Jowar and Bajra, (the production of which had gone up by 1.6 million tons over the previous year), there still was a gap of 4.4 million tons in the production of cereals as compared to the year before.

The shortfall in the production of all foodgrains (including pulses) was of the order of 6.7 million tons or 8.8 per cent.

The quantities of wheat supplied to various States from Apr. 1, 1955 to Jan. 31, 1959 (in '000 tons) are: Andhra Pradesh 25; Andamans and Nicobar 1; Assam 61; Bihar 637; Bombay 388; Delhi 89; Himachal Pradesh 2; Jammu and Kashmir 45; Kerala 4; Madhya Pradesh 107; Madras 71; Mysore 34; Orissa 14; Punjab 44; Rajasthan 66; Tripura 3; Uttar Pradesh 467; and West Bengal 583.

The figures below show the performance in the principal food crops as compared with the targets for 1955-56 (figures are in million tons):

	Target, 1955-56	Achievement	
	1956-57	1957-58	1958-59
Rice	27.2	26.8	24.8
Wheat	8.8	8.8	7.6
Other Cereals	17.0	19.6	20.4
Pulses	9.1	11.6	9.2
	61.6	66.7	62.0

The food position in the different States was briefly as follows:—

South India (Andhra, Madras and Kerala): The export of rice from the zone was banned after the creation of the Southern Rice Zone in July, 1957. The prices of rice were also stabilised at about Rs. 17-18 per maund in most of the centres. Though, there was some rise in the prices, the prices were lower than the prices generally obtaining in States like West Bengal, Bihar, Bombay, and Uttar Pradesh.

Assam: Assam was cordoned off for rice and no export of rice from the State was allowed. The prices of rice in Assam were fairly steady, though at a high level. The Government distributed both wheat and rice from the Government stocks and the food supply position in the State was on the whole, satisfactory.

West Bengal: West Bengal was cordoned off for rice and the export of rice from the State was banned. The prices of rice were steady though at a high level.

The Government of India agreed to supply 175,000 tons of rice for distribution during 1958. The State Government was also assured that its reasonable requirements of wheat would be met by the Centre. The State itself procured locally about 68,000 tons of rice which also was available for distribution. Over 7,000 modified ration shops functioned in the State through which wheat and rice were distributed. Wheat was released from Central stocks in West Bengal at the rate of 50,000 to 60,000 tons per month and arrangement was made by the State Government to distribute rice at the rate of about 40,000 to 45,000 tons per month. This large-scale distribution of wheat and rice was expected to have a salutary effect on the prices of foodgrains in West Bengal.

Bihar: Bihar was cordoned off for all foodgrains and the Central Government supplied large quantities of wheat and rice for distribution in the State. Over 15,000 fair price shops functioned. The off-take of wheat from these fair price shops went up to almost one lakh tons of wheat per month. In addition, substantial

quantities of rice were distributed. The prices of wheat and rice in Bihar were steady though at a high level.

Bombay: The prices of rice in Bombay were steady though at a somewhat high level. Government distributed substantial quantities of rice in Bombay City and in the districts. The Government also distributed about 30,000 tons of wheat per month in Bombay. The supply position of wheat was quite satisfactory. Roller flour mills in Bombay districts were prohibited from purchasing indigenous wheat and were allotted suitable monthly quotas of wheat from the Central stocks so that the markets were not disturbed.

Madhya Pradesh: After the cordoning off of Madhya Pradesh in December, 1957 into a separate zone for rice, the prices of rice stabilised at a reasonable level. There was no dearth of rice in Madhya Pradesh and the prices of common rice ranged between Rs. 16.75 and 18.50 per maund. The prices of wheat, however, rose considerably and 'pinni' wheat prices ruled from Rs. 17.00 to 19.25 per maund on 5th August, 1958, in different centres. The Government set up fair price shops in Bhopal, Indore, Ujjain and Gwalior, and wheat was issued to retailers direct from the Central Reserve Depots.

Orissa: The supply position was satisfactory and adequate stocks of rice were available. The wholesale prices of common rice ranged between Rs. 14.00 and 18.50, though towards the end the prices began to rise.

Punjab: Punjab was cordoned off both for wheat and rice. The food supply was adequate though trouble existed in the matter of distribution, which almost produced a food crisis, chiefly because of hoarding. About 300,000 maunds of wheat had to be hurriedly imported to fight hoarders.

Rajasthan: Wheat was distributed from Government stocks in Jaipur, Jodhpur, Ajmer, Udaipur, Kota and Bikaner, and certain other areas. Prices tended to rise.

Uttar Pradesh: The export of rice from the eastern districts of Uttar Pradesh (a chronically deficit area) was banned. Under the zonal arrangement, the export of wheat from Uttar Pradesh, as a whole, was already restricted.

The distribution of wheat from fair price shops continued in the eastern districts.

The position in the central and western districts of Uttar Pradesh was also adversely affected by the short-fall in the production of rabi crops. The prices of average quality wheat which ruled at about Rs. 15 per maund in May, touched Rs. 20 per maund towards the end of July in Hapur. The Government, therefore, took the following action: Distribution of wheat was started in the 'KAVAL' towns and other important centres in central and western Uttar Pradesh, and the pace of distribution in eastern Uttar Pradesh was stepped up. There were over 3,000 fair price shops functioning in the State, and it was expected that the off-take of wheat would go up from 50,000 to 60,000 tons per month; and two, the roller flour mills, which had been making large purchases of wheat from the open market were prohibited from making local purchases and were allotted suitable monthly quotas of wheat for supply from Central stocks.

GROW MORE FOOD

For the execution of the various Grow More Food schemes during 1957-58 Rs. 25.97 crores were allotted. Out of this loans amounted to Rs. 23.9 crores and subsidies to Rs. 2.08 crores. It was expected that production would increase by 21.60 lakh tons as a result of the G.M.F. programme.

It is now realised that an increase of agricultural production by 2 to 2.5 per cent per annum achieved so far in the Second Plan period is not sufficient to support a large plan of economic development. The revised targets of agricultural production envisaged an increase in the production of foodgrains to the extent of 15.5 million tons.

This depended for its success particularly on local effort through panchayats and co-operatives, a more intensive employment of manpower resources and the utilisation of local manures.

It was hoped that the irrigation from the new large and medium irrigation projects would be utilised without undue delay, that the minor irrigation programme would be worked as a people's programme and that, to supplement organic manures and green manures, supplies of chemical fertilisers would be available in accordance with the Plan.

These assumptions have not all come true. In terms of production potential, the achievement

in 1956-57 is assessed at 1.3 million tons and in 1957-58 at 2.3 million tons. Thus, over the three years (1956-58), the total increase in production potential may be less than half of the revised target for the Plan period. Along with the decline of 9.8 per cent in food production in 1957-58 on account of unfavourable weather conditions these estimates helped to stress the importance of implementing agricultural production programmes.

The National Development Council which met early in 1959 therefore chalked out a certain plan of action.

One of these was that the co-operative movement should be vastly expanded so that by the end of the Third Five Year Plan all rural families could be covered.

Co-operation might provide the answer to any loss of efficiency resulting from the inability of small farmers to employ certain practices more suited to a pattern of agriculture no longer favoured in India—that of large estates owned by big landlords. If groups of farmers even with small holdings can be induced to co-operate with one another in the use of more modern agricultural practices and equipment not excluding tractors and the like, results now seemingly not possible might be attained especially from the use of service co-operatives.

The party in power has the following programme to increase food production: first a ceiling on holdings; second the setting up of service co-operatives; and third the encouragement of co-operative farming.

The need to put everything conceivable into the promotion of minor irrigation works was also widely recognised. The great river valley projects with their gigantic dams that are going up in several parts of India are undoubtedly an insurance for the future, but the need of the hour is to step up traditional irrigation from wells, tanks and canals with which cultivators have been familiar through many generations.

In the First Plan 9.5 million acres were brought under irrigation through minor works and 6.5 million acres through large and medium irrigation schemes.

In the Second Plan an additional 9 million acres are proposed to be covered by minor schemes and 10.2 million acres by major works.

The quantity of nitrogenous fertilizers used increased during the First Plan period from 0.3 million tons in 1950-51 to 0.55 million tons in 1955-56. The current demand for nitrogenous fertilizers is about 1.5 million tons. This is considerably in excess of available supplies. For the year ending September 1959 there was a foreign exchange allocation of Rs. 11.66 crores for the import of fertilizers.

Special attention is also being given to the development of local manurial resources through assistance to State Governments and local authorities for the processing of town compost or refuse for manurial purposes.

A comprehensive scheme involving the production, multiplication and distribution of improved seed on a nation-wide scale is being implemented. In 1956-57 and 1957-58 more than 1,100 seed farms were set up. In 1958-59 the programme has been further accelerated by allowing larger provision for the purchase of land for seed farms. Efforts are also being made to develop hybrid seeds of certain crops including maize.

Other important developments bearing on the overall drive for more production include plant protection activities and soil conservation work.

During the Second Plan period 2.5 million acres of land are proposed to be contour-banded and a number of centres have been set up in various parts of the country to develop and propagate soil conservation practices. Additionally it is proposed to reclaim 1.5 million acres of land.

The Second Plan target for the production of foodgrains represents an increase of 15.5 million tons over the achievement at the end of the First Plan.

Farming Requisites

The following table shows the position about the supply of farming requisites in 1955-56 to 1957-58—

	1955-56	1956-57	1957-58*
I. FINANCE (in Mill. Rs.)			
Central Loan	..	221.5	229.5
Subsidies	..	34.7	30.2
Total		256.2	259.7
II. LAND MANAGEMENT (in 1,000 acres)			
Waste Land Reclamation			
(a) By States	255.0	207.0	207.0
(b) By C.T.O.	87.0	101.0	80.0
Total	342.0	308.0	287.0
Mechanical Cultivation	51.0	37.0	91.0
Other measures (Soil conservation, etc.)	586.0	428.0	1,216.0
Total	979.0	769.0	1,594.0
III. SEED SUPPLY (1,000 tons)			
Paddy	47	35.0	67.0
Wheat	93	104.0	146.0
Others	4	11.0	35.0
Total	144	150.0	248.0
IV. IRRIGATION			
Sinking new wells and repairing old (1,000 nos.)	41.0	16.1	28.1
Construction of new tanks and repairing old (1,000 nos.)	2.0	1.2	6.7
Construction of tubewells (1,000 nos.)	1.0	1.0	1.5
Other irrigation works (Dams, Channels etc. 1,000 acres)	10.0	604.0	1,460.0
Installation of water lifting appliances in wells (1,000 nos.)	6.0	7.1	9.4
Installation of pumping, etc., on rivers and channels in (1,000 nos.)	5	1.1	4.5
V. MANURE AND FERTILISER SUPPLY (1,000 tons)			
(a) Manures			
Compost and local manure	1,680	2,587	6,440
Green manure	85.0	3.0	10.0
Oil cakes	6.0	13.3	5.0
Bone-meal	0.0	10.2	13.0
Other manures	3.0	-	-
Total	1,792.0	2,613.0	6,468.0
(b) Fertilisers (1,000 tons)			
Ammonium sulphate	356.0	383.0	551.0
Superphosphate	17.0	57.0	77.0
Other fertilisers (mixture different forms of N & P etc.)	33.0	47.0	106.0
Total	406.0	487.0	734.0
VI. PLANT PROTECTION (1,000 acres)	-	3,092	4,494
VII. IMPROVED FARMING (1,000 acres)			
Japanese system of rice cultivation	-	2,374	5,976

* The targets fixed for land reclamation by the C.T.O. for the first three years of the Second Plan were Madhya Pradesh 2.05 lakh acres, Assam 0.06 lakh acres and Bihar 0.16 lakh acres. No targets have so far (Aug. 1958) been fixed in respect of the remaining two years of the Plan.

The grants given to the various States under the Grow More Food Programme for the year 1957-58 are as follows (Rs. in lakhs): Andhra Pradesh Rs. 25.03, Assam Rs. 7.49, Bihar Rs. 72.15, Bombay Rs. 28.41, Kerala Rs. 13.42, Madhya Pradesh Rs. 31.31, Madras Rs. 31.32, Mysore Rs. 20.29, Orissa Rs. 10.34, Punjab Rs. 29.80, Rajasthan Rs. 6.59, Uttar Pradesh Rs. 80.39, West Bengal Rs. 13.02, Jammu & Kashmir Rs. 15.16, Himachal Pradesh Rs. 18.64, Manipur Rs. 0.08, and Tripura Rs. 1.67.

For 1958-59 out of a budget allocation of Rs. 1.164 lakhs, Rs. 802.20 lakhs were paid to seven States and Rs. 31.44 lakhs to Union Territories till Feb. 14, 1959.

RABI CAMPAIGN

A so-called rabi campaign was also organized by State Governments in co-operation with the Central Government for the 1958 rabi season.

The campaign was launched by the President of India in a broadcast to 'kisan brethren' on September 11, 1958. The President urged farmers to use the new techniques that were now available to them.

The campaign was conducted in 8 States—Punjab, Rajasthan, Uttar Pradesh, Madhya Pradesh, Bihar, Mysore, Bombay and Andhra Pradesh—and the Union Territory of Delhi.

An even more extensive campaign, covering all the States and the Union Territories of Manipur, Tripura, Himachal Pradesh and Delhi, was planned for the kharif season 1959. The crops to which special attention would be devoted are paddy, jowar, maize, bajra and ragi.

Some of the important features of the Rabi campaign were: the supply of improved seed and its treatment with sulphur or other insecticides, preparatory tillage of land, application of organic and inorganic manures, proper methods of sowing such as line sowing, use of seed drills, and dibbling where possible, cleaning of irrigation channels, optimum use of water in irrigated areas, timely detection and control of pests and diseases, use of improved harvesting implements, and exchange of improved seed among farmers.

The States paid attention to these and other programmes of work, the State Planning Committees ensuring that these measures were

intensified and that targets were laid down with the objective of increasing production by a specified percentage.

The planning in each State, was done by Campaign Committees comprising the Development Commissioner, the Director of Agriculture, subject-matter specialists, extension officials, registrars of co-operative societies and officers in charge of the agricultural information unit. Wherever necessary, State representatives of the Farmers' Forum and outstanding farmers were added to the team. Similar Committees operated at regional, district and block levels.

In addition to the normal extension staff a large number of qualified personnel employed at present in Governmental institutions (viz., extension training centres, agricultural colleges, basic agricultural schools and rural institutes) were mobilised and organised into effective units. Each group was assigned a suitable block conveniently situated. The State Planning Committee determined the type of activities to be assigned to the groups, including guidance of farmers and sometimes actual physical help, such as, cleaning water channels for which work students were considered suitable, plant protection measures and dibbling of seed in suitable areas. The group was expected to adopt the block not only for one campaign but on a long-term basis. It would be called upon during a specified period to spend a certain number of days assisting the extension workers. The idea was that the group should take a personal interest in the block and consider increased production a matter of prestige.

As far as possible, financial accommodation was to be arranged through co-operative societies or in the shape of taccavi loans.

As already mentioned the States devoted special attention to measures for securing optimum utilisation of irrigation water. In Andhra Pradesh the supply of oil engines, electric motors and loans for sinking wells were expedited. Besides, cleaning of irrigation channels was taken up on a community basis. In P. proposed to construct guls by Naramdas in Bombay, speedy action was ordered to remove silt from channels to improve the working of wells, tanks and bunds, and to grant taccavi loans in the case of private channels which had to be repaired or cleaned. Cultivators in the Punjab were induced to divide their fields into compartments for better utilisation of irrigation water. In Madhya Pradesh demonstrations of improved irrigation practices were carried out on cultivators' fields. As a long-term measure, all the States adopted, on a campaign basis, programmes for the maintenance of old irrigation works and construction of new works.

All the States undertook to mobilise public participation in the campaign. In Andhra Pradesh about 5,000 technical personnel was formed into "teams of helpers". In U.P. camps were set up for the training of 2½ lakh (gram Sahayaks, each of whom was required to adopt improved practices and to induce 10 other cultivators to adopt similar practices. Workers from the Bharat Sewak Samaj, the Farmers' Forum and other organisations were also trained in these camps. Trained village level leaders of Rajasthan were utilised for mobilising mass participation in the campaign. In Bihar, about 60,000 project leaders played an active role in the campaign.

Reports from some individual States are given below.

In the Punjab, where wheat, gram and bajra were selected for purposes of the campaign, 23,63,510 acres out of a total of 43,05,040 acres under *rabi* foodgrains were subjected to intensive measures. About 18,697 maunds of improved seed, 13,103 maunds of treated seed and 10,121 maunds of nitrogenous and phosphatic fertilizers were supplied to cultivators, besides improved implements which included 8,688 soil turning ploughs and 1,260 seed-drills. Short and medium-term loans totalling Rs. 60.72 lakhs were disbursed to help farmers purchase seed, fertilizers, insecticides and implements and to carry out plant protection measures.

Mysore selected gram, wheat, jowar, and summer paddy for the *rabi* campaign. Of the 20.14 lakh acres in which intensive measures were adopted, 2.52 lakh acres were covered by improved seed, and 17.32 lakh acres sown with seed which had earlier been treated to ensure a healthier crop. The State Government also advanced loans totalling Rs. 155.87 lakhs to help cultivators acquire better seed, improved implements and fertilizers.

In the Union Territory of Delhi, where the entire area under *rabi* foodgrains was covered, the Administration distributed 9,200 maunds of improved wheat and gram seed, 5,755 maunds of treated seed, and 960 tons of nitrogenous and phosphatic fertilizers to cultivators. Also, Rs. 9.45 lakhs were disbursed as short and medium-term loans for the purchase of seed, fertilizers and agricultural equipment.

The Andhra Pradesh Government advanced Rs. 21.75 lakhs to cultivators to enable them to purchase agricultural equipment. About 5,568 maunds of improved seed were distributed and an area of 10.56 lakh acres was covered by seed treated prior to sowing. The State Government also distributed 26,072 maunds of fertilizers besides supplying 315 oil engines and motors for improving irrigation facilities. The crops which received special attention were paddy, jowar, wheat, maize, gram and ragi.

FERTILIZERS

The estimated requirements of chemical fertilizers for the year 1958-59 are as follows:—

Nitrogenous fertilizers 15.20 lakh tons; phosphatic fertilizers two lakh tons and potassic fertilizers 0.41 lakh tons.

The estimated requirements of these fertilizers in 1960-61, i.e., by the end of the Second Plan are:—

Nitrogenous fertilizers 25 lakh tons; phosphatic fertilizers nine lakh tons and potassic fertilizers 0.75 lakh tons.

By the end of the Third Plan, i.e., 1965-66, it has been provisionally estimated that fertilizers of the following quantities would be required:—

Nitrogenous fertilizers 50 lakh tons; phosphatic fertilizers 30 lakh tons and potassic fertilizers 2.50 lakh tons.

The quantity of fertilizers imported from April to November, 1958 was 3,24,387 tons in terms of sulphate of ammonia.

The value of the fertilizers was Rs. 13.23 crores of which Rs. 4.04 crores have so far been paid.

The progress made in the implementation of schemes to expand production of chemical fertilizers indicates that by the end of 1961 or early in 1962 the target capacity of 3.8 lakh tons of fertilizers (in terms of nitrogen) would be attained.

This would mean that the production capacity in terms of ammonium sulphate would be about two million tons, nearly five times the present output of ammonium sulphate in the country or six times the present output of the Sindri factory.

The demand, for chemical fertilizers has been rising both from large plantations like tea and coffee, producing foreign exchange earning commodities, and also for food crops, to meet the basic needs of the people.

Indeed fertilizers have still to be imported in substantial quantities to meet this growing demand. In 1957-58 foreign exchange worth Rs. 16 crores had to be spent on imports of fertilizers.

In recognition of these facts, a substantial expansion of fertilizer production capacity was provided for in the Second Plan.

This is being achieved through the expansion of the Sindri factory itself and the setting up of four new large units at Nangal in the north, Neyveli in the south, Rourkela in the east, and at Trombay near Bombay, besides a unit in the

private sector at Varanasi, the expansion of the unit at Alwaye and additional production of fertilizer nitrogen as a by-product in the new steel plants.

The Rourkela fertilizer plant would start production in 1962.

Each of the four units mentioned first will have a capacity for the manufacture of about 70,000 tons of fixed nitrogen per annum.

As a result of larger utilisation of organic wastes, the manure production is expected to increase to 6 million tons by March 31, 1959. Its quality will also improve from the existing 0.4 and 0.5 per cent to 0.8 and 1.0 per cent—these figures representing the nitrogenous element in it.

The night soil compost scheme, which has now been introduced in Madras, Rajasthan, Punjab, Orissa and Mysore, will cover 500 bigger panchayats, for which Central assistance has been given at the rate of Rs. 2,000 per panchayat.

A total number of 2,250 urban centres was also engaged in night soil compost production in the States in 1957-58.

The Central aid to State Governments for development of local manurial resources is available in the form of grants. In 1957-58, a sum of Rs. 19.06 lakhs was sanctioned by the Centre. The provision for 1958-59 amounts to Rs. 35.92 lakhs.

In addition, a loan of Rs. 15.84 lakhs was approved for aiding bigger panchayats in the production of night soil compost.

For making of town compost, Central assistance in 1958-59 amounts to Rs. 35.39 lakhs.

THE FOOD PROBLEM

The present capita net availability of cereals is about 12 to 13 ozs. per day, equivalent to about 1,200 to 1,300 calories.

The per capita consumption in India of all food items in terms of calories compares as follows:—Canada : 3,140; U.S.A. : 3,150; U.K. : 3,270; Japan : 2,110; and India : 1,880.

With the increase in purchasing power and progressive urbanisation, people are changing from coarser foodgrains (viz., jowar, bajra, barley, ragi, etc.) to superior grains (like wheat and rice).

This is evident from the fact that though the gross production of cereals was 49.2 million tons in 1953, the requirement of the country was met by importing only 2.0 million tons of foodgrains (the total gross availability for the year being 51.2 million tons). But in 1957 though the production went up to 57.25 million tons, there was heavy pressure on the supply of foodgrains which caused a steady and steep rise in their prices. About 3.58 million tons of foodgrains had, therefore, to be imported in that year.

Also, in India over 80 per cent of the cultivable land is unirrigated and depends entirely on the vagaries of the monsoon.

Methods of cultivation are primitive. In March 1958 only about 30 lakh acres were under mechanical cultivation schemes.

The political change during the last two decades have also materially affected the food economy of the country. The country used to import about two million tons of rice from Burma.

The creation of Pakistan in 1947 also resulted in the loss of large rice and wheat producing areas.

It may be added here that a study team of food production sponsored by the Ford Foundation consisting of 13 top level specialists in different subjects has arrived in India and started its work at the end of January 1959. It was expected to submit its report by the first week of April.

The Solution

The strategy of the Food Department is (a) to create more or less self-sufficient zones and to segregate heavily deficit areas or other important consuming centres where Government could release adequate stocks of foodgrains from the central reserve, and (b) to take suitable measures against the speculative hoarding of stocks by the trade.

Government created in 1957 separate rice and wheat zones.

The Southern Rice Zone consists of Kerala, Madras, Andhra, and Mysore.

There are three wheat zones, the Northern Wheat Zone, the U P Zone, and the Western Wheat Zone comprising M P, Rajasthan, and Bombay.

The creation of the Southern Rice Zone has helped to meet the problem of chronically deficit Kerala, as the surplus from Andhra Pradesh can now make up the deficit in Kerala and the Zone is, on the whole, surplus in rice. Since the creation of the Zone the prices of rice have shown a tendency to stabilise at a reasonable level.

Similarly, with regard to wheat, in the Northern Wheat Zone, the surplus of the Punjab will cover the deficit of Delhi and the prices of wheat have also stabilised at a reasonable level.

The Government of India have had to distribute annually about 0.15 to 0.2 million tons of wheat in Delhi in the past. After the creation of the Wheat Zones the markets became easier in the other two Zones, viz., the U P Zone and the Western Zone.

Other important restrictions which have been imposed on the movement of foodgrains on a Zonal basis are as follows—(i) *Bihar*, which suffered very heavily in 1958 owing to the failure of both wheat and rice crops, has been cordoned off for all foodgrains. (ii) *Eastern Uttar Pradesh*. Export of rice from the eastern districts of Uttar Pradesh was prohibited. (iii) The following areas were combined off for rice—(a) Assam, Bengal, (b) Madhya Pradesh, Punjab, Delhi, (c) Tripura, (d) Manipur, and (e) Punjab and Himachal Pradesh (movement from Punjab to Delhi is, however, free).

The Anti-hoarding measures adopted by Government in 1957 took the form of (a) Control of Bank Credit, (b) Requisition of stocks at normal prices, and (c) Licensing mills and wholesale trade.

The bank credit squeeze, which was tightened in 1957 continued and the quantity pledged with the banks in 1958 was much less than in 1957.

Power under sub-section (3A) of Section 3 of the Essential Commodities Act, which authorises government to requisition stocks at the average of the prices prevailing during the three months prior to the issue of the notification have been delegated to the State Governments who have exercised them whenever necessary.

The Wheat Roller Flour Mills Control Order ensures that all the roller flour mills in the country are licensed and their purchases regulated and recorded. The wholesalers are also required to submit periodical returns in most of the States to enable the States to keep a watch on the stocks of foodgrains available with the trade.

A fair and equitable distribution of food measured through (a) phased release from Central Stocks, (b) Separate allocation of foodgrains for mills, and (c) sale through fair price shops.

About 2 million tons of foodgrains were released from Central stocks during 1957-58.

State-wise the quantity of foodgrains distributed was as follows (in '000 tons).—Andhra Pradesh (39.4), Assam (77.7), Bihar (610.1), Bombay (561.2), Delhi (73.2), Kerala (190.6), Madhya Pradesh (29.9), Madras (122.4), Mysore (62.3), Orissa (18.0), Punjab (9.9), Rajasthan (20.4), Uttar Pradesh (244.0), West Bengal (798.7), Jammu and Kashmir (89.9), Himachal Pradesh (1.7), Tripura (25.5), Andamans (1.1), and Others (157.2).

Government met the requirements of the flour mills in Andhra, Assam, Calcutta, Bombay City, Bihar, Madras and Mysore. The flour mills in Uttar Pradesh, Madhya Pradesh, Rajasthan, and Bombay districts have been prohibited open market purchase of wheat, and allotted suitable quotas of imported wheat from Government stocks.

Over 41,000 fair price shops function in the country for the distribution of foodgrains. To ensure that the foodgrains issued from fair price shops reach the genuine consumer and to minimise malpractices in their functioning, identity cards have been introduced in Bengal, Bihar and Kerala (to be extended to other States also).

Inspection organisations have also been set up to watch the working of fair price shops.

Another important measure taken to curb speculative activities is the imposition of ban on forward trading in coarse grains and pulses which had a favourable effect on prices and supply.

The Guest Control Orders have been issued in a number of States imposing restrictions on the number of guests that can be entertained at a time. This is to avoid wastage of foodgrains.

The fact that limited stocks of rice are available was impressed on the State Governments and they were asked to conserve the available supplies wherever possible, and to issue wheat instead of rice. A substantial portion of the ration in West Bengal is being supplied, therefore, in the form of wheat.

PROCUREMENT

The Central and State Governments procured foodgrains internally to build up stocks.

In 1956-57, 1,572,700 tons of wheat and 555,100 tons of rice, and in 1957-58, 3,033,100 tons of

wheat and 606,900 tons of rice were purchased internally.

The Government of India procures rice in two important States surplus in rice, i.e., Andhra and the Punjab. The other States surplus in rice are Orissa and Madhya Pradesh.

1958 procurement: 574,000 tons (482,000 rice, 75,000 paddy, 17,000 others).

The Central Government procured 250,000 tons and 104,000 tons from Andhra and the Punjab respectively (rice).

The following State Governments procured rice in their respective areas:—

	Tons
Assam	21,000
Bengal	68,000
Kerala including the rice purchased from Andhra	28,000
Madhya Pradesh	1,600
Mysore	13,000
Orissa	54,000

Small quantities were also procured by the Manipur and Tripura Administrations. Due to a shortfall in production and the consequent rise in prices, no internal procurement was made in wheat.

Reserve stocks of foodgrains built with the Centre and the State Governments amounted to 1.4 million tons.

Rice supplied to States in 1958: 711,200 tons.

Storage godowns of 3.12 lakh tons total capacity were in use in Sept. 1958 for the storage of the national reserve of foodgrains. Construction of godowns of another 2.12 lakhs capacity were to be taken up at any time.

The godowns in use are in Andhra Pradesh, Assam, Bombay, Delhi, Kerala, Madras, Manipur, Tripura and West Bengal.

Godowns are under construction in Bihar, Kerala, Madras, Manipur and Rajasthan.

It may be added that losses occur in storage owing to factors like dryage, difference in methods of weighing, handling and transport, etc. These losses are referred to by the term "unaccounted stocks".

On this basis the losses during the year 1956 were wheat, damaged: 47.56 tons valued at Rs. 20,000, and unaccounted: 86.29 tons valued at Rs. 37,500 and rice, damaged: 108.86 tons valued at Rs. 43,000 and unaccounted: 1,564.25 tons valued at Rs. 9,11,000.

In 1957, the quantity of wheat damaged was 320.99 tons valued at Rs. 1,43,000 and the unaccounted quantity was 145.44 tons valued at Rs. 65,100. The quantity of rice damaged was 311.78 tons valued at Rs. 2,12,000.

NALAGARH COMMITTEE REPORT

At a conference of State Ministers of Agriculture held in Bhrignagar in Oct. 1957 it was observed that delay in the execution of agriculture scheme arose mainly from administrative defects. It was therefore suggested that the Central Government should set up a Committee of experts which should visit four or five States and recommend a model agricultural organization.

A committee was accordingly set up with Raja Surendra Singh of Nalagarh, Adviser on Agriculture Production, Ministry of Food and Agriculture as chairman. Other members were Dr. J. B. Patel, Agricultural Adviser, Ministry of Community Development, Mr. K. Sachidanandham, Deputy Financial Adviser, Mr. J. V. A. Nehemiah, Extension Commissioner, Ministry of

Food and Agriculture and Dr. R. N. Mathur, Deputy Agricultural Commissioner in the same Ministry, member-secretary.

The Committee held its first meeting on 8th March 1958. The States the Committee visited were Assam, Bombay, Bihar, Punjab, Andhra Pradesh, Madras and the Union Territory of Himachal Pradesh.

The terms of reference were: to suggest simplification of administrative and financial procedures to expedite the implementation of production schemes; to suggest a model agricultural organization in the States with delegation of suitable powers at various levels.

The report was made public on 3rd Nov. 1958.

The Committee found during its tour of the States that the agricultural services were suffering from low morale and a sense of frustration arising from the belief that agriculture hardly ever received the attention it deserved. The Committee also believed that agriculture has not received its due share in the national interest as conditions of service are comparatively unattractive. State Governments are found to have become increasingly dependent upon stimulus from the Centre for action even within their own sphere of responsibility.

The Committee has made a number of recommendations. These are: the creation of an All-India Agricultural Service with scales of pay and prospects on a par with the Indian Administrative Service, the restoration of the practice of

training subordinates by senior officers, well-thought-out programmes of work for officers of all grades, less work for field officers, posting of special agricultural officers, in the Irrigation Department to serve as liaison between agriculturists and the State Departments of Agriculture, and a higher status for Development Commissioners than State Departmental Secretaries, and the possible combination of the portfolios of Agriculture and Irrigation in the States in the hands of a single Minister.

Other recommendations are: the separation of the entire organisation for the supply of fertilisers, improved seeds, insecticides, agricultural implements, etc., from the extension and technical functions of the Agricultural Departments and their transference to co-operatives; the maximum delegation of powers at all levels from the Director of Agriculture downwards, the elimination of administrative delays in the execution of Plan schemes and the avoidance of concentration of expenditure during the last quarter of the year.

The State Agricultural Departments have to be organised to handle the growing demands of the farmers "in an efficient manner". Among other things, the department should provide facilities for educating and training to the farmers; demonstrate better methods of cultivation and disseminating knowledge through audio-visual channels, organise farmers so that they can adopt improved techniques of production and work together; find what the farmers' problems are and pass them for solution to the research sections and transmit the solutions back to the farmers.

The agricultural extension agency should concentrate entirely on educating and organising the farmers to produce more. The Departments of Agriculture should deal with techniques and knowledge rather than "trade in supplies".

In order to provide for balanced growth and to enunciate programmes and policies, the State Governments are to examine periodically through a special committee, the structure,

objectives and policies of their Departments of Agriculture. For examining the programmes and policies of the Central Commodity Committees and other agencies dealing with agriculture, a similar committee is to be set up at the Centre.

A small unit at the headquarters of the Director of Agriculture is to be set up for evaluating and assessing the progress of works and schemes. The progress made in extending the recommendations of research sections to field practices should also be evaluated by the heads of research sections. There should be a drive to promote follow-up work through intensified supervision.

A technological balance is urged in planning programmes for different areas to benefit the small non-credit-worthy farmers. Government policies should be geared to the needs of small cultivators and credit facilities should be extended to them "despite the greater risk involved". Self-help programmes constituting the supply of small quantities of nucleus seed to villages, and organising the farmers for multiplying the seed and exchanging it locally, are needed as against the present system of fixing targets State-wise and then breaking them up into district tehsil and village plans. Integrated plans for increasing agricultural production are to be prepared for every village.

Centrally administered godowns situated conveniently in various parts of the country should be opened to receive and store fertilisers for supply to consuming centres. "Payments of interest charges on fertiliser loans advanced by the Centre to the States may also have to be deferred till such time as the fertiliser is actually required for use on the land".

The quota of iron and steel for agriculture should be increased substantially according to State demands and placed at the disposal of State Agriculture Departments which should organise the manufacture of improved agricultural implements for supply through co-operative agencies.

Minor irrigation works costing not more than Rs 10,000 should be handled by the Community Development Agency. Works costing about Rs 10,000 but not more than Rs 80,000 may be handled by the Agricultural Department, and those costing more by the Irrigation Department.

A Works Division should be created within the Directorate of Agriculture, Executive Officers should be relieved of routine administrative and accounts work, an evaluation organisation should be established, and there should be subject-matter specialists at all levels.

The present research programme is inadequate to meet the needs and demands for improved agricultural materials and practices.

There is a clear necessity for establishing major research stations to serve the needs of every agro-climatic region. At least one of the regional stations should be developed into a first-rate post-graduate training institution for research, education and extension.

Agricultural colleges and research institutions should organise separate sections for research and teaching in agricultural education and agricultural economies. Each district should have a vocational school of agriculture, imparting practical training over two years for those who pass the secondary examination. Short duration courses and hostel facilities should be provided for farmers who come for training to the district school.

Closer co-ordination between research, education and extension should be maintained through a system of annual conferences held at the major research stations. Similar meetings should be held at district levels once in three or four months. The talents of retired specialists who settle down in different parts of the country should be utilised by associating them with research institutions or with the local supervision of schemes.

FIVE-YEAR PLANS

For the First Five-Year Plan, the target of additional production potential of foodgrains was fixed at 7.6 million tons. This was to be realised as follows (figures in million tons):

From Major Irrigation 2.01, Minor Irrigation 2.38, Land Reclamation and Development 1.51, Fertilisers and manures 1.15, Improved seeds 0.56, Total 7.61.

The increase in production of foodgrains in 1955-56 over the 1949-50 level was estimated at 10.9 million tons. Of this, the increase in production potential on account of works programmes was estimated at about 6 million tons against the five-year target of 7.6 million tons.

While the general trend of food production during the First Plan would appear to be upward, favourable seasons played a notable part and there were substantial elements of instability despite the evidence of growth of agricultural production.

The experience of the First Plan suggests the need for each State to undertake a critical assessment of the various factors which have operated in relation to its agricultural production trends during the past few years. From the overall production trends of the country as a whole only cautious conclusions may be drawn.

In February, 1955, on the eve of the Second Five Year Plan, the Planning Commission placed before the States the goal of doubling agricultural production within the next ten years. In the letter to the States, the Planning Commission

said "A programme under which every family in a village is offered the assistance needed, in a well-organised manner, with the objective of doubling agricultural production in the country within a period of ten years cannot fail to appeal to the countryside and evoke enthusiasm".

In every village there are progressive farmers whose yields are two or three times those of the rest of the village. If by suitable measures all agriculturists can be assisted to bring up their level of production to those of the progressive farmers, India's food problem can be finally solved.

The target finally fixed was 80.4 million tons as against 65 millions in 1955-56.

If this target is realised the increase in the production of foodgrains would be 25 per cent.

The Plan for each State provides for programmes for utilisation of irrigation facilities, production, multiplication and distribution of improved seeds, especially of paddy, wheat and jowar; use of fertilisers, compost and green manures; spread of Japanese method of cultivation soil conservation, etc.

The Plan provides for the opening of 4,185 seed farms during the Plan period.

The increased food production was to come as shown below (figures in million tons):

From Major Irrigation 3.02, Minor Irrigation 1.86, Fertilisers 3.77, Improved seeds 3.40, Land development 0.84, Improved agricultural practices 2.47, Total 15.46.

The Planning Commission has always stressed that in every village the panchayat and village co-operative should have a programme for the village—which would be made up of all family programmes for which the entire village would be prepared to work. These should be fitted into block and district programmes and through these into State programmes. The Community Development movement is the agency at the disposal of the States for reaching all families in the countryside.

The responsibility of the villages would involve the construction of the field channels needed to utilise the irrigation available from multi-purpose, large and medium purposes and their maintenance in an efficient condition from day to day, the responsibility for maintaining minor irrigation works and tube-wells and for excavating and maintaining field channels; contour-banding, soil conservation and other programmes for dry farming in the dry areas and construction and maintenance of bunds; Producing as a permanent arrangement in the village all the seeds and organic and green manure needed; arranging for the supply of these in kind to those who cannot pay for these in advance, recovering after harvest; Arranging for the distribution of fertilisers received for the village and their supply to the smaller holders on credit in the first instance; Promoting the use of Japanese method of cultivation in all areas suitable for it and other advanced techniques for wheat and other crops which are suggested by the technical departments, and in other ways, work for a diversified agricultural economy.

FISHERIES

THE fishing industry in India offers employment to about a million persons and contributes annually over Rs 60 crores towards the national income.

About 73,400 fishing craft are estimated to be employed.

The estimated annual production of fish is about 12 lakh tons, of which 70 per cent comes from sea and estuarine fishing.

The average catch is about 2,500 lbs per man per year.

About 27,000 tons of fish products, consisting mostly of dry, dry-salted and wet-salted fish, are annually exported to neighbouring countries.

The annual per capita availability of fish in India is estimated to be 3.4 lbs as against 16 lbs in Ceylon, 70 lbs in Burma and 90 lbs in Japan.

It is estimated that 40.5 lakh tons of fish would be needed to meet this country's minimum requirements.

Surveys conducted recently in the Bay of Bengal and Arabian Sea reveal that if only our rich resources are properly exploited this would more than meet the demand. The greatest handicap in the exploitation of the country's fish resources hitherto has been the traditional methods of fishing. The great part of the 70,000 boats and other craft used for fishing cannot operate beyond a few miles.

Experiments in mechanisation of fishing are being conducted since 1948 with the help of assistance received from Norway, U.S.A. and F.A.O.

Some of the steps taken by Government to improve fish production are mechanisation of fishing craft, training centres for fishermen, cold storage facilities, formation of deep sea fishing stations and research at the Central Inland Fisheries Station.

Today more than 400 mechanised boats are operating on Indian coastline. In Bombay the local types of boats are being mechanised. New designs have been evolved for boats in Madras, Kerala and Andhra States. Experiment in improved types of fishing with small power craft are also in progress.

Cold storage facilities exist in Bombay, Mangalore, Calicut, Cochin, Quilon, Trivandrum, Madras and Calcutta. Additional plants are being installed in many other places. Some of these plants have been provided under T.C.M. and Norwegian aid programmes.

A 39-member Central Board of Fisheries has recently been formed by the Government of India to study the problems connected with fisheries research and development and for co-ordination between the Centre and the States.

A Central Fisheries Technological Research Station functions at Cochin in Kerala State.

Under the Second Five-Year Plan a sum of Rs 10 crores is expected to be spent by the Central and State Governments on the development of fisheries. Of this Rs 42 lakhs will be devoted to mechanisation and improvement in fishing craft.

For training fishermen there are centres at Satpat near Bombay, Veral in Saurashtra, Cochin in Kerala and Tuticorin in Madras. New training centres are being opened at Mangalore in Mysore State and at Kakinda in Andhra Pradesh. At these centres batches of 20 candidates are admitted for 6 months training.

The Central Deep Sea Fishing Station at Bombay gives training in modern fishing methods.

In Calcutta the fisheries training centre gives instruction in inland fisheries development. Higher training facilities are under consideration by a special committee appointed by the Government of India.

It is expected that in 1959 India would obtain the services of about 15 fishery experts from FAO for the development of the fishing industry in specific fields.

PRODUCTION

Production is shown by the table below. About two-thirds of the catch are marine-fishes.

'000 tons

Year	Marine	Inland	Total
1950	571	233	804
1951	525	215	740
1952	520	212	732
1953	572	234	806
1954	579	236	815
1955	546	240	786
1956	707	289	996
1957	862	382	1,244

The following table shows the figures by species.

Groups & Species	1955 Metric tons	1956 Metric tons	1957 Metric tons
MARINE FISH			
Flounders, halibuts, soles etc	5,595	9,122	3,687
Cods, hakes, haddocks, etc	3,190	1,708	1,138
Herrings, sardines, anchovies etc	123,970	114,014	292,999
Tunas, bonito, mackerels, etc	64,883	56,831	139,356
Miscellaneous marine teleosteans	271,007	356,015	278,348
Sharks, Rays, skates, etc	20,451	21,856	23,040
Crustaceans	106,626	159,552	136,812
A Total Marine Fish	595,722	718,008	875,420
B Fresh water fishes	243,300	293,562	357,566
C Grand total	839,022	1,012,570	1,232,986

The total landing of marine fish by State is shown below (where available)

		(In metric tons)	
		1956	1957
1	West Bengal & North Orissa	158,42	4,549
2	South Orissa		3,757
3	North Andhra		29,673
4	Central Andhra	52,476	5,499
5	South Andhra		5,290
6	North Madras		20,521
7	Central Madras (Palk Bay)	55,208	13,974
8	South Madras (Gulf of Mannar)		14,097
9	West Madras & South Kerala	133,736	51,420
10	Central Kerala		112,278
11	North Kerala (Malabar)	74,405	176,920
12	Mysore		76,990
13	South Bombay I (up to Ratnagiri)	25,901	11,945
14	South Bombay II (up to Ratnagiri)		51,078
15	Central Bombay	324,127	258,467
16	North Bombay		2,763
17	South-east Saurashtra		24,448
18	South-west Saurashtra	29,792	5,451
19	North Saurashtra		2,508

While fish landing had declined in all the zones of the east coast, they had improved in all the Zones of the west coast, except Bombay Zone where there is a slight decline.

A note-worthy feature is the phenomenal landings in Malabar which were more than twice those of 1956.

BOMBAY STATE

Bombay State has a sea board of more than 1,200 miles extending from Redi (District Ratnagiri) in the south to Lakhapat (Kutch) in the north inclusive of Saurashtra coast. The Inland Fisheries extend to Bhandara District in the East, a crownflight distance of over 600 miles. The total number of fishing villages along the coast is estimated at over 450. The Bombay State Fisheries enjoy a pre-eminent position on the West Coast of India both from the point of view of total production and progress of developmental activities.

Bombay State has a total outlay of Rs 1,10,85,000 for development of fisheries under the Second Five-Year Plan.

Important varieties of sea fish caught along the coastline: Saranga (White Pomfret), Halva (Black Pomfret), Ghol (Jew fish), Dara (Hiant Threadfin), Ravas (Indian Salmon), Kuppa (Tuna), Surmal (Seer fish), Bol (Mullet), Bombil (Bombay duck), Bangda (Mackerel), Mushi (Sharks), Wam (Kels).

Estimated production: about 2,00,000 tons.

Price per ton of fish at present: Rs. 300. The total value of fish caught in this State: Rs. 6,00,00,000.

The number and names of the more important fishing villages and of the fishing grounds:

Greater Bombay: Lower Colaba, Worli, Danda, Versova; **Thana District:** Hasein, Arnala, Uttan, Edwan, Usarni, Satpat, Navapur, Utcheli, Nagaoon, Dattavare; **Surat District:** Umaradi, Kolak, Bular, Kosamba; **Breesh District:** Breesh, Bhadbbut, Kavi; **Amal District:** Madhwar, Kotda, Velan, Okha; **Kolaba District:** Katanja, Versoli, Alibag, Thoronda, Bovidanda, Murad, Bharedkhol; **Ratnagiri District:** Burondi, Dabhol, Jalga, Ratnagiri, Vijaydurg, Jalapur, Malvan, Deobag, Venguria; **Saurashtra:** Veral, Mangrol, Porbander, Navabunder, Jafrabad, and Dhamlej.

Jamnagar, Salaya and Sikka; Navlakhi-Malia; Kutah; Saurbari, Cheval, Kharirohar, Tuna, Ramper, Baughad, Bhadrashwar, Lunl, Bekherdia, Barol, Mundra.

The estimated fishing population: 271,000.

The facilities available for curing, storage and refrigeration, co-operative marketing are:

Several ice factories in the city and also at important fishing centres along the coast.

Annually, some addition to the available cold storage space is being made by extension to the existing plants and establishment of new plants.

A seven-ton ice plant and 30-ton cold storage were erected by the State Government at a cost of about Rs. 1,32,000 and handed over to the Satpati Fishermen's Sarvodaya Co-operative Society for operation. The Society has also been allotted by the Government, refrigeration equipment to increase the seven ton ice making capacity of its existing plant to ten ton and a four ton quick freezing plant and refrigeration equipment for a fish storage, ice storage and quick frozen fish storage received under the T. C. M. Programme of the American Government. It has now attached to it 98 out of the 732 mechanised craft in the State, all of which carry ice aboard their vessels to preserve fish right from the time it is caught.

The ice and cold storage factory at Bedi has been completed (November 1958) and will go into operation shortly.

Construction of ice factories at Veral, Mangrol and Fortbunder are nearing completion. Plans and estimates for construction of ice and cold storage plant at Kandla are under preparation.

Marketing facilities. A new building was put up in 1951 by the Bombay Municipality to cater for the City's fish trade. Lifts are being installed for the convenience of shoppers as the retail sale of fish is on the first floor.

The new market adjoining the original congested market was erected at a cost of about Rs. 8 lakhs. In the fish section space is provided for 250 squatters. Sufficient space is now available to traders to display their products. Two new additional markets one at Grant Road and another at Umarchadi were also constructed during recent years.

Marketing facilities have also been provided at Kankavli and Malvan in Ratnagiri District.

Municipality at Jamnagar was persuaded to build a small fish market at Khoja Naka.

About four times the quantity of fish at present caught in the entire State will be necessary to meet the nutritional requirement of the people.

The quantity available for sale in Greater Bombay to the public was approximately as follows:—

Year	Tons
1951-52	85,849
1952-53	86,385
1953-54	37,812
1954-55	32,034
1955-56	30,072
1956-57	26,000
1957-58	25,000*

West Coast Fisheries (Travancore) Ltd. commenced deep sea fishing operations in Bombay waters in February 1953. It employed trawl nets for deep sea fishing and landed about 94 tons of fish during four voyages. The trawler now conducts fishing operations off Travancore waters. New India Fisheries Ltd., a firm registered under the Company's Act, has recently been permitted by the Government of India to undertake trawl fishing. The firm in collaboration with Japanese enterprises imported four trawlers from Japan and commenced fishing operations in Bombay waters. During the year 1957-58 the company landed 3,285 tons of fish.

GOVERNMENT HELP

Government effort in up-to-date fishing technique, money spent, trawlers gear used, quantity of fish caught: The State Government built the vessel "Tapasa", now renamed the "Mysli" in 1947, at Rs. 65,000 for demonstrating the usefulness of mechanised craft for catching fish.

Two improved types of fishing crafts at a total cost of Rs. 54,000 were also built and allotted to two fishermen's co-operative societies in the State on half subsidy and half loan basis for capture of fish.

Loan of Rs. 10,48,907 and subsidy of Rs. 4,73,195 were granted for mechanisation during 1957-58. Loans of Rs. 30,48,907 have so far been granted to individual fishermen for purchase of boats, nets and other fishing accessories.

Government have received 341 marine engines of different H.P. valued at Rs. 74,569.00 under the T.C.M. Programme of the American Government, which have been allotted to groups of fishermen on loan-cum-subsidy basis. Twine and net making plant has arrived under T.C.M. Programme. The same will be allotted to Bamba Raja Machhimar Sahakari Sanstha.

Number of power-propelled vessels owned by fishermen: 1,004.

Fishermen's Co-operative Societies. There are about 110 fishermen's co-operative societies of which two are apex bodies, engaged in the marketing of dry and fresh fish produced by the affiliated societies and member fishermen.

The main activities of these societies are: affording credit facilities to the members, supply of fishery requisites, running fair price shops for food grains, transport and processing of fish and fishing in rivers, tanks and sea.

Government efforts in educating fishermen:—

Seven fisheries schools have been established in important fishing centres, imparting special training in net making, boat repairing, fish preserving, etc. Ratnagiri District 4, Thana District 1 and Surat District 2.

Two schools have been opened at Bagmanola in Kolaba District and Bhadbut in Broach District respectively.

Adult education centres and backward class cultural centres are also conducted at important fishing centres in Saurashtra and Kutch.

Annual expenditure on these schools: Rs. one lakh.

The Department of Fisheries has also a scheme to train fisher-youths in the operation of power vessels as mechanics and navigators. Under a modified scheme introduced by the Government, facilities are made available to train 20 candidates in the technique of improved methods of fishing. The centre is situated at Verna, B.S.D. and is financed by the Government of India. The duration of each course is six months, the scheme having been sanctioned for three years. Each candidate is paid a monthly stipend of Rs. 50 and food allowance of Rs. 10. A similar centre has also been established at Veral (Saurashtra). So far 183 candidates have been trained under the old and modified scheme.

Besides, the State Government has started a new three months training course to train fisher-youths in handling and operation of marine engines. The trainees are paid a stipend of Rs. 40 per month each. So far 99 candidates have been trained under the three months training course.

Public aquaria: The State Government maintains the Taraporevala Aquarium along the Marine Drive, Bombay. The exhibits include both fresh water and marine forms, found along the coast of the State. Attached to the Aquarium is the Marine Biological Research Station where facilities are available to research students for M.Sc. and Ph.D. degrees. The institute is affiliated to the University of Bombay.

A unit of technical staff consisting of a Research Officer, Biologist and Biochemist, has been provided at the Marine Biological Research Station, Bombay, to intensify research. The station has also been provided with a research vessel by converting the department's vessel M. L. Mysli at a cost of Rs. 34,101.

A Marine Biological Research Station has been established at Ratnagiri.

FRESH WATER FISHERIES

The State being primarily a maritime province stretching along the western coast, fresh water fisheries have shown comparatively less expansion. Nonetheless, efforts are made to import quick growing varieties of baby fish in the State such as *Calla* (*Calla calla*), Rohu (*Labeo rohita*) and Mrigal (*Cirrhina mrigala*) from West Bengal, for their release in perennial waters in the State in larger numbers every year. Large irrigation reservoirs also are being stocked with these varieties so that they may thrive and breed there in course of time. In 1958-59 about 30,00,000 carp fry imported from West Bengal were released in different sheets of water.

Collection of local baby fish for stocking is attempted at several places around Kolhapur, Baroda, Bhandara, etc., and efforts are made in all directions to boost up these less developed fisheries.

Despite the handicaps, the total production of fish from tanks and reservoirs stocked by the department with carp fry imported from West Bengal, and the rivers, is 7,28,000 lbs. valued at Rs. 2,70,000 per annum.

ANCILLARY PRODUCTS

A fisheries technological laboratory has been established at Sassoon Dock, for conducting research on problems relating to ancillary industries like shark liver oil, gelatine, glue, fish meal, etc. To ensure quick and clean extraction of oil a Sharpie's super centrifuge, a fish liver boiler and a steam boiler have been installed. The laboratory also tests samples of shark liver oil from the public for vitamin 'A' content and also samples of dry fish and fish manure for their chemical composition. A Beckman's spectrophotometer has been imported from the U.S.A. for this purpose.

In 1957-58, the output of neat shark liver oil was 3,123 gallons with an average vitamin 'A' content of 15,000 I.U.s/Gm. This low output was due to an unfavourable shark fishing season. The oil when processed, was capable of yielding 383,100 lbs. of Oleum-Vitaminatum of B.P. standard.

Another important by-product of fisheries is fish meal. The departmental laboratory is also well-equipped for the manufacture of edible gelatin and fish glue both for adhesive as well as photo-processing work.

SECOND FIVE-YEAR PLAN

The Department of fisheries of the Bombay State has drawn up a multi-purpose programme for the development of fisheries under the Second Five-Year Plan envisaging a total estimated expenditure of Rs. 1,11,52,500. Starting with the supply of ordinary fishing tackle, the programme envisages provision of marine engines, winches and improved type of boats, curing, refrigeration, transport and marketing facility, training in improved methods of fishing and manufacture of Shark Liver Oil with malt extract and other fisheries by-products. The programme also contains provision for development of pearl fisheries and education research and organisational facilities to the fishermen.

Against the plan ceiling of Rs. 1,11,52,500, the Department was expected to spend a sum of about Rs. 78,00,000 by the end of year 1958-59. During first two years of the plan, a sum of Rs. 51,06,500 was spent registering an expenditure of 105 per cent of the budgeted provision for these years. A sum of Rs. 26,94,270 was

* Reduction due to adverse fishing season.

estimated to be spent during the year 1958-59 over the aforementioned projects.

All the schemes have been started and are progressing satisfactorily. Mechanisation programme of the State has made a great success and has led to increased fish production. Fresh-water fishery has similarly made a marked progress and greater number of carp fry is being stocked each year.

Receipts of the department during the financial year 1957-58, are shown below :—

	Rs.
Fish curing yards	83,407
Fisheries Tech. Laboratory ..	6,90,420
Other receipts	2,13,245
Tarapurvala Aquarium	70,388
Receipts from T. C. M.	25
Receipts in Saurashtra Region ..	2,76,005
Total	13,42,310

The State Government's share under the U.S. operational Agreement No. 5 amounts to Rs. 30 lakhs, to be utilized to procure up-to-date equipment to increase existing supplies of fish and to improve the socio-economic condition of fishermen.

FISH CURING YARDS

During 1957-58 the department maintained 21 yards in Ratnagiri District. Improvement comprising erection of cement concrete platforms, cement superstructure thereon, copious supply of fresh water, etc. which lead to improvement in cured product, have been provided at many of the important yards in the two districts at an approximate cost of Rs. 3 lakhs. A few of the yards still need such improvement. Accordingly it is proposed to provide the aforesaid facilities in the 2nd Five-Year Plan at an approximate cost of Rs. 80,000. During 1957-58 the work of constructing permanent superstructures over the existing cement concrete platforms was completed. Similar work at other yards is in progress.

The transactions at the yards in Ratnagiri District during 1957-58 were as follows :

Quantity of fish let in for curing—1,63,990 mds.

Quantity of salt issued—44,618 mds.

Quantity of cured fish removed—1,25,208 mds.

The total budget allotment for the department for the year 1957-58 was Rs. 1,48,746.

The designation of the department is: Office of the Director of Fisheries, Bombay.

KERALA STATE

Kerala State, the smallest maritime State in India with just over 300 miles of sea coast, contributes to nearly 25-28 per cent of the total sea fish landed in India. Oil Sardines (*Sardinella longiceps*) and the mackerel (*Rastrelliger canagurta*), the two most important shoaling fishes of the west coast contribute to the major fishery of the coast, the third important constituent being prawns. The main types of indigenous fishing crafts are the dug out canoes, catamarans (in the southern region) and plank built boats.

The estimated landing of all fish in the State is about 210,000 tons of which 10,000 tons are contributed by freshwater fishes the rest being sea fishes. At about Rs. 250 per ton, the sea fish is valued at Rs. 5,00,00,000 whereas the freshwater fish at Rs. 400 per ton is valued at Rs. 40,00,000. Though the population of the State is 1,36,00,000 only about 70 per cent of the people are estimated to be fish eaters. At the most only 50 per cent of the total production is utilized for domestic consumption, whereas the balance is exported out of the State and out of India, either in the fresh condition or as cured fish. This includes nearly 3,000 tons of Prawn Pulp exported to Burma and Singapore and nearly 450 tons of frozen shrimp and lobster to U.S.A. Except for a small quantity of foreign tinned product imported to the State, there is absolutely no import of fish into the State.

There are nearly 85,000 active fishermen in the State. Along the coast there are 66 fish curing yards, some of which are provided with fly-proof, sanitary fish curing sheds, and salt is issued at a subsidised rate which is less than the cost price in the salt factories. There are two Fishermen Training Centres one at Ernakulam and the other at Beypore, to train able bodied fishermen in the use of mechanised fishing craft and modern fishing. Soft wood for making boats, Nylon and Fishing hooks, etc. are distributed at concessional rates through the 199 Fishermen Co-operative Societies. Trained fishermen are given capital and equipment to start co-operative fishing with mechanised units.

The Indo-Norwegian Fisheries Project near Quilon is engaged in the mechanisation of small fishing crafts and in the exploitation of the fisheries' resources of the sea off Kerala. They have also established a Health Centre and a Pipe Factory under the scheme of improving the health and sanitation of the area. There are five private companies exporting frozen shrimps, lobster tails and frog legs, and cold storage plants are working at Trivandrum, Neendakara, Cochin and Kozhikode. In addition to the three Government freezing plants and cold storages there are three private plants also.

By the end of 1958, the total assistance had amounted to Rs. 177 lakhs. About 140 fishermen were trained in improved methods and about 650 persons provided with gainful employment.

There are 4 Fisheries Research Stations in the State engaged in Marine, Estuarine and Fresh Water fisheries and a Fisheries Technological Station conducting researches in fisheries by-product.

MADRAS

Madras State, with a coast line of 620 miles and with about 4 lakh acres of inland waters, is rich in fisheries resources. The Fisheries Department, established in 1907 has a comprehensive programme based on a policy of survey of fishing areas, initiation and co-ordination of research, conservation, development and exploitation of fisheries, provision of efficient and modern craft and tackle, organisation of the fish trade on proper lines and improvement in the socio-economic condition of fishermen. Considerable progress in all directions has been achieved by the Department during its existence of over five decades.

The Fisheries Department is under the administrative control of the Director of Fisheries who is assisted in all technical matters by two Deputy Directors in charge of marine and inland fisheries activities respectively. The fisheries in the districts are managed by six Regional Assistant Directors with headquarters at Vellore, Mettur Dam, Tanjore, Madurai, Tuticorin and Nagercoil. These Asst. Directors have Inspectors and Assistant Inspectors in the taluka. There are four marine biological stations at Ennore, Kruasalai Island, Tuticorin and Cape Comorin; a Technological Station at Tuticorin; and a Fresh-water Biological Station at Bhavanisagar, in-charge of qualified research officers. At Madras there is a Fisheries Marketing and Information Office for promoting fish trade and for dissemination of information. The Aquarium and Museum maintained by this unit are popular with the public. There is a Craft and Tackle Officer for popularisation of mechanised fishing and two other Assistant Directors in charge of the distribution of improved tackle, and fishing equipment received under the Technical Co-operation Aid Programme respectively. A Fisheries Welfare Officer is also stationed at the headquarters to look after the socio-economic interests of the fishermen in the State.

There are 243 coastal fishing villages with a total fishing population of 2,40,000. These fishermen possess about 5,000 boats, 23,000 catamarans, and 3 lakhs of fishing nets. The estimated landings of sea fish in 1957-58 is about 67,500 tons as detailed below, their total value being Rs. 547 lakhs.

Ribbon fish 11,080 tons; Cat fishes 10,880 tons; Sharks, Skates & Rays 4,700 tons; Sabre fish 1,680 tons; Lactarius 2,440 tons; Clupeids 10,130 tons; Flying fish 140 tons; Puerches 2,600 tons; Silver bellies 2,400 tons; Jew fish 2,300 tons; Mulllets 1,500 tons; Seer 4,680 tons; Mackerel 2,210 tons; Caranx 1,340 tons; Pomfrets 2,020 tons; Prawns & other Crustacea 2,300 tons; Miscellaneous forms 4,780 tons.

There are about 44,000 inland fisher-folk possessing about 20,000 implements. The estimated landings of inland fish from the various inland waters in 1957-58 is about 40,000 as detailed below, their total value being Rs. 240 lakhs.

Carps 22,500 tons; Cat-fishes 5,200 tons; Murrels 4,200 tons; Hils 500 tons; Hilsa 160 tons; Chanos 250 tons; Mulllets 1,680 tons; Prawns and other crustacea 2,570 tons; Miscellaneous 2,100 tons.

The average wholesale and retail price of the important varieties of fish are as follows: The first figure indicates the wholesale price for 100 lbs. and the second the retail price per lb.

Fresh-water Carps (Rs. 40; 55 nP.); Fresh-water Catfish (Rs. 42; 55 nP.); Fresh-water Prawns (Rs. 40; 60 nP.); Sea Prawns (Rs. 60; Rs. 1); Mackerel (Rs. 40; 55 nP.); Pomfret (Rs. 60; 87 nP.); Seer (Rs. 68; 94 nP.); Sea Perches (Rs. 41; 47 nP.); Murrels (Rs. 50; 75 nP.); Ribbon fish (Rs. 25; 37 nP.); Sharks (Rs. 25; 50 nP.); Silver bellies (Rs. 15; 25 nP.).

19 fish curing yards are maintained by the Government wherein good quality salt is supplied to fisher folk at subsidised rates for curing fish under the technical supervision of fisheries departmental staff. Two Ice Plants of 5 tons daily output and storage facilities for 15 tons are under construction at Tuticorin and Mettur dam.

There are 196 fishermen co-operative societies with about 23,555 members on their rolls with a paid up share capital of Rs. 1,90,000. These societies play an important role in the improvement of the economic conditions of the fisher-folk. They issue small loans to the members during the off season; and also inculcate the spirit of thrift and co-operation among the fisher-folk. Long term and medium term loans extending over a period of 10 years and 5 years respectively are issued to these societies by Government for enabling their members to redeem themselves of their prior debts and to undertake fish marketing themselves. Six District federations of fishermen co-operatives have also been formed for organising fish marketing on a larger scale.

Through exploratory fishing operations, the fisheries department has located rich deep sea fishing grounds off Pulest, Ennore, Madras, Cuddalore, Nagapattinam, Pamban, Tuticorin, and Cape Comorin, and arrangements are being made for their commercial exploitation. 42 small mechanised boats have already been distributed to fishermen co-operatives together with nylon fishing nets.

The pearl and chank fisheries of the Gulf of Manner are State monopolies, and yield a substantial revenue besides supporting a large population of divers. The pearl fishery conducted off Tuticorin in March-May 1958 fetched 2,14,78,514 pearl oysters, and a revenue of Rs. 4-65 lakhs was realised by the Department by sale of its two-thirds share of the oysters. During 1956-57, about 12 lakhs of chanks valued at about 14 lakhs rupees were fished.

Census of Inland Fisherfolk :

Men engaged in actual fishing ..	12,745
Men engaged in part-time fishing ..	2,099
Number of women and children ..	29,500
Total	44,344

Schools have been opened for fisherchildren. Natural Science and Fisheries Science play a large part in their curriculum. The children are taught handicrafts like coir rope making, net

weaving, net making, etc. Books, pencils and stationery articles are given free to these children.

Officers of the department and teachers of Fisheries schools have done a great deal to improve the standard of life of the children.

There are a museum and an aquarium belonging to the department. In the Museum, preserved specimens of all important marine and freshwater fishes, various kinds of sharks, aquatic curies like sepi, loligo, sea horse, etc. are all exhibited. The aquarium has eight large aquaria in which tropical aquarium fishes like Gold Fish, Black Mollies, Sword Tails, Guppies, Bule Gourami and food fishes like Catla, Labao, Cirrhina, Gomani, etc. are kept. Most important experimental fish farms are Mottar Fish Farm, Poondi Fish Farm, Chetput Fish Farm, Vellore Fort Most Farm, Bhavanisagar Fish Farm and Chingolep Fort Most Farm. The ponds in the farms and other ponds belonging to the department are intensively stocked with quick growing fishes every year and the catches are marketed to the public.

In addition to being an important source of food supply rich in proteins and albumenoids, food fishes play an important part in the manufacture of several bye-products in use in the everyday life. They are fish-oil (body oil and liver oil), shagren, kinglase, fish glue, fish meal (guano), fish fin soup, pearl essence, fish manure, etc.

Under the Second Five-Year Plan, 15 schemes with a total outlay of Rs. 94.79 lakhs are being implemented.

Receipts of department for 1957-58 : Rs. 18.60 lakhs ; Expenditure . Rs. 31.32 lakhs.

The designation of the department is : Government Fisheries Department, Madras.

MYSORE

The facts given below refer to the post-re-organization Mysore State.

Inland Fisheries : There are about 30,000 minor tanks and 4,000 major tanks in the State.

Inland Fisheries are developed only in selected areas of the State.

The revenue from Inland Fisheries is approximately Rs. 50,000.

Marine Fisheries : Mysore State has 200 miles of coast line on the Arabian Sea. All along this sea board, there are many fishing villages, the most important of them being Karwar, Ankola, Kumta, Honnavar, Bhatkal, Majali, Binali, Chandia, Gangoli, Malpe, Udiyavar, Bekkapatnam and Mangalore.

Nearly 40 varieties of sea fishes are landed out of which the most important are Sardine, Mackerel, Seer and Shark. The total fish production on Mysore coast is 1/10 of the total marine fish landings in India.

Thus, the marine fisheries confined to the districts of North and South Kanara can be regarded as one of the richest in the whole of India.

Quantity of fish in tons and the approximate value :—North Kanara : 20,000 ; Rs. 44,80,000 ; South Kanara : 20,000 ; Rs. 66,00,000.

Value of fish exported :—North Kanara : Rs. 38,20,000 ; South Kanara : Rs. 45,00,000.

There are about 20,000 fishermen, about 10,500 boats and about 20,000 nets. The number dependent on the fishing industry is estimated at over 80,000.

Average catch per fisherman per annum :—North Kanara : 2.77 tons ; South Kanara : 3.00 tons.

Total annual internal consumption :—North Kanara : 7,300 tons ; South Kanara : 15,000 tons.

Capital value of the industry together for North and South Kanara districts is estimated at Rs. 18,00,000.

No. of fish curing yards :—North Kanara : 15 ; South Kanara : 15.

Process of modernization (South Kanara) : Mechanization of boats for powered fishing is taken up as also ice plants and refrigerated storage facilities are being provided. It was expected that by the close of 1957-58 there could be about 12 mechanized boats operating in coastal waters in addition to three T.C.M. power-boats.

SUBSIDIARY INDUSTRIES ESTABLISHED AND THE SCOPE FOR DEVELOPMENT :

	Fish-meal plants.	Fish oil factories.
North Kanara ..	—	3
South Kanara ..	1	13
Total ..	1	16

AMENITIES TO FISHERMEN

1 Mysore State : Fishermen Co-operative Societies, 62 ; Subscribed capital, Rs. 4.00 lakhs ; Number of fishery schools, 25.

Steps are being taken to explore the prawn fishing grounds north of Mangalore.

ORISSA

Kinds of sea-fish caught : Pomfrets, Mackerel, Ribbon fish, Silver bellies, Sardine and White Belt. **Kinds of river fish caught :** Labio Rohita, Catla Catla, Cirrhina, Mrigala, Labio kalbasu and other Carps and Cat-fishes.

Annual production of Shark Liver Oil : 1950-51 (3,000 lb.) ; 1951-52 (6,730 lb.) ; 1952-53 (7,688 lb.) ; 1953-54 (10,718 lb.) ; 1954-55 (8,587 lb.) ; 1955-56 (11,681 lb.) ; 1956-57 (5,123 lb.) ; 1957-58 (10,361.75 lb.)

Important marine fishing villages : Patihonagar, Markandi, Gopalpur, Panayal, Sonapur, Suria, Aryapali, Kandarapali, Gajapatnagar, Purnabandha, Damodarapur, Rambha, Channuhani and Arkhakanda.

Important inland fishing centres : Ansupa lake, Bussakonda reservoir and Kausalyaganga.

Number of fish curing yards run by the fishermen's own co-operative stores : 6. **Number of ice factories which cater to preservation of fish for transport to Calcutta and elsewhere :** 6. **Co-operative marketing has developed in the Orissa area.** The annual volume of trade ranges between Rs. 25 to Rs. 40 lakhs.

The demand is approximately 100 times more than the supply.

There are no deep-sea fishing companies in the State.

The State has not taken up deep-sea fishing commercially. Experimental power fishing in the sea has been started with small boats. There are no fishermen's schools.

There is a small experimental aquarium attached to the Fisheries Department in Cuttack.

Fresh water biological stations have been established at Kausalyagang, District Furl, Kikani (Cuttack), Humari (Ganjam), Angul,

Jeypore, Kathpal (Mayurbhanj), Kiankani in Furl District, Dighi in Mayurbhanj District.

Major experimental farms in the State : Cuttack fish farm ; Furl fish farm ; Chowdwar fish farm ; Sonapur ; Sambalpur ; Balasore ; Kausalyagang ; Angul ; Bandh ; Jajpur ; Belguntha.

Research is going on in the manufacture of agar agar and hydrolysed proteins, breeding of carps with pituitary hormone, haematology of carps, life history of mullets, reclamation technique for swamps, improved craft and gear.

Second Five-Year Plan provision 1954-61 : Rs. 52.25 lakhs.

Income from Fisheries Department ranges between Rs. 1.5 and 3.3 lakhs per annum which does not include rent for water areas.

Budget allotment : 1955-59 : Rs. 17,41,640.

WEST BENGAL

Kinds of sea fish caught : Pomfret, Bhethi, Mackerel, Prawn, Topai, Hilsa, Chanda, Shola, Bombay Duck, Ribbon, Shark, Rayn, Skate, Eel, Cat fish, Phasa, etc.

Total quantity of sea fish caught in 1957-58 : 11,901 mds.

Total value of the sea fish caught in 1957-58 : Rs. 1,72,223.

Price per maund of different kinds of fish in March 1958 :

Varities	Maximum	Minimum	Average		
	Rs.	Rs.	Rs.	a.	p.
Carps	160	30	80	4	5
Hilsa	105	40	64	4	8
Bhethi	125	60	88	11	8
Mullet	115	35	76	11	4
Butter	110	15	55	1	8
Lobster	130	75	97	11	3
Shrimp	76	25	46	3	1

Approximate strength of the fishing population : 96,400 (1951).

Potential demand for fish in the local market : In West Bengal (27,647 mds.) ; In Calcutta (5,561 mds.).

Extent to which production meets this demand : Seven per cent.

Money spent by Government in connection with fishing in 1957-58 : Rs. 5,03,000.

Gears used : Haddock trawl, Prawn trawl, Herring trawl, etc., all made of cotton twines.

There is one experimental fish farm in sewage fed water maintained by the State Government. There are demonstration fish farms in private parties' tanks in each thana of the State.

Ancillary industries like liver oil, gelatin, glue, fish-meal, and their production : One scheme for production of shark liver oil, fish-meal, processed fish and utilization of other fish by-products is operated at Contal coast.

Production during 1957-1958 :

Shark liver oil 9,000 lb. ; Fish-meal 12,423 lb. ; Fresh fish 2,864 lb.

Approximate Revenue from Fisheries during 1957-58 : Rs. 3,04,738.

Budget allotment for the Department for 1958-59 : Rs. 20,57,000.

The designation of the Fisheries Department : Directorate of Fisheries, West Bengal under the administrative control of Fisheries Department and Development Department, the latter controlling the sea fishing scheme only.

IRRIGATION

THE net area under irrigation in India during 1955-56 was 56.2 million acres and the gross area 63.3 million acres. This is the second largest irrigated area in any country of the world, the largest being in China.

The total capacity of India's canals is over 220,000 cusecs, and the canals are over 67,500 miles in length.

The total amount of annual flow of water in the Indian Union is 1,356 million acre feet. Of this only 76 million acre feet or 5.6 per cent are at present being used for irrigation purposes.

Classing a year in which rainfall deficiency is 25 per cent. as a dry year and one in which it is 40 per cent. as a year of severe drought the examination of past statistics shows that, over the precarious area, one year in five may be expected to be a dry year and one in ten a year of severe drought. It is largely in order to remove the menace of these years that the great irrigation systems in parts of the country have been constructed.

In the arid tracts where the annual rainfall is less than 15 inches, no cultivation is normally possible without irrigation.

At the beginning of the First Plan (1951), the area under irrigation was about 51.5 million acres. During the First Plan about 5 million extra acres of land were brought under irrigation by means of large and medium-sized projects and about 7 million by means of minor schemes so that at the end of the First Plan the total area under irrigation was about 64 million acres. The First Plan target was 67 million acres.

During the Second Plan period about 12 million acres will be brought under irrigation (9 million from First Plan projects and 3 million from Second Plan projects) by means of large and medium sized projects and 9 million acres by means of minor schemes so that the area under irrigation at the end of the Second Plan would be 85 million acres. If the short-fall of 3 million acres under the First Plan is made up the total area will increase to 88 million acres, which is also the Second Plan target.

The total investment in irrigation and power projects during the First Plan was of the order of Rs 615 crores.

The revised allocation under the Second Plan for irrigation and power is Rs 460 crores (Centre 72 and States 78) and for minor irrigation Rs 96 crores (Centre 3 and States 93).

The anticipated outlay under irrigation and power for 1956-59 is Rs 479 crores (Centre 36, States 443).

Under minor irrigation the anticipated outlay for 1956-59 is Rs 44 crores (Centre 2, States 42), and for the whole Second Plan period of 1956-61 is Rs 92 crores (Centre 3, States 89).

Additional food production expected through major and minor irrigation works was as follows (in million tons)

First Plan 2.01 and 2.38 respectively
Second Plan 3.02 and 1.89 respectively

THE PROJECTS

The following projects continued from the First Plan period

Bhakra-Nangal (Punjab and Rajasthan), Damodar Valley (West Bengal and Bihar), Hirakud (Orissa), Chambal (Rajasthan and Madhya Pradesh), Tungabhadra (Andhra and Mysore), Mawrakshi (West Bengal), Bhadrā (Mysore), Kosi (Bihar), Nagarjunaagar (Andhra), Kakrapar (Bombay).

The following are the new projects:

Andhra—Vamsadhara, Bombay—Ulkal, Vir, Purna, Narmada, Banas, Mula, Girna, Khadakvasla, Bhadar, Jammu and Kashmir—Lidder Canal, Kerala—Bhoothathankuthu; Madhya Pradesh—Tawa, Chandakeshar, Barma or Kolar,

Upper Keri, Madras New Kattalai, Mysore—Ghatprabha II, Kabini, Laxman Thirtha; Orissa—Salandi, Punjab (Jurgaon Canal), Pondicherry (also Madras)—Vidur, Rajasthan—Banars; U.P.—Sarda Sagar II, Ramganga, West Bengal—Kangsabati.

Notes on the continuation projects are given later

For particulars about other projects see under individual States.

Particulars about major schemes taken up under the Second Plan are given below. Only such schemes are mentioned as cost Rs. 5 crores and above

(Rs. lakhs)

Scheme	Estimated cost	Second Plan provision	Expenditure 1956-57	Budget 1957-58	Proposals 1958-59
BOMBAY					
1 Vir	533.0	425.0	9.77	30.47	70.00
2 Mula	940.0	275.0	12.41	22.64	20.00
3 Girna	905.4	375.0	15.97	29.00	85.00
MYSORE					
4 Ghatprabha Stage II	970.0	100.0	21.21	50.00	20.00
UTTAR PRADESH					
5 Sarda Sagar Stage II	984.2	737.0	78.51	96.00	82.89
Schemes not sanctioned by Planning Commission but taken up by States					
BOMBAY					
1 Khadakvasla	1,214.0	275.0	15.52	60.00	100.00
2 Purna	764.6	500.0	20.44	46.56	95.00
WEST BENGAL					
3 Kangsabati	2,525.00	475.0	52.12	75.00	50.00
UTTAR PRADESH					
4 Ramganga River Project	1,599.00	450.0	17.70	32.00	60.00

The Central Board of Irrigation and Power is a central organisation (set up in 1931) and has as its members, Irrigation and Hydro-electric Chief Engineers of all Administrations in India. The function of the Board is to co-ordinate research in irrigation and allied subjects conducted at all the 16 irrigation research stations in India. Meetings of the Board and its Research Committee are held annually, when the research carried on during the year and the policies, and problems are discussed.

The Central Water and Power Commission was set up in 1945, with the object of initiating, co-ordinating and furthering (in consultation with the State Governments concerned), schemes for the control, conservation and utilisation of water resources throughout the country for purposes of water power generation, irrigation, navigation and flood control.

The Commission has three wings, i.e. Water, Flood, and Power Wings with seven, four and ten Directorates respectively under them. The Commission consists of a Chairman with two Members each, for the Water and Power Wing respectively, and is assisted by three Chief Engineers who are in charge of the Flood Wing.

Twenty-one foreign experts were engaged on dam construction projects in India in Sept. 1954.

Sixteen of the experts were posted with Bhakra Nangal Project, 2 each with Damodar Valley Corporation and Rihand Dam Project, and one with the Water Wing of the Central Water & Power Commission of the Union Ministry of Irrigation & Power.

All the experts belonged to the U.S.A.

MINOR IRRIGATION

The possibilities of diverting the normal flow of rivers into irrigation canals can now be regarded as exhausted.

The plans for the future development of irrigation, therefore, should aim at impounding

the surplus river flow during the monsoon for use during the dry weather. Dams have to be built at suitable sites for this purpose. In areas unsuitable for flow irrigation, however, water for irrigation has to be lifted mechanically from sub-surface sources.

Minor irrigation works command a larger area than what is commanded by the major works. Out of a total (net) irrigated area of about 53.3 million acres (in 1954-55) about 60 per cent is contributed by minor irrigation through tanks, wells, and other sources (9.9, 16.6 and 5.6 million acres respectively).

Minor irrigation works are not so spectacular as major irrigation schemes. But they have many advantages. They do not require any foreign exchange, involve a small outlay and yield quick results. They can be completed by the people themselves without much technical guidance and, in the process, make the village communities more self-reliant.

Minor irrigation schemes include construction of open wells, tanks and minor drainage schemes; embankments which are important from the point of view of food production and checking intrusion of salt water in coastal areas; restoration of old tanks, stream diversion schemes; and installation of pumping appliances and improvement of water supply from wells and storage dams. There are also such works as construction of kulis in hilly areas, filter points in coastal alluvium and installation of improved lift appliances, Persian wheels and pumping sets on wells. Tubewells also form part of minor irrigation works.

During the First Five-Year Plan 9.5 million acres were reported to have been brought under minor irrigation.

Following is the State-wise break up (figures in thousand acres): Andhra Pradesh 174; Assam 867; Bihar 1,774; Bombay 244; Madhya Pradesh 95; Madras 508; Orissa 136; Punjab 827; Uttar Pradesh 1,489; West Bengal 1,364; Hyderabad 145; Madhya Bharat 64; Mysore

281; PEPSU 189; Rajasthan 109; Saurashtra 183; Travancore-Cochin 147; Other Part 'C' States 99.

The target for increased food production was 2.55 million tons.

During the First Plan period the Government of India spent Rs. 46.52 crores as loans and Rs. 8.25 crores as subsidy for minor irrigation, in addition to Rs. 19 crores for tubewells and Rs. 7.34 crores on minor irrigation in Community Development and N.E.S. blocks.

The First Plan achievement is as follows:—

Item	Newly constructed/installed.	Repaired/Renovated.
1. Tanks	3,134	5,788
2. Wells (Excluding tubewells)	156,348	62,472
3. Dams	33,672	..
4. Other works ..	14,154	..
5. Persian Wheel, Rahats etc (installed) ..	38,485	..
6. Pumps on rivers and channels installed ..	19,694	..

The target for minor irrigation under the Second Five-Year Plan is fixed at 9 million acres, half of which is to be in the Community Development areas.

The total allocation for this purpose is Rs. 120 crores.

The target for increased food grains is 1.9 million tons.

The additional areas covered by minor irrigation works during 1956-57 and 1957-58 were estimated at 3.86 million acres—about 40 per cent of the Plan target. This includes benefits derived from minor irrigation schemes in C. D. blocks.

For minor irrigation, the total Central expenditure in 1956-57 was Rs. 9.04 crores—Rs. 8.39 crores as loans and Rs. 0.65 crores as subsidy to States. In addition, Rs. 4.04 crores were spent on minor irrigation works in C. D. and N.E.S. areas.

Expenditure on tubewells was Rs. 3 crores.

In 1957-58, actual expenditure on minor irrigation was likely to be Rs. 13.00 crores, and on tubewells, Rs. 3.25 crores. Another sum of Rs. 4.00 crores was expected to be utilised for irrigation in community development and N.E.S. areas.

The following amounts were allotted by the Centre (Rs. in lakhs): Andhra Pradesh 93.79; Assam 58.00; Bihar 93.90; Bombay 255.88; Kerala 53.00; Madhya Pradesh 245.02; Madras 55.71; Mysore 102.47; Orissa 12.00; Punjab 157.15; Rajasthan 105.37; Uttar Pradesh 276.87; West Bengal 69.00; Jammu and Kashmir 44.37; Delhi 6.91; Himachal Pradesh 29.50; and Tripura 0.97.

In 1956-59 the following amounts were allotted (Rs. in lakhs):—

Andhra Pradesh 117.14; Assam 35.69; Bihar 172.00; Bombay 326.56; Kerala 54.00; Madhya Pradesh 175.00; Madras 76.76; Mysore 98.57; Orissa 41.90; Punjab 120.00; Rajasthan 76.00; Uttar Pradesh 273.60; West Bengal 40.50; Jammu and Kashmir 29.00; Delhi 5.30; Himachal Pradesh 20.00; N.E.F.A. 0.26; and Pondicherry 2.03.

The total allotment for 1956-59 was Rs. 20 crores.

The progress, however, is still somewhat slow and the actual achievement during the two years works out to only 40 per cent of the total targets of minor irrigation.

The principal difficulty felt so far in implementing the programme for minor irrigation is the delay in land acquisition, shortage of

technical staff, particularly of overseers and other engineering subordinates, shortage of essential requisites, such as diesel engines, electric motors, pumping sets and the delay in the construction of field channels and distributaries.

The Central Committee on Community Development has emphasized the need for fuller utilization of irrigation facilities. More attention is to be paid to the proper maintenance of existing minor irrigation works in villages than to the construction of new ones. In other words, consolidation of what has already been achieved is even more important than plans for expansion.

LAKES, TANKS AND WELLS

The waters of lakes, tanks and embankments played an important part in the early irrigation practices of the country. Sudarshana lake near Kathiawar built by the Mauryan Emperors (in 300 B.C.—457 A.D.), the two large tanks (i.e.), extending over 2,000 and 4,000 acres respectively in Chingleput in Madras, dating back to 8th and 9th century, and the Bhojpur Lake (covering 250 square miles) of the 11th century near Bhopal, constructed across the Betwa Valley and fed by Kallot River, the great lakes of Telangana in Andhra (Pakhal, Ramappa, Lakhnavaram, and Ghanapur) of the 13th century and the much more recent works like Usmanagar, Himayatnagar, Pochram, Wyra, and Palair are evidence of the importance of minor irrigation in the agricultural economy of the country.

The lakes and tanks are either of the storage or submergent type.

The essential functions of a storage tank is to store the rain water. Its main features are bunds (of earth-masonry or cement) to impound water and sluice gates and canals to take it to consumer points, and waste weirs to dispose of surplus flood discharge.

In the chain system of tank irrigation (in Andhra, Mysore and the Satara Dist of Bombay) a series of tanks are constructed in a valley, in such a way, that the surplus water from the upstream is stored in the tanks below, effecting the maximum utilisation of water.

In submergent tanks the stored water is not generally used for irrigation, but allowed to soak in the soil, and the surplus drained before the winter crops. Such land does not require any irrigation and usually yields a bumper wheat crop. The practice is common in Bihar, Madhya Pradesh (Jabalpur and Sagar districts), and Rajasthan (Kota and Bundi districts).

Tank irrigation is very important in Andhra, Madras, and Uttar Pradesh where over 2.4, 2.1, and 1.0 million acres respectively, are irrigated by tanks. Bengal, Mysore, Bihar, and Bombay, have over half a million acres under tank irrigation.

Wells: Wells are mainly of two types, i.e., surface or sub-surface. Unlike tanks, they can be constructed irrespective of topographical and geological limitations, provided sub-soil water is in reach.

Well irrigation commands over 6 million acres in Uttar Pradesh and two millions in Punjab,

The progress of tubewell construction is as follows:

Sum spent in 1956-57, Rs. 5.2 crores; in 1957-58, Rs. 3.7 crores.

	Grow More Food		T.A.P.	Second Plan		E.T.P.
	General	Gujarat		Assam	U.P.	
Targets	700	400	2,650	45	1,500	350
Completed Drilling ..	609	400	2,650	6	392	..
Installed Pumping ..	540	330	2,640	1	116	..
Energised	396	330	2,564	1	52	31

The Second Plan allotment is Rs. 17.65 crores. During the First Plan the Government of India spent Rs. 19 crores on tubewells.

The increased food production under the First

Rajasthan, and Bombay. It is also of considerable importance in Madras (where over 1 million acres are irrigated by wells), Andhra, Madhya Pradesh, and Bihar.

Pumping sets of high efficiency have come into common use for water lifting and also for draining. The number of irrigation pumps in use have increased from 107,365 in 1951 (i.e., oil powered 82,218, and Electrically driven 25,137) to 177,034 (oil powered 122,230 and Electrically driven 54,804) by 1956.

To encourage maintenance, a levy on the entire irrigable area is imposed in Madhya Pradesh, Madras, and Mysore:—

Type	Cost per acre in Rs.
a) Lift irrigation by Mote (Leather Bucket)	60-0
b) Pump irrigation	20-0
c) Tubewell (per acre inch) ..	1-8

Tubewells

A tubewell irrigates about four hundred acres while a surface well can do only 1.80 of this, i.e., about 5 acres.

The cost of a tubewell (300 ft. deep, discharging 35,000 gallons water p.h.) complete with accessories will be about half a lakh of rupees, and that of a surface well (irrigating about 5 acres) only about 1/33 of this. But, the capital cost of a tubewell when hydro-electric power is available for running it, will be only Rs. 150 per acre. Where electricity by other means (diesel or thermal) can be provided, it will, however, be Rs. 190 per acre. The various processes in its construction, viz., drilling, lowering of pipes, putting gravel, construction of pump house and installation of pump set, construction of tanks and channels, installation of lines and electric generating stations, etc., have all to be proceeded almost simultaneously so that the complete tubewell is put into working condition within a specified time schedule.

Tubewells are an economic source of minor irrigation. But, they cannot be set-up anywhere. The essential conditions are:—Sufficient reserves of underground water; Favourable soil condition; and, Cheap electric power.

These are present only in the northern regions of the country. Therefore, out of 2,600 tubewells existing in India prior to 1950, the great majority were located in Uttar Pradesh.

The tubewell projects programmed since 1950 can be broadly categorised as under:—

1. G.M.F.C. project started in 1950 with a target of 965 and expanded in 1954 by a further 700 tubewells and G.M.F.C. Tubewells in north Gujarat.
2. T.A.P. schemes started in 1953.
3. Second Five-Year Plan Schemes mostly in Assam and Uttar Pradesh, and
4. Exploratory Tubewell project in some States.

Plan was 73,000 tons. In 1956-57 it was 9,200 tons. In 1957-58 it was 1.4 lakh tons.

G.M.F.C. Projects: The Government of India launched a project in 1950 under the

G.M.F.C. to construct 965 tubewells mostly in the Indo-Gangetic alluvium. (Bihar: 300, Punjab: 225, and Uttar Pradesh: 440). When this was completed, an additional 700 tubewells (Punjab: 250 and Uttar Pradesh: 450) were sanctioned in 1954-55 under the same project at a total cost of Rs. 420 million.

Another scheme for the construction of 400 tubewells in the north Gujarat was also taken up.

Technical Aid Project: Another project with the help of Technical Aid Programme of U.S.A. for the construction of 2,000 tubewells in the first instance and then later expanded (by 650) to 2,650 (viz., Bihar: 285, Punjab: 900, and Uttar Pradesh: 1,375) was started in 1953.

The total cost of this was about Rs. 209.4 million out of which Rs. 52.9 million were contributed by U.S. and Rs. 116.5 million by the Government of India. The expenditure will be considered as a loan to the State Governments repayable in 15 equal instalments (of capital with interest) from the fifth year of the sanction of the scheme. About two-thirds of this work was undertaken by contractors and the rest by Government.

Second Plan Projects: The Assam Government has a programme of 45 and Uttar Pradesh 1,400 in the Second Plan period.

Exploratory Tubewells: The possibility of extending tubewell construction to other irrigation-needing areas where flow irrigation is difficult, is being investigated. Exploratory work on this behalf by the Ground Water Section of the Geological Survey, has shown possibilities in 15 States. Projects for Exploratory Tubewells prepared under the T.A.P. have decided to have 550 tubewells, provisionally, at a total cost of Rs. 350 million, out of which Rs. 12 million will be provided by the Government of India and the rest by the U.S.A. (in dollars).

DISTRIBUTION AND PROGRESS (1954-57)

	Proposed	functioning
Assam	15	..
Bengal	37	..
Bihar	16	3
Bombay	50	5
Kerala	5	..
Madhya Pradesh ..	15	..
Madras (with Andhra)	75	19
Orissa	20	..
Punjab	51	1
Rajasthan	5	1
Uttar Pradesh .. .	47	2
Others	14	..
Total	350	31

HISTORY

Rainfall in the country is as already mentioned unequal and in many areas uncertain. The distribution is as follows:

Range	(in million acres)	Percentage
Area between 0-30 inches	237.6	29.6
Area between 30-50 inches	239.2	42.0
Area between 50-75 inches	143.9	17.8
75 inches and above ..	86.6	10.6
Total area ..	806.8	100.0

The annual rainfall varies from 5" (in parts of Rajasthan) to over 100" in the west coast areas. Most of it, however occurs during the four months of June-September, when many rivers are often in spate. On the other hand, about 30 per cent of the area gets less than 30" rainfall a year, necessitating irrigation measures.

The country can be broadly divided according to the rainfall into two zones of certain and uncertain rainfall. Generally speaking, rainfall is certain in Assam, Bengal, Konkan and Malabar and in the Narbada Valley. It is uncertain in large areas of Andhra, Bombay, Madras, Mysore, Orissa, Punjab, Rajasthan and Uttar Pradesh.

The total water resources of Indian rivers in terms of annual flow is estimated at 1,356 million

acre feet of water, distributed as follows:—
1. Rivers (excluding the Indus system) falling into the Arabian Sea, 251.5; 2. Rivers (excluding Ganga and Brahmaputra system) falling into the Bay of Bengal, 224.0; 3. Indus basin in India, 64.4; 4. Ganga System, 367.1; 5. Brahmaputra System, 209.0.

The total run off is about 1.37 million cubic ft. throughout the year.

The utilisation is given below:—

(min. acre ft.)

System	Estimated average flow	UTILISATION		
		upto 1951	Addl. in 1st F.Y.P.	Addl. in 2nd F.Y.P.
Indus	168	8.0	11	1.2
Ganges	400	23.0	21.5	14.5
Brahmaputra .. .	200	2.3
Mahanadi	84	3.1	10.5	0.2
Godavari	84	12.0	1.0	1.5
Krishna	50	9.0	15.6	2.6
Cavery	12	8.0	1.3	0.6
Narbada	32	0.2	..	10.1
Tapti	17	0.2	0.7	3.5

Out of the water resources of 1,356 million acre feet, about 450 million acre feet are utilisable. About 83 million acres (6.1 per cent of total and 19.5 per cent of utilisable) were utilised by 1951. In the First and Second Five-Year Plan 11 and 13 per cent of the total water respectively are to be used.

The partition of the country in 1947, and the consequent transfer of large irrigated areas in the Punjab to Pakistan left the country with only 48.4 million acres of irrigated area (comprising 15.7 million served by Government Canals and 32.7 million acres by private irrigation agencies). This brought the problem of large-sized irrigation measures into focus once again.

The storage capacity of all the dams constructed prior to 1947 was only 5 million acres.

New dams were now designed to store nearly five times as much, i.e., 25 million acres.

The First Five-Year Plan (1951-56) provided for the construction of storage reservoirs of 35.4 million acres capacity. The completion of the works included in the Plan, will increase the total water storage capacity of the country to 31.4 million acres. The achievement under the First Five-Year Plan was 4 million acres by major and medium irrigation, and 10 million acres by minor irrigation.

The Second Five-Year Plan provided for an additional irrigation of 21 million acres by 1961. By 1966 the country will probably have about 160 million acres of irrigated area.

Prior to 1947 each State planned and undertook individual water utilisation projects to meet urgent local demands.

The Damodar Flood Enquiry Committee appointed by the Government of Bengal in 1943, recommended a comprehensive basin development plan for the Damodar River basin on the lines of the T.V.A. Later in 1945, when a Central Waterways Irrigation and Navigation Commission (now the Central Water and Power Commission) was constituted having as one of its functions, collection, collation and analysis of data, the idea of comprehensive planning for the development of water resources on a national basis came to the fore.

In accordance with this new concept a number of multi-purpose river valley projects were taken up with various inter-related objectives, viz., irrigation, flood control, generation of hydro-electric power, development of pisciculture, provision of drinking water, inland water transport, and navigation.

The major river valley projects are as follows:—
(1) Bhakra-Nangal Project, (2) Hirakud Project, (3) Damodar Valley Project, (4) Tung-

bhadra Project, (5) Kosi Project, (6) Chambal Project, (7) Nagarjunasagar Project, (8) Koyan Project, (9) Riband Project, (10) Bhadra Reservoir Project, (11) Kakrapar Project, (12) Machkund Project, and (13) Mayurakshi Project.

PROJECTS

Below we give notes on some individual projects.

Bhadra Project (Odisha):—This is one of the biggest irrigation and multi-purpose projects undertaken by the State. The scheme includes the construction of a reservoir on the river Bhadra at Lakhavelli (Shimoga District) with a storage capacity of 61,250 c.ft. to irrigate 2,24,200 acres of land in the dry taluks of Shimoga, Chitaldurg and Bellary districts and to generate electric power to the extent of 41,040 kW at the dam site. Two channels take off from the reservoir on each bank and the right bank channel has to be taken in a tunnel, three miles in length, across the Urbani Range of hills before it enters Sulchore valley which commands vast fertile lands in the taluks of Harihar and Davanagere. When completed, this will perhaps be the longest irrigation tunnel in India.

The cost of the project is estimated at about Rs. 25 crores and the work is expected to be completed by 1961. According to the schedule, water has already been made available to an extent of nearly 20,000 acres of land. The project was actually started on a small scale in 1947 and so far about Rs. 9 crores have been spent.

Bhakra-Nangal Project (Punjab): The Bhakra-Nangal project in the Punjab comprises two big dams—The Bhakra Dam and the Nangal Dam, about 70 miles north of Chandigarh—a vast network of canals, four power houses and a large number of transmission lines with scores of grid sub-stations.

It is the largest multi-purpose river valley scheme under construction in India.

The project is expected to irrigate over nine million acres and build up an ultimate power potential of 9,00,000 kW. The States that will benefit are the Punjab, Rajasthan, Himachal Pradesh and Delhi. According to estimates made in 1956 the project is estimated to cost Rs. 174 crores, and will be completed by March 1966.

The project will irrigate 4.8 mha. area in the Punjab, and also lakh acres in Rajasthan. It will also improve irrigation in another 6.4 mha. area. During the year 1955-56 the Ganga system is expected to irrigate over 20 lakh acres.

in the Punjab and Rajasthan as compared to 15 lakh acres during 1957-58.

The Nangal Dam, the Nangal Hydel Channel, and the Bhakra canals have already been completed. The first phase in the construction of the Bhakra Dam to a height of 414 ft. was completed in April 1955 and partial storage of water began in the 1955 monsoon.

The final phase in the construction of the dam was taken on hand in October 1955 and is scheduled to be completed by March 1960. Partial storage of water in the Bhakra reservoir began in the monsoon of 1955 and five lakh acre feet of water was stored. Supply of irrigation water which stopped in September was extended upto November 1955 to help rabi sowing.

Full benefits of the Project will be available on its completion in 1960. However, schedules have been so arranged as to bring some measure of these benefits at each step of construction is completed. Kharif irrigation was provided to over 8 lakh acres in the Punjab with effect from July 1954. This was extended to the rabi sowing season with the starting of partial storage in the Bhakra reservoir in the 1955 monsoon.

Of the four power houses the Gangwal and Kotla power houses on the Nangal Hydel Channel, with a total capacity of 98,000 kW have already been commissioned and penstocks have been laid for five generating units, each with a capacity of 90,000 kW to be installed in the power house on the left side of the Bhakra Dam.

The increase in foodgrains as a result of the extra irrigation facilities is expected to be 1.13 million tons a year. Other additional yields that will accrue from the project are: sugarcane 5,00,000 tons, cotton 8,00,000 tons and pulses and oilseeds 1,00,000 tons.

Upto October 1955, Rs. 156 crores were spent on the Bhakra-Nangal project. The revised estimate of the Project is Rs. 170.02 crores.

In 1957-58 the area irrigated was 14.82 lakh acres; up to Dec 1955 the area irrigated was 16.80 lakh acres.

Some details are given below:

The principal feature of the project is the construction of a dam about 740 feet high on the river Sutlej near the village of Bhakra about 50 miles upstream of Ropar Town in Ambala District. The total storage capacity of the reservoir is estimated to be 7.46 million acre feet, of which 5.7 million acre feet will be available for use. The reservoir will extend to about 56 miles above the dam. The area covered by the dam is 66.4 sq. miles.

The dam will be the highest so far in the world and will be of the straight gravity type in concrete.

Bhakra Dam: Height 740 feet; Length at bottom 325 feet; Width at top 30 feet; Length at top 1,700 feet; Width of dam at bottom including apron 670 feet; Width at bottom including apron and heel claystone 1,510 feet. **Bhakra Reservoir:** Total storage capacity 7.46 million acre feet; Live storage capacity 5.7 million acre feet; Length of reservoir 56 miles; Area submerged 62,540 acres; Population to be displaced 30,000; No. of villages to be submerged or partly submerged 365; Total quantity of excavation for dam and appurtenant works 5.16 million cubic yards; total quantity of concrete for dam and appurtenant works 5.11 million cubic yards.

Nangal Dam: Height 95 feet; No. of bays 26 of 30 feet span each; Distance between abutments 955 feet; **Bhakra-Nangal Canal System:** Length of Main Line and Branches 600 miles; Length of Distributaries 2,100 miles.

This dam serves chiefly to divert the requisite supplies from River Sutlej for the Nangal Hydel Canal, secondly to provide storage to smoothen the fluctuations in supplies due to load variations in Bhakra Power Plant. The Hydel Channel takes off from the left bank of the river Sutlej at Nangal Handwara. It is a lined canal about 45 miles long with a maximum capacity of about 14,300 cusecs,

for the first 9,700 feet of its length and 12,000 cusecs thereafter. The project will increase the use of the Sutlej waters from five million to 12 million acre feet.

The Bhakra Canal system, which was inaugurated by the Prime Minister on July 8, 1954, consists of 600 miles of Main Canals and Branches and 2,100 miles of distributaries. The Nangal Hydel Canal, passing through a sub-mountainous terrain full of deep ravines and hill torrents. The work on it involved construction of 58 cross drainages and 24 bridges. It is lined with concrete throughout its length of 40 miles and has cost Rs. 11 crores.

The Bhakra electricity transmission system consists of 2,267 miles of high tension lines ranging from 33 K.V. to 220 K.V. Apart from this, there will be 800 miles of 11 K.V. lines. Greater stress has been laid on rural electrification for stepping up agricultural production and energising tube-wells.

A comprehensive agreement between Punjab and Rajasthan regarding the Bhakra Nangal project has been signed.

One of the articles of the agreement lays down that all disputes between Punjab and Rajasthan on the day-to-day operation and maintenance of the common work of the Bhakra Nangal project will be settled by mutual discussion between the chief engineers for irrigation and power of the States.

The contracting States further agree that any unresolved dispute should be referred to a Standing Committee, consisting of the chief engineers of Punjab and Rajasthan, with a representative of the Central Water and Power Commission as chairman.

Another article stipulates that a difference of opinion between the States in any matter arising out of the present agreement should be referred to a person mutually agreed upon by both parties. Failing an agreement on this, a person may be nominated by the President of India.

The decision of this person will be final and binding on the two States.

Of the four appendices to the agreement, the first gives the constitution and functions of the Bhakra Control Board and Bhakra Advisory Board, set up by the Government of India in September 1950.

The shares of the two States for the supplies of the river Sutlej, including those for the existing areas under the Sirhind canal, are dealt with in the second appendix.

The third appendix gives details of the share of cost of construction of Bhakra dam, which will be borne by Punjab and Rajasthan in the proportion of 64.78 per cent and 15.22 per cent respectively. The last appendix shows that the total cost of the Bhakra dam, including cost of works for left and right power houses is Rs. 68.81 crores.

Over 40,248 acres of land has so far been acquired in Bhalspur, Hoshiarpur, Kangra and Hissar districts for resettlement of people displaced from the Govind Sagar (Bhakra Reservoir) area.

Damodar Valley Project (Bihar and West Bengal):—The Damodar Valley Project which is one of the most important multi-purpose schemes and is to benefit the States of Bihar and West Bengal, has on its main features the construction of (a) multi-purpose storage dams with hydro-electricity plants, (b) an irrigation project with a net work of irrigation canals and distribution measuring 1,485 miles, (c) an 85 mile long irrigation-navigation canal, (d) a power transmission grid and (e) thermal power stations to supplement the hydro-power.

The ultimate benefits that will accrue from this scheme include (a) effective flood control of the Damodar River, (b) perennial irrigation of 10,44,000 acres including 1,04,000 acres now irrigated in the kharif season and 90,000 acres in the rabi season resulting in an additional

yield of rice and rabi crop valued at Rs. 25 crores a year, (c) the generating of 604,000 kW. of electric power, which will promote the growth of industry, lead to the electrification of railways, etc., (d) cheap transport facilities through the navigation canal (e) annual traffic through the canal of coal, paddy, etc. to the extent of nearly 2 million tons and (f) efficient drainage of about 700 sq. miles of water-logged area in the lower valley in W. Bengal.

Of the electric power generated 500,000 kW. will be thermal and 104,000 kW will be hydro-electric.

The first phase of the D.V. Project comprises (1) a thermal power station of 150,000 kW capacity at Bokaro, 7 miles by road from the Bermo railway station, in the district of Hazaribagh, Bihar, (2) Tilaiya dam with a power station of 4,000 kW in the same district, 14 miles south of Kodarma railway station on the Grand Chord line of the Eastern Railway, (3) the Konar dam in the same district, 24 miles from Hazaribagh, (4) the Maithon dam with a power station of 60,000 kW in the district of Dhanbad (Bihar), 3 miles from Kumardhubi railway station on the Grand Chord line, (5) the Fanchet Hill Dam with a power station of 40,000 kW (initial) in the district of Dhanbad (Bihar), about 13 miles south of Maithon, (6) the Durgapur Barrage and Canals in the district of Burdwan, Bankura, Hooghly and Howrah (West Bengal) and (7) the transmission line system. All these schemes were later integrated to the National Plan and those included in the original first phase programme were drawn into the First Five-Year Plan.

The construction of the first dam at Tilaiya was started in January 1950. The dam was completed and the hydro-station put into commercial operation in February 1953.

The Bokaro Thermal Power Station was commissioned in 1953 with an installed capacity of 150,000 kW and with the addition of the fourth unit it will ultimately have a capacity of 225,000 kW.

The Konar Dam in the district of Hazaribagh was completed in 1955 and was formally opened by the Prime Minister of India on October 15, 1955.

The Maithon Dam, 162 feet high above the river bed, has been built on the Barakar River above its confluence with the Damodar. It consists of a main earth dam, 2,041 ft. 6 inches long across the bed of the river, with a concrete dam 1,169 ft. long including the spillway of 612 ft. on the diversion channel and a long stretch of earthen dykes on both the banks. The overall length of the dam is 15,712 ft.

It has an underground power station on the left bank, the installed capacity of which is 60,000 kW and which will produce annually 164,000,000 kW of hydro-electric power. The normal storage level of the reservoir will be 6,64,000 acre feet, the maximum at flood stage will be 12,00,000 acre feet and the low water release will be 4,96,000 acre feet.

The dam was opened by the Prime Minister of India on September 27, 1957 and the power station with all the units are in commercial operation.

The Fanchet dam has been built on the river Damodar about 3 miles above its confluence with the Barakar river. It consists of a main rolled earth dam, 124 ft. high, 7,125 ft. long with a gravity type concrete dam 1,315 ft. long including spillway and a long stretch of dykes on both sides. The overall length of the dam is 22,125 ft. The reservoir capacity to normal storage level is 325,000 acre ft. and the maximum design flood stage is 1,365,000 acre ft.

The power house with an initial installed capacity of 40,000 kW is expected to generate 171,000,000 kWh of power annually.

Work on Fanchet Hill Dam and Power House was expected to be completed by the middle of 1959.

Malihon and Panchet are the two key dams on which flood control and irrigation in the lower Damodar Valley will mainly depend.

The Durgapur Barrage has been completed and was opened by the Vice-President of India on August 9, 1955. Through some reaches of the completed canals, irrigation water was made available for an area of 1.43 lakh acres during 1957-58. It had been programmed to irrigate 3.37 lakh acres of new areas and 1.85 lakh acres of the old Damodar Canal System during 1958-59 (Kharif season). The work on the remaining canals was in progress and was expected to be completed in 1959-60.

The Bokaro thermal station supplied through an expanding network of transmission lines reaching right upto Calcutta 802 million units of electricity in 1957-58. The beneficiaries of the D.V.C.'s power system include such well-known firms as the Tata Iron & Steel Works, Jamshedpur, Indian Iron & Steel Company, Burnpur, the Locomotive Works, Chittaranjan, the Hindustan Cables, Calcutta Electric Supply Corporation, the Eastern Railway, the copper mines at Ghatsila and the coal fields at Jharia and Raniganj.

Work on the transmission system is actively in progress and 600 miles of 132 kV (out of a total of 919 route miles) and 91 miles of 33 kV lines with most of their associated sub-stations, have been completed.

In addition to the unfinished schemes carried over from the First Five Year Plan, the following additional schemes have been taken up during the Second Plan period:

(1) Expansion of the Bokaro Thermal Power Station by the addition of a 75,000 kW generating set, thus raising the ultimate capacity of generation to 225,000 kW. (2) the construction of a second Thermal Station at Durgapur (West Bengal), with a capacity of 150,000 kW. (3) the construction of a third Thermal Power Station at Dugda in the district of Dhanbad (Bihar), and (4) the necessary strengthening of the transmission system.

These extension works are programmed to be completed in time to meet the additional demands for power and new industrial development, such as, the expansion of the steel industry, undertaken by the Government as a part of the Second Five Year Plan; electrification of the part of the Eastern Railway.

First plan outlay Rs. 62.28 crores.

The estimated cost of the project including the new schemes taken up during the period of the second Five Year Plan is about Rs. 132 crores. The aggregate expenditure on the various projects upto the end of June 1959 works out to about Rs. 117 crores.

Budget

Revised estimates (1957-58) . Rs. 17,25,00,000

Budget estimates (1958-59) .. Rs. 17,10,00,000

It may be mentioned here that the Damodar Valley Corporation Act was passed in March 1948, and the Corporation itself came into existence on July 7, 1948.

The manner in which the costs are shared among the participating Governments is as follows:

The total amount of capital allocated to irrigation is shared between the State Governments of West Bengal and Bihar in the following way:

(i) The Government concerned is responsible for the capital cost of the works constructed exclusively for irrigation in its province;

(ii) the balance of the capital cost under irrigation for both the States of West Bengal and Bihar is shared by the State Governments in proportion to their guaranteed annual off-takes of water for agricultural purposes.

The expenditure allocated to power is shared equally by the three participating Governments, (The Central Government, West Bengal, Bihar).

The share of expenditure allocable to flood control is equally divided between the Centre and West Bengal up to Rs. 14 crores, and any amount in excess thereof is the liability of the Government of West Bengal.

It may be added here that the reorganisation of the States of Bihar and West Bengal does not involve any change in the irrigable areas in these States. In regard to power also, no appreciable change is involved as the benefit from the DVC power system will be shared almost equally by the States of Bihar and West Bengal.

Additional supplies to be made over the next two years will be more than 200,000 kW and the demand will fully consume the capacity of the power-stations under construction at Panchet, Durgapur and Bokaro (4th unit) and of the new power station to be constructed at Dugda.

Power is consumed mostly by major industrial concerns, but the D.V.C. also helped considerably in urban and rural electrification.

The Bihar Government upto March 1954 electrified 82 towns, 708 villages, 144 collieries, 93 mica mines, 1,404 surface wells and 998 tube-wells.

The West Bengal State Electricity Board has started distributing D.V.C. power to various industries, distributing licences and other consumers and upto March 1954, electrified seven coal-mines, 17 towns and 22 villages.

The annual gross revenue from power during 1957-58 was Rs. 3.49 crores and in 1958-59 it is estimated to be Rs. 4.49 crores.

With the completion of the Panchet Dam by June 1959, the four dams of the Corporation would provide as much practical flood protection as could be expected and be able to reduce pressure from the maximum of 650,000 cu-secs so far experienced to 250,000 cu-secs, around Burdwan. Actually the four dams controlled the unprecedented flood of September 1958 in the Damodar and the Barakar rivers and reduced the flow to 205,000 cu-secs at the Durgapur Barrage where the peak flow would have been of the order of 665,000 cu-secs but for the dams i.e. well beyond the bank-full capacity of the river.

Considering that the work on the D.V. Project was nearing completion, the D.V.C. Act was amended by an Act of Parliament on 24th Dec 1957 in order that the Corporation may be constituted of part time members if necessary.

Hirakud Dam Project (Orissa).—The Hirakud project was formally opened by the Prime Minister on 19th Jan. 1957. Water from the dam now completed flowed into the Baraghar Canal, the central arterial canal, in July 1956 and water was available for irrigation in September 1956.

The project will irrigate 672,000 acres of land in Sambalpur and Bolangir Districts, and 1,967,000 acres in Cuttack and Puri Districts.

The project was started in 1948. The full project envisages the construction of three dams and two power houses, the first at the dam sight (already in operation) and the second at Chilplima, sixteen miles below the Hirakud Dam.

It will provide 232,500 kW of power.

The project was started in 1948 and will be completed in 1961.

By the end of October 1958, irrigation facilities were ready for an area of 2,41,983 acres. The total area under actual irrigation during 1957-58 was estimated at 2,18,000 acres.

Erection of all the four generating sets in Stage I of the project has already been completed and Hirakud power is now being supplied to Rourkela, Ferromanganese Factory at Joda, Cement Factory at Rajgangpur, Orient Paper Mill at Brajraj Nagar and many other industries in the districts of Cuttack, Puri, Sambalpur, Shenkanal, Sundergarh, Keonjhar, Mayurbhanj, Balasore and Bolangir-Patna. The maximum load developed upto the end of 1958 was 24,000 kW. The installed capacity was to reach the target of 1,23,000 kW by March 1958. Power from the project has been made available since March 1956.

The power will be utilized in the northern part of the State in the following Districts: Sambalpur, Sundergarh, Keonjhar, Mayurbhanj, Dhenkanal, Cuttack, Puri, Bolangir and Kalahandi.

Out of the estimated cost of Rs. 70.78 crores (inclusive of Rs. 1.80 crores spent on Stage II before 1953), a sum of Rs. 59.8 crores was spent upto the end of December 1958.

More details are given below.

The Main Dam 3 miles long flanked with 6½ mile length of dykes on the right side and 6 mile length of dykes on the left in five gaps stretching across low valleys, is essentially a rolled-filled earth dam with two spillways of 1,251 and 971 ft length and Power dam portion of 948 ft length. The spillways contain 64 under sluices of 20' × 4' × 12' and 34 crest bays of 51' × 20', their combined discharging capacity being 1.5 million cu-secs.

The dam is a concrete-cum-masonry-cum earth dam. The maximum height of the concrete dam is about 200 ft of the earth dam 195 ft.

The first stage, which involves the construction of the longest dam in the world, consists of a concrete-cum-masonry-cum-earth dam across the Mahanadi river 9 miles upstream of Sambalpur, the canal on either bank and Hydro Electric installations. The work was started in 1948 and consists of 17 mile long dam and dykes involving 660 million cft. of earth work, 23 million cft. of concrete and 15 million cft. of masonry.

The reservoir created by the dam and dykes will have a capacity of 6.6 million acre ft. of water covering an area of 298 sq. miles. Three flow canals (one from the right dyke and two from the left) will irrigate 6.72 lakh acres in the districts of Sambalpur and Bolangir-Patna. The length of the main canals and branches will be 91.5 miles with 460 miles of distributaries and minors, and 3,000 miles of water courses.

The power from the project will be utilised for giving power not only to the various towns but also to rural areas for which purpose a large system of 22 and 11 K.V. lines are being constructed; power will also be given for small industries and for domestic lighting.

The total estimated cost of the Hirakud Power Utilisation Scheme is Rs. 158.85 lakhs. This does not include the cost of Hydro-Electric works and machinery at Hirakud Dam and also the transmission of energy at 132 K.V. and 66 K.V.

As already mentioned, the whole project has three stages. The first stage consists of the main dam (so-called Hirakud Dam) with its power house for 123,000 kW installed capacity and canal systems at either flank. This stage is complete. The second stage consists of the Chilplima power scheme to develop 72,000 kW, sixteen miles below the main dam and a 57,000 kW unit at the main power house. This is expected

to be completed in 1961 and will cost Rs. 14 crores. The amount spent on this scheme upto end of December 1958 is Rs. 5.40 crores. The third stage aims at the construction of a weir across the Mahanadi above Waraj with canal systems in Puri and Cuttack districts and will cost Rs. 15 crores. This envisages to utilize the discharge from the upper power houses for irrigating an area of 10,80,000 acres annually in the delta.

The immediate benefit from the completion of the first stage will be an additional quantity of 5.6 lakh tons of foodgrains and 2.4 lakh tons of other commodities.

Kakrapar Weir and Canals Project (Bombay).—This Project is a part of the Lower Tapi Valley scheme. It was taken up for execution by the C.W. & P.C. (then known as C.W.I.N.C.) on behalf of the Government of Bombay and was inaugurated on November 1, 1946. It was handed over to the Bombay Government for further execution in June 1954.

The project proposed to be developed in two stages consists of a weir at Kakrapar on the Tapi River whence the Right and the Left Bank canals are taken off to irrigate an area of 5,62,000 acres of seasonal crops in Surat District on the run off of the river. The headworks comprising the weir about 2,039 feet long and 45 feet high above the deepest river bed, the head regulators for the canals and the afflux bunds were completed in the middle of 1953. The Left and Right Bank canal systems comprising the main canals, branches, and distributaries have a total length of 819 miles. These canals are intended to increase food production by 1.6 lakh tons and cotton by 16,000 tons. The work on the main canals is at an advanced stage of construction and that on the branches, mains and minors, etc. is in full swing. Irrigation has already commenced on a part of the area on the left bank canal.

The Right Bank Canal was commissioned in November 1958.

The project which was estimated to cost Rs. 6.26 crores is under revision and is expected to cost about Rs. 18.68 crores. The project will be completed during the Third Plan.

It is also proposed to construct a storage reservoir on the Tapi river, upstream of the Kakrapar weir, in Songad taluka of Surat district to hold a storage of 6.2 M.A. ft. This will be used for assuring supply to 5.62 lakh acres of irrigation planned on the Kakrapar weir and canal project, and will in addition bring new areas to the extent of 3.91 lakh acres including perennials under irrigation on Ukai right and left bank canals in Surat and Broach districts.

The Ukai Dam has great potentialities of development of cheap and economical H.E. power. It will be possible to generate from the storage 110 kW of firm power at 60 per cent load factor. Incidentally, the project will also afford partial flood relief to the flood affected areas of the Tapi river below Ukai. The cost of the full project i.e. for irrigation as well as power on the present estimation will be Rs. 60 crores. A provision has been made for the irrigation part of the project in the Second Plan.

Tungabhadra Project (Andhra, Mysore).—This Project was originally sanctioned by the Governments of Madras and Hyderabad which had territorial jurisdiction over this area at that time, primarily as a famine relief measure. Work on the Project was commenced in 1945 by the Governments of these two States.

It is now being executed by the Governments of Andhra Pradesh and Mysore States which have become successors to the Governments of Madras and Hyderabad in respect of this area on account of the re-organisation of States in India.

The Government of Mysore is solely in charge of the execution of the Project on the northern side of the Tungabhadra River.

On the southern side the Tungabhadra Board constituted under the directive of the President of the Indian Union, is in charge of all common works relating to Mysore State and Andhra Pradesh, and the respective States are in charge of other works in which only the concerned States are interested.

The Tungabhadra Reservoir is 146 square miles in extent and has a capacity of nearly 3.1 million acre feet at the full Reservoir level of plus 1633.

The Tungabhadra Dam across the river Tungabhadra at Mallapuram in Bellary District (Mysore) is 7,942 feet long and 162 feet high at the deepest foundation. There is only one canal on the northern side. This is expected to irrigate about 5,80,000 acres in Mysore State.

There are two canals on the southern side of the river—the Low Level Canal and the High Level Canal.

The former has already been executed and preliminary works in respect of the latter are in hand.

The area irrigated on the southern side is as follows: From the Low Level Canal, Andhra 1,87,000 acres and Mysore 92,000 acres. From the High Level Canal (it is anticipated) Andhra 2,68,500 acres, Mysore 1,86,500 acres.

The areas irrigated from the Low Level Canal in Mysore are in Bellary, and in Andhra Pradesh in Kurnool. The areas irrigated from the High Level Canal in Mysore are in Bellary, and in Andhra Pradesh in Kurnool, Anantapur and Cuddapah.

The High Level Canal will irrigate 3.83 lakh acres land in Bellary in Mysore, Anantapur, Cuddapah and Kurnool districts in Andhra Pradesh.

The 217 mile Low Level Canal, taking off from the right bank, accommodates 2,500 cusecs of water, feed the canal power house at Hampi and irrigates large tracts of land in Andhra Pradesh. The area commanded by the canal is 5.6 lakh acres from which 2.5 lakh acres of land in Bellary district of Mysore and Kurnool district of Andhra can avail supply. The Left Bank Canal takes off from the irrigation-cum-power sluice on the Munirabad side and irrigates 5.8 lakh acres in Mysore State.

Only areas in Mysore are irrigated by the Northern Canal and these are in Raichur Dt.

When completed, the Hydro Electric Scheme on the southern side will consist of 2 Power-houses with 4 generators, each of 9,000 kW capacity making an aggregate of 72,000 kW. The first station is near the Dam and the second about 13 miles along Canal.

The first and the second generators at the Dam power house were commissioned in January 1957 and May 1957 respectively, and the first and second generators at the Canal Power house were commissioned in February and March 1958 respectively.

The balance of four generators in the two power houses will be installed later.

On the northern side of the Project, it is initially proposed to have one power house near the Dam with 4 generators of 9,000 kW capacity each. The civil works relating to this power house are in progress. This power house is expected to be commissioned in 1960-61. It is also proposed to develop later power houses along the Canal.

The expenditure on the northern side of the river will be borne solely by the Government of Mysore.

The expenditure on the southern side for the works executed by the Tungabhadra Board, is

tentatively being shared between the Governments of Andhra Pradesh and Mysore State in the following ratio:

	ANDHRA PRADESH	MYSOORE STATE
Headworks and Low Level Canal	5	4
High Level Canal	65	35
Hydro-Electric Scheme	80	20

The expenditure on the works which are being executed by the Board is as indicated below:

Headworks and Low Level Canal: Rs. 18.52 crores. Hydro-Electric Scheme: Rs. 7.12 crores. High Level Canal: Rs. 21.9 crores.

The Tungabhadra Dam proper was completed in July 1953 except for the installation of spillway gates in the spillway section. This work along with other works e.g. construction of utility towers, concreting the road on the top of the dam etc. have been completed in all respects.

The water for irrigation on the northern side Canal, and on the Low Level Canal on the southern side has been supplied from 1st July, 1953.

Work on the northern side Canal in its length of 127 miles is in progress, about 50% of the work having been completed; the balance is expected to be completed by 1960-61.

Work on the Low Level Canal with entire length of 217 miles, is as already mentioned fully completed.

The preliminary work on the High Level Canal Scheme has been taken up. The actual execution of works was expected to be taken up only on receipt of specific sanction from the Government of India.

The irrigation supplied by water in the southern side of the Project will yield 1.40 lakh tons of food grains and 80,000 tons of commercial crop mostly cotton. Similarly the canal on the northern side will also yield 2 lakh tons of food grains and 2.20 lakh tons of commercial crop consisting mostly of cotton and groundnut.

The estimated cost of the entire project (northern and southern sides) is about Rs. 60 crores which will ultimately add a total of about Rs. 30 crores per annum to the national wealth in the shape of food and industrial production.

Kosi Project (Bihar).—At first the Kosi project envisaged the construction of a dam of the unprecedented height of 783 feet above rock foundations on the Kosi river, a mile upstream of Barahachetra in the Kosi gorge for flood control, power, irrigation, navigation, soil conservation, silt control, fish culture and recreation, etc. The total scheme was to cost Rs. 177 crores, but in view of the prohibitive cost and the long time required for its execution, this plan was abandoned and further investigations to tame Bihar's 'River of Sorrow' were started.

The present scheme estimated to cost Rs. 44.76 crores was prepared by the Central Water & Power Commission in November 1953. The expenditure on the Project upto the end of December 1957 was Rs. 9.48 crores.

The Project consists of four different units as follows:—

(a) Unit I—Hanumannagar Barrage and Head works: This is estimated to cost Rs. 16.79

crores. The barrage is to be constructed about 80 miles below Chitra in Nepal where the river debouches into the plains from the gorge. It consists of a main spillway 3,769 ft. long, with earth dams about 15,500 ft. long on both the flanks connected to two afflux lands 8 miles each on either banks of the river. The functions of the barrage are (i) to arrest coarse silt and flatten the gradient of the river above, (ii) to provide for irrigation of 14 lakh acres and (iii) to develop power that is possible with the available head (The earthquake safety factor adopted in the design of the Barrage is 0.15 g horizontal and 0.10 g vertical.)

(b) Unit II—Flood Banks and Protective Measures: The estimated cost for this is Rs. 11.35 crores involving construction of 75 miles of embankment on the western side below barrage and 68 miles on the eastern side. Besides, a flood bank of 12 miles above the east afflux bund in continuation is also provided. The purpose is to restrict the flood waters between the the embankments, thus preventing the usual spill, and also to stop farther westward translation of the river Kosi.

(c) Unit III—Eastern Kosi Canal System: The canal system at an estimated cost of Rs. 16.42 crores is proposed to have an annual irrigation of about 14 lakh acres in the districts of Purnea and Saharsa.

(d) Unit IV—Hydro-Electricity: A provision of Rs. 1.32 crores has been made for this. It is expected about 15,000 kW can be generated, but the exact scheme is yet to be finalised.

The work on the project is to be implemented by the Government of Bihar. The Central Government will render necessary technical assistance.

The flood banks were taken up for construction first and work near Nirmali on the western embankment was inaugurated by the Chief Minister of Bihar on 14th January 1955. The work on the eastern embankment near Supaul was commenced on 3rd February 1955.

The work on the embankment which was partly done by the local villagers and the Bharat Sewak Samaj was almost completed by the end of March 1954. The preparatory work in respect of the construction of the barrage have been completed. The digging of canals was also taken up in 1957. The project is expected to be completed by 1962-63.

The definite improvement in the economic condition of the people as a whole in the Kosi area, as a result of the Kosi Project, has been brought out by the figures regarding area sown, agricultural output, wells dug and renovated, turnover of the shops, etc. The net area sown per village increased from 619.28 acres, 940.14 acres and 798.09 acres in 1954-55 to 709.02, 946.67 and 840.90 acres in 1955-56 respectively for villages in Supaul, in Nirmali and in the Kosi area as a whole. Paddy output increased from Rs. 6,106.60, Rs. 51,024.00, Rs. 29,585.35 per village in Supaul, Nirmali and in the Kosi area as a whole to Rs. 10,171.28, Rs. 109,524.08 and Rs. 59,847.65 respectively in 1955-56.

While, in 1954-55, a Kosi worker family had a deficit of nearly Rs. 87, in 1955-56 it had gained a surplus position with a surplus over expenditure of nearly Rs. 37.

Rihand (Piper) Dam and Power Station Project (Uttar Pradesh).—This Project is proposed to impound 8.6 million acre feet of water by a 296 feet high dam across the river Rihand, a tributary of the Son, near the village of Piper in Mirzapur Dt. The powerhouse will have five generating sets of 50,000 kW each and a total installed capacity of 250,000 kW. It

will also bring under irrigation about 14 lakh acres of land in U.P. and about 5 lakh acres in Bihar by means of about 4,000 tube-wells.

The estimated cost of the scheme including transmission and transformation, is about Rs. 45.27 crores. Expenditure upto the end of November 1957 was about Rs. 9.40 crores.

The project is under construction and is expected to be completed in 1961.

Nagarjuna Sagar Project (Andhra).—The project in its first stage comprises the construction of a masonry dam 330 feet high above average foundation level and 4,780 ft. long including spillway of masonry dam, across the Krishna river near Nandikonda village in Nalgonda District, about 90 miles below Siddeswaram, and two canals taking off from the reservoir, known as the left and the right bank canals. The dam is situated about ten miles from Machilira railway station. Large areas extending between the Krishna and the Godavari in the north and the Krishna and the Pennar in the south can be commanded by the reservoir.

The right bank canal which will be 135 miles long will carry a discharge of 11,000 cusecs in the first stage. The left Bank Canal will be 108 miles long and will lead up to the river Musura in the first stage.

The storage capacity of the reservoir will be 5.44 million acre feet.

Work was started in Dec. 1956, and the project is expected to be completed by 1964.

The cost of the first Stage of the project, namely, construction of the dam and the two canals is estimated to be about Rs. 91 crores. The total area to be benefited by the project will be 20.6 lakh acres of land spread over the districts of Guntur, Kurnool, Nellore, Warangal and Nalgonda.

The second Stage of the project which will be taken up later will provide for the generation of electric power of 75,000 kW capacity.

The total expenditure incurred for the Project upto the end of December 1957 was Rs. 10.73 crores.

Chambal Project, Stage I (Madhya Pradesh and Rajasthan).

The full development consists of:—

- Three dams across the Chambal River with a power-station at each dam site.
- High tension transmission lines for power transmission to various substations in Madhya Pradesh and Rajasthan.
- A barrage across the river near Kota city to divert the water from the storage and power dams into irrigation canals.
- A net-work of irrigation channels on either bank of river fed from the Kota barrage.

The revised estimated cost of the whole scheme is Rs. 9,027.21 lakhs and the scheme was expected to generate 2,21,000 kW of hydro-electric power, and irrigate 14 lakh acres of land annually in Madhya Pradesh and Rajasthan.

The scheme was proposed to be taken up in three stages, keeping in view the immediate demand for irrigation and a gradual development of power demand. The details of the stages namely the achievements upto September 1956 are as under:—

STAGE I.

The first stage envisages the construction of Gandhi Sagar Dam with power station, Kota Barrage and Canal system. The stage is estimated

to cost Rs. 6,880.37 lakhs and the details in brief on each of these items are as under:—

The Gandhi Sagar Dam which is situated at a distance of 4.5 miles down stream of the Channraigarh Fort is being constructed at the boundary of Rajasthan and Madhya Pradesh States to create a reservoir having a gross capacity of 6.85 million acre feet at the cost of Rs. 1,390.25 lakhs. Nearly 66 per cent of excavation for foundation and 45 per cent of masonry and concrete work on this irrigation-cum-power dam have been completed at an expenditure of Rs. 814.29 lakhs. The Gandhi Sagar Power station which is estimated to cost Rs. 479 lakhs is another work which will generate nearly 92,000 kW of hydro-electric power on completion.

The excavation work on this power station has already been completed and nearly 71 per cent work of masonry and concrete is still to be completed. The total expenditure incurred so far is Rs. 84.32 lakhs.

Kota Barrage which is situated about 32 miles down stream of Gandhi Sagar Dam and about half a mile above the Kota city, is being constructed by the Rajasthan Government to store the released water from the dams and to divert this water into irrigation canals. The construction work on this Barrage, which will be 1,970 ft. long and 120 ft. high, is in progress and nearly 93 per cent, 96 per cent and 48 per cent of rock cutting, stone masonry and concreting work respectively have been completed at an expenditure of Rs. 2.39 crores. The total estimated cost for this work is Rs. 882.55 lakhs.

The two canals namely Right Main Canal and Left Canal which have the gross commanded area of 24.03 lakh acres and 4.81 lakh acres to provide the annual irrigation of nearly 11.4 lakh acres and 2.6 lakh acres respectively, take off from Kota Barrage. The construction work on these Canals is in progress and 81 per cent, 61 per cent and 90 per cent of rock cutting, masonry and concrete and earth work have been completed in case of left canal and in case of right main canal 78 per cent, 64 per cent and 81 per cent work of the same type has been done so far in Rajasthan portion. In Madhya Pradesh 57 per cent of Rock Cutting, 27 per cent of Masonry and Concrete and 31 per cent of Earth work have been completed on right main canal. The total expenditure of Rs. 968.59 lakhs (Rs. 448.66 lakhs for Rajasthan and Rs. 499.93 lakhs for Madhya Pradesh) has been incurred so far as against the total estimated cost of Rs. 2,039.70 lakhs.

The works are already in progress and are expected to be completed by 1962-63.

STAGE II.

- Construction of the Rana Pratap Sagar Dam and the Bhopal Power Station below it to generate 84,000 kW of power at 60 per cent load factor, and suitable extension of transmission lines and substations at an estimated cost of Rs. 1,667.84 lakhs. These works were expected to be started in 1956-59 and completed in 1963-64. This will enable irrigation of a further 3 lakh acres in addition to the generation of extra power.

STAGE III.

This covers for a further development of hydro-electric power by building the Kota Dam about 10 miles upstream of the Kota Barrage with a power station to generate 45,000 kW of power at 60% load factor, and a further extension of transmission lines, etc., at an estimated cost of about Rs. 10 crores. The work on these items has not been taken up as yet.

(a) Below 500 acres.

FLOOD CONTROL

Enormous damage has been caused by floods in India during recent years. The total damage from 1950 to 1956 alone was of the order of Rs. 3,230 million excluding the loss of human beings and cattle and disruption of communication. The relief and rehabilitation expenditure during the same period amounted to Rs. 500 million.

The Government of India, therefore, formulated in 1954 a comprehensive phasal programme, i.e., immediate, short-term, and long-term, of flood protection works.

In the first phase (covering a period of two years), investigation and collection of data, preparation of comprehensive plans, designs and estimates for short-term flood protection works were to be started. During the second phase (covering the next 4 to 5 years), flood control measures, such as, the improvement of embankments and channels will be undertaken. In the third phase, long-term measures such as the construction of storage reservoirs and additional embankments on certain rivers would be done.

The Central Flood Control Board was constituted under the chairmanship of the Union Minister for Irrigation and Power. Its function is to consider schemes proposed by the States and draw up a national flood control programme. Flood Control Boards were also set up in the 12 States except two, Madras and Rajasthan. In addition, four River Commissions, viz., the

Brahmaputra, the Ganga, the North-West Rivers, and the Central Indian Rivers were constituted under the chairmanship of the Chairman of the Central Works and Power Commission to deal with inter-State rivers and basin problems as a whole. A Flood Wing with four Directors has been added to the Central Water and Power Commission. This will function as the technical secretariat to the Central Flood Control Board. It also co-ordinates all flood control works, prepares designs and assists in formulating integrated plans.

It has demarcated flood zones to prevent indiscriminate developmental activities and to stop encroachments on the bed of drainage channels. It has also recommended the levy of flood cess on the beneficiaries of flood control projects. Fifty-four schemes each estimated to cost over a million rupees, and involving a total expenditure of about Rs. 241 million have been approved by the Central Board. Besides, 477 other schemes (each costing less than a million and involving a total outlay of 99.5 million rupees) have been sanctioned in the different States and Territories.

It was reported that the Second Plan allotment for flood control may be pushed up from Rs. 60 crores to Rs. 66 crores.

Till August 1956, flood protection works executed gave protection to 50 lakh acres of land, 42 towns and 4,000 villages.

The Kosi embankment works, the best known of all, afforded protection to a population of 15 lakhs.

During 1955, fairly wide-spread damage occurred in Assam, West Bengal, Bihar, U.P., Punjab, Delhi and Andhra Pradesh. In other States the damage was relatively small. In general, concentrated heavy rainfall and, in a few cases, rainfall of abnormal intensities, as in Delhi and other parts of Andhra Pradesh, were the main contributory factors of floods.

Unprecedented damage occurred in the Vamsadhara, Nagavali, Sarada and Bhuda river basins of Visakhapatnam and Srikakulam districts of Andhra Pradesh.

The financial assistance given by the Centre to the States for flood control works, is in the form of 30-year loans (interest-free for the first five years).

STATES

The progress of flood protection work is described below:—

Andhra Pradesh: By the end of 1957 more than half of the excavation of the channel (for diverting half the flood discharge of Budmura river into the Krishna) had been completed in the Budmura Diversion Scheme.

Assam: Works for the protection of Dibrugarh, Dimaari, Sankuchi, Goalpara, Jangra, Maharkatiya, Nowong, Nilaspara, and Shole towns are completed.

Shifting of Palasbari town and works for the protection of Silohar and Tarabari towns are in progress. The construction of embankments (total earthwork 916 million c.ft.) along the Brahmaputra, the Barak and other rivers is completed. The completed works afford protection against floods to about 0.8 million acres.

For Dibrugarh protection works, the financial assistance given to the Government of Assam was Rs. 23.3 millions (half as grant and half as interest-free loan). Assistance for the other flood protection works is on the general pattern.

West Bengal: Minor schemes have been completed. A major scheme for the protection of the left bank of the Dina River below Kalabari is nearing completion. Works for the protection of Ramanah and Holaparki areas have been taken up.

Schemes already executed for the protection of Jalpaiguri, Cooch-Bihar, Mathabhanga, Alipurdwar, Sovaganj and Siliguri towns have withstood floods.

Bihar: In addition to the Kosi embankments, the length of embankments constructed along other rivers is about 700 miles, and earthwork done is about 1,500 million c.ft. These embankments saved an area of about 1.5 million acres, including large towns like Samastipur, Muzaffarnagar and Khagaria from inundation. Eight of the major schemes and all the minor schemes have been completed. Up to the end of 1954-55, the Government of Bihar had financed the expenditure on flood control works through loans obtained from the Central Government under the scheme of permanent improvements to scarcity affected areas. Loans on the general pattern were granted to Bihar for protection works other than the Kosi Project.

Delhi: Raising and strengthening the left marginal bund along the Jamuna between the Delhi Railway bridge and the Okhla weir, was taken up on an emergency basis to protect Gandhinagar and other colonies against the

1957 floods. About three-fourths of the earthwork has been completed. The Shahdara bund and other protective works already completed withstood the floods well.

Jammu and Kashmir: The first phase of flood control works undertaken for the protection of Srinagar and the rural areas has made good progress.

Kerala: Two minor schemes (each estimated to cost less than Rs. one million) for protection works on the rivers Kililar, Manimala, and Pamba have been approved under the flood control programme.

Orissa: The Dalaghai protection works are completed. Work on the raising and strengthening of the existing embankments is in progress.

Punjab: The construction of apurs for the protection of Indaura town against erosion by the river Beas is completed and similar construction for the protection of Bhadpur village is in progress. Work on the canalisation of Naarala Choe, Kasur Nallah and Pattil Nallah is also progressing. A flood embankment on the right bank of the Beas is under construction.

Tripura: One major scheme for the protection of Agartala town from floods in the Haora river and 6 minor schemes for the protection of towns like, Udaipur, Sonamura, Khowal and Durgapura have been completed. A few minor schemes are under execution.

Uttar Pradesh: A scheme for the construction of embankments along the Ghaghra, the Ganga, and other rivers, for raising the level of village sites and for the protection of Banaras town (Ghats) is in progress. So far, 310 miles of embankments have been constructed and the level of 3,229 village sites have been raised. The embankments afforded protection to an area of half a million acres during the floods. Schemes for the protection of Anupahar and Kankhal towns are under execution.

The Central loans given to the States during 1956-57 and 1957-58 are as follows (in Rs. lakhs): Andhra: 14.25 and nil; Assam: 180 and 112; West Bengal: 210 and 70; Bihar: 375 and 268; Kashmir: 57.5 and 14; Kerala: nil and 5; Orissa: 80 and 49; Punjab: 722 and 128; Tripura: nil; U.P.: 525 and 284.

During 1956-57, loans sanctioned to State Governments amounted to Rs. 8.36 crores and in 1957-58 to Rs. 8.16 crores. The provision for 1958-59 is Rs. 8 crores.

FLOOD CONTROL COMMITTEE

A committee on floods was set up in 1957, to have an adequate assessment of the flood problem in the country and to make recommendations on the measures to be taken to tackle it.

The first volume of its report was published in December 1957. A summary of the recommendations in the second volume was given in the Lok Sabha on February 11, 1959.

The Committee lays stress on the necessity of preparing outline master plans for each river basin which is to be treated as a unit. The data collected so far are reviewed and future investigations indicated.

Faulty land use and destruction of forests are to be checked. Soil conservation has to be undertaken. Low-lying areas may be reclaimed by siltation. Villages may have to be shifted outside the flood courses of rivers. Embankments have to be constructed.

The present number of reporting, self-recording and non-reporting rain gauge stations (3,690; 84; 1,580 respectively) is inadequate. The number of gauge and discharge sites (780 and 669) is also too small. Each important tributary should have a gauge site near the foothills, in the middle reach and near the confluence with the main river. A rapid increase in the number of self-recording river gauges particularly where continuous record of gauge data are needed is also recommended.

FINANCE

SOURCES OF REVENUE AND EXPENDITURE

The principal sources of Central revenue are: customs duties, excise duties levied by the Central Government, corporation tax, income tax (excluding taxes on agricultural income), wealth tax, estate and succession duty, the earnings from the mints, terminal taxes on goods or passengers carried by railway, sea or air, taxes on railway fares and freights, taxes (other than stamp duty) on transactions in stock exchange and future markets, stamp duty on bills of exchange, cheques, bills of lading, letters of credit, insurance policies, transfer of shares, etc., taxes on sale and purchase of newspapers and on advertisements in newspapers.

The railways and the posts and telegraphs contribute to the Central revenues. There are also the profits on the Government industrial undertakings.

About as much as 80 per cent of the revenue is derived from the customs, excise duties, corporation and income taxes.

The principal sources of revenue for the individual States are: State taxes (on agricultural income, lands and buildings, minerals

rights, consumption or sale of electricity, sale or purchase of goods other than newspapers, advertisements other than in newspapers, goods and passengers carried by road or on inland waterways, vehicles, animals, boats, tolls, professions, trades, luxuries, amusements), opiate taxes, stamp duties, excise duties on alcoholic liquors, opium and other narcotics.

A point about the Sales Tax is worth mentioning here. The Union has the power of declaring any commodity as essential for the life of the community and thereby vetoing any sales tax levied on it by a State Government. This power comes from the Essential Goods Act of 1952.

Then there are the subventions from the Central Government. Part of the proceeds of the income-tax are distributed among the States. The jute growing States get part of the proceeds from the export duty on jute. There are also special grants which are made to certain States.

Collection and appropriation of taxes are not always vested in the same authority. Some taxes are levied by the Central Government but collected and appropriated by the States

(stamp duties, excise duties, duties on medicines and toilet preparations). Some are levied and collected by the Union but assigned to the States (succession and estate duties on property other than agricultural, terminal taxes on passengers, railway fares, freights, stock exchange, future markets, newspapers or advertisements). Corporation tax is collected and retained by the Union, but taxes on other incomes are levied and collected by the Union and distributed between the Union and States.

The two biggest items of expenditure of the Central Government are outlay on development programmes (capital account) and defence.

Three important heads of expenditure of the States under the revenue account are: irrigation, security and social services.

Then there is public debt, now almost wholly internal—the rupee debt. This may be divided into three classes, long term loans and money market liabilities, the unfunded debt which includes provident funds, postal deposits, saving certificates, and last the deposits.

The following table shows the budget estimates of the Government of India for 1959-60 as compared with the budget and revised estimates for 1958-59.

		REVENUE (IN LAKHS OF Rs.)		
		Budget 1958-59	Revised 1958-59	Budget 1959-60
Customs	170.00	136.00	130.00	+ 2.77

Loan from Japan	1.00	12.79
New loans to be negotiated	—	20.00
Total interest-bearing obligations	4,063.59	5,734.89

Assets

The interest-yielding assets are as follows (figures in crores of rupees):

Capital advanced to Railways	1,343.31	1,465.12
Capital advanced to other commercial departments	1,46.49	2,09.37
Investments in commercial concerns	4,16.71	4,61.00
Capital advanced to States	1,432.60	1,628.31
Other interest-bearing loans	2,99.21	4,90.25
Purchase of annuities for sterling pensions	20.64	20.03
Debt due from Pakistan	3,00.00	3,00.00
Total interest-yielding assets	3,994.96	4,574.08
Cash and securities held on Treasury account	57.61	55.76
Balance of total interest-bearing obligations not covered by above assets	9,07.02	1,105.05

CENTRAL HELP TO STATES

The following allotments to States are provided for in the 1959-60 budget (figures in lakhs of rupees)

Share of taxes and duties: 164.62
Grants and subventions from revenue: 156.54
Grants and subventions from capital: 22.10
Loans: 312.69
Grand total of allotments to States: 655.95

Important Lump sum grants to States are as follows (figures in lakhs of rupees).

Substantive provision of Article 275(1) of Constitution 36.25; provision to Article 275(1) 8.35, Article 273 of Constitution 3.15; Agricultural production 7.60; Community Development 14.74, National Extension Service 2.20; Education Schemes 16.18; Scientific and technical education 2.15; national malaria eradication 7.40; Welfare of backward classes 7.82; national employment service and training 4.61; development of handloom industries 3.00; rehabilitation of displaced persons 3.63; natural calamities 5.00

raising the emoluments of low-paid employees 16.45.

Lump sum loans as follows:

Irrigation and multipurpose river schemes 75.68, Miscellaneous Development 29.33, Agricultural Production, animal husbandry, etc. 49.65; Rehabilitation 10.37; Industrial Housing 14.59, Permanent improvement in scarcity areas 12.75, Natural calamities 49; Handloom and Small-scale Industries 1.00, Flood control schemes 5.35; urban water supply scheme 6.40; sharing of small savings 55.00, Other loans 46.75; Total loans 312.69.

ALLOTMENTS BY CENTRE STATE-WISE (1959-60)

The following table shows State-wise distribution of income-tax, etc. (figures in lakhs of rupees):

	Income-tax	Union Excise duties	Additional Excise duties	Estate Duty	Tax on Railway Passenger Fares
Andhra Pradesh	6.38	3.04	2.67	21	97
Assam	1.92	1.12	1.03	5	30
Bihar	7.62	3.42	1.93	18	1.02

Jammu & Kashmir	89	87	81	2	..

TAX CHANGES

The following are the new tax proposals :

DIRECT TAXATION

Income-Tax.—The sections of the Income-Tax Act dealing with company profits and dividends are sought to be amended on the lines mentioned by the Finance Minister in his speech to give effect to his revised scheme of taxation of company profits and dividends. These include the abolition of tax credit (S. 49 B(1), abolition of adjustment to tax credit (S. 49 C), abolition of grossing of dividends (S. 16 (2)), abolition of recovery from shareholders on account of non-payment of tax by companies (S. 35 (9)) and deduction of tax at source on dividends (S. 18).

Section 18-A of the Income-Tax Act dealing with advance payments of income-tax is proposed to be modified in its application to companies in view of the Finance Minister's proposals to revise the rates of tax on company profits from 1960-61. Indian companies will now pay during 1959-60, as advance payment of tax for 1960-61, 20 per cent. income-tax and 25 per cent. super. Foreign companies will pay as advance payment, 20 per cent. income-tax and 45 per cent. super tax.

Capital gains of companies are now to be subject both to income-tax and super tax instead of only to income-tax as at present but the total incidence is reduced from the present level of 31.5 per cent. to 30 per cent. At present capital gains of companies are subject to income-tax at 31.5 per cent but not to super tax. Under the new scheme, capital gains of companies will be subject to 20 per cent. income-tax and 10 per cent. super-tax.

The main points of this scheme are briefly these. The legal fiction of deeming the Income Tax paid by the company as having been paid by the shareholder and the complicated process of "grossing" the dividends received by the latter will be abolished. The over-all tax rate hitherto applicable to Indian companies will be so fixed that the yield will be equal to the present annual gross yield less the annual credit now given to the shareholders. The tax liability of the shareholders will no longer be related to the tax borne by the companies. So far as the shareholders are concerned, companies will deduct tax at a prescribed flat rate and credit it to Government. This tax will be re-imbursed to the shareholders at the time of their assessment as done today in the case of interest on Government securities. There will be a scheme for issuing exemption certificates for small shareholders so that the question of reimbursement does not arise in their case.

The scheme will be implemented in two stages. In the first stage, that is, during 1959-60, Income Tax will be deducted by the companies at the same rate as for Government securities from dividends distributed by them but only from dividends declared for the year the profits of which will be assessed to tax in 1960-61—for example, dividends declared for the year ending June 30, 1959. Dividends declared for any earlier year, the profits of which are assessable in 1959-60 (for example, dividends for the calendar year 1958) will not be subject to this deduction and will continue to be assessed under the existing provisions. During the second stage, that is during 1960-61, the overall tax rate applicable, to the companies under the scheme will come into operation. The present scheme of "grossing" of dividends will cease to operate from April 1, 1960 in respect of dividends declared for the accounting year relevant to the assessment year 1960-61 and subsequent years.

As part of the scheme of simplification of company taxation, it is proposed to combine in the Income Tax and super tax rates of companies, the net incidence of the present taxes on income, excess dividends and wealth. For purposes of advance payment of tax by companies under Section 18-A of the Income Tax Act, a rate of 20 per cent for income Tax and 25 per cent for super tax, that is to say, a total of 45 per cent, is proposed. This rate will secure the same revenue as is at present derived from the taxes on the

wealth and profits of companies and it is, therefore, proposed to abolish the Wealth Tax on companies and the Excess Dividends Tax.

The changes in company taxation will not affect the divisible pool of Income tax in the coming year. In 1960-61 a part of the tax now accruing to the pool may not, for technical reasons, be treated as divisible. It is Government's intention to secure that, until the matter has been examined by the next Finance Commission, the State Governments continue to receive as their share of income tax about the same amount which they would have received had this change not been made.

Foreign companies which declare dividends outside India will, of course, not be subject to the scheme, some adjustment is, however, necessary in the rates applicable to them on account of the withdrawal of the Wealth Tax on companies. The present rate applicable to such companies is 61.5 per cent. It is proposed to raise it to 65 per cent, with effect from 1960-61.

Before leaving the subject of company taxation, one further change effected is to be mentioned. While ordinary bonus issues are subject to tax, bonus issues which are made out of share premium accounts are not now taxed. With effect from 1960-61 these issues are also to be subjected to taxation like other bonus issues.

In view of the proposed new scheme of company taxation, Section 23-A companies (companies in which the public are not substantially interested) will be required, in order to avoid the penal provisions, to distribute as dividends 50 per cent. of their industrial profits and 65 per cent. of the non-industrial profits remaining after payment of tax. At present these respective percentages are 45 per cent. and 60 per cent.

A number of other changes have also been proposed in the Income-Tax Act.

At present income, accruing or arising outside India, but not remitted to India in the same year, is exempt up to a maximum of Rs. 4,500. This exemption is now to be abolished.

The present exemptions from income-tax to non-residents in respect of incomes arising out of India will not apply to salaries paid out of the public revenues of India (exclusive of all allowances and perquisites granted to meet the cost of having to stay abroad) irrespective of the period of a Government employee's stay abroad.

The company deposit scheme, which was suspended last year, is now proposed to be abolished.

The Government is to be empowered to enable it to give effect to its agreement with the Assam Oil Company, with which it is associated in prospecting, extraction and production of mineral oil for granting special allowances on account of exploration expenses, intangible capital expenses and depletion.

Wealth-Tax: Changes are also proposed in the Wealth Tax Act.

For the purposes of computation of wealth tax, taxes (1) outstanding and disputed by the assessee in appeals, and (2) outstanding otherwise for more than one year on valuation date will not be regarded as debts for deduction in computing the assessee's net wealth. This provision will have retrospective effect.

Income tax arrears on 31st March 1956, 1957 and 1958 were respectively (Rs. crores) : 233.59, 287.33 and 287.32.

This included demands not fallen due as follows (Rs. crores) : 46.71, 52.37, 52.66.

The total number of assesses with tax arrears of over a lakh was 2,776 on Sept. 30, 1958.

New Rate: The new rate of wealth tax, incorporating the half per cent. increase on all slabs, are :

On wealth above Rs. 2 lakhs and up to Rs. 12 lakhs for individuals (above Rs. 4 lakhs and up to Rs. 13 lakhs for Hindu undivided families)—one per cent. :

On wealth above Rs. 12 lakhs and up to Rs. 22 lakhs for individuals (above Rs. 13 lakhs

and up to Rs. 23 lakhs for Hindu undivided families)—1½ per cent.;

And on wealth above Rs. 22 lakhs for individuals (above 23 lakhs for Hindu undivided families)—2 per cent.

The existing flat rate of half per cent. on wealth of companies in excess of Rs. 5 lakhs will continue to apply during 1959-60.

As regards the Expenditure Tax Act, the definition of "dependant" is to be amended. The wife and children of an assessee are to be regarded as dependants whether they are wholly or mainly dependant on him for support and maintenance or not for the exemption limit of Rs. 30,000 in the matter of non-taxable expenditure and not as separate assesses if they have incomes in their individual rights. Any other person actually dependant on an assessee for support and maintenance, will also be regarded as dependant.

All the expenditure of a dependant is to be included in an assessee's expenditure irrespective of the source from which the dependant's expenditure has been met. Hitherto, only the expenditure met out of any gift donation or settlement or trust made or created by the assessee is to be included.

Expenditure Tax. Some of the existing exemptions and deductions for expenditure tax are to be modified. In respect of expenditure on repairs and maintenance of buildings, the expenditure incurred by way of repairs and maintenance in respect of owner-occupied property is to be treated as personal expenditure. Hitherto, the rent paid by an assessee for a residential house as also the money spent by him on its maintenance or repairs is treated as personal expenditure. But in the case of an assessee occupying his own house, not only is no adjustment made for the saving of rent in the computation of his expenditure but he is also entitled to claim exemption for personal expenditure against repairs and maintenance of the House. This anomaly is now to be removed.

Expenditure on bullion precious stones or jewellery which is at present completely exempt, will hereafter be treated on the same lines as expenditure on other articles for personal use. Such expenditure is charged to expenditure tax with the concession of its being distributed over a period of five years.

INDIRECT TAXATION

In the field of indirect taxation, the proposals are mostly by way of readjustments of rates and concessions in the existing duties of excise.

The duty on refined diesel oils and vapouring oils is being raised from 40 naye Paisa per imperial gallon to 80 naye Paisa. There is at present a price advantage in favour of diesel oil of which we have to import substantial quantities. Both as a measure of increasing revenue and conserving foreign exchange the proposed increase is justified. As a consequential adjustment, the rate of duty on low-speed diesel oil is also being increased from Rs. 40 per ton to Rs. 50 per ton, the total yield from these two measures will be Rs. 7.85 crores a year.

The duty on art silk fabrics is being raised from 8 pies per square yard to 6 naye Paisa per square yard. Simultaneously the exemption in the present form in respect of products of the first nine looms will be reduced to four looms. The increased levy is amply justified by the large profits which are made by the industry. The estimated yield will be Rs. 1 crore a year. The lowering of the exemption will also bring in Rs. 20 lakhs by way of additional duties which accrue to the States.

The rates of basic compounded duty on art silk fabrics have been revised consequent on the increase in the basic excise duty.

Per Powerloom per month	Existing Rate	Proposed rate
	Rs.	Rs.
(A) First shift ..	27	50
(B) Second shift ..	18	35
(C) Third shift ..	18	30

The rates of duty for warp-knitting machines will be double the rates for powerlooms.

The existing rate of duty on teas is re-adjusted so that teas grown in certain parts of Darjeeling and the Nilgiris will get relief of four nP. per pound against the existing duty of ten nP. per pound. It is now proposed that in Zone III-A, the duty will be eight nP. per pound and in Zone III-B, 12 nP. per pound.

Rayon Fibres: The duties on rayon and synthetic fibres and yarn have also been increased as follows:

Rayon Yarn: (I) below 75 deniers from Rs. 0-8-0 per lb. to Rs. 0 80 per lb.;

(II) 75 deniers and above but not above 100 deniers from Rs. 0-8-0 per lb. to Rs. 0-60 per lb.;

(III) Above 100 deniers from Rs. 0-4-0 per lb. to Rs. 0-40 per lb.;

Staple Fibre: Rs. 0-2-0 per lb. to Rs. 0 20 per lb.

The effective rates of duty on rayon yarn and staple fibre are also being raised by 60 per cent. to yield an additional Rs. 60 lakhs.

(56) The duty on motor vehicles tyres is being raised from 80 per cent. ad valorem to 40 per cent. ad valorem. There will be no change in the rate of duty on cycle tyres. The additional revenue is estimated at Rs. 1-75 crores.

An increase is also being made in the duty on vegetable product which will increase from Rs. 7 per cwt. to Rs. 8 75 per cwt. with a corresponding adjustment in the exemptions in favour of the small producers. The additional revenue will be Rs. 96 lakhs.

Vegetable non-essential oils were first subjected to excise in 1956, but some preference to medium and small scale producers was given by exemption of production up to 125 tons per annum on a slab basis. In 1957 the free slab was brought down to 75 tons and lower rate of duty levied on production between 75 tons and 125 tons. These concessions have been reviewed and it is now proposed to withdraw the exemption from all power driven units and limit the concessional levy to only the first 75 tons of production. These changes, which will be made by notification and will not affect village plants in any way, are expected to yield Rs. 4-4 crores.

Sugar Margin: Khandari sugar is now exempt from excise duty but pays the usual sales taxes. There has always been a fiscal preference in favour of this sugar but, with the recent substantial increases in the duty on crystal sugar, this preference has further widened resulting in the shift of production to this form of sugar. There are cogent reasons for reducing the margin and this is being done by the levy of the basic duty of Rs. 5-60 per cwt., with an additional duty of 70 naye Paise in replacement of the sales taxes. The basic duty will yield Rs. 1-82 crores and the additional duty, which will accrue in its entirety to the States, Rs. 25 lakhs.

Certain adjustments are also being made in the duty on various kinds of cigarettes involving an increase of 16 per cent in the level of duties for cigarettes taken as a whole. These adjustments are expected to yield a revenue of Rs. 1-5 crores.

Tobacco Revision: Incidentally, the present tariff on unmanufactured tobacco has led to some diversion to biri-making of tobacco which was previously used for hookah. There are powers to assess at the higher rate such varieties of tobacco as may be specially notified and as are actually used for the making of biri.

(62) The incidence of excise and export duties on tea has been under continuous review. It has been decided to readjust the rate of Excise duties on the teas grown in certain areas of the country and to reduce, at the same time, the effective rate of export duties from 86 naye Paise per lb. to 24 naye Paise per lb. These changes will result in an additional revenue of Rs. 58 lakhs under Union excise and a reduction of Rs. 93 lakhs in the yield from the export duty. In the net, the industry will benefit to the extent of Rs. 35 lakhs.

The total additional revenue from the various measures just mentioned will amount to Rs. 20-85 crores from the basic duties and Rs. 45 lakhs from the additional duties in replacement of sales taxes which accrue to the states,

As the reader is aware, the basic duties on tobacco, vegetable product, tea, sugar and vegetable non-essential oils are shared with the States in accordance with the award of last Finance Commission. Twenty-five per cent. of the net additional revenue from these commodities will have to be distributed to the States after deducting the cost of collection. This payment will be of the order of Rs. 2-27 crores. Allowing for this and for the additional duties to be paid to them, I am taking the net additional revenue from changes in union excise duties at Rs. 18-08 crores.

As regards the Customs Act the Customs duty on cinematograph films unexposed is to be increased from Rs. 1-75 per 100 linear feet at present to Rs. 2 per 100 linear feet. The increased revenue is to be used to finance the Film Finance Corporation.

The Customs duties on imports of rubber tyres and tubes for motor vehicles, diesel oils not otherwise specified, high speed diesel oil, art silk fabrics, staple fibre and art silk yarn are also being increased in line with the increased excise duties on these commodities produced within the country.

The export duty on tea is being reduced by notification from 26 nP. per lb. to 24 nP. per lb. as a measure of relief to common teas and to improve the competitive position of Indian teas in foreign markets.

The net effect of the taxation proposals are summarised here. The changes in the Union excise duties, excluding the share that accrues to the States, will yield Rs. 18-08 crores. The changes in Customs duties will bring in Rs. 2-77 crores and the increase in the Wealth Tax Rs. 2-5 crores, a total of Rs. 23-35 crores. This will reduce the deficit on revenue account from Rs. 81-67 crores to Rs. 58-32 crores, about the same amount as in the current year which is

left uncovered. The overall budgetary deficit will also be reduced from Rs. 245 crores to Rs. 228 crores.

OTHER CHANGES

Certain changes made in the 1959-60 budget are given below:

Compulsory Deposit Scheme: The scheme which was in operation during 1957-58 but was suspended during 1958-59 has been abolished.

Section 23A Companies: The rate of tax in respect of high dividends above 18 per cent. by Section 23A Companies continues to be 20 per cent. Hitherto, these companies were required in order to avoid the penal provisions of the Section, to distribute as dividends at least 45 per cent. of industrial profits and 60 per cent. of non-industrial profits remaining after payment of tax. These percentages have been raised to 50 and 65, respectively, with a view to ensuring that the profits retained by these companies after the introduction of the new scheme remain, without being subjected to penal tax, at the same level as before the introduction.

Development Rebate: If the total income for any year before allowing development rebate falls short of the full amount of rebate, the rebate to be allowed for that year will be limited to such total income. The balance of the rebate will be allowed to be carried forward for being claimed in the succeeding year or years. The number of years for which it can be so carried forward will, of course, be restricted to eight, which is the number of years for which unabsorbed losses can be carried forward under the present law.

The amount to be taken to the reserve need not exceed 75 per cent. of the amount of the rebate claimed.

The double depreciation allowance has lapsed with effect from the financial year, 1959-60.

EXCISE

The following are the details of revenue from Union excise duties in lakhs. of rupees:—

Basic Excise Duties.	1957-58	1958-59	1959-60	1960-60
	Accounts	Budget	Revised	Budget
Motor Spirit	30,85	32,00	32,39	33,25
Kerosene	3,08	3,45	4,20	5,08
Sugar	42,75	42,00	46,00	46,00
Matches	16,08	15,83	17,70	18,00

Additional Excise Duties				
Sugar	12,18	12,66	12,66
Textiles	21,90	21,19	21,19
Tobacco	7,40	7,10	7,10
Total	2,61	41,48	41,15	42,15
Grand Total—Union Excise Duties	2,73,62	2,64,70	2,61,15	2,67,91

CUSTOMS

The import tariff is cast in the form of a commodity schedule with broad distinctions indicating the treatment to be accorded to various classes of articles. The general rate of import duty is now about 35 per cent. On certain non-essential items where it is felt that the consumer can well pay a higher rate or where there is sufficient indigenous production to meet the country's needs, higher rates of duty are imposed.

The trend of revenue from customs is given below :—

Year	(Rs. in lakhs)
1940-51	187.15
1951-52	231.09
1952-53	173.75
1953-54	153.71
1954-55	164.87
1955-56	166.70
1956-57	173.23
1957-58	179.99
1958-59 (Budget)	170.00
1958-59 (Revised)	136.00
1959-60 (Budget)	132.77

INCOME-TAX

Income-tax is levied now not only on income as ordinarily understood but also on certain capital receipts which have been included in a special definition of "income." Tax at the rate fixed for the year of assessment is charged on the income of the "previous year." Both income-tax and super-tax are levied according to the slab system.

The more recent trend of collections is given below :—

1949-50 (Accounts) ..	Rs. 161.11	crores
1950-51 (Accounts) ..	173.23	"
1951-52 (Accounts) ..	167.60	"
1952-53 (Accounts) ..	155.23	"
1953-54 (Accounts) ..	164.38	"
1954-55 (Accounts) ..	156.59	"
1955-56 (Accounts) ..	166.80	"
1956-57 (Accounts) ..	202.92	"
1957-58 (Accounts) ..	219.83	"
1958-59 (Budget) ..	217.00	"
1958-59 (Revised) ..	218.50	"
1959-60 (Budget) ..	225.00	"

While the Corporation tax accrues in its entirety to the Centre, the net proceeds of income-tax, except the tax attributable to Central enclaves and Union territories and any Central surcharge, are divisible between the Centre and the States. Sixty per cent of the net proceeds of such income-tax is paid to the States.

The percentage share of the different States is as follows :

Uttar Pradesh 10.36; Bombay 15.97; W. Bengal 10.98; Bihar 9.94; Madras 6.60; Andhra Pradesh 5.13; Mysore 6.73; Mysore 8.14; Punjab 4.55; Rajasthan 4.08; Orissa 3.75; Kerala 3.66; Assam 3.44; Jammu and Kashmir 1.13.

GUIDE TO TAXES ON INCOME (1959-60)

The following table gives the rates of tax (income-tax, super-tax and surcharge included) applicable to 1959-60 in percentages :

Slabs of Income	1959-60	Earned	Unearned
0 - 1,000	nil	nil	nil
1,001-2,000	nil	nil	nil
(A) Married individuals and Hindu undivided families	nil	nil	nil
(B) Others	4.91	3.15	3.6
2,001-3,000	4.91	3.15	3.6
(A) Married individuals and Hindu undivided families:	4.91	nil	nil
(B) Others	4.91	3.15	3.60
3,001-4,000	4.91	3.15	3.60
4,001-7,500	11.43	6.3	7.20
7,501-10,000	14.78	9.45	10.80
10,001-12,500	21.33	11.55	12.30
12,501-15,000	21.33	14.70	16.80
15,001-20,000	26.25	18.90	21.60
20,001-25,000	33.81	31.50	36.00
25,001-30,000	45.94	42.00	48.00
30,001-40,000	45.94	47.25	54.00
40,001-50,000	59.06	57.75	66.00
50,001-60,000	65.60	63.00	72.00
60,001-70,000	72.19	68.25	78.00
70,001-80,000	78.47	73.50	84.00
80,001-90,000	78.75	73.50	84.00
90,001-100,000	82.08	73.50	84.00
100,001-120,000	85.81	77.00	84.00
120,001-150,000	88.61	77.00	84.00
Over Rs. 1,50,000	91.67	77.00	84.00

COMPANY TAX

Classes of Companies	1959-60		Applicable to 1958-59	
	Income tax and Surcharge	Corporation tax	Income tax and Surcharge	Corporation tax
1. Companies which have made prescribed arrangements for the declaration and payment in India of dividends, and for the deduction of super tax from dividends paid to non-resident shareholders:				
(A) Companies in which the public are substantially interested with total income not exceeding Rs. 25,000/-				
(i) On dividend income derived from a subsidiary Indian company	26.25	11	31.5	10
(ii) On the balance of income	26.25	11	31.5	15
(B) Other Companies :—				
(i) On dividend income derived from a subsidiary Indian company	26.25	17	31.5	10
(ii) On the balance of income	26.25	17	31.5	20
2. Companies which have not made the prescribed arrangements referred to in (i) i.e. foreign companies:				
(i) On dividend income derived from a subsidiary Indian company	26.25	20	31.5	10
(ii) On the balance of income	26.25	20	31.5	20

The changes in the scheme of corporation tax as proposed in the budget of 1959-60 are detailed under "Taxation Proposals."

CORPORATION TAX

Excess Dividends tax has been abolished. Tax on bonus shares continues to be 30 per cent.

The sections of the Income-tax Act dealing with company profits and dividends are sought to be amended on the lines mentioned by the Finance Minister in his speech to give effect to his revised scheme of taxation of company profits and dividends.

These include: the abolition of tax credit—S. 49 B(1), abolition of adjustment to tax credit—S. 49 C, abolition of grossing of dividends—S. 16 (2), abolition of recovery from shareholders on account of non-payment of tax by company—S. 35 (9), and deduction of tax at source on dividends—S. 18.

Section 15 A of the Income-tax Act dealing with advance payments of income-tax is proposed to be modified in its application to companies in view of the Finance Minister's proposals to raise the rates of tax on company profits from 1960-61. For details, please see "Taxation proposals".

ESTATE DUTY

The question of levying an estate duty had been before the Government of India since 1946 when a bill was first introduced. This as well as the one introduced in 1948 lapsed. In August 1952, a third bill was introduced with the object of imposing an estate duty on property passing or deemed to pass on the death of a person. The underlying idea is to rectify to a large extent unequal distribution of wealth and to assist the States towards financing their development schemes. The Bill was passed in Parliament in September 1953. The Act came into effect from October 15, 1953 and is applicable to the whole of India, except the State of Jammu and Kashmir.

The main features of the Act are that the levy of duty depends on the domicile of the deceased, the power to assess duty is vested in the Controller of Estate Duty, and the scale of duties is stipulated in the law itself. The Estate Duty proceeds go almost entirely to the States and do not affect the Central Budget. Pending the recommendations of the Finance Commission, a provisional distribution was made on the basis of the States' share of income-tax. The Commission in their Interim Report also recommended the distribution of Estate Duty for 1957-58 on the same basis, pending re-adjustment in the light of their final recommendations.* Like the Income-tax law, this legislation also provides for exemption limits and defines what items are eligible for exemption and to what extent.

The minimum exemption limit provided in the Act is Rs. 50,000 in respect of property which consists of an interest in the joint family property of a Hindu family governed by the Mitakshara, Marumakkattayam or Aliyasantana Law as well as in respect of all other property. The rates of duty are given below:—

Principal Value of Estate.	Rate of Duty.
<i>In the case of Joint Hindu Family property governed by Mitakshara, etc., law:</i>	
On the first Rs. 50,000	Nil
On the next Rs. 50,000	5%
On the next Rs. 50,000	7½%
On the next Rs. 50,000	10%
On the next Rs. 1 lakh	12½%
On the next Rs. 2 lakhs	15%
On the next Rs. 5 lakhs	20%
On the next Rs. 10 lakhs	25%
On the next Rs. 10 lakhs	30%
On the next Rs. 20 lakhs	35%
On the balance	40%

* See p. 144 bottom table.

Principal Value of Estate.	Rate of Duty.
<i>In the case of property of any other kind:</i>	
On the first Rs. 50,000	Nil
On the next Rs. 50,000	7½%
On the next Rs. 50,000	10%
On the next Rs. 1 lakh	12½%
On the next Rs. 2 lakhs	15%
On the next Rs. 5 lakhs	20%
On the next Rs. 10 lakhs	25%
On the next Rs. 10 lakhs	30%
On the next Rs. 20 lakhs	35%
On the balance	40%
<i>In the case of shares held by a deceased member in any such company referred to in sub-section (1) of Section 81.</i>	
If the principal value of the shares does not exceed Rs. 5,000	Nil
If the principal value of the shares exceeds Rs. 5,000	7½%

GIFT TAX

The value of gifts made during a previous year (which is the same as for income-tax assessments) is the subject of charge; gifts are valued normally at the market value of the property as on the date of the gift. The taxable gifts made during five previous years immediately preceding the assessment year (excluding gifts made before the 1st day of April 1957) are aggregated and the rate applicable to the aggregated value is the rate at which tax is charged on the value of the gifts made during the previous year.

The Gift Tax Bill was passed by the Lok Sabha on 6th May, 1958. The Bill provides for the levy of a tax on gifts made during the previous year at the rates notified below:

On the first Rs. 50,000—4 per cent, on the next Rs. 50,000—6 per cent, on the next Rs. 50,000—8 per cent, on the next Rs. 50,000—10 per cent, on the next Rs. 1,00,000—12 per cent, on the next Rs. 2,00,000—15 per cent, on the next Rs. 5,00,000—20 per cent, on the next Rs. 10,00,000—25 per cent, on the next Rs. 10,00,000—30 per cent, on the next Rs. 20,00,000—35 per cent, and on the balance—40 per cent.

Gifts exempt from tax are:

(a) immovable property situated outside India; (b) movable property situated outside India, where the donor is not a citizen of India or where the donor, not being an individual, is a non-resident; (c) savings certificates declared gift-tax free; (d) gifts to Government or local authorities; (e) gifts to recognised charitable institutions or funds; (f) gifts for any charitable purpose up to Rs. 100 in respect of each gift; (g) gifts to female dependant members on the occasion of marriage, subject to a maximum of Rs. 10,000; (h) gifts to wife, subject to a maximum of Rs. 1,00,000; (i) gifts of policies of insurance or annuities to wife, children or dependants subject to a maximum of Rs. 10,000 in respect of each donee; (j) gifts under a will and (k) gifts in contemplation of death.

Without prejudice to these exemptions, no person need pay gift-tax if the gifts do not exceed Rs. 10,000 in one previous year. But, if the taxable gift to any individual donee exceeds Rs. 3,000 during the year, the donor will have to pay tax in respect of all gifts above Rs. 5,000.

Gifts made before 1st April 1957 do not come within the purview of the Gift Tax Act.

No aggregation of gifts during the preceding five years is made for the purpose of determining the rate of duty.

THE CURRENCY SYSTEM

OVER the year 1957-58, money supply with the public, excluding State Governments' deposits with the Reserve Bank, increased by Rs. 75 crores to Rs. 2,386 crores as against a rise of Rs. 180 crores in 1956-57 and Rs. 264 crores in 1955-56.

The two tables give the details of the course of money supply with the public and the factors contributing to it.

(Rs. in crores)

	Year ended March 31		
	1955-56	1956-57	1957-58
Currency with the Public (a).			
1. Note Circulation (b)	1,434.23	1,488.80	1,596.23
2. Circulation of rupee coin (c)	128.45	118.80	116.85
3. Notes and coin with Treasuries (d)	1.14	5.81	5.80
4. Cash on hand of scheduled, non-scheduled (e) and co-operative banks	41.45	39.75	41.50
5. Currency with the public (excluding small coin) (1+2+3+4)	1,505.09	1,556.50	1,605.70
6. Variation in currency with the public	+ 193.22	+ 51.41	+ 49.20
Deposit Money.			
7. Demand liabilities (excluding inter-bank demand deposits) of scheduled, non-scheduled (e) and co-operative banks	667.21	744.74	702.04
8. Other Deposits with the Reserve Bank excluding balance held on I.M.F. Account No. 1	12.01	11.05	19.67
9. Deposit money with the public (7+8)	679.22	755.79	721.60
10. Variation in Deposit money	+ 70.57	+ 77.16	+ 26.51
11. Money supply with the public (excluding small coin) (5+9)	2,184.31	2,312.29	2,327.30
12. Variation in money supply with the public (6+10)	+ 263.66	+ 128.57	+ 74.71

NOTE: Figures have been revised to take into account the circulation of *Half Sloss* currency.

(a) Money supply with the public does not take account of the inward or outward movement of currency and excludes small coin. (b) Figures are net of the return of about Rs. 48 crores from Pakistan awaiting adjustment. (c) Estimates. (d) Figures on the last day of the year. (e) Excluding balance held on I.M.F. Account No. 1.

SEASONAL VARIATION IN MONEY SUPPLY WITH THE PUBLIC

(Rs. in crores)

	Currency with the public	Demand liabilities of all banks	Other Deposits with Reserve Bank	Money supply with the public
September 26, 1955 to May 7, 1956	+ 155.0	+ 10.7	+ 5.8	+ 171.5
May 8, 1956 to September 24, 1956	— 88.8	+ 26.0	— 6.6	— 77.4
September 25, 1956 to May 6, 1957	+ 160.0	+ 31.8	+ 0.3	+ 232.1
May 7, 1957 to Oct. 26, 1957	— 22.1	+ 25.0	+ 0.9	— 3.2
Oct. 27, 1957 to May 11, 1958	+ 257.2	+ 26.5	— 0.1	+ 283.6

1957-58 Slack Season	— 89.5	+ 4.8	+ 2.1	— 82.7
1957-58 Busy Season	+ 143.7	+ 28.8	+ 0.1	+ 167.6

NOTE: Figures have been revised to take into account the circulation of *Half Sloss* currency.

CIRCULATION OF NOTES: The rising trend in currency circulation noticed since 1953-54 became more marked in 1955-56. But whereas in the previous two years notes alone accounted for the currency expansion, in the year under review, rupee coins and small coin accounted for 5 per cent. of the expansion. Active notes rose during the year by Rs. 180 crores, as against Rs. 91 crores in 1954-55 and Rs. 55 crores in 1953-54. Total Notes in circulation at the end of 1955-56 amounted to Rs. 1,484 crores and at the end of 1956-57 Rs. 1,488 crores and at the end of 1957-58 Rs. 1,596.23 crores.

* See also separate column which follows.

Reintroduction of High Denomination Notes: The Reserve Bank of India commenced issuing new notes of the denominations of Rs. 1,000, Rs. 5,000 and Rs. 10,000 with effect from April 1954. The new notes are completely different in design, water-mark and colour scheme from the old high denomination notes.

Changes in the Form of Notes: Reserve Bank of India notes of the denomination of Rs. 100, with the numbers printed in red (instead of in black) were first issued from the Bank's offices at Calcutta and Madras in August 1953. The Government of India one rupee notes printed in purple, instead of the earlier grey colour, were first issued from the Bank's Bombay office in November 1953.

Hyderabad State Currency: According to the Hyderabad Coinage and Paper Currency (Miscellaneous Provisions) Act, 1953, the Hyderabad currency (*Half Sloss* currency) ceased to be legal tender with effect from April 1, 1955. But to enable the public exchange their holdings of Hyderabad currency for Indian currency, the Union Government had provided conversion facilities, first till March 31, 1956, and then extended them by a notification dated March 24, 1956, up to September 30, 1956 and thereafter up to the end of December 1956, after which the facilities were withdrawn. At the end of March 1956, the circulation of *Half Sloss* currency amounted to about *Half Sloss* Rs. 4.07 crores (or India Rs. 3.49 crores), as against *Half Sloss* Rs. 46 crores (or India Rs. 41 crores) on January 28, 1956.

Replacement of French Indian currency by Indian currency: As from November 1, 1954, the provisions of the Indian Coinage Act, 1906, the Reserve Bank of India Act, 1934 and the Currency Ordinance of 1940 were extended to the French establishments in India, consequent on the merger of these establishments with the Indian Union. Although the French currency ceased to be legal tender on April 30, 1955, the facilities for its exchange into Indian currency were available up to October 15, 1955. The total value of Indian currency issued in exchange for French currency amounted to Rs. 37 lakhs.

Decimalisation of Coinage: With a view to adopting the decimal system of coinage, a Bill to amend the Indian Coinage Act, 1906 was introduced in the Lok Sabha on May 7, 1955 and was passed on July 27, 1955. It came into force from April 1, 1957. As from that date, the rupee coin was divided into 100 equal units and the unit coin was designated as *Naye Paisa*. Thus 100 *naye paisa* will make one rupee. The old coins will continue to be legal tender for about three years after the introduction of the new coins.

The details regarding the denominations, dimensions, designs and metal composition of the new series of coins were given by the Government of India in a notification issued on May 14, 1956. The new series will have the following units: 1 *naye paisa*; 2 *naye paisa*; 5 *naye paisa*; 10 *naye paisa*; 25 *naye paisa*; 50 *naye paisa*; and 100 *naye paisa*.

CURRENCY CIRCULATION

During 1957-58, the total circulation of all forms of legal tender currency (notes, rupee coin and small coin) recorded an increase of Rs. 52.3 crores against a rise of Rs. 55.7 crores in the preceding year.

The following table shows the circulation of currency:—

	At the end of		
	1955-56	1956-57	1957-58
Circulation—			
Notes	1,485.47	1,488.25	1,596.23
Rupee Coin	128.45	118.80	116.85
Total	1,613.92	1,607.05	1,713.08

NOTE: Figures are exclusive of *Half Sloss* currency.

Rupce Coin.—Since June 7, 1947, when all standard silver rupee coin had ceased to be legal tender, the 'rupee coin' in circulation in India has comprised (1) the Government of India one rupee notes issued from July 1940, (2) the quaternary silver rupees (of one-half annas) issued between December 1940 and June 1946, and (3) the nickel rupees issued from June 1947.

During 1957-58 rupee coin in circulation receded by Rs 1.43 crore to Rs 116.45 crores. On 10th April 1958, the Reserve Bank received

from the Government of India one rupee notes of the value of Rs. 5 crores, in terms of Section 36(2) of the Reserve Bank of India Act, against payment of legal tender value. At the year-end, rupee coin holdings of the Reserve Bank amounted to Rs. 129 crores.

Small Coin.—The circulation of small coin recorded an increase of Rs. 65 lakhs in 1957-58 as compared with a rise of Rs. 45 lakhs in 1956-57. The following are the details:

**MOVEMENTS IN CIRCULATION OF SMALL COIN DENOMINATION-WISE
ABSORPTION (+) OR RETURN (-)**

(Rupees in 000)

	1954-55	1955-56	1956-57	1957-58

1 naye paisa				+ 47.60
Total	- 1,14.02	+ 1,46.54	+ 45.08	+ 64.91

* Since the inauguration of the Reserve Bank in 1955, silver half rupees have been included in statistics relating to small coin, including pure nickel half rupees introduced in May 1946. ** Including pure nickel four anna pieces introduced in May 1946. † Including nickel two anna pieces introduced in 1917-18. †† Nickel half anna pieces introduced in January 1942. § Including single pice pieces with a circular hole issued from February 1942.

EXCHANGE CONTROL

During 1957-58, despite the acute pressure on the reserves, the structure of India's exchange restrictions remained basically unchanged, except for minor restrictions on certain capital payments. Some of the alterations in the regulations, including changes in treatment of capital pay-

ments and transactions, are detailed below:

From 19th June 1957, the permission earlier given to residents in India to acquire sterling shares in the London market of companies that operate exclusively in India and maintain dual registers—one in London and other in India—was cancelled.

From 1st July 1957, Indian nationals (including persons domiciled in India) who intended to take up permanent residence in the sterling area were not allowed to transfer their assets in full at the time of emigration, as was the case prior to that date; only a sum not exceeding Rs. 2 lakhs per family was allowed at the time of departure. The remaining assets, if any, would have to be held in India, but remittance of income on such assets would be allowed in full. No change was effected in the regulations governing emigration to the dollar area. The ceiling of Rs. 75,000 per family and Rs. 125,000 for emigration to any other country remains unaltered.

With effect from 5th August 1957, travellers proceeding to Portuguese territories in India were permitted to take out with them Indian currency notes and coin not exceeding Rs. 100 in all per visit.

On 20th September 1957, the Foreign Exchange Regulation (Amendment) Act was passed in order to place the main Act, which was due to expire on 31st December 1957, on a permanent footing. The Amendment Act also provides for departmental enquiry and adjudication of foreign exchange offences by an authority constituted by Government.

Consequent upon the removal, as from 25th February 1958, of restrictions on the import of Bank of England notes from the United Kingdom, permission has been granted to travellers to bring into India Bank of England notes without limit subject to declaration to the customs authorities at the time of arrival as in the case of other foreign currency notes. The limit of Rs. 270 upto which Indian and foreign currency notes (including Bank of England notes) may be taken out of India remains unchanged.

As a result of the bilateral trade agreement entered into by the Government of India with Egypt on 25th March 1958, payments for export of tea and jute goods from India to Egypt and import of cotton into India from Egypt, as an exception to the existing rupee payment arrangements, are permitted to be made in Egyptian pounds.

" " Pie Pieces	25	" " "	

Yellow nickel-brass 2-anna, half-pie and one pie pieces were to cease to be legal tender from 1st January, 1959. Although they would be accepted from the public till June 30, 1959 at all offices of the Reserve Bank of India, all agency banks of the Reserve Bank of India conducting Government business and all Government Treasuries and sub-treasuries, the public were advised to part with these three varieties of coins, as far as possible, before the 1st of January, 1959, so that they were not put to unnecessary inconvenience after that date. The coins would still be accepted at the Issue Department of the Reserve Bank of India at Bombay, Calcutta, Madras, Kanpur, New Delhi, Bangalore and Nagpur until further notice even after June 30, 1959.

DECIMAL COINAGE

(See under 'Late Particulars').

BANKING

MODERN banking in India owes its origin to the British agency houses operating in Bombay and Calcutta in the eighteenth century. Then followed the Presidency banks in the latter half of the nineteenth century; as a result of their amalgamation, the Imperial Bank of India was brought into being in 1921 by a special Act. The next stage was marked by the establishment of the Reserve Bank of India on April 1, 1935. Fourteen years later on January 1, 1949, the Reserve Bank was nationalised. Its functions are now being broadened gradually: from the role of a "lender in the last resort" it has assumed the responsibility of being "the purveyor of credit" and is charged with the responsibility of developing the banking system on sound lines. On July 1, 1955, the State Bank of India came into being and the undertaking of the Imperial Bank of India was transferred to the new institution with the exception of the assets and liabilities of its foreign branches.

At the base of the banking system is the Reserve Bank with the State Bank as its agent. The edifice is made up of Indian joint stock banks other than the State Bank, foreign banks and co-operative banks.

The Banking Companies Act was enacted in 1949 with the object of improving the efficiency and the tone of the banking system. The main provisions relate to licensing of branches, requirements of minimum capital and reserves and maintenance of cash reserves. During 1952 the Banking Companies Rules were extended to more States and now apply to the entire country.

The policy of systematic inspections of banking companies irrespective of their size and standing, has been an aspect important of the Reserve Bank's supervisory activities. In pursuance of this 178 banks were inspected during 1957, of which 47 were scheduled banks. Since March 1950, when inspections were commenced, 1,301 inspections have been carried out for various purposes.

In pursuance of a press note issued on December 20, 1954, the Government of India nationalised the Imperial Bank as a first step towards the establishment of a State Bank of India by amalgamating the Imperial Bank of India with a number of other banks already associated with some State Governments. The branches would be spread over the whole country thus improving remittance and rural credit supplies. The State Bank came into being on July 1, 1955. Another development was the establishment of a Bankers' Training College in Bombay.

TRENDS

The exceptionally large deposit expansion was the most striking feature of the banking year 1957. Net deposits of scheduled banks rose by Rs 245 crores or by 23.3 per cent, as against Rs 77 crores in 1956. The sharp increase in

deposits of scheduled banks may be explained apart from the technical factor of the inclusion in the Second Schedule to the Reserve Bank of India Act of two non-scheduled banks with not insubstantial deposits, by certain special factors. Much the more important of these related to the placement by the U.S. authorities in India of funds representing the initial reimbursement by the Government of the cost of foodgrains imported into the country under Public Law 480. The tight import restrictions might also have induced business concerns and other bodies to seek temporary investment of their reserve and other surplus funds in the form of time deposits.

As against the temporary nature of these two factors, which perhaps accounted for the bulk of the increase, must be set the longer-term causes for the deposit increase. One of these was the further hardening of interest rates in the year on fixed and savings deposits, which might have induced a switch from current to time deposit accounts and possibly also from non-banking to banking accounts. Again, there is reason to believe that some portion of the generated money incomes in the last year or two must have gone into bank accounts, albeit with some delay, while the branch expansion of banks, notably that of the State Bank of India, also contributed to the expansion of deposits.

Indian scheduled banks accounted for Rs. 224 crores or over 80 per cent of the total deposit increase. Non-scheduled banks' deposits were down by Rs. 24 crores owing to the fewer number of reporting banks and the inclusion of two banks in the Second Schedule to the Reserve Bank of India Act, 1934.

Whereas in 1956 the growth in deposits fell far short of the increase in credit, in the year under review, the reverse was the case. Deposits rose by over three times the increase in credit. Over the year, scheduled bank credit increased by Rs. 75 crores as against the 1956 figure of Rs. 181 crores. These figures, however, conceal marked variations in the trend during the year.

A general restriction on the quantity of credit was sought to be operated through raising the cost of borrowing by banks from the Reserve Bank. From February 1, 1957 the effective rate of borrowing under the Bill Market Scheme was raised to 4 per cent because of the increase in the stamp duty on usance bills. Simultaneously, the Bank raised its lending rate against Government securities to 4 per cent. These were followed by the Bank rate being brought up to 4 per cent with effect from May 16, 1957; with a lowering of the stamp duty on usance bills to 0.3 per cent per annum the effective rate for advances under the Bill Market Scheme was further raised to 4.2 per cent.

Though these measures had a general restraining effect on banks' borrowings from the Bank

the underlying trend was still one of credit expansion in this period. Bank credit touched a peak level in the beginning of June 1957 indicating the need for further restrictive measures. Accordingly, the Governor of the Bank addressed towards the end of June a circular letter to scheduled banks advising them to bring about a reduction in the total of bank credit during the ensuing slack season with a hint that if necessary, the arrangements regarding financial assistance from the Reserve Bank, which till then was freely given, might be reviewed. In the subsequent meetings with representative bankers at Bombay and Calcutta in July and August the Governor set a target of approximately Rs. 800 crores to which he wanted banks to bring down their credit levels by October 1957.

The banks succeeded in bringing about a substantial reduction in outstanding credit but not the full extent desired. In a later conference in November 1957 with the representatives of banks the Governor, while appreciating the efforts made by banks earlier in having curtailed credit, repeated his concern about the continued high level of prices and reiterated the imperative need for vigilance on the part of banks in their leading operations in the 1957-58 busy season, while avoiding any adverse impact on the genuine credit needs of the productive sectors of the economy. With this end in view, it was indicated to the banks that the Reserve Bank's lending policy under the Bill Market Scheme would be one of general restraint and greater selectivity than previously.

As a combined result of these and earlier measures of credit control and a delayed onset of the busy season of 1957-58 accompanied by a sharp reduction in the volume of imports, the level of advances at the end of December 1957 at Rs. 820 crores was barely 10 per cent higher than at the end of 1956 as against an increase of a little over 25 per cent in the preceding year. The moderate expansion in advances compared with a record deposit expansion in 1957 brought the advance-deposit ratio of banks down to 63.2 per cent at the year end from 70.8 per cent in December 1956.

An interesting feature as regards the Bank's lending lately has been that, while hitherto the Indian banks had been the main borrowers under the Bill Market Scheme, in 1956, exchange banks exhibited considerable interest in the scheme. It is a reflection of the belief that the Indian money market is acquiring a greater degree of autonomy. Here, it will be of interest to note that some changes were made in the Scheme. With effect from May 16, 1957, the rate chargeable on advances under the Scheme was raised from 3½ per cent to 4 per cent and the concession so far granted to banks whereby the Reserve Bank shared the cost of the stamp duty involved in converting demand bills into usance bills was also withdrawn.

RESERVE BANK
In pursuance of Federal financial integration, the Reserve Bank entered in 1955 into agreements with three former 'B' States, Madhya Bharat, Travancore-Cochin and Mysore, whereby it became their sole banker.

In 1953, it concluded agreements with two more (all former States before reorganisation)

Part 'B' States, namely, Hyderabad and Saurashtra whereby it became ultimately the sole banker to these States as it already was to all the Part 'A' and Part 'C' States.

The Bank advanced to scheduled banks a gross amount of Rs. 799 crores in 1957 against Rs. 904 crores in 1956 and Rs. 425 crores in

1955. A total amount of Rs. 354 crores was advanced in 1957 by the Reserve Bank for general banking purposes at the Bank rate against Government securities as compared with Rs. 467 crores in 1956. Loans under the Bill market scheme at $\frac{1}{2}$ per cent below the Bank rate aggregated Rs. 415 crores in 1957 against Rs. 437 crores in 1956.

The following table gives the position of the Reserve Bank over a period of years :—

EXCHANGE BANKS

The banks carrying on exchange business in India are merely branch agencies of banks having their head offices in London, on the Continent, in the Far East or the U. S. A. Originally their business was confined almost exclusively to the financing of the external trade of India; but now, most of them,

while continuing to play their main role, have also taken an active part in the financing of internal trade. Following the increase in the British bank rate to four per cent in March 1953, exchange banks found it more profitable to tap Indian deposits than to get funds from London. Over the year 1957 the deposits with

these Banks amounted to Rs. 204.14 crores as against Rs. 187.54 crores in 1956.

The earlier progress of Exchange Banks was tabulated in the previous editions. The more recent trends are summed up below :—

Liabilities and Assets of Foreign Banks in India

(In lakhs of rupees)

Year	No. of Banks	Deposits					Cash		Bills Discounted and Purchased	Loans and Advances	Investments		No. of Offices	Net Profit

MONEY RATES IN INDIA

	1954	1957
Bank Rate*	3½	3½-4
State Bank (former Imperial Bank) Rates:		
Hundi Rate** ..	4½-5	5-5½
Advances Rate ..	4	4-4½
Call Loan Rate—		
Rs. 5 lakhs and over	3½	3½-4
Below Rs. 5 lakhs ..	3½	3½-4½
Bazaar Bill Rates †:		
Calcutta	10-12	10-12½
Bombay	9-10½	9½-11½
Call Money Rates: ..		
Calcutta	4½-5½	4½-5½
Bombay—		
Larger Banks ..	3½-2½	3½-2½
Smaller Banks ..	3½-2½	3½-2½

* Bank rate was raised to 4 per cent on 16th May 1957. This is the standard rate at which the Reserve Bank is prepared to buy or re-discount bills of exchange or other commercial paper eligible for purchase under the Reserve Bank of India Act.

** The rate at which the State Bank discounts first class three months' commercial bills.

† Rates at which bills of small traders are discounted by shroffs. The quotations are unofficial.

Clearing Houses.—The Principal Clearing Houses in India are those of Calcutta, Bombay and Madras and of these the first two are by far the most important. In 1951-52 Clearing Houses were opened at Baradilly and Jaipur and are being managed by the State Bank of India. This brought the total number of Clearing Houses under the management of the State Bank to 35. In Bombay, a Metropolitan Clearing

Association was formed and registered in October 1946 to arrange for clearing for non-scheduled banks as the Bombay Bankers' Clearing House decided to restrict its membership and sub-membership only to scheduled banks.

The total number of cheques cleared has progressively risen since 1950, the amount which has shown a declining trend in 1952 and 1953, has been higher in 1954, 1955, 1956 and 1957.

The figures from 1952 onwards are shown in the table given below :

CLEARING HOUSE STATISTICS

(In lakhs of rupees)

Year	Velocity of Circulation	Calcutta	Bombay	Madras	Kanpur	Delhi	Other Centres	Total
1952 ..	12.3	2,703.95	2,679.52	432.57	136.94	157.95	742.47	6,653.40

SOME RECENT DEVELOPMENTS

During 1957, the number of scheduled banks was higher at 91, as against 89 in 1956, and the number of offices increased from 2,964 in the previous year to 3,273.

It was stated that a landmark in Indian banking was the inauguration of the State Bank of India. An important statutory function assigned to the State Bank is the promotion of banking development through the establishment of an effective machinery of branches spread over the whole country, the number of branches to be opened within a period of five years or such extended period as the Central Government might fix, being 400.

The State Bank opened 46 branches in 1956 and 91 branches during 1957. The total number of branches opened since its establishment on 1st July 1955 till the end of December 1957 was 157. At the close of the year, the Bank had a total of 632 offices.

A bill facilitating the reconstitution of some of the State Banks of the former Princely States as subsidiaries of the State Bank was introduced in the Lok Sabha on March 4, 1959. The banks covered are : Bikaner, Indore, Jaipur, Mysore, Travancore, Saurashtra, Patiala and Hyderabad

The Reserve Bank Act was amended in Oct. 1957 to reduce the statutory minimum currency reserve to Rs. 300 crores, of which not less than Rs. 115 crores should be held in gold coin and bullion and the balance in foreign securities.

Till then the Act prescribed a currency reserve of Rs. 115 crores of gold coin and bullion and Rs. 400 crores of foreign securities with a proviso permitting a temporary reduction of the latter to Rs. 300 crores.

Under the Reserve Bank of India (Amendment) Act, 1955, the Bank set up, on February 8, 1956, the National Agricultural Credit (Long-Term Operations) Fund with an initial sum of Rs. 10 crores. An annual contribution of not less than Rs. 5 crores for the five years commencing from June 30, 1956, is to be made towards this Fund. This Fund will make loans and advances to State Governments for subscribing to the share capital of co-operative credit institutions and to central land mortgage banks.

Loans amounting to Rs. 6.04 crores were sanctioned from the National Agricultural Credit (Long-term Operations) Fund of the Reserve Bank to 14 State Governments to enable them to contribute to the share capital of co-operative credit institutions, as at end of June 1958, of which Rs. 5.83 crores were availed of by 13 State Governments.

The Refinance corporation for Industry was registered on 5th June 1958 as a private limited company. The main object of the corporation is to help augment the resources available with the banking system for the use of medium-sized industrial units (i.e., units having resources upto Rs. 2½ crores) in the private sector. The Corporation's share capital is tentatively pro-

posed to be made up of contributions from the Reserve Bank (Rs. 5 crores), the State Bank of India (Rs. 2½ crores), the Life Insurance Corporation of India (Rs. 2½ crores) and 14 other selected scheduled banks in India (Rs. 2½ crores). The allocation of share capital as between the 14 banks is in broad relation to the size of their deposits in India. The Government of India has placed with the Corporation Rs. 26 crores from the counterpart funds arising out of the sale proceeds of the agricultural commodities supplied to this country in terms of the recently concluded Indo-U.S. Agreement. The Corporation has allocated quotas to banks grouped into 4 categories with reference to the size of their deposits, from its total funds of Rs. 38.5 crores within which the banks offer certain types of loans to the Corporation for obtaining refinance. Loans to be eligible for this purpose should have been made for periods between 3 and 7 years and to a medium-sized industry and for a medium-sized amount. Lending banks have assumed the full credit risk on loans submitted to the Corporation. The Corporation is adopting eligibility criteria which is liberal. The interest rate spread between the cost of discount with the Corporation and the prime lending rate of the banks is not less than 1½ per cent. The scheme is thus providing an opportunity to selected banks for extending formal term lending facilities to industries and providing liquidity to the eligible paper offered, by banks upto the extent of quotas which would be allotted to them.

CAPITAL MARKET*

THE earliest reference to stock trading in India dates back to the end of the 18th century when transactions in Government securities and the shares of the East India Company used to take place in Calcutta under a neem tree. Similar references are also available about business in shares in Bombay before 1840. The boom following the American Civil war gave a great impetus to this business.

The Native Share and Stock Brokers' Association of Bombay was formally constituted by an indenture dated December 3, 1887 and was recognised by the Government of Bombay for forward trading in shares under the Bombay Securities Contracts Control Act, 1925. Since then several attempts were made to start rival stock markets in Bombay, the latest one being the Indian Stock Exchange started in 1938.

The Government of India has so far (up to 17th December 1957) recognised five stock exchanges, namely, The Stock Exchange, Bombay, The Ahmedabad Share and Stock Brokers' Association, Ahmedabad, The Calcutta Stock Exchange Association Ltd., Calcutta, The Madras Stock Exchange Ltd., Madras and The Delhi Stock Exchange Association Ltd., New Delhi. The general principles regarding grant of recognition to a stock exchange as laid down in Section 4(1) of the Securities Contracts (Regulation) Act, 1956, has been followed. The Act does not envisage amalgamation, as such, of stock exchanges either before or after recognition is granted under section 4 thereof. Nevertheless, to avoid undue hardship to members of the exchange which have not been recognised, the Government has prescribed certain terms and conditions on which active members of the unrecognised exchanges can seek admission to the recognised exchange.

Section 13 of the Securities Contracts (Regulation) Act, 1956, has been made applicable to the Greater Bombay area in the State of Bombay with effect from 15th October 1957. The effect of the application of section 13 to the Greater Bombay area is that every contract in this area which is entered into after 15th October 1957, otherwise than between members of the recognised Stock Exchange or through or with such member, is illegal.

Calcutta Association.—The Calcutta Stock Exchange Association was founded at No. 2, New China Bazar Road (now known as 2, Royal Exchange Place), Calcutta, with 150 founder members in 1906. Fifteen years later, it was registered as a limited liability concern. The Association is controlled and managed by a Committee and has a membership of 232 brokers.

The only registered institution in south India of brokers dealing in shares and securities is the Madras Stock Exchange Association, Ltd., registered in 1937.

During the boom period several stock markets were started at other industrial centres. These include Delhi and Kanpur.

The Ahmedabad Stock Exchange is also a registered body and recognised by the Government of Bombay under the Bombay Securities Contract Control Act.

There are also organised stock markets in Hyderabad and Indore.

SECURITIES ACT

The Securities Contracts (Regulation) Act, 1956, is the first All India legislation seeking to control transactions on securities and to regulate stock exchange practices. Prior to this Act, there was no legislation for the purpose except in the old State of Bombay.

The Bombay Securities Contracts Control Act, 1925, was not, however, particularly effective because of two main shortcomings: (1) The Act made transactions outside a recognised stock exchange merely void but not illegal. (2) While the Act purported to control only forward

business, it did not make a clear distinction between ready and forward transactions. To remedy these and other defects, the former Bombay Government enacted in 1947, the Bombay Forward Contracts Control Act; but this Act was not applied to securities presumably because Central legislation of this subject has been in contemplation.

But the outbreak of World War II came in the way of immediate legislation and it was only after the end of hostilities effective steps were taken in this direction, which resulted in the Securities Contracts (Regulation) Bill, introduced in the Lok Sabha on December 24, 1944. It was largely based on the recommendations of the Gorrvala Committee appointed in June 1951. The Bill was referred to a Joint Committee of the Houses of Parliament towards the end of 1945. It submitted its report to Parliament on February 23, 1946. The Bill, as revised by the Joint Committee, was passed by the Lok Sabha, with some amendments, on July 18 and by the Rajya Sabha on August 6. It received the assent of the President on September 4, 1946.

Main Provisions

Broadly speaking, the Act applies to transactions other than spot delivery contracts. But power has been taken in the Act to regulate spot delivery contracts also, if the Government regards it as desirable in the interest of trade or in the public interest.

As regards contracts other than those for spot delivery, the regulation takes the form of either controlling the activities of stock exchanges in those areas or States where stock exchanges operate, or through a system of licensing of persons who deal in stocks and shares. In those areas where the stock exchanges operate and to which Section 13 of the Act will be applied, every contract which is entered into otherwise than between members of a recognised stock exchange in such State or area or through or with such members is illegal.

The Act permits only those stock exchanges to function which are recognised by the Central Government. For this purpose, each stock exchange is required to make an application in the prescribed manner to the Central Government, who will grant recognition if the Government is satisfied in regard to certain conditions. Every recognised stock exchange is required to furnish to the Central Government such periodical returns relating to its affairs as may be prescribed.

Subject to the previous approval of the Central Government, any recognised stock exchange may make bye-laws for the regulation and control of contracts. But the Government has the power to make or amend these bye-laws.

Important provisions relating to the listing of securities on a stock exchange are also contained in the Act. In regard to the licensing of dealers and brokers in securities, there are no detailed provisions.

So also no direct provisions are contained in the Act to restrict the prevalence of black transfers, but there is a provision to discourage black transfers indirectly.

MARKET TRENDS

The general downturn in share prices noticed since August 1956 continued during the greater part of 1957-58. The Reserve Bank's index for variable dividend industrial securities, which had dropped from 123.6 at the end of August 1956 to 109.2 by the end of March 1957, declined further to 96.4 by January 4 but recovered somewhat to 97.9 at the end of March 1958. Initially, the 'vote on account' budget for 1957-58 announced on March 19 had a bullish effect upto mid-June. The substantial overall deficit for 1957-58 revealed in the budget combined with Government's determination not to

whittle down the Second Five Year Plan, led to fears of higher taxation in the final May budget.

Over the year, the Reserve Bank's all-India average index of variable dividend industrial securities (base: 1949-50 = 100) declined by 13.1 per cent from 111.1 to 98.0 in continuation of a fall of 9.3 per cent in 1956-57. Region-wise, as in the preceding year, the Calcutta index recorded the largest decline of 14.9 per cent. The decline of the Bombay index was moderate, being 7.5 per cent. The index for Madras, which had recorded a small net rise in 1956-57, showed a sizeable net fall of 12.6 per cent. These regional divergences arose mainly from the differences in the industrial groups traded at these centres.

The gilt-edged market tended to rule easy upto June, owing to the stringency in the money market. The effect of the rise in Bank rate to 4 per cent, effective May 18, 1957, was, by and large, small, partly as a result of the support accorded by the Reserve Bank.

The Reserve Bank average index for Government of India Securities (base: 1949-50 = 100) declined from 89.7 in March 1957 to 88.7 in August, but thereafter recovered somewhat to close for the year at 89.0. Among State loans also, while most of the short-dated loans recorded moderate net gains, the remaining loans showed net losses ranging upto Rs. 1.76. As in the case of the new Central Government loans, the new 44 per cent Bombay and Mysore loans 1956 were also quoting above their issue prices by 25 nP. and 70 nP. respectively.

For the year as a whole, the short-dated loans recorded net gains which ranged upto Rs. 1.35 in the case of the 2½ per cent Loan 1961. Among medium and long, the new 3½ per cent 1967 and the 4 per cent 1972 loans issued in August were also quoting at the year end at a premium of 25 nP. and 15 nP. respectively, over their issue prices. Other loans recorded net declines which were particularly marked in the irredeemable. The irredeemable 3 per cent Conversion Loan of 1946, which had declined by Rs. 3.81 in 1956-57 and by Rs. 2.56 in 1956-57, went down further by Rs. 3.62. As in the preceding year, the 3 per cent 1970-75 Loan, among the dated issues, showed the largest decline of Rs. 1.22.

For the year as a whole, the market recorded a fall of 9.3 per cent, with the Reserve Bank's all-India index of variable dividend industrial securities (base: 1949-50 = 100) falling from 123.6 for March 1956 to 111.1 for March 1957. This decline contrasted with the successive net increases of 6.1 per cent, 12.5 per cent and 8.4 per cent recorded in the preceding three years. Region-wise, the Calcutta share market recorded the largest decline of 4.8 per cent. The Madras market, however, recorded a small net rise of 0.4 per cent. These regional divergences arose mainly from the differences in the industrial groups traded at these centres.

In the gilt-edged market, the firm tendency which generally prevailed during 1956-57 was carried further upto about mid-June, mainly on sustained investment demand from non-bank institutional investors. On the other hand, scheduled banks, which were under severe pressure for funds, reduced their gilt-edged portfolios between March and June to the tune of Rs. 15 crores. The Reserve Bank's average index for Government of India securities (base: 1949-50 = 100) moved up from 89.7 in March to 91.1 in June.

For the year as a whole (1956-57), having a few short dated loans which showed increases of 6 nP. to 15 nP., most of the remaining loans recorded declines which were particularly marked in the long and undated issues. The 3 per cent Conversion Loan of 1946, which had declined by Rs. 3.81 in 1956-57, declined further by Rs. 3.62 to Rs. 3.44, and in the dated portion

* There is also an article on Company Law administration. For page see under Index.

the 3 per cent 1970-75 loan registered the maximum decline, of Rs. 1.58 which wiped out particularly the rise of Rs. 2.31 recorded in the previous year. In the case of State loans, the declines over the year ranged upto Rs. 1.48 in the case of the M.P. Loan 1967. Over the year,

yields on Central Government securities hardened by about 1 per cent. For instance, the 3 per cent 1970-75 Loan fetched an yield (to later redemption date) of 3.98 per cent at the year end, as against 3.75 per cent a year before. The yield (flat) of the 3 per cent Conversion Loan of 1946

also rose from 3.91 to 4.04 per cent. In the case of State loans also the rise in yields was about 1 per cent. Thus the Andhra Loan 1966 fetched 4.24 per cent at the end of March 1967, as against 4.05 per cent at the time of its issue in September 1966.

From December 1966, the Reserve Bank of India started constructing indices of security prices. These indices (all-India) reveal the following trend :—

Average of Weeks	Government & Bank Government Securities	Industrial Securities		Banks	Insurance	Investment Trusts	Electricity Transmission	Shipping and other Transport	Railways	Trunklines	Cotton, Woolen and Silk Mills	Jute Mills	Coal	Mining and Oil	Iron and Steel	General Engineering	Sugar and Breweries	Chemicals	Paper	Cement
		Fixed Dividend	Variable Dividend																	
Base: 1949-1950 = 100)

CAPITAL ISSUES

Data regarding actual capital raised from year to year are not available. However, figures of capital subscribed and paid-up against the consents granted during the seven years 1960 to 1966 are available in respect of companies which have reported to the Controller of Capital Issues. The data of subscribed and paid-up capital give an encouraging picture. During the seven-year period 1960-66, new issues amounting to Rs. 632 crores were sanctioned, of which Rs. 461 crores were in respect of ordinary and preference shares issued for cash, Rs. 67 crores for bonus issues and Rs. 85 crores for debentures. (Of these, data regarding capital raised are available only in respect of companies which were sanctioned Rs. 366 crores. As against Rs. 283 crores sanctioned for share capital against cash subscriptions, the amount subscribed and paid-up in respect of these companies was Rs. 266 crores and Rs. 170 crores, respectively, as at the end of 1966. As regards debentures, Rs. 49 crores were subscribed and paid-up, as against Rs. 56 crores sanctioned.

A significant development during 1965-66 was the enactment in February 1966 of a bill to extend indefinitely the Capital Issues (Continuance of Control) Act, 1947.

Official data issued by the Controller of Capital Issues although they relate only to consents

granted (and not to amounts actually raised), would also seem to confirm the above broad conclusion. These data show that during 1957 there was a sizeable decline in respect of the amount asked for and correspondingly in the amount sanctioned, after the sizeable increases noticed in 1956. The fall in the amount for which sanction was asked for (excluding bonus and miscellaneous issues) was from Rs. 187 crores in 1956 to Rs. 110 crores. The decline in the amount sanctioned was relatively larger from Rs. 168 crores to Rs. 91 crores, so that the ratio of amount sanctioned to amount asked for worked out lower at about 83 per cent as against 89 per cent in 1956; over half of the decline was in respect of Government companies. Another feature of the 1957 situation is that the fall in the aggregate sanctions for *new issues* (i.e. new companies) from Rs. 80 crores in 1956 to Rs. 43 crores was entirely on account of the public sector (i.e. Government companies), so that if such issues are excluded, initial issues by the private sector recorded, in fact, a moderate rise of Rs. 8 crores to Rs. 36 crores.

The amount of consents for foreign participation sanctioned in 1957 was somewhat lower at Rs. 45 crores as compared to Rs. 49 crores in 1956. The decline is entirely accounted for by consents for World Bank loans amounting to Rs. 33 crores in 1957 and Rs. 36 crores in 1956.

If these are excluded, other consents for foreign participation in 1957 were virtually at the preceding year's level of slightly over Rs. 13 crores.

According to the official data now available in regard to capital raised during the calendar year 1957, the total capital raised by the corporate sector in 1957 amounted to Rs. 71 crores excluding bonus issues of Rs. 3.81 crores and miscellaneous (e.g. loans) of Rs. 10.47 crores, of which Rs. 42 crores (59 per cent) were in respect of companies in the private sector which have raised capital with the consent of the Controller of Capital Issues, Rs. 19 crores (27 per cent) were in respect of Government companies and the balance of Rs. 10 crores (14 per cent) represented issues for which the consent of the Controller was not required. Out of Rs. 42 crores raised by non-government companies, as much as Rs. 37 crores (87 per cent) were in respect of public limited companies, the balance representing the share of private limited companies. In the case of public limited companies, ordinary shares accounted for Rs. 28 crores (76 per cent), the balance of Rs. 9 crores being accounted for more or less equally by preference shares and debentures. Of the sum raised by both public and private non-Government companies as share capital, as much as 74 per cent comprised further issues by existing companies, the balance representing issues by new companies.

COMPANY LAW

The main features of the Company Act are :
(1) Equity shares with differential rights regarding voting, dividend, participation in capital on dissolution, are prohibited.

(2) It puts restrictions on inter-company loans and investments.

(3) There is a ceiling on overall managerial remuneration.

(4) Most decisions of the management and even of the Shareholders of a Company require the approval of the Government before they are put into effect.

(5) The appointment of a managing agent or an associate as a selling or buying agent outside India requires approval by a special resolution.

INDUSTRIAL FINANCE CORPORATION†

Under the Industrial Finance Corporation Act, a Corporation was established on July 1, 1948 to provide medium and long-term finance to public limited companies and co-operative societies registered in India, including the seceding States, and engaged in the manufacture or processing of goods or in mining or in the generation or distribution of electricity or any other form of power. Individuals, partnership firms or private limited companies are thus excluded from the purview of the Corporation's operations. With the setting up of a number of State Financial Corporations, it was agreed that applicants for loans upto Rs. 10 lakhs or 10 per cent of the paid-up capital of the State Financial Corporation of the State in which they are situated, if that was lower than Rs. 10 lakhs, should be advised to apply not to the Industrial Finance Corporation but to the State Financial Corporation concerned. The authorised share capital is Rs. 10 crores, divided into 20,000 shares of Rs. 5,000 each, the paid-up capital being Rs. 5 crores in respect of 10,000 shares issued. To this issue, the Central Government and the Reserve Bank of India subscribed Rupees one crore each, the scheduled banks and financial institutions like insurance companies and investment trusts, Rs. 1½ crores each, and co-operative banks Rs. ½ crore. The paid-up value of the share capital and dividends on it at the minimum rate of 2½ per cent. per annum are guaranteed by the Government. The Board of Directors consists of thirteen members, of whom four are nominated by the Central Government and two by the Reserve Bank of India, and seven are representatives of scheduled banks, insurance companies, investment trusts and other financial institutions.

The Corporation is authorised to borrow up to ten times the amount of its paid-up capital and reserve fund. When the Reserve Fund equals the authorised capital of Rs. 10 crores, the borrowing capacity of the Corporation will be Rs. 200 crores. The Corporation may also accept deposits for periods of not less than five years, but the total deposits accepted may not exceed Rs. 10 crores.

The Industrial Finance Corporation (Amendment) Act, 1957, which was passed in November 1957 and which came into force from December 21, 1957, empowers the Corporation (1) to borrow upto a limit of ten times its paid-up capital and reserve funds as against five times provided for in the original Act of 1948, (2) to accept deposits from the State Governments and local authorities also prior to the amendment, the Corporation could accept deposits only from the public, and (3) to guarantee deferred payments by importers of capital goods who are able to make such arrangements with foreign manufacturers. The amending Act also enables a larger number of industries, including new industrial concerns which are not in a position to offer adequate security but deserve encouragement from the point of view of the national economy, to avail themselves of the Corporation's loan assistance, if such assistance is guaranteed as to the repayment of the principal and payment of interest by the Central Government, State Governments, a scheduled bank or a State co-operative bank.

In view of the increase in the rates of interest at which it has to raise funds, the Corporation raised its lending rate by ½ per cent to 7 per cent, effective April 23, 1957, with the usual rebate of ½ per cent for payment of interest and instalments of principal on due dates.

During 1957-58, loans sanctioned by the Industrial Finance Corporation of India aggregated Rs. 9.08 crores in respect of 32 industrial concerns as compared with Rs. 9.76 crores sanctioned in respect of 37 concerns in the preceding year. The principal borrowers were sugar, chemical, cotton textile, engineering and cement companies, Rs. 4.96 crores (55 per cent as compared to 34 per cent in 1956-57) were in respect of co-operative sugar factories mainly for setting up new units. Since its inception in July 1948 upto March 31, 1958, the Corporation sanctioned loans aggregating Rs. 57.48 crores in respect of 265 applications. The steep increase noticed last year in the pace of disbursements was maintained during the year under review. The amount disbursed was higher at Rs. 7.93 crores in 1957-58 as compared with Rs. 7.86 crores in 1956-57 and Rs. 2.17 crores in 1955-56, the disbursements during the last two years viz., 1956-58, amount for nearly 50 per cent of the total amount (Rs. 32.03 crores) disbursed since the inception of the Corporation.

During the year, the resources position of the Corporation was further strengthened and the scope of its activities widened through suitable amendments to the Industrial Finance Corporation Act as well as through an increase in the provision made under the Second Plan for Central Government assistance in the form of loans. The provision made in the Second Plan for Central Government loans to the Corporation was raised from Rs. 13.5 crores to Rs. 28.26 crores. Of this, a sum of Rs. 9 crores was drawn during the year 1957-58, the amount of loans from Central Government outstanding as on March 31 1958 being Rs. 15 crores. The Corporation's outstanding borrowings from the Reserve Bank under Section 21(3)(b) of the Industrial Finance Corporation Act increased from Rs. 1.06 crores on March 29, 1957 to Rs. 2.97 crores by September 27, 1957. The borrowings were, however, completely repaid by the end of March 1958. The Corporation also raised Rs. 4.56 crores through the issue of 4½ per cent Bonds 1967 in November 1957, the issue price being Rs. 99.

Up to the end of June 1958 the Corporation sanctioned over Rs. 64.17 crores by way of loans. Amount sanctioned in 1957-58 alone aggregated Rs. 9.08 crores.

OTHER FINANCIAL CORPORATIONS

An Act to provide for the establishment of State Financial Corporations was passed in October 1951. The Act enables the State Governments to establish a Financial Corporation for the State under a name to be specified by notification; and the State Government concerned, the Reserve Bank, scheduled banks, insurance companies, investment trusts, co-operative banks and other financial institutions will be entitled to subscribe to the share capital. Parties other than these can also be shareholders; but their aggregate holding will not exceed one fourth of the total capital. The shares allocated will not be transferable except to the State Government, the Reserve Bank or any other recognised financial institution.

The shares of the Corporation will be a trustee security under the Indian Trusts Act and an approved security under the Insurance and Banking Acts. The shares shall be guaranteed by the State Government in regard to the repayment of principal and the payment of annual dividend at such minimum rate as the State Government may, with the approval of the Central Government, fix by notification. The Corporation may issue bonds and debentures for increasing its working capital and accept deposits of not less than five years' maturity.

The Corporation may transact the following business:—(a) the guaranteeing of loans raised by industrial concerns in the public market for not more than 20 years; (b) the underwriting

of the issue of stocks, shares, bonds or debentures by industrial concerns; (c) the granting of loans or subscribing to debentures of industrial concerns repayable within 20 years; and (d) other business arising or ancillary to the above. The limit of accommodation to any industrial concern will be up to a maximum of one-tenth of the Corporation's share capital subject to a maximum of Rs. 10 lakhs.

Up to the end of March 1958, 12 States had established State Financial Corporations—Punjab, Madras, Bombay, West Bengal, Kerala, U P, Rajasthan, Assam, Bihar, Madhya Pradesh, Andhra and Orissa.

The year 1957-58 witnessed a further expansion in the activities of the State Financial Corporations. Both the amount of loans sanctioned and the amount of loans disbursed during the year were higher at Rs. 4.77 crores and Rs. 3.71 crores, respectively, as compared with Rs. 4.43 crores and Rs. 2.86 crores in 1956-57. The total amount of outstanding loans and advances rose over the year by Rs. 3.06 crores to Rs. 9.51 crores, accounting for 49 per cent of their total assets as against 46 per cent a year ago. With increasing recourse by industrial concerns to these corporations for loan assistance, some of the older corporations, viz., Punjab, Kerala and West Bengal, found it necessary to augment their resources through issue of bonds.

By the end of 1957, the Industrial Credit and Investment Corporation of India had approved financial assistance for a total amount of Rs. 11.65 crores (excluding applications sanctioned but subsequently withdrawn by the applicant or not proceeded with for other reasons) as against Rs. 6.01 crores by the end of 1956. Of this, Rs. 5.44 crores were in the form of loans (as compared to Rs. 2.95 crores at end-1956) and Rs. 6.35 crores in respect of underwriting of shares and debentures (as compared to Rs. 2.38 crores by end-1956). The sharp rise in total loans granted in 1957 was mainly because of the sanction, for the first time, of 5 loans in foreign currencies amounting to Rs. 2.21 crores (4.6 million U.S. dollars). The assistance of the Corporation was broad-based and covered a wide range of industries, which included the manufacture of paper, chemicals and pharmaceuticals, fuel injection equipment, electrical equipment, textiles, sugar, metal ores, lime and cement works, glass manufacture, etc. Out of the 36 projects to which the Corporation agreed to give rupee assistance by the end of 1957, 16 were new enterprises. The disbursement of funds out of assistance sanctioned, however, continued to be much less than the amounts sanctioned. As against loans (including those in foreign currencies) amounting to Rs. 5.44 crores sanctioned by the end of 1957, actual disbursements came to Rs. 1.95 crores (or 35.8 per cent), although, as compared to 1956, the position recorded some improvement.

The Refinance Corporation for Industry Private Ltd was registered on June 5, 1956 as a private limited Company in terms of the Indian Companies Act. The Corporation provides re-lending facilities against loans given by banks to industrial concerns for the purpose of increased production primarily in industries included in the Second Five-Year Plan and succeeding Plans. Loans to be eligible for rediscunt must be for periods between 3 and 7 years and of a medium-sized amount, not exceeding Rs. 50 lakhs. These facilities are available only to those industrial concerns whose paid-up capital and reserves (excluding reserves for the payment of taxes and normal depreciation reserves) do not exceed Rs. 2.5 crores in any particular case. The management of the Corporation has been entrusted to a Board of Directors consisting of seven members: the Governor of the Reserve Bank is the Chairman, the other directors being a Deputy Governor of the Reserve Bank, the Chairman of the State Bank of India, the Chairman of the Life Insurance Corporation and three representatives of the banks participating in the Corporation.

(For State Financial Corporations see under each State).

France	15.0	15.7	12.0	12.3
Other Countries	8.3	15.4	15.5	15.0
Total	154.8	184.2	194.0	194.8
COINAGE				
United States	53.2	8.2	31.1	51.4
Saudi Arabia	—	17.2	—	—
Mexico	nominal	2.3	4.9	3.1
Canada	0.9	0.5	2.8	4.7
Other Countries	29.3	22.4	22.3	20.0
Total Coinage	83.4	50.6	61.1	79.2
Total Consumption	238.2	234.8	255.1	274.0

Note. The consumption estimates are by Handy and Harman in their review of the Silver Market of 1956.

As in the preceding year, so during 1957, the price trends in the world silver markets remained steady, the market continuing to be dominated by the U.S. silver laws and the Treasury's policy under these laws. The price fluctuations in the New York market were narrow and the average price for 1957 was virtually the same as for 1956, namely 90.82 cents per ounce. Prices in the London market ranged between 80½d. and 77½d. per ounce.

During 1957, world silver output (outside the U.S.S.R.) remained virtually unchanged at the

1956 level of 223 million ounces. World consumption of silver, on the other hand, is estimated to have increased from 272.6 million ounces in 1956 to 299 million ounces or by about 6 per cent; of this about 209.8 million ounces were used in arts and industries, which as compared to the preceding year, showed a negligible decline of less than one per cent. Consumption for coinage is estimated to have increased further by 29.6 per cent to 79.2 million ounces, the most significant rise in coinage consumption occurring in the U.S.A.

Arrangements for the repayment to the U.S.A. of lend-lease silver were reported to have been completed by all the debtor countries excepting Saudi Arabia and Ethiopia; these two countries have availed themselves of the extension provisions. According to Messrs. Handy and Harman, the estimated total return of lend-lease silver through December 1957 was 353.1 million ounces out of the original lend-lease obligations amounting to 410.8 million ounces.

The following table gives the average silver quotations in New York and London from 1950 to 1957:

	New York Average	London Spot
1950	Cents 74.17	Pence 64.77
1951	79.37	77.86
1952	84.84	74.36
1953	85.19	73.94
1954	85.25	73.48
1955	89.10	77.51
1956	90.82	79.15
1957	90.82	78.93

GOLD

Abroad, the price movement in gold continued to be narrow during 1957. In the London gold market, the range of price variations was only 2sh. 6½d. or slightly over 1 per cent and was largely due to the fluctuations in the U.S. Dollar/Sterling rate; the price in terms of U.S. dollars for gold showed only a variation of ½ per cent.

World gold production (excluding the U.S.S.R.) rose further during 1957 by about 4 per cent from 28.1 million to 29.3 million fine ounces. Reports indicate that during the year, the hoarding demand for gold decreased markedly but, despite this, the volume of turnover in world gold markets recorded an increase; the turnover in the London market was estimated to have risen by 25 per cent. Operations of Central banks, mainly in connection with the E.F.U. monthly settlements, increased in importance and accounted for well over half the turnover in the London market as compared with the previous year's estimate of about a third of the turnover. The year also saw the largest volume of gold sales by the U.S.S.R. (7.5 million ounces) in any year since the War.

World Gold Production (In thousands of fine ounces)

1955-56	9	—	5	—	+ 4	—
1956-57	11	—	—	—	+ 11	—
1957-58	—	—	—	41.84	—	- 41.84

The domestic gold output declined further during 1957 (figures are provisional) to 179,195 ounces (valued at Rs 5 10 crores), as against 209,253 ounces (valued at Rs 5.77 crores) in 1956. Indian silver production, which is relatively quite insignificant, however, rose during the year; the output during 1957 amounted to 126,105 ozs (valued at Rs. 6 03 lakhs), as against 104,604 ozs. (valued at Rs 4 35 lakhs) during 1956. Supplies of bullion to the market were augmented by continued arrivals of contraband gold, although, for some time during the year, smuggling activity appeared to be at a low ebb, in view of the Suez Canal crisis. In silver, the supply position was helped by arrivals of Tibetan silver coins practically throughout the year under review.

The demand for bullion appeared to gather strength during the year, possibly to some extent on account of the imposition of the Wealth Tax. In the result, there was accentuation of bull pressure on the market, with further price increases in both metals. In gold, the ready rate rose over the year from Rs 105.75 to Rs 111.31 per tola and in silver from Rs 179 87 to Rs 195.75 per 100 tolas. The rise was relatively more pronounced in the quarter ended March 1958 which coincided with the busy season to the year.

The volume of futures business during 1957-58 aggregated 24.8 million tolas in gold and 1.1 million bars in silver. These figures compare with a turnover of 52.9 million tolas in gold and 2.3 million bars in silver 1956-57.

During the year, the working of the futures market in bullion in Bombay under the auspices of the Bombay Bullion Association, continued to be, on the whole, smooth. However, towards the close of the year, market activity was characterised by considerable bull manipulations especially in silver and called for remedial action. With the sanction of the Bombay Government, therefore the Governing Board of the Association imposed special margin under bye-law 33A(3). Accordingly, a margin of Rs. 500 per bar became operative from March 26 in respect of all outstanding purchases exceeding 40 bars in silver in either of the then current *Chaitra* or *Vaishakh* settlement. Indicative of the state of comparative normalcy, *rukhs badia* (contango) prevailed during the greater part of the year upto December 1957, in both gold and silver and ranged upto Rs. 1.19 in silver and Rs. 0.50 in gold; however, *undis badia* (backwardation) emerged in the closing quarter of the year and ranged upto Rs. 2 in silver and Rs. 1 in gold.

During the year, no automatic margin under bye-law 33C based on price variations came into operation either in gold or silver. However, bye-law 33D under which margins are linked to

changes in both carry-over charges and contract prices, came into operation thrice each in gold and silver and were against the bulls. Special clearings, under bye-law 104(2), designed to ensure prompt payment of differences when price fluctuations become excessive, came into force in one settlement during the year.

An event of importance during the year relating to futures trading in bullion was the recommendations made by the Forward Markets Commission in their report submitted to the Union Government in May 1957 that (i) forward trading throughout India should be brought within the purview of the Forward Contracts (Regulation) Act, 1952 and that (ii) futures trading in gold and silver might be recognised in Bombay and Delhi only and in respect of silver, in Jaipur and Calcutta only. At present, except in the city of Bombay where futures trading in bullion is governed by the Bombay Forward Contracts Control Act, 1947, such trading at all other centres in the country is free from any Governmental regulation. The Government of India, however, announced their decision on February 18, 1958 that the status quo should continue for the time being.

Smuggled gold seized by Customs during 1956, 1957 and the first half of 1958: 378,188 tolas of gold and 1,967 sovereigns.

This is because price in India was around Rs. 106 per tola, outside Rs. 62.50 per tola.

The following statement gives the highest and lowest spot prices of gold and silver in Bombay with import duties from 1950-51 to 1957-58:—

Gold (per fine tola).

Silver (per 100 tolas gram).

NATIONAL INCOME

THE National income of India at 1948-49 prices was Rs. 11,010 crores in 1956-57, as against Rs. 10,480 crores in 1955-56 and Rs. 10,590 crores in 1954-55 according to the fourth issue of the annual paper on national income released by the Central Statistical Organisation.

The per capita income at 1948-49 prices, according to the report, correspondingly rose from Rs. 271.9 in 1954-55 to Rs. 273.6 in 1955-56 and 284.0 in 1956-57.

The estimates for 1955-56 included in this paper are based on the detailed method of estimation followed for the earlier years and show an upward revision over the preliminary estimates published in 1957. The estimates for 1956-57 are based on partial material and are subject to revision.

National income estimates for 1957-58 are not yet available. However, in view of the estimated decline in production of some important agricultural commodities and the relatively small increase in industrial production, it would appear that the increase in national income (at constant prices), if any, will be of very small proportion.

The table below indicates the trend of national income (or net national output) at 1948-49 prices since 1948-49 :

Year	Net National Output at 1948-49 prices (Rs. crores)	Per capita net output at 1948-49 prices (Rs.)
1948-49	8,650	246.9
1949-50	8,590	245.6
1950-51	8,550	245.2
1951-52	9,100	250.1
1952-53	9,480	256.6
1953-54	10,090	268.7
1954-55	10,290	271.9
1955-56	10,480	273.6
1956-57	11,010	284.0
(Preliminary)		

According to the paper, during the First Five-Year Plan period (1951-52 to 1955-56) the national income in real terms increased by 17.7 per cent, as against the original plan target of 11 per cent. The corresponding rise in the per capita income was 10.5 per cent.

INDEX NUMBERS

The index numbers of national and per capita incomes are given below (1948-49 = 100)

Year	National Income		Per Capita Income	
	At current prices	At 1948-49 prices	At current prices	At 1948-49 prices
1950-51	110.2	102.3	107.4	99.8
1954-55	111.2	118.8	109.0	110.1
1956-56	111.6	120.5	102.1	110.2

BY ORIGIN
The following table indicates national income (at constant prices) by industrial origin :
(In crores of Rs.)

	1956-56	1956-57
Agriculture, animal husbandry and ancillary activities	4,530	5,090
Mining, manufacturing and small enterprises	1,850	1,970
Commerce, transport and communications	1,880	1,980
Other Services	1,730	1,810
Total	9,990	11,400

At current prices, the rise was higher, from Rs. 9,990 crores to Rs. 11,410 crores or 14.2 per cent.

The per capita national income at current prices rose by 12.6 per cent., from Rs. 280.5 in 1955-56 to Rs. 294.3 in 1956-57.

In 1956-57, the rise in national income was contributed by all the four sectors of the economy as compared to only three sectors in the preceding year. The rise in the share of agriculture, animal husbandry and ancillary activities in 1956-57 amounted to Rs. 240 crores in contrast to a fall of Rs. 10 crores in the preceding year. The share of mining, manufacturing and small enterprises rose by Rs. 80 crores, as compared with a rise of only Rs. 60 crores in the preceding year. The share of commerce, transport and communications also increased by Rs. 110 crores as compared with a rise of only Rs. 60 crores in the preceding year. The rise in the share of other services was Rs. 90 crores, the same as in the preceding year.

In terms of current prices, the rise of agricultural sector in 1956-57 was phenomenal owing to the higher level of agricultural prices; the share rose by Rs. 1,160 crores or by 25.6 per cent.

More detailed figures over a longer period are given below.

NATIONAL INCOME BY INDUSTRIAL ORIGIN AT CURRENT PRICES

(In Rs. Abja*)

Item	1956-57 (Preliminary)	1955-56	1954-55	1953-54	1952-53	1951-52

* Abja = Rs. 100 crores.

VALUE OF PRODUCE

The net value of all agricultural commodities produced in 1950-51 was Rs. 4,112 crores. The values of some of the individual commodities are as follows (in Rs. crores):

Arhar 83, Bajra 81, Barley 80, Coconut 76, Cotton 113, Chillies 68, Gram 147, Ground-nut 216, Jowar 194, Rape and Mustard 69, Rice 1,119, Straw 591, Sugarcane 305, Tobacco 71, Wheat 334.

The total net contribution of the manufacturing industries to the national dividend was Rs. 513.4 crores in 1950. The contribution of some individual industries are given below (Rs. crores):

Banking 36.29, Insurance 22.85.

Automobiles and coach building 7.4, Cement 8.5, Chemicals 14.0, Cotton textiles 107.9,

General and electrical engineering 29.4, Iron and Steel 26.0, Jute textiles 46.6, Paper and paperboard 6.4, Rubber and rubber manufacturing 10.1, Sugar 35.8, Tea manufacturing 69.3, Tobacco products 10.5, Vegetable oils 11.7.

Income from health and medical services 116, educational services 69, arts literature and science 66, legal 32, religious and charitable 47, sanitary 37, domestic service 130.

ESTIMATE OF NET OUTPUT PER ENGAGED PERSON : 1948-49

	Net Output (Rs. crores)	No. of Persons Engaged (crores)	Net Output per Engaged Person (Rs.)
Agriculture	4,890	10.36	500
Mining and Factory Establishments	620	0.27	1,700
Small Enterprises	910	1.16	800

NEW METRIC SYSTEM OF WEIGHTS AND MEASURES

THE country started adopting the metric system of weights and measures on 1st October 1958.

On that date the units of mass were introduced in selected areas, and the metric system generally in certain specified industries and Government departments.

It may be mentioned here that in 1955 Parliament passed legislation adopting the Naya Paisa, equal to a hundredth part of the rupee as the unit of currency in place of anna and pie.

The Naya Paisa coins made their first appearance in April 1957. They are expected to replace the old currency by April 1960.

The law (the Standards of Weights and Measures Act, 1956) provides that the system should be adopted in the country within a period of ten years of its coming into force.

The law was passed in December 1956. After December 1956, therefore, it will be the only system recognized by law in the country.

A certified copy of the International Prototype of the Kilogram has been obtained and is in the custody of the Director, National Physical Laboratory. This copy will be the country's prototype kilogram.

A certified copy of the International Prototype Metre was expected to arrive at any time.

The State Governments have been supplied Standard Weights for the use of their Inspectors of Weights and Measures.

Specifications for commercial weights and measures have been published and their manufacture has begun.

Most of the State Governments have set up departments for enforcing weights and measures.

A manual on the metric system has been prepared for teachers and sent to all secondary schools through the State Directors of Public Instruction.

The present arithmetic books include lessons on the metric system, but it will be necessary to give it much greater importance in the teaching of arithmetic.

State Governments had agreed to revise school books as and when they fall due for reprinting.

Teachers have been advised to give more attention to the teaching of the metric system.

Steps are being taken to get the manual translated into Indian languages for use in the primary schools.

A new journal *Metric Measures* has also come into being for purposes of education.

The Indian Standards Institution has the task of drawing up basic standards in metric units, for which they have a ten-year plan.

TRANSITION PERIOD

The introduction of the new system on October 1, 1958 would be phased over a period of two or three years. During this transition period both the existing and the new systems would continue side by side.

There is no compulsion to use the metric weights for the time being.

The change-over is being effected in the same gradual manner throughout the country and the period of transition will be used to educate both the traders as well as the general public in the use of the new weights. Only when a degree of familiarity is achieved in their use, will the new system completely replace the old.

In the selected areas, where the system was introduced on October 1, the use of the existing units will be permitted for a period of two years, i.e., till September 30, 1960.

The metric system would be gradually extended to larger areas where again a transitional period of two to three years would be allowed.

The new system was also introduced on October 1, in major industries like cotton textiles, iron and steel, engineering, heavy chemicals,

cement, salt, paper, refractories, non-ferrous metals, rubber and coffee.

Even in these industries the use of existing units would be permitted for a period of two years.

In the industries, the metric units would be used in the purchase of raw materials and sale of products. The change would be limited to transactions between mills and their suppliers and customers.

Retail trade would not be affected.

For the convenience of the jute industry, where the trading began on July 1, the system came into force on that day in wholesale transactions by mills in the jute industry.

From October 1, Government departments and industrial undertakings could use the metric system in the purchase and supply of stores.

The Indian Airlines Corporation and Air India International Corporation would book cargo and luggage in metric weights and measures.

New surveys of land and mines would be on metric scales.

Metric units would also be used in technical, statistical, scientific and marketing data collected and published by Government departments.

Future surveys and maps will as far as possible, be on metric scales, and with metric contour intervals. Existing maps will continue to be used with conversion scales drawn on them.

Government plans envisage that by the middle of 1960, metric weights would have been introduced over the greater part of the country.

A beginning would also have been made in introducing measures of length and capacity.

By that time many of the Government departments and public undertakings, like the Railways and Posts and Telegraphs, would have gone over to the metric system.

The transition period until then would enable people to familiarise themselves with the new units. It would have caused much inconvenience to the people if the main public utility undertakings had adopted the metric system before the public acquired reasonable familiarity with it.

Areas

The areas in which metric weights were introduced on October 1 are as follows:

Andhra Pradesh: Districts of Vishakhapatnam, Krishna, Guntur, Kurnool, Hyderabad, Warangal, Nizamabad.

Assam: Municipal areas of Gauhati and District of Nowgong.

Bihar: Divisions of Bhagalpur and Ranchi and the Municipal and Notified areas in the districts of Patna, Gaya, Arrah, Chhapra, Muzaffarpur, Champaran and Darbhanga.

Bombay: Municipal areas of Bombay, Poona, Ahmedabad, Rajkot, Baroda, Nagpur, Aurangabad, Sholapur, Kolhapur, Akola, Amravati, Wardha and Yavatmal.

Kerala: Districts of Kozhikode, Ernakulam and Quilon.

Madhya Pradesh: Districts of Bhopal, Indore, Gwalior and Jabalpur.

Madras: Districts of Madras, Chingleput, South Arcot and North Arcot.

Mysore: Districts of Bangalore, Raichur and Dharwar.

Orissa: Municipal areas of Berhampur, Cuttack and Sambalpur.

Punjab: Districts of Amritsar, Jullundur, Ludhiana, Ambala, Patiala and Gurgaon.

Rajasthan: Districts of Ajmer, Bikaner, Jodhpur, Jaipur, Kota and Udaipur.

Uttar Pradesh: Municipal areas of Meerut, Agra, Lucknow, Bareilly, Moradabad, Varanasi, Kanpur, Jhansi, Allahabad and Gorakhpur.

West Bengal: Municipal areas of Calcutta and Howrah.

In addition, the metric system would also be used in regulated markets in the States of Andhra Pradesh, Bombay, Madhya Pradesh, Madras, Mysore and Punjab.

In the case of Union Territories, the metric system was introduced in the whole of Delhi in the two districts of Mandi and Sirpur in Himachal Pradesh, in the municipal areas of Imphal in Manipur, in the municipal area of Agartala in Tripura and in Port Blair in the Andaman and Nicobar Islands.

Government Departments

The Government Departments in which the provisions of the Act came into force on 1st October 1958 by a notification dated 24th June were as follows:

1. The Indian Airlines and Air India International Corporations in so far as they undertake air transport services, except in matters relating to air distances and speed of aircraft.
2. Government Departments and commercial and industrial undertakings owned or controlled by Government in so far as they undertake the purchase or supply of stores, including drugs.
3. Government Departments in so far as they undertake survey of land or mines.
4. Government Departments in so far as they undertake the study or publication of any technical, scientific or marketing data relating to weather, irrigation and power projects or undertake drawings and specifications of scientific apparatus for use in laboratories and educational institutions except in matters relating to air distances and speed of aircraft.

Industries

The industries in which the Act came into force on 1st October 1958 were as follows:

1. Cotton textile mills in so far as they undertake the purchase of cotton or sale of cloth.
2. Iron and Steel factories in so far as they undertake the purchase of raw materials or sale of iron and steel products.
3. Factories engaged in engineering industry in so far as they undertake the sale of their products.
4. Factories engaged in the manufacture of heavy chemicals in so far as they undertake the purchase of raw materials or sale of their products.
5. Factories engaged in the manufacture of cement in so far as they undertake the sale of cement.
6. Factories engaged in the manufacture of salt in so far as they undertake the sale of salt.
7. Factories engaged in the manufacture of paper, pulp, or paper board in so far as they undertake the sale of paper, pulp, or board.
8. Factories engaged in the manufacture of refractories, in so far as they undertake the sale of refractories.
9. Coffee Board in so far as it undertakes the sale of coffee from the surplus pool either by itself or through its agents.
10. Factories engaged in the manufacture of copper, aluminium, lead, antimony and tin in so far as they undertake the sale of copper, aluminium, lead, antimony and tin including alloys and products of these metals.
11. Associations recognised by the Central Government under section 6 of the Forward Contracts (Regulation) Act, 1952 (74 of 1952) in so far as they undertake the regulation and control of forward contracts in cotton.
12. Sale of raw rubber.

THE ACT OF 1955

The Standards of Weights and Measures Act, 1955, is as is already mentioned, the basic law on the subject.

It extends to the whole of India except the State of Jammu and Kashmir.

The Act was passed by Parliament in 1955 December, and some of its provisions came into force, as already mentioned, on 1st October 1955.

Within a period of ten years of its coming into force the whole country is expected to adopt the metric system in full.

The units mentioned in the Act are as follows:

The primary unit of length is a metre, of mass a kilogram, of time a second, of electric current an ampere, of temperature the centigrade scale, of luminous intensity the candela, of area the square metre, of volume the cubic metre.

The primary unit of mass for precious stones shall be a carat which is equal to one-five-thousandth of one kilogram.

The Central Government may by notification declare the secondary units of mass and measures provided it is a multiple or a fraction of ten of such unit.

In any area, or class of goods, or undertakings in which any provisions of this Act have been put in force, the Central Government can still permit the continuance of the use of such weights and measures as may be specified in addition to the standard weights and measures that might have been put into force.

But the period for which the continuance of such use is permitted cannot exceed three years.

The Central Government can make rules to carry out the purposes of this Act, among others about the limits of error which may be tolerated in the use of the standard weights and measures.

The Act repeals the Measures of Length Act, 1889 and the Standards of Weight Act, 1939, and any provisions in the following Acts which correspond to any provisions in the present Act:

1. The Assam Adoption of Standard Weights Act, 1955 (IX of 1955).
2. The Bhopal State Weights and Measures Act, 1953 (XV of 1953).
3. The Bihar Weights Act, 1947 (XVII of 1947).
4. The Bombay Weights and Measures Act, 1932 (XV of 1932).
5. The Central Provinces and Berar Weights and Measures of Capacity Act, 1926 (II of 1926).
6. The Cochin Weights and Measures Act, 1112 (LXIII of 1112).
7. The Coorg Act, 1954 (VII of 1954).
8. The Hyderabad Weights and Measures Act, 1356 Fasli (XIV of 1356 Fasli).
9. The Madhya Bharat Weights Act, 1954 (21 of 1954).
10. The Madras Weights and Measures Act, 1949 (XXII of 1949), as in force in the State of Madras or of Andhra.
11. The Mysore Weights and Measures Act, 1902 (III of 1902).
12. The Orissa Weights and Measures Act, 1943 (VII of 1943).
13. The Punjab Weights and Measures Act, 1961 (XII of 1961).
14. The Rajasthan Weights and Measures Act, 1954 (XIX of 1954).
15. The Travancore Weights and Measures Act, 1955 (VI of 1955).
16. The United Provinces Weights and Measures Act, 1947 (XXIII of 1947).

The tables to enable conversion from non-metric to metric or *vice versa* weights and measures, which are given in the First Schedule to the Act, are reproduced below:

1 grain	= 0.00064799 kilogram.
1 ounce	= 0.0283495 "
1 pound	= 0.4535924 "
1 cwt.	= 50.802 "
1 ton	= 1016.05 "
1 ton	= 0.0116435 "
1 seer	= 0.93310 "
1 maund	= 37.3242 "

Standards of Length and Capacity

1 inch	= 0.0254	metre (exact).
1 foot	= 0.3048	" { " }
1 yard	= 0.9144	" { " }
1 mile	= 1,609.344	" { " }
1 imperial gallon	= 4.54506	litres.

ENFORCEMENT ACT

The model Bill for the enforcement of weights and measures approved by a Conference called by the Standard Metric Committee in July 1957 has been accepted by all State Governments, and legislation based on the Bill has been enacted in all States except the U.P., Bihar and Madhya Pradesh. The State Acts are identical in substance.

It should be emphasized that Weights and Measures laws cannot be effectively administered without a special agency like an Inspectorate of Weights and Measures.

The 1939 Law made by the Central legislature was ineffective largely because even those States which made laws for enforcing the standards had no special agencies for this purpose. Enforcement was left to the police.

The only States that had special agencies were Bombay, Bihar, Mysore, Andhra and the Punjab.

The position is different today. All State Governments have agreed to set up special departments of Weights and Measures. Recruitment has started and training is being given in the Weights and Measures Departments in Bombay and Bihar.

The main provisions of the Madras Act, summarized below in non-legal language will serve as an example of the sort of Enforcement Acts which will be in force:

The Government will have sets of authenticated standard weights and measures which may be called working standards. They will also have sets of secondary standard weights and measures.

There will also be many sets of weighing and measuring instruments to verify the correctness of commercial weights and measures used in trade, business or commercial transactions.

No unit of mass or measure other than standard weight or measure can be used in any transaction once the Act has come into force in any area or in relation to any class of undertakings or goods.

Punishment for the transgression of this is a fine which may extend to Rs. 500 for a first offence, and for a second or subsequent offence with imprisonment for a term which may extend to three months, or with fine, or with both.

The Government has also the power to declare that any specific transaction can be conducted by weight only or by measure only.

Punishment for contravention will be a fine which may extend to Rs. 500.

Every weight or measure used in a transaction shall be made of such material and according to such design as may be prescribed and shall bear the description of the weight or measure marked legibly on it.

No commercial weight or measure or weighing or measuring instrument can be sold or delivered unless it is verified or re-verified, in the proper way.

Punishment for contravention is a fine which may extend to Rs. 500.

No weight or measure or measuring instrument can be used in any transaction unless it has been verified or re-verified in the proper way.

Punishment for contravention for a first offence, a fine which may extend to five hundred rupees, and for a second or subsequent offence, imprisonment for a term which may extend to three months, or with fine, or with both.

If the size of a commercial weight or measure renders it impracticable to have any denomination marked on it Government may exempt such weight or measure from being marked or stamped.

No person can manufacture, repair or sell any commercial weight or measure or any weighing or measuring instrument without a licence.

Punishment for contravention is imprisonment for a term which may extend to three months, or fine, or both.

No one can have for sale any article in a sealed container unless the container shows the net weight or measure of the article.

Punishment for contravention is a fine which may extend to Rs. 500.

Whoever makes or sells weights or measures which he knows to be false, or fraudulently uses weights or measures which he knows to be false or is in possession of them for possible use shall be punished with imprisonment which may extend to one year, or with fine, or with both.

Whoever sells or delivers less than what is purported to be sold or delivered shall, if the deficiency exceeds the prescribed limit of error, shall be punished with fine which may extend to Rs. 500.

Whoever forges or counterfeits any stamp, shall be punishable with imprisonment for a term which may extend to one year, or with fine, or with both.

Whoever knowingly uses or sells or disposes of or exposes for sale weights or measures with such forged or counterfeit stamps on them shall be punishable with imprisonment for a term which may extend to six months, or with fine, or with both.

For administering the Act Government may have a Controller of Weights and Measures, Assistant Controllers and Inspectors.

The Inspector shall verify every weight or measure or measuring instrument which is brought to him, and if it is correct he will stamp it.

He may also inspect at all reasonable times weights and measures and measuring instruments used in transaction of trade and commerce.

Anyone who refuses or neglects to produce for inspection such weights or measures, or refuses to permit an Inspector to inspect or verify, or obstructs or hinders an Inspector shall be punished with a fine which may extend to Rs. 500.

He may also at reasonable times enter any place where weights and measures are used to inspect them.

He may also ask a trader or employee to produce before him weights and measures for inspection.

He may seize and detain a weight or measure with which an offence might be or might have been committed and also seize or detain any article which might have been sold by means of such weights or measures.

He may verify the weight or measure of an article sold or delivered.

He can also break open a sealed package to verify the contents where there is reasonable suspicion, and seize or detain the container and the article.

He can adjust weights and measures in any area where Government thinks such adjustment is necessary.

A manufacturer, repairer or dealer in weights and measures should maintain proper books, records and accounts.

Government may charge fees for grant of licence, verification, marking, stamping and adjustment.

Government may prescribe the limits of error in their own working standards, in commercial weights and measures, in selling articles, in weighing measures and instruments.

Government may make rules to carry out the purposes of this Act.

Any aggrieved person may appeal against a decision of the Inspector to the Controller and of the Controller to the Government. The decision of the appellate officer or of Government is final.

If an Inspector knowingly stamps a weight or measure or weighing or measuring instrument in contravention of the provisions of this Act, or of the rules made thereunder he shall be punishable with imprisonment for a term which may extend to one year, or with fine, or with both.

Cognizance of any offence under this Act can be taken by a court only on a complaint by a Controller or by someone authorized by him.

No court inferior to that of a presidency magistrate's court, or a magistrate of the first class can try any offences under this Act.

ENFORCEMENT POLICY

The general policy in regard to the enforcement of the Weights and Measures Act was framed at a three-day conference of Central and State Government representatives which met in July 1957.

The Conference took a number of decisions.

It was unanimously decided that the enforcement of weights and measures should be transferred from the State List to the Concurrent List and for that purpose the Constitution should be amended.

It was decided that the programmes of the different States for the first stage of change-over to the metric system should be finalised by the end of October 1957.

All States except Mysore and Uttar Pradesh were of the view that the system should be introduced over the entire territory, but in specified fields. U. P. and Mysore are in favour of introducing the system in a limited area and extending it progressively to other parts.

It was agreed that the method of phasing the programme should be left to the individual State Government. A representative of the Centre would, however, visit the States to ensure that programmes were ready by the end of October.

The State representatives agreed that organisation for the enforcement of weights and measures should be set up in all States by the beginning of April 1958.

The offer made by the Bombay Government for training personnel for the enforcement of weights and measures was accepted and it was decided that officers from different States would undergo a six-week training course in Bombay.

The conference decided that the Centre should constitute a Standing Committee to survey the manufacturing potential for metric weights, measures, etc., and recommend steps to ensure adequate supply. The Committee would keep in touch with State Governments.

Regarding land records, it was felt that a wholesale conversion of such records should not be attempted. The conversion can take place during the revision of records at the time of transfer of possession or re-settlement.

It was agreed that from April, 1958, in all indenta for stores for the use of Central and State Governments, quantities and prices should also be expressed in metric units.

For irrigation and power projects of Central and State Governments, the conference recommended that the metric system should be introduced in the projects under investigation and those designed for execution in the third plan. The schedules of rates and standards specifications should be converted when they come up for review in the normal course.

It was decided that from April 1958 kilogram and half kilogram stones should be put up on all roads. The existing mile and furlong stones will remain where they are, for the time being. The kilometre and milestones will be on the opposite sides of the road.

The conference accepted the recommendation of Survey officials that scales for future cadastral maps should be based on certain metric scales. Existing maps will be retained and used till the areas concerned are re-surveyed.

Regarding dry measures, while the majority of States agreed that they should be prohibited, Madras and Kerala did not consider that their abolition would be practicable.

The conference considered a draft model bill for the enforcement of standards of weights and measures and draft rules under the Metric Weights and Measures Act. It was decided that the draft bill and rules would be revised in the light of the discussion and would be circulated to State Governments before they were published.

The conference agreed that intensive publicity should be undertaken through the various media to popularise the metric weights and measures. The Committee suggested that the agency of community projects and panchayats should be utilised for effective publicity in rural areas. Special emphasis was laid on demonstration of different sets of metric weights and measures during exhibitions, fairs and melas.

In his concluding remarks, the Minister of Commerce, Mr. Nityanand Kanungo, asked State representatives to work out details of their financial requirements for the introduction of the metric system. They would then be in a position to have a realistic appreciation of the financial implications of the change-over. He said that the States would not have adequate resources for the purpose.

The Centre would be in a position to decide about financial contribution to the States after they worked out their own estimates.

The estimated requirements of pig iron for the manufacture of new weights is about 7,000 tons per year.

A sample survey of weights and measures in use, was conducted in 1957. It showed that there are about 50 million pieces of weights in use.

These are to be replaced during the next 3 years. This would require about 21,000 tons of pig iron. After three years, 7,000 tons would still be needed annually for the replacement of weights, the estimated life of a weight being about three years.

A rough survey was also made of the capacity of the country for the manufacture of weights and measures. It showed that there is ample capacity for meeting the demand for new weights. The number of establishments which can manufacture weights and measures exceeds 300. A full list of these establishments was published in 'Metric Measures', September, 1958.

METRIC SYSTEM AND INDUSTRIES

Below we give a few notes on how the new system would work out in some of the industries in which it was introduced on October 1, 1958, or likely to be introduced soon after, and the plans that were made in consultation with representatives of the industries concerned.

The sub-committee of the Standing Metric Committee on Engineering Industry observed that there was already a substantial demand for small tools in the metric system. As this demand was expected to increase, the manufacturers of small tools were advised to start making adequate preparations to meet it. Metric small tools were already produced in the country to comply with current requirements to a certain extent.

The question of recalibration of weighing instruments like weigh bridges, platform scales, steel yards, etc., was examined and it was felt that 80 per cent of these machines in the country could be converted without incurring any foreign exchange.

The railways have already made a beginning of recalibration in their workshops.

The meeting decided to constitute a small working group to assess the capacity of indigenous manufacturers for undertaking conversion and examine the details of machines requiring import of spare parts.

The working group was directed to take steps to formulate plans for phasing of recalibration of machines.

The need for imparting basic training in the use of the metric system to skilled and unskilled workers in engineering industry was recognised and the sub-committee recommended that this training should be provided by wide distribution of data sheets.

The question of setting up some organised training courses at the existing small industries service institutes and industrial training establishments is also under contemplation.

JUTE INDUSTRY

Early in 1958, at a joint meeting of representatives of all sectors of the trade it was decided that in the earlier stages the system would be adopted on a voluntary basis, and only then in the better organised sections of the trade, and initially the application of the new system would be confined to expressing weights (of jute bought and finished jute goods sold) in terms of kilograms and the contents of bales of gunny cloth in terms of metres. For a period of two years the old system was to be permitted to exist side by side with the new.

Comprehensive metric conversion tables were prepared by the Indian Jute Mills' Association and issued to the trade, and similar tables for use by raw jute dealers and sellers were compiled and issued jointly by the Bengal Jute Dealers' Association and the Jute Balers' Association.

Overseas buyers, particularly in the U.S.A. and the U.K., on learning of the Government of India's intention to introduce the metric system in the jute industry, informed the Indian Jute Mills' Association and the Calcutta Jute Fabrics Shippers' Association that, whatever system was operating in India, they would insist on their requirements of jute goods being met on the basis of the existing units of weights and measures, and the jute industry subsequently approached the Government of India in order that it might give assurances to its overseas buyers on this question.

The Government of India fully appreciated the importance of ensuring that the introduction of the metric system should not be allowed to interfere with India's export trade and issued the necessary assurances.

By the 1st of July 1958, everything was ready in the trade for the initial change-over. It was at first confined to the Calcutta area, the mills buying their raw materials in terms of the existing weights, with the metric equivalents recorded in the documents of purchase or sale, and the finished fabrics being sold on the same basis.

It is intended that this practice, so far as it relates to raw jute, will gradually work its way back through the trade channels until it reaches the jute growing areas.

In so far as it concerns internal sale of jute fabrics, it is not anticipated that any serious difficulties would arise. Such business is transacted almost entirely in Calcutta, and domestic purchasers such as, for example, the sugar and cement industries, will be at liberty to indent in terms of the existing specifications or, at their option, in terms of metric units: if the latter, the mills will be able to supply their requirements by the simple process of conversion.

Arrangements are now well in hand for introducing the system completely throughout the jute industry and there is general confidence in the trade that the change-over will be accomplished without disrupting relations between the various sections of the trade in India and, most important, the industry's relations with its overseas buyers.

PETROLEUM INDUSTRY

The Petroleum Industry in India is likely to change over to the metric system from April 1, 1960.

A tentative decision to this effect was taken at a meeting of representatives of the industry held in the Ministry of Commerce and Industry in New Delhi on October 14, 1958.

From the date of changeover the metric units of weights and measures would be used for all purposes including sales, tenders and invoices.

Quantities and prices will be shown in metric units.

Service station equipment will be converted to the metric system.

All meters, scales, weighing machines and weights and measures will be in metric units.

Packages will be designed to hold a convenient quantity expressed in metric units. The entire accounting system will also be conducted in metric units.

The industry is making preparations in the meantime.

These will include recalibration of petrol tanks at port terminals, of storage tanks at depots and service stations, railway tank wagons and tank trucks, education of the staff to make them conversant with the new weights and measures, laying down of standards for metal containers and installation of new dispensing pumps and other equipment.

An advisory Committee was set up at the meeting to study the problems involved in the change-over and keep in touch with the various Central, State and Municipal agencies.

SUGAR INDUSTRY

The problem divides itself into three parts. The raw material, the finished product, the technical data relating to plant and machinery.

With very few exceptions sugarcane is delivered on wheeled transport, road or rail. Ideally, the change to the metric system should take place only when factory scales have been converted because to weigh in one system and record in another means using conversion tables, and introduces one additional operation in which there is a chance for error attributable to the human element.

Because of this, no prolonged period of using avoidupois scales and recording in metric weights can be tolerated.

Cane weighing machines will have to be made out in both systems for an initial period.

Growers will very soon realise that a cart load or a lorry load of cane fetches the same reward in rupees whether weighed by maunds or by kilos. To continue the dual system over long is an unnecessary complication.

Sugar is bagged to a standard weight in a bag of standard tare. Alteration of the scale is unimportant, an arrow cut or painted on the steel yard or disc indicating the required gross weight is all that is required. Some of India's sugar is to be exported this year. The sugar bag recognised in all foreign markets is the 100 kilogram bag and most growers prefer to buy in this packing. There is therefore every inducement for the immediate introduction of the 100 kilogram bag.

In respect of the third item, great caution is necessary. There are many standards and if the industry blindly accepts to change it is not seen how haste can help and the change over in this field may wait until other more pressing matters are set to rights.

Going from the particular to the general — The metric system has been accepted. Its implementation should be made as simple as possible. It should be introduced on an industry or product-wise basis and not, as appears to be the intent of some State Governments, on an area basis. This will tend to confuse inter-district transactions.

TEA INDUSTRY

At a conference of representatives of different sections of the tea trade and the Government of India it was agreed that the metric system should be adopted with as little delay as possible consistent with practical considerations such as the need for educative propaganda.

The decision was that the Tea Board's records would adopt the new system from April 1, 1959 from which date figures relating to area of plantations would be represented in hectares (10000 sq metres) in place of acres (corresponding changes would be made in the licences and permits).

In regard to weight, it was the general opinion that the half kilo (equal to 1 lb) should be the unit in place of the pound avoidupois. The change will take effect from April 1, 1960.

Tea chests will for a limited period, show the weight according to both systems and Government and semi-government agencies will make appropriate adjustments in the matter of duty, licences etc.

Conversion to new units will be necessary in regard to fixation of tasks and payments for

plucked leaf by weight. It was agreed that this conversion might also be made with effect from April 1, 1960.

Since these items form the basis for payments to workers during the intervening period weights will be expressed in terms of both the kilo and the seer so as to familiarise the workers with the new system and the relationship between the new and old weights.

This will not, however, change the rate of amount to be paid to workers.

ISI PLAN

In compliance with the wishes of Standing Metric Committee the Indian Standards Institution has prepared a ten-year plan for conversion during which all available Indian Standards will be converted to metric system.

According to this plan which has been followed for the past some years all forewords to Indian Standards would contain a reference to Government of India's decision to adopt the metric system indicating the extent to which this decision is reflected in the standard and the possible future date by which a complete change-over might be expected.

All standards which had been finalized but not printed at the beginning of the plan period were to remain unaltered unless it were possible to introduce metric units as a matter of editorial prerogative without altering the substance of the standard.

All the published standards at present in force based on non-metric units will be considered for the purpose of incorporating metric measurements at the first opportunity when they are taken up for revision or amendment.

During the course of ten years most of these will have been revised or amended in the normal course, others will be taken up specifically for metric revision.

If a particular industry happens not to be prepared just now for the adoption of metric system it will be urged to adopt the interim measure of expressing measurements rationalized in the metric system giving foot-pound equivalents in brackets with the intention of dropping the brackets as soon as the industry becomes ready for the full adoption of the new system, of course within the ten-year plan period.

To facilitate and regulate the manufacture of large quantities of metric weights and measures the Commercial Weights and Measures Sectional Committee of ISI has brought out Indian Standard specifications for commercial metric weights, capacity measures and metric glass dispensing measures.

The basic series of new weights adopted is 5, 3, 2, 1 and in order to avoid confusion during the transition period when both these new weights and old ones will be in use, the shape of the former has been made hexagonal while the latter were generally of circular pattern.

In the case of brass or bronze metric weights, three shapes have been adopted, cylindrical with a handle or knob on top for general bullion trade, flat cylindrical, with straight side, for goldsmiths; and flat cylindrical with distinct downward taper for supplementing cast iron weights.

Capacity Measures

The standard on metric capacity measures covers denominations from 20 millilitres (ml) up to 20 litres.

For measures of higher capacity which are required by petroleum companies and wholesale dealers, separate standards will be issued.

The standard recognizes two types of cylindrical measures, namely, the dipping and the pouring types and one type of conical measure.

Cylindrical measures are generally used in the sale of commodities like milk, while the conical type is preferred for sale of mineral oils. Here also, in order to avoid confusion with the current measures, the new measures are provided with as distinctive a shape as practicable.

The capacity measures prescribed in this standard are meant for liquids only and not intended to be used as dry measures for commodities.

The practice of using dry measures for trade in commodities like foodgrains and oil-seeds is open to criticism and such use, therefore, is to be discouraged.

Wherever dry measures are used it is recommended that the commodity be weighed for the purpose of trade transactions. It is expected, therefore, that dry measures will eventually be withdrawn from trade.

Another series of metric measures used for dispensing purposes are covered in a separate standard which prescribes the requirements for metric measures made of glass or transparent plastic materials.

The dispensing measures are of two types, namely conical and beaker type.

Conical measures have denominations of 200 ml, 100 ml, 50 ml, 20 ml, 10 ml and 5 ml, while the beaker measures are of 1,000 ml and 500 ml capacity.

Length

Two more standards on important items of wide use, namely, the commercial length measures of the non-flexible type and woven metallic tape measures, are under print (Sept. 1958) and when issued would have covered the needs of the most commonly used weights and measures.

Commercial length measures include metallic measures of the denominations of one metre and half metre and wooden measures of 2 metre length.

Metallic measures are meant for use in measuring textiles, ribbons and similar materials.

Wooden measures find application generally in the timber trade.

Tape measures are of 2, 5, 10, 20, 30 and 50 metres. These are made with cotton or linen yarn in the web and metal wire in the warp. They are suitable for various general purposes including the tailoring trade.

Standards on carat weights, steel tapes, etc. meant for specific groups of users are also in hand. Attempt is also being made to prepare standards on weighing machines (September 1958).

Conversion Guides

While effort is being made for early issue of necessary standards for the weights and measures in metric system, another important facet of the Institution's work covers the formulation of standards on conversion factors and tables and conversion guides.

In this connection, the Indian Standard Conversion Factors and Conversion Tables can be regarded as a comprehensive basic document in which are given tables of basic units of all measures along with conversion factors and conversion tables for each particular class of measures.

It covers monetary units, lengths, areas, volume and capacity, weights, temperatures, speeds, density and concentration, stress and pressure, force, energy, power and heat.

To meet the day-to-day needs of the layman another standard giving a smaller number of tables has also been issued.

Mention may also be made here of the effort that is being made by the Institution to make available to the public a handy device for inter-conversion of quantities, which will have the effect of condensing a very large number of tables in what may be called the Indian Standard Slide Tables.

Preparation of a handbook to meet the needs of students of technology and science is also on hand which will cover definitions of fundamental units and quantities, conversion factors, and physical constants and a collection of useful tables.

For the guidance of those concerned, as a daily routine, with inch-millimetre conversion of dimensions preserving interchangeability of parts, another more detailed standard has been issued. This standard entitled Indian Standard method for precise conversion of inch and metric dimensions to ensure interchangeability prescribes ready-made and simple rules and tables, which are based on the principles dealt with in the more general guide mentioned earlier.

Assistance to **Small Industries**

- ★ THE NATIONAL SMALL INDUSTRIES CORPORATION has been set up by the Government of India to provide assistance to small industrial units. The Corporation has undertaken various schemes for the promotion of Small Scale Industries.
- ★ THE CORPORATION assists the small units in securing central Government contracts for supply of Stores. To avail of this assistance, it is necessary for the small units to get themselves enlisted with the SMALL INDUSTRIES SERVICE INSTITUTE of their area. Free supply of Tender Sets issued by the D.G.S. & D. is arranged to such registered units and the State Bank of India advances loans on the security of Raw Material required for the contract under a scheme of the Corporation. Technical assistance is also available from the SMALL INDUSTRIES SERVICE INSTITUTES.
- ★ THE CORPORATION also supplies Industrial Machinery and Machine Tools on easy instalment payment basis to existing small units as well as to new units proposed to be set up.
- ★ THE CORPORATION markets under the Trade Mark 'JANSEVAK' Leather Footwear, Cotton & Woollen Hosiery, Glass-beads, Paints & Varnishes, etc. 'JANSEVAK' products are manufactured by skilled industrial workers, are fair priced and Quality-Marked by Technical Experts.

Issued by:—

**THE NATIONAL SMALL INDUSTRIES
CORPORATION LTD.**

Rani Jhansi Road, NEW DELHI-1

INDUSTRIAL STRUCTURE AND POLICY

FOR particulars about industrial structure one is dependent on the census compiled under the Industrial Statistics Act of 1942.

The latest available census are for 1955.

The total value of output of registered factories in 28 major industries in India more than doubled in the 10 years, 1946 to 1955.

The value of production in 1955 was over Rs. 1,411 crores as against about Rs. 601 crores in 1946.

The productive capital investment in the industries rose from about Rs. 367 crores in 1946 to about Rs. 862 crores in 1955. This includes fixed capital like buildings, plant and machinery, etc. and working capital like stocks of raw materials, finished and semi-finished products, etc.

The number of registered factories also increased by about 50 per cent during the period, that is, from 5,013 in 1946 to 7,424 in 1955.

The number of persons employed in the factories also rose from 15.14 lakhs to about 17.84 lakhs.

The salaries and wages earned by them during the period have gone up by more than 100 per cent. The bill was for Rs. 101.8 crores in 1946 and Rs. 231.14 crores in 1955.

For the purpose of the census, only registered factories, which used power and employed 20 or more workers per day, were taken into account.

The census was confined to 28 major industries in the country.

The industries covered by the census are: cotton, woollen and jute textiles, chemicals, iron and steel, aluminium, copper and brass, bicycles, sewing machines, electric lamps and fans, general engineering and electrical engineering, glass and glassware, ceramics, cement, plywood and teacheats, paper and paper-board, matches, tanning, paints and varnishes, soap, vegetable oils, starch, distilleries and breweries, sugar, fruit and vegetable processing, wheat flour, rice-milling and biscuit-making.

Although the census is statutory, in practice reports are not received from all factories. In 1955, reports were not received from seven per cent of the factories, while in 1946 twenty per cent of the factories did not submit returns.

MADE-IN-INDIA

How Indian are "Made-in-India" machines and engineering products of every day use?

A study made by the technical officers of the Ministry of Commerce and Industry has shown that a high degree of indigenous content has been achieved in their manufacture.

A substantial number of machinery items are now 100 per cent Indian. Among these are tea machinery, electric transmission towers, electric motors, electric fans and lamps, cables, batteries, switches and conductors.

Among other products, which are now cent per cent *sundast*, are clocks, sewing machines and hardware.

A large number of machines and engineering items have reached almost complete indigenous development, the imported components being less than 10 per cent. Among these are railway wagons and coaches (95 per cent), boilers, water softeners, water purification plants (92-96 per cent), fluorescent tubes (95 per cent), bicycles (96-98 per cent), zip fasteners and snap fasteners (99 per cent), pressure stoves, ball-bearings and fountain pens.

Important machine tools, like lathes, shaping machines, presses as well as items of cotton textile machinery like carding engines, spindles and draw frames have also reached an indigenous content of over 90 per cent. Most of these items will be 100 per cent Indian in the next two years with the elimination of the remaining imported components.

Several other machinery items have more than 75 per cent indigenous contents. Among these are alcohol distilleries (80 per cent), sugar

manufacturing machinery, diesel engines (80 per cent), pumps (90 per cent), transformers (80 per cent), switch gear (80 per cent), heavy transformers (75 per cent), radial drills (80 per cent), boiling house machinery (80 per cent) and ring frames (80 per cent).

The wide variety of articles of every day use are becoming increasingly more indigenous. Thus radio sets have 60 per cent Indian components, electrical household articles—75 per cent, typewriters—78 per cent, water meters—75 per cent, electrical house service meters—80 per cent and instruments—80 per cent.

The indigenous content of automobiles has also been increasing. In the case of cars it varies from 38 to 64 per cent and the average content for trucks is about 50 per cent. Jeeps are now 64 per cent Indian. Motor-cycles and scooters are made in India to the extent of 40 per cent. In the next two years, the indigenous content of all these vehicles will increase to 80 per cent or more.

The progressive "Indianisation" of different machinery and engineering products is being achieved through phased programmes of developing indigenous contents. No industrial scheme is approved by Government without the entrepreneur agreeing to adhere to a phased programme so that the article becomes completely Indian in a period of three or four years.

The implementation of the programme is checked periodically to ensure compliance with it.

It is estimated that the production of heavy industrial machinery, including many of the items referred to above, will be of the order of Rs. 80 crores during 1959. Of this the indigenous content will be 80 per cent.

It should be mentioned here that some of the basic raw materials, which are not yet manufactured in India and have, therefore, to be imported, are not taken into account in determining the indigenous content.

INDUSTRIAL POLICY

There are general considerations bearing on the formulation of industrial policy in the context of planning. The Government of India's industrial policy after Independence was shaped broadly in terms of the Industrial Policy Resolution of 1948 (The text of this is given at the end.) That Resolution emphasised clearly the responsibility of Government in the matter of promoting, assisting and regulating the development of industry in the national interest. It envisaged for the public sector an increasingly active role. While it reiterated the inherent right of the State to acquire any industrial undertaking whenever the public interest required it, it laid down, in view of the circumstances then existing, a certain demarcation of fields for the public and private sectors.

Important developments took place after the Resolution was adopted in 1948. There was a clearer appreciation of the goals and direction of development. Planning proceeded on a more organised basis, and it became essential to strengthen and accelerate this effort in the coming years.

The 1948 Resolution was reviewed in the light of these considerations and the experience gained so far, and a new Industrial Policy Resolution was placed before Parliament by the Prime Minister on 30th April 1956. The text of this is given below.

This is now the accepted industrial policy of the Government.

The major part of Government's policy is enshrined in the Five Year Plans, the first of which started in 1951 as also in a series of industrial undertakings collectively known as the public sector. These are dealt with in the article entitled "Government Industrial Undertakings".

In the First Plan the target outlay on industrial development both in the public and private sectors was Rs. 327 crores, about 8 per cent of the total target, outlay on the whole plan. The main emphasis was on agriculture, irrigation and power.

Of this the target for the public sector was Rs. 94 crores and the private Rs. 233 crores. But while the actual investment in the private sector was about the same as the target, in the public sector the actual investment was of the order of Rs. 60 crores.

In the Second Plan the industries and minerals are allocated Rs. 680 crores out of a total Plan outlay of Rs. 4,800 crores.

During 1957-58 the problem of foreign exchange became so acute that a list of what might be called 'core' projects had to be drawn up. A list of these projects is given in the article on the Second Five Year Plan.

The following is a summary of the text of the industrial policy resolution placed before Parliament by the Prime Minister on 30th April 1956.

Eight years have passed since the first declaration on industrial policy. These eight years have witnessed many important changes and developments in India. The Constitution of India has been enacted, guaranteeing certain fundamental rights and enunciating directive principles of State policy. Planning has proceeded on an organised basis, and the first Five-Year Plan has recently been completed. Parliament has accepted the socialist pattern of society as the objective of social and economic policy.

These important developments necessitate a fresh statement of industrial policy, more parti-

cularly as the Second Five-Year Plan will soon be placed before the country. This policy must be governed by the principles laid down in the Constitution, the objective of socialism, and the experience gained during these years.

THREE CATEGORIES

These basic and general principles were given a more precise direction when Parliament accepted in December, 1954, the socialist pattern of society as the objective of social and economic policy. Industrial policy, as other policies, must, therefore, be governed by these principles and directions.

In order to realise this objective, it is essential to accelerate the rate of economic growth and to speed up industrialisation and, in particular, to develop heavy industries and machine making industries, to expand the public sector, and to build up a large and growing co-operative sector.

Equally, it is urgent, to reduce disparities in income and wealth which exist today, to prevent private monopolies and the concentration of economic power in different fields in the hands of small numbers of individuals. Accordingly, the State will progressively assume a predominant and direct responsibility for setting up new industrial undertakings and for developing transport facilities.

It will also undertake State trading on an increasing scale. At the same time, as an agency for planned national development, in the context of the country's expanding economy, the private sector will have the opportunity to develop and expand. The principle of co-operation should be applied wherever possible and a steadily increasing proportion of the activities of the private sector developed along co-operative lines.

The adoption of the socialist pattern of society as the national objective, as well as the need for planned and rapid development, require that all industries of basic and strategic importance, or in the nature of public utility services, should be in the public sector. Other industries which are essential and require investment on a scale which only the State, in the present circumstances, could provide, have also to be in the public sector. The State has, therefore, to assume direct responsibility for the future development of industries over a wider area.

After considering all aspects of the problem, in consultation with the Planning Commission, the Government of India have decided to classify industries into three categories having regard to the part which the State should play in each of them. It should also be remembered that it is always open to the State to undertake any type of industrial production.

In the first category will be industries, the future development of which will be the exclusive responsibility of the State. The second category will consist of industries, which will be progressively State-owned and in which the State will, therefore, generally take the initiative in establishing new undertakings, but in which private enterprise will also be expected to supplement the efforts of the State. The third category will include all the remaining industries, and their future development will, in general, be left to the initiative and enterprise of the private sector.

Industries in the first category have been listed in Schedule A of this resolution. All new units in these industries, save where their establishment in the private sector has already been approved, will be set up only by the State. This does not preclude the expansion of the existing privately owned units, or the possibility of the State securing the co-operation of private enterprise in the establishment of new units when the national interests so require.

Railways and air transport arms and ammunition and atomic energy will, however, be developed as Central Government monopolies. Whenever co-operation with private enterprise is necessary, the State will ensure, either through majority participation in the capital, or otherwise, that it has the requisite powers to guide the policy and control the operations of the undertakings.

Industries in the second category will be those listed in Schedule B. With a view to accelerating their future development, the State will increasingly establish new undertakings in these industries. At the same time private enterprise will also have the opportunity to develop in this field, either on its own or with State participation.

All the remaining industries will fall in the third category and it is expected that their development will be undertaken ordinarily through the initiative and enterprise of the private sector, though it will be open to the State to start any industry even in this category. It will be the policy of the State to facilitate and encourage the development of these industries in the private sector, in accordance with the programme formulated in successive Five-Year Plans, by ensuring the development of transport, power and other services, and by appropriate fiscal and other measures.

The State will continue to foster institutions to provide financial aid to these industries, and special assistance will be given to enterprises organised on co-operative lines for industrial and agricultural purposes. In suitable cases, the State may also grant financial assistance to the private sector. Such assistance, especially when the amount involved is substantial, will preferably be in the form of participation in equity capital, though it may also be in part in the form of debenture capital.

Industrial undertakings in the private sector have necessarily to fit into a framework of the social and economic policy of the State and will be subject to control and regulation in terms of the Industries (Development and Regulation) Act and other relevant legislation. The Government of India, however, recognise that it would,

in general, be desirable to allow such undertakings to develop with as much freedom as possible, consistent with the targets and objectives of the national plan. When there exist in the same industry both privately and publicly owned units, it would continue to be the policy of the State to give fair and non-discriminatory treatment to both of them.

In appropriate cases, privately owned units may be permitted to produce an item falling within Schedule A for meeting their own requirements or as by-products. There will be ordinarily no bar to small privately owned units undertaking production, such as the making of launches and other light-craft, generation of power for local needs and small scale mining. Further, heavy industries in the public sector may obtain some of their requirements of lighter components from the private sector, while the private sector in turn would rely for many of its needs on the public sector. The same principle would apply with even greater force to the relationship between large-scale and small-scale industries.

COTTAGE INDUSTRIES

In relation to some of the problems that need urgent solutions, these offer some distinct advantages. They provide immediately large-scale employment, they offer a method of ensuring a more equitable distribution of the national income and they facilitate an effective mobilisation of resources of capital and skill which might otherwise remain unutilised. Some of the problems that unplanned urbanisation tends to create will be avoided by the establishment of small centres of industrial production all over the country.

The State has been following a policy of supporting cottage and village and small scale industries by restricting the volume of production in the large-scale sector, by differential taxation, or by direct subsidies. While such measures will continue to be taken, whenever necessary, the aim of State policy will be to ensure that the decentralised sector acquires sufficient vitality to be self-supporting and its development is integrated with that of large-scale industry.

The State will, therefore, concentrate on measures designed to improve the competitive strength of the small-scale producer. For this it is essential that the technique of production should be constantly improved and modernised, the pace of transformation being regulated so as to avoid, as far as possible, technological unemployment.

Lack of technical and financial assistance, of suitable working accommodation and inadequacy of facilities for repair and maintenance are among the serious handicaps of small-scale producers. A start has been made with the establishment of industrial estates and rural community workshops to make good these deficiencies. The extension of rural electrification and the availability of power at prices which the workers can afford will also be of considerable help.

Many of the activities relating to small-scale production will be greatly helped by the organisation of industrial co-operatives. Such co-operatives should be encouraged in every way and the State should give constant attention to the development of cottage and village and small-scale industries.

REGIONAL DEVELOPMENT

In order that industrialisation may benefit the economy of the country as a whole, it is important that disparities in levels of development between different regions should be progressively reduced. The lack of industries in different parts of the country is very often determined by factors such as availability of the necessary mineral and other natural resources. A concentration of industries in certain areas has been due to the ready availability of power, water supply and transport facilities which have been developed there. It is one of the aims of national planning to ensure that these facilities are steadily made available to areas which are at present lagging behind industrially or where there

is greater need for providing opportunities for employment, provided the location, is otherwise suitable.

This programme of industrial development will make large demands on the country's resources of technical and managerial personnel. To meet these rapidly growing needs for the expansion of the public sector and for the development of village and small-scale industries, proper managerial and technical cadres in the public services are being established.

Steps are also being taken to meet shortages at supervisory levels, to organise apprenticeship schemes of training on a large-scale both in public and in private enterprises and to extend training facilities in business management in universities and other institutions.

The living and working conditions of workers should be improved and their standard of efficiency raised. The maintenance of industrial peace is one of the prime requisites of industrial progress. In a socialist democracy labour is a partner in the common task of development and should participate in it with enthusiasm.

Some laws governing industrial relations have been enacted and a broad common approach has developed. With the growing recognition of the obligations of both management and labour there should be joint consultation and workers and technicians should, wherever possible, be associated progressively in management. Enterprises in the public sector have to set an example in this respect.

With the growing participation of the State in industry and trade, the manner in which these activities should be conducted and managed assumes considerable importance. Speedy decisions and a willingness to assume responsibility are essential if these enterprises are to succeed. For this, wherever possible, there should be decentralisation of authority and their management should be along business lines. It is to be expected that public enterprises will augment the revenues of the State and provide resources for further development in fresh fields. But such enterprises may sometimes incur losses. Public enterprises have to be judged by their total results and in their working they should have the largest possible measure of freedom.

SCHEDULE A

The future development of the following industries will be the exclusive responsibility of the State.

1. Arms and ammunition and allied items of defence equipment.
2. Atomic energy.
3. Iron and steel.
4. Heavy castings and forgings of iron and steel.
5. Heavy plant and machinery required for iron and steel production, for mining, for machine tool manufacture and for such other basic industries as may be specified by the Central Government.
6. Heavy electrical plant including large hydraulic and steam turbines.
7. Coal and lignite.
8. Mineral oils.
9. Mining of iron ore, manganese ore, chrome ore, gypsum, sulphur, gold and diamond.
10. Mining and processing of copper, lead, zinc, tin, molybdenum and wolfram.
11. Minerals specified in the schedule to the Atomic Energy (Control of Production and Use) Order, 1958.
12. Aircraft.
13. Air transport.
14. Railway transport.
15. Shipbuilding.
16. Telephones and telephone cables, telegraph and wireless apparatus (excluding radio receiving sets).
17. Generation and distribution of electricity.

SCHEDULE B

The following industries will be progressively State-owned. The State will generally take the initiative in establishing new undertakings but private enterprise will not be excluded.

1. All other minerals except "minor minerals" as defined in section 3 of the Minerals Concession Rules, 1949.
2. Aluminium and other non-ferrous metals not included in Schedule "A".
3. Machine tools.
4. Ferro alloys and tool steels.
5. Basic and intermediate products required by chemical industries such as the manufacture of drugs, dyestuffs and plastics.
6. Antibiotics and other essential drugs.
7. Fertilizers.
8. Synthetic rubber.
9. Carbonisation of coal.
10. Chemical pulp

11. Road transport.
12. Sea transport.

It is from these schedules and the foregoing policy announcement that Government entered the industrial field and set on foot a large number of industrial undertakings.

A full list of these with notes on their progress is given in the chapter entitled, "Government Industrial Undertakings".

ORIGINAL RESOLUTION

The original declaration of industrial policy was made on April 6, 1948 by the Government of India and is given below for purposes of record. This has been superseded by the one given at the top of this article.

(1) The manufacture of arms and ammunition, the production and control of atomic energy, and the ownership and management of railway transport should be the exclusive monopoly of the Central Government.

(2) The State will be responsible for the establishment of new undertakings in the field of coal, iron and steel, aircraft manufacture, ship-building, manufacture of telephone, telegraph and wireless apparatus excluding radio receiving sets and mineral oils. Existing undertakings will be allowed to develop for a period of ten years and Government will give all assistance for such development. At the end of the period their position will be reviewed.

(3) Control by the State over the generation and distribution of electric power will continue.

(4) Rest of the industries will normally be open to private enterprise with varying degrees of control over location.

(5) The Central Government would investigate the extent to, and the manner in which cottage and small scale industries could be co-ordinated and integrated with large scale industries.

This policy was re-affirmed in the course of a debate in December 1954, though Government had set a new goal for the country—the establishment of a socialistic pattern of society.

INDUSTRIES DEVELOPMENT & REGULATION ACT

Towards the end of 1951, Parliament passed the Industries (Development and Regulation) Bill. The Act applied to 37 industries listed in the First Schedule to the Act.

The Act was amended in 1956 when new industries were added to the list.

The most important provision is the establishment of Development Councils which deal with the problem of productivity and service to the community.

At the top is the Central Advisory Council for Industries which advises Government on rules, directions to industrial undertakings and taking over the management of industrial concerns.

The Act provides for the registration of existing industrial undertakings and licensing of new ones.

It also empowers Government to investigate into the causes of any possible fall in the production of any concern or any deterioration in the quality of the product, and to take action.

The Act contains provisions for direct control by the Central Government in certain cases.

The Central Advisory Council of Industries was established in 1952 consisting of 27 representatives of industry, labour, consumers and primary producers pertaining to the scheduled industries.

A Licensing Committee was also set up consisting of representatives of the Ministries of Commerce and Industry, Finance, Railways, Production and of the Planning Commission to examine application for licences.

During the period 21st March 1957-31st December, 1957 the Licensing Committee set up under the Industries (Development and Regulation) Act, 1951, examined 998 applications for licences. Out of these 712 applications were approved and 184 applications were rejected. The others were deferred for consideration to a later date mainly because the Committee desired that a more detailed examination of these cases should be made before an opinion could be expressed on their relative merits.

Of the application approved 204 were for the establishment of new industrial undertakings; 328 for effecting substantial expansion; 79 for the manufacture of new articles; 9 were for changing the location of industrial undertakings and 92 for carrying on the business of existing undertakings under Section 13-1 (a) and 13-1 (c) of the Act.

During the period 1st March 1957 to 31st October 1957, 587 applications for registration were received from industrial undertakings engaged in industrial activity brought under the purview of the Industries Act, as amended by the Amendment Act, 1956. Registration Certificates were issued to 401 industrial undertakings.

Government restored two sugar mills, which were managed by authorised Controllers appointed under Section 18A of the Act, to the previous owners. As on 31st December 1957, the affairs of three sugar factories were being managed through authorised Controllers appointed by the Government.

There are now Development Councils for Heavy Chemicals (Acids and Fertilizers), Internal Combustion Engines and Power-driven Pumps and Sugar, Light Electrical and Heavy Electrical Industries, Pharmaceuticals and Drugs, Heavy Chemicals (Alkalies), Non-Ferrous Metals and Alloys, Woollen Textiles and Art Silk Textiles, Machine Tools and Bicycles.

Where an industry was not sufficiently developed, a number of Panels or Expert Committees for inquiring into and studying the problems were set up. The following is the list of the Panels and Committees thus set up: Agricultural Tractors; Aluminium; Earth Moving and Allied Equipment, Electronics and Wireless Equipment, Paper and Pulp, X-Ray Equipment; Surgical Appliances; Power Alcohol, and Sago.

REGULATED INDUSTRIES

All undertakings pertaining to the industries below, employing 50 or more workers with the aid of power, or 100 or more workers without the aid of power, fall within the purview of the Industries (Development and Regulation) Act, 1951, as amended.

1. **METALLURGICAL INDUSTRIES:** *Ferrous:* Iron and steel (metal); Ferro-alloys; Iron and Steel castings and forgings; Iron and Steel structural; Iron and Steel pipes; Special steels; Other products of iron and steel. *Non-ferrous:* Non-ferrous metals and alloys; Semi-manufactures and manufactures.

2. **FUELS:** Coal, lignite, coke and their derivatives; Mineral oil (crude oil), motor and aviation spirit, diesel oil, kerosene oil, fuel oil, diverse hydrocarbon oils and their blends including synthetic fuels, lubricating oils and the like; Fuel gases—(coal gas, natural gas and the like).

3. **BOILERS AND STEAM GENERATING PLANTS.**

4. **PRIME MOVERS (OTHER THAN ELECTRICAL GENERATORS):** Steam engines and turbines; Internal combustion engines.

5. **ELECTRICAL EQUIPMENT:** Equipment for generation, transmission and distribution of electricity including transformers; Electrical motors; Electrical fans; Electrical lamps; Electrical furnaces; Electrical cables and wires; X-ray equipment; Electronic equipment; Household appliances such as electric irons, heaters and the like; Storage batteries; Dry cells.

6. **TELECOMMUNICATIONS:** Telephones; Telegraph equipment; Wireless communication

apparatus; Radio receivers, including amplifying and public address equipment; Television sets; Teleprinters.

7. **TRANSPORTATION:** Aircraft; Ships and other vessels drawn by power; Railway locomotives; Railway rolling stock; Automobiles (motor cars, buses, trucks, motor cycles, scooters and the like); Bicycles; Others, such as fork lift trucks and the like.

8. **INDUSTRIAL MACHINERY:** *Major items of specialised equipment used in specific industries:*—Textile machinery (such as spinning frames, carding machines, powerlooms and the like) including textile accessories; Jute machinery; Rayon machinery; Sugar machinery; Tea machinery; Mining machinery; Metallurgical machinery; Cement machinery; Chemical machinery; Pharmaceuticals machinery; Paper machinery.

General items of machinery used in several industries, such as the equipment required for various "unit processes": Size reduction equipment—crushers, ball mills and the like; Conveying equipment—bucket elevators, skip hoists, cranes, derricks and the like; Size separation units—screens, classifiers and the like; Mixers and reactors—kneading mills, turbo mixers and the like; Filtration equipment—filter presses, rotary filters and the like; Centrifugal machines; Evaporators; Distillation equipment; Crystallizers; Driers; Power driven pumps—reciprocating, centrifugal and the like; Air and gas compressors and vacuum pipes (excluding electrical furnaces); Refrigeration plants for industrial use; Fire fighting equipment and appliances including fire engines.

Other items of Industrial Machinery: Ball, roller and tapered bearings; Speed reduction units, Grinding wheels and abrasives.

9. **MACHINE TOOLS.**

10. **AGRICULTURAL MACHINERY:** Tractors, Harvesters and the like; Agricultural implements.

11. **EARTH-MOVING MACHINERY:** Bulldozers, dumpers, scrapers, loaders, shovels, drag lines, bucket wheel excavators, road rollers and the like.

12. **MISCELLANEOUS MECHANICAL AND ENGINEERING INDUSTRIES:** Plastic moulded goods; Hand tools, small tools and the like; Razor blades.

13. **COMMERCIAL, OFFICE AND HOUSEHOLD EQUIPMENT:** Typewriters; Calculating machines; Air conditioners and refrigerators; Vacuum cleaners; Sewing and knitting machines; Hurricane lanterns.

14. **MEDICAL AND SURGICAL APPLIANCES:** Surgical instruments—sterilizers, incubators and the like.

15. **INDUSTRIAL INSTRUMENTS:** Water meters, steam meters, electricity meters and the like; Indicating, recording and regulating devices for pressure, temperature, rate of flow, weights, levels and the like; Weighing machines.

16. **SCIENTIFIC INSTRUMENTS.**
17. **MATHEMATICAL, SURVEYING AND DRAWING INSTRUMENTS.**
18. **FERTILISERS:** Inorganic, Organic and Mixed.
19. **CHEMICALS (OTHER THAN FERTILISERS):** Inorganic heavy chemicals; Organic heavy chemicals; Fine chemicals including photographic chemicals; Synthetic resins and plastics; Paints, varnishes and enamels; Synthetic rubbers; Man-made fibres including regenerated cellulose-rayon, nylon and the like; Coke oven by-products; Coal tar distillation products like naphthalene, anthracene and the like; Explosives including gun powder and safety fuses; Insecticides, fungicides, weedicides and the like; Textile auxiliaries; Sizing materials including starch; Miscellaneous chemicals.
20. **PHOTOGRAPHIC RAW FILM AND PAPER:** Cinema film; Photographic amateur film; Photographic printing paper.
21. **DYE-STUFFS.**
22. **DRUGS AND PHARMACEUTICALS.**
23. **TEXTILES (INCLUDING THOSE DYED, PRINTED OR OTHERWISE PROCESSED):** made wholly or in part of cotton, including cotton yarn, hosiery and rope; made wholly or in part of jute, including jute, twine and rope; made wholly or in part of wool, including wool tops, woollen yarn, hosiery, carpets and druggets; made wholly or in part of silk including silk yarn and hosiery; made wholly or in part of synthetic, artificial (man-made) fibres, including yarn and hosiery of such fibres.
24. **PAPER AND PULP INCLUDING PAPER PRODUCTS:** Paper—writing, printing and wrapping; Newsprint; Paper board and straw board; Paper for packaging (corrugated paper, kraft paper, paper bags, paper containers and the like); Pulp—wood pulp, mechanical, chemical, including dissolving pulp.
25. **SUGAR.**
26. **FERMENTATION INDUSTRIES:** Alcohol; Other products of fermentation industries.
27. **FOOD PROCESSING INDUSTRIES:** Canned fruits and fruit products; Milk foods; Malted foods; Flour; Other processed foods.
28. **VEGETABLE OILS AND VANASPATHI:** Vegetable oils, including solvent extracted oils, Vanaspathi.
29. **SOAPS, COSMETICS AND TOILET PREPARATIONS:** Soaps, Glycerine, Cosmetics; Perfumery; Toilet preparations.
30. **RUBBER GOODS:** Tyres and tubes; Surgical and medicinal products including prophylactics, Footwear, Other rubber goods.
31. **LEATHER, LEATHER GOODS AND PICKERS.**
32. **GLUE AND GELATIN.**
33. **GLASS:** Hollow ware, Sheet and plate glass; Optical glass, Glass wool; Laboratory ware; Miscellaneous ware.
34. **CERAMICS:** Fire bricks; Refractories; Furnace lining bricks—acidic, basic and neutral; China ware and pottery; Sanitary ware; Insulators, Tiles.
35. **CEMENT AND GYPSUM PRODUCTS:** Portland cement, Asbestos cement; Insulating boards; Gypsum boards, wall boards and the like.
36. **TIMBER PRODUCTS:** Plywood; Hard-board, including fibre-board, chip-board and the like; Matches; Miscellaneous (furniture components, bobbins, shuttles and the like).
37. **DEFENCE INDUSTRIES:** Arms and ammunition.
38. **MISCELLANEOUS INDUSTRIES:** (Cigarettes

The Government of India have decided (Jan. 1959) to bring within the scope of the registration and licensing provisions of the Industries (Development and Regulation) Act the following industrial gases...

Hydrogen gas of all varieties; nitrogen gases of all varieties; carbon dioxide gas of all varieties; refrigerant gases of dichlorodifluoro methane and allied groups; rare gases like

helium, argon, neon, krypton, neon, etc.; fire extinguishing gases of chlorobromo methane and allied groups; nitrous oxide; propane; cyclopropane and ethylene.

Explanation 1.—The articles specified under each of the headings Nos. 3, 4, 5, 6, 7, 8, 10, 11 and 13 shall include their component parts and accessories.

Explanation 2.—The articles specified under each of the headings Nos. 18, 19, 21 and 22 shall include the intermediates required for their manufacture.

STATE AID

State aid is given in a number of ways. The various financial corporations give financial assistance.

The National Industrial Development Corporation grants loans for the modernisation of plant, for especially in the textile, jute and also for the machine tool industry.

The Corporation has approved loan applications from 11 jute mills and 7 cotton mills for amounts totalling about Rs. 2.63 crores and Rs. 1.66 crores respectively. Out of these, sums totalling about Rs. 51 lakhs have actually been advanced to two jute mills.

The Industrial Finance Corporation affords financial assistance in the form of advances and long-term loans to industrial concerns.

The State Financial Corporations assist medium and small-scale industries that fall outside the scope of the all-India Corporations.

(There are factual notes on the National Industrial Development Corporation and the Industrial Finance Corporation in the Chapter on 'Corporations'. For notes on State Corporations see under individual States.)

Technical assistance is arranged through the Joint Four Programme, the Colombo Plan and the U.N. Technical Assistance schemes.

Tariff is regulated to foster indigenous industry. Tax concessions are made (see below under 'Foreign Capital'). Foreign exchange is granted under a system of priorities, especially to facilitate the import of essential raw material and basic intermediates.

In the current policy governing the budgeting of foreign exchange, maintenance requirements in the economy have a high priority. In relation to the Plan, it has been laid down that foreign exchange allotments should be limited in the main to commitments which arise in relation to the 'core' projects, i.e. steel plants, coal mining, railways, and certain power projects.

Outside the 'core', new commitments in foreign exchange are permitted only in respect of those projects whose entire foreign exchange cost is covered by foreign credits or investment and, in certain circumstances, by appropriate deferred payment arrangements.

NATIONAL PRODUCTIVITY COUNCIL

A National Productivity Council works to help increase general productivity.

This is an autonomous body and was registered in New Delhi on 12th Feb. 1958 as a society under the Societies Registration Act, 1860.

There were four local Councils in Bombay, Mysore, Madras and Coimbatore in March 1959.

The Council will launch a campaign for increasing productivity initially in all spheres of industries including large-scale, medium, small scale and light industries. It will promote the establishment of local, regional and industry-wide productivity councils, through which productivity services will be made available.

The NPC will organise and promote scientific studies and techniques, arrange for training and visits of technicians and executives to various plants within and outside the country. Research and continuous dissemination of technical knowledge will be one of the main functions of the Council. Information on all aspects of productivity will be centrally available and queries will be answered, facilitating exchange of ideas.

During 1958-59 fifteen Councils on State regional and local basis are to be set up.

The Councils consist of representatives of Government Departments, employers' associations and labour organisations.

INDUSTRIAL ESTATES

Another feature of the industrial policy is the establishment of industrial estates. This was initiated in 1955.

The main object is decentralisation. Government seeks to remove small industrial units from crowded urban areas and thus reduce the pressure on the latter, and secondly it seeks to provide small units with factory space and common facilities for efficient working.

The State Governments acquire and develop land, construct roads, put up factory buildings, arrange for supply of water and electricity and also set up common service workshops. The factory buildings in the States are then let out at concessional rents, outright sale or hire-purchase basis to small entrepreneurs.

The Government of India advance to the States the entire cost of the estates as loans. Grants are also given for specific purposes, such as, planning and designing of these estates.

These industrial estates provide better accommodation for small industries with facilities of power, water, etc. They bring industries together and facilitate the establishment of common servicing centres, introduction of modern techniques, collective purchase of raw materials and sale of finished products. They stimulate the co-operative spirit among them.

Industrial estates are of two kinds—large estates near big cities and urban areas and small ones in community development blocks.

The larger estates cost roughly from Rs. 20 to 30 lakhs, the smaller ones from Rs. 2 to 3 lakhs.

Up to the end of 1958, Government of India sanctioned the setting up of 78 industrial estates in different parts of the country. Of the schemes sanctioned, 16 industrial estates were completed and occupied, while others were under construction.

The provision for Industrial Estates in the second Five-year Plan has been increased from Rs. 10 crores to Rs. 15 crores. Up to the end of 1957, loans to the extent of Rs. 2.75 crores and grant of Rs. 13.50 lakhs for 54 Estates had been sanctioned.

FOREIGN CAPITAL

Foreign investments in India have been steadily growing over the past years. In 1948, it stood at Rs. 287.7 crores and in 1955, it rose to Rs. 487.7 crores. By the end of 1957 foreign investment in India had increased by another Rs. 150 crores, according to unofficial estimates.

The Government of India have been fully aware of the contribution that foreign investment can make to the country's progress and in computing the resources for the Second Five Year Plan. They have taken a sum of Rs. 100 crores as fresh foreign investment likely to materialise during that period.

The Government of India's policy in regard to foreign capital was explained by the Prime Minister in a statement made on 9th April 1949.

The salient features of this statement are as follows:

1. All undertakings, Indian or foreign, will conform to the general requirements of Government's industrial policy.

2. As regards existing foreign interests no restrictions or conditions will be imposed which are not applicable to similar Indian undertakings.

3. Facilities for the remittance of profits or even withdrawal of foreign capital investment would continue subject only to foreign exchange considerations.

4. If and when foreign enterprises are compulsorily acquired, compensation will be paid on a fair and equitable basis.

5. In the matter of the participation of foreign capital and enterprise major interest in ownership and effective control should save in exceptional cases be in Indian hands. But in all cases however the training of suitable Indian personnel for the eventual replacement of foreign experts will be insisted on.

Other points may be set out as follows:

Government have followed a policy of encouraging capital participation with Indian collaborators by foreign companies. In principle, the cost of capital equipment to be imported is allowed, at a minimum, to be financed from abroad. This is permitted as equity participation itself or as equity and loans combined. Over and above this minimum, while Government are of the view that to the extent possible, majority control must be in Indian hands, in suitable cases, foreign investment as bulk of the capital structure is allowed.

Where both Indian and foreign interests agree that foreign participation must be by loans rather than by equity capital a suitable rate of interest is allowed.

Under the recent amendments to the Income Tax Act, such loans—on specific application—can be free of income tax.

The Government of India have entered into a convertibility arrangement with the U.S.A. Under this, the U.S. Government will guarantee to the American investor in India the convertibility into dollars of his investments in projects approved by the Government of India and of his income from them.

Indian companies are welcome to obtain the services of foreign experts or consultants who are necessary.

Government approval is given to payments by Indian companies to foreign collaborators towards research fees, technical services, etc. In giving such approval, the amounts to be paid once settled by the parties themselves are generally not interfered with.

So far as royalty is concerned, a distinction is made between the element of royalty as such, and the element of services rendered abroad by the foreign collaborator. The latter is exempt from tax. About royalty itself, Government are not committed to any particular rate though 5 per cent is, in practice, found to be generally the maximum rate. But in specific cases Government have permitted royalties in excess of this percentage. There have been practically no instances where negotiations between two parties have broken down because Government declined to approve a particular rate of royalty as being unduly high.

TAXATION

The Government of India have provided substantial tax concessions by way of incentives for the industrial development of the country. The more important of these tax concessions are, to mention briefly:

(a) Exemption from income-tax of the profits made by industrial undertakings newly established, during the first five years from the commencement of manufacturing operations.

(b) Exemption from income-tax to a shareholder in a newly established industrial company, of the dividends he receives from the company out of the profits exempt from tax in the hands of the company.

(c) Exemption from super-tax to a company for an indefinite period on the dividends it receives from an Indian company established after March 31, 1952, and engaged wholly or mainly in certain specified important industries.

(d) For all business enterprises, an outright allowance, known as "development rebate" of 25 per cent of the cost of new plant and machinery (40 per cent in the case of ships) in the first year of installation of the asset, thereby enabling the enterprises not only to write off the full cost over a period of years by way of depreciation allowances but also to get further tax relief on 25 per cent of the cost.

(e) Outright deduction or amortisation over a period of five years of expenditure incurred by business undertakings on scientific, statistical

or social research relating to the class of business carried on.

(f) Application of a concessional rate of super-tax in respect of dividend incomes received by a company from an Indian subsidiary company.

(g) Exemption from wealth-tax for newly established industrial companies on their net worth for a period of five successive assessment years, following their incorporation.

(h) Exemption from wealth-tax to individual shareholders on their investments in shares of newly established industrial companies, during a period of five successive assessment years following the establishment of the companies.

(i) Exclusion from net worth for purposes of wealth-tax in the case of all companies of the value of shares held by them in other companies.

In addition there are certain other incentives which are of value particularly to the foreigners:

(1) Exemption from income-tax is conferred on interest payable—

(i) by an industrial undertaking in India on moneys borrowed by it under a loan agreement with a financial institution of a foreign country, if the institution is approved by the Government of India;

(ii) by an industrial undertaking in India on moneys borrowed or debt incurred by it abroad in respect of purchases of plant and machinery from abroad, if the transaction is approved by the Government of India.

(2) Exemption from income taxation to a technician of foreign nationality employed by an undertaking in India in respect of the remuneration received by him for services rendered as such technician during a period of 365 days from the date of his arrival in India. Further, if the contract of service is approved by the Government of India before commencement of the technician's services in India, the exemption is continued for a further period so that he does not have to pay tax on his Indian remuneration during the financial year of his arrival in India and the two succeeding financial years.

One problem of practical importance which has also been a source of great misgiving to investors abroad has been the absence of any agreements between India and the foreign countries for avoidance of double taxation, and the uncertainty of their getting adequate relief in their own country. One serious difficulty faced by the Indian Government in the conclusion of agreements for the purpose was the unwillingness of the industrially and economically advanced countries to depart from the pattern of the agreements they had already concluded with countries of equal industrial and economic status, and the inability of India, with her poor and underdeveloped economy, to subscribe to that pattern.

Recently, a delegation of senior officials of the Government of India visited a number of European countries, and agreements at official level have recently been reached with West Germany, Pakistan, Ceylon, Norway, U.S.A., Switzerland (for air transport only) and Sweden.

COMPANY LAW

Foreign companies, i.e., companies incorporated in countries outside India and having places of business in this country are governed by Sections 591 to 608 of the Companies Act. In form as in substance, the provisions of the new Act on this subject are similar to those of the English Companies Act, 1948 as contained in Sections 406 to 423 of that Act. These provisions are not very different from the corresponding provisions in the 1913 Indian Act either, except in regard to those relating to the submission of accounts.

There is no discrimination in any of these provisions against the foreign companies. On the contrary, the accounts provisions are decidedly in favour of them as compared with the corresponding provisions applicable to companies registered in India.

A new feature of the present law is that the foreign companies are now required to file their accounts and related documents with the Registrar of Companies, Delhi, in addition to filing

such documents with the Registrars of Companies of the States in which they may have their principal places of business. The new arrangement facilitates the centralisation of documents and records relating to foreign companies at one place in the country.

The Government has decided that the requirements of the clause (a) of sub-section (1) of Section 594 should apply to foreign companies with a share capital subject to the following exceptions and modifications:

(i) A foreign company should, in respect of its Indian business, submit to the appropriate Registrar in triplicate its balance sheet and profit and loss account in such form, containing such particulars and including or having annexed or attached thereto such documents as under the provisions of the Act it would, if it had been a company within the meaning of the Act, have been required to make out and lay before the company in general meeting.

(ii) The working capital earmarked for its branch, if any, should be shown in the balance sheet.

(iii) The profit and loss account in respect of its Indian business should disclose the net profit or loss for the year transferred to its principal office in the country of incorporation.

(iv) The balance sheet and profit and loss account of the Indian business of the foreign company, in terms of clause (i) should be audited by such person or persons and in such manner as laid down in the Act. In regard to the balance sheet and profit and loss account relating to a period ending on or before 31st day of March 1959, it would be deemed sufficient compliance with the law if such documents were audited by auditors of the foreign company in the country of its incorporation.

(v) A foreign company which, if incorporated under the Act would have been deemed to be a private company within the meaning of clause (iii) of sub-section (1) of section 3 of the Act, should not be required to submit the profit and loss account of its Indian business.

(vi) A foreign company should also submit to the appropriate registrar three copies of the authenticated balance sheet and profit and loss account (including documents relating to every subsidiary of the foreign company) as submitted by it to the prescribed authority in the country of its incorporation under the provisions of the law in that country.

(vii) If there is any difficulty in reconciling the balance sheet and profit and loss account of a foreign company submitted in accordance with clause (i) with the balance sheet and profit and loss account filed by that Company in the country of its incorporation, the Central Government would have the right to seek clarification or demand the preparation of the balance sheet and profit and loss account filed in that country, as far as practicable, in such form as it would have been required to make out and lay before the company in a general meeting, if it had been a company within the meaning of the Act. A foreign company should be bound to furnish such clarification or comply with such demand as the Central Government might make.

(viii) In regard to foreign shipping or airlines companies, it should be deemed to be sufficient compliance with the provisions of Part II of Schedule VI to the Act, if the profit and loss accounts of such companies prepared in terms of clause (i) disclosed, under broad heads, the items of indirect expenditure (relating to an entire voyage or flight which could not be directly charged against the Indian business of such companies) allocated on a reasonable basis.

(ix) It should be deemed sufficient compliance with the provision of section 594 of the Act if the balance sheets in respect of the period ending on or before the 31st day of December 1959, were filed in the manner laid down in sub-section (3) of section 277 of the Indian Companies Act, 1913.

ALCOHOL INDUSTRY

INDUSTRIAL alcohol is a very valuable material in the manufacture of chemicals like acetone, acetic acid, ether, chloroform, ethyl acetate, etc. It is also necessary as a solvent in the manufacture of fine chemicals, medical preparations, toilets, etc. Since the last war, its importance has increased. It is now essential in the manufacture of ammunition and of artificial rubber.

In 1957 there were as many as 17 power alcohol distilleries capable of producing over 13 million gallons of industrial alcohol. In addition, there were 24 distilleries producing potable and industrial alcohol. The capacity of these units for industrial alcohol was estimated at 9.3 million gallons. At present the capacity for industrial alcohol is estimated at 14.9 million gallons per annum (44 producing units). The trend of production has been as follows:

Year	Rectified spirit (000 gals.)	Denatured spirit (000 gals.)
1950	3,435	1,477
1951	5,019	1,967
1952	4,668	2,178
1953	4,376	2,493
1954	4,630.8	2,835.6
1955	5,156.4	2,939.2
1956	4,209.6	3,382.8
1957	5,095.2	3,470.4
Jan.-July 1958 ..	3,344.9	2,158.7

The undivided Government of India's Panel on Fine Chemicals, Drugs and Pharmaceuticals estimated that the medical requirements of the sub-continent were a million gallons annually and industrial requirements 10 millions, a target which they said ought to be reached in 15 years time.

Consumption of industrial alcohol is estimated to have gone up from 3.4 million gallons in 1950 to 5.2 million gallons by 1955. In addition about 0.6 million gallons of alcohol are at present used in the manufacture of acetate rayon and are met from the production of power alcohol grade spirits.

POWER ALCOHOL

The importance of the power alcohol industry lies in its supplying a product which can replace an equivalent quantity of imported petrol. The rapid development of the sugar industry since 1931 has rendered large quantities of molasses available for its production.

Consumption of power alcohol in 1955-56 was estimated to be only about 10 million gallons, as against 19 million gallons envisaged because of difficulties in providing facilities for mixed petrol with alcohol and of comparatively high cost of production of alcohol in certain areas.

The number of units engaged in the manufacture of power alcohol in 1957 was 17 with an aggregate capacity of 13.8 million gallons. The capacity as in August 1954 was higher at 15.19 million gallons.

The installed capacity and actual production in thousand bulk gallons are given below:

Year.	Capacity	Production
1945	6,254	3,776
1949	8,462	4,230
1950	9,324	4,494
1951	9,905	5,409
1952	10,920	7,742
1953	13,020	8,120
1954	13,020	8,007.6
1955	13,912	10,432.8
1956	14,352	10,270.4
1957	18,800	10,138
Jan.-July 1958 ..	15,190*	5,030

* As in August 1958.

According to the Census of Manufacturing Industries, 1955, the fixed capital investment in the 44 distilleries and breweries (including power alcohol manufacturers) in the country was of the order of Rs. 2.20 crores in 1955. The number of persons employed in the industry in 1955 was estimated at about 4,729.

Imports of alcohol are banned, but small quantities are imported along with drugs and perfumed spirits or in the form of liquors. Exports of alcohol are confined to despatches of denatured spirit to Burma and Ceylon and small quantities of rum.

The principal raw material required is molasses. Out of a total production of 7.78 million tons of molasses in 1957-58 (estimated), Uttar Pradesh and Bihar accounted for about 70%. Other raw materials required in small quantities are sulphuric acid, ammonium sulphate and entertaining agents.

Difficulties in the supply of molasses and offtake and the unremunerative price of power alcohol have kept production at a low level compared to the installed capacity. With a view to overcoming these difficulties and ensuring a steady growth of the industry, a Committee was set up by the Ministry of Commerce and Industry in October 1955.

The Committee submitted its report in December 1956. Its main recommendations were:—

- (i) The Development of alcohol-based industries such as manufacture of Synthetic Rubber, Acetate Rayon, Cellulose Acetate, Pharmaceutical products, D.D.T. and other Organic Chemicals and Solvents like Acetone, Ether, Butanol etc., should be encouraged on a priority basis. On the basis of expected developments in certain alcohol-based industries and targets thereof by the end of the Second Plan, the Committee has estimated that the industrial requirements of alcohol will increase to 31 million gallons per year, the present consumption being 4 to 5 million gallons a year.
- (ii) Even when alcohol based industries develop, power alcohol should continue to be used in admixture with petrol so as to provide a flexible demand to cover any imbalance between anticipated production and gradual development of industrial demand for alcohol. For several years to come, it will be necessary to arrange for the utilisation of about 12 million gallons per year as power alcohol, although the areas under alcohol/Petrol blend may vary from time to time depending on the progress of other industries based on alcohol.
- (iii) The Committee estimated that, after meeting the requirements of other users, over 900,000 tons of molasses would become available for the manufacture of alcohol per year from 1959-60 onwards. The total production of alcohol from all the available molasses, including 1 million gallons produced from Mahua flowers, is expected to be of the order of 46.8 million gallons per year (100 per cent by volume). In order to attain this level of production, distillery capacity of the order of 52 million gallons per year is necessary.
- (iv) The minimum capacity for a distillery of economic size, under the present circumstances in India, is 1 million gallons per year. In special circumstances, the economics of production in units of smaller capacities may, of course, not be too disadvantageous.
- (v) (a) In order to encourage the use of alcohol as a raw material for industries, the basic ex-distillery price for alcohol should not be higher than Rs. 14.87 (n.p.) per gallon, as at present.
(b) Since, however, all distilleries are not adjacent to sugar factories and may have to transport a part or the whole of their molasses requirement, the actual ceiling prices (per gallon) recommended are:—

For alcohol of strength 90.5 per cent by volume, As. 12.0 (or 80 n.p.); for alcohol of strength 96 per cent by volume, As. 12.6 (or 78 n.p.); plus an additional charge upto a maximum of Rs. 0.6-0 or 37 n.p. per gallon on account of the actual average transport charges incurred on molasses.

- (vi) As molasses has been and will continue to be the principal raw material for production of alcohol, control over its price and distribution is essential if the price of alcohol is to be maintained at a low level. An ex-sugar factory price of 4 annas per maund, for molasses containing not less than 50 per cent total sugars, would be reasonable. For molasses of lower sugar content, correspondingly lower prices on the lines prescribed in the U.P., may be charged.
- (vii) The varying pattern which may have to be developed with respect to mixing depots for supplying petrol mixed with power alcohol in different parts of the country during the next few years has been indicated.
To ensure the offtake of power alcohol in different areas from year to year a flexible system for the sale of power alcohol has been outlined.
- (viii) It may be possible to build up an export market for over a few million gallons of alcohol per year if the price of alcohol is pegged at the level recommended by the Committee. Suitable assistance should be given with regard to excise procedure and availability of tank wagons and storage facilities at ports to prospective exporters.
- (ix) A development Council for Fermentation Industries including alcohol and products based on it should be constituted.

The Committee also made recommendations in regard to the following matters:—

- Mechanism of control over price and distribution of molasses;
- Mechanism of control over price and distribution of industrial alcohol;
- Tax structure and agency for taxation of industrial alcohol;
- Revision of excise laws for the control of distilleries and factories using alcohol in their manufacturing operations;
- Definition and scope of the terms "Alcohol" and "Spirit" for purposes of control;
- Collection of detailed statistics relating to industry-wise consumption of alcohol;
- Freight rates on various grades of alcohol; and
- Rail transport facilities for the movement of molasses and alcohol.

The actual expansion of capacity of the sugar industry is likely to fall short of the level estimated by the Committee on account of the difficulties of foreign exchange and a preferential diversion of the available limited foreign exchange resources to projects and industries of higher priority. The full industrial demand for alcohol envisaged by the Committee may take a much longer period to develop in case some major schemes like the synthetic rubber project get delayed in actual implementation. Even so, it might be advantageous to build up alcohol capacity somewhat ahead of the growth of industrial demand to the extent that it is facilitated by the availability of molasses, in view of:

- (a) the export possibilities and
- (b) the alternative outlets for its use as motor fuel.

The report of the Committee, together with the Government of India's decisions, was released to the public in March 1958. The Govern-

ment accepted recommendation Nos. (i), (ii), (iii), (viii) and (ix) of paragraph 2 above and stated that it wanted to take steps to implement them as far as possible. The other recommendations, including those referred to in para 3 above, were under examination and the decisions thereon would be published in due course.

Based on the anticipated requirements during the Second Plan period, a combined production of 45 million gallons of power and industrial alcohol is fixed as a target to be achieved by 1960-61. It is estimated that a sum of about Rs. 1 crore will have to be invested during the Second Plan to achieve this capacity. This is exclusive of the outlay on the modernisation and improvement of existing units. About 2,000 additional persons are estimated to be employed in the industry during the Second Plan.

AUTOMOBILE INDUSTRY

IT would appear that the first motor car was imported into India in 1898. The practice up to the end of the first world war was to purchase complete motor vehicles directly from abroad or through agents or dealers in India.

It was in 1920 that two automobile manufacturers, one from the U.S.A. and the other from Canada, set up local companies to do business in motor cars and trucks.

General Motors India Ltd. commenced assembling trucks and cars from components and parts imported from the U.S.A. in c.k.d. condition in their factory at Bombay in 1928, while Ford Motor Company of India Ltd. commenced c.k.d. assembly of automobiles at Madras in 1930, and at Bombay and Calcutta in 1931.

All these plants of General Motors and Ford Motors have now, of course, shut down.

Addison and Co., Ltd., commenced c.k.d. assembly of cars and trucks at Madras in 1936.

In addition to the above, other firms in the field were: Standard Motor Products of India Ltd., Madras; Automobile Products of India Ltd., Bombay; Ashok Motors Ltd., Madras; Dewar's Garage and Engineering Works, Calcutta; Peninsular Motor Corporation Ltd., Calcutta; French Motor Car Co., Ltd., Bombay; Mahindra and Mahindra Ltd., Bombay and Addison and Co. Ltd., Madras.

The total annual assembling capacity of the firms mentioned above was estimated around 84,014 cars and commercial vehicles.

In 1944, two companies, Hindustan Motors Ltd., Calcutta, and Premier Automobiles Ltd., Bombay, with an authorised capital of Rs. 20 crores and Rs. 10 crores respectively, were established with a programme for progressive manufacture of complete automobiles.

In 1953 (Government decided to concentrate production only in those firms which had a manufacturing programme. The type of vehicle, the scale of manufacture, etc. were also fixed in the way shown below:

Firm.	Nos.
Hindustan Motors Ltd. Calcutta ..	18,000
Premier Automobiles Ltd., Bombay ..	12,000
Standard Motor Products of India Ltd., Madras ..	2,950
Ashok Motors Ltd., Madras ..	7,540

Hindustan Motors manufacture baby cars, light cars, big cars and medium trucks (Morris Minor, Hindustan 14, Studebaker car and truck).

Premier Automobiles manufacture baby cars, big cars and medium trucks (Fiat 1100, Dodge, De Soto, Plymouth cars, and Dodge, De Soto and Fargo trucks).

Standard Motor Products of India manufacture baby cars and medium cars (Standard Ten and Standard Vanguard).

Ashok Motors manufacture heavy trucks (Leyland 5-ton diesel trucks).

Two other manufacturing operations are the Tata Locomotive and Engineering Co. Ltd., which produces Tata-Mercedes Benz diesel trucks, and Mahindra and Mahindra Ltd. which produces Willy's Jeep.

In September 1958 the Union Defence Ministry entered into an agreement with the M.A.N. of West Germany for the manufacture of multi-fuel trucks in ordnance factories.

The rate of output is reckoned at 2,000 per annum.

Manufacture will commence with 28 per cent indigenous manufacture and this will rise to 90 per cent by 1963-64.

The installed capacity and actual production of the automobile industry during 1957 and part of 1958 are indicated below:

	(In numbers)	
	1957	Jan.-Aug. 1958
Installed capacity ..	49,000	49,000
Production ..	32,839	16,575*
of which :		
Cars ..	11,604	4,579
Jeeps and land rovers ..	4,068	2,402
Station wagons, utilities, mobile health vans ..	612	208
Commercial vehicles ..		
Trucks ..	11,892	6,605
Passenger Buses ..	3,756	2,581

The capacity in 1959 was rated at 65,000 (20,000 cars, 40,000 trucks, 5,000 jeeps and station wagons). The production in 1958 was 26,788 (cars 15,000). The fall was due to restriction in the licensing of imported parts and also to a prolonged strike in an automobile plant.

The total paid up capital invested in the industry as on December 31, 1957 was over Rs. 18.5 crores (foreign a little over Rs. 14 lakhs); working capital: Rs. 8.0 crores (excluding Tata Locomotive and Engineering Co. Ltd.). The industry employs over 18,800 people.

The percentages of indigenous content in different main models of automobiles as in April 1958, were:

Cars: Hindustan Ambassador—60 per cent, Fiat '1100'—37 per cent; Standard Vanguard—33 per cent; Standard '10'—30 per cent.

Trucks and bus chassis: Tata-Mercedes-Benz—53 per cent; Dodge (medium diesel) 156" W.B.—53 per cent; Dodge (light diesel) 126" W.B.—53 per cent; Dodge Power Wagon—26 per

cent; Leyland 'Comet'—38 per cent; Leyland Royal Tiger Titan—9 per cent.

Jeep: Willy's CJ-3B—58 per cent.

It is reckoned that by the end of 1959 about 70 to 75 per cent of the components in the case of two commercial vehicles and one car will be indigenously manufactured.

By 1960-61 the vehicles in the country will have reached 80 per cent indigenous content.

There is now one unit each for motor cycles and scooters with an installed capacity of 6,800 and 6,000 per annum respectively.

The motor cycle unit is Enfield (India) Ltd., of Madras, formerly Madras Motors Ltd. This firm was granted a licence in 1954 to manufacture Royal Enfield motor cycles, and it started production in May 1955.

This firm has also a licence for the manufacture of 1,400 three-wheeled motor cycle chassis per annum.

The unit for the manufacture of scooters is the Automobile Products of India, Bombay, which is permitted to manufacture annually 6,000 Lambretta scooters. It started production in August 1955.

During 1957, 1,827 motor cycles and 6,528 scooters were manufactured as against 1,551 and 4,735 respectively in 1956.

Both automobile and tractor drawn trailers are manufactured in the country. Six firms with a total capacity of 5,232 trailers per year on single shift basis are in the field.

ANCILLARIES

Items like tyres, tubes, battery, all rubber parts, upholstery materials and paints are all obtained from indigenous sources for all the vehicles in the manufacturing programme.

There are 20 important firms licensed for making automobile ancillaries excluding garage and service tools and 11 have already gone into production. The total number of ancillary factories is, however, estimated at 146.

The following manufacturing industries are more or less well established: pistons and piston rings, cylinder liners (dry), fan belts, radiators, propeller shafts, bodies for automobiles, seat bench assembly, upholstery material, batteries, electric lamps and bulbs, ball bearings, tyres and tubes, paints, non-genuine components and parts. To the list are added gudgeon pins, electric horns and new ranges of piston.

Manufactures started later are: sparking plugs, fuel injection equipment, electric horns, shock absorbers, wheels and rims, spanners, and brake lining, clutch facings, piston rings, cylinder liners, oil seals, metal gaskets, scammell semi-trailers, brake lining, clutch discs and friction materials.

Over Rs. 4.4 crores are invested in ancillary industries. The working capital of this latter sector is Rs. 51 lakhs.

In regard to automobile batteries self-sufficiency has been achieved.

*See below for production for whole year.

There are 13 manufacturing concerns in India with a total installed capacity of 316,500 storage batteries per year.

The production during 1957 was over 3.24 lakh batteries as compared with 3.14 lakh batteries in 1956.

The total licensed capacity by the middle of June 1958 was over 5 lakh batteries per year as against the Second Plan target of 3.5 lakhs.

Of the existing manufacturing concerns, six are in Calcutta, three in Bombay, two in Bangalore and one each in Delhi and Madras. Besides these, there are about 100 small scale manufacturers of automobile batteries with a total annual capacity of about 1.25 lakh batteries.

The quality of batteries manufactured in India compares favourably with that of well-known foreign brands.

A beginning has also been made in exports of Indian automobile batteries.

Exports in 1957 were valued at over Rs. 15,000 as against a little over Rs. 14,000 in 1956.

In the first six months of this year, Ceylon imported storage batteries of the value of over Rs. 13,000. Parts of storage batteries valued at over Rs. 4,000 were exported to Burma and Ceylon during the period.

IMPORTS

Protection will continue till the end of 1967. And no more new manufactures will be allowed to enter the country.

Though production has gone up in the country, imports have not been reduced as expected. Except for a very limited number of motor cars imported complete, all the vehicles imported are in c.k.d. condition.

Year	Motor cars including taxi cars (Numbers)	Motor omnibuses, motor vans and lorries (Numbers)	Total	Value (Rs. lakhs)
1952-53	5,164	3,637	8,801	5.93
1953-54	5,816	4,189	10,005	6.08
1954-55	10,592	4,516	15,108	10.29
1955-56	10,562	8,891	19,453	13.46
1956 (April-Dec.)	6,710	6,004	12,714	9.92
1957	12,135	16,439	28,574	19.63
1958 (Jan.-Aug.)	6,270	6,538	12,808	7.54

A general note on price may be added here. Price is influenced by demand which in turn is influenced by price. Thus one of the factors that has inhibited the growth of the industry is the fact that internal demand is small. Hence the advantages of mass production cannot be availed of.

A complete automobile consists of 4,000 to 5,000 parts. Hence production cannot be con-

centrated in a single unit. Thus in most western countries there are always a large number of manufacturers of ancillary parts. This again is conditioned by the size of the demand.

SECOND FIVE-YEAR PLAN

The target of production for the industry is 57,000 automobiles by 1960-61. An overall investment of about Rs. 16 crores is estimated to be necessary during the Second Plan period.

Summary of the development programme during the Second Plan :

	1955-56	1960-61
No. of manufacturing units	6	6
Annual rated capacity on single shift (No.)	29,000	29,000
Estimated production (No.)	25,000	57,000
Consumption (No.) ..	23,000	57,000

CEMENT INDUSTRY

THE first venture in the manufacture of Portland Cement in India took place in 1904, in a small factory just outside Madras, but it quickly went out of business.

At the beginning of the First Plan there were 21 cement factories. At the end of the Plan, that is, in March 1956 there were 27.

In March 1957 the number of factories rose to 28 of which one was owned by the U.P. Government and one by the Mysore Government. Of the rest, all privately owned, seven were in Bihar, four in Bombay, three in Madras, two each in Mysore, Andhra, Madhya Pradesh, Rajasthan and the Punjab, and one each in Orissa and Kerala. The total capacity was about 6 million tons a year and the total production about 5 million tons. The number of factories in existence will rise from 28 early in 1957 to 44 at the end of the Second Plan period.

A sum of about Rs. 29 crores had been invested in the industry up to 1950-51 of which the A.C.C. accounted for Rs. 15.5 crores and the Dalmia Group Rs. 7 crores. Some 33,000 persons were employed by the industry in 1950-51. Excluding Rs. 2.92 crores spent on the 2 lakh tons cement factory of the U.P. Government at Chark, about Rs. 15 crores are estimated to have been invested in new units and expansions in the cement industry during 1951-56. The investment incurred by the Associated Cement Companies on their projects is estimated to amount to Rs. 11.76 crores during this period.

For the expansion of capacity in the private sector to 12.5 million tons by 1960-61 from 4.6 million tons in March 1956 (the capacity in the public sector in the two plan periods will be 3 lakh tons and 5 lakh tons respectively), an investment of about Rs. 80 crores is likely to be required. The development programme of the ACC envisages an investment of Rs. 25 crores for stepping up the capacity of their factories from 2.782 million tons in March 1956 to 5.288 million tons by the end of the Second Plan.

Altogether the capacity of the industry is envisaged to be stepped up to 13.0 million tons per annum by the end of the Second Plan and a production target of 13.0 million tons.

Including the demand of the projects and roads, this was expected to reach 4.5 million tons by the end of the first Plan period. By 1960-61, the demand will substantially increase and the consumption is estimated to reach 12.5 million tons at the end of the Second Plan period.

To meet this increased demand, the Government has approved various expansion schemes which are expected to increase the rated capacity from 4.931 million tons in 1955-56 to 13 million tons by 1960-61.

PRICE

Early in 1957 the Government of India requested the Tariff Commission to make a fresh examination of the cost of production of different cement factories and recommend the fair prices payable to the cement producers. The Commission, in its report submitted in 1958, worked out the estimated cost of production of cement for the group of factories owned by the Associated Cement Companies Limited and for each of the other factories. The Commission recommended that the ex-works prices in rupees per ton of unpacked cement for different factories should be fixed as follows: A.C.C. 58-00; Andhra Cement 65-00; Ashoka 65-00; Bagalkot 62-00; Dalmia Bharat 54-50; Dalmia Dadri 56-50; Digvijay 56-50; India Cements 60-50; Jaipur Udyog 57-00; Kalyanpur 59-00; Mysore Iron 58-50; Orissa Cement 55-50; Rahtas 54-50; Sone Valley 59-00; Travancore Cements 60-50; U.P. Government Factory 57-00. These prices, the Commission recommended, should be enforced from 1st January 1958 until 31st December 1960, except in the case of Dalmia Cement (Bharat) Limited, the price for which should be in force till the end of 1959. Before this date a fresh examination of the cost of this factory should take place if any expansion of its capacity

is likely to be effective from the beginning of 1960.

The Government accepted the recommendation regarding the revised prices payable to the producers. It, however, decided that the revised prices should take effect from 1st July 1958 as administrative and financial complications would arise if the revised prices were to be enforced with retrospective effect and because the present arrangements and prices under the cement control order were effective till 30th June 1958. The revised prices will remain in force until the end of June 1961. While in almost all cases the producers have been allowed an increase in price, the *f.o.r.* destination price of cement, i.e., the price at which cement packed in new gunny bags is sold to consumers at all railheads throughout the country, will continue to be the same as at present, namely Rs. 117.50 per ton. This arrangement has been made possible by a readjustment of incidental and overhead charges including a reduction in the remuneration of the State Trading Corporation from 3 per cent to 1 per cent on gross turnover. The S.T.C. has been handling the entire production of cement in India for the last two years. The Government also accepted the Commission's recommendations that: 1. The case of each new unit to be set up in future should be taken up for cost investigation individually as soon as it goes into production. 2. In the event of a general increase in the controlled pit head prices of coal a reference should be made to the Commission to determine the extent to which the price for each cement unit should be increased. 3. Rehabilitation allowance should be given only to those units which have plant and equipment installed before 1949. The Commission also recommended that the system of rebates allowed by the cement producers to the Central and State Governments in the price of cement supplied to them should be abolished, and that the rebates, if at all allowed, should be paid by the S.T.C. With regard to this recommendation, the Government has decided that rebates of the nature allowed by certain producers under rate contracts with the D.G. (S.D.) would

be paid by the State Trading Corporation to the D.C. (S.D.) on such terms as might be mutually agreed upon. Any concessions outside the rate contracts, on the basis of separate agreements with Governments, Central or State, would continue to be dealt with between the parties direct.

The prices of indigenous and imported cement are pooled and its distribution has been taken over by the State Trading Corporation in order to provide for substantial import of cement in the interests of consumers and to rationalise properly and regulate the use of cement when its demand has phenomenally gone up so high.

EXPANSION

The cement industry recorded steady progress during 1957. As against an installed capacity of 5.7 million tons at the beginning of the year, the capacity went up to 6 million tons at the end. The actual production was 5.6 million tons in 1957, as against 4.9 million tons during 1956.

Besides the 29 units already in operation in the country, 64 schemes, comprising 25 new units and 29 projects for the expansion of existing units involving a total additional capacity of 8.67 million tons a year, have so far been approved by the Government of India. The schemes are in various stages of progress. Of these, fifteen schemes (four new units and eleven schemes for expansion of existing units) with a total capacity of 1.8 million tons were completed by the end of 1956, while another eleven schemes are expected to be completed by the end of 1959 giving a total capacity of 10.4 million tons by that date. The remaining schemes are scheduled to be completed progressively by 1960-61. In meeting the requirements of foreign exchange for the procurement of capital goods for implementing these schemes, assistance was received from the T.C.M.

Due to the modernisation of some of the units for making asbestos cement products, the capacity of the industry has reached 210,000 tons (against 141,400 tons in 1956) and production has increased from 119,828 tons in 1956

to 153,761 tons in 1958. Almost all units are working to full capacity.

Six firms have been registered or licensed for the manufacture of cement machinery. Much of this will be manufactured in India by the end of the Plan.

The imports and exports of cement by land and sea during the period of the First Plan were as follows:

Year	Imports Exports	
	(Tons)	
1951-52	10,312	67,758
1952-53	3,652	57,441
1953-54	6,694	86,116
1954-55	6,000	101,429
1955-56	10,717	51,351

During the year 1957, India imported 351,000 tons of cement and a small quantity was exported.

For 1958 the export permitted was one lakh tons.

CHEMICAL INDUSTRY

FOR purposes of industrial production, chemicals fall easily into one of two major groups: (a) Heavy Chemicals; and (b) Fine Chemicals.

According to the latest data, there are over 250 factories with a capital investment of nearly Rs. 33 crores and providing employment for about 35,000 workers.

The Development Council for Heavy Chemicals (Alkalies) was initially constituted in 1955 and it completed four years of tenure by the end of March 1959. During 1957, the Council was reconstituted under the Chairmanship of Shri C. R. Rao of M/s Tata Chemicals Ltd., who was also the Chairman of the first Council. The Council, during its four years of tenure of office, met several times and organised visits by its members to several factories falling within its purview.

Among the work done by the Council were the maintenance of systematic liaison on behalf of the industry with the offices of the Chief Adviser, Government of India, the Planning Commission, the Ministry of Transport and the Ministry of Labour. An examination of the targets for production in the alkalis group of industries, the co-ordinating of production programmes and the review of the progress of different programmes from time to time were the items which received priority. The programme for industrial development as relating to the alkalis group, appearing in the Government of India's Second Five-Year Plan, is in many cases based on the recommendations made by the Development Council. Statistics of production were obtained from manufacturers regularly and the Council kept itself informed of reasons for shortfall of production, if any. The chlorine problem received considerable attention and was discussed also with the Acids and Fertilisers Development Council.

An important function entrusted to the Council is the suggesting of norms of efficiency with a view to eliminating waste and obtaining maximum production, improving quality and reducing costs. A Sub-Committee of the Council made certain recommendations explaining in detail how efficiency was to be computed and submitted to the Council for purposes of comparison. On the basis of this, information was collected from different manufacturing units producing electrolytic caustic soda and its circulation among members was widely appreciated.

In the matter of fuller utilisation of installed capacity, suitable recommendations were made to the Government wherever there was shortfall from extraneous factors such as inadequate

supply, inadequate transport, inadequate coal allotment in a particular case, where expert assistance was asked for by a factory, a sub-committee of the Council made recommendations after a visit and these were found extremely helpful to the party concerned. Consistent with improvement in production efficiency, the Council also impressed upon the producers the necessity of ensuring adequate satisfaction to the consumer. The results of State trading in soda ash and caustic soda and their distribution through nominated channels were kept under regular review. Standardisation received similar attention and the Council co-operated with the work of the Indian Standards Institution in the matter of evolving Indian Standards.

Another important function performed by the Council was the collection and formulation of statistics relating to the industries covered by the alkalis group. The adoption of measures for increasing productivity of labour is a question still under consideration and the Ministry of Labour has been requested to conduct a survey of the wages, amenities and service conditions in heavy chemical industries in both the public and private sectors.

SULPHURIC ACID

Two new units with a total capacity of over 15,000 tons went into production in 1957.

The production of sulphuric acid registered an appreciable increase during 1958 as compared with the previous year, the total quantity actually produced being 227,000 tons, as against 191,688 tons in 1957.

The trend of production in tons is as follows:

1948, 80,004; 1949, 99,456; 1950, 102,480; 1951, 106,932; 1952, 96,084; 1953, 109,091; 1954, 150,876; 1955, 156,000; 1956, 165,406; 1957, 191,688; 1958, 227,000.

The Government fixed a ceiling price for sulphuric acid at Rs. 175 per ton ex-works, linking it to a price of Rs. 275 per ton for sulphur delivered to the works. Variations in the price of sulphuric acid have been provided for to allow for fluctuations in the price of sulphur.

The reduction in the price of sulphuric acid led to the closure of three chamber plants with capacities less than seven tons of acid per day. However, the capacity of 10 contact plants have been raised. The number of units on production has gone up from 35 to 37 during 1957, the installed capacity has gone up from 245,141 tons in 1956 to 273,101 tons per annum.

The annual consumption of sulphuric acid in different industries in 1955-56 was estimated at

160,000 tons and was estimated to rise to 470,000 tons by 1960-61. The following picture is expected to emerge at the end of 1960-61:—

	1955-56	1960-61
Annual rated capacity (tons of 100 per cent. acid)	242,000	500,000
Actual production (tons of 100 per cent. acid) ..	170,000	470,000

ALKALI INDUSTRY

The alkali industry comprises the manufacture of soda ash and caustic soda, sodium bicarbonate, bleaching powder, benzene hexachloride, liquid chlorine and zinc chloride.

As against the rated capacity of 90,000 tons per annum, the production of soda ash in tons was as under:—

1948, 29,148; 1949, 17,916; 1950, 43,788; 1951, 47,532; 1952, 44,328; 1953, 56,868; 1954, 48,288; 1955, 77,268; 1956, 84,240; 1957, 91,925; 1958, 86,300.

Three new licences for the production of soda ash were issued during 1955 and expansion of one of the existing plants was approved. With the implementation of the new schemes, the installed capacity would rise to 253,000 tons a year in 1960-61.

On the basis of the Tariff Board's report in 1951 the estimated consumption of soda ash was placed at 115,000 tons. This was expected to rise to 155,000 tons by 1955-56 and to 230,000 tons by 1960-61.

The import policy and the high prices since 1951 gave an impetus to this nascent industry though the heavy imports allowed in the first two years of the First Plan caused some temporary difficulties to indigenous producers owing to accumulation of stocks. Actual imports in tons were: 1951: 52,101; 1952: 112,147; 1953: 35,506; 1954: 94,544; 1955: 65,996; 1956: 90,966; 1957: 84,711.

The tariff protection to this industry has been extended up to the end of 1961.

The following table summarises the programme of development of the soda ash industry:—

	1955-56	1960-61
Number of units	2	5
Annual rated capacity (tons)	90,000	253,000
Actual production (tons) ..	80,000	230,000

In 1957 the production in tons of hydrogen peroxide was 611, of bleaching earth 1,715, of hydrochloric acid 11,897, of sodium bicarbonate 4,784.

Caustic Soda.—There were at the end of 1958, 15 units manufacturing caustic soda with an annual capacity of 67,185 tons.

Actual indigenous production of caustic soda and the associated chemicals in the post-war period was as under :—

Year	Caustic soda in Tons	Liquid chlorine in Tons	Bleaching powder in Tons
1953	22,908	8,136	1,944
1954	29,307	9,782	2,926
1955	34,248	11,680	2,700
1956	39,420	15,072	4,656
1957	42,708	15,696	5,340
Jan.-July 1958	31,200	9,480	3,529

Imports of caustic soda in tons were: 1954: 52,638; 1955: 54,881; 1956: 93,594; 1957: 66,042; Jan.-April 1958: 20,194.

The Second Five-Year Plan envisages that the installed capacity of the industry will rise from 44,300 tons in 1955-56 to 150,400 tons in 1960-61 and actual production from 36,000 tons to 135,400 tons.

Three new units would be set up. The 1950 demand for caustic soda is 124,000 tons and is expected to rise to 160,000 tons in 1961. In the case of bleaching powder the demand is 8,000 tons per year and it is likely to rise to 12,000 tons by 1961.

The production and consumption of superphosphates which received a setback in 1955 due to the fall in agricultural prices and rail transport difficulties recovered markedly during the years 1956 and 1957. Production was: 105,060 tons in 1954, 74,160 tons in 1955, 81,168 tons in 1956 and 141,684 tons in 1957. The production during 1958 was 181,000 tons. The aggregate installed capacity in August 1958 was 310,572 tons per annum.

But in view of the importance of this fertiliser and that of ammonium phosphate the target of consumption is put at about 120,000 tons by 1960-61.

1960-61 capacity of superphosphate: 6 lakh tons.

The estimated needs of potassic fertilisers are roughly 30,000 tons by 1960-61 and it may be possible to recover about 52,700 tons from all the salt works in the country. In 1955, the Indian Potash Supply Agency was formed with the approval of Government, which is expected to assist the development of the production of potassic salts from the bitterns of salt works.

MISCELLANEOUS CHEMICALS

The present position of some of the important products is as follows :—

—	No. of units.	Annual rated capacity in tons.	Actual production in tons.	
			1956	1957
Alum	15	10,280	4,420	5,116
Aluminium sulphate	23	59,477	29,625	32,812
Ferrous sulphate	9	1,899	458	635
Copper sulphate	11	3,300	1,980	1,886
Sodium thiosulphate	5	2,184	914	1,001
Sodium sulphite	4	854	343	374
Sodium bisulphite	5	1,419	716	674
Bichromates	7	6,518	3,267	3,671
Sodium bicarbonate	2	4,920	4,452	4,784
Potassium chlorate	2	2,310	2,276	2,287
Zinc chloride	5	1,876	958	750
Calcium chloride	3	2,861	844	1,320
Magnesium chloride	4	39,600	8,540	4,816

Protection for bichromates has been withdrawn with effect from 1st January 1959, while that for calcium carbide has been extended up to the end of December 1961.

The production of calcium carbide, which stood at 3,800 tons in 1954, roughly a third of the total requirements, is likely to go up to 20,000 tons in 1961. Two new units have been licensed while the two existing units are expanding their capacities.

The production of hydro-sulphite of soda, an important chemical for the textile industry, which has now to be imported at the cost of Rs 1 crore per year, was to begin for the first time in 1954. Two units which will go into production will have a capacity of 3,000 tons by 1961. This would meet about 60 per cent of the total requirements by the end of the Plan.

FERTILISERS

So far in India the inorganic nitrogenous fertiliser almost universally employed has been ammonium sulphate. There are at present eight units in West Bengal and Bihar with a rated capacity of about 425,000 tons of ammonium sulphate per annum. The Sindri factory went into production in November 1951.

The output of ammonium sulphate progressively rose from 45,395 tons in 1949 to 319,620 tons in 1953, to 340,222 tons in 1954 to 393,095 tons in 1955 and 399,017 tons in 1956. In 1957, however, there was a slight setback, the total output amounting to 379,656 tons. The production during the first seven months of 1958 was 221,231 tons.

Assuming country-wide application of nitrogenous fertilisers the annual needs would be about 12 million tons of ammonium sulphate.

In spite of the full utilisation of the capacity of the Sindri Factory, it has been necessary to import large quantities of nitrogenous fertilisers because of increasing demand. Production of ammonium sulphate at the Sindri factory went up from 321,000 tons in 1955 to 331,000 tons in 1956

and to 332,031 in 1957. A record production of 32,891 tons was reached during December 1957, giving a record daily average of 1,061 tons, the highest ever achieved.

The Fertilizer Production Committee submitted its report in 1955 and suggested suitable location for the establishment of new plants.

As a part of the plans made by the Government of India for increasing fertiliser supply to 370,000 tons per annum by 1960-61, progress is being made rapidly in the expansion of the Sindri factory for the production of ammonium sulphate and urea. A new unit with a capacity of 100 tons per day of superphosphate went into production during 1957. It has been decided to set up a third factory at Nelveli in South India. After the implementation of the schemes both in the public and private sectors, it is expected that the annual installed capacity will be 382,000 tons of fixed nitrogen and the production 290,000 tons by 1960-61.

On 15th May 1957, the Government of India brought into force the Fertilizers (Control) Order 1957, with a view to regulating supply of chemical fertilisers of the prescribed standard to cultivators at fair prices. The order empowers the Central Government to fix the maximum price at which any fertiliser may be sold by a manufacturer or a dealer in a particular area and for a specific class of consumer with due regard to local conditions and other circumstances prevalent in that area.

FINE CHEMICALS

The term "fine chemicals" is applied usually to substances such as photographic materials, drugs and pharmaceutical products, paints, pigments and varnishes, and dyestuffs. All the figures given below are in tons per annum except where otherwise stated.

The average annual demand has been estimated at 60 tons for calcium lactate, 80 tons for iron-ammonium citrate, 200 tons for potassium citrate and 50 tons for sodium citrate. Government have, on the Board's recommendation, converted the 36 per cent standard and 26 per cent preferential revenue duty on calcium lactate into a protective duty.

Production of bromine and bromides at one of the alkali works has been attempted and an annual output of 75 tons bromine, 36 tons potassium bromide and 14 tons sodium bromide has been recorded. The total installed capacity of bromides in 1957 was 211 tons and actual production was 138 tons.

Coal, tar and wood distillation products are not sufficiently exploited to manufacture fine chemicals and even the war-time production of methanol and formaldehyde has been recently curtailed. Synthetic fine chemicals are yet to be turned out in India on a commercial scale.

Photographic Materials.—The basic chemicals required for the photographic industry are: (i) gelatin, silver halides and sensitizers in the coating of film, plate and paper base, and (ii) hypo-sodium sulphite, hydroquinone and chrome alum in the processing stages.

Borax, boric acid, acetic acid and metal and photographic-grade sodium sulphite are still imported. The present capacity of sodium sulphite is 854 tons and output 374 tons which meets the full demand. Production capacity of 30 tons for potash chrome alum has been established. Hydroquinone is being manufactured in India since 1950 and the annual output is 25 tons. X-ray developing and fixing salts have been placed on the market since 1948.

Pre-war imports of raw film base into India were enormous, the film industry alone consuming some 80 million sq. ft. per annum. The Celluloid Industries Panel has recommended the installation of a factory for manufacturing 50 million sq. ft. of all types of raw film, and this should synchronise with the manufacture of gelatin, silver halides, sensitizers and other photographic materials in adequate quantities.

Chemical.	Production.			Main uses.
	1955	1956	1957	
Acetic acid (tons)	2,375	2,464	2,762	{ Rayon, white lead, lead acetate, dyeing, rubber solvent, explosives solvent, insecticide disinfectant, etc.
Acetone (tons)	423	633	694	
Benzene (gals.)	25,46,000	3,43,024	5,16,368	
Crescote oil light (gals.) ..	4,15,300	6,10,311	5,29,927	
Naphthalene (tons)	890	952	816	

There are at least 300 factories manufacturing paints and varnishes, but nearly 150 of them are very small in size. The bigger ones are concentrated in Bombay and Calcutta. Eighteen units with a capacity of 86,860 tons are in Calcutta, and 16 with an annual capacity of 18,860 tons are in Bombay.

The aggregate installed capacity of the paints and varnishes industry is 64,800 tons. Actual production during 1957 was 42,276 tons, as against 40,804 tons in 1956.

An excise duty was imposed on paints and varnishes at 10 per cent. *ad valorem* with effect from March 1, 1955.

It is estimated that the consumption of paints, varnishes and enamels may go up from about 40,000 tons in 1955-56 to 60,000 tons in 1960-61. The demand for nitrocellulose lacquers may rise from about 3,00,000 gallons to 5,00,000 gallons. The existing capacity for ready-mixed paints and varnishes, i.e., 65,000 tons, is considered sufficient to meet the demand during the Second Plan; so also the present capacity of 8,00,000 gallons for nitrocellulose lacquers.

The following table summarises the development programme of the industry during the Second Plan:

	1955-56	1960-61
(a) Ready-mixed paints, varnishes, etc.:		
Capacity (tons) ..	65,000	65,000
Production (tons) .. (est.)	39,000	60,000
(b) Nitrocellulose lacquers:		
Capacity (gals.) ..	800,000	800,000
Production (gals.) .. (est.)	300,000	500,000

DRUGS AND PHARMACEUTICALS

Drugs and pharmaceuticals cover a large variety of products from simple extracts of vegetable drugs and glandular preparations to highly complex synthetic drugs and antibiotics.

In the field of antibiotics, a penicillin factory was established in the public sector. The Hindustan Antibiotics, located at Pimpri near Poona went into production in August 1955 with a capacity to produce 3-6 million to 9 million mega units of penicillin per annum. The production target of 4-8 million mega units fixed under the first Five-Year Plan was exceeded, with the production of 6.5 million mega units in 1955. During 1957, output touched 23.50 million mega units. The capacity is being expanded by 60 per cent. Chloromycetin is being produced by Parke Davis & Co. from the penultimate levobase which is imported. Their plant has a capacity of 3,600 kgs. Actual output in 1957 was 1,673 kgs. Aureomycin is produced by the Atul Products from imported crude chlortetracyclin. The quantity actually produced in 1957 was 1,383.50 kgs. They have also taken up the manufacture of tetracyclin.

The manufacture of sulphadiazine has made substantial progress in the country. Twelve units, which are engaged in their production, are stated to have a combined capacity of 22,000 kgs. per annum, although their actual production has been far below this capacity.

Among the new drugs recently developed for the treatment of tuberculosis are para-amino salicylic acid (PAS) and isonicotinic acid hydrazide (INH). But their production has been very erratic, being 29,577 lbs. and 94,827 lbs., respectively, in 1957, as against 8,945 lbs. and 9,361 lbs. in 1956.

Three manufacturers produce at present antileprosy drugs such as DDS and its derivatives. They have a total capacity for 17,040 lbs. of DDS. Actual output in 1957 was 4,244 lbs.

Quinine, the most extensively used anti-malarial drug, has been produced in the country in the factories established by the West Bengal and Madras Governments. During the First Plan period the Madras Government established a new factory at Annamalai with a capacity of 80,000 to 10,000 lb. of quinine salt. Besides, some synthetic anti-malarials such as chloroquin and its salts are produced in India. There are three units engaged in their manufacture, with an estimated capacity of 1,890 kgs. per annum.

There are three manufacturers of anaesthetics with a total capacity of 1,584,000 lbs. of ether, 120,000 lbs. of chloralhydrate and 72,000 lbs. of ethylchloride. Actual production in 1957 was 345,321 lbs., 37,955 lbs. and 32,179 lbs., respectively.

Among insecticides, DDT is produced on a commercial scale. The factory of the Hindustan Insecticides in Delhi went into production in March 1955. Production in 1956 was 500 tons. The capacity of the factory has been doubled. Another D.D.T. factory is now being erected by the Government of India at Alwaye in Kerala with an annual capacity of 1,400 tons. This factory was expected to commence production in 1958. The total production of D.D.T. in 1957 was 1,784 tons (50 per cent formulation). Two factories manufacture benzene hexachloride with an annual capacity of 2,500 tons. Actual output in 1957 was 1,162 tons.

Shark liver oil is produced in factories set up by the Governments of Bombay, Madras and Kerala. The existing factories have an estimated capacity of 70,000 gallons per annum of 6,000 I.U. of vitamin 'A'. Actual output in 1957 was 49,068 gallons.

Still imports of drugs and pharmaceuticals continue to be considerable, particularly penicillin and other antibiotics, sulphadiazine, anti-malarials, vitamin preparations and proprietary and patent medicines. The total value of imports stood at about Rs. 10 crores in 1950-51, Rs. 15 crores in 1951-52, Rs. 11 crores in 1952-53, Rs. 12 crores in 1953-54, Rs. 13 crores in 1954-55, Rs. 15 crores in 1955-56 and Rs. 16 crores in 1956-57. The value of imports during the calendar year 1957 was Rs. 16.39 crores and, in the first eight months of 1958, it was Rs. 7.16 crores.

A number of measures have been taken by the Government of India for stimulating exports of Indian medicinal and pharmaceutical products. An Export Promotion Council for chemicals and allied products has been set up for the purpose and grants in aid are given to the Council for pushing up exports.

A special licensing scheme has been evolved for export promotion. Under this, prospective exporters, who accept a definite target of exports, are granted licences for importing necessary raw materials and accessories. Import duties collected on the imported raw materials and excise duties levied on materials used in the manufacture of exported pharmaceuticals are refunded to exporters. With the co-operation of the Indian manufacturers, certain items of indigenously produced raw materials are being made available to exporters at concessional prices.

Provision is made in Trade Agreements with foreign countries for exports of Indian pharmaceuticals.

The Ministry of Commerce and Industry appointed a Committee in February 1953 and the Committee submitted its report in June 1954, making a number of recommendations to improve the existing conditions in the pharmaceutical industry. In 1956, the Government set up a Developmental Council for the industry.

The requirements of drugs and pharmaceuticals are very large in India. Hence, schemes are included in the Second Plan for the expansion of the production of various drugs and medicines.

Some of the important schemes are listed below:

The factory at Pimpri proposes to expand its capacity for penicillin manufacture to 24 million mega units per year at a cost of Rs. 42.35 lakhs. Besides, this concern has under consideration the manufacture of certain other antibiotics like streptomycin. In the private sector, the Alembic Chemicals, Baroda, have a scheme for the establishment of a penicillin factory with a capacity of 4-8 million mega units per annum and the Standard Pharmaceutical Works, Calcutta, for the production of 1-8 million mega units of penicillin and 180 kg. of streptomycin. Besides, the Rambaxy & Co., Faridabad, have also been given a licence to set up a plant for the manufacture of 3,000 kgs. of chloromphenicol as also the Mac Laboratories, Bombay for the manufacture of 500 kgs. per annum.

Two firms, Fedco, Bombay and Sarabhai Chemicals, Baroda, have been granted licences for the manufacture of procaine hydrochloride with an annual capacity of 60,650 kgs.

Three new schemes were licensed during 1956-57 for the manufacture of chloramphenicol. The production of isonicotinic acid hydrazide has commenced. About 200 lbs. were being produced a month.

The following projects have been proposed by the Soviet team of drug experts:

1. An anti-biotics plant to produce not only a large quantity of penicillin but also streptomycin, tetracyclin and new antibiotics.
2. A synthetic drugs plant to produce a large number of sulphadiazine, anti-tubercular drugs, analgesics and antipyretics and a number of vitamins, and equipped also to produce special intermediates required for their manufacture.
3. A medical plants laboratory and factory to produce a large number of important drugs from medicinal plants.
4. A unit for the manufacture of glandular products, such as insulin, A.C.T.H., pituitrin.
5. A workshop for the manufacture of most of the important types of surgical instruments required in large numbers.

The total capital investment, excluding the investment on land, township and working capital, on the five drug units indicated above is placed at about Rs. 28.7 crores.

PROTECTION

Protection for hydro-quinone, stearic acid, oleic acid will expire on 31st December 1959; for calcium lactate on 31st Dec. 1960; for titanium dioxide on 31st December 1961; and for dyestuffs on 31st December 1964.

Protection to caustic soda will be extended upto 31st December 1961.

Exports: Exports of medicinal and pharmaceutical products from India in 1957 amounted to over Rs. 1.01 crores. In the first six months of 1958, exports were valued at Rs. 41.12 lakhs.

Indian pharmaceutical goods are now exported to Pakistan, Nepal and countries in South-east Asia and West Asia.

COFFEE INDUSTRY

COFFEE cultivation is mainly confined to the hilly tracts of south India, from one thousand to six thousand feet above the mean sea level, and is centred in the Malnad area of Mysore, Madras and Kerala. In the lower elevations, which have a higher rainfall, the more delicate but better quality Arabica coffee has given place to the harder but coarser Robusta coffee.

The capital investment in the industry is estimated to be over Rs. 18 crores and the average annual value of the crop is over Rs. 17 crores. Nearly 202,000 people drawn chiefly from Kerala, parts of Mysore and Madras are employed in the industry. Many of the coffee estates are inter-planted with orange trees, cardamom and pepper vines. There are only two types of coffee grown on commercial scale in India, the one most extensively cultivated being Coffee Arabica, the best in quality, with Robusta coming next in importance. About 50 species and sub-species of coffee are being grown in the Coffee Board's research stations.

The area and production, of the two varieties of coffee from 1951 are as under:

AREA IN THOUSAND ACRES

Year	Arabica	Robusta	Total
1951-52 ..	168	67	235
1952-53 ..	168	72	240
1953-54 ..	169	77	246
1954-55 ..	167	85	252
1955-56 ..	162	92	254
1956-57 ..	160	100	260

PRODUCTION IN TONS

Year	Arabica	Robusta	Total
1951-52 ..	14,390	6,546	21,235
1952-53 ..	12,740	10,825	23,565
1953-54 ..	22,740	6,815	29,555
1954-55 ..	16,165	8,840	25,025
1955-56 ..	22,605	11,870	34,475
1956-57 (E)	29,260	12,740	42,000
1957-58 ..	29,130	14,300	43,430

E. Estimates

Increase in production has been followed by a rise in exports and internal consumption.

The following table gives the trend of exports:

Year	Exports in Tons*
1951-52 ..	2,300
1952-53 ..	3,000
1953-54 ..	9,613
1954-55 ..	3,535
1955-56 ..	7,954
1956-57 ..	15,224

* Out of the season's crop.

The latest estimate of the total production of coffee for 1956-57 also puts it at the record figure of 42,000 tons.

The revised estimate of the production in 1957-58 is also 43,430 tons (29,130 Arabica, 14,300 Robusta).

The consumption in 1955 was 22,288 tons.

There is no export duty on coffee at the moment.

The possibility of further expansion of the coffee industry has been receiving Government's active consideration. An Officer on Special Duty had been appointed to conduct a field survey of the vast undeveloped areas in the South.

This officer completed his survey in October 1957 and submitted his report to the Government of India in November 1957. This is under the consideration of the Government.

The average Pool sale prices per cwt. for 1951 to 1957 years were as follows:—

Year	Plantation 'A'	Arabica cherry Flats	Robusta cherry Flats
	Rs. a.	Rs. a.	Rs. a.
1951	218 11	197 14	196 6
1952	251 11	220 5	200 11
1953	219 4	188 14	150 1
1954	205 3	164 2	146 5
1955	217 5	180 11	158 14
1956	218 7	182 10	157 4
1957	222 70 nP.	185 97 nP.	162 11 nP.

COFFEE BOARD

To stimulate internal consumption and to regulate exports a statutory body, now known as the Coffee Board, was set up under the Coffee Market Expansion Board. One of the serious problems the Board had to contend with in 1955 was the growing rise in the prices of coffee which advanced from Rs. 207 per cwt. of plantation type in April 1952 to a record level of Rs. 316 per cwt. in the following September. The Board effected increased sales of coffee and banned exports. In December 1952 a Bill was introduced in Parliament to amend the Act of 1942 for the purpose of ensuring better co-ordination between the Board and the Central Government and of providing adequate representation of consumer interests on the Board.

The Coffee Market Expansion (Amendment) Bill, 1954, was passed in November 1954. The bill provided for greater control by the Union Government over the Coffee Board and the industry as a whole.

AVERAGE INDEX NUMBERS OF WHOLESALE PRICES OF COFFEE

(Price for week ended August 19, 1939 = 100).

Year	Index
1950	478
1951	567
1952	680
1953	620
1954	546 8°
1955	616 1°
1956	635 24

* Geometric mean of monthly averages.

MARKETING

Under the existing scheme of Coffee Control, all coffee estates in the country, big or small, are required to get themselves registered and to deliver the entire production, except quantities allowed for domestic consumption and seed purpose, to a Common Pool administered by the Coffee Board. Growers are paid in proportion to the value of coffee delivered to the Pool after deducting the cost.

The quantities of coffee released from the Coffee Pool for the internal market were 22,288 tons in 1955, 23,807 tons in 1956 and 26,202 tons in 1957.

Plantation Enquiry Commission

The Report of the Plantation Inquiry Commission (as the Committee was called) on coffee was published in the last week of November 1956. It observes that, although the total production of coffee in the country has increased considerably during the past 15 years, production per acre has not made any marked increase. The average yield is still just about 60 per cent. of the average yield in most of the coffee-growing countries of the world. Therefore, the Commission recommends that the yield from existing acres must be intensified at economic cost by the use of better strains of seeds, more manures and sufficient spraying against pests and diseases. With a view to regulating the internal distributive trade, the Commission has suggested the formation of a separate organisation under the aegis of the Board for manufacturing and marketing coffee powder. It may be stated here that the Board is already manufacturing and selling coffee in powder form. On the question of extension of arranges, the Commission recommends extension upto the minimum necessary to meet the growing internal demand and to maintain and develop the export markets. Statutory regulation of licensing of cultivation and production has been suggested in this connection. Another recommendation is that a coffee replanting fund should be instituted and that estates should be required to contribute a fixed sum annually to this fund.

These recommendations are under the consideration of the Government of India.

Expert Committee

In 1956 the Government of India appointed an Expert Committee consisting of Mr. A. N. Sattanathan as Chairman, Mr. K. Radcliffe and Mr. K. Ramaswamy as members, and Mr. G. S. Srinivasan, Chief Coffee Marketing Officer of the Board as Member-Secretary for reviewing the system of marketing adopted by the Coffee Board in the light of steadily increasing yearly production of coffee and making appropriate recommendations. They were to submit their report within six months.

COIR INDUSTRY

COIR is the trade name given to the fibre obtained from the husk of the coconut fruit. This golden coloured fibre is also known in Europe as "Coco Fibre".

India and Ceylon have a virtual monopoly in the production of this by-product of the coconut industry.

India produces about 4,370 million coconuts a year. The area under coconut cultivation is 15.87 lakh acres.

In India the coir industry is practically confined to the coastal strip of Kerala State. It accounts for over one million acres of the coconut growing areas out of a total of 1.525 million acres in India. The distribution of the area under cultivation and production of coconuts (inset available) is roughly as follows:—

	Area in acres.	Production Percentage.
Madras* ..	605,765	41.3
Travancore ..	584,736	37.8
Cochin ..	67,058	4.3
Mysore* ..	170,180	11.3
W. Bengal ..	31,300	1.4
Orissa ..	30,021	1.8
Bombay* ..	29,197	1.8
Other States ..	7,592	0.3
	1,525,759	100.0

*Pre-reorganization.

The coir industry is organised partly on cottage basis and partly in factories. The production of coir fibre, yarn and ropes is essentially a cottage industry, while coir mats, mattings, rugs, carpets, bags, etc. are manufactured in factories.

About 100,000 families earn their livelihood in this industry on the Kerala Coast.

There are two principal types of coir fibre—mat fibre and curled fibre. The bulk of the output consists of mat fibre. The yarn spun by hand is soft and even twist, while that spun on wheels is hard twist and not so even as hand spun. Wheel spinning is gradually displacing hand spinning. Spinning is mainly done by women, boys and girls. Over 100,000 families are employed in this trade in Travancore alone.

Coir yarn has certain well-known trade descriptions. They are: (1) Angengo—Superior and Ordinary; (2) Mangadan; (3) Carruva; (4) Alapat—Real and Imitation (Aashamudy); (5) Vyooma; (6) Beach; (7) Roping; (8) Quillandy; (9) Beypore; and (10) Unsoaked—Fine unsoaked and unsoaked.

The yarn produced in the spinning districts is marketed chiefly in Alleppey where there are a large number of factories for the manufacture of mats, mattings, rugs and carpets and also exporters of yarn.

Over 130,000 tons of fibre are estimated to be produced annually.

The annual production of coir yarn is estimated at 120,000 tons, of which wheel-spun yarn accounts for 80 per cent.

On an average, 23,000 tons of coir yarn are utilized in the manufacture of coir floor coverings such as mats and mattings. 55,000 tons are exported as coir yarn; and about 42,000 tons are consumed in India itself for various purposes including manufacture of ropes and cordages.

It is estimated that there are well over 500 factories large and small with over 16,000 looms for mats and mattings. The labour force is reckoned at over 15,000.

Exports of coir products earn about Rs. 9 crores of foreign exchange every year.

The coir industry in India is subject to violent fluctuations in prices and exports, causing often hardship to a large section of the population. This induced the Government of India to set up a Coir Board by special legislation called the Coir Industry Act, 1953.

The Act also provides for the control of the industry by the Union Government and for the levy of a customs duty on coir fibre, coir yarn and coir products.

At present, the duty is levied on coir fibre and coir yarn only at the rate of eight annas per cwt. The annual revenue on this account comes to about Rs. 5 lakhs.

The Coir Board was established on July 8, 1954. Its chief function is the improvement of markets at home and abroad, thereby establishing a balance between internal consumption and exports so as to give the industry the required economic stability. The Board will discharge its functions in accordance with the rules framed by the Central Government.

The Second Five-Year Plan Schemes relate to the establishment of Research Institutes, sending out foreign delegations for market survey and study the uses of yarn in importing countries, opening of show-rooms and sales-depots, and propaganda.

A scheme has now been sanctioned for the establishment of a Coir Research Institute near Alleppey and a branch Institute in Calcutta at a total cost of Rs. 20-28 lakhs during the Second Plan.

In view of the importance of the coir industry as a foreign exchange earner, the Government of India has enhanced the overall allocation for development of the industry for the Second Plan period to Rs. 1.70 crores, against Rs. 1 crore originally provided in the Second Plan.

The allocation for State schemes has been increased from Rs. 70 lakhs to Rs. 1.40 crores.

EXPORTS

The total exports during 1957 were 77,510 tons valued at over Rs. 8.40 crores as against 80,640 tons valued at Rs. 8.74 crores in 1956.

Export of coir yarn, mats and mattings, ropes and other sorts of coir are detailed below:—

								(Tons)	
Year.								Coir yarn.	Coir mats and mattings.
1953-54	55,570	13,486
1954-55	53,428	14,505
1955-56	54,162	13,936
April-Dec. 1956	46,404	10,266
1957	54,282.2	14,123.9
Jan-Aug 1958	30,401.8	7,980.2
									Coir ropes.
									Other sorts.
									7,031
									8,532
									6,117
									3,637
									6,554
									5,285.7

COTTAGE INDUSTRIES AND HANDICRAFTS

TOTAL allotment for small-scale and cottage industries under the First Five-Year Plan: Rs. 31.2 crores.

Second Plan - Rs. 160 crores.

The financial provision made in the Second Five-Year Plan was originally Rs. 200 crores. This did not include expenditure on the Amber Charkha programme and other working capital requirements. The Village and Small Scale Industries Committee (Karve Committee) had recommended programmes and allocations involving a total outlay of Rs. 260 crores.

When later all allotment were scaled down the total assigned for the cottage industries and the Amber Charkha came to Rs 160 crores

It is customary to refer to industries which are not required to be registered under the Factory Act as cottage and small-scale industries. There is no accepted line of distinction between cottage and small-scale industries but the use of mechanical power is one of the popular tests. A rough and ready definition now provided is that all those industries which employ up to 50 workers and use power or those which employ 100 workers and do not use power, are called small-scale industries.

An investment upto Rs 5 lakhs and not more than 50 workers a shift is also regarded as a demarcation

The data about their strength is extremely meagre. It is, however, very roughly estimated that at least 24 million persons are gainfully employed in these industries classified as under:—

Name of Industry	Persons employed in lakhs.
Textiles	75
Leather	24
Wood	21
Metals	42
Pottery, Ceramics Tiles, Bricks, etc.	20
Vegetable Oils, Chemical Products, etc.	10
Food including Hand-pounding ..	20
Dress and Toilet	11
Miscellaneous including jewellery and toy making	17
TOTAL ..	240
	(Estimated)

In order to encourage more effectively the development of cottage and small-scale industries, the All-India Cottage Industries Board, constituted in 1948, was replaced by two Boards, viz., The All-India Handicrafts Board and The All-India Khadi and Village Industries Board. The former was constituted in November 1952, and the latter in February 1953.

Towards the end of 1952 the Government also constituted the All-India Handloom Board, to deal specifically with problems affecting the handloom industry.

In 1957 Government set up by an Act a Khadi and Village Industries Commission. The original Board was reconstituted and turned into an advisory body to the Commission.

In the Government of India the Development Wing of the Ministry of Commerce and Industry is responsible for all small-scale industries.

The primary objective of the policy laid down under the First Five-Year Plan is the development of cottage industries through the organization of industrial co-operatives. Wherever a large scale industry competes with a cottage industry, a common production programme should be evolved.

The programme may cover (a) reservation of spheres of production, (b) non-expansion of the capacity of a large-scale industry, (c) imposition of a cess on products of a large-scale industry, (d) arrangements for the supply of raw materials and (e) co-ordination for research, training, etc.

* See also under "Textile Industry".

A common production programme has so far been accepted only in the case of ghandi oil and the processing of cereals and pulses.

To carry out research, the establishment of an institute for village technology has been recommended by the Planning Commission.

Finance for the development of village industries has to be viewed as a problem inseparable from finances for agriculture. The formation of industrial co-operatives is, therefore, considered essential. Meantime, the responsibility for revitalising village industries has devolved on the Government.

A cess of three pies per yard has been levied on all mill-made cloth consumed within the country and is expected to yield every year about Rs. 6 crores. Schemes for the development of khadi and handlooms are to be financed out of this resource, though finances for Khadi development programmes are drawn both from the cess fund and the general revenues.

In the States the First Five-Year Plan provided Rs. 12 crores for cottage and small-scale industries. The responsibility for organizing industrial co-operatives lies on the State Governments.

Under the Second Plan there is a fund called the Village Industries Fund.

In February 1955, a Small Industries Corporation, designed to assist small industries, was registered as a private limited company under the auspices of the Government of India. The Corporation will accept contracts for supplying orders to Government and issue sub-contracts for these goods to small-scale industries. The Corporation also undertakes and guarantees loans to such units from banks and has an authorized capital of Rs. 10 lakhs subscribed entirely by the Government of India.

THE COMMISSION

In November 1956 Parliament passed the Khadi and Village Industries Commission Act (Act 61 of 1956) and the Commission was constituted on April 1, 1957.

Members:

Vaikunth L. Mehta (Chairman), Pranal S Kapadia (Secretary), R. Srinivasan, Sriman Narayan, Dwarakanath V. Lale.

The functions of the Commission will generally be to plan, organize and implement programmes for the development of Khadi and Village Industries.

The Schedule of Industries included in the Act and which comes under the purview of the Commission is as follows: Bee-keeping; Cottage Match Industry; Cottage Pottery Industry; Cottage Soap Industry; Flaying, curing and tanning of hides and skins and ancillary industries connected with the same and cottage leather industry; Ghandi Oil Industry; Hand-made Paper; Manufacture of Cane-gur and Khandeeri; Palm-gur making and other palm-products industry; Processing of cereals and pulses; Fibre (other than Coir); Blacksmithy and Carpentry.

TRADITIONAL KHADI*

Khadi is defined as cloth, cotton, wool or silk or any mixture of these, woven out of yarn handspun in India. Cotton Khadi used to be made out of yarn produced on traditional charkhas till 1956-57. During 1956-57 the Commission introduced the Amber Charkha to produce better quality yarn. Since then the two schemes have been in operation side by side.

The Commission disbursed Rs. 546.48 lakhs for the development of traditional Khadi during 1956-57 and 466.45 lakhs during 1957-58. Substantial progress has been made during the two years in traditional Khadi.

Production increased from 23.08 million sq. yds. valued at Rs. 7.28 crores in 1956-57 to 53.13 million sq. yds. valued at Rs. 10.16

crores during 1957-58, an increase of about 40 per cent in the quantity of production. The production of traditional Khadi is expected to go upto 60 million sq. yds. by the end of the Second Five Year Plan.

Sales of Khadi also increased during the period from Rs. 6.19 crores to Rs. 7.78 crores, showing an increase of about 26 per cent. Of the total sales, about 10 per cent was purchased by Government.

By the end of 1957-58, 9.75 lakh spinners, 93,000 weavers and 53,000 dyers, carpenters, printers, etc. were employed in the industry.

The number engaged in these occupations when the All India Khadi and Village Industries Board took over Khadi development work in 1953, was a little over 300,000.

In the matter of handloom production there are no statistics of employment.

It is estimated that there are about 28 lakhs of looms in India. Each loom provides employment to about three persons. There are thus about 75 lakhs employed in this industry.

On an average the production is 1,500 min. yards a year, a third of the mill production.

The estimated production of handloom cloth (traditional and otherwise) during 1957 was 1,679 million yards. During the first seven months of 1958, the production from indigenous yarn was 1,029 million yards.

Certain varieties are reserved for handloom sector (coloured saris, dhotis, towels, sheets, himroos, lungis, table cloths, turkish towels, napkins, etc.).

The Second Plan target is 2,300 min. yards.

The number of co-operative societies was about 5,000 in June 1958. These had 10 lakh looms in their fold. The number of co-operative marketing emporia was about 1,450.

Handloom exports earn about Rs. 8 crores. The more important markets are Ceylon, Singapore, Nigeria. Government sponsored emporia exist in Ceylon, Singapore, Aden, Bangkok, Rangoon. There is a rising demand from America and other western countries.

A Handloom Fabrics Marketing Society exists to promote inter-State and export marketing.

The loans and grants respectively made by the Central Government to the State were: Rs. 251 lakhs and Rs. 337 lakhs for 1956-57 and Rs. 161 lakhs and Rs. 306 lakhs for 1957-58.

The position at the end of March 1958 about marketing schemes was as follows:

Schemes	Amount sanctioned (Rs. lakhs)	No sanctioned	No. opened
Sale depots ..	57	1,695	1,595
Inter-State depots ..	5	33	25
Central depots ..	1.44	49	37
Mobile vans	15.4	37	37
Hawkers ..	0.48	66	59
Push carts and trolleys	1.25	54	51
Sales depots in big cities	12	2	—

AMBER CHARKHA

In pursuance of the recommendations of the Small-Scale and Village Industries (Second Five-Year Plan) Committee, popularly known as Karve Committee, and the Amber Charkha Enquiry Committee appointed by the Government of India (Khara Committee), the Government of India approved in principle an experimental programme for the introduction of Amber Charkhas during the Second Five-Year Plan.

During 1956-57, the Commission distributed 45,000 Ambar Charkhas for independent operation by trained spinners. The number increased to 1,48,000 in 1957-58.

The Commission disbursed Rs. 93.71 lakhs as grants and Rs. 175.49 lakhs as loans during 1956-57 and Rs. 175.44 lakhs as grants and Rs. 474.89 lakhs as loans during 1957-58, for the implementation of the Ambar Charkha Programme.

The production of yarn and cloth during the two years were:

Year	Yarn (Million lbs.)	Cloth (Million Sq. Yds.)
1956-57	0.7	1.88
1957-58	2.5	11.15

The Ambar Charkha Programme provided additional employment to about 145,000 spinner families, 8,300 weaver families and about 14,000 others in ancillary processes during the two-year period of its operation.

VILLAGE OIL

India is the second largest producer of oilseeds in the world and leads all other countries in respect of acreage under oilseeds.

Mills and ghanis are the two sectors in the oil industry in the country. According to one estimate included in the Report of the Oilseeds Crushing Industry Inquiry Committee (1956), the percentage of major oilseeds crushed in ghanis and those crushed in power mills is as follows:

Seed	Ghanis per cent	Mills per cent
Groundnut	20	80
Neamum	83	17
Rape and Mustard	37	63
Linseed	30	70
Castor-seed	0	100

* (a small quantity is also crushed in ghanis)

According to the Report of the Indian Central Oilseeds Committee, there are, 7,597 oil mills in the country. The number of ghanis in the country was 446,000 in 1951 according to the Livestock Census (1951).

Although accurate information on employment in the organised sector is not available, it is estimated at 103,000 persons.

Ghanis, on the other hand, provide employment to a considerably larger number. On the assumption of one toll to a ghani, the number of persons engaged in the village oil industry would be 4.46 lakhs.

The Commission's development programme for the village oil industry envisages improved ghanis and improved techniques, financial assistance and the supply of oilseeds.

Loans and subsidies are given for the establishment of model demonstration-cum-production centres, ghani manufacturing workshops and training centres. Improvement of ghanis is aided by 50 per cent loan and 50 per cent subsidy. Recognised institutions are also given loans for stocking oilseeds.

During the First Five Year Plan period, the total amount spent for the development of the industry was Rs. 80.96 lakhs. The production of oil during this period amounted to 69,495 B. Maunds, providing employment to 8,807 tolls.

Funds were disbursed for setting up 164 model production centres and for the supply of 1,038 improved ghanis, 7,097 old and 1,846 new ghanis were registered with the former All India Khadi and Village Industries Board during the period

In 1955-56 the production of oil was estimated at 64,495 Maunds.

During the first two years of the Second Plan, Rs. 151.31 lakhs were disbursed. The number of model centres set up increased to 126 by the end of 1957-58. 3,857 additional improved ghanis were distributed during the two years 1956-57 and 1957-58, in addition to 25,457 traditional and improved ghanis registered by the Commission.

The scheme provides for the registration of selling agencies so as to ensure distribution of rebates—subsidies to the appropriate persons. 3,481 such agencies were registered during the period. Production of oil, according to the available data, amounted to 6.41 lakh B. Maunds. The number of persons trained upto 1957-58 was: 293 inspectors, 214 mistris, and 1,218 tolls.

Development Programme

On the recommendation of the Oilseeds Crushing Industry Inquiry Committee and the Small Scale and Village Industries (second Five Year Plan) Committee, Government of India have formulated a common production programme for the development of the oil industry in the country.

An excise duty of Rs. 112 per ton is levied at present on all varieties of vegetable non-essential oils (excluding cotton-seed oil for which the duty is Rs. 56 per ton) produced by mills. On the other hand, a production subsidy is paid at the rate of Rs. 1.87 per maund of oil produced by village ghanis. In addition to these measures, the Government of India have recommended preferential treatment to ghani pressed oils and State Governments have been advised to follow the same line.

Preference is to be given to ghani pressed oil for use in hospitals, jails, police establishments, messes, hostels etc. Concessional railway freight is to be given for ghanis and allied equipment, and replacement of handpresses by phased programme is to be undertaken with the introduction of Wardha Ghanis.

The development of the vegetable oil industry depends in part on the possibilities of diverting larger supplies of edible oil seeds to ghanis for crushing and on the possibilities of inducing oil mills to utilize greater quantities of cotton seeds. In the Second Five Year Plan, the Board has proposed extension of assistance to one lakh tolls on ordinary ghanis and fifty thousand tolls on improved ghanis to purchase shares of co-operative societies with a view to improving their operative conditions. 400 Model Centres are proposed to be organized and 400 filter presses will be distributed among these centres. The total cost of the programme is estimated at Rs. 6.7 crores excluding working capital.

The development programme when implemented will provide employment to 1.5 lakh tolls and distribute Rs. 36.70 crores as wages over the Plan period. Total production of oil over the Plan period is estimated at 8.3 lakh tons of oil, 13.53 lakh tons of oil-cake, collectively valued at Rs. 200.63 lakhs.

The implementation of the programme depends on the provision of direct assistance for marketing of oil. To encourage tolls working on the improved ghanis to form themselves into co-operative societies and to market their oil through them and also to offer partly the price differential between mill and ghani oil, the Board has proposed a subsidy of Rs. 1.14-0 per B. Maund of oil sold.

Besides providing direct employment to tolls, the industry will provide employment to 8,000 people and many other artisans like carpenters, blacksmiths, etc.

PROCESSING OF CEREALS AND PULSES

In 1957-58 the Government of India changed the nomenclature of the industry from 'hand-pounding of rice' to 'processing of cereals and pulses industry'.

Processing of rice is an important village industry. It processes about 65 per cent of the

paddy. The First Five-Year Plan aimed at improving the hand process for increased recovery of rice and production of bran in a pure form by introducing paddy husking stone chakkis in place of the pounding method.

The Rice Milling Committee (1954) and the Village and Small-Scale Industries (Second Five-Year Plan) Committee (1956) have made recommendations regarding the development programme for this industry. In pursuance of the recommendations of the Rice Milling Committee, Government of India decided, in the year 1957, that licensing of all power driven rice mills should be introduced and a census of all such mills should be taken. They have further decided that no new mill should be allowed to be set up and no expansion of the existing capacity of the mills be permitted unless the State Government concerned is satisfied that it is necessary to do so for the purpose of ensuring adequate supplies and that, in such cases, preference should be given to sheller mills. To ensure this, an Act was passed in May 1958—The Rice Milling (Regulation) Act.

The Government of India have also directed that the milling of rice should be restricted to 5 per cent removal of the bran with a minimum 3 per cent.

The development programme of the Commission envisages the introduction of improved techniques, provides for the establishment of marketing depots to ensure the regular supply of handpounded rice to urban areas, of training facilities for persons to organise production, mistris to manufacture chakkis, dhenkis and other implements and for the constitution of nutrition committees in selected urban areas to popularise consumption of handpounded rice.

The specific schemes of assistance relate to the subsidised distribution of improved implements, a production subsidy at 37 naye paise per maund of paddy dehusked and loans for stocking paddy and for manufacturing and stocking implements.

For the implementation of the Atta Chakki Scheme Rs. 2.83 lakhs were disbursed and 13,770 chakkis and 80,073 sets of ball-bearings were distributed during the two years 1956-57 and 1957-58.

The Karve Committee recommended the imposition of an excise duty on the output of mills and the payment of a subsidy to hand-pounders to reduce the price differential between hand-processed and mill processed-rice. A subsidy of As. 6 per B. Maund is paid on production through co-operative societies and registered, recognised institutions. The recommendation of the Rice Milling Committee for the imposition of a cess at As. 6 per maund of paddy milled in rice mills has not been accepted by Government.

During the First Five-Year Plan period the total expenditure on the development of this industry amounted to Rs. 39.61 lakhs. 12.70 lakh B. Maunds of paddy have been dehusked providing seasonal employment to 13,050 hand-pounders, 1,224 chakkis, 196 Dhenkis and 161 winnowing fans have been distributed among various production centres.

During the first two years of the Second Five-Year Plan, the total expenditure on the development of this industry amounted to Rs. 45.62 lakhs. There were 365 co-operative societies and 303 registered institutions organising the industry at the end of 1957-58, among whom 4,864 chakkis of all types, 459 dhenkis and 401 winnowing fans were distributed. Production during the two years 1956-57 and 1957-58 amounted to 24.59 lakh mda. 525 persons were trained under the Commission's Central Training Scheme at Nadia and the State Training Scheme.

The Second Five-Year Plan envisages the processing of 4 million tons of paddy through the manufacture and distribution of 43,000 chakki-dhenki units, 142,000 improved (Anam) dhenkis and 1,600 winnowing fans over the Plan period. The implementation of the Rs. 5 crore development programme will provide

seasonal employment for 5.78 lakh persons and distribute Rs. 23.06 crores as wages over the Plan period.

The programme also envisages the training of 600 supervisors and 1,000 mistries to meet the requirements of trained personnel for the implementation of the programme.

The popularisation of hand-pounded rice and the organisation for its regular supply to urban areas constitute important parts of the programme. Over the Plan period the programme provides for the constitution of 200 nutrition committees to carry on intensive propaganda through trained nutritional guides, and the organisation of 200 city and 300 town depots.

BEE-KEEPING

Bee-keeping is concerned with the rearing of bees of the species of *Apis indica* for the purpose of collecting honey. As such, it is a cottage industry.

The development of this industry was undertaken in selected areas like Madras, Bombay, Uttar Pradesh, Punjab, Mysore and Kerala.

The more important features of the development programme are: Scientific collection and marketing of wild honey; utilisation of honey in the manufacture of jams, jellies, syrups, ayurvedic medicines etc.; improved marketing arrangements; formation of co-operatives; aid to professional bee-keepers and establishment of model apiaries; and the training of fieldmen and apiarists.

Moreover, the Commission provides for training in schools which introduce bee-keeping courses, and also for training of persons who wish to set up apiaries.

During 1953-54 to 1955-56, Rs. 9.36 lakhs were spent for the development of the industry 67,680 lbs. of honey were produced during the First Plan Period. 13 area offices, 140 sub-stations, 23 model apiaries and 5 model production centres were organised. Seasonal employment was provided to 4,700 persons. 29,770 beehives were distributed to farmers at subsidised rates.

During the first two years of the Second Plan, the Commission disbursed Rs. 18.75 lakhs for the implementation of the scheme. 24 area offices and 270 sub-stations were added and 49 additional school units were set up.

At the end of 1957-58, there were 34 model apiaries in the country. 91,347 bee-colonies were distributed. Production of honey during the two years amounted to 4.29 lakh lbs. valued at Rs. 7.93 lakhs. Employment was provided to 10,849 persons in 1956-57 and 16,732 persons in 1957-58. Sales of honey during the two years amounted to 4.29 lakh lbs. 405 persons were trained as fieldmen.

During the Second Five-Year Plan period, the All India Khadi and Village Industries Board have proposed to establish 25 area offices, 500 sub-stations and 100 model apiaries. The development is estimated to cost Rs. 1.3 crores.

The implementation of the programme may result in the output of 119.5 lakh lbs. of honey valued at Rs. 239 lakhs over the Plan period. 80,000 beekeepers may get part-time seasonal employment and earn Rs. 1.20 crores over the Plan period.

A separate provision for the training of 1,000 school children is a special feature of the development programme.

HAND-MADE PAPER

The Commission has worked out specifications for different qualities of high grade paper like permanent document paper, durable paper for legal documents, bond papers, ledger paper etc. Fibrous materials like lined stalk fibre, cotton and cotton stalk fibre, old gunny bags, fishing nets, cotton waste, straw and grasses, weeds, reeds, plantain stems and waste paper are the chief raw materials of the industry.

In 1953-54, there were 30 centres employing nearly 1,000 persons engaged in this industry and the total production of hand-made paper was about 130 tons.

Assistance is provided to different types of units classified on the basis of their productive capacity. The Commission also provides assistance to schools where students are taught the manufacture of paper by hand process.

The total outlay for the development of the hand-made paper industry amounted to Rs. 15.98 lakhs over the First Five Year Plan period. The industry provided full-time employment to 2,347 paper-makers, 1,261 tons of hand-made paper was produced in 31 units established during the period.

During the first two years of the Second Plan the total expenditure for the implementation of the programme amounted to Rs. 26.68 lakhs. At the end of the second year i.e. 1957-58, there were 91 units operating in the country, and 1,523 tons of paper of all varieties valued at Rs. 21.90 lakhs was produced. 117 schools actively implemented the programme. 25 managers, 38 operators and 49 teachers were trained during the period to handle the work at different stages.

The development programme for hand-made paper industry proposed by the Khadi Commission in the Second Five-Year Plan visualises the establishment of 80 factory units and 400 cottage units for commercial production of 4,000 tons of hand-made paper for sale in the open market by 1960-61 and 400 school units, which will be largely self-sufficient. The programme is estimated to cost Rs. 1.09 crores excluding working capital.

The production programme envisaged in the Plan may provide employment to 12,000 workers and distribute Rs. 72.05 lakhs as wages over the Plan period.

To provide trained personnel required to implement the programme, the programme provides for the establishment of one Research-cum-Training Centre with an annual capacity for training 100 persons.

The bulk of production envisaged in the programme is high grade handmade paper. As the prices of comparable varieties of mill-made paper at home and imported from abroad are relatively low, the programme provides a subsidy of Rs. 250 per ton or Rs. 0.1-9 per lb. on production to narrow down the existing price differential.

NON-EDIBLE OILS AND SOAP

India possesses large quantities of a wide variety of non-edible oilseeds, e.g., neem, karanja, marol, daps, castor, undi, etc. besides other non-edible oilseeds resources. The oils extracted from these seeds are highly valued as industrial oils. These resources in vegetable are largely wasted through non-utilisation.

The development programme of the Commission lays emphasis on the systematic collection of these seeds and their conversion into oils for the manufacture of soap and other utility products. The programme also aims at providing large-scale employment to rural population during the agricultural off-season.

Financial assistance is given to different types of production units classified on the basis of their productive capacity. Special provision has been made for 'D' class (school) units with a view to popularising the use of soap with non-edible oils in the schools and encouraging the youth to take to this industry. Training arrangements are made at several places and such centres are also equipped with the necessary arrangements to test the quality of soap.

For the implementation of the development schemes under this industry, Rs. 45.21 lakhs were disbursed during the three-year period from 1953-54 to 1955-56 of the First Five-Year Plan. 6,492 B. Maunds of soap and 8,904 B. Maunds of cakes were produced during the

period in about 114 different types of units. This industry has provided seasonal employment to nearly 1,900 persons over the period.

Assistance for the development of the industry aggregated to Rs. 82.82 lakhs during 1956-57 and 1957-58 during the Second Plan. Substantial sums were spent for the expansion of the industry during the period. 374 additional soap units of all types and 58 school units were sanctioned. Over the period, 699 persons were trained in 8 centres. The production of soap amounted to 38.44 lakh lbs. valued at Rs. 21.41 lakhs. Correspondingly, the sale of soap during the period amounted to 29.23 lakh lbs. valued at Rs. 18.41 lakhs. During 1957-58, according to available data, the industry provided full-time employment to 470 persons and part-time employment during the season to 10,350 persons.

Methods of quality control are now being evolved by a special Committee so as to conform to the specifications laid down by the Indian Standards Institution.

In the Second Five-Year Plan, the Khadi and Village Industries Commission has proposed the establishment of 90 oil production centres, 340 oil-cum-production units in the intensive areas with a collective productive capacity of 14,300 tons of non-edible oil and 8,400 tons of soap during the last year of the Plan. The programme is estimated to cost Rs. 2.99 crores excluding working capital. 39,110 tons of oil, 91,280 tons of oilcakes and 22,420 tons of soap collectively valued Rs. 6.68 crores are expected to be produced over the Plan period. The development programme may provide full-time employment to 10,340 persons and seasonal employment to 89,400 persons, distribute Rs. 179 lakhs and Rs. 147 lakhs as wages respectively to each category of workers.

Special provision has been made for the training of the supervisory staff in this industry also.

PALM-GUR

In India, there are four varieties of sugar-yielding Palms—Date, Palmyra, Coconut and Sagu. While the total number of tappable palms in the country, mostly Date and Palmyra, is estimated at over five crores, only about 25 lakh palms are being tapped for the manufacture of palm-gur.

The significance of the Palm-Gur Industry in India lies in the manufacture of gur and sugar from the sweet juice of palms, popularly known as *nera*; in providing seasonal employment on a large scale, and in its effects on subsidiary occupation as in the manufacture of products from palm leaf.

The Commission has established a Central Research-cum-Training Centre at Dahann (Bombay State). Research in the preservation of *nera*, better processing methods, improved implements is being carried on. A monthly journal "Tad-Gur Samachar" gives information about the industry and the results of research experiments.

During the two years 1954-55 and 1955-56, Rs. 13.55 lakhs were disbursed by the former Board on various development schemes. The development of the industry resulted in the production of 39.41 lakh B. Mds. of Palm Gur and 6,051 B. Mds. of other products. The industry provided seasonal employment to 3.98 lakh persons during the period.

During the first two years of the Second Plan, the disbursements aggregated to Rs. 56.39 lakhs out of the sanctioned total of Rs. 64.87 lakhs for the implementation of the scheme.

7,708 persons were trained directly and indirectly in the production of palm gur and palm products. On the basis of available reports, the production of palm-gur during the two years amounted to 35.71 lakh B. Maunds, valued at Rs. 784.92 lakhs.

During the Second Five Year Plan the Khadi and Village Industries Commission proposes to establish 105 special units, 1,180 each of A and B units over the Plan period to organise production. 50 Palm Gur Co-operative Federations and 72,000 small co-operative units of individuals will be assisted. Among other schemes, mention may be made of the colonisation units, propaganda units and training units. The total estimated cost of the programme is Rs. 3.43 crores. The programme when implemented will produce 15.75 lakh B. Maunds of Palm Gur valued at Rs. 8.14 crores, besides many other subsidiary products. The programme will provide seasonal employment to 105,000 tappers and distribute Rs. 235.89 lakhs as wages over the Plan period. About 150,000 people will also be employed as pan boilers and auxiliary workers and about Rs. 8 crores will be distributed to them as wages.

GUR AND KHANDSARI

The manufacture of gur is an important cottage industry, utilising nearly 60 per cent of the total cane crop.

The Gur Khandasari Industry which is, perhaps, the largest agricultural processing industry, can meet the entire domestic demand for sugar and make crystal sugar available for export, given appropriate aid for its phased development through improved techniques. The industry provides continuous employment for four to five months in a year to those directly engaged in it, and perennial employment indirectly to the cartmen, potters etc.

The object of the programme is to extend the use of improved types of cane crushers, and the working conditions of artisans.

Cane growers are trained in improved techniques and the use of improved implements. The programme also aims at the organisation of processing co-operative societies to take up marketing, stocking and the supply of improved implements. Fresh areas are tackled through pilot demonstration parties.

During 1954-55 and 1955-56, Rs. 5.79 lakhs were disbursed for the development of the industry. The implementation of the programme during this period resulted in the production of 1.69 lakh tons of ordinary Gur, 46,000 tons of quality Gur and 1,000 tons of Khandasari totally valued at Rs. 6.7 crores, providing perennial full-time, employment to 920 persons and seasonal part-time employment to 5,847 persons. 40 Multi-purpose Co-operative Societies were also organised among whom 1,154 improved crushers, 45 centrifugals and many other improved implements and accessories were distributed.

The total expenditure on the development of the industry amounted to Rs. 59.15 lakhs during the first two years of the Second Plan, of which Rs. 30.81 lakhs represented direct assistance by the Union Government to State Governments. The output of Gur—both ordinary and quality Gur—amounted to 3.08 lakh tons valued at Rs. 9.87 crores, 3,012 tons of khandasari valued at Rs. 20.63 lakhs was also produced. During 1957-58, perennial full-time employment was provided for 8,632 persons and seasonal full-time and part-time employment for 17,594 persons and 20,103 persons respectively. 3,493 kolhus (crushers), 2,984 pans and 489 centrifugals were distributed. Funds were sanctioned for power driven crushers and centrifugals on an experimental basis. 5,773 improved furnaces were constructed and 2,531 old furnaces were repaired during 1957-58. Juice clarificants valued at Rs. 9,700 were distributed.

During the two years 1956-57 and 1957-58, 1,004 honorary workers were trained, and pilot demonstration parties which, besides providing on-the-spot training through demonstration, also assist in the construction of furnaces, covered 445 villages in nine States, where 38,430 persons benefited from these demonstrations.

The Khadi and Village Industries Commission proposed (i) the establishment of 23 production units in the sugar-cane growing

States and of 143 co-operative societies to organise production, distribution of improved implements and sale of products in selected areas; (ii) manufacture and distribution of 65,000 Kolhus and an equal number of pans, 241,000 gur moulds, 19,000 each of cube frames and percolators, 51,300 stocking drums for gur and 90,000 crystallisers and 4,000 centrifugals for the Khandasari Industry and (iii) the erection of 10 carbon factories for ensuring adequate supplies of improved juice clarificants. The programme is estimated to cost Rs. 7.7 crores excluding the working capital required.

The implementation of the development programme will result in the production of qualitatively improved gur at the annual rate of 8.45 lakh tons in the last year of the Plan. The development programme will cover 260,000 artisans in the Gur Industry and about 16,000 artisans in the Khandasari Industry, besides providing employment to 21,667 persons, in the ancillary process of the industry. About Rs. 9.55 crores would be distributed as wages over the Plan period. A Central Training Institute is also proposed to train supervisory staff for the implementation of the programme. About 20,000 persons will be trained over the Plan period.

The budget proposals for 1959-60 include a cess on khandasari.

VILLAGE LEATHER INDUSTRY

The processing of hides and skins and the manufacture of leather goods are traditional village industries.

The cottage sector of the leather industry is responsible for the bulk of its production in the country and employed as many as 6.5 lakh persons as against only 31,000 workers employed by the organised leather industry, according to the Census of Manufacturers (1951).

The object of the development programme of the Commission for the industry is the planned recovery and full utilisation of the various by-products of carcasses of dead animals so as to minimise waste and provide large-scale employment. There is a vast livestock population consisting of over 21.2 crores big animal and 9.52 crores sheep and goats.

The programme also aims at improving the extremely low level of technical efficiency of small units in tanning, and footwear manufacture.

The programme consists of the establishment of carcass recovery centres, tanning centres and glue manufacturing centres; the training of artisans and organisation of demonstration-cum-training parties.

Besides, small and big marketing depots are set up to aid the marketing of the products of village tanners as well as to supply them with raw materials, including hides and skins. Specific aids are given in the form of loans and subsidies for meeting capital outlay, on the establishment of tanning centres, village model tanneries, glue manufacturing centres and bone-crushing units. Payment of stipends, T.A. to trainees and tuition fees is included in the assistance for the training programme.

To assist the Commission there is an Advisory Committee consisting of representatives of this industry and trade.

The expenditure on the various development schemes amounted to Rs. 31.78 lakhs during the three-year period from 1953-54 to 1955-56.

One hundred and fifty-five tanning centres, 21 training-cum-production centres, 56 model tanneries and 40 bone-crushing units were organised during this period, besides distribution of 156 bone-digesters among various centres of production. 179 persons were trained in improved methods of tanning and 341 in tanning.

During the first two years of the Second Five Year Plan, the emphasis of the development programme for the industry was on consolidation rather than on expansion.

Funds spent for the purpose amounted to Rs. 38.91 lakhs. The total number of tanning

centres, model tanneries and bone-crushing units allotted during 1956-57 and 1957-58 numbered 162, 69 and 17 respectively.

The total number of new pits constituted and old pits repaired upto 1957-58 was 2,302 and 3,165 respectively.

There were 31 marketing depots,—12 big and 19 small.

304 and 136 persons were trained in carcass recovery and tanning respectively during the two years.

The value of the production of different articles amounted to Rs. 13.94 lakhs during the period.

During 1957-58, the industry provided full-time employment to 829 persons and part-time employment to 555 persons in different operative units. Data on employment are, however, unsatisfactory both in coverage and accuracy.

The Khadi Commission has proposed a development programme for this industry under the Second Five-Year Plan which envisages the establishment of 3,500 tanning centres, 350 tanning centres and an extension programme for 35,000 shoe-makers to bring them within the folds of co-operative societies. A scheme for the housing of tanners and flayers is also an improvement part of the programme.

The implementation of the development programme will help to produce 8.44 lakhs of pieces of tanned hides, 2.70 lakh lbs. of glue and 7 million pairs of footwear, besides other by-products valued collectively at Rs. 7.5 crores over the Plan period. Over the Plan period the value of production is estimated at Rs. 20.78 crores. The programme may provide employment to 7,000 persons in tanning, 2,450 in tanning and 150 persons in the manufacture of glue, in 3,500 tanning centres, 350 tanning centres and 75 glue making centres respectively. Besides, the programme envisages to extend finance to 35,000 shoe-makers. About Rs. 4.9 crores will be distributed as wages among the various categories of artisans over the Plan period. The total outlay on the programme is estimated at Rs. 5.0 crores, which is exclusive of working capital required.

50 Marketing depots for the disposal of the various goods produced at the production centres will be organised over the Plan period.

COTTAGE MATCH

The industry is ideally suited for operation on cottage-scale, providing employment to a large number of unemployed and underemployed people.

The match industry in India is classified into A, B, and C classes according to the size and production capacity of the manufacturing units.

The programme of the Commission consists in the promotion of a new class of factories, known as 'D' class, licensed to produce a maximum of 25 gross boxes per day and capable of employing about 40 persons each.

The development programme aims at the utilisation of the bamboo resources of the country for the manufacture of matches and the elimination of the use of matchwood and timber which are becoming scarcer and also deplete the country of its forest wealth to the detriment of the nation.

The programme is also aimed at ensuring decentralisation, manufacture without the use of machinery, and large-scale employment.

The programme also provides for training, research and marketing schemes.

The disbursements of funds by the former Board for the development of the industry amounted to Rs. 19.82 lakhs during the First Plan period. 161 'D' class factories were sanctioned and 119 persons trained at the Central Training Institute at Sodepur, near Calcutta.

During the first two years of the Second Plan, the development expenditure amounted to Rs. 31.79 lakhs. 271 additional 'D' class match

units were sanctioned of which 201 were distributed among the community Development Blocks, 82 units have gone into production. Over the period of two years, 636 persons were trained at the Central Institute, of whom 320 were trained under the operators' training course.

Research consists in efforts at improving the structure of the match box and the tip composition. Several improved implements were devised and tested for distribution among the production units.

The development programme of the Second Five-Year Plan period, for the Cottage Match Industry aims at the establishment of 1,000 'D' Class factories over the Plan period with a productive capacity of 29.25 million gross boxes at a total estimated cost of Rs. 1.1 crore over the Plan period.

The output of Cottage Match is likely to amount to 26.25 million gross boxes of 60's valued at Rs. 17.72 crores. The implementation of the programme will result in providing full-time employment to 10,000 persons and part-time employment to one lakh persons and distribute Rs. 3.41 crores as wages over the Plan period.

The programme makes a provision for the establishment of Research Laboratories for carrying on research as well as for intensive propaganda to influence the consumer preference for Cottage Matches.

To market the matches produced in various units the programme visualises a network of Marketing depots under two categories, Central

and Divisional. A separate provision is also made for training the required personnel to implement the programme.

VILLAGE POTTERY

The Commission's programme is made of schemes for the promotion of production, extension, marketing, research and training and central organisation. Provision is made for demonstrations, supply of equipment such as improved wheels, moulds for pipes and special tiles and improved furnaces.

During the First Plan period, Rs. 4.04 lakhs were spent for the development of the industry. Funds were allotted for the establishment of 5 model production centres and 4 common workshops.

Disbursements during the first two years of the Second Plan amounted to Rs. 14.06 lakhs. 13 additional model production centres and 52 common workshops were allotted to different agencies in the States. Funds were disbursed to different States for the distribution of 800 wheel attachments, 678 new model wheels, 211 chain-driven wheels, 56 moulds and 14 screw presses. 226 persons were trained, 59 at the Central Training Institute at Khanapur and 117 at the different Regional Training Centres.

Rs. 5.79 lakhs have been sanctioned to the All-India Khadi and Village Industries Commission for the development of the Village Pottery Industry for introducing improved equipment. During the Second Five-Year Plan period assistance to pottery industry will be continued through the provision of improved wheels, moulds for pipes and special tiles, etc. and improved furnaces.

INTENSIVE AREAS SCHEME AND MARKETING SCHEME

The Commission's Intensive Area Scheme was introduced by the former Board in 1954-55 in selected rural areas having a population of about 20,000 each. The Scheme is an experiment in village planning with a view to integrated development of the rural economy. The immediate objective of the scheme, however, is restricted to surveys and planned production for local consumption and thus create conditions favourable for full employment.

For the implementation of the scheme, the total expenditure amounted to Rs. 47.17 lakhs upto 1967-68. At the end of 1967-68, there were 26 pre-intensive and 65 full-fledged Intensive Areas in operation covering 2,682 villages and a population of about 20 lakhs.

An Evaluation Committee of economists and co-operators under the chairmanship of Mr. Maganbhai P. Desai submitted a report to the Commission in the middle of 1968 and made certain recommendations for the guidance of the Commission.

The Khadi and Village Industries Commission proposes to set up a comprehensive marketing organisation to assist village artisans in obtaining raw materials, tools of production and facilities for the sale of their products. It is proposed to have a three tier organisation consisting of regional marketing depots, sub-depots operating under each regional marketing depot and retail shops each operating under the sub-depot. To co-ordinate the activities of the regional depots and to assist with advice regarding the advance purchase of raw materials, tools of production, etc., it is proposed to set up a Central Marketing Intelligence Bureau.

HANDICRAFTS

The All-India Handicrafts Board is the authority entrusted with the development of the handicrafts in India.

It was first constituted in November 1952. It was reconstituted in December 1954 and again in August 1957.

It advises the Central Government, plans and executes development schemes through the State Governments, formulates and executes schemes of its own, helps in the promotion of sales, sees to technological improvement, quality control, research and training. It secures raw material, organises co-operatives, arranges credit, and sees to housing of craftsmen and general welfare.

There is a Standing Committee of the Board and where necessary panels of experts are appointed.

Under the Second Plan a sum of Rs. 9 crores is allotted for the promotion and development of handicraft industries (Rs. 6 crores States, Rs. 3 crores Central).

An Indian Handicrafts Development Corporation has been set up. This body organises the production of handicrafts on a commercial basis specially to cater for orders from foreign markets. surveys of foreign markets will be conducted and sales depots and selling agencies established.

The principal foreign markets are: Aden, Ceylon, British West Africa, Malay, Saudi Arabia, the Sudan, Iraq. The U.S.A. is regarded as an important potential market.

It is estimated that in 1956 and 1957 handicrafts earned a foreign exchange of Rs. 16 crores.

A list of the major handicrafts is given below:

Textiles Hand-printing and traditional dyeing of textiles, brocades, himroo, carpets and druggels, rugs, gabbaas and namdas, embroidery (cotton, silk, wool and zari), lace and lace work including nakki and gota making, shawls.

Metalware: Silver and gold ware, bidri, Aligar, brass and copper ware, bronze work.

Ceramics: Pottery and earthenware.

Ivory: Ivory carving.

Papier-mache: Papier-mache articles.

Woodwork: Wood-carving and inlay, lacquer work including *nirmal* work, decorative furniture.

Stone-work: Stone-carving including marble work and alabaster.

Toys: Dolls and toys other than mechanical toys.

Leather: Leather goods (artistic work).

Horn: Artistic articles.

Bone: Artistic articles.

Cane, Bamboo, etc.: Articles made of cane, bamboo, willow, straw and grass including mats and plithcraft.

Incense & Perfumery: Incense and perfumery of various types.

Flax and Fibre: Handicraft articles made of flax and fibre.

Bangles & Beads: Bangles and beads.

Musical Instruments: Musical instruments.

Conch-shell and semi-precious stones: Articles made of conch-shell and semi-precious stones.

Miscellaneous: Miscellaneous traditional art objects such as Oriassa, Mysore and Tanjore paintings, and handicraft products specially made for ceremonies, articles of worship and theatrical requisites such as costumes, masks, puppets, etc.

DEVELOPMENT

Steps taken to develop handicrafts include the establishment of design centres to revive ancient designs and create new ones and training centres to teach better techniques. Some of these are also production centres.

Mobile exhibitions are taken round the country and handicrafts weeks are held. There will be a handicrafts museum in New Delhi.

In the financial year 1968-69 the Government of India approved schemes to set up 56 centres for training in handicrafts. Grants totalling Rs. 7.62 lakhs were sanctioned for implementing 41 of these schemes.

Some of these centres are training-cum-production centres. A monthly stipend of Rs. 25 to Rs. 30 is provided. On completion of the training the trainees are encouraged to form co-operative societies with financial assistance from Government.

Design Centres

The Bombay design centre does metal embossing, wood-carving, terracotta and batik work and other textile crafts such as embroidery and bandhani.

The Calcutta design centre devotes itself to metal crafts and particularly to bell-metal, wood-work, bone and ivory, terracotta and the conch-shell crafts.

The Delhi centre does metalware, stone and stone-carving including the famed craft of marble inlaying, enamelware and jewellery, wood craft, embroidery and pottery.

The Bangalore centre works on metal casting techniques, wood and stone carving, decorative Tanjore crafts including the articles in three metals, ceramics, ivory and clay.

Craftsmen from neighbouring areas visit the Centres and see the technical drawings and actual designs created there, learn about new materials and processes and costs of production.

The designs evolved at these centres are also reproduced in a publication entitled Designs of the Year.

The design movement has also received a marked impetus as a result of the National Design Competition organised by the Board. In the first year this was confined to three crafts: textiles, pottery, and toys of all types.

Craftsmen are also helped by the Board through Pilot and Development Centres which impart a training in economical and improved production methods, use of new raw materials, the production of new designs.

The Kothakota centre in Mahbubnagar District in Andhra Pradesh specialises in the weaving together of cotton, silk and zari. This centre has evolved about 180 designs.

The Junagadh centre is concerned with lacquering. The articles cover bread rollers, pen holders, tops, dishes, sofa sets, flower vases, beads, boxes, toys. The training lasts 12 months and a trainee gets a stipend of Rs. 75 a month.

The Bombay centre trains women in the making of dolls, dresses, ornaments, jewellery, cardboard boxes. A stipend of from Rs. 20 to Rs. 50 is given. About 50 persons were trained till the middle of 1955.

The Madras centre gives a training in the making of Indian musical instruments. Some of the instruments made at the centre are veena, tampura, gotuvadyam, sitar, Sute, nadaswaram, mridangam, dholak and ghataam. The training lasts 10 months and there is a stipend of between Rs. 25 and Rs. 40.

The Surat centre which is devoted to brocade weaving, has produced a number of good designs.

The Bombay centre in pottery has created designs of glazed as well as unglazed pottery. The articles produced here have had such a wide response that it is proposed to convert it into a National Craft Institute to serve the whole country.

The Kancheepuram centre is devoted to training in the production of saris. About 105 designs have been duplicated. One peculiarity here is that the methods followed are wholly traditional. A large number of handloom weavers have profited by the designs produced here.

The Nizamabad centre in U P besides designing new shapes and forms in black pottery provides marketing facilities. Marketing is the chief problem here. The centre has sold Rs. 20,000 worth of pottery in ten months in 1955. The State Government has established a co-operative of potters.

The centre in Banaras has helped revive the art of terracotta and clay toys. It has introduced improved tools and techniques. There is a stipend of Rs. 40 a month and the course lasts one year.

The Faridabad centre concentrates on the making of mats, baskets, purses, chairs, etc. with the coloured fibre of the palm leaf. A large number of ladies have been trained. There is a stipend of Rs. 30 to Rs. 70 per month and the training lasts from three to six months. Attached to the centre is a production unit where about 20 women work on a piece-work basis.

The tie-and-die centre at Mathura has produced 73 designs. It provides work for over 50 women and about 10 craftsmen.

The training centre in Kalamkari painting of fabrics at Kalahasti in Andhra will concentrate on techniques prevalent locally. The trainees are given stipends. The course lasts two years.

In Bombay there is a centre for the production of education toys for children. The centre has evolved about 75 designs.

State Schemes

Besides sponsoring schemes of its own the Board helps State Governments to promote schemes.

In Assam the Board has helped promote the training in and production of fancy mats, mitalpati toys and dolls.

In Andhra the Board has given assistance to the State Government for a training-cum-production centre at Hyderabad, the setting up of a co-operative society in Hyderabad by Bidri craftsmen, providing a common facility centre for almalware and himroo, a co-operative society for the manufacture of ivory and tortoise-shell articles and to another society for kalamkari work.

To promote the beautiful craft of Kondapalli toys, assistance has been given to the Kondapalli Toy Makers Co-operative Purchases and Sales Society.

In Bihar the Board has given assistance through the State Government for setting up a common facility production centre for bamboo products, a production centre for the manufacture of sikhi goods and mats, calico printing, training-cum-production centres for papier-mache goods, glass bangles and basket making.

Training-cum-production centres for carpets, cloth dolls, decorative pottery and wood carving have also been sanctioned by the Board.

In Bombay, a training-cum-production centre was started for the development of printing on cloth at Amreli and Surat. Financial assistance has also been given for the development of papier-mache industry and for the expansion of the existing handicrafts emporia in Bombay.

In Kashmir the Board has assisted the State in establishing a design centre at Srinagar, export trade centres, for publicity and for the development of the shawl industry.

Kerala runs a number of training schemes for bamboo articles, mat and basket making, dyeing and printing and lace and embroidery. The Board has given financial assistance for these schemes and it also runs depots and marketing schemes in Kerala.

In Madhya Pradesh a design-cum-production centre has been set up in Bhopal. Other schemes which have been approved cover lacquered wood products, pottery at Mandasaur and lac ornaments and lacquerware at Sheopur.

In Madras the Board has given assistance to the State Government to implement several training schemes for vegetable fibres, glass bangle making, lace and embroidery, dyeing and printing, art metalware, sculpture, papier-mache, carpets and druggets, etc.

Grants have also been given to develop artistic pottery and wool processing and for marketing of handicraft articles.

The emporium at Madras has also received substantial assistance.

The Board has sanctioned schemes for financial assistance for the development of sandalwood carving for which craft Mysore is perhaps the only centre in India of any importance. Assistance has also been given to the State for wood carving, mat and basket making, soapstone industry and marketing of the numerous crafts of Mysore.

Substantial assistance has been given to the State Government in Orissa for the establishment of an arts and crafts design centre at Cuttack which has done good work in the development of handicraft designs.

Other schemes taken up in the State are toy making and embroidery for which the Board has given assistance when necessary.

A central organisation and design demonstration unit has been sanctioned by the Board for the Punjab as well as a design and production centre located in Phulkari. Training schemes covering pashmina rugs, carpet weaving, chain stitch embroidery, ivory inlaying have also been implemented through the State Government which is given financial assistance.

The schemes in U P for which assistance has been given cover ivory industry, chikan embroidery, pottery, brocades, brassware and marble inlay.

For the development of toy making and artistic pottery, the horn industry, durrer making and stone and wood carving, the Board has approved a number of training schemes in West Bengal. Assistance has also been given to revive the well-known craft of Jamdani saris.

FILM INDUSTRY

A Government publication states that at the end of 1957, there were 257 producing concerns, 1,175 distributing agencies, 67 studios and 2,555 cinema houses.

The number of shorts certified for exhibition was 588. These were broken up as follows:

35 mm. shorts over 2,000 ft. in length 41, shorts 2,000 ft. and below 516.

16 mm. shorts above 800 ft. in length 7, shorts 800 ft. and below 24.

The value of raw cinema film imported during 1957-58 was Rs. 2.01 crores.

The length of the exposed film imported was 169,00,000 feet.

The foreign exchange earned by the export of Indian films was Rs. 1.14 crores.

Only a limited supply of raw stock was available because of import control, and the industry was asked to distribute it equitably among the members.

This led to internal trouble in the main film organisations in the country.

Workers and artistes, however, in the film industry organised themselves into separate craft associations.

Among the new associations formed are:

Cine-Costume and Make-up Artists' Association, Cine Musicians' Association, Character Artists' Association, Western India Cinematographers' (Cameramen) Association, Cine Labs' Association.

The industry has set itself the task of re-organising the distribution circuits. After the re-organisation of States and the disappearance of the old Princely States, such a re-arrangement of the distribution areas was overdue. The industry has appointed a Committee to go into the matter and suggest a re-organisation of the circuits.

The Central Board of Film Censors sponsored a survey of audience reaction to films in the Greater Bombay area. It was the first survey of its kind in the country.

The findings are of value and interest, as the survey covered points like:

Frequency of visits, time preferred, type of film preferred, type popular with males and females with age-group, sort of scenes that have a special appeal, type of picture houses preferred, economic groups from which the audiences are drawn, parents' attitudes to children's going to pictures and so on.

Of the persons interrogated 29 per cent were in the age-group 10-20.

The Children's Film Society produced its first report of its work during the twenty-two months it was in existence—upto March 1957. It produced two feature films—*Jaldary* (3,400 feet), *Char Dost* (7,800 feet)—and acquired and adapted for children two more—*Ramashastri ka Nyaya* (from Prabhat's *Ramashastri*), *Bel Ramayana* (from Prakash's *Ramayana*)—each 7,000 feet long. It had spent Rs. 6 lakhs.

The Society brought out another 8,000 ft. film, *Scout Camp* along with the documentary short, *Ganga ki Lakshmi*.*

The U.S.S.R. presented to the Society twenty cine-projectors.

The society was reconstituted with Mr. R. R. Diwakar, as Chairman in the place of Dr. Kunzru.

The Society has its headquarters at Sapru House in New Delhi.

FILMS DIVISION

The Films Division produced during 1957-58, 50 documentaries (108) reels, exclusive of three Children's Magazines.

Seventy documentaries were released which made 150 reels in all.

There is a tendency to increasing the length of a documentary from one reel to two reels.

* Two more were released later in 1958: *Haris*, *Gulab ka Phool*.

State Governments also produced documentaries for their own use, and of these 6 were found suitable for all-India exhibition and were therefore taken by the Films Division.

Outside producers were allotted 11 documentaries (20 reels) during the period.

For a wider coverage, it is now the practice to dub the documentaries in 13 languages; previously they used only 5 languages for the commentaries.

Newsreels however continue to be dubbed in five languages only.

Documentaries for record (as distinct from those for general exhibition) continue to be made when dignitaries from other countries visit India or when the Vice-President or the Prime Minister visits other countries.

Thirty-six such reels were made during 1957-58 as against 30 in 1956-57 and 37 in 1955-56.

Three instructional films (6 reels) were also made for restricted audiences. Finger prints and foot prints, and Weather Forecasting were the subjects treated for training purposes. *Sericulture* (3 reels in colour) was another subject.

Of the 50 documentaries (102 reels) produced by the Films Division during 1957-58, *Hill Stations of South India* (Orty & Kodakanal) *The Jhelum, The Godavari, and Ancient Weavers of Today* (on handlooms) were in colour.

The full length colour film (8 reels) *Folk Dances of India* though ready could not be released as the required number of prints could not be obtained in time because of exchange difficulties.

Lokamanya Tilak, a biographical documentary was released during the year and was much appreciated for its technical novelty. The biography was unfolded without any one acting the part of the subject of the biography.

News for the People, another two reeler, was about the newspaper industry.

There were two documentaries on milk production.

Pilgrimage to Freedom (two-reeler) showed places connected with the 1937 uprising.

Red Cross Dental Care, T.B., V.D., Keeping fit, and other films produced during the year showed that the Films Division was trying to make Indian audiences health conscious.

Except for 156 cinemas in Andhra Pradesh and one in Rajasthan which have obtained stay orders from the High Courts against statutory direction for the exhibition of approved films, all cinemas in the country use either the documentaries or the newsreels for their shows.

For each documentary now dubbed in 13 languages to meet multi-lingual requirement, 172 prints are required.

For the compulsory showing of approved films, the Films Division levies rental on cinemas at the following rate:

- (i) From cinemas where the gross weekly collections are less than Rs. 500 & Rs. 25 per film per week;
- (ii) From cinemas where the weekly gross collections are Rs. 500 or more, 1 per cent of the collections per film per week.

Regular shows of documentaries and newsreels are arranged at the small theatre auditorium of the Films Division, Janapath, New Delhi, in the mornings and evenings at the nominal charge of 25 nk per head per show.

Similar shows are being introduced in other cities as well as they will help make audiences documentary-minded.

For non-commercial exploitation of the documentaries and newsreels, 3,200 prints were sold to various organisations. Demands for a free loan of such prints numbered about 500 in addition.

Films dealing with Plan activities, were supplied to State Governments, social education units, railways, exhibition Directorate, information centres and so on, and the total number of prints so supplied was over 6,800.

Copies of prints also are regularly supplied to Indian Missions abroad.

According to the revised estimates for 1957-58, the total revenue of the Films Division was expected to be Rs. 45,97,700. Actually, upto the end of December 1957 only Rs. 32,80,000 were collected.

AWARDS

(See also under 'Prizes and Awards' under 'Late Particulars')

The Government of India now give cash prizes for the first two award-winning entries in the three categories, feature, children and documentary.

1. For the best feature film, winning the President's Gold Medal—Rs. 25,000.
2. For the second best feature film—Rs. 12,500.
3. For the best children's film, winning the Prime Minister's Gold Medal—Rs. 25,000.
4. For the second best children's film—Rs. 12,500.
5. For the best documentary, winning the President's Gold Medal—Rs. 5,000.
6. For the second best documentary—Rs. 2,500.

The 1958 awards for the films produced in 1957 were as follows:

1. President's Gold Medal for feature film—Do Ankenh Barah Hath (Hindi), Producer: Rajkamal Kalamandir, Bombay.
2. Second best feature film—Andhare Alo (Bengali), Producer: Sreemati Pictures, Calcutta.
3. President's Gold Medal for the best documentary—A Himalayan Tapestry (Burmah-Shell).
4. Second best documentary—Mandu (Films Division).
5. Prime Minister's Gold Medal for the best children's film—Ham Panchhi Ek Dai Ke (Hindi), Producer: A.V.M. (Madras).
6. Second best children's film—Janmatithi (Bengali), Producer: R.R. Films, Calcutta.

Indian feature films and documentaries continued to receive international recognition at many film festivals abroad. Some of the prize winning pictures were:

Pather Panchali (winner of President's Gold Medal for 1955) won 1st prize as the best picture at the International Film Exhibition at San Francisco—December 1957 and another prize at the Vancouver International Film Festival.

Jagle Raho won Great Grand Prix, the highest award at X Jubilee International Film Festival at Karlovy Vary in July 1957.

Kabuliwala (winner of President's Gold Medal, 1956) won Berlin Bear in Silver as the best background music at the VII International Film Festival in Berlin, July 1957.

In the field of documentaries, *Magic Touch* (Films Division's documentary on arts and crafts released in 1954-55) secured a diploma of honour at VII International Display of Cinematography at Milan Sample Fair.

At the International Congress of Occupational Health at Helsinki, *Wonder of Work* (Films Division's documentary on occupational therapy, 1955-56) won 1st prize.

Khadga Operations (Films Division's documentary on catching wild elephants, 1955-56) won Silver Cup at the III International Cine Festival in Rome. The same documentary won a Diploma and Bronze Medal at the Moscow Film Festival in July-August 1957.

Do Ankenh Barah Hath won the Samuel Goldwyn International Award in Los Angeles in 1959.

The 'Lair awards are given on the basis of a readers' poll. The awards for 1958 were as follows:

Best play: Rajkamal's *Jhanak Jhanak Payal Baaje*; Direction: V. Shantaram for *Jhanak Jhanak*; Actor: Dilip Kumar in *Devdas*; Actress: Nutan in *Sansar*; Supporting actor: Motilal in *Devdas*; Supporting actress: Vyjayantimala in *Devdas*; Music direction: Shankar and Jaikishan in *Chori Chori*; Story: Amiya Chakravarty in *Sansar*; Cinematography: Radhu Karmarkar in *Shree 420*; Sound Recording: A. K. Parmar in *Jhanak Jhanak*; Editing:

G. G. Mayekar in *Shree 420*; Art Direction: Kanu Gandhi in *Jhanak Jhanak*.

The Filmfare awards for 1957 were as follows:

Best Picture: "Mother India."

Best Director: Mehboob Khan ("Mother India").

Best Actor: Dilip Kumar ("Naya Daur").

Best Actress: Nargis ("Mother India").

Best Supporting Actor: Raj Mehra ("Sharada").

Best Supporting Actress: Shyama ("Sharada").

Best Music Director: O. P. Nayyar ("Naya Daur").

Best Story: Akhtar Mirza ("Naya Daur").

Best Cinematography: Faredoon A. Iran ("Mother India").

Best Editing: Shrivaji Awdhuti ("Sharada").

Best Art Direction: M. R. Achrekar ("Fardesi").

Best Sound Recording: Kaushik ("Mother India").

CENTRAL BOARD OF FILM CENSORS

The Central Board of Film Censors, examined during 1957-58, 840 Indian films, 292 feature films, 41 short films, that is, over 2,000 ft. and 516 below 2,000 ft. and 31 16 mm. films.

Films classified under U Certificate numbered 1,929 foreign and 873 Indian. Of those classified as adult 7 were Indian and 94 imported. The number of predominantly Indian films was 892.

Of the 67 films which were refused a certificate 11 were Indian.

Of the 893 films considered for recertifying, five were refused certificates.

The total footage cut was 76,615.

Most of the censoring of imported films is now concentrated in Bombay in order to have more uniformity.

New censorship rules were introduced as from April 1958 repealing the rules of 1951 (actually introduced in 1953).

The period of validity of a certificate is now 10 years as against five years under the old rules.

16 MM. FILMS

The use of the 16 mm. film for propaganda and publicity is realised by Governments, municipalities, and trade and industry.

The Union Government maintains for the Five Year Plan publicity 64 units (61 vans; 3 boats), which are equipped with 16 mm projectors.

These gave 8,917 film shows till the end of 1957.

The Community Development Projects and the National Extension Service Blocks seem to be using the films as a regular part of their work. Obviously there is a considerable number of projectors in use throughout the country.

Many industrial houses maintain a regular stock of films for non-commercial use.

About 120 full length Indian features, mainly in Hindi, Marathi and Gujarati, are also available in 16 mm.

There are in addition 16 mm. libraries of films suitable for non-theatrical audiences maintained by the British Information Services, the British Council and the U.S. Information Services through their regional offices.

In the Defence Forces, 16 mm. films have been extensively used for training and entertainment. There are Inspectors of Visual Education under Directors of Education in the States who do valuable service by using 16 mm. projectors.

The biggest single 16 mm. library of films in India is maintained by the Inspector of Visual Education in Bombay who makes the films available regularly to schools under him.

The Ministry of Education in Delhi has started building up a library of 16 mm. educational films.

Most of the diplomatic missions and embassies in the Capital maintain a film section and arrange shows of special films.

* The number for 1959 is given as 4,077 cinemas.

The U.K. and U.S.A. representatives maintain a special library of educational and informative films, dubbed with Indian language commentaries. These are available for exhibition free of charge.

Apart from such films there are some, meant for special audiences.

EXPORT, IMPORT

The Film Industry earns about Rs. two crores through export of films outside India. Excluding those in Pakistan, there are about 2,500 theatres available for the showing of Indian films in countries where Indians live in some concentration and where Indian films are welcomed by the residents of the region.

The main export market for Indian films at present is Pakistan; but Indian exporters are put to considerable difficulty.

Imports of exposed cinematograph films have been fairly heavy. Until 1936-37 imports remained below 10.8 million feet, touched the peak at 26 million feet in 1938-39 and dropped to 6.9 million feet in 1942-43 owing to wartime conditions. In the post-war period imports recovered to 16.2 million in 1945-46 and thereafter fluctuated between 15 million feet and 12 million feet.

Under the import control regulations, import of foreign films is subject to a monetary ceiling and distributors are authorised to remit up to 70 per cent. of the gross revenue.

CINEMATOGRAPH ACT

The regulations of films for exhibition and of the cinemas take place under the Indian Cinematograph Act. The power of certifying films was until the amendment of the Act in 1949 vested in the State Governments. Since production was concentrated in the three States of Bombay, Bengal and Madras and imports also mainly took place through the three ports in those States, the first examination of films for certification was done mainly by the Boards at these three cities. The Act as amended in 1949 made a distinction between films considered suitable for exhibition to adults only and those suitable for general exhibition.

A Bill was passed in 1953 to amend the Act with a view to removing certain defects noticed in the course of actual administration. Under the original Act responsibility for deciding whether a film is or is not suitable for public exhibition was entrusted to the Central Board of Film Censors; but powers are vested in the Central Government to declare that any film already certified as uncertified and notice has to be given to the person who has been granted certificate to show cause why the film should not be uncertified. This delay is sought to be avoided by the amendment. Provision is also made in the amended Act making it obligatory on persons delivering a certified film to a distributor or exhibitor to transmit information and documents relating to the certificate which would enable punishment of the exhibitor if he shows the film with portions cut out by the Board before certification. The difficulties encountered in proceedings against persons for interpolation and exhibition of unauthorised scenes in certified films are sought to be encountered. Enhancement of the penalty has also been suggested.

A Bill to amend the Act further was introduced in the Lok Sabha late in 1958.

It has been decided to set up a Production Code Bureau, a Film Finance Corporation and a Film Institute as recommended by the Film Enquiry Committee.

The Censorship Rules as amended in 1953 provide for a deposit of a 35 mm. or 16 mm. version of the certified film or its shooting script as a condition precedent to the issue of a certificate. Such a certificate is valid for ten years from the date of issue and old films once censored have to be recensored if the previous certificate has been in effect for five years or more.

PRODUCTION OF FEATURE FILMS

Year	1954	1955	1956	1957
Hindi ..	118	128	123	115
Bengali ..	48	52	54	54
Tamil ..	37	46	51	44
Telugu ..	27	24	27	36
Marathi ..	18	12	13	14
Kannada ..	10	15	14	14
Malayalam ..	8	7	5	7
Others ..	7	5	9	8
Total ..	273	287	296	292

INDIAN PRODUCERS

The total number of Indian feature films produced from 1931 to 1956 was 4,909. A language-wise break-up is as follows:

Hindi 2,712; Tamil 666; Bengali 656; Telugu 302; Marathi 285; Gujarati 92; Kannada 72; Malayalam 52; Punjabi 44; Assamese 13; English 12; Oriya 8; Persian 6; Arabic 2; Others 7.

The total number of Indian film producers from 1931 to 1956 was 2,244. Of these 1,580 were single picture producers. The language break-up is as follows:

Hindi 1,040 (708); Tamil 334 (228); Bengali 322 (230); Telugu 187 (139); Marathi 143 (99); Gujarati 60 (49); Kannada 50 (40); Malayalam 35 (27); Others 73 (60).

DOCUMENTARIES

Below we give figures to show the production and release of documentaries:

Year	Production		
	Films	Div	Others
1951-52 ..	32		4
1952-53 ..	32		7
1953-54 ..	35		8
1954-55 ..	33		6
1955-56 ..	55*		14
	(125 reels)		(20 reels)
1956-57 ..	48*		13
	(94 reels)		(32 reels)
			7
			(9 reels)†
1957-58 ..	50(102)		11(20)
	3(4)		6(7)†

* Most of these films have more than one reel per title.

† These were obtained from the State Governments for release through the Films Division circuit.

Note: Not all the documentaries produced are released in the same year. The number of releases therefore is not a total of the first two figures.

ADDITIONAL PRINTS

The additional prints given below were in addition to the regular requirements for commercial distribution.

Year	35 mm	16 mm
1954-55 ..	771	10,533
1955-56 ..	825	13,842
1956-57 ..	216	13,332

FILMS DIVISION

Year	'000 Rs.	
	Revenue	Expenditure
1950-51 ..	22.00	34.79
1951-52 ..	25.00	31.00
1952-53 ..	33.00*	37.77
1953-54 ..	34.00*	43.00
1954-55 ..	33.00*	47.40
1955-56 ..	37.00*	67.87
1956-57 ..	40.00*	81.02
1957-58 ..	—	103.72

* The figure includes other revenue by sale of prints and surplus material and rentals.

The figures down to 1956-57 are revised estimates, and the figure for 1957-58 is the budget estimate.

CINEMAS IN INDIA AND THE

"CIRCUITS" (1951)*

Circuit	Places	Permanent Cinemas

GLASS INDUSTRY

THE glass industry is regarded as a key industry by virtue of its versatility and the service it renders to the industrial growth of the country, meeting as it does the domestic and industrial needs and also adding grace and artistic touch to healthy life and living.

The more commonly used raw materials are: sand, borax, soda ash and salt cake, dolomite, lime or limestone, salt petre and sulphur, manganese dioxide and colouring materials. Though supplies of sand are in plenty, its quality is not uniform. Nearly all the glass factories of northern India and West Bengal obtain their requirements of sand from the Allahabad district. Subsequent to the Tariff Board's inquiry in 1932, little progress has been made in the installation of grading and washing equipment for sand. Borax is mostly obtained from abroad, while soda ash is received from indigenous manufacturers and importers. Sufficient quantities of lime or limestone are available. Coal is the commonest fuel. The bulk of refractories is obtained from indigenous sources. The demand for refractories by the glass industry is estimated at about 10,000 tons per year.

The industry comprises the manufacture of sheet glass, blown and pressedware and bangles. The industry has developed mainly under the private sector with reported capital investment of Rs. 12 crores.

Some 30 000 workers excluding those engaged in cottage industries are employed in the industry. Government protection to the sheet glass section was granted in 1950 and has been extended upto the end of 1960. The rate of protective duty was fixed at 45 per cent ad valorem in 1950, but was raised to 70 per cent in January 1955. This rate will continue to prevail till the end of December 1960.

The regional distribution in Nov. 1956 was:—

State *	No. of units.	Installed capacity.
		Tons
West Bengal	28	90,900
Uttar Pradesh	24	63,900
Madras	9	10,800
Bihar	8	39,600
Punjab	3	9,300
Delhi	3	4,400
Rajasthan	2	2,700
Total .	77	221,500

* Pre-reorganization.

The number of registered glass factories at present is 131 with an aggregate capacity of 249 000 tons per year; the capacity excludes an annual output of 35,000 tons, for the bangle industry which is mainly centred at Faridabad. The total capital invested in these 131 units is about Rs. 12 crores with a labour strength of 30,000 and an annual turn-over of nearly Rs. 16 to 18 crores. Of the total number of factories, only 44 units were actually working in 1958, 25 units were temporarily closed and another 22 units more or less permanently closed.

The manufacture of bangles was undertaken by about 100 units, mostly established on a cottage industry basis and localised in the Ferozabad district in Uttar Pradesh and Belgam district in Mysore. The rated capacity of these factories is placed at 35,000 tons.

Besides, penicillin vials, sheet glass of sizes less than 16 oz. and over 32 oz., glass tubing by automatic drawing, narrow-mouth thermos flasks and decorated aerated water bottles are some of the items newly manufactured in the country during the First Plan.

OUTPUT

Actual output of glass and glassware is shown by the following table:

	1954	1955	1956	1957
Bottles & Phials (tons)	47,840	55,272	62,418	70,236
Sheet Glass (million sq. ft.)	32.0	38.9	47.62	54.23
Laboratory Glass (tons)	1,610	2,496	3,357	3,116
Glass Shells for electric lamps (lakh pieces)	225	261	359	391
Table & Pressedware (tons)	22,060	25,456	28,219	31,749
Lampware	12,660	16,690	19,869	17,890
Thermos flasks (dozens)	28 000	43,644	48,336	53 368
Miscellaneous glassware	2,450	2,273	8,031	3,637

the annual demand for glass and glassware is likely to increase to about 200,000 tons by 1960-61. By that period, the installed capacity of the industry will be raised to 383,084 tons per annum. It is estimated that the capital requirements of the glass industry inclusive of replacements and modernisation will amount to about Rs. 3 crores during the Second Plan period. The industry in the organized sector is expected to employ over 30,000 persons in 1960-61 as against 18 500 persons in 1955-56.

If the production target of 200,000 tons is achieved.

It is expected that at the end of the Second Plan, exports and imports will balance each other at about Rs. 50 lakhs per annum. The Government have during the past few years been helping the industry in a number of ways; they have granted rebate of duty on heavy soda ash, provided technical help, set up a Central Glass and Ceramic Research Institute and the National Instruments Factory.

Imports and exports are as follows:

(Rupees in lakhs)

	1954-55	1955-56	Jan.-Dec. 1956	Jan.-Dec. 1957	Jan.-Aug. 1958
Imports	139.02	163.70	148.82	167.75	40.93
Exports	20.76	17.49	25.76	22.65	13.21

The following table summarises the programme of development during the period of the First Plan:—

	1950-51		1955-56	
	Annual rated capacity.	Actual production.	Annual rated capacity.	Actual production.
	Tons.	Tons.	Tons.	Tons.
Bangles	25,000	16,000	25,000	16,000
Sheet glass	11,700	8,850	52,200	26,000
Blownware and pressedware including glass shells	201,550	86,100	267,800	137,500
Safety glass (m. sq. ft.)	0.5	0.5
Optical glass	12	10
Total (excluding bangles and safety glass)	213,250	91,950	290,012	169,510

HIDES, SKINS AND LEATHER

THE Republic is regarded as a surplus area in respect of its resources of raw hides and skins. It is estimated that normally it produces 16.2 million cow hides, 5.5 million buffalo hides, 23.2 million goat and 15.1 million sheep skins a year. Only a portion of the cattle and buffalo hides is obtained from slaughtered animals and the bulk, about 75 to 80 per cent, is derived from animals that die a natural death.

The bulk of the production is carried on in small towns and villages.

The tanning industry comprises four sections, viz., 1. organised tanneries producing finished vegetable tanned buffalo leather and chrome tanned upper leather; 2. tanneries producing vegetable tanned leather known to the trade as B. I. tips and B. I. tanned skins; 3. small-scale chrome tanneries producing chrome tanned upper leather; and 4. village tanneries producing vegetable tanned cow and buffalo leather and vegetable tanned leather from goat and sheep skins.

The number of factories and annual rated capacity in August 1955 of each of these sections was as follows:—

	Number of factories	Capacity in million.
1.	24 (15 produce chrome)	3.89 (hides for vegetable tanning) 1.58 (hides for chrome tanning)
2.	500	16-17 (tanned hides)
3.	250	20-22 (tanned skins)
4.	..	3 (hides) 8 to 9 (raw hides) 8 to 4 (raw goat and sheep skins)

The few big tanneries are in Madras, Kanpur, Calcutta and Bombay.

Only about 75 tanneries employ more than 50 workers each.

PRODUCTION

The following is the trend of production:—

Year.	Chrome and tanned hides.	Vegetable tanned buffalo and cow hides (in terms of cow hides).	Leather cloth (000 yards).
	(thousands)	(thousands)	
1952	879.6	1,478.4	954.0
1953	650.4	1,298.4	985.2
1954	700.8	1,370.4	1,263.4
1955	668.4	1,685.6	2,623.2
1956	741.6	1,858.1	2,640.0
1957	630.5	1,791.8	3,500.0

According to the information supplied by the manufacturers registered under the Industries (Development and Regulation) Act, the total capital invested in the large-scale units manufacturing leather and leather goods in 1956 was about Rs. 9.37 crores and the number of persons employed was about 9,400. The number of persons employed in the small-scale leather and leather manufacturing industry, as per the National Income Committee's Report (1954), was 763,000 in 1950-51.

When the position of the industry was reviewed in May 1956, it was observed that more than 50 per cent of the installed capacity of the

organised tanneries was lying unutilised. In order to assist the industry to raise its production, the Government banned totally the export of raw hides and skins in short supply, allowed the import of raw hides and skins under O.G.L. from soft currency areas; imposed severe restrictions on import of leather and leather goods; and decontrolled completely the export of leather and leather goods.

To meet the internal requirements, a large quantity of raw hides and skins are imported, mostly overland from Pakistan. In addition a small quantity of tanned hides and skins and of unwrought leather is also being imported.

The following table gives the position:

(In lakhs of Rs.)

Year	Raw hides	Raw skins	Hides, skins, tanned or dressed	Unwrought leather
Imports:				
1953-54	56.5	54.7	..	8.8
1954-55	25.9	17.3	0.7	6.8
1955-56	66.5	23.8	..	6.7
April-Dec. 1956	78.32	30.15	1.84	6.62
1957	69.76	37.25	9.37	N.A.
Jan.-Aug. 1958	87.30	23.67	4.40	N.A.
Exports:				
1953-54	6,06.7	24,97.2	22.4
1954-55	7,13.0	20,54.3	18.0
1955-56	6,52.7	22,52.3	20.6
April-Dec. 1956	4,16.0	15,87.80	11.45
1957	6,61.71	21,56.98	N.A.
Jan.-Aug. 1958	4,65.72	12,10.08	N.A.

The main problems about raw material relate to the supply of hides and skins and wattle bark. Supplies of hides have to be arranged from Pakistan. As for wattle bark, the Government of Madras has taken steps for bringing 21,000 acres under wattle plantation.

Nursery and small-scale field tests are being carried out in Assam, Bombay, Orissa, Punjab, Uttar Pradesh and West Bengal for locating suitable areas for the planting of wattle trees. The indigenous available Karada bark is stated to be a potential substitute for wattle bark.

It is estimated that the demand in 1960-61 may come to 23 million tanned hides and 26 million tanned skins. The quantities of the

principal raw materials required for this target are: Raw hides 23.5 million pieces; raw skins 26.5 million pieces; lime 22,000 to 23,000 tons; wattle bark and extract, 33,000 tons; other barks 330,000 tons; myrobalsams 22,000 to 23,000 tons.

A number of schemes have been launched by the Centre and States for the development of the tanning and leather industries during the Second Five-Year Plan. Some of these provide for setting up of production-cum-training centres, re-tanning and finishing centres, organisation of co-operative societies of tanners and leather workers and setting up of common facility centres.

FOOTWEAR INDUSTRY

The larger units manufacturing leather and leather goods employ about 9,950 persons and the total investment is about Rs. 10 crores. The small-scale industry employs about 7,63,000 persons.

The principal use of leather is for the production of footwear. In 1951, there were nine large-scale footwear factories with an annual rated capacity of 4.724 million pairs of Western type footwear.

The following table gives the regional distribution of the capacity for Western type footwear early in 1956:

State	Unit No.	Annual Capacity (Pairs)
Uttar Pradesh ..	7	2,277,000
West Bengal ..	1	3,442,000
Bihar ..	1	174,200
Madras* ..	1	75,000
PEPSU* ..	1	4,800
Mysore* ..	1	1,200
Total ..	12	5,674,800

* Pre-reorganization.

The principal towns concerned are Agra, Kanpur, Bombay and Calcutta.

During 1957, there were 12 units engaged in the manufacture of western type of leather footwear with a total capacity of 5.975 million pairs and 12 units engaged in the manufacture of Indian type.

The output of the large-scale factories since 1952 is given below:—

	Western type (million pairs).	Indian type (million pairs).
1952 ..	3.267	1.806
1953 ..	3.248	2.274
1954 ..	3.288	2.063
1955 ..	3.243	2.303
1956 ..	3.620	2.911
1957 ..	4.370	3.038

Reliable production figures for the small-scale and cottage units, which are responsible for manufacturing more than 90 per cent of the total output, are not available. The present output is estimated at 12 to 13 million pairs of Western type footwear and 65 to 70 million pairs of Indian type footwear.

Imports of leather footwear during the First Plan period were very small while exports were much higher. The following table gives the trend in exports and imports from 1953-54:

Year	Imports (in pairs)	Exports (in pairs)
1953-54	465	1,218,600
1954-55	1,490	1,569,819
1955-56	1,816	1,877,754
April-Dec. 1956	14,173	1,437,235
1957	14,540	2,550,367
Jan.-Aug. 1958	612	1,247,073

An excise duty of 10 per cent ad valorem has been imposed on footwear since March 1, 1954. Only power-operated factories employing 50 or more workers and using more than two H.P. come under this levy.

It is estimated that the total requirements of leather footwear in 1960-61 would be 100 million pairs for domestic consumption and 2 million pairs for export purposes. This would be an increase of 12.6 million pairs over the 1957 level. This additional demand is proposed to be met by a fuller utilisation of the existing capacity in the organised sector and by developments in the cottage and small-scale sector and no expansion of capacity is envisaged during the Second Plan period in the large-scale sector of the industry.

For achieving the target of 100 million pairs in 1960-61, the following quantities of raw materials will be required: 12.25 million tanned hides and 4.75 million tanned skins; 5.4 million reels of thread for uppers and 340 tons for others; and 285 million pieces of eyelets.

(See also under 'Cottage Industries')

JUTE INDUSTRY

THE following table gives the details of the production trends of raw jute in the Indian Union:—

Year	Lakh acres	000 bales
Average		
1946-47	5.3	1,320
1947-48	6.3	1,695
1948-49	8.3	2,055
1949-50	11.6	3,089
1950-51	14.5	3,501
1951-52	19.5	4,678
1952-53	18.2	4,605
1953-54	11.96	3,129
1954-55	12.43	2,928
1955-56	17.39	4,197
1956-57	19.08	4,248
1957-58	17.54	4,088

The all-India yield per acre was 932 lbs. in 1957-58 against 899 in 1956-57.

Supply and distribution of jute 1956-57 and 1957-58:

	1957-58 (lakh bales)	1956-57 (lakh bales)

(I.J.M.A. Statistics, Monthly Summary).

The following table gives the trend of I.J.M.A. mill consumption of raw jute:—

Year ended June	Lakh bales
1950-51	52.52
1951-52	56.85
1952-53	52.53
1953-54	50.24
1954-55	58.68
1955-56	64.28
1956-57	60.72
1957-58	62.23
July 1958	5.08

JUTE MILLS

At the end of 1958 there were 112 jute mills in India with a total loomage of 72,365. This

is about 53 per cent of the total loomage capacity of the world.

Of the 112 mills, 101 were in W. Bengal, four in Andhra, three in Bihar, three in U.P. and one in M.P. The mills in W. Bengal are concentrated in Calcutta. The number of companies managing the 112 mills was 82.

The total capacity is about 1,000,000 tons of jute goods a year. The total value of the goods produced in a year is about Rs. 130 crores.

107 mills had a fixed capital of Rs. 36.85 crores and a working capital of Rs. 34.63 crores in 1955. In the same year, 255,000 workers found employment in the industry.

(Source: Census of Manufacturing Industries—1955, issued by the Director of Industrial Statistics, Government of India, Calcutta.)

The progress of the industry during the past few years is summed up in the following table:—
(in thousand tons)

Year (July-June)	Production*				Exports from India	Stocks*
	Hessian	Sacking	Others	Total		
1950-51	330	493	35	858	716	90
1951-52	309	607	29	945	795	99
1952-53	248	511	33	892	678	134
1953-54	390	445	31	866	811	87
1954-55	399	558	38	995	862	88
1955-56	403	623	69	1,095	860	127
1956-57	428	627	70	1,025	864	116
1957-58	392	597	68	1,056	821	134

* Represents I.J.M.A. mills and Gagalbhai.

Foreign exchange earned during 1957 was Rs. 114.20 crores.

INDEX NUMBER OF PRICES

(Base July 1914 = 100)

Period	Raw Jute	Manufactured Jute
1953	227	307
1954	248	331
1955	283	328
1956	293	313
1957		
January	344	335
February	323	311
March	336	308
April	336	315
May	369	328
June	352	327
July	356	324
August	336	329
September	340	329
October	352	328
November	376	314
December	372	300

The main problems facing the industry, observes the Planning Commission, are shortage of raw material, modernisation of equipment and possible competition in the foreign markets from substitutes and other products. Lack of finance is a major factor deterring the industry from undertaking modernisation. The task, therefore, is to utilise the existing capacity more fully by procuring greater supplies of raw jute. On this basis, it is expected that the output of the mills could be stepped up from 1,150,000 tons in 1955-56 to 1,200,000 tons in 1960-61 and exports from 875,000 tons to 900,000 tons.

There has been no Government control on production or distribution of jute goods. The only control in vogue is that exercised by the Indian Jute Mills' Association, in the light of their Working Time Agreement, the main object of which is to ensure that production and supply are aligned to world demand.

Mills have lately been paying greater attention to the need for diversification of their products. Some of the specialties which are manufactured now are cotton bagging (a loose fabric meant for packing of cotton in U.S.A.), wide hessian used as carpet backing in U.S.A., jute tarpaulins, paper-lined hessian, jute carpets and jute webbing.

The figures of exports in the financial years 1954-55 to 1956-57 are as follows:—

	1954-55	1955-56	1956-57
Twist and Yarn (lb.)	6,684,919	5,082,518	6,109,784
Manufactures			
Bagging for Raw Cotton (cwt.)	495,288	631,853	734,432
Canvas	14,408	11,078	9,456
Carpets	14,896	8,294	11,824

Sacking Gunny Cloth	12,863	13,383	12,254
Hessian Gunny Cloth	346,971	349,101	382,964
Total of Jute Manufactures including twist and yarn (tons)	850,869	863,961	896,515

LAC INDUSTRY

LAO is a resin which finds extensive application in industries. It is a resinous protective secretion of an insect which lives by sucking the sap of certain trees and shrubs called lac hosts.

There are four crops of sticklac, named after the Hindu months in which the collection of each crop commences. These are 'Baisakhi' and 'Kalki' from one strain of the insect (Rangemi) and 'Jethwi' and 'Aghani' from another strain (Kusumi). The first processed product, after the crushing and washing of sticklac is known as 'seedlac'. From this shellac is manufactured either by melting it (seedlac) manually in cloth bags held near a fire place called 'bhattas' or by the mechanised process of extraction with suitable solvents.

India is the chief source of supply of sticklac and till 1950 accounted for nearly 85 per cent of the world production. But since then production in Thailand has rapidly increased and now accounts for about 80 per cent of the world production. The average production of sticklac in different States based on the annual production during the years 1946-57 is as follows:—

State	Average Crop (in maunds)
Bihar	4,69,000
Madhya Pradesh	3,01,000
West Bengal	2,33,500
Bombay	66,500
Uttar Pradesh	13,500
Orissa	16,000
Assam	16,000
Other States	18,500
Total	11,34,000

The actual production in 1956-57 was 13,15,000 maunds.

The acreage covered by lac was 10.02 million acres in 1957-58.

The average annual production of shellac including button lac is 16,500 tons.

There are no regulated markets for trading in sticklac. The manufacture of shellac is a cottage industry and the number of shellac factories varies from season to season. According to the latest information there are about 366 factories in the country; only two of these which are located in Calcutta are fully mechanised.

Yield from sticklac varies from year to year and locality to locality.

Roughly the yield of seedlac and shellac is 65 per cent and 55 per cent of sticklac.

The cost of manufacturing one maund of shellac from seedlac is about Rs. 16 and of converting sticklac into seedlac is Rs. 3. In 1939 these were roughly Rs. 3-8 and as. 8 respectively.

PRICE TRENDS

Prices of shellac and seedlac have been subject to wide fluctuations.

During the Second World War—July 1942 to April 1946—the prices were controlled on T. N. basis at Rs. 64 and later at Rs. 71.

After decontrol, the prices started rising, but in March 1950 they fell to Rs. 95 on T. N. basis as compared with an average price of Rs. 130 in December 1949.

Following the outbreak of the Korean war, the price touched Rs. 190 in January 1951 but declined by the end of March 1952 to Rs. 92 per maund.

During 1952-53 the market was subdued with pure T. N. Shellac fluctuating between Rs. 84 and Rs. 66. There has been a firm trend since

1953 April and in November the rate was around Rs. 107 per maund.

In 1954 the prices went down to about Rs. 90 per maund in March but started rising and reached Rs. 178 in January 1955. But due to a very good crop it started falling and reached Rs. 136 by September 1955. It rose to about Rs. 163 in November 1955 but started falling due to a very good crop in Thailand and reached Rs. 111 by April 1956. Between May and September 1956 the prices rose to about Rs. 130 per maund but again due to a very good Katki crop in the country and a good crop in Thailand and the prospect of a good Baisakhi crop the prices came down to Rs. 95 per maund on T. N. basis by the end of January 1957.

In the absence of demand owing to a wait and watch policy adopted by foreign buyers the prices further declined to Rs. 85 per maund on T. N. basis by the end of March 1957. The year 1957-58 was also dull and prices of T. N. Shellac ranged between Rs. 70 and Rs. 90 per maund. The low prices were due to the following factors:—
(i) Heavy carry over of previous year's stocks; (ii) Increase in the U.K. Bank rate; (iii) Recessional tendencies in the U.S. economy.

EXPORTS

About 90 per cent of the total quantity of processed goods is exported.

The U.S. is the best customer, followed by the U.K. and Germany. Since 1953 the U.S.S.R. and China have also been buying sizable quantities.

The quantum of exports to the foreign countries was maintained in spite of dull trading conditions; but there was an appreciable drop in foreign exchange earnings to the tune of Rs. 3 crores due to fall in prices during 1957-58.

The table below gives exports of lac to the important countries during 1956-57 and 1957-58.

(The figures are in maunds)

	1957-58	1956-57
SHELLAC AND BUTTON LAC		
U.K.	94,663	1,30,346
U.S.A.	71,666	80,057
China	34,157	120
U.S.S.R.	23,811	61,891
Other countries	1,89,623	2,49,146
Total quantity	4,13,920	5,11,560
Total value in rupees.	4,30,09,285	6,88,41,681
SEED LAC		
U.S.A.	2,29,982	1,40,813
W. Germany	27,628	19,115
U.K.	13,149	15,981
Other countries	20,044	15,563
Total quantity	2,90,803	1,91,472
Total value in rupees.	2,42,00,673	2,14,47,325
OTHER KINDS		
Quantity	35,734	66,115
Value in rupees	14,40,942	44,17,575
Total of all kinds: Quantity	7,40,457	7,69,147
Value in rupees.	6,86,50,900	9,47,06,581

Lac has made significant contributions to the development of art and industry.

Shellac is consumed chiefly by five industries.

The gramophone industry consumes about 11 to 13 thousand tons.

The varnishes and paint industry absorbs something like 4 to 6 thousand tons.

The total demand from the electrical industry is estimated at 3,000 tons as against 6,000 tons in pre-war years.

Nearly 3,000 tons are used in the hat industry as a stiffening material.

The manufacture of sealing wax requires about 1,500 tons.

For the promotion of the improvement of methods of cultivation and manufacture of lac in India the Indian Lac Association for Research was formed by traders in Calcutta in 1921 and the Government found the funds by levying a cess on all exports of lac other than refuse lac at annas four per maund and for refuse lac annas two per maund. This association set up the Indian Lac Research Institute at Namkum (Ranchi).

At the suggestion of the Royal Commission of Agriculture in 1927 this association was succeeded by the Indian Lac Cess Committee which was established under the Lac Cess Act of 1930 formed "for the improvement and development of the cultivation, manufacture and marketing of Indian lac". By this Act the cess was raised to annas seven and annas five respectively. With effect from April 1948 this cess was doubled. In order to associate the members of Parliament with the Committee and also to provide adequate representation to all the lac growing States the Indian Lac Cess Act has recently been amended.

On 19th September 1956, the Committee celebrated its Silver Jubilee and to mark the occasion brought out a Souvenir publication containing an exhaustive survey of research and statistics on lac and a detailed directory of lac trade. This publication is available from the Secretary, Indian Lac Cess Committee, Circular Road, Ranchi.

The Indian Lac Cess Committee works under the control of the Ministry of Agriculture, Government of India.

An Export Promotion Council for shellac has also been formed under the Central Ministry of Commerce and Industry to promote exports of shellac.

At the suggestion of the Bihar Shellac Enquiry Committee and the Indian Lac Cess Committee the Government of India banned futures trading in shellac and seedlac.

Under the Second Five-Year Plan it is proposed to spend Rs. 60 lakhs for the development of the industry. The more important of the schemes are (i) 50 broodlac farms to increase the production of lac to 16 lakh maunds; (ii) Seven regional testing laboratories for testing shellac and (iii) A number of storage godowns including an air-conditioned godown at Calcutta in order to provide better marketing and credit facilities.

MISCELLANEOUS INDUSTRIES

Agricultural Implements: There are 42 factories manufacturing the implements, with a productive capacity of 20,020 tons in terms of steel. The Tata (Agrico) Jamshedpur is the largest unit with an annual capacity of 12,000 tons. They also include two units in the public sector, viz., the Nahar Foundry and the Mysore Implements Factory. Actual production by the organised sector was 16,815 tons in 1956 and 18,000 tons in 1957. In addition there were 350 small units registered with State Governments.

The exports of agricultural implements rose from Rs. 8 lakhs in 1956 to Rs. 11.2 lakhs in 1957.

Agricultural Machinery: In 1950 there were eight organised units manufacturing power-driven pumps with a capacity of 33,460 pumps per annum. At the end of 1957, the number was 34 with an annual installed capacity of 82,000 pumps.

The actual production was 34,000 in 1950-51; 46,000 in 1951-52; 25,000 in 1952-53; 28,000 in 1953-54; 29,500 in 1954-55; and 36,000 in 1955-56.

During the calendar year 1956, 46,881 pumps were manufactured, as against 34,441 in the preceding year. The total value of agricultural machinery produced in 1957 was Rs. 52.90 lakhs.

Imports of centrifugal pumps including turbine pumps were worth in 1950-51 Rs. 57 lakhs; 1951-52 Rs. 95.6 lakhs; 1952-53 Rs. 80.6 lakhs; 1953-54 Rs. 66.4 lakhs; 1954-55 Rs. 59.3 lakhs; 1955-56 Rs. 51.6 lakhs; April-Dec. 1956: Rs. 69.16 lakhs. Calendar year 1957: 123.68 lakhs; Jan.-Aug. 1958: 67.66 lakhs.

Total demand in 1955-56 was about 40,000 pumps, and it is expected to rise from 85,000 to 86,000 pumps by 1960-61. To meet this increased demand, some schemes have been recommended under the Second Five-Year Plan. With their implementation, the capacity will increase to 74,700 pumps per annum.

Diesel Engines: At the beginning of the First Plan there were five units engaged in the manufacture of diesel engines with a combined annual rated capacity of 6,320 engines. By the end of the Plan, the number increased to 16 with a capacity of 19,759 engines per annum. This number rose to 17 at the end of 1956 with a total annual installed capacity of 22,169 engines. Actual production during 1956 aggregated 12,015 engines. In addition, three more firms with a capacity of 10,000 engines for the manufacture of road vehicular type of diesel engines were established to meet the automobile requirements.

The position of the diesel engine manufacturing industry in 1957 was as follows:

	No. of capacity units	Actual production
Diesel engines (Stationary)	17	22,169
Diesel engines (Vehicular type)	2	6,000
		3,333

The total demand by 1960-61 is estimated at between 20,000 and 21,000 engines upto 50 H.P. Capacity and production targets envisaged in the Second Five-Year Plan are 220,000 H.P. and 205,000 H.P. respectively.

The value of diesel engine exports rose from Rs. 4.29 lakhs in 1956 to over Rs. 10 lakhs in 1957. Indian diesel engines were exported to 25 different countries, the principal buyers being Bahrain, Oman, Cyprus and Thailand.

The production of diesel engines to drive agricultural pumps rose to 27,165 in 1958, substantially higher than the target of 20,500 engines per year scheduled to be achieved by the end of the Second Plan. The value of the production in 1958 was about Rs. 5.43 crores.

The industry has now grown to a level where there are 17 units manufacturing diesel engines in different parts of the country with a capacity of over 22,000 engines per year.

There are now units manufacturing ancillary items. Their total output in 1958 stood at Rs. 4.8 crores.

Agricultural Tractors: At the beginning of the Second Plan, there was no regular tractor manufacturing plant. The requirements are met by imports. The imports were: 1950-51, 4,980; 1951-52, 7,148; 1952-53, 1,227; 1953-54, 3,195; 1954-55, 2,939. Calendar year 1957: 4,792 and Jan.-Aug. 1958: 2,867.

It is estimated that more than 20,000 tractors are in use at present in the country as against 10,000 in 1949-50. And the total requirements for all types of tractors by 1960-61 have been estimated by the Committee on Tractors and Tractor drawn Agricultural Implements at 5,000 per annum.

The position in respect of actual production during 1956 and 1957 is shown below:

Article	No.	1956		1957	
		Value Rs.	No.	Value Rs.	No.
Complete tools	3,016	1,08,18,455	4,029	2,35,61,894	
Accessories	15,418	12,04,224	18,346	18,83,042	

As a part of the overall programme an expansion of the Hindustan Machine Tools is envisaged during the Second Plan. The production of lathes at the Jabalpur Works of this concern is expected to be worth Rs. 1.5 crores in 1960-61. The production in the private sector is currently worth about Rs. 75 lakhs per annum. A provisional target of Rs. 3 crores worth of machine tools is proposed for 1960-61 for the public and private sectors pending submission of the report of the Expert Committee.

The capacity of the machine tool industry in terms of value was Rs. 3.9 crores in 1957 as against Rs. 1.42 crores in 1955.

It is estimated that there are now 80,000 machine tools in operation and, by 1960-61, it was estimated, 170,000 would be required.

Cotton Textile Machinery: The principal items are carding engines, spinning ring frames and looms. The target capacity and production in the First Plan for carding engines was 600 and in the Second Plan 1,692. The total installed capacity in August 1956 was 3,000 per annum. Actual production was 1951: 158; 1952: 108; 1953: 192; 1954: 436; 1955: 600; 1956: 732; 1957: 1,020; Jan.-Aug. 1958: 815.

The total value of the textile machinery produced in 1957-58 was Rs. 9 crores. It is expected that by 1961 self-sufficiency would be achieved in most items.

It is estimated that the annual demand under the Second Plan is 1,400 for new units and 600 for replacement, totalling 2,000 units. To meet this demand, the Government has approved the proposal of the private sector for 600 carding engines by the National Machinery Manufacturers and 800 by Texmaco for implementation.

At present the annual demand is estimated at 2,810 ring frames, 7.8 lakh spindles, 23.4 lakh spinning rings, 312,300 suited rollers and 14,625 looms.

About spinning ring frames, there were 2 units with a rated capacity of 396 pieces per annum. Two more units started production early in 1955 bringing the total capacity to 886 ring

A contract between the Government of India and Messrs. Komatsu Manufacturing Co., Japan, has been concluded, under which Ordnance factories will produce tractors, earth-moving equipments, etc. The actual production is expected to start during 1959-62.

In 1957, there were two units engaged in the production of tractors. The aggregate capacity was 8,000, while actual output was 2,269.

A scheme for the manufacture of bulldozers and scraper attachment was licensed at the end of 1958. The factory would be located in Bombay.

License was also expected to be given for the manufacture of spare parts of the caterpillar units. This would be set up in Calcutta.

Machine Tools: At present, there are 18 units, two owned by the Government and 16 by private enterprise, manufacturing graded machine tools. The capital investment (private) is about Rs. 90 lakhs and the total number of persons employed exceeds 2,000.

frames against the Plan target of 800. Actual production was 1951: 201; 1952: 255; 1953: 197; 1954: 314; 1955: 868; 1956: 1,116; 1957: 1,368; Jan.-Aug. 1958: 648. The production target set in the Second Plan is 1,896. The total capacity in August 1958 was 2,784.

About looms, there were three units with a capacity for producing 4,320 looms per annum; the target capacity in the First Plan was 4,980. The actual production was 1951: 2,166; 1952: 1,527; 1953: 1,340; 1954: 1,970; 1955: 2,346; 1956: 2,468. The target production set in the Second Plan is 6,000 looms. The number of looms actually manufactured was 2,868 in 1957 and 1,757 in the first eight months of 1958. The installed capacity in August 1958 was 4,980.

The number of drawing frames rose from 24 during the first eleven months of 1956 to 30 during the same period in 1957; automatic looms from 161 to 222 and reeling machines from 1,158 to 1,941.

The production of spindles rose from 5.72 lakhs in 1954 to 10.5 lakhs in 1956, of suited rollers from 2.28 lakhs to 3.84 lakhs.

Protection to the industry has been extended upto the end of 1960 at the protective duty of 10 per cent for complete ring frames, spindles, spinning rings, suited rollers and automatic looms. Protection for plain looms has been discontinued with effect from 1st January 1958.

The value of textile machinery exported rose to Rs. 2.2 lakhs in 1957 from Rs. 1.5 lakhs in 1956.

Ball Bearings: There is one unit with an annual rated capacity of 600,000 ball bearings on a single shift basis. The total demand by 1960-61 is estimated at 2.4 million bearings which the existing firm would be able to meet with its expanded capacity and by working on a multiple shift system. The production of 31 different sizes of roller bearings was undertaken for the first time.

The number of ball bearings actually produced during the calendar year 1957 was higher at 1,666,046, the figure for 1956 being 1,040,106.

Protection has been extended upto the end of 1960.

Bicycles: At the end of 1957, there were 20 units manufacturing complete bicycles. The aggregate annual capacity was 725,000. The actual production in the calendar year 1957 was higher at about 791,000; in 1956 it was estimated at about 664,000 and in 1955 at 491,000. Of these big units, Uttar Pradesh and Punjab have six each, West Bengal three, Delhi two and Madras, Bombay and Bihar have one each.

Number of persons employed in 1957 was about 8,000.

The output for 1958 is estimated at 10 lakhs.

But the internal demand has shown a steady rise. From 4.03 lakh cycles in 1951-52 it moved up to about 6.8 lakhs in 1956-57. It is expected that the output will go up to 11 lakhs at the end of the Second Plan. Besides, an export of 1.5 lakh cycles is also envisaged.

This is to be achieved through the organised sector as well as the decentralised sector of the industry. In view of the considerable employment potentialities of the small-scale sector, it is considered that it will be enabled to produce 2.5 lakh cycles per annum by 1960-61. The balance of 10 lakhs is expected to be produced by the organised sector which includes 20 units.

The production of bicycles in the small sector, which started only towards the end of March 1956, was about 109,000 bicycles in 1957 as against about 23,000 in 1956.

There are 78 units in the small sector; of these 22 are in the Punjab, 14 in Delhi, 10 in West Bengal, nine in Uttar Pradesh, eight in Bombay, four in Madhya Pradesh and two in Madras. Five units in Rajasthan, two in Mysore and one each in Andhra Pradesh and Orissa are to go into production soon.

A Development Council was constituted for this industry in December 1953.

The output of bicycle tyres in India in 1957 was slightly over 7.15 million, against 3.94 million tyres manufactured in 1951.

During the same period, the number of bicycle tubes made in India went up from about 4.9 million to slightly over seven million.

The target for the production of bicycle tyres and tubes under the Second Plan is twenty million tyres and tubes each per year.

The current domestic demand for bicycle tyres and tubes is estimated at nine million each per year. This is expected to rise to 16 million tyres and tubes each by the end of the Second Plan, keeping pace with the steady increase in the number of bicycles on Indian roads.

The industry can practically meet all internal requirements.

Indian capital invested in the bicycle industry in India was Rs. 3.39 crores while the amount of foreign investment in the industry was about Rs. 39.81 lakhs. (September 1956)

A Standing Liaison Committee has been formed by the Development Council for the bicycle industry to assist the Export Promotion Council.

Provision has been made to enable manufacturers of bicycles to obtain a 133 per cent replacement quota of iron and steel used in producing the bicycles exported.

Protection has been extended upto the end of 1960.

Sewing Machines: At the end of the First Plan there were three organised units engaged in the manufacture of complete domestic sewing machines with a total capacity of 48,500 machines per annum. This has since gone up to seven units with a total annual capacity of 81,200 machines. Actual production in 1957 was 167,478 as against 130,238 in 1956. It is estimated that the present demand for the domestic and industrial types of machines of 120,000 to 160,000

machines per year may go up to 300,000 by 1960-61. This can be met by the production from the small-scale sector as well as from the organised sector with its expanded capacity. Of these about 30,000 machines are earmarked for export. Production—32,965 in 1950-51; 48,116 in 1951-52; 52,206 in 1952-53; 68,417 in 1953-54; 80,776 in 1954-55; 110,000 (estimate) in 1955-56; 130,388 in 1956, 167,478 in 1957 and 65,000 in the first four months of 1958.

There are 35 manufacturers of sewing machines in the small-scale sector besides seven firms in the large-scale sector. Of the 35 small units, 14 are in the Punjab, nine in Delhi, four in Rajasthan, three in Uttar Pradesh, two in Jammu and Kashmir and one each in Bombay, Madhya Pradesh and Andhra Pradesh. Of the seven big manufacturing firms, West Bengal and Punjab have three each and the seventh is in Delhi.

Special steps are being taken by Government to increase the output, particularly in the small-scale sector.

Exports of Indian sewing machines fetched foreign exchange worth Rs. 3.78 lakhs in the first six months of 1958 as against Rs. 5.51 lakhs for the whole of 1957.

The number of sewing machines exported in the first half of 1958 was 3,456 as against 4,465 during 1957. The value of the sewing machines exported in 1957 was Rs. 5.6 lakhs as against Rs. 4.66 lakhs in 1956.

During the first half of 1958, the United Kingdom was the largest importer of Indian sewing machines.

The United Kingdom imported 1,000 machines, Afghanistan 682, Thailand 540, Ceylon 329, the Federation of Malaya 200 and Singapore 170. The U.S.A. and British Guiana imported 100 machines each. The other countries to which Indian sewing machines were exported include Kenya, Jordan, Madagascar, Tanganyika, the Sudan, Pakistan, Uganda, Iraq, Sierra Leone, Rhodesia, Saudi Arabia, Zanzibar, Mauritius, Burma, Nepal and Vietnam.

The protection granted to the industry has been withdrawn since January 1, 1955.

Lanterns: There are 10 units with a capacity of 3,792,800 lanterns a year. The Second Plan target is 6 million.

During the calendar year 1956, 5,179,719 lanterns and in 1957, 4,344,700 lanterns were produced. The reason for the fall in production is due to curtailment of tin plate quota.

Actual export was 1950: 15,036; 1951: 14,136; 1952: 108,264; 1953: 449,734; 1954-55: 349,076 valued at Rs. 8.83 lakhs; 1955-56: 204,670 valued at Rs. 5.15 lakhs; April-Dec. 1956: valued at Rs. 88,726.

Protection has been withdrawn since January 1, 1955.

Grinding Wheels: There are four units with a rated capacity of 1,870 tons. It is expected that with the completion of the expansion schemes, this rated capacity will increase to 2,110 units which is considered to be adequate to meet the demand by 1960-61. Production—1950-51: 231 tons; 1951-52: 352 tons; 1952-53: 390 tons; 1953-54: 395 tons; 1954-55: 525 tons; calendar year 1956: 681 tons; 1956: 1,112; 1957: 1,452; Imports: 1950-51: 209 tons; 1951-52: 202 tons; 1952-53: 93 tons; 1953-54: 112 tons; 1954-55: 168 tons; 1955-56: 60 tons.

During the calendar year 1957, 1,750 dozen valued at Rs. 1.19 lakhs and during the period Jan.-Aug. 1958, 887 dozen valued at Rs. 0.43 lakhs were imported.

Protection has been extended upto the end of 1960.

Electric Goods: The value of electrical consumer goods produced in 1957 (lamps, fans, radio sets, batteries) was estimated at Rs. 25 crores. The Second Plan target is Rs. 40 crores.

Dry Batteries: There are five units with a capacity for producing 224.5 million dry cells a year. The Second Plan target is 225 million.

About 224.5 million cells were produced in 1957 as against 181.48 million cells in 1956, both being calendar years. The exports were 1950: 85,193 valued at Rs. 0.2 lakhs; 1951: 1,445,673 valued at Rs. 2.58 lakhs; 1952: 1,114,966 valued at Rs. 2.92 lakhs; in 1957 Rs. 9.67 lakhs.

Attempts are being made to manufacture the raw material in this country—manganese dioxide, sealing compound, carbon electrodes.

There has been no protection since January 1954.

Storage Batteries: There are 13 units with an annual rated capacity of 316,500. The anticipated demand in 1960-61 is 420,000. Production—1951-52: 212,836; 1952-53: 136,000; 1953-54: 179,000; 1954-55: 210,100; 1955-56: 258,086; Calendar year 1956: 314,199; 1957: 324,578.

There is progress in the diversification of products and a greater degree of self-sufficiency about raw materials. Among the different products are aircraft batteries and railway requirements. Schemes for the manufacture of dry-charged batteries, iron-clad batteries, heavy duty and traction batteries have been approved. Raw material manufacture includes refined lead and microporous rubber separators.

Protection to the industry has been withdrawn since January 1, 1956.

Electric Cables and Wires: Actual production of 1. bare copper conductors, 2. winding wires, 3. rubber insulated cables and flexibles, 4. A.C.S.R. cables is as follows:

	in tons (1)	in tons (2)	in mil. yd. (3)	in tons (4)
1955	8,434	605	86.1	8,045
1956	10,255	761	105.6	11,285
1957	8,554	1,016	103.5	15,338

The major schemes of the First Plan are the Hindustan Cable Factory in the public sector for producing different kinds of cables, (this started regular production on Sept. 1, 1954), the expansion of the Indian Cable Company at an estimated cost of Rs. 2.8 crores, the expansion of capacity for A.C.S.R. cables from 2,500 tons to 5,000 tons per annum, the creation of producing facilities for 500 tons of insulated aluminium conductors per annum.

Electric Fans: There are 10 units with an installed capacity of 401,700 fans per year. The Second Plan target capacity is 600,000 fans per year in 1960-61. There are plans for expansion which will result in a production capacity of 668,800 fans per year.

Actual production was 1950: 194,100; 1953: 199,468; 1954: 238,850; 1955: 222,236; 1956: 338,932; 1957: 524,664.

Exports of electric fans are expected to reach about 40,000 per year by 1960-61. Exports were: 1952-53: 3,655 valued at Rs. 4.9 lakhs; 1954-55: 10,869 valued at Rs. 13.6 lakhs; 1955-56: 16,458 valued at Rs. 19.51 lakhs; Apr. to Dec. 1956 valued at Rs. 11.87 lakhs. In calendar year 1957 16,471 valued at Rs. 17.40 lakhs and in Jan.-Aug. 1958 15,494 valued at Rs. 16.39 lakhs.

Thirty different countries bought Indian fans, the main buyers being Ceylon, Burma, Malaya, Singapore, Kuwait and Thailand.

Electric Lamps: There are 11 units manufacturing general lighting service lamps with an installed capacity of 43.13 million lamps per year. The target is 60 million by 1960-61.

Production was, 1950: 14 million; 1953: 19.8 million; 1954: 23.86 million; 1955: 22.51 million; 1956: 29.9 million; 1957: 32.13 million.

There is one unit with an installed capacity of 800,000 units to produce fluorescent lamps. Production in 1956 was 880,891 and in 1957, 1,016,964.

Electric Motors: There are at present 15 units in the large-scale sector with a total annual capacity of 359,100 H.P. Besides, there are 81 units in the small-scale sector whose annual capacity is 1,30,000 H.P. In addition, there are several small units which are not registered but which assemble electric motors and manufacture parts.

Eleven out of the fifteen large units have schemes for expanding their capacities and 16 new units have also been licensed.

This will raise total capacity in the large sector to 1,134,290 H.P.

Actual production was, 1950-51: 99,000 H.P.; 1951-52: 153,000 H.P.; 1952-53: 160,000 H.P.; 1953-54: 161,000 H.P.; 1954-55: 201,000 H.P.; 1955-56: 271,000 H.P.

The total production by the large units in 1957 was 475,215 H.P. (76,014 motors), as compared with 296,699 H.P. in the first six months of 1958. The production is confined mainly to the manufacture of electric motors of one to 30 H.P. ratings. A few units also manufacture motors of large ratings.

The current demand for electric motors is around 750,000 H.P. and this is expected to go up to about one million H.P. by 1960-61.

A.C. 3 phase induction motors upto 225 H.P. and motors of the slip-ring type of up to 125 H.P. are now being produced in the country.

The Government has accepted the Tariff Commission's recommendations that the existing protective duties of 15 per cent *ad valorem* on electric motors and 20 per cent *ad valorem* on component parts of electric motors, excluding control gear, should be continued for a further period of three years ending December 31, 1961. Protection was first granted to the electric motor industry in 1948.

Electric Transformers: There are 14 units with an annual rated capacity of 934,000 KVA.

When the present schemes for development are implemented the capacity will go up to 1,310,000 KVA per annum—against the Second Plan target of 1.5 million KVA by 1960-61.

Production in the calendar year 1957 was 1,219,101 KVA as against 919,196 KVA in 1956.

Imports were valued at Rs. 184 lakhs in 1950-51; Rs. 144.5 lakhs in 1951-52; Rs. 140.4 lakhs in 1952-53; Rs. 197.6 lakhs in 1953-54; Rs. 161.6 lakhs in 1954-55; Rs. 173.41 lakhs in 1955-56; Rs. 146.98 lakhs during April-December 1956; Rs. 354.39 lakhs in 1957 and Rs. 214.68 lakhs during Jan.-Aug. 1958.

Scrap: There are 90 organised units with a capacity of 253,279 tons. The Plan target is 357,000 tons by 1960-61. A large part of the existing capacity is idle.

Production by organised factories was (in tons) 1951: 86,000; 1952: 85,000; 1953: 82,200; 1954: 88,000; 1955: 99,000; 1956: 110,260; 1957: 111,602. The cottage industries are estimated to produce 30,000 tons annually.

Exports were 1950: 280 tons; 1951: 1,580 tons; 1952-53: 1,300 tons valued at Rs. 32.56 lakhs; 1953-54: 571 tons valued at Rs. 13.57 lakhs; 1954-55: 542.6 tons valued at Rs. 14.57 lakhs; 1955-56: 413.8 tons valued at Rs. 9.67 lakhs; Apr to Dec 1956: 209 tons valued at Rs. 5.48 lakhs; 1957: 359.2 tons valued at Rs. 9.83 lakhs and Jan.-Aug. 1958: 187.3 tons valued at Rs. 5.24 lakhs.

Matches: There are 242 units with a rated capacity of 41.25 million gross boxes. The Second Plan target is 35.3 million gross boxes.

Actual production was in millions of gross boxes, 1951: 29.3; 1952: 32; 1953: 29.3; 1954: 28.5; 1955: 31.18; 1956: 30.78; 1957: 28.92; Jan.-Aug. 1958: 20.76.

Both imports and exports are negligible.

Plywood: The number of units on the approved list of DWCI is 67 with an annual installed capacity of 150.6 million sq. ft. Besides there are a large number of unapproved factories

with an estimated capacity of about nine million sq. ft. Actual production of tea-wood plywood in million sq. ft. was 1950: 44.9; 1952: 71; 1953: 50; 1954: 62; 1955: 91.13; 1956: 98.38; 1957: 94.49.

Protection has been extended upto the end of 1960.

Razor Blades: The actual production of razor blades in 1957 was about 386.48 million. The total installed capacity of Indian factories was about 614.4 million. Permission has been granted to open new factories.

Average monthly production in 1958 by the three factories in Bombay and Calcutta: 25 million blades.

Thermos Flasks: The production of thermos flasks in India, which was just a little over 6,000 dozens in 1951, increased to 53,368 dozens in 1957.

The production in 1956 was 48,336 dozens and in 1955 about 44,000 dozens.

The present demand in the country is estimated at between 60,000 and 70,000 dozens of flasks per year. This is expected to increase to 1,00,000 dozens by the end of the Second Plan period.

There are now three units in the country manufacturing thermos flasks with a total installed capacity of 106,800 dozens per year. Licences have been granted to establish two more units. When these schemes take shape, the total installed capacity will go up to 227,000 dozens per year.

The value of imports of thermos flasks in 1956-57 was just over Rs. 8.3 lakhs. For the calendar year 1957 the imports were valued at over Rs. 63,916 and Jan.-Aug. 1958 Rs. 7,965.

Three units are engaged in the manufacture of ampules by automatic machines. The total capacity of these three units is over 35 lakh ampules per month. Besides these there are a number of small-scale units manufacturing ampules by the table-blowing process.

NON-FERROUS INDUSTRY

(See also under 'Mines and Minerals').

THE position regarding these metals is briefly described below:

(a) **Aluminium Ores:** India is rich in deposits of high grade Bauxite which are estimated at 250 million tons, but the total reserves of workable deposits are said to be around 28 million tons. They are generally located in the Jabalpur and Balaghat Districts of Madhya Pradesh; Belgaum District in Mysore; Kolhapur, Thana and Kalra Districts in Bombay; Ranchi Plateau in Bihar; and Shevaroy Hills in Salem, Madras. The known estimates of 250 million tons of bauxite make possible production of about 40 to 50 million tons of virgin aluminium metal.

(b) **Copper Ores:** Copper pyrites is the principal ore of copper. The deposits of copper pyrites in India are in Singhbhum and Baragunda in Bihar; Khetri mines in Jaipur; Sikkim State, Mysore State and in the Salem District of Madras State. Although only the Singhbhum deposits are worked at present, the copper belts of Sikkim and Khetri are very promising.

(c) **Lead Ores:** Lead ores are known to occur at a number of places in India. Special mention may be made, however, of lead deposits in Jaipur and in Jawar Mines in Udaipur, where lead is found in association with zinc; in Chhoti Udaipur in Bombay and in Hazaribagh in Bihar.

(d) **Antimony Ores:** Antimony ore deposits have been found at the Shigree Glacier in Lahaul, Kangra District, Punjab.

(e) **Zinc Ores:** At present zinc deposits are known to occur at only two places in India: Zawar mines in Udaipur and in the Rissai District in Kashmir State.

(f) **Tin Ores:** Hazaribagh, Bihar.

PRODUCTION

The production of refined copper in tons is as follows: 1946—6,310; 1947—6,382; 1948—5,864; 1949—6,390; 1950—6,614; 1951—7,083; 1952—6,079; 1953—4,920; 1954—7,161.6; 1955—7,281; 1956—7,025; 1957—7,348. The installed capacity of the industry was 7,000 tons in 1947; expanded to 7,800 in 1952, since when it has stood at this figure.

As regards processing of semi-manufactures the only production was of brass sheets by the Indian Copper Corporation Ltd. averaging about 8,000 tons per annum, and electric copper wires and insulated cables by the Indian Cable Co. Ltd. A more recent development is the manufacture of brass and copper pipes and tubes. Their annual capacity is 500 tons but the actual production has never exceeded 11 tons and 60 tons respectively.

For antimony a smelter was set up during the war at Bombay by the Star Metal Refinery with a capacity of 300 tons per annum. This capacity has now been increased to 1,000 tons per annum. The ore brought from Chitral State (Pakistan) was used for smelting antimony and the plant had reached full production in 1946-47. After the partition of the sub-continent, the ore supplies from Chitral were cut off and as a result the production suffered. The production from 1949 to 1957 was: 100 tons in 1949, 375 in 1950, 327 in 1951, 181 in 1952, 131 in 1953, 539 in 1954, 504 in 1955, 589 in 1956 and 508 in 1957. The fall in production is due to the shortage in imported antimony ore.

There is a Lead Smelter at Katnagarh in Bihar with a capacity of 7,000 tons per annum. The production of lead in 1949 and 1950 was, however, only about 600 tons a year due to the difficulties of transporting ore from the Jawar mines in Udaipur to the Smelter. The company has also set up an ore dressing plant at the mines which will reduce the weight of the ore to be transported. The capacity of this plant is reported to be 6,000 to 10,000 tons of lead concentrates of 60 to 65 per cent. lead and 7,000 to 8,000 tons of zinc concentrates averaging 35 per cent. zinc. There are also lead refineries in Bombay and Calcutta, which started working in 1955. The production in tons is as follows: 1948—655;

1949-504; 1950-627; 1951-859; 1952-1,131; 1953-1,694; 1954-1,788; 1955-2,234; 1956-2,497; 1957-2,974, rise being due to the immense availability of ore. The installed capacity in 1951 was 6,000 tons and has remained unchanged since then.

As the industry engaged in the production of non-ferrous alloys covered by I.C.T. items Nos. 65(a), 69(2), 70(1), 70(4), 70(6) and 70(9) did not press its claim to continuance of protection, protection has been withdrawn with effect from 1st January 1958.

SEMI-MANUFACTURES

The greatest progress in the non-ferrous industry made since 1939 is in regard to the semi-manufactures. Several brass and copper rolling plants were started for rolling brass and copper sheets mainly in Bombay. The combined capacity of this sector is about 48,000 tons per annum.

Some lead sheets are also manufactured in the Calcutta area, but at present they are rolled in 3 ft. width, while the chemical industries require lead sheets of 7 to 9 ft. width. The annual installed capacity is 1,098 tons. Aluminium and lead foils for tea-chests are also manufactured in the Calcutta area and the present capacity is estimated to be sufficient to meet India's requirements.

Several rolling plants for rods and bars of brass, copper, etc. were started during the war; afterwards an Extrusion Press was set up in Calcutta by National Tubes and Pipes Ltd. Arsenical copper rods which are required for railway locomotives as boiler stays were manufactured in Jaipur by the Jaipur Metal Industries Ltd. during the war and all the requirements of railways can be met by indigenous production. The present capacity for rods and tubes of brass and copper may be estimated at about 10,000 tons, which is enough to meet the present requirements of the country. The manufacture of lead pipes was started during the war at Konnanagar.

A plant for lead pipes was also set up in Bombay during 1949. The present production is about 330 tons per annum, but this could be increased to 1,000 tons, if required.

A plant for the manufacture of electrical wires and cables was set up near Calcutta during the war by the National Insulated Cable Co. The total production of electrical bare copper wire and cables of this company and the Indian Cable Co. during 1956 amounted to 10,200 tons, the figure for the previous year, 8,150 tons. The installed capacity aggregated 17,796 tons.

Two plants one in Bombay and the other in Calcutta for the manufacture of enamelled copper wire required for making electric motors and fans have a total capacity of 2,000 lb. per day.

A number of concerns have been started for manufacturing different kinds of non-ferrous alloys. The refining and reconditioning of railway scrap and other industrial non-ferrous scrap is now done in this country, which was formerly largely exported. The total present

alloying capacity in the country may be estimated at about 30,000 to 35,000 tons per annum.

A plant for the recovery of silver from old coins has been taken for implementation at the Alipore Mint. This plant will also be able to recover about 3,600 tons of electrolytic copper from copper scrap.

A scheme for erecting a ferro-manganese plant with an annual capacity of 100,000 tons, has been implemented. This plant is installed at the Hirakud Dam site in collaboration with an Italian firm. But the target capacity has been stepped up from 100,000 tons to 160,000 tons per annum in view of the higher target for steel production. Seven new projects have been approved so far and the installation of further capacity is under consideration. It is expected that by the end of the Second Plan, there will be nine plants with an installed capacity of 171,800 tons. But the actual production then will reach only 160,000 tons, out of which 60,000 tons will be for internal consumption and 100,000 tons for export. The ferro-manganese plant of the Tata Iron and Steel Company has already been put into commission.

In most cases there is a protective duty of 30 per cent. In the case of zinc and lead sheets the protective duty is fixed at 20 per cent. and of arsenical copper rods, brass rods and brass wires, a protective duty of 35 per cent. The import duty on machinery is 5 per cent. which is applicable to all industries.

Protection to non-ferrous semi-manufactures covered by I.C.T. items Nos. 64(3), 67(1), 67(2), 68(2) and 70(5) excluding brass wires, was extended up to the end of December 1958.

Protection to the non-ferrous manufactures covered by tariff items Nos. 64 (excluding copper sheets, tubes and pipes), 67, 68 and 70 (excluding brass sheets, tubes and pipes) has been discontinued with effect from 1st January 1958.

ALUMINIUM

Aluminium is the only non-ferrous metal which India can produce in large quantities because of extensive deposits of bauxite and adequate supplies of bulk power. There are two units. Both the plants are reported to be working at more than their capacity level. The Indian Aluminium Co. is working in collaboration with the Canadian Aluminium Co. The principal activities of this company are: (1) the mixing of bauxite in the Lohardaga region of Bihar; (2) the processing of bauxite ore to alumina at Murl, Bihar; (3) the electrolytic reduction of alumina to aluminium metal at Alwaye, Kerala; (4) the rolling of aluminium metal to sheets and circles at Belur, W. Bengal; and (5) the manufacture of aluminium powder and paste at Kalwa, Bombay. The Aluminium Corporation has an integrated plant near Asansol.

At the commencement of the First Five Year Plan, the total capacity of the two plants for aluminium ingots was 4,000 tons and of their rolling mills was 3,500 tons. But at the end of the Plan, the installed capacity of the industry was 7,500 tons of ingots and the fabricating

capacity 25,000 tons per annum. During the period a total investment of about Rs. 2.25 crores is estimated to have been incurred.

A protective duty of 30 per cent *ad valorem* plus a surcharge of 5 per cent of the total duty was charged on imports of aluminium during the period of the First Plan. This protection will continue upto December 31, 1960.

The production of aluminium in tons since 1948 is as follows:—1948-3,369; 1949-3,489; 1950-3,596; 1951-3,848; 1952-3,566; 1953-3,758; 1954-4,886; 1955-7,225; 1956-6,501; 1957-7,784. The present installed capacity is 7,500 tons.

Except bauxite and coal, most of the other raw materials are available only partly or not at all from indigenous sources. Caustic soda and soda are not produced in enough quantities, cryolite, aluminium fluoride, carbon blocks and filter cloth have to be imported, and the possibilities of producing greenland in this country are yet to be investigated.

The demand for aluminium has been estimated at 25,000 tons. It seems that about 35,000 to 45,000 tons of aluminium represent the minimum requirements by 1960-61. The handicaps of the industry are the small capacity of the units, the inherent refractory nature of Indian bauxite which costs more to mine, the low alumina content of Indian bauxite, the high cost of electric power, the cost of railway freight and expensive raw materials such as petroleum coke.

To meet the increased demand, there are different schemes for the expansion of the industry under the Second Plan. The Indian Aluminium Co., Ltd., Calcutta has set up an aluminium smelter at Hirakud. The factory has an installed capacity of 10,000 tons of aluminium ingots per year. The factory was expected to go into production in February 1959. The expansion programme of the Aluminium Corporation of India, scheduled to be completed by the end of 1959, will raise the capacity of their Asansol plant to 5,000 tons per annum. Besides, a new smelter is being erected under the aegis of the National Industrial Development Corporation. An expert body examined the question of the most suitable location for the plant and recommended that two smelters of 10,000 tons each provided with facilities of expansion to 20,000 tons in due course should be set up at suitable sites—Mettur and Rihand Dam area. One of the 10,000-ton smelters is expected to come into operation during the Second Plan period, while the other may commence operation in the early stages of the Third Plan.

By the end of the Second Plan, overall investment in the industry is estimated at about Rs. 22 crores and about 3,000 to 4,000 additional persons are expected to find employment in this industry. The number of smelters will increase from two to four, the installed capacity from 7,500 tons to 30,000 tons and the fabricating capacity from 25,000 tons to 32,000 tons.

Protection to the industry will continue till Dec. 31, 1960 and the existing rate of 35 per cent *ad valorem* would be maintained.

IMPORTS OF NON-FERROUS METALS

	1955-56	Apr.-Dec. 1956	1957	Jan.-Aug. 1958
Aluminium (Cwts.)	316,108	216,045	312,690	120,138
unwrought (Cwts.)	103,594	32,735	151,433	90,535

OPIUM INDUSTRY

THE area under poppy cultivation for the production of opium and the quantities of opium produced during the opium years (1953-54 to 1956-57) are given below :—

	Opium year	Area Cultivated (Acres)	Produce at 70° Mds.
Uttar Pradesh	1953-54	10,098	3,614
	1954-55	12,521	3,093
	1955-56	12,531	2,324
	1956-57	19,331	3,763
Madhya Pradesh	1953-54	19,999	4,771
	1954-55	19,841	3,775
	1955-56	18,535	4,094
	1956-57	22,420	5,211
Rajasthan	1953-54	12,772	3,247
	1954-55	12,075	2,761
	1955-56	12,114	2,821
	1956-57	17,565	3,977
Himachal Pradesh	1952-53	2,047	85
	1953-54	1,784	45

N B :—The opium year starts on 1st October and ends on 30th September

Only a small percentage of the opium is sold to the State Governments after processing, and the balance is exported for medicinal and scientific purposes. Some opium is also supplied to Pakistan for quasi-medical purposes.

Poppy is generally cultivated and does not grow in a wild state in India, cultivation of poppy for the production of opium is carried on by growers licensed by the Government, on behalf of the Government of India who undertake to sow the poppy, lance the capsules, collect the latex, and deliver the drug at the weighing centre at a price fixed by the Government of India.

The Opium purchased from the cultivators is sent to the Government factories at Ghazipur or Neemuch, where it is chemically tested and prepared for export and internal consumption.

In addition to being a narcotic, opium is used in many essential medicinal drugs. Because of its harmful effect as a dope, the Central and State Governments have adopted various measures to put an end to normal traffic; at present only a very small fraction of the population makes habitual use of the drug.

Poppy cultivation for the purpose of production of opium is confined to the States of Uttar Pradesh, Madhya Pradesh and Rajasthan. The cultivation in the Territory of Himachal Pradesh was discontinued with effect from 1st October, 1954. The cultivation of poppy starts in November and the crop is harvested in April or May. Preparation of the land for the reception of the seed is a prolonged process, the field being given 10 to 15 ploughing.

The quantities of opium exported during the opium years 1953-54, 1954-55, 1955-56 and 1956-57, are given below :—

Opium Year	Exports (in tons)
1953-54 .. .	256-4/14
1954-55 .. .	211-5/14
1955-56 .. .	245-7/14
1956-57 .. .	331

The value of export of opium in 1956-57 was more than Rs 2 crores as against Rs. 1.6 crores in 1955-56. More than half of the export went to the United Kingdom.

At a Conference of the State Governments held in 1949 it was decided to reduce the supply of opium to the States at the progressive rate of 10 per cent every year so that the supply of opium to the public for oral consumption (for non-medical or quasi-medical purposes) might be completely stopped with effect from 1st April, 1959. This decision was reiterated by the All India Narcotics Conference held in September, 1956.

This decision was to become effective from the date mentioned above in pursuance of India's international obligations.

After 31st March, 1959, opium was, however, to be supplied to registered opium addicts through Government Depots on medical permits issued by the appropriate medical authorities.

The quantities of excise opium supplied to the State Governments during the financial years 1953-54 to 1956-57 are given below :—

Financial Year	Mds.	Srs.	Chts.
1953-54	2,514	27	8
1954-55	2,031	20	0
1955-56	1,734	34	8
1956-57	1,287	0	0

In 1944, the Central Government erected an Alkaloids Plant at the Ghazipur Opium Factory for extraction and manufacture of various alkaloids from opium.

The quantities of various alkaloids exported and sold in the internal market during the opium years 1953-54 to 1956-57 are given below :—

Opium Year	Quantity exported	Quantity sold in internal market
	Lb. oz. dr.	Lb. oz. dr.
1953-54	725 0 0	1,784 4 11
1954-55	791 2 3	2,027 5 1
1955-56	760 8 0	2,556 18 8
1956-57	1,253 0 0	3,355 0 0

Illicit traffic in narcotics : In order to make prevention and detection of illicit traffic in narcotics more effective, the States have been grouped into three zones and committees have been constituted in each zone to co-ordinate anti-smuggling activities, in accordance with the recommendations of the All India Narcotics Conference held in 1956.

During the year ending September 30, 1957, 369 cases were registered for violation of narcotics law. Twenty-eight maunds of opium were seized.

PAPER INDUSTRY

THE bulk of the production comprises the more common types of paper, especially printing and writing paper. The manufacture of superior varieties is also undertaken but on a restricted scale. The following table gives the trend of production:—

(In 000 tons)

	1953-54	1954-55	1955-56	1956-57	1957-58	1958 April to July
Printing & Writing ..	92.86	112.23	148.83	183.51	133.55	50.58
Wrapping ..	21.48	24.62	36.37	40.01	37.90	12.04
Special Varieties ..	3.41	5.53	7.15	7.50	6.94	2.15
Paper Boards ..	20.12	26.66	39.52	43.14	40.59	17.70
Total ..	137.89	169.09	231.87	244.26	218.98	82.47

The aggregate installed capacity of the paper industry in 1957 is estimated at 252,000 tons, as against 211,900 tons in 1956 and 186,200 tons in 1955. The total production of paper during the first four months of 1958 was nearly 82,473 tons, as against 68,447 tons in the corresponding period in the year before. In 1957, about 210,000 tons of paper were produced, as against 193,404 tons in 1956.

The gross fixed investment in the industry during 1951-56 was estimated at about Rs. 11 crores and it found employment for about 88,000 persons.

In April 1956, the annual rated capacity of the paper and paper-board industry stood at about 210,000 tons. This capacity is exclusive of the capacity of the Travancore Rayons for transparent paper estimated at 1,800 tons per annum. Newsprint was not manufactured in the country at the beginning of the First Plan. Since then, the State-aided Nepa Paper Mills has been established. But the production target of 27,000 tons has not been reached and the production of newsprint in 1957 is estimated at 14,515 tons, as against 10,792 tons in 1956. In regard to straw-boards, there were in April 1951, 18 factories on the active list of the Development Wing of the Ministry of Commerce and Industry with a total capacity of 48,500 tons per annum. This number rose to 24 in April 1956 with an annual installed capacity of 59,380 tons.

The State-wise distribution of the paper and paper-board industry in April 1956 is given below:—

State.*	No. of units.	Annual rated capacity (tons)
West Bengal ..	4	68,100
Bihar ..	1	29,000
Orissa ..	1	36,000
Uttar Pradesh ..	2	9,500
Punjab and Pepsu ..	1	15,000
Bombay ..	4	11,900
Madras ..	1	600
Madhya Pradesh ..	1	8,000
Andhra ..	1	2,000
Hyderabad ..	1	15,000
Mysore ..	2	11,000
Travancore-Cochin ..	1	6,000
	20	210,100

* Pre-reorganisation.

Imports of paper and paper-board in the recent years are as follows:—

1952-53—21 lakh cwt.
1953-54—25 lakh cwt.
1954-55—27 lakh cwt.
1955-56—30 lakh cwt.
1956-57—26 lakh cwt.

1957 (calendar year) 20.85 lakh cwt.
1958 (8 months ended August) 8.95 lakh cwt.

Exports have not been appreciable in the past. There has, however, been an improvement in shipments from 34,035 cwt. in 1952-53 to 46,586 cwt. in 1954-55 but a decline again to 43,276 cwt. in 1955-56.

During the first eight months ended August 1958, the export was 29,585 Cwt. as against 37,926 Cwt. in 1957 (calendar year).

Paper and paper pulp had protection from 1925 to April 1947.

DEVELOPMENT PROGRAMME

Certain new varieties of paper and paper-board were manufactured for the first time in the country during the First Plan period. These are cigarette tissues, coated boards, art and chrome paper, sensitised cheque paper and cellulose film. The production of transparent paper by the Travancore Rayons also increased appreciably during the period.

The demand for paper and paper-board has developed at a rather faster rate than was visualised in the Plan. The Second Plan envisages the establishment of three hard-board factories. Of these, one, namely, Anil Hard-board Ltd. in Bombay, went into production in November 1958. The annual capacity of this factory is 6,000 tons. The other two factories now being set-up are the 6,000 tons Madhya Pradesh Industries Ltd. and the 3,700-ton Western Indian Plywood Ltd. at Ballapatam.

The capacity of Anil is expected to go up to 40,000 tons in five years.

The following table summarises the development of the paper industry during the First Plan and the planned development during the Second:

	1950-51		1955-56		1960-61	
	Annual rated capacity (000 tons)	Actual output (000 tons)	Annual rated capacity (000 tons)	Actual output (000 tons)	Annual rated capacity (000 tons)	Actual output (000 tons)
Paper and paper-board	186.6	114	210	200	450	350
Newsprint	30	10.8*	60	60
Strawboard and other fibre boards ..	48.5	22	59.3	32.0	59.3	35 to 40

Sabal grass and bamboo are the chief raw materials which are available locally. The use of imported woodpulp has been gradually discouraged and hardly 10 per cent of the raw material is imported. Of late, however, the industry has been placing a greater reliance on rags, hemp, hemp ropes and wastepaper. One important mill is exclusively dependent on wastepaper and rags.

For many years the paper pulp section of the Forest Research Institute at Dehra Dun has been carrying out experimental work in connection with the development of new fibres for paper-making.

During the First Plan period, the consumption of paper and paper-board increased on an average by about 8 per cent. per annum. It is likely it will show a progressive increase of 10 per cent. during the Second Plan. On this basis, the demand by 1960-61 may be about 350,000 tons. The demand for newsprint would go up to 120,000 tons, while that for strawboards and other boards may be placed at 40,000 tons by end of the Plan period. Plans are therefore afoot to step up the capacity. A sum of Rs. 44 crores, over and above the investment of about Rs. 4.25 crores in public sector projects, is expected to be invested in the paper and paper-board industry during the Plan period, to achieve the target capacity of 450,000 tons. The investment on newsprint factories is placed at Rs. 6 crores for 80,000 tons.

NEWSPRINT

The National Newsprint and Paper Mills Ltd. (NEPA) is India's first newsprint mill.† It is situated at Napanagar near Chandani, Nimar District, Madhya Pradesh. It started production in January 1955 and has an installed capacity of 100 tons a day. During 1957 it produced 14,489 tons of newsprint.

A scheme for another newsprint factory is under the consideration of the National Industrial Development Corporation. This is to be established at Shakarnagar in Andhra. It would have a capacity of 100 tons a day.

The production of indigenous newsprint was 2,563 tons in 1955, 10,781 tons in 1956 and 14,489 tons in 1957. In the first half of 1958 it was 9,549 tons.

The present (1950) demand is estimated at 80,000 tons a year and is expected to rise to 1,20,000 tons at the end of the Second Plan.

The import of newsprint was as follows: 1955: 73,600 tons, 1956: 71,450 tons, 1957: 63,750 tons. During the first five months of 1958: 21,550 tons.

The main supplying countries are Canada, Finland, Norway and Austria.

† See also under 'Government Industrial Undertakings'. * Calendar year 1956.

PETROLEUM INDUSTRY

(See under Index for Page No. of article)

PLASTICS INDUSTRY

THE plastics industry in India was largely developed during the Second World War and is primarily concerned with turning out finished product from imported raw

material. At present there are about 110 major factories and several small ones operating on a cottage industry basis.

The present position of the plastic goods is shown below. Figures relate to 1957.

Processes.	No. of units.	Present installed capacity	Production in 1957
Compression moulding ..	47 (major units)	12,350 tons	3.8 million gross articles.
Injection moulding	N A	648 oz.	N A
Extrusion			
Polyethylene films and layflat tubings	6	720 tons	700 tons
P.V.C. unsupported sheets ..	2	2 52 mil. yds	0 39 mil yds
Lamination	1	1 08 mil lbs	0 86 mil. lbs.
Coating			
Leather cloth P.V.C. ..	6	4 70 mil yds.	3 50 mil. yds.
Leather cloth nitrocellulose	1	0 45	0 33 mil. yds.

SECOND FIVE-YEAR PLAN PROGRAMME

There is no doubt that in India the potential demand for different types of plastic goods is large, although it is difficult to foresee the demand for some of the finished plastic goods consumed for non-industrial purposes. It is best therefore, to assess the total requirements in terms of the demand for moulding powders. This is estimated to be about 11,600 tons in 1960-61. To meet this demand the target for capacity during the period is 12,810 tons, which involves an investment of Rs 4 crores.

The production of P.F. moulding powder has been steadily increasing. The relevant figures are given below:

Year	Production (lbs.)
1953	837,600
1954	1,057,200
1955	1,640,400
1956	1,960,000
1957	2,400,000

The annual installed capacity of the P.F. moulding powder sector in 1957 was 2.40 million lbs.

The production for P.F. moulding powder and buttons will expire on 31st Dec. 1959.

There are six units manufacturing polyvinyl chloride (PVC) plastic coated cables, wires and flexibles with an annual capacity

of 11 million yards. Six units are manufacturing leather cloth with a capacity of 8.7 million yards per annum. There is one unit producing phenolic resin laminates, with a capacity of 450 tons per annum. There are six units manufacturing polyethylene films, layflat tubings and have an aggregate capacity of 720 tons. All told the total investment in the industry is estimated at more than Rs 6 crores and the labour employed is over 10,000.

The trend of production of compression and injection moulded goods since 1952 is given below:

Year	Production (million gross)
1952	1.54
1953	1.86
1954	1.31
1955	2.48
1956	3.70
1957	3.80

The articles now manufactured cover a wide range of household consumer and utility items, electrical accessories, telephone equipment, gramophone records, insulated wires, combs, toys, tooth brushes, spectacle-frames, hand-bags, leather cloth, packaging materials, films, industrial items and accessories for automobile engi-

neering, radio and air-conditioning industries. Production of mechanised toys has been an important achievement in recent years.

The production of plastic goods and plastic raw materials in 1957 was valued at over Rs. 10 crores as against Rs. one crore in 1947.

A new factory producing polystyrene moulding powder commenced operation in May 1957. Two other factories—one at Rishra (Calcutta) and the other at Bombay—are being erected to manufacture polystyrene, employing alcohol as raw material. The total capacity of these two units is 5,100 tons per annum. The other schemes which have almost been completed are those for the manufacture of urea formaldehyde moulding powder, P.V.C. Composition from resin and cellulose acetate moulding powder from imported flakes.

Lack of technical personnel is the industry's main handicap. The I.N.T.A.A. therefore, lent the services of a plastics moulding expert to India, who prepared a blue-print for a central tool room costing about Rs 30 lakhs. A plant for the manufacture of urea formaldehyde moulding powder has been installed in Delhi with a capacity of 200 tons per annum initially.

The consuming capacity of the industry in respect of raw materials is about 3,000 tons of Thermosetting moulding powders and about 6,000 tons of Thermoplastic moulding powders. A large part of the raw material is imported. Imports of raw materials were stepped up from Rs 1.1 crores in 1950-51 to Rs 1.9 crores in 1954-55 and to Rs 2.31 crores in 1955-56. Phenol formaldehyde moulding powder, phenol and formaldehyde and alkyl resin are manufactured in the country out of imported basic materials. At present, three concerns, Industrial Plastics Corporation, Plastic Products of India, Satara and Indian Plastics, Kandivli, all in Bombay are manufacturing phenol formaldehyde moulding powder with a combined capacity of 1,182 tons per annum.

The machinery installed in the industry is almost wholly imported. It is estimated that about 250 moulds are used by the industry each year. In 1954, 240 moulds valued at about Rs 15 lakhs were imported as against 280 in 1953. But there are two or three engineering firms in the country making some of the simple types of moulds. In addition, there are about 20 plastic moulding concerns which have set up their own tool rooms.

IMPORTS, EXPORTS

The imports of plastic raw materials, plastic manufactures and leather cloth are given below:

(Rs. lakhs)

	1952-53	1953-54	1954-55	1955-56	(Calendar year) 1956	1957	1958 Jan-Aug
Synthetic Resins & Moulding Powder	140.11	148.10	187.88	231.86	307.74	245.02	141.32
Semi-fabricated Plastic materials	87.53	84.45	87.73	96.08	129.49	175.96	74.68
Finished Plastic goods	11.39	4.12	2.87	5.14	N A	N A	N A.
Leather cloth ..	3.22	5.14	5.19	1.83	N A.	N A.	N A.

N A Not available

By 1961 the plastics processing industry could be expected to obtain locally all the three important raw materials viz. polystyrene, polythene and P.V.C. to the extent of at least 16 million pounds. The consumption of these three plastic raw materials in 1957 was seven million pounds.

The Government has licensed two schemes of total capacity of about 14 million pounds for the manufacture of polythene. One of the plants was expected to be commissioned early in 1959 and the second a year after. The scheme for the manufacture of P.V.C. from calcium carbide had been finalised and the plant was expected to commence operations before the end

of the Second Plan period. Two thousand tons of urea for urea resin and moulding powder was expected to be available from Sindri by the end of 1958.

The country is now an exporter of plastic goods. The following is the yearly exports of plastics from India.

Year	Rs. lakhs
1952-53	13.03
1953-54	15.98
1954-55	14.46
1955-56	7.62
1956-57	7.41
1957	12.47
1958 (Jan.-Aug) ..	0.15

In order to encourage exports, an Export Promotion Council was set up in 1956. The Government also allows rebate of import duty at specified rates on raw materials used in the manufacture of plastic goods intended for export. At present the concession is given on urea formaldehyde, cellulose acetate/cellulose acetate butyrate and polystyrene moulding powders.

Ceylon leads other countries in import of Indian plastic goods. The other importing countries include Burma, Kuwait, Kenya, Saudi Arabia, Tanganyika, Mauritius and Mozambique.

RAYON INDUSTRY

THE rayon industry is a post-war industry. There are at present three plants in operation, viz., Travancore Rayons Ltd., Perambavoor, the National Rayon Corporation Ltd., Kalyan, Bombay, with an annual production capacity of 4 million lb. and 7.9 million lb. respectively of filament yarn and the Sirluk Ltd. in Andhra Pradesh with a production capacity of 4.0 million lb. based on the cellulose acetate process.

The first came into production in July 1950 and the second in February 1951. Both the factories have adopted the viscose process. The third started production in 1954.

Progress on the cellulose acetate plant of Sirluk Ltd. did not keep to schedule owing to financial difficulties. The factory went into production only in June 1954.

A new plant with a capacity of 10 tons of viscose rayon yarn and 10 tons of staple fibre per day was to be set up by the Indian Viscose Corporation Ltd., a Rs. 8 crore project under the joint collaboration of the Silk and Art Silk Mills Association, Bombay, and Snil Viscosa, Italy. The factory was scheduled to go into production early in 1957. Latest reports, however, indicate that no progress has so far been made.

Another plant with an annual estimated capacity of 8 million lbs. of staple fibre is to be set up in the near future by the South India Viscosa Ltd. in collaboration with Italtiscosa Eastern Trading S P A, Milan (Italy) at Mettupalayam in Coimbatore district, with a financial outlay of Rs. 8.4 crores.

The following table indicates the production of rayon filament since 1950-51:

Year	(million lb.)		
	Viscose Rayon	Acetate Rayon	Total
1950-51	0.4	—	0.4
1951-52	6.0	—	6.0
1952-53	8.5	—	8.5
1953-54	10.1	—	10.1
1954-55	11.7	1.4	13.1
1955-56	13.4	2.5	15.9

The potential needs of rayon filament is estimated at 70 to 75 million lb. per annum. The maximum consumption on the basis of import and indigenous production so far was 55.2 million lb. in the period from April 1955 to

January 1956. This suggests that even after the completion of the schemes mentioned above, it will not be possible to meet fully from indigenous sources the demand for rayon.

Staple Fibre: Before the First Five-Year Plan, there was no plant for staple fibre. The factory of the Gwalior Rayon Silk Manufacturing (Weaving) Co. went into production in February 1954 with a capacity of 15 tons per day (11.2 million lb. per annum). The firm expanded the capacity to 18 tons per day in January 1955 and to 21 tons per day in December 1955. The present annual capacity is, therefore, about 7,560 tons. The firm produced 5,712 tons of

staple fibre in 1955 and 7,848 tons in 1956. The First Plan envisaged that consumption would be 14.2 million lb. in 1955-56. But it averaged a little over 28 million lb. per annum during the Plan period and it was expected to be about 30 million lb. in 1955-56.

The investment in the rayon industry during the Plan period is estimated at Rs. 7 crores. This is inclusive of investment in ancillary plants attached to the rayon units for the manufacture of sulphuric acid, carbon disulphide, etc.

The installed capacity and actual production of the rayon industry during the years 1956 and 1957 are given below:

Article	1956			1957		
	No. of units	Capacity tons	Production tons	No. of units	Capacity tons	Production tons
Continuous filament viscose rayon yarn	2	8,160	7,275.69	3	12,900	9,403
Continuous filament acetate rayon yarn	1	1,800	1,413.74	1	1,800	1,606
Viscose staple fibre ..	1	5,400	7,905.85	1	14,400	8,009

The production of yarn in million pounds was 1955: 15.45, 1956: 19.32, 1957: 25.18.

Art Silk Weaving Industry: The Development Council for the art silk industry, set up in 1955, suggested a target of 350 million yards of art silk cloth to be achieved by 1960-61. This will be an increase of about 20 per cent in the present per capita consumption of art silk fabrics.

The Tariff Commission estimated the number of powerlooms engaged in the production of art silk fabrics in 1955 at 44,500. The industry is big and largely concentrated in Bombay with as many as 36,641 of the powerlooms. They provide employment to nearly a lakh of workers. The output of fabrics has registered a marked increase. A wide variety of fabrics such as velvet, velveteen, sharkskin, finishing fabrics, etc. are being produced. Licences have been issued for the installation of over 3,500 powerlooms. In addition, there are a number of handlooms producing art silk fabrics and mixed fabrics. Their exact number is not known, but the Tariff Commission estimates it at 17,000. The capacity of an average powerloom is considered to be 22 yards of cloth per shift and that of four handlooms is considered to be equivalent to one powerloom. Thus the total capacity of

the industry amounts to about 470 million yards on the basis of a single shift.

The production in 1954 was 181.21 million yards; in 1955, 231.16 million yards; in 1956 over 251.86 million yards and in 1957, it was 366 million yards.

A scheme to ensure equitable distribution of art silk yarn to the large scale art silk mills as well as to power looms and handlooms which use art silk yarn is being implemented.

The annual target capacity for the production of art silk yarn has been fixed at 100 million pounds by the end of the Second Plan period. Licences have already been issued under the Industries (Development and Regulation) Act to cover a capacity of 80 million pounds of rayon yarn. Besides, perlon yarn is also intended to be produced.

Three schemes for the production of rayon yarn are expected to be completed before the end of this year. Two more schemes are scheduled to be completed before the end of 1959 while a sixth scheme will take some more time. Three of the schemes are for substantial expansion of the existing industrial undertakings, while the other three are for starting new factories.

IMPORTS

Imports consist of staple fibre, rayon yarn, yarn of rayon staple fibre and rayon piece-goods and were as follows:—

Year	Rayon yarn		Rayon piece-goods		Staple fibre (cut fibre and waste)		Staple fibre yarn	
	Quantity (million lbs.)	Value (Rs. lakhs)	Quantity (million yds.)	Value (Rs. lakhs)	Quantity (million lbs.)	Value (Rs. lakhs)	Quantity (million lbs.)	Value (Rs. lakhs)
1952-53	22.24	7.55	1.15	26.34	4.14	65.50	4.31	74.58
1953-54	39.39	12.04	2.43	51.96	27.22	377.67	1.89	46.04
1954-55	40.85	12.69	4.12	90.69	27.32	374.63	0.51	21.75
1955-56	50.78	15.44	9.84	185.12	14.50	191.67	—	—
1956 (Apr.-Dec.) ..	47.62	13.74	5.56	101.94	34.62	429.04	3.02	26.09
1957	46.86	1,299.88*	3.60	99.92	14.94	201.17	0.63	16.66
1958 (Jan.-Aug.) ..	17.20	448.85*	8.47	71.70	0.16	6.56	0.11	8.65

* Includes viscose and other rayon yarns.

The programme of development for the rayon and staple fibre industry envisaged for the Second Plan is summarised below:

	1955-56		1960-61	
	Annual Capacity	Production	Annual Capacity	Production
Rayon Filament (Million lb.)	22.3	15.9	68.3	68.0
Staple Fibre (Million lb.)	16.0	13.2	32.0	32.0
Chemical Pulp (Tons)	30,000	30,000
Art silk cloth (export in million yards)	2.5	..	10.0

RUBBER INDUSTRY

INDIA produces about 24,400 tons of raw rubber constituting a little over one per cent of the world output.

Of an area of about 238,115 acres under rubber cultivation, nearly 75 per cent is located in the State of Kerala. Other rubber growing areas

are the districts of Coimbatore, Salem, Nilgiris, Madura in Madras State and Coorg in Mysore State. Cultivation on a small scale exists in Assam. The total number of rubber estates registered up to the end of October 1957 was 37,293.

The following are other details:—

Year	Production (Tons)	Tapable Acreage	Average yield per acre in Lbs.
1951	17,148	148,739	238
1952	19,863	170,000	262
1953	20,967	172,800	272
1954	22,493	173,000	291
1955	22,481	207,250	243
1956	21,444	234,351	227
1957	24,000	238,115	225 7

Production in 1958 . 24,314 tons.

To meet the growing internal demand for rubber, the Plantation Enquiry Commission, set up in 1954, urged bringing of new land under rubber plantation. The Commission suggested that 1.2 lakh acres of land should be brought under high yielding rubber by 1965.

The Government is studying a report on the prospective rubber areas in the Andaman and Nicobar Islands submitted by the Rubber Production Commissioner, who visited the Andamans in March, 1957, on an inspection tour for reporting on the possibilities of developing rubber cultivation in these islands.

The progress of the manufacturing industry is given below:—

Product	1956	1956	1957
Footwear (Lakh pairs)	349.2	361.17	368.92
Toys, Balloons, etc. (Lakh Duz)	229.3	255.5	—
Tyres:			
Automobile (000)	882.3	965.45	1,022.04
Cycle (000)	6,748.1	6,314.91	7,152.20
Tractor (No)	24,526	30,771	47,396
Aero (No)	4,408	3,356	4,470
Cab (thousand ft)	370.8	290.3	310.4
Tubes			
Automobile (000)	785.5	955.4	999.75

Other Types (000 ft)	5,734.8	6,003.5	7,981.7
Fan Belt (000s)	655.3	725.1	852.73
Ebonite (000 lb)	130.3	209.64	239.85
Waterproof (000 yds)	2,119.0	2,574.6	3,077.2
Latex foam sponge (000 lb)	1,489.3	1,776.1	1,955.8

The programme of development for the rubber goods industry envisaged for the Second Plan period is summarised below:—

	1955-56	1960-61
Annual Capacity		
1 Automobile tyres	9,50,000	14,60,000
2 " tubes	9,50,000	14,60,000
3 Bicycle tyres	60,00,000	1,18,00,000
4 " tubes	41,00,000	1,18,00,000
Production		
1 Automobile tyres	9,10,000	14,60,000
2 " tubes	8,10,000	14,60,000
3 Bicycle tyres	57,50,000	1,18,00,000
4 " tubes	55,90,000	1,18,00,000
Exports		
1 Automobile tyres	60,000	1,50,000
2 " tubes	60,000	1,50,000
3 Bicycle tyres	70,000	3,00,000
4 " tubes	90,000	3,00,000

Dunlop opened a factory for the manufacture of 1.5 million cycle tyres and 1.34 lakh giant truck tyres in Feb. 1957 at Ambattur near Madras. The total investment is Rs 2.5 crores. With the establishment of this factory the only type of shortage—giant tyres—would disappear.

IMPORTS AND EXPORTS

Before World War II, India was exporting considerable quantities of raw rubber and

The Rubber Board has meanwhile taken steps to increase the production of this vital and strategic raw material at low cost. Two major schemes it has launched are the Research Scheme and the Replanting Subsidy Scheme.

The price of rubber was raised to Rs 155-12-0 per 100 lbs. in Sept. 1955. It has remained at that level.

With more factories coming into existence every year, the consumption of rubber is increasing. It was 21,063 tons in 1952, 21,998 in 1953, 25,487 tons in 1954, 27,543 in 1955, 29,996 tons in 1956 and 31,500 tons in 1957.

Imports of raw rubber had, therefore, to be permitted in 1954 and 1956. Imports in 1954 were 3,371 tons, in 1955 they were 3,839 tons, 6,463 tons in 1956, 9,861 tons in 1957 and 11,878 tons raw and 3,523 synthetic in 1958.

The consumption of both natural and synthetic rubber by manufacturers during 1957 was about 34,500 tons. The consumption of reclaimed rubber was 3,700 tons.

Consumption in 1958 was 34,765 tons.

RUBBER GOODS

India has a modern manufacturing industry. The variety of goods manufactured covers almost the entire range of requirements of the country. They include tyres and tubes of all kinds, footwear, water-proof rubberised fabrics, ebonite rods and sheets, latex foam cushioning and sponge, hoses of all types, V-belts and fan belts, rubber conveyor belting, and mechanical rubber goods.

Of these, the manufacture of tyres and tubes accounts for about 70 per cent of the total consumption of rubber and bulk of capital investment, followed by foot-wear with 15 per cent annual consumption.

In the case of the majority of these items, with the exception of tyres and tubes, considerable surplus capacity exists in the country.

The total investment in the industry is estimated at about Rs. 13 crores and the number of persons employed is about 21,800.

importing most of the rubber manufactured goods required in the country. At present, the export of raw rubber has not only been stopped but limited quantities are imported to supple-

ment indigenous production. On the other hand, rubber manufactured goods are exported to neighbouring countries and imports are very small.

(In lakhs of Rs.)

	Imports		Exports	
	1957	Jan.-Aug. 1958	1957	Jan.-Aug. 1958
Raw Rubber	420.11	264.08	1.62	0.27

Total	673.69	407.08	16.95	19.84

SERICULTURE AND SILK

SERICULTURE is carried on mainly as a subsidiary to agriculture.

In 1957 the total production of raw silk was 30,45,408 lbs. (Mulberry 24,18,853 lbs.; non-mulberry 6,26,555 lbs.). In 1956 the total production was 34,13,245 lbs.

The major portion of mulberry raw silk is produced in Mysore State. This State accounts for more than 70 per cent of the total output of mulberry raw silk in India. The other important States producing mulberry raw silk are West Bengal, Jammu and Kashmir and Punjab. The most important producers of non-mulberry silk are Assam, Madhya Pradesh, Orissa and Bihar.

While the average annual availability of raw silk was about 2.7 million lbs., the annual demand has been placed at 3 to 4 million lbs. by some of the producers' and consumers' associations.

About 64,961 lbs. of spun silk yarn and 58,678 lbs. of non yarn were produced in India during 1957. Out of the total output of silk waste of the order of 19,43,476 lbs. including mulberry and non-mulberry, 7,25,040 lbs. valued at Rs. 32,71,309 are exported to other countries on the recommendation of the Central Silk Board.

The demand for 1958 of spun silk yarn has been estimated at one lakh lbs. only by the Central Silk Board as against the Commission's estimate in 1953 of 1.5 lakh lbs.

On the basis of figures of production and imports of spun silk yarn, it was found that on an average the annual consumption of spun silk yarn for the three years from 1955 to 1957 was .89 lakh lbs.

Imports of spun silk yarn took place to the extent of .49 lakh lbs. valued at Rs. 7.14 lakhs in 1954, .32 lakh lbs. valued at Rs. 4.25 lakhs in 1955, .51 lakh lbs. valued at Rs. 7.4 lakhs in 1956 and .02 lakh lbs. valued at Rs. .39 lakh in 1957.

Protection to the industry would continue at the present level till the end of 1963.

Imports of fabrics were 3.64 lakh lbs. valued at Rs. 75 lakhs in 1954, 4.63 lakh lbs. valued at Rs. 91.87 lakhs in 1955, 1.18 lakh lbs. valued at Rs. 21.25 lakhs in 1956 and 2.58 lakh lbs. valued at Rs. 75.13 lakhs in 1957.

The State Trading Corporation of India (Private) Ltd., imported 2,35,085 lbs. during the licensing period July/December 1956 and January/June 1957.

A further import of 1,09,800 lbs. was arranged during the licensing period October 1957 to March 1958. The entire quantity of 1,09,800 lbs. was received in the Indian Ports during the period December 1957/February 1958.

Out of the above quantity of 3,47,885 lbs. releases to the tune of 2,17,703 lbs. were made as on 28th February 1958.

Exports of silk fabrics are freely allowed to all permissible stations.

The total area under mulberry is about 1,76,211 acres at present. Mulberry is cultivated both as rain-fed and irrigated crop. The yield of leaf per acre per year from rain-fed garden is about 4,000 lbs. Average yield per acre in irrigated mulberry gardens in 1957 was about 12,000 lbs. Whereas the yield per acre from mulberry graft garden was 20,000 lbs.

In Mysore there are about 2½ lakh families who are directly or indirectly engaged in sericulture industry. The total production of cocoons per year is about 900 lakh lbs. and the raw silk produced may be put at 19 lakh lbs. for Mysore. After reorganisation, Madras has lost its importance as a major sericultural area in the south.

Based on the area under mulberry, the total requirement of disease-free layings is estimated to be about 895 lakh layings per annum for Mysore.

CENTRAL SILK BOARD

The Tariff Commission submitted its Report on the Sericulture Industry to the Government of India in 1952.

In 1952-54, the Tariff Commission recommended extension of protection for 5 years from January 1, 1954. As the existing duty inhibited demand by creating a rise in the price of indigenous silk, the duties on raw silk and cocoons, silk yarn, yarn spun from silk waste, silk fabrics like pargos, fugi, etc. should be reduced to 30 per cent *ad valorem* exclusive of surcharge, while the existing rates of duty on silk waste and volla, yarn spun from silk volla and silk sewing thread should be continued.

The Government accepted the proposal for the extension of protection. It decided that the existing rates of duties should not be reduced, but, stated that the position would be kept under watch and suitable action would be taken when necessary.

The Central Silk Board was constituted by the Government of India in the year 1949 under the Central Silk Board Act, 1948. The Board is charged with the responsibility of organising the development of the silk industry in India. It examines the schemes of development formulated by the various State Governments and recommends grants by the Central Government for financing the schemes. The Board came under the administrative control of the Production Ministry on 16th June 1955. Since May 1957 when the Ministry of Production was abolished it has been under the control of the Ministry of Commerce and Industry.

The Board functions with its own funds drawn from the Government of India as grants-in-aid under the Central Silk Board Act. Though the Act empowers the Government of India to levy and collect as a cess an excise duty on flature raw silk and on all spun silk, it has not been considered advisable to invoke the provision of this section in the interest of the indigenous sericultural industry.

The head office of the Board was shifted to Bangalore with effect from 1st February 1957.

Two Officers belonging to the State Governments of Jammu & Kashmir and Mysore deputed to China for training in sericulture, i.e., silkworm seed production and silk reeling, have returned to India. It is proposed to depute three more officers to Japan for training under the Colombo Plan.

In order to lay a sound foundation for the proper development of the industry in all the States, the Central Silk Board emphasised the need to organise research in the more important sericultural States. It was also considered necessary that a small body of men, with considerable scientific knowledge, including those not immediately connected with the sericulture industry, should be formed to review the progress of execution of research in the States, thereby injecting new life into sericultural research, now being conducted in the country.

As part of its drive towards aiding and assisting the implementation of basic development schemes, the Board also arranged periodical visits to this country of eminent sericultural experts from overseas, particularly from Japan. Thus, during the year 1957-58, sericultural technicians in this country had the benefit of working as per the advice of Dr. Y. Tasima, Head of the Morphological Institute of Genetics Division, National Institute of Genetics, Mishima, Shizuoka, Japan, who toured the important sericultural regions in this country towards the close of 1957. Before leaving India, Dr. Tasima submitted a comprehensive Report on the Development of Silk Industry in India, with specific recommendations in respect of each State. The Report was expected to be published towards the end of October 1958.

Another Japanese Sericulturist to visit India during the financial year 1957-58, was Mr. Shobai Kameawa, Chief Secretary to the Committee of Sericulture and Silk Industry in Asia, Kyoto, Japan. Staying in this country for a year, Mr. Kameawa conducted experiments towards the improvement of silkworm rearing.

SECOND FIVE-YEAR PLAN

The Board's programme for the Second Five Year Plan is intended to achieve self-sufficiency in the silk industry by the end of the Plan period.

The capital outlay of the programme under the Second Five Year Plan is estimated at Rs. 5.0 crores which excludes a sum of Rs. 1.5 crores provided for the silk weaving sector. The total estimated outlay of silk and sericulture was Rs. 6.5 crores, as against a negligible outlay of Rs. 1.3 crores in the First Five Year Plan. The actual allocation has since been reduced to Rs. 4.48 crores.

Mulberry Silk: As regards mulberry silk, an important item in the development programme relates to the reduction in costs of cultivation of mulberry leaf through substitution of existing mulberry with high-yielding grafts in both rain-fed and irrigated areas, evolving of new varieties of mulberry of higher yield, and improvement in cultivation methods, manuring, etc. These and other measures for bringing about improvement in mulberry and cocoons will be supplemented by steps to modernise silk reeling, encourage substitution of improved basins for country *charhans* and converting the improved basins for flatures into multi-end basins, and introducing central cooking system and drawing chambers. Utilisation of by-products in the spun silk industry is necessary for the service of the reeling industry and steps are proposed to be taken to rehabilitate and extend the spun silk industry. And as an experimental measure, co-operative societies for raising young worms of the first and second stages collectively are to be established.

Non-Mulberry Silk: As regards non-mulberry silk, the development programme provides for plantations, as well as improvement of basic seed cotton production for eri, *wags* and *lassar*. The organisation of seed supply, improvement of spinning and reeling, marketing, and training and research will be undertaken more or less on lines similar to those for the mulberry silk industry.

State Schemes: The Government of India sanctioned for 1957-58 nearly 175 schemes whose grants amounted to Rs. 32,76,625 and loans amounted to Rs. 22,47,050 for the development of sericulture industry in the various States.

Mysore tops the list of States which received grants, with Rs. 8,42,137, while Assam, West Bengal, U.P., Bihar, Manipur and Jammu & Kashmir follow with grants amounting to Rs. 5,31,161, Rs. 4,81,956, Rs. 2,71,013, Rs. 2,01,150, Rs. 1,73,341 and Rs. 1,52,135 respectively.

STATES

In Andhra Pradesh a model rearing house is under construction in the silk farm at Salval in the Warangal district. The scheme has been in progress since September 1957. The farm is designed to demonstrate and train boys of aboriginal tribes in the Japanese method of mulberry cultivation and rearing of silkworms. For this and for providing working capital for the purchase of cocoons from the rearers a sum of over Rs. 48,000 as grants and loans has been sanctioned to the State. Assistance has also been given to the State to send its personnel for training in other silk-producing States. Sericultural demonstration and propaganda will be organised in the villages of Andhra.

Assam: A sum of Rs. 1,59,010 was sanctioned during 1957-58 towards the extension of the existing sericultural farms and grainages.

The construction of the building for the Sericultural Training Institute at Titabar is under progress. Towards this purpose a grant of Rs. 1,13,300 has been sanctioned to the State Government. Towards extension of existing sericultural farms and grainages in the State a sum of Rs. 1,59,010 was sanctioned as grants. Nearly 87,000 disease-free layings of mulberry and 5,000 disease-free layings of eri silkworm seeds were produced.

Bihar: Tassar rearers numbering 1,500 were given training in the rational methods of tassar silkworm rearing, reeling and spinning. A sum of Rs. 48,000 was sanctioned as grants to the State Government for Tassar Seed Supply Station, Chhabasa.

For establishing a Central Demonstration Silk Farm & Grainage at Mandi, Himachal Pradesh, a sum of Rs. 61,000 was sanctioned as grants to the State Government.

In Jammu & Kashmir, it is proposed to transplant 25,000 plants during 1954-59. A cold storage plant is proposed to be installed at Srinagar Grainage at an estimated cost of Rs. 70,000.

An important scheme, which the Central Silk Board is proceeding with, is that for establishing a Foreign Race Seed Station at Srinagar, which was initially sanctioned in 1950-57.

Under the scheme for departmental plantation for mulberry, 30,000 mulberry plants have been planted throughout the valley on selected sites.

In Mysore the Silk Testing & Conditioning House, Bangalore would soon have a building of its own, towards which a sum of Rs. 65,000 was given as grants during 1957-58. For conducting research on silkworm nutrition a sum of Rs. 25,000 was granted during the same period. Government Silk Filatures are to be modernised at an estimated cost of Rs. 1,37,000. Grants totalling Rs. 1,00,000 have been made towards the establishment of basic seed stations at Kunkul, Bhladi and Doddaballapur, in Mysore State.

At the Indian Institute of Science, Bangalore, research is being continued to establish the mechanism of action of Chloromycetin on silkworms. The food utilization studies, which formed part of this investigation, have been concluded.

Another important Central Scheme taken up during 1954 relates to the setting up of an All India Training Institute in Mysore.

Madras: Under the scheme for expansion of sericulture in Veppanapalli tirka and Rayakotah

range in Salem District, Madras, there has been an increase in the acreage under mulberry and also in the number of people to take to sericulture.

West Bengal: The implementation of the scheme for the establishment of the Foreign Race Seed Station at Kalimpong is progressing well. Under the scheme for young silkworm rearing at Jalalpur, 44,800 disease-free layings were reared up to second moult during 1957.

PRICES

The silk industry was greatly handicapped by the very high level of prices prevailing in the country during 1954-55. Though the landed price of silk was not very high, the actual sale prices were as high as Rs. 54 per lb. in April, 1954. The Government of India, therefore, considered that the best course would be to restrict imports through the agency of the Central Silk Board which should also be entrusted with the distribution of the Silk to the actual users, etc. The entire quantity of 2 lakh lbs. of raw silk imported by the Board in 1955, was lifted by the parties against full payment. The import and distribution of raw silk had a salutary effect in bringing down the prices of not only imported silk but also indigenous raw silk. The stabilisation of the market for silk has helped greatly in infusing a sense of security among the sericulturists. It has also enabled the States with the co-operation and assistance of the Central Silk Board to pursue the development programme for planned development of the industry.

With the stabilisation of the market for raw silk, it has been possible to ensure a steady and fair remuneration to silkworm rearers and cocoon reellers. The level of employment has also been maintained at a satisfactory level, giving part-time employment to nearly five million persons in the several branches of the industry in the villages.

Below we give some facts and figures relating to the industry for the year 1957:

Statement showing the acreage under mulberry cultivation and number of mulberry trees in India during the year 1957 (Provisional):—

State*	Acreage	Trees (No.)
Mysore	1,55,000	2,000
West Bengal ..	12,866	2,70,000
Jammu & Kashmir ..	.	25,00,000

SHIPPING INDUSTRY

IN 1958 there were in all 25 Indian shipping companies. The total number of ships was 141 and the total tonnage 630,000.

The companies had under construction at the end of 1958, 20 vessels with a total tonnage of 137,000.

When the ships are ready the total tonnage would be 767,000.

The Second Plan target is 900,000. There would thus be still a gap of 133,000 tons, without taking into account possible replacement.

The Second Plan allotment is Rs. 45 crores. In the First Plan the allotment was Rs. 26.3 crores.

At the beginning of 1958, 83 ships with a gross tonnage of 252,000 were engaged in coastal shipping.

At the end of 1958 the country had 362,000 tonnage in the overseas section.

Indian shipping companies now serve the following foreign trades:

India-U.K.-Continent, India-Persian Gulf, India-Australia, India-Japan-Far East, India-East Africa, India-Black Sea ports, India-U.S.A.

There are two Government-sponsored shipping corporations:

The Eastern Shipping Corporation and the Western Shipping Corporation.

The Eastern Shipping Corporation was registered on March 30, 1950 with a capital of Rs. 5.5 crores. It became a full-fledged state enterprise on Aug. 15, 1956.

It has now a fleet of seven vessels.

The Western Shipping Corporation was set up in 1956 with an authorized capital of Rs. 10 crores.

It has only one tanker at present on charter with the Burmah Shell.

In 1959 it was expected to acquire five or nine vessels ordered including a tanker.

It is intended that this Corporation should run the Indo-Polish Service and also function on the Persian Gulf Service. At a later stage it is to extend its operations to the Red Sea.

A great step forward in the development of Indian shipping was taken during 1957 when Government announced its decision to set up a non-lapsable Shipping Development Fund to provide an assured source of rupee finance for the expansion of Indian shipping. The Fund is composed of annual contributions from the Consolidated Fund of India, the quantum of which will be determined from year to year. Repayments against loans already granted to shipping companies are also to be credited to the Fund.

A sum of Rs. 1 crore was provided in the Budget for 1958-59 by way of contribution to this Fund.

Another significant step taken in the field of shipping was the establishment of a Shipping Co-ordination Committee in the Department of Transport. The Committee is intended to bring about better liaison between various Ministries of the Government of India and other Government organisations which have cargoes requiring transport, on the one hand, and the Indian shipping companies, on the other, so as to ensure the maximum utilisation of the available Indian tonnage.

It is hoped that this would result not only in the saving of considerable foreign exchange on freight but also give the necessary fillip for the expansion of Indian tonnage.

Three meetings of the Consultative Committee of Overseas Shipping Interests were held during the year when several important problems such as delays to ships at ports and shipping difficulties in overseas trades were discussed.

SHIPPING ACT

The Merchant Shipping Act 1958 was passed by the Lok Sabha on 17th Sept. 1958. It received the assent of the President on 30th October.

The Act provides for the establishment of a National Shipping Board and a Shipping Development Fund. It also provides for the safety and the efficiency of the merchant marine and the welfare of seamen and passengers.

There will be a Director-General of Shipping to administer the provisions of the Act. There will also be officers under the Act at all ports.

There will be a National Welfare Board for Seafarers to advise Government on welfare problems.

There will be a levy on passenger fares on certain types of ships. The money so collected is to be devoted to passenger welfare.

There will be such an office as that of a receiver of wreck to take possession of wrecked ships and discharge certain duties relating to the office.

There is provision for compensation to passengers suffering damage under certain circumstances.

The Act gives the Central Government authority to fix the rates at which any Indian ship may be hired and the rates which may be charged for the carriage of passengers or cargo by any ship engaged in the coastal trade.

An important provision is about the definition of an Indian ship, the rest of the regulations are concerned chiefly with consolidating much of the law already in existence.

An Indian ship is defined as follows:

For the purposes of this Act, a ship shall not be deemed to be an Indian ship unless owned wholly by persons to each of whom either of the following descriptions applies:—(a) a citizen of India or, (b) a company which satisfies the following requirements namely:—(i) the principal place of business of the company is in India; (ii) at least seventy-five per cent of the share capital of the company is held by citizens of India, provided that the Central Government may alter such minimum percentage; (iii) not less than three-fourths of the total number of directors of the company are citizens of India; (iv) the chairman of the board of directors and the managing director if any, of the company are citizens of India; (v) the managing agents, if any, of the company are citizens of India or in any case where a company is the managing agent the company satisfies the requirements specified in sub-clauses (i), (ii), (iii) and (iv).

(1) Every Indian ship unless it is a ship which does not exceed fifteen tons net and is employed solely in navigation on the coasts of India, shall be registered under this Act. (2) No ship required by sub-section (1) to be registered shall be recognised as an Indian ship unless she has been registered under this Act.

No person shall transfer or acquire any Indian ship or any share or interest therein without the previous approval of the Central Government.

Shipping Board

The National Shipping Board mentioned in the Act was set up on 1st March 1959. It consists of 20 members. They are:

Mr. G. L. Mehta (Chairman), Mr. Raghunath Singh, Mrs. Ila Pal Chowdhury, Mr. Bhawanji A. Khimji, Mr. Purushottamdas B. Patel, Mr. M. H. Samuel, Mr. Ajit Pratap Singh, Mr. O. Pulla Reddy, I.C.S. (Secretary, Ministry of Defence), Mr. S. S. Shiralkar (Joint Secretary, Ministry of Finance), Mr. K. B. Lal, I.C.S. (Additional Secretary, Ministry of Commerce and Industry), Dr. Nagendra Singh, I.C.S. (Joint Secretary, Ministry of Transport and Communications), Mrs. Sumati Morarjee, Mr. A.

Ramaswami Mudaliar, Mr. Vikramsinh S. Vallabhdass, Mr. Dinkar Desai, Mr. Bikas Majumdar, Mr. J. D. Randeri, Mr. Babubhai M. Chinal, Mr. Damodar Mathuradas Ashar, Mr. C. P. Srivastava (Member-Secretary).

HISTORY

The progress of Indian shipping is given in the following table:—

Year.	No. of companies.	No. of ships.	Tonnage (G.R.T.).
1948 ..	15	72	249,261
1949 ..	20	84	332,490
1950 ..	23	90	364,632
1951 ..	23	92	366,646
1952 ..	26	100	383,911
1953 ..	25	111	422,452
1954 ..	30	124	435,300
1955 ..	30	126	465,264
1956 ..	30	125	478,307
1957 ..	25	131	576,500
1958 ..	25	141	630,000

Towards the end of the Second World War, the Planning Department of the Government of India appointed a Policy Committee on Shipping. It observed: "India possesses a distressingly small number of deep sea ships which at the outbreak of the war stood at no more than 30 with a total of less than 150,000 tons gross. The rectification of this state of affairs should be one of the immediate post-war objectives."

This was followed by the constitution of a Reconstruction Policy Sub-Committee, with Dr. C. P. Ramaswami Aiyar as Chairman, in 1945. This Sub-Committee submitted its report in March 1947 which was approved by the Policy Committee. Its principal recommendations were:—

(1) India needs two million gross tons of shipping to carry more than 10 million tons of cargo and about three million passengers a year. The figure does not include country craft.

(2) Hundred per cent of the purely coastal trade of India, 75 per cent of India's trade with Burma and Ceylon and with geographically adjacent countries, 50 per cent of India's distant trades and 30 per cent of the trades formerly carried in Axis vessels in the Orient should be secured for Indian shipping in the next five to seven years.

(3) As the Indian shipping industry is still very young, emphasis should now be placed on how Indian companies can expand their fleets and the Indian Shipping Board should be empowered to control deferred rebates, rate-cutting and all other evils arising from monopolies.

The Government of India, by their Resolution dated July 12, 1947, fully endorsed the views of the Committee. They agreed that the definition of "Indian Shipping" should be shipping owned, controlled and managed by Indian nationals. They also laid down that the following conditions should qualify any shipping company for treatment as "Indian shipping companies":—

(a) The steamers of the companies should be registered at a port or ports in India. (b) At least 75 per cent of the shares and debentures of the companies should be held by Indians in their own rights. (c) All the directors should be Indian. (d) The managing agents, if any, should be Indian.

The subsequent developments may be summarised as follows:—

Plans for setting up three corporations, each with an authorised capital of Rs. 10 crores were announced in November 1947.

The coastal trade of the country was reserved in 1950 for Indian vessels in response to a public demand which had been made for the past 25 years. With effect from January 1, 1951, a new Indian Coastal Conference, consisting primarily of Indian shipping companies commenced functioning and the two British shipping companies became associated members.

FIVE-YEAR PLANS

Taking into account the financial resources available, a programme of development was formulated which aimed at raising the total gross registered tonnage to over 600,000 by the end of the period of the First Five Year Plan. In order to assist the shipping companies in replacing obsolete tonnage operating on the coast and expand Government had provided funds for constructing ships at Vishakhapatnam: a total of 100,000 G R T was expected to become available from this shipyard during the period of the First Plan.

At the beginning of the First Five Year Plan, India had a tonnage of 390,707 G R T. The target under the Plan was to add 215,000 G R T after allowing for obsolescence to the extent of 60,000 G R T, thus increasing the tonnage to 600,000 G R T by 31st March 1956.

On that date the actual tonnage stood at 440,000 tons but taking into consideration the tonnage on order in Indian and foreign yards the target was expected to be reached soon.

In the second Five Year Plan it is proposed that about 301,000 tons should be added after

allowing for obsolescence of 90,000 tons. Thus by the end of the Second Plan, the total tonnage is expected to reach 900,000 G R T.

With the achievement of this target, Indian tonnage is expected to carry at least 15 per cent of the country's overseas trade as against the present 5 to 6 per cent, 50 per cent of the trade with adjacent countries as against 40 per cent at present, besides 100 per cent of coastal trade.

In the First Plan a sum of Rs 19 crores was provided for shipping and this was subsequently raised to Rs 26.3 crores. Actual expenditure over the First Plan period was about Rs 18 crores.

In the Second Plan a provision of Rs 45 crores including the carryover of Rs 3 crores has been made for shipping expansion. The full amount has already been utilised in placing the orders for ships in Indian and foreign yards by the shipping companies in the private and public sector, though the tonnage ordered will be inadequate to enable the merchant marine to reach the proposed target of 900,000 tons.

As already mentioned Government has decided to establish a non-lapsable shipping development fund. The Fund will be built up through (1) annual contributions from the Consolidated Fund of India, (2) all repayment of loans advanced to Indian shipping companies, and (3) all payments by way of interest on such loans. The immediate effect of the constitution

of the Fund is that a sum of Rs. 7 crores representing the repayment of loans and interest charges will become available for further investment in the Second Plan period. This will be in addition to the Rs. 37 crores allotted under the Second Plan.

Another welcome decision the Government has taken is to introduce some uniformity in the rates of interest on its loans to the shipping industry. These rates of interest, which at present are 2½ per cent for the overseas sector and 4 to 4½ per cent in the coastal sector, will be changed into a uniform 'effective' rate of 3 per cent for all loans irrespective of the sector to which they are applied.

Sailing Vessels: A brief note on sailing vessels may be included.

According to the Sailing Vessels Committee's Report it would seem that sailing vessels continue to carry a substantial volume of cargo. It is estimated that 150,000 tons of shipping under sail consisting of about 2,000 vessels carry about a million to a million and a half tons of cargo every year. These vessels employ about 40,000 men, 2,500 masters, 2,500 mates and about 25,000 seamen. Taking the average cost of these vessels at Rs. 250 a ton, the capital outlay is computed at Rs. 4 crores.

SHIP-BUILDING

(See 'Hindustan Shipyard' under 'Government Industrial Undertakings')

SMALL-SCALE INDUSTRIES

Indian industry is made up primarily of small-scale rather than large-scale units. It is reckoned that there are about two crore persons engaged in small-scale and cottage industries.

The small-scale industry is primarily the responsibility of the State Government and not of the Centre. But the Centre supplements the efforts of the State Governments.

It set up six organisations to help promote small-scale industries :

The All-India Khadi and Village Industries Commission, the All India Handicrafts Board, the All India Handloom Board, the Small-Scale Industries Board, The Coir Board, and the Silk Board.

Under the First Plan the Central expenditure through the Boards was as follows :

Khadi and Village Industries : Rs. 15.2 crores, Handicrafts : Rs. 0.8 crore, Handloom : Rs. 12.2 crores, Small-Scale : Rs. 4.4 crores, Coir : Rs. 0.3 crore, Silk : Rs. 0.7 crore.

Under the Second Plan Rs. 200 crores are allotted for the development of village and small industries.

The allocation for handlooms is Rs. 59.5 crores, for khadi Rs. 16.7 crores, for village industries Rs. 34.8 crores, for handicrafts Rs. 9 crores, for small-scale industries Rs. 61 crores, for sericulture Rs. 5 crores, for coir Rs. one crore.

THE SET-UP

This article is about small-scale industries.

The Ministry of Commerce and Industry set up towards the end of 1954 a Division of Small-Scale Industries under a Development Commissioner.

Four regional service Institutes for technical help were set up almost immediately.

A National Small Industries Corporation for financial help and marketing came into being in Feb. 1955. The Development Commissioner is the chairman of the Corporation.

(For a report on the Corporation's work see under 'Corporations').

A small-scale unit has been defined as a unit employing less than 50 persons using power driven tools and equipment, or 100 persons without using power driven tools and equipment and having a capital of not more than Rs. 5 lakhs towards land, building, tools and equipment.

Match manufacturing co-operative societies, tailoring co-operative societies and sports goods manufacturing units are, however, considered as small-scale undertakings irrespective of the number of workers employed in them. But the capital investment in respect of these units also should not exceed Rs. 5 lakhs.

Considerable importance is attached to the development of small-scale industries in the Second Five-Year Plan for the production of consumer goods to meet the large increase in demand generated as a result of heavy investment expenditure.

FINANCES

A sum of Rs. 61 crores has been earmarked in the Second Plan for the development of small-scale industries.

Small-scale industries receive assistance both from the Central and State Governments.

The Government of India have set up four regional Small Industries Service Institutes at New Delhi, Bombay, Calcutta and Madras. There are branch institutes and extension centres at various places all over India.

The institutes render technical assistance to small industrial units in the fields of production, business management, marketing etc.

The National Small Industries Corporation Private Ltd., a Government of India concern,

has a scheme for the supply of machinery on hire purchase basis.

The Government of India do not give direct financial assistance to small industrial units. Loans are granted by the State Directors of Industries under the State Aid to Industries Act.

Medium and long-term loans are also given by State Finance Corporations or Co-operative Banks.

By the end of Sept. 1958, about Rs. 2.59 crores had been sanctioned and Rs. 1.74 crores disbursed to about 250 units.

In order to co-ordinate the activities of the various credit giving agencies, the State Bank of India has started pilot schemes in certain selected centres for assistance to small-scale industries. The State Bank is evolving a procedure whereby an applicant for credit instead of having to approach a number of agencies, has only to go to one local agency, whether it be a State Bank Branch or the State Finance Corporation, or a Co-operative Credit institution.

The local agency will receive and deal with applications for all types of loans.

The State Bank's pilot schemes are in operation in 52 towns.

By the end of December 1958 the Bank had sanctioned advances of over Rs. 2.38 crores to about 700 small industries units. Of this amount, the advances outstanding were Rs. 78.35 lakhs (Nov. 1958).

Of the total advances sanctioned, the Bengal Circle with five pilot centres accounted for Rs. 26.75 lakhs and the Bombay Circle with 12 pilot centres for Rs. 49.56 lakhs. The 26 pilot centres in the Madras Circle accounted for Rs. 68.26 lakhs and the nine pilot centres in the Delhi Circle for Rs. 75.99 lakhs.

ESTATES

Besides giving financial assistance, the State Directors of Industries are also concerned with the allotment of factory space in the industrial estates of their States and for securing power connection and distribution of essential raw materials.

About 580 factories have gone into production in about 43 estates which are still under construction. Seventy-two estates have in all been sanctioned. Twenty rural industrial estates have also been sanctioned for the development of agro-industries.

As regards marketing, the National Small Industries Corporation (Private) Ltd. and its subsidiaries undertake sales promotion on behalf of small manufacturers and carry out publicity for their products through its sales van operations.

The Corporation has also established sales depots at Khurja, Aligarh, Calcutta, Bombay and Agra to extend facilities for pooling, storing and bulk handling of the products of the small manufacturers.

The Regional Institutes carry out marketing and distribution aid surveys to solve small manufacturers' marketing problems and assist them in extending their markets.

INDUSTRIES AND LOCATION

The Office of the Development Commissioner of Small-Scale Industries, New Delhi, carried out a survey in certain areas. The findings of this survey are outlined below. The particulars that follow show the names of the industries and their location in the survey area :

Best Picked : Delhi, Amritsar, Agra, Kanpur, Bombay, Gwalior, Calcutta, Madras, Hyderabad. **Leather Footwear :** Agra, Kanpur, Delhi, Jullundur, Amritsar, Jaipur and villages of the region. **Sports Goods :** Jullundur, Meerut, Delhi, Bataha. **Electric Iron Lampholders Export Type :** Phagwara, Kapurthala, Goraya (Punjab), Ghaziabad (U.P.), Delhi, Sibsore, Calcutta. **Cotton Textile Machinery Spare Parts :** Ahmedabad, Bombay,

Bangalore, Coimbatore. **Hosiery :** Ludhiana, Amritsar, Baharanpur, Banaras, Delhi, Calcutta, Bombay, Ahmedabad, Nagpur, Indore, Gwalior, Belgaum, Tiruppur, Salem, Koshikode, Bangalore. **Surgical Instruments :** Ambala, Ludhiana, Jullundur, Delhi, Calcutta, Patna, Bombay, Madras, Palghat. **Automobile Leaf Springs :** Delhi, Calcutta, Bombay, Mysore, Kapurthala. **Automobile Batteries :** Calcutta, Howrah, Asansol, Bombay, Kolhapur, Madras, Bangalore, Hyderabad, Delhi, Kanpur, Agra. **Glass Scientific Apparatus :** Calcutta, Howrah. **Hand Tools :** Delhi, Districts of Musafarnagar and Meerut, Goraya, Jammu, Srinagar, Bataha, Amritsar, Jullundur. **Pedlocks :** Dawaleshwaram, Dharmavaram, Dindigul, Tilya Dam Site, Manpur (Bihar), Calcutta, Howrah, Distt. of Hoogli and 24 Parganas. **Builders' Hardware :** Madras, Madurai, Dindigul, Kumbakonam, Rajapalayam, Bombay, Poona, Surat, Rajkot, Jamnagar, Ahmedabad, Amritsar, Jullundur, Kapurthala, Delhi, Aligarh, Kanpur, Lucknow, Calcutta, Howrah, 24 Parganas. **Wood-Scrapers, Wire Nails, Penal Pins :** Calcutta, Howrah, Bhagalpur, Rajapalayam, Tiruchirappalli, Ernakulam, Quilon, Trichur, Trivandrum, Bombay, Nagpur, Rajkot, Bulsar, Amritsar, Ludhiana, Faridabad, Delhi, Kanpur, Lucknow. **Diesel Engines and parts :** Bombay, Poona, Kolhapur, Rajkot, Ghaziabad, Kanpur, Lucknow, Ludhiana, Phagwara, Moga, Jullundur, Delhi. **Glass Bangles :** Ghodgeri, Tarapur, Chichan, Kapadwanj, Ferozabad. **Agricultural Implements (Improved Types) :** Distt. of Patna, Gaya, Champaran, Bhagalpur, Burdwan, Bankura, Howrah, 24 Parganas, Darrang, Goalpara, Nowgaon, Sibsagar, Cuttack, Ganjam, Tripura, Patna, Ranchi, Ahmedabad, Anavali, Broach, Bulsar, Mhasana, Junagadh, Morvi, Rajkot, Gwalior, Savarkundala, Indore, Kakinada, Rajahmundry, Vishakhapatnam, Gulbarga, Hyderabad, Madras, Manapal, Trichur, Bataha, Goraya, Phillaur, Kanpur, Allahabad, Banaras, Jullundur, Amritsar, Delhi, Meerut, Alwar, Jodhpur. **Domestic Utensils :** Bombay, Poona, Nasik, Rajkot, Ujjain, Gwalior, Indore, Sibsore, Bataha, Jagadhari, Rewari, Phagwara, Jaudiala Guru, Amritsar, Moradabad, Banaras, Jaipur, Jodhpur and Nagpur, Rajahmundry, Vijayawada, Madras, Kumbakonam, Tiruchi, Karakkudi. **Electrical Porcelainware :** In and around Calcutta and Howrah, Delhi, Feroke and Ithikara. **Industrial Fasteners (Bolts, Nuts, Screws and Dogspikes) :** Howrah, Patna, Ambala, Gauhati, Naggaon, Ludhiana, Jullundur, Amritsar, Faridabad, Bataha, Goraya, Agra, Modinagar, Delhi, Bombay, Bulsar, Cuddapah, Ernakulam, Trivandrum, Kavilpatti, Madras. **Hand Tools :** Rajkot, Bombay, Bulsar, Jamnagar, Calcutta, Howrah, Furuli, Jhalda, Tanasai, Jorhat, Ranchi Distt., Madras, Thiruvananthali, Tiruchirappalli. **Machines Tools :** Bataha, Jullundur, Amritsar, Ludhiana, Delhi, Calcutta, Bombay, Ahmedabad, Harihar, Madras, Koshikode. **Beams Scales :** Dowlaishwaram, Trivandrum, Ernakulam, Nagoreoli, Narkeldanga, Baranagar, Bhangar Area, Delhi, Banaras, Allahabad, Aligarh, Kanpur, Ambala. **Glass Beads :** Ganjam Distt., Bombay, Poona, Amritsar, Aligarh, Ferozabad, Agra, Banaras, Purdilpur Area, Pappanaldupet. **Pedlocks :** Aligarh, Delhi, Kapurthala, Jullundur, Bapat. **Scientific Glass Apparatus :** Delhi, Ambala Cantt., Allahabad. **Sports Goods :** Jullundur, Meerut, Delhi, Bataha. **Soap :** Hyderabad, Palghat, Trichur, Tanjore, Coimbatore, Tiruchirappalli, Bangalore. **Sewing Machines & Parts :** Ludhiana, Bataha, Bassi Pathana, Delhi, Ahmedabad, Jubbulpore, Hyderabad, Calcutta. **Bicycles and Parts :** Madras, Madurai, Coimbatore, Rajapalayam, Hyderabad, Ernakulam. **Bicycles and Parts :** In and around Calcutta, Patna, Jamshedpur, Cuttack, Bombay, Nagpur, Poona, Ahmedabad, Rajkot, Indore, Gwalior, Ujjain, Ludhiana, Jullundur, Delhi, Bataha, Kanpur.

PRODUCTION

The present employment (middle of 1958) and the estimated annual production of small-scale industries are given below. These particulars are also taken from the survey made by the Development Commissioner's office and relate to the area surveyed :

Boot Polish (All India): 447; 9,736 cwts.
 Leather Footwear (Northern Region): 1,16,000;
 31* million pairs. Sports Goods (Northern Re-
 gion): 5,000; 88 lakh rupees. Electric Brass
 Lampholders Bayonet Type (All India): 312;
 16 5 lakh rupees. Cotton Textile Machinery
 Spare Parts (All India): 5,589; 3 crore rupees.
 Hosiery (All India): 53,924; 16 5 crore rupees.
 Surgical Instruments (All India): 915; 28 09
 lakh rupees. Automobile Leaf Springs (All India):
 1,000; 2,262 tons. Automobile Batteries (All
 India): 3,515; 95,000 numbers. Glass Scientific
 Apparatus (Eastern Region): 1,722; 47 4 lakh
 rupees. Hand Tools (Northern Region): 1,650;
 25 4 lakh rupees. Padlocks (Southern Region):
 449; 25 thousand dozen. Builders' Hardware
 (Southern Region): 600; 13 7 lakh rupees.
 Builders' Hardware (Western Region): 1,500;
 19 5 lakh rupees. Builders' Hardware (Northern
 Region): 2,000; 36 9 lakh rupees. Builders'
 Hardware (Eastern Region): 1,280; 37 8 lakh
 rupees. Wood Screws, Wire Nails, Panel Pins
 (Eastern Region): 955; 1,647 tons. Wood Screws,
 Wire Nails, Panel Pins (Southern Region): 255;
 6 9 lakh rupees. Wood Screws, Wire Nails, Panel
 Pins (Western Region): 503; 8 3 lakh rupees.
 Wood Screws, Wire Nails, Panel Pins (Northern
 Region): 645; 20 7 lakh rupees. Diesel Engine
 and Parts (Western Region): 812; 1,114 engines.
 Diesel Engine and Parts (Northern Region):
 1,501; 992 engines. Padlocks (Eastern Region):
 241; 5 3 lakh rupees. Glass Bangles (Western
 Region): 192; 0 4 lakh rupees. Glass Bangles
 (Northern Region): 6,070; 141 5 lakh rupees.
 Agricultural Implements—Improved Types
 (Eastern Region): 79,474; 34 2 lakh rupees.
 Agricultural Implements—Improved Types
 (Western Region): 2,400; 81 0 lakh rupees.
 Agricultural Implements—Improved Types
 (Southern Region): 1,981; 45 0 lakh rupees.
 Agricultural Implements—Improved Types
 (Northern Region): 1,894; 46,800 tons.
 Domestic Utensils (Western Region): 8,000;
 104 5 lakh rupees. Domestic Utensils (Northern
 Region): 41,400; 6 49,400 mds. Domestic
 Utensils (Southern Region): 2,098; 14 6 lakh
 rupees. Electrical Porcelainware (L.T.) (Eastern
 Region): 224; 325 tons. Electrical Porcelainware
 (L.T.) (Northern Region): 129; 134 tons; 1 8
 lakh rupees. Electrical Porcelainware (L.T.)
 (Southern Region): 209; 2 3 lakh rupees.
 Industrial Fasteners (Bolts, nuts, Rivets and
 Dogspikes) (Eastern Region): 2,600; 7,140 tons.
 Industrial Fasteners (Bolts, nuts, Rivets and
 Dogspikes) (Northern Region): 528; 2 614 tons.
 Industrial Fasteners (Bolts, nuts, Rivets and
 Dogspikes) (Western Region): 700; 1,766 tons.
 Industrial Fasteners (Bolts, nuts, Rivets and
 Dogspikes) (Southern Region): 329; 783 tons.
 Hand Tools (Western Region): 436; 14,547
 dozen. Hand Tools (Eastern Region): 1,650;
 14 7 lakh rupees. Hand Tools (Southern Region):
 63; 4 0 lakh rupees. Machine Tools (All India):
 4,400; 209 0 lakh rupees. Beam Scales (Southern
 Region): 291; 4 0 lakh rupees. Beam Scales
 (Eastern Region): 724; 8 7 lakh rupees. Beam
 Scales (Northern Region): 270; 4 0 lakh rupees.
 Glass Beads (Eastern Region): 8; 2 0 thousand
 rupees. Glass Beads (Western Region): 624;
 4 0 lakh rupees. Glass Beads (Northern Region):
 2,775; 27 0 lakh rupees. Glass Beads (Southern
 Region): 700; 9 0 lakh rupees. Padlocks
 (Western Region): 100; 0 9 lakh rupees. Pad-
 locks (Northern Region): 10,000; 27 0 lakh
 rupees. Scientific Glass Apparatus (Western
 Region): 22; 1 7 lakh rupees. Scientific Glass
 Apparatus (Northern Region): 170; 3 0 lakh
 rupees. Sports Goods (Northern Region): 5,000;
 88 0 lakh rupees. Soap (Southern Region):
 7 400; 32,000 tons. Sewing Machine and Parts
 (All India): 5 A; 40,000 machines. Bicycle and
 Parts (Southern Region): 600; 20 0 lakh rupees.
 Bicycle and Parts (Eastern Region): 986; 30 6
 lakh rupees. Bicycle and Parts (Western Region):
 335; 17 7 lakh rupees. Bicycle and Parts
 (Northern Region): 5,755; 199 0 lakh rupees.

MARKETING

As already mentioned the most important means for marketing the goods is the National Small Industries Corporation.

* Indigenous & Western style.

† Including Blacksmiths & Carpenters.

Some items are reserved for procurement by Government Purchase Departments exclusively from small-scale units. These are: padlocks, metal boxes, sign boards, metal buttons, badges, belt leather, cash bags, chappals and sandals, leather boxes and leather bags. Efforts are being made to add some more items to this list.

There are some items which can be procured both in the large-scale and small-scale sectors. For this group small units have a preference upto 15 per cent over the acceptable quotations from large-scale units, depending on the merit of the goods.

The number of small-scale industrial units considered capable of supplying various stores required by Government and enlisted with the Small Industries Service Institutes was 2,960 at the end of September 1958.

The total orders for the supply of goods to Government through the Corporation were worth Rs. 84 lakhs during the first six months of the financial year 1958-59.

In 1957-58 the total value was Rs. 62 15 lakhs.

Sales effected through the mobile sales vans of the Corporation fetched about Rs. 1 5 lakhs during the same period.

In addition, sales through the wholesale depots, set up by the Corporation, during the period were valued at over Rs. 6 74 lakhs (1957-58).

Under the van operation scheme, launched towards the end of 1955, there are now three vans operating in each of the four regions with headquarters at Bombay, Calcutta, Delhi and Madras.

These vans are stocked with goods selected for sales promotion, which are purchased directly from small manufacturers. They carry them to the doorsteps of consumers in small towns and villages.

The wholesale depots help to solve some of the marketing difficulties peculiar to small industrialists, such as the limitations imposed by lack of standardisation and lack of trade names.

There are seven wholesale depots, at Agra for leather footwear, at Khurja for pottery, at Bombay for paints and varnishes, at Calcutta for hosiery, at Benigantha for glass beads, at Aligarh for locks and hardware and at Ludhiana for sewing machines, cycles and woollen hosiery.

Here one should also mention the 24 pilot projects for cottage and small-scale industries initiated on April 1, 1956 in 24 community development blocks. The projects were started by the All-India Development Boards namely, the Khadi and Village Industries Commission, the All India Handloom Board, the Small-Scale Industries Board, the Central Silk Board, and the All India Handicrafts Board.

The projects cover 12,300 villages, with an area of 16,800 sq. miles, and a population of six million.

Each of these projects has a number of training centres. The total number was 148 on March 31, 1958.

The value of the goods produced at the pilot projects was over Rs. 226 lakhs in the two years ending March 31, 1958.

SERVICE INSTITUTES

Economic and commercial information useful to small industrialists, who want to start new industrial units, is provided by the Small Industries Service Institutes set up by the Government of India.

The Institutes give broad outlines of the potentialities of different small-scale industries. They supply information on the number of existing units, their production and installed capacities as well as the present consumption, future demands and export possibilities for their products.

Information about the working capital required for a new unit, suppliers of machinery and raw materials, and markets for the sale of products, is also made available by the Institutes.

There are 14 Small Industries Service Institutes in the country.

They are located in New Delhi, Bombay, Calcutta, Madras, Agra, Jaipur, Ludhiana, Bangalore, Indore, Rajkot, Patna, Cuttack, Gauhati and Srinagar.

Small manufacturers and entrepreneurs may contact their nearest Institute for obtaining the information they require.

To meet general enquiries a small booklet entitled "Information for Small Industrialist" has also been published by the office of the Development Commissioner for Small Scale Industries, Ministry of Commerce and Industry.

The booklet, besides describing the organisational set-up for the development of small industries, details a number of concessions and facilities offered by Government to small industrialists.

The Institutes have secured the services of 13 foreign technicians and consultants with the assistance of the Ford Foundation. These experts are concerned with furniture designs, machine tool designs and the manufacture of clocks, surgical instruments and electric motors.

The Institutes have also 47 mobile demonstration vans fitted with modern machine tools and equipment. They are equipped for demonstration in blacksmithy, carpentry, shoe-making and leather goods, sheet metal products, glass industry, enamelling, pottery, general engineering and electroplating.

The vans tour the rural areas for demonstration of modern machinery and techniques for various operations and processes.

Inquiries are received by the National Small Industries Corporation for hire-purchase of the machines displayed.

During the first six months of the current financial year 466 centres were visited by these vans and about 1,750 artisans were trained in the operation of machines and tools.

It is estimated that in the first half of the financial year 1957-58, about 10,000 small industrialists were given technical advice by the Service Institutes. About 3,500 parties were given information about new industries which they were proposing to start. Over 8,000 were given such assistance as the supply of marketing survey reports, enlistment under Government purchase programmes and recommendations for the supply of machinery on a hire-purchase basis.

The addresses of these Institutes, some major* some branch are given below:

Northern Region

Regional Institute: 56, Sunder Nagar, New Delhi.

Major Institutes: B-XV-1679, Ferozepur Road, Ludhiana; Mirza Ismail Road, Jaipur; 616, Mandi Syed Khan, Agra; School of Design Building, Karamnagar, Srinagar.

Branch Institute: 18 Colvin Road, Allahabad.

Western Region

Regional Institute: 40-40A, Cowasji Patel Street, Bombay.

Major Institutes: Land Mortgage Bank, New Building, Rajkot; Govindram Seksaria Technical Institute Building, Opp. Nehru Park, Indore; 193, 6th Cross Road, Gandhi Nagar, Bangalore.

Branch Institutes: Bachi Lodge, Chib Road, Hubli.

Eastern Region

Regional Institute: 4, Camac Street, Calcutta.

Major Institutes: Brookshire Path, Patna; Tinkonia Bagicha, Cuttack; Bharalumukh, Gauhati, Assam.

Southern Region

Regional Institute: 20, Rutland Gate, Madras.

Major Institutes: Iftakar Mansion, 79, Attambad, Hyderabad; Near Police Parade Grounds, Trivandrum.

Extension Centres

Punjab: Bawari, S.I.S.I. Extension Centre (for Leather & Metal Industry); Ambala Cantt., Shiv Nivas, Panjabi Mohala (for Scientific glassware); Batala, 9, Guru Nanak Nagar (for Foundry and Agricultural Implements); Faridabad, S.I.S.I. Model Workshop, near Railway Station (for Carpentry).

U.P.: Ferozabad, S.I.S.I. Extension Centre, Park Buildings (for Pressed Glassware and Bangles); Meerut, 291, Garh Road (for Sports goods).

New Delhi: (Bal Sahyog), Connaught Circus, New Delhi (for Tailoring, Tinsmithy, Wood working, Can-making).

Bombay: Kolhapur (for Carpentry, Forging and heat-treatment); Jamnagar (for Electroplating), Khanapur (for Potterywares).

West Bengal: Tanar, 33 7, North Tapasala Road, Tangra, Calcutta-19 (for Tannery); Habra, 24-Parganas (for Model Blacksmithy Workshop); Barul-Pore, 24-Parganas, Piali Nagar (for Model Carpentry Workshop), Calcutta, 58/5, B.H.T. Road, (for Leather goods).

Madras: B. P. Agraharam, Erode (for Leather Finishing).

Kerala: Westfort, Trichur (for Footwear).

Ford Foundation

It is necessary to mention here that the Ford Foundation played an important part in the setting up of these Service Institutes. The Foundation was in fact the chief inspirer of the idea.

In May 1954 an International Study Team made certain recommendations to the Indian Government on the development of India's small industries. The Team, which had come with Ford Foundation sponsorship at the invitation of the Government, had been asked to make recom-

mendations on setting up a small industry research and service Institute.

The International Team's key recommendations were for setting up four Regional Small Industry Service Institutes with branches and extension sub-units to develop and teach use of new production methods and tools to small industries all over the country.

A further recommendation was for a National Small Industries Corporation which would assist small manufacturers commercially—with credit to buy raw materials and with marketing of products, especially through channelling of Government procurement.

The Ford Foundation in 1955 gave a grant of \$1,300,000 to equip the Institutes. In the early fall of 1954 two consultants provided by the Ford Foundation from the Bureau of the Budget and the Small Business Committee of the U.S. Senate, drew up an organisational plan for a National Small Industry Corporation.

In a second major grant to the Indian Government of \$2,163,000 in December 1957 the Ford Foundation gave support to the setting up of these two additional tiers of the extension system and supplementary funds for equipping the four initial Institutes.

In the extension work in many specialized fields, assistance had been taken from European technicians. Under Ford Foundation grants to the Government, till the end of 1958, 20 foreign consultants had been engaged largely from the U.K., Germany and the Scandinavian countries. The consultants have been in the following fields: footwear, electric motors, machine tools, wood carving, surgical instruments, clocks, furniture design, electro-plating, locks, electro appliances, and design instruments.

To assist in the overall problems of developing small industries, the Ford Foundation had at the Government's request brought till the end of 1958 three programme consultants in small industries, one from the U.S., and two from France and, through a grant to Stanford Research Institute, California, enabled Stanford to provide industrial economists principally to assist the NSIC in economic and market research.

FUTURE PLANS

Arrangements are being made to establish a major institute for small industries operating as an extension centre in every one of the 14 States by the end of 1959.

Recruitment of staff is already under way.

Another important step being taken by the Government to accelerate the development of

small industries is to establish one specialised technical centre for small industries in each State to be located in an industrial estate.

The Indo-German machine tool prototype centre at Okhla (Delhi) will be ready by 1960. The T.C.M.-assisted centre at Rajkot is progressing. An Indo-Japanese foundry and light engineering centre at Calcutta is under negotiation. A Swiss team was due to discuss the establishment of a technical training centre for the watch industry. The French Government has offered to co-operate in setting up a precision instrument production centre at Guindy, in Madras. A regional institute has been started in Bombay with Soviet help. Other centres may also be established with Polish and Australian assistance.

These centres will train Indian technicians in the manufacture of precision instruments and the production of proto-types for small industries. There will be one centre for each State.

The development of small industries has also revealed a large fund of inventive skill among artisans and craftsmen. A number of new instruments and machines have been designed and manufactured with promising results. In order to encourage this trend, the Government proposes to constitute a board for the promotion of small inventions. The Board will help with development and research and will award suitable prizes for successful inventions after due experimentation and trial.

Another line of action will be to try and induce large industrial units to place ancillary orders on small plants instead of burdening themselves with trying to manufacture a whole range of parts and fittings.

The techniques practised by small industries abroad are also to be studied.

The Planning Commission proposes to send a small team of experts to China. It is also proposed to send an expert team to Japan to study the methods of financing small industries by scheduled banks and governmental and non-governmental agencies.

The National Productivity Council was to send abroad a 12-man team to study the latest developments in productivity, methods and organisation in small industries in a number of countries.

A suggestion for the establishment of a nationwide federation of associations of small industries is also under consideration.

The growth of industrial estates will also help the growth of small-scale industry.

STEEL INDUSTRY*

THE first successful and the most outstanding attempt to manufacture steel in the country on a commercial basis was that of the Tata Iron & Steel Co. which started its Steel Works at Sakchi in the year 1906. Pig iron was made in 1911 and the first steel ingot a year later.

The Indian Iron & Steel Company was started in 1918 at Hirapur about 4 miles from Anasol junction on the Eastern Railway for producing pig iron. Eighteen years later it floated another company, the Steel Corporation of Bengal to manufacture steel. Towards the end of 1952 the two companies were merged.

An iron works was started at Bhadravati in Mysore State in 1951 to which a steel plant was added in 1954. During World War II, a 25-ton basic furnace together with two small electric furnaces were installed.

The combined capacity of all these three factories in August 1958 stood at 2,972,000 tons of pig iron and 1,780,400 tons of finished steel.

The total capital investment in the private sector is about Rs. 191 crores and the number of workers employed about 60,000. Of the total investment, Tatas account for Rs. 135 crores and the Indian Iron and Steel Co. for Rs. 56 crores.

In the public sector there is the Hindustan Steel (Private) Ltd. re-formed on April 1, 1957. The shares are owned wholly by the Central Government. The authorized share capital is Rs. 300 crores.

Under Hindustan Steel three plants are under construction—at Rourkela in Orissa, Bhilai in Madhya Pradesh and Durgapur in West Bengal.

Each of these has a production capacity of about a million tons with scope for increase. Rourkela and Bhilai are to go into production in Oct. 1959, while Durgapur will not be completed till about the middle of 1961.

(For details see under 'Government Industrial Undertakings').

The recent trend of production in India is given below:—

Year.	Pig Iron.	Steel Ingots.	Semi-finished steel.	(000 tons) Finished steel.
1951	1,709	1,500	1,249	1,076
1952	1,685	1,578	1,308	1,103
1953	1,655	1,507	1,230	1,018
1954	1,793	1,685	1,452	1,243
1955	1,757	1,704	1,457	1,260
1956	1,807	1,738	1,464	1,337
1957	1,789	1,715	1,440	1,348
Jan-July 1958	1,114	1,012	849	748

A scheme envisaging the establishment of steel plants as small scale industry in those regions which have rich iron deposits is now under the active consideration of the Government of India.

* See also under 'Government Industrial Undertakings'.

A team of experts is to be sent to China and Japan to study the working of the industry there.

If the scheme eventually materialises it is likely that it will be initiated in Baladilla in the Bastar District of Madhya Pradesh which is rich in iron ore deposits.

PRICES

Since 1924 there have been three main tariff enquiries into the case of the iron and steel industry—in 1924, 1926 and 1934. In between there were three supplementary enquiries and five special enquiries for the subsidiary industries in India.

The scheme of protection sanctioned as a result of the tariff enquiry held in 1934 was to remain in force for seven years till 31st March 1941. Before, however, this protection expired, World War II intervened, and the protective duties on imported steel were continued from time to time by continuation Acts, the last extension being for a period of one year till 31st March 1947.

Alloy, tool and special steel were protected upto 31st Dec. 1955.

Since the war in 1939 the price and distribution of steel have been controlled by the Government.

The prices of all controlled categories of steel were raised by Rs 70 per ton uniformly in May 1957. The increase followed the enhancement of excise duty on steel from Rs 4 per ton to Rs 40 per ton with effect from 16th May 1957.

The retention prices of steel produced by the Tata Iron and Steel Co. were raised by an average figure of Rs. 32 per ton for 1952-53, Rs. 47 per ton for 1953-54 and Rs. 87 per ton for 1955-56 as a sequel to an inquiry by the Tariff Commission.

For the Indian Iron and Steel Co., the Tariff Commission submitted a report in 1954. It recommended an increase of Rs. 66 per ton for the period 1951 to 1956. But the Government decided on an average increase of Rs. 59 per ton and fixed the period from 1953 to March 31, 1955 and a further increase of Rs. 15 per ton for 1955-56.

On 13th October 1953, the Government of India announced an increase of Rs. 14 per ton in the retention prices paid to the Tata Iron and Steel Company and the Indian Iron and Steel Company.

The increase is on top of an increase of Rs. 12 per ton announced in July 1957. The latest increase, like the one granted in 1957 will be equated over the entire period of five years 1955-56 to 1960-61. This does not, however, take into account the additional excise duty levied on 16th May 1957. Adjustments to compensate this increase is allowed only on despatches from that day.

Based on the effect on finished steel, the incidence of the additional duty comes to Rs. 45 74 per ton, such being adjusted from the date of levy.

It was in February 1956 that the Tariff Commission fixed the retention price at Rs. 393 per ton for the five-year period 1955-56 to 1960-61. Since then, excluding the incidence of excise duty, the increase in retention price (to compensate for the rise in costs) granted to companies has been Rs. 26 per ton.

This brings the present retention price of steel to Rs. 419 per ton. If the incidence of excise duty is also taken into account, the retention price comes to Rs. 464 74 per ton.

Retention prices for tin plates were also revised during 1954 and on the recommendation of the Tariff Commission, they were fixed at Rs. 307 per ton for 1953 the same level as for 1952 and were reduced to Rs. 762 9 per ton for 1954-55.

The sale prices of pig iron was raised by Rs. 60 per ton with effect from 11th June 1956, in order to accommodate the enhanced retention prices payable to producers, to provide funds for sale at uniform prices at all rail heads, and to finance pig iron imports on a subsidised basis.

RAW MATERIALS

The important raw materials are iron ore, coking coal, manganese ore, refractories made from magnesite, dolomite, chromite, fireclay, etc. and fluxing materials like silica, limestone and fluor-spar. Sulphur is also required for the manufacture of sulphuric acid.

In regard to most of these raw materials, India enjoys a favourable position. The deposits of iron ore are plentiful and of a superior quality, the average iron content of the ore being as much as 68 per cent as compared with 40 per cent in Europe and 50 per cent in the U.S. This is also true of manganese ore, magnesite and dolomite. Known deposits of coking coal are estimated at between 1,500 and 2,000 million tons.

The principal raw materials brought from abroad are spelter for galvanising, tin for tin plates, ferro-tungsten, nickel, chromium and fluor-spar. Deposits of fluor-spar are located in Madhya Pradesh; but they are yet to be exploited.

As raw materials account for nearly 80 per cent of the cost of pig iron and 60 per cent of the cost of finished steel, they provide the explanation for the low cost of steel produced in India.

RE-ROLLING MILLS

The re-rolling mills manufacture a variety of products from blooms and billets.

In addition to these, a few are manufacturers of special products such as tin plates, wire and wire products, fish plates and spikes, bars and rods, bolts and nuts, rivets, spring steel, hoops and strips and are called "secondary producers". Their number during the First Plan was eight.

At the end of 1955, there were in existence 142 re-rollers—20 registered rollers and 122 unregistered re-rollers—with an annual capacity, on a three-shift basis, of 335,000 tons and 383,000 tons respectively. Their output has been as follows.

	Registered (Tons)	Unregistered (Tons)
1951	73,179	23,510
1952	68,636	25,426
1953	83,349	28,554
1954	109,332	37,068
1955	120,306	53,336

The existing capacity of the re-rolling mills of various categories, including secondary producers as on 1st November 1955 was about 700,000 tons per annum on one shift basis.

The Government of India has agreed to the setting up of four new steel re-rolling plants, one each in Kerala, Andhra, Assam and Bihar.

In addition, some plant and machinery have been licensed by the Iron and Steel Controller to be obtained from abroad or indigenously, mainly for replacement. There is reason to believe that most of the plant and machinery now to be arranged will have the effect of increasing the capacity of the re-rolling units. Such additional capacity has been assessed at 104,760 tons per annum and may be taken as the projected additional capacity.

While the major part of the existing capacity is based on the use of billets, quite a few units, particularly smaller units, depend on re-rollable scrap for their operation. Re-rollable scrap is not the proper material for the manufacture of quality product, but its use will be continued in mills below 8" sizes. These can operate economically on re-rollable scrap. The capacity of such units which can suitably run on re-rollable scrap is 26,500 tons per annum. The remaining capacity should be taken as based on billets. It comes to 1,325,766 tons on double shift.

The re-rollers at places like Amritsar, Jalandhar, etc. situated at considerable distance from the ports had to incur heavy freight charges which inflated their production costs. Relief was given to them from May 1954 through the fixation of a maximum freight charge at Rs. 60 per ton. Similarly in 1954-55 the Government extended the port prices to Jamshedpur and Burnpur to encourage the growth of industries in the vicinity of steel plants.

EXPANSION

The target for the Second Plan is six million tons of ingot steel or about 4.7 million saleable steel. This target will be achieved partly through the expansion of existing plants as follows:

Tata Iron and Steel from the existing 780,000 tons to 1,500,000 tons.

Indian Iron and Steel Co. from 330,000 tons to 800,000 tons.

Mysore Iron Works 30,000 tons to 100,000 tons.

And partly through the coming into operation of the three plants in the public sector now under construction:

Kourkela	730,000 tons
Bhilai	770,000 "
Durgapur	790,000 "
Total 4,680,000 tons in all.	

In all, the steel expansion programme is estimated to cost around Rs. 439 crores.

The Tata expansion plans were to take place in two stages, first to 850,000 tons, and then to 2,000,000 tons of steel ingots to be rolled into 1,500,000 tons of finished steel. About 50 per cent of the programme had been completed by April 1958.

The company obtained for this purpose two loans from the World Bank totalling 32.5 million dollars and one from the Government of India of Rs. 10 crores.

The expansion is being undertaken through agreement with Henry J. Kaiser Co of California, U.S.A.

Early in 1957 the first stage of the expansion scheme was reached when two 100-ton open hearth furnaces were put into operation.

The Indian Iron and Steel Co. has obtained from the World Bank two loans totalling 50 02 million dollars to meet the foreign exchange cost of the expansion programme. The Central Government has given a loan of Rs. 7.9 crores and a special advance of Rs. 10 crores.

The first of the two new blast furnaces went into operation in Feb. 1958 and the second was expected to go into production at the end of 1958.

(For the Mysore Iron and Steel Works see under 'Government Industrial Undertakings').

The total output of saleable steel during the Second Plan period is estimated at about 11 million tons as against the overall requirements over the five years assessed by the Planning Commission at about 17 million tons. Production will be equal to the demand only in the last year of the Plan.

To relieve shortage due to the wide gap that exists between the demand for steel and the supplies available from internal sources, there have been sizable imports of steel amounting to about 177,000 tons in 1951, 195,000 tons in 1952, 247,511 tons in 1953, 287,401 tons in 1954 and 304,000 tons in 1955. Of this, the imports of steel during the years 1952-53 and 1953-54 under the T.C.A. programme amounted to 12,326 tons and 97,784 tons respectively, while imports in 1954 totalled 119,250 tons.

The aggregate imports of steel during 1957 amounted to 15.4 lakh tons as against 18 lakh tons in 1956. Arrangements had been made with various countries, including the U.S.S.R., W. Germany, Japan, the U.K., Poland, China, Belgium and Yugoslavia, for the supply of steel during the period 1954-56.

An agreement has been signed with the Soviet Union for the supply of one million tons of steel in the first three years of the Plan period.

During 1956 about 216,000 tons of steel costing Rs. 10 crores might be imported under the agreement.

India has also asked for a loan of one million tons of steel from the U.S.A.

During the First Plan, exports of steel were mainly restricted to obligations arising from bilateral trade agreements and other inevitable commitments. With the completion of the steel development programmes, Indian steel should be available for export, especially to the whole of South-East Asia. The Second Plan envisages an export target of 2 lakh to 3 lakh tons of steel in 1960-61.

SUGAR INDUSTRY

THE sugar industry is the second largest industry in India, next only to the cotton textile industry, with a capital of about Rs. 73 crores of which about Rs. 30 crores is fixed capital and Rs. 43 crores working capital. The annual value of the industry's products for 1956-57 is about Rs. 165 crores.

On the basis of an average operating season of 120 working days and assuming a recovery of 10 per cent sugar, the rated capacity of the 168 factories existing in 1957-58 is estimated to be over 2.30 million tons of sugar per annum. This is expected to rise to 2.5 million tons in 1960-61. The target for 1958-59 is 2.2 million tons.

The labour employed in sugar factories is roughly 140,000 skilled and unskilled workers, and about 3,000 University-educated men. The total earnings of these workers represent about 5 per cent. of the national wages and salaries. The industry supports 20 million cultivators. It accounts for 12 per cent of the total value of production of major industries and contributes over Rs. 65 crores (at Rs. 13-19 per maund) in levies to the national exchequer.

A Central Wage Board for the sugar industry was appointed in December 1957.

The growth of the industry is attributable to the protection given to it in 1932. The import duty in pre-war years was as much as Rs. 9-4 per cwt., of which Rs. 2 represented the quantum of the excise duty on indigenous production. Protection was continued till 1950.

It has a considerable influence on the agricultural economy in so far as it brings additional remuneration to those who take to the cultivation of sugarcane.

The economy of Uttar Pradesh and Bihar is particularly tied with the development of this industry since 70 per cent of the sugar production is in these two States.

The industry also produces a variety of raw materials for other industries such as power alcohol, paper, paper board and straw board.

The industry has so far developed in the private sector, the only exception being some of the former Indian States in which the State Governments substantially contributed to its development by financial participation and in other ways.

The year 1952 was notable for an innovation inasmuch as the first factory was built by cane producers on a co-operative basis in the Ahmednagar District in Bombay State.

SUGAR PLANTS

Six firms are licensed to fabricate complete sugar plants in collaboration with foreign manufacturers. Foreign exchange would be released to equip the workshops of these firms.

The production of sugar machinery has been as follows: 1955: Rs. 19 lakhs, 1956: Rs. 33 lakhs, 1957: Rs. 163 lakhs, 1958: Rs. 200 lakhs, 1959: Rs. 320 lakhs (estimate).

It has been agreed that the firms would deliver 12 complete plants—four in the season 1960-61 and eight in 1961-62. All but one of these are for co-operatives.

There will be two consortiums of manufacturers—the first consisting of Messrs. Walchandnagar Industries, TRIMACO and Indian Sugar and General Engineering Corporation, and the second consisting of K.C.F. Ltd., Binny and Co. and New India Development Corporation.

Each of the plants will have a daily crushing capacity of about 1,000 tons to 1,500 tons with a provision for expansion to 1,500 tons except the one unit of Messrs. Bist Industries Corporation which will have a capacity of 2,000 tons.

The total value of the order will be Rs. 11 crores, the indigenous content of each unit will be 75 per cent.

The capacity to manufacture 12 units a year would make the country self-sufficient.

The first four co-operative societies would start production in 1960-61 and the rest in 1961-62.

Each society will raise Rs. 20 lakhs from the agriculturist share-holders. The balance will be raised as loans from the Industrial Finance Corporation, the State Apex Co-operative Banks and participation of State Governments.

Of the eleven Co-operative factories, four will be in Andhra, two each in the Punjab and Bombay and one each in Mysore, Orissa and U.P.

The Government of Bombay is giving active support and encouragement to the establishment of co-operative mills by contributing to the share capital of these concerns. In 1957 there were five units in the State. At the end of the Second Plan period there would be 18 producing two lakh tons of sugar annually.

No new licences were issued in 1958-59 for more factories. But 23 new factories with an annual production capacity of about 2.61 lakh tons went into production in Jan. 1959. Six more with an annual capacity of 72,000 tons would go into production later and seven with the same capacity in 1959-60.

It may be mentioned here that 79 factories have farms of their own—the total area of the farms being 2.28 lakh acres.

The details of sugar production are given below:—

Year Ended October	Installed capacity (Lakh Tons)	Sugar output (Lakh Tons)
1951	15.40	11.16
1952	15.40	14.97
1953	15.40	12.94
1954	15.40	10.01
1955	15.40	15.90
1956	17.40	18.62
1957	19.60	20.29
1958	21.50	22.00

PRICE

The excise duty on sugar remained unchanged at Rs. 11-25 per cwt. during the season 1957-58. With effect from 14th December 1957, sugar has, however, been subjected to the levy of an additional central excise duty of Rs. 3-31 per cwt. in lieu of the States sales tax. In converting the sales tax into excise duty thus, the Government increased the incidence by As. 3 per maund. The main features of the Sugar policy for 1957-58 were the same as those of the policy for 1956-57 and 1955-56. They were as follows:

No change in the minimum price for sugarcane Rs. 1-7 (Rs. 1-44) per maund for gate deliveries and Rs. 1-5 (Rs. 1-31) for deliveries at rail centres.

Regulation of releases on monthly quota basis.

No statutory control on price or distribution of sugar, *per and elsewhere*.

On complaints of excessive rise in ex-mill rates, after the announcement of export quota, contrary to the undertaking given by the Committee of I.S.M.A., on 30th July 1958, however, the Government of India fixed the ex-factory price for sugar at Rs. 36 per maund for U.P. and North Bihar mills and at Rs. 36-50 for mills in the Punjab. These prices apply to I.S.S.D. 20 grade sugar, with prescribed price differentials

for other grades. The Government also announced the decision to requisition and distribute sugar at stipulated prices on ex-factory basis, as well as to despatch sugar to out-station centres on freight-to-pay basis, the allotments being made at fixed f.o.r. destination prices to four important centres—Bombay (Rs. 39-00 per maund), Calcutta (Rs. 38-00), Kanpur (Rs. 36-75) and Delhi (Rs. 36-50).

The basic minimum price for sugarcane continues to be the same as that in force during the last five years, that is, at Rs. 1-44 per maund for delivery at the gates of factories and at Rs. 1-31 for delivery at rail centres. There should be a deferred payment of an amount which may be found due under the formula prescribed by the Government for linking the price for cane with that of sugar realised by the factories concerned. Announcing the above policy, the Union Ministry of Food and Agriculture observes

"The basic minimum prices are the same as have been in force during the last five years. An expert committee under the chairmanship of Mr. P. A. Gopalakrishnan, appointed to examine the price-linking formula adopted in the 1953-54 season and suggest modifications if any for the improvement, considered the formula sound in principle and recommended its application with certain modifications on a compulsory basis. The formula as recommended by the Committee has been accepted by the Government for adoption on an all-India basis unless any alternative scheme is applied in a State or region by the State Government concerned with the previous approval of the Central Government."

EXPORTS

On the 27th June 1958, the Government of India issued an Ordinance for promoting the export trade in sugar. It empowered the Government to release specified quantities of sugar for export and to fix export quotas of individual mills in proportion to their production. Provision was also made for channelling export through a single organisation with a view to avoiding competition among the sellers and to earning the best available price for sugar exported abroad.

The Government released a quantity of 50,000 tons of sugar for export during the 1958 season. All sugar factories in the country were required to deliver their export quotas to the Indian Sugar Mills Association, Calcutta, which was appointed as the export-agency for the purpose. Any factory which failed to deliver its quota in whole or part must pay an additional excise duty of Rs. 17 per maund on the quantity of sugar in respect of which default took place before the same was released for sale in the internal market. The sugar factories were paid for the quantity delivered by them to the agency at a uniform rate based on the net price realised by the Export Agency from the sale of sugar. The average loss on the export of the declared quota, it was said, might not be more than annas eight per maund on the quantity of sugar in stock with the factories.

India participated in the thirty-three-day deliberations of the International Sugar Conference convened under the auspices of the U.N. which concluded at Geneva on 24th October 1958. India joined the World Sugar Agreement as a member and has been allocated an export quota of 100,000 tons.

On 30th September 1958, the Government of India requested the Tariff Commission to make a fresh examination of the cost structure of sugar manufactured in India and to submit a report on the fair price payable to the sugar industry. The Commission was asked to submit a preliminary report within three months (that is, before 20th December 1958) on the allowances for rehabilitation charges and profits and a final report covering the other items as early as possible thereafter.

The State-wise production in the two seasons 1956-57 and 1957-58 is given below :—

States	Sugarcane crushed (1,000 tons)		Sugar produced (1,000 tons)	
	1956-57	1957-58	1956-57	1957-58
Uttar Pradesh	11,152	9,485	1,080	942
Bihar	3,327	2,770	312	275
Bombay	2,070	2,857	240	320
Andhra	1,542	1,571	142	153
Punjab	640	874	58	82
Madhya Pradesh	302	347	49	54
Mysore	465	712	42	73
Madras	710	734	65	64
Rajasthan	185	152	14	14
Kerala	134	101	12	8
Orissa	44	42	3	4
West Bengal	93	50	4	6
All India	20,504	19,704	2,029	1,975

The size of the factories operating in the country varies widely from 50 tons to over 2,000 tons of cane crushing capacity per day. It is generally accepted that factories with a minimum cane crushing capacity of 500 tons per day should be considered as economic units. On this basis, only half the number can be considered economic.

RAW MATERIALS

The principal raw material is sugarcane. Its consumption in 1957-58, was over 19.70 million tons for a production of 1.97 million tons of sugar. Cane produces just tenth of its weight in sugar. Approximately 30 per cent of cane is consumed by sugar factories.

About 90 per cent of the acreage under cane is now under improved varieties, but the yield per acre and the sucrose content in cane have not improved materially and these account for the high cost of sugar.

The following table gives the details —

Year	Acre under sugarcane (000 acres)	Total output of sugarcane* (000 tons)
1950-51	4,218	56,160
1951-52	4,722	60,640
1952-53	4,376	52,840
1953-54	3,493	43,673
1954-55	3,994	57,600
1955-56	4,563	59,420
1956-57	5,057	66,994
1957-58	5,021	63,054

The first estimate of acreage for 1958-59 is 5,022,000.

* In terms of the weight of the cane.

SUGARCANE DURING 1957-58.

The 1957-58 season witnessed a distinct setback to the sugarcane crop. The all-India final estimate of the crop places the aggregate yield of cane at 61,954,000 tons, as against 66,998,000 tons in the previous season, representing a fall of 4.5 per cent. The decline in production was due largely to the drop in the per-acre yield and partly also to the reduction in the area devoted to cane cultivation. The average quantity of cane actually raised per acre in 1957-58 was not more than 12.4 tons, as against 13.3 tons in 1956-57. The total area under cane was lower by 0.7 per cent at 5,021,000 acres, that for 1956-57 being 5,037,000 acres. The quality of the cane grown in the current year was also poorer, the average yield of gur per 100 tons of cane being less than 10 tons, as compared with 10.5 tons in 1956-57.

The decrease in production of sugarcane was reported mainly by Uttar Pradesh, Bihar, Madhya Pradesh and West Bengal States and was attributed to decrease in area as well as damage caused by adverse seasonal conditions during the growing period of the crop. The decrease in production was offset to a large extent by increases registered mainly in Bombay and Punjab States. The production estimates for 1957-58 and 1956-57 in respect of Andhra Pradesh and West Bengal (excepting Darjeeling District and merged areas) were based on the results of random crop cutting surveys.

The reduction in acreage during the current year was reported mainly by Uttar Pradesh, Bihar and Madhya Pradesh and was attributed generally to unfavourable weather conditions during the sowing period. The decrease in acreage

was offset to some extent by increases recorded mainly in Bombay, Mysore and Punjab States.

The Plan for the industry for 1958-59 aimed at a production target of 2.20 million tons, the estimated production during 1956-57 being 2.03 million tons.

Fourteen new factories were expected to go into production and eight existing units to complete this expansion during 1958-59.

CONSUMPTION

The per capita consumption of sugar in the pre-war period was 6.6 lbs. During 1950-51, on the basis of a production of 1.1 million tons of sugar being consumed by a population of 355 million, the per capita consumption worked out at about 7 lb. In addition, gur amounting to three times the quantity of sugar is also consumed in the country so that the total per capita consumption is not much behind that of other countries.

The First Five-Year Plan for cane cultivation envisaged an increased output equivalent to 700,000 tons (in terms of gur) of which Uttar Pradesh was expected to account for 410,000 tons. The additional production targets (in tons) for other States were: Bombay 80,000, Madras 80,000, Punjab 70,000, Bihar 50,000 and other States 13,000. The targets were however, not fulfilled. The net total increase in the output of cane during the plan period was only 240,000 tons.

The development schemes to increase the per acre yield, which were started during the First Plan period with a total expenditure of about Rs. 80 lakhs were extended year by year in view of the encouraging results.

During 1956-57, a quantity of 200,000 tons of sugar was allowed to be exported, the quantity actually shipped was about one lakh tons.

In 1958-59 one lakh tons would be exported. The total profits of the I.S.M.A. through export in 1957-58 was Rs. 12 lakhs.

The policy for the 1957-58 sugar season was almost the same as before, no statutory control, factories to keep 25 per cent of sugar produced as reserve, formula linking price of sugarcane to sugar, and price of cane Rs. 1-7-0 per maund at gate and Rs. 1-5-0 at rail centre.

The average All-India recovery of sugar from cane suffered some set-back, the figure for 1956-57 being 9.76 per cent, as against 9.93 per cent in 1955-56.

TEA INDUSTRY

TEA ranks as the largest item in India's export trade. It earns every year a foreign exchange of about Rs. 120 crores and a revenue of about Rs. 19 crores from export duty and Rs. 4 crores from excise.

During 1957 tea exports were valued at Rs. 121.5 crores forming 19.35 per cent of the total value of exports.

The State Governments also derive considerable revenue from the agricultural income tax on tea grown within their jurisdiction as well as from the sales tax, carriage tax, octroi, etc. on the commodity.

The industry as a whole gives employment to a labour force of almost 1.2 million.

Of the Indian plywood's total annual output of 78 million sq. ft. the tea industry alone consumed 64 million sq. ft. or 82 per cent during 1954.

During the same year the tea industry purchased 82 thousand tons of fertilisers, of

which 73 thousand tons, valued at Rs. 2.54 crores, came from within the country.

The country's transport services earned by way of freights Rs. 3.86 crores from this industry during 1954.

Unlike China, which consumes all its tea, India exports a substantial portion of tea produced in the country.

There are about 6,840 registered gardens with a total area of nearly 800,000 acres under tea. Of these, over 582,119 acres are in Assam and West Bengal, while Madras, Mysore and Kerala account for nearly 174,462 acres, and the rest are in Bihar, U.P., Tripura, Punjab and Himachal Pradesh.

There are over 700 joint stock companies engaged in the tea industry. The total paid-up capital in the industry as a whole is about Rs. 74 crores. The number of Indian companies is about 540 with a paid-up capital of about Rs. 25 crores.

The annual production of tea is about 700 million lbs. of which about 434 million lbs. are exported. India meets nearly 45 per cent of the world demand for tea.

The total production in 1954 was 644 million lbs. and that for 1955 was 663 million lbs. The production in 1956 was 667 million lbs. There was a marked rise in production to 673 million lbs. in 1957 and to 700 million lbs. in 1958.

The tea production target for the year 1960-61 is 700 million lbs. out of which 470 to 500 million lbs. of tea are expected to be exported.

With the cessation of bulk buying in April 1961 and the re-opening of London auctions, the tendency was for better types of teas to do well at the auctions.

By the end of 1961 the sellers' market was at an end and common teas, which were the worst to be affected, fetched only Rs. 1-8 a lb.

In May 1952 an official team inquired into the problems and recommended certain measures for temporary relief. These included deferred payment of excise duty, guaranteeing the banks of a portion of the loans to gardens, relaxation of provisions in the matter of advance payment of income-tax and supply of more wagons. The labour also agreed to forego certain concessions. Thus a substantial cut in production costs was effected by the end of 1952.

By this time tea prices had again begun to look up but to make sure of the recovery the industry decided to effect a voluntary cut of 8 per cent in production and pay more attention to quality. The crisis had forced the closure of over 100 estates; but as a result of the above measures, the industry managed to turn the corner.

The latter part of 1953 saw a dramatic change from the weak markets of the previous year and since then prices have boomed to record levels in the world markets. The whole of the benefit of this change of fortunes did not, however, accrue to tea plantations because apart from additional costs arising from the operation of the Plantations Act, the Government sought to take an increased share in the proceeds of the industry.

EXPORT

Under the International Regulation Scheme the export quota for India was 470 million lbs. But in 1954 the Government permitted an export of only 464.9 million lbs. The International Tea Agreement expired on March 31, 1955 and was not renewed. For the 1955-56 season the export permitted was 480 million lbs. which was about 69.3 per cent of the crop basis of estates.

The tea export quota fixed for 1956-57 was 451.3 million lbs., representing 63.4 per cent of the total estates' crop basis. For the 1957-58 season, the quota fixed was 460.98 mln. lbs. This was about 63.44 per cent of the crop basis for the year.

The tea actually exported in 1957 was 443.4 mln. lbs. valued at about Rs 123 crores. The export during Jan to Nov. 1958 was 454 mln. lbs. of about the same value as in 1957.

The rates of excise duty on tea are:—

	In nP per lb.
Loose tea	6-25
Package tea (converted from duty-paid loose tea)	18-75
Package tea	25-00

The export duty is regulated according to price, and may therefore vary from time to time. The duties as fixed are given below. The figure in brackets shows the price per lb.:

1958: January: 38 nP (Rs. 3-02); February: 38 nP (Rs. 2-90); March: 38 nP (Rs. 2-87); April: 38 nP (Rs. 2-95); May: 38 nP (Rs. 3-24); June: 38 nP (3-50); July: 38 nP (Rs. 3-41); August: 38 nP (Rs. 2-88); September: 38 nP (Rs. 3-09); October: 26 nP*; November: 26 nP*; December: 26 nP*.

The Government of India has announced the grant of tax relief to common teas.

The relief, which came into effect immediately after the notifications were issued simultaneously with the introduction of a Bill in the Lok Sabha on 27th September 1958, takes the form of a reduction in the maximum rate of export duty from 75 nP per lb. to 30 nP, the maximum rate of excise duty being 19 nP for loose tea and 21 nP plus the duty leviable on loose tea for package tea.

The tea-growing areas have been divided into three zones depending upon the weighted average price of all teas in a particular zone sold in the internal and export auctions in India.

The excise duty on all teas is fixed at 2 nP in the first zone, 4 nP in the second and 10 nP in the third.

In respect of package tea, the duty is 21 nP over and above the duty on loose tea cleared from the tea gardens.

The average rate of export duty is put at 26 nP per lb. for the present.

The refund of excise duty paid on tea exported has been withdrawn, except for package tea which is entitled to a refund of 21 nP per lb.

The effect of these charges on teas exported is indicated below:

Zone	Total incidence before	Relief granted as compared with the export duty applicable before
	nP	nP
I	28	10
II	30	8
III	36	2

It will be recalled that, on 1st June 1948, the Government of India reduced the cess on export of tea from Rs. 4 per 100 lbs. to Rs. 2 and cut the excise duty on tea not used in the manufacture of packaged tea from 6 nP to 3 nP per lb.

As a result of these changes, the revenue yield from tea was expected to be down by Rs. 1.2 crore per annum. The cut in export cess, it was stated, was only a temporary relief, effective till the Government was able to formulate a scheme of giving relief to the tea export trade on a permanent basis.

The anticipated loss in revenue as a result of the latest changes is estimated at Rs. 1.5 crore in a full year.

An export promotion drive for tea has been launched by the Indian Tea Board through the establishment of Tea Councils and frequent participation in trade exhibitions. At present Tea Councils, set up in collaboration with local tea interests, are functioning in U.S.A., Canada, West Germany, Eire and Netherlands. During 1957-58, the Tea Board participated in as many as eight major international trade exhibitions.

In August 1957, the Chairman of the Indian Tea Board paid visits to Cairo, Khartoum, Nairobi and Kericho to explore new markets for Indian tea in the countries of the Middle-East.

To ensure quality control over exported tea, the Government of India promulgated the Tea (Distribution and Export) Control Order vesting the Tea Board with powers to take appropriate action in such cases. The provisions of the Order have been brought into force with effect from the 1st April, 1958.

The following table shows the growth of the industry from 1928 to 1958:—

Year	Area under tea in thousands of acres	Production in millions of lb.	Year	Area under tea in thousands of acres	Production in millions of lb.
1928	776	404	1944	841	509

TEXTILE INDUSTRY

COTTON MILL INDUSTRY

The cotton textile industry, which is the largest single industry in the country, has made rapid strides during its existence of a century. India holds the third place among the countries of the world in its capacity for yarn and cloth based on mechanical equipment and stands second on the basis of cotton consumption.

In addition to providing means of livelihood for nearly 10 million handloom weavers, the mill industry provides direct employment to more than 400,000 workers.

The total number of mills in the country in Aug 1958 was 478, the number of spindles installed 13.05 million, of looms 201,280. The monthly average number of workers, including badli, on 1141 cotton mills during the January-August 1958 period was 905,804 and cotton consumption was at an annual rate of 4.87 million bales of 400 lbs. each.

The capital invested is estimated at Rs. 122 crores, and the annual value of the output amounts to Rs. 395 crores.

The various fiscal measures adopted by the Government and the constitution of an export promotion council are expected to assist the industry in stepping up exports. A scheme of voluntary inspection of cloth meant for export has also been instituted.

SECOND FIVE-YEAR PLAN

The programme for the development of the cotton textile industry under the Second Five-Year Plan was announced by Mr. T. T. Kriahnamachari, who was at the time Commerce and Industry Minister, Government of India, at New Delhi on June 18, 1956. By the end of 1960-61, the per capita consumption of cloth in the country is expected to reach 15.5 yards, in addition to the export target of 1,000 million yards a year. This would involve a production of 8,400 million yards. But the production of all the three sectors was then about 6,700 million yards a year. Therefore, the country would require an additional quantity of 1,700 million yards of cloth.

This quantity was allocated thus: 700 million yards for handloom industry from mill

yarn; 300 million yards for handloom industry from Ambar Charkha yarn; 200 million yards for powerlooms to be introduced in the handloom sector; 350 million yards for mill sector for export purposes, leaving an allotted balance of 160 million yards.

Automatic Looms

The quantity of 880 million yards for export and allotted to the mill sector was required to be produced through the installation of 18,000 automatic looms.

Certain conditions were laid for the allocation.

It was laid down that all the cloth produced on these looms would be earmarked for export and the allocation of looms was being made on a guarantee being given by the mills that in addition to 8½ per cent of their past exports all the cloth produced on these looms would be exported and that any cloth sold internally therefrom would be subject to penal excise duty as given below:

If the cloth diverted into the internal market from the export quota does not exceed five per cent, of the export quota, six naye paise per square yard.

If the cloth diverted into the internal market exceeds five per cent. of the export quota but does not exceed 10 per cent. thereof: On the quantity which does not exceed five per cent. of the export quota, six naye paise per square yard and, on the balance, nine naye paise per square yard.

If the cloth diverted into the internal market from the export quota exceeds 10 per cent. of the export quota: On the quantity which does not exceed five per cent. of the export quota, six naye paise per square yard; on the quantity which exceeds five per cent. of the export quota

but does not exceed 10 per cent. thereof, nine naye paise per square yard; on the balance, 12 naye paise per square yard.

Certain features of the allocation are:

1. Normal number of looms allotable for a single unit will be minimum 48 and maximum 144; in exceptional cases 300 looms might be allowed with the agreement of the unions.
2. Reed space formula currently applicable for replacement of plain looms by plain looms will also be applicable for replacement by automatic looms; and 3. Allotment of these looms will be

governed by the principles contained in the recommendations of the 15th session of the Indian Labour Conference in regard to modernisation and rationalisation.

In the selection of units a prime consideration will be the extent to which the code of Discipline had been observed.

The proposal of the Government is (Dec. 1958) that 2,500 looms should be installed annually during 1959, 1960 and 1961.

At the moment there are only 12,000 automatic looms out of a total of about 200,000.

The following table gives details about the distribution of mills in India as on August 31, 1958.

State	No. of Mills in existence	Spindles installed	Looms installed	Average No. of workers employed daily all shifts	Approximate quantity of cotton consumed	
					Cwts.	Bales of 3½ cwts.
Andhra Pradesh (a)	16	1,92,084	1,669	11,218	3,24,527	92,722
Bihar	2	27,540	747	761	20,958	5,988
Bombay	212	69,86,390	1,39,394	1,40,153	89,76,464	25,04,704
a) Ahmedabad City (a)	71	20,78,618	41,675	1,31,239	24,94,986	7,12,856
b) Bombay City & Island	65	32,12,650	64,426	2,00,446	43,83,295	12,52,370
c) Rest of Enlarged Bombay State (b)	76	16,95,122	33,293	1,08,467	20,98,173	5,99,478
Kerala	14	1,91,823	1,890	9,129	2,08,976	59,136

Mysore (a)	18	4,41,546	4,955	25,637	6,51,203	1,86,058
Orissa	4	62,843	1,024	5,945	1,11,377	31,822
Punjab	6	1,29,890	1,611	7,238	3,12,438	89,268
Rajasthan (a)	11	1,72,624	3,412	11,492	3,44,911	98,546
Uttar Pradesh (d)	29	8,59,308	13,818	53,976	12,75,393	3,64,398
West Bengal (c)	39	5,85,236	10,864	44,796	7,80,038	2,22,868
Delhi	7	1,88,356	3,954	15,794	6,08,244	1,73,784
Pondicherry	3	75,464	2,117	5,375	1,16,506	33,238
Total	511*	1,32,71,890	2,05,598	7,75,865	1,76,81,041	50,51,726

* Does not include 23 mills which have either been registered and/or are in course of erection. (a) One mill not working, (b) Eight mills not working, (c) Two mills not working, (d) Six mills not working, (e) Four mills not working.

PRODUCTION

The actual production of yarn and cloth by the mills sector is as follows:—

Year	Yarn in 000 lbs.	Cloth in 000 yards.				
		Coarse	Medium	Fine	Superfine	Total
1951	1,303,861	363,561	2,080,858	1,347,946	283,866	4,076,186
1952	1,480,000	504,000	2,709,900	1,194,000	196,000	4,602,000
1953	1,510,000	509,000	3,136,000	899,000	304,000	4,578,000
1954	1,565,000	909,110	3,565,000	461,230	350,100	5,011,000
1955	1,637,000	592,510	3,747,850	458,370	300,120	5,096,000
1956	1,671,204	719,000	3,796,156	444,033	247,295	5,306,584
1957	1,780,096	1,143,712	3,402,908	383,176	267,720	5,317,416
Jan-Aug. 1958	1,104,218	638,278	2,256,882	215,018	168,083	3,278,261

The total production of cotton cloth by all the sectors in India during 1957 was over 7,353 million yards.

Of this the mill sector accounted for 5,317 million yards, powerlooms 303 million yards, and handlooms 1,980 million yards. The output of traditional Khadi was 41.17 million yards and Amber Khadi 10.91 million yards.

The exports of cotton textiles produced by the mills, including the powerloom sector, in 1957 were higher than the exports in 1955 and 1956 but lower than those in 1954. The figure for 1957 was 844.93 million yards as against 744.23 million yards exported in 1955 and 815.49 million yards in 1956.

There was a decline in the exports of handloom cloth in 1957 when compared with the exports in the previous four years.

In the production of mill-made cloth, Bombay leads other States. Bombay accounted for about 3,585 million yards in 1957 out of the total output of 5,317 million yards and about 1,653 million yards in the first half of 1958 out of 2,461 million yards.

The production figures for the other States in the first six months of 1958 are as follows:

Madhya Pradesh about 207 million yards, Uttar Pradesh over 165 million yards, West Bengal about 133 million yards, Delhi about 81 million yards, Madras about 56 million yards, Mysore about 43 million yards, Punjab about 30 million yards, Rajasthan over 27 million yards, Orissa about 16 million yards, Pondicherry over 15 million yards, Andhra Pradesh about 15 million yards, Kerala about 10 million yards and Bihar over 3 million yards.

The total production of mill-made cloth during the first ten months of 1958 was 4,107 million yards. The production during the corresponding period in 1957 was 4,448 million yards.

During 1957 the cotton consumption by mills was 52.62 lakh bales of which Indian cotton accounted for 46.95 lakh bales and foreign cotton for 5.67 lakh bales.

The estimates of the other important raw materials are given below:—Card clothing—2,500 sets; Bobbins—425,000 gross; Shuttlings—8,300 gross; Healds—800,000 sets; Reeds—400,000 pcs.; Pickers—57,500 gross; Mutton tallow—3,600 tons; Starch—36,000 tons; Coal tar dyes—3,900 tons; Hydro-sulphite of soda—2,000 tons; Zinc chloride—3,000 tons; Caustic soda—15,000 tons.

TEXTILE ENQUIRY COMMITTEE

The Government of India announced, on 29th May 1958, the appointment of a special committee to enquire into the conditions of the cotton textile industry and to suggest the necessary remedial measures to overcome its difficulties. The Committee was presided over by Mr. D. S. Joshi, I.C.S., Textile Commissioner and consisted of Messrs. D. G. Karve, N. Majumdar, Kanhaiyalal Mehta, Padampat Singhanla, Krishnaraj M. D. Thackersey, S. R. Vasavada, R. Venkataswami Naidu and K. R. Aravamudan (Member-Secretary).

The Report of the Committee was unanimous. It was signed on 18th July 1958 and submitted to the Government thereafter.

The Government has accepted some of the principal recommendations of the Textile Enquiry Committee. In particular the Committee has recognised the need for modernisation of equipment in mills. This was one of the chief points made out by the Committee. The Government agreed with the views expressed by the Committee that "our exports will continue to

fall steeply unless we export cloth produced on automatic looms." It feels that a proper psychological climate should be created within the country in order to facilitate the introduction of automatic looms within a specified period. It is hoped that it would be possible to evolve a simple procedure for such replacement on a phased programme in an accelerated manner.

As regards the large number of mills which have ceased working, the Government has accepted the suggestion made by the Committee. The Committee pointed out that the main reason for closure of mills seemed to be the bad condition of machinery, in many cases neglected continuously without proper attendance and repairs and replacement.

In order to enable the closed mills to reopen, particular stress is laid by the Government on the need for replacing outmoded and obsolete machinery and for the proper balancing of uneconomic units.

The Government, however, is of the opinion that the managements have contributed in large measure to the present state of affairs. It expresses the hope that, in future, they will take care to see that deterioration is not allowed, thereby obviating the necessity for intervention by the Government.

As regards the major recommendation of the Enquiry Committee, namely, the establishment of an autonomous corporation to take over the management of textile mills if such a course is absolutely essential, the Government feels that such a body is neither necessary nor desirable. It is pointed out that the intention of the Government is to assist the various mills that may be in difficulties and help them to stabilise their position. The Government would have to concentrate its attention on this aspect.

Referring to the Committee's observations on the levy of sales tax on cloth, the Government states that it would not be proper to fetter the discretion of the State Governments.

The practice in regard to grant of concession on the supply of raw materials to industry varies from State to State. The Government, therefore, feels that the State Governments should maintain the *status quo* in regard to this concession.

Every possible assistance and facility would be given by the Government for the promotion of exports of cloth and yarn.

The Government constituted a committee to advise the Textile Commissioner on matters vitally affecting the industry as a whole or any unit in particular. The Advisory Committee is representative of all interests and of important textile centres.

Along with this Committee, a Rationalisation Sub-committee will also be set up which, assisted by Regional Sub-committees, will advise the Government on policies and principles governing rationalisation.

The Government has also accepted the recommendation of the Committee in respect of setting up a machinery for a more continuous and sustained study in the field of marketing intelligence and research for cotton textiles. But it is pointed out that this should be the legitimate function of the industry itself.

As regards the problem of uncleaned stocks with the mills, the Government feels that the total stocks with the entire trade have shrunk considerably. In order to facilitate normal free movement of stocks, the trade has been urged to co-operate with the industry by increasing its holdings.

At the same time, the Government has recognised the need for allowing adequate and even liberal credit facilities to the industry. It is proposed to request the banks to extend such facilities to mills.

The Government proposed (Sept. 1956) to appoint shortly a Textile Advisory Board whose functions would be to advise Government on the development of the textile industry in general and on any problem relating to the industry which might be referred to the Board from time to time.

COTTON

The statistical position of cotton in the Indian Union is summed up in the following table:—
(In lakhs of bales)*

	1954-55	1955-56	1956-57	1957-58
Opening Stock	20.0	28.7	21.54	20.10
Production	54.0	46.0	49.70	51.50
Imports	6.2	5.0	6.07	4.29
Total Supply	80.2	77.7	77.33	75.89
Mill Consumption	47.7	46.0	52.55	50.10
Exports	3.1	5.0	3.01	2.92
Extra Factory Consumption ..	2.7	2.7	2.80	3.31
Total Distribution	53.5	53.7	58.36	56.33

According to the information furnished by the trade, the total cotton supply, available in the 1957-58 season was estimated at 75.89 lakh bales, of which 68.72 lakh bales were Indian cotton, including 17.22 lakh bales of carryover with both the trade and the mills on August 31, 1957. The total mill consumption was estimated at 50.10 lakh bales (44.38 lakh bales of indigenous cotton and 5.72 lakh bales of foreign varieties). Exports amounted to 2.92 lakh bales and the extra factory consumption 3.31 lakh bales, thereby allowing a carryover for the 1958-59 season at 19.56 lakh bales.

The production of long, medium and short staple cotton was in the ratio of 40%, 42% and 18% (1957-58).

The latest trade estimates of the production of cotton in 1958-59 is 52.25 lakh bales.

Import policy during the cotton season 1956-57 was influenced, to a large extent, by the availability of foreign exchange. The acute shortage of foreign exchange forced the authorities to continue the restriction on cotton imports, especially from the sterling area.

Among the foreign cotton affected by this restriction, East African growths were the most important.

The import for 1958-59 is fixed at 6 lakh bales.

The Government of India fixed the floor and ceiling prices of Indian cotton during the 1957-58 season at the same level as those for the 1956-57 season. The floor and ceiling prices for Jarilla with stapling 25/32" are Rs 495 and Rs 820 per candy and those for Vijay with stapling 25/32" are Rs 585 and Rs 925 per candy.

Trading in the new crop contract commenced on 23rd June 1957, I.C.C. Jarilla (basis Fine Mogal 25/32") standing at Rs. 690.

For the 1957-58 season, according to the amendments effected to the By-laws of the E.I.C.A. there was only one hedge contract, called the Indian Cotton Contract. The basis of the contract was Fine M G Mogal Jarilla 25/32" staple. Delivery months are March, May and August. Trading in the new crop hedge contract was subjected to the amendments made to the By-laws of the Association and was within the floor and ceiling prices fixed by the Government for the 1957-58 season, i.e. Rs 495 and Rs 820 for Fine Jarilla 25/32" staple, the same as in the previous season.

The Government of India have decided to allow for import the following further quantities of raw cotton: 55,000 bales of 13/16" and above and 140,000 bales of 1 1/16" and above. The Cottons may be imported from any country. Half of this quantity would be earmarked for allotment under the Export Incentive Scheme.

As regards export of raw cotton, it was expected that the entire quantity of five lakh bales of raw cotton released for export during the season beginning from September 1956, would be exported.

HANDLOOM CLOTH

Under the Second Five-Year Plan, out of the additional quantity of 1,700 million yards of cloth required to meet the total estimated demand for 8,400 million yards in 1960-61, as much as 1,000 million yards have been allocated to this sector. This is in addition to the present

annual output of 1,500 million yards. Of this additional quota of 1,000 million yards, 700 million yards will be produced from mill yarn and 300 million yards from Ambar Charkha yarn.

The number of persons engaged in khadi production is about 11,30,000; and annual sale is about Rs. 8 crores.

The exports of handloom cloth in 1957 aggregated 50 million yards.

AMBAR CHARKHA†

A significant development of the year 1955-56 was the emergence of the Ambar Charkha, an improved hand operated spindle. In April 1956, the Government of India set up a special committee under the Chairmanship of Mr. S. S. Khara, Secretary, Union Ministry of Production, to investigate the economic and technological aspects of the Ambar Charkha. The Committee submitted its interim recommendations to the Government two months later and the final report was placed before the Lok Sabha on June 23, 1956. This was published in August 1956.

The Committee recommended the introduction of 75,000 Charkhas for 1956-57 and about 200,000 for 1957-58. The Government accepted the scheme for 1956-57.

As a result of the experience gained of its working during that year, the introduction of 180,000 additional Ambar Charkhas during 1957-58 was approved in principle. To begin with, funds were sanctioned for the continuation of the previous year's programme in full and in part for the expanded programme. The provisions in the budget included Rs. 311.32 lakhs as grants and Rs. 697.80 lakhs as loans.

The target for the production of cloth during 1957-58 had been fixed at 65 million yards. After a field investigation conducted by the Committee, it suggested a revision of the target from 65 million yards to 20 million yards.

The main reason for the reduction is the finding that Ambar Charkha is generally used to provide part-time occupation mostly in months when agricultural activity is not in full swing. The actual number of working days, according to the survey, averages 200 in a year instead of 300 as originally estimated and working hours per day average 4 to 6 instead of 8. The investigation further shows that only one spinner generally works on the Ambar Charkha at a time, although the Commission is now endeavouring to train more than one person from the same family so that a fuller use can be made of an Ambar Charkha set and its actual productivity increased.

For the present, however, the production per Ambar Charkha unit is estimated at about 900 hanks or 50 lbs. of 18 counts per year as against 3,600 hanks or 200 lbs. per annum estimated earlier by the Ambar Charkha Enquiry Committee, on the assumption that the Ambar Charkha would provide full-time occupation for two persons on a complete set comprising the carding unit or dhunai modia, the 'beini' or silver-making implement and the spinning apparatus or Ambar Charkha proper.

The targets originally fixed for 1957-58 for the Ambar Charkha programme, the revised targets and the achievements for the period upto November, 1957, are as under:

* Trade Estimate.

† See also under 'Cottage Industries'.

ITEM	Targets originally fixed for 1957-58	Targets as revised	Achievements between April and November 1957
Manufacture of Charkhas	180,000	115,000	56,011
Distribution of Charkhas to trained spinners	150,000	85,000	50,429
Instructors trained	4,000	3,200	1,955
Carpenters trained	2,000	1,200	751
Spinners trained	150,000	120,000	62,668
Establishment of Workshops (Saranjam karyalayas)	100	—	21
Production of yarn	18.1 m. lbs.	5.5 m. lbs.	1,586 m. lbs.
Production of cloth	65 m. yards	20 m. yards	4,604 m. yards

The revised provision for the Ambar Charkha programme in 1957-58 is Rs. 664 lakhs, comprising Rs. 230 lakhs under grants and Rs. 434 lakhs under loans. Expenditure upto the end of February 1958 was Rs. 4.01 crores.

IMPORTS AND EXPORTS

The following table gives the sea-borne export trend of all cloth :—

Year	Twist and Yarn		Cloth	
	Million lb.	Rs. in crores	Million yd.	Rs. in crores
1952-53	17.9	4.4	615.75	61.46
1953-54	23.2	4.7	765.5	63.1
1954-55	1.2	0.8	819.0	63.15
1955-56	23.1	4.21	740.0	66.60
1956 (April to Dec.)	6.92	1.50	557.08	42.71
1957	10.47	3.40	878.0	65.19
Jan-Aug. 1958	15.77	2.96	416.0	30.75

EXCISE DUTIES

The Cotton mills were heavily burdened with the accumulations of large stocks of cloth during 1957. In December 1957, the Government of India reduced the excise duty on medium counts mill cloth by 3 nP per square yard. They stated that the reduction was only temporary and would be effective upto the end of March 1958.

This step did not give much relief to the mills. About 25 mills had already been forced to close down, resulting in the unemployment of 25,000 workers. Representations were made to the Government of India urging that, if no immediate steps were taken to reduce the burden of excise duty, 40 to 50 more mills would close down, throwing as many as 50,000 workers out of employment.

The stocks of cloth with the textile mills in the country at the end of November 1958 were 5,79,800 bales as against 5,92,800 bales at the end of September 1958 and 6,01,800 bales at the end of October 1958. The unsold stocks of yarn on August 2, 1958 were 81,000 bales as against 100,000 bales in January 1958. The fall in production in 1958 was largely due to a shift in production from coarse varieties to medium and finer varieties of cloth. This shift in production had been necessitated by the consumers' preference for finer varieties.

As a sequel to these representations, the Prime Minister, Mr. Jawaharlal Nehru, announced in the Lok Sabha on 18th March 1958 reduction in excise duty on cotton piecegoods. The following were the revised rates of duty (excluding the additional excise duty and the handloom cess).

	In nP per Square Yard.	
	Revised	Before revision
COARSE		
Dhoties and Saris	3	3.125
Other sorts	6	9.375
MEDIUM		
Dhoties and Saris	7	9.375
Other sorts	9	9.375
FINE	17	18.750
SUPERFINE	22	25.000

As a result of the above reduction, the relief to the cotton mills was expected to be of the order of Rs. 15 crores per annum.

Export of cotton yarn by mills was allowed freely for the licensing period July to December, 1958. The export policy for yarn had also been announced on a long term basis, i.e. till 1961.

The excise duty on cloth piecegoods underwent further changes early in July 1958 when the Government of India announced, in pursuance of the recommendations made by the Textile Enquiry Committee modifications in the levy with a view to helping the mills to overcome the crisis facing it due to accumulation of heavy stock.

The revised rates of excise duty per square yard (excluding the additional excise duty and the handloom cess) which have been enforced with effect from the 4th inst. are as follows :

Coarse cloth : A new basic rate of excise duty on all varieties of cloth at 4 nP plus a surcharge of 1 nP, if the cloth is bleached, 3 nP if shrink-proof and 1½ nP if processed in any other way; hitherto, there was only an excise duty of 3 nP on coarse dhotis and saris and 6 nP on other varieties.

Medium cloth : A basic rate of 5 nP on lower medium cloth (counts between 17 and 25) and 6 nP on higher medium cloth (26-35 counts) plus the same surcharges as on coarse cloth for bleached (1 nP), shrink-proof (3 nP) and other processed cloth (1½ nP); the duty so far had been only at 7 nP on dhotis and saris and 9 nP on other varieties.

Fine cloth : A basic rate of 18.5 nP plus the surcharges for processing as in the case of coarse and medium; hitherto, there was only one excise duty of 17 nP.

Superfine cloth : A basic rate of 24½ nP plus the surcharges for processing on the same scale as for coarse and medium; this cloth was until recently bearing a levy of 22 nP only.

Mill made textiles have been subject to the levy of an additional Central excise duty in lieu of the States' sales tax with effect from 14th December 1957. The rates of excise duty per square yard are 13 nP for superfine, 8 nP for fine, 4 nP for medium and 3 nP for coarse varieties, the additional excise for art silk cloth 3 nP per square yard and that for woollen cloth 5 per cent ad valorem. It is estimated that, in a whole year, the additional excise on textiles will bring in a gross revenue of Rs. 21.90 crores.

During the first ten months of 1958, twelve cotton textile mills had restarted working, ten of these fully and two partially. One of the two, however, closed down after working for about four months.

The number of mills totally closed during the period was 19 affecting 28,612 works.

Export Promotion Council : The Council opened its first office in Baghdad in February 1958 and then other offices in Singapore, Lagos, Rangoon, Aden and Mombasa. Besides, it has taken part in many exhibitions—Industrial Exhibitions in New Delhi, the Leipzig Fair, the Pakistan Trade Fair and the Milan Samples Fair. It has undertaken the publication of a handbook known as *The Indian Textile Industry*. The Council has also brought about an overseas edition of its fortnightly *Bulletin*.

FIVE-YEAR PLANS

The following table summarises the programme of development of the whole industry as approved by the Planning Commission for the Five-Year Plans :—

Rated Capacity of Mill Industry	Unit	1952-53	1955-56	1960-61
Spindles	No.	11,175,283	12,051,209	13,621,209
Yarn	m. lb.	1,704.2	1,840	2,080
Looms	No.	195,849	202,901	220,901*
Cloth	m. yd.	4,778.7	4,950	5,444
Actual Output—				
Yarn	m. lb.	1,610	1,690	1,650
Mill Cloth	m. yd.	4,800	5,094	5,444
Handloom Cloth	"	1,800	1,753	3,000 to 3,500
Exports—				
Yarn	m. lb.	—	—	—
Cloth	m. yd.	1,000	878	1,000
Cotton Needed—	m. bales	4.5	4.9	6.1

* Including 18,000 automatic looms.

TOBACCO INDUSTRY

INDIA is one of the three major producers of tobacco in the world, the other two being U.S.A. and China. Tobacco is also an important item in India's foreign trade.

The area under tobacco in 1956-57 was 1,029,000 acres and the production was 685 million lbs.

The more important tobacco growing States in India are Andhra Pradesh, Madras, Bombay, U.P., Mysore and Bihar.

The tobacco plants are mainly of two varieties—*nicotiana rustica* and *nicotiana tabacum*. The first has a higher nicotine content and is used in hookahs, for purposes of chewing and in making snuff. The second has a smaller nicotine content and is used in the manufacture of cigarettes, cigars and cheroots.

There are six main tobacco producing areas in India—the Guntur area in Andhra Pradesh, the Charotar area in Gujarat in Bombay State, the Nipani area in Mysore, the southern Madras area, north Bihar and Bengal area and Uttar Pradesh and Punjab area.

The Guntur area comprises the districts of Guntur, Krishna, East and West Godavari, and the adjoining portions of Telangana. The variety grown is *nicotiana tabacum*.

The Charotar in Gujarat covers Anand, Borsad, Petlad and Nadlad talukas of the Kaira District. Here also the chief variety is *nicotiana tabacum*.

The Nipani area is made up chiefly of the District of Belgaum in Mysore State and certain areas in North and South Satara and Kolhapur districts in Bombay State. Here both the varieties are grown though *nicotiana tabacum* predominates.

In Madras State the chief tobacco growing districts are Madurai and Coimbatore.

The north Bihar area covers the districts of Muzaffarpur, Purnea and Darbhanga, and in the north Bengal area the districts of Jaipalguri, Malda, Bahampore and Dinajpur. Here both the varieties are grown.

Uttar Pradesh comprises the districts of Farukhabad, Etah and Sitapur and the Punjab area comprises the districts of Jullundur and Ferozepur. Both the varieties are grown in these areas.

The development of tobacco cultivation, marketing and research are looked after by the Indian Central Tobacco Committee with headquarters in Madras. The Committee has a tobacco research institute at Rajahmundry (Andhra Pradesh), cigar and cheroot tobacco research station at Vedaesandur (via) Dindigul (Madras), hookah and chewing tobacco research station at Pusa (Bihar), wrapper and hookah tobacco research station at Dinbata (West Bengal) and a cigarette tobacco research sub-station at Guntur (Andhra Pradesh).

Another station for cigarette tobacco was started in February 1957 at Hunsur in Mysore State where soil and climate are different from those of the Guntur area where production of fine cured Virginia cigarette tobacco is mainly concentrated.

About tobacco manufactures, there are over 4,600 bidi manufacturers, about 300 chewing tobacco manufacturers, over 300 snuff manufacturers and about 15 important cigarette manufacturers.

Export of tobacco is allowed freely without any restrictions.

There are no quantitative targets for tobacco in the Second Plan as the aim is to improve the quality of the product.

PRODUCTION OF TOBACCO (UNMANUFACTURED)

(Thousand Pounds.)

State.	1955-56.	1956-57.	1957-58.
Andhra ..	285,720	291,200	244,160
Madras ..	80,640	85,120	60,480
Bombay ..	134,400	143,360	114,240
Bihar ..	13,440	20,160	20,160
West Bengal	26,880	22,400	24,640
Other States	118,720	122,200	100,800
India ..	660,800	685,440	564,480

IMPORTS AND EXPORTS OF TOBACCO (RAW) (BY SEA AND AIR)

	1955-56		1956-57		1957-58

INTERNAL CONSUMPTION

The following table shows in lb the quantities of raw tobacco that was cleared for home consumption for various manufactures in India.

	1954-55	1955-56	1956-57
Hookah	116,209,871	121,393,726	1,16,949,325
Bidi	122,033,468	152,306,611	1,23,304,567
Cigarette (Fine cured Virginia)	29,901,427	32,876,646	36,875,832
Cigar and Cheroot	43,289,506	43,073,752	43,909,802
Chewing	116,945,899	118,700,286	1,22,216,971
Snuff	9,679,144	9,679,292	10,023,011

PRODUCTION OF CIGARETTES, ETC.

The following table shows the production and consumption of cigarettes, etc in India (excluding imported manufactured products)

(In Numbers)

	Production (1954)	Quantity cleared for home Consumption. (1954-55)	Production. (1955)	Quantity cleared for home Consumption. (1955-56)	Production. (1956)	Quantity cleared for home Consumption. (1956-57)
Bidis	N.A.	N.A.	N.A.	N.A.	N.A.	N.A.
Cigarettes	1,963 crores	2,125.2 crores	2,283 crores	2,384.3 crores	2,616 crores	2,715.6 crores
Cigars and Cheroots	N.A.	4,38,070,900	N.A.	4,54,968,800	N.A.	4,77,640,100

In 1957 the number of cigarettes produced in crores was 2,803.

N.A.—Not available. *Notes:* Figures are subject to revision.

VEGETABLE OIL INDUSTRY

INDIA is one of the most important producers of oilseeds in the world and is consequently a large producer of vegetable oils as well as an exporter of oils and oilseeds.

The following figures show the average production of different varieties of oilseeds in recent years along with their share in world production:—

	Average Indian Production (lakh tons)	As percentage of world Production
Groundnut ..	42.00	36
Castor seed ..	1.24	30
Linseed ..	3.84	15
Sesamum ..	4.42	38
Cotton seed ..	13.00	18

The actual production of oil from the five major oilseeds has been estimated as follows: (000 Tons).

	Groundnut	Castor	Sesamum	Rape and Mustard	Linseed	Total
1953-54 ..	847	37	165	246	103	1,398
1954-55 ..	938	39	184	291	114	1,566
1955-56 ..	878	39	143	242	123	1,440
1956-57 ..	954	39	138	293	123	1,547
1957-58 ..	970	31	138	293	123	1,555

In March 1956, there were 2,097 oil mills registered under the Factories Act. The State-wise* distribution of these oil mills was as follows: Assam 73; Bihar 92; Bombay 575; Madhya Pradesh 101; Madras & Andhra 540; Orissa 7; Punjab 39; Uttar Pradesh 125; West Bengal 66; Hyderabad 298; Madhya Bharat 101; Mysore 23; PEPSU 12; Rajasthan 29; Saurashtra 120; Travancore-Cochin 56; Other States 40. The total crushing capacity of the mills in the country is estimated at 56 lakh tons per annum in terms of oilseeds.

It is also estimated that there are about four lakh village plants in the country with an annual crushing capacity of about seven lakh tons of oilseeds. Thus the total crushing capacity is estimated at 63 lakh tons in terms of oilseeds. But the total output of oilseeds in recent years is estimated at 55 to 60 lakh tons. Therefore, a part of the available capacity is lying idle.

The capital invested in the organized industry is estimated at Rs. 24.4 crores and the number of workers at 49,580. The most important oilseeds consumed in large quantities for the production of oils are groundnut, linseed, rape and mustard, castor seed and sesamum seed. Small quantities of cottonseed and mohwa seed are also crushed.

IMPORTS AND EXPORTS

The following table shows the total imports and exports of oil and of some varieties since 1957:—

	1957	(Jan.-Aug. 1958)
Imports (Total) ..	723,472	324,248
Coconut Oil ..	844,231	122,472
Linseed ..	187	Nil
Other Sorts ..	379,229	261,776
Exports (Total) ..	1,472,373	817,483
Groundnut Oil ..	33,377†	33,231‡
Linseed Oil ..	320,657‡	410,948‡
Castor Oil ..	848,914	271,923

On the basis of the minimum per capita consumption of fats in this country, the total consumption of fats of the entire population would work out at 7 million tons, as against the present estimated consumption of 1.75 million tons.

In 1954-55, about 1.14 million tons of vegetable oils (including coconut oil) and about 255,000 tons of vanaspati were estimated to have been consumed for edible purposes in the

The following table gives the actual production—in thousand tons—of oilseeds during the seasons 1956-57 and 1957-58:—

	1956-57	1957-58
Groundnut ..	4,300	4,271
Castor seed ..	124	97
Linseed ..	384	271
Sesamum ..	442	363
Rape and mustard	1,026	905
Total ..	6,176	5,907

against 5,765 tons in 1956. The rise in output was due to the commencement of operations by two more units. Thirty-two licences had been issued up to the end of 1956 under the Industries Act for the establishment of solvent extraction plants. The number of units working in 1957 was 12.

The development programme for the vegetable oil industry in the Second Plan is indicated in the following table:

	(Tons)	
	1954-55	1960-61
Production of oil:		
1) Solvent extraction from oilcakes ..	7,000	64,000
2) Cottonseed Oil ..	9,000	30,000
Total (all sources) ..	1,760,000	2,110,000
Utilisation of oil:		
For edible purposes ..	1,140,000	1,190,000
For Vanaspati manufacture ..	260,000	430,000
For other industrial purposes ..	230,000	280,000
Exports ..	140,000	210,000

VANASPATI

The Vanaspati Industry though a minor branch of the Vegetable Oil Industry is one of the most highly organised and efficient industries. Its history is interesting. It started on a small scale in 1930.

In April 1951, there were 48 vanaspati factories in India with an annual rated capacity of about 332,000 tons. In March 1956, their number had increased to 51 with a rated capacity of about 412,100 tons. Out of these, one is the Government Hydrogenation Factory at Kothikode having an installed capacity of 3,000 tons per annum. Besides, there are seven factories with an annual rated capacity of 33,000 tons. It is the Government's policy not to permit any further expansion of the industry as the present capacity is adequate to meet all the requirements of 4 lakh tons. The aggregate installed capacity of the industry in August 1958 was 440,724 tons per annum. The actual output of Vanaspati during 1957 amounted to 301,356 tons as against 255,612 tons in 1956.

The consumption of vanaspati in India has increased at an average rate of about 20,000 tons per annum during the First Plan period. It is assumed that the consumption will rise at the rate of 25,000 tons per annum during the Second Plan. On this basis, the internal consumption may be estimated at about 380,000 tons in 1960-61.

In 1956-57 the internal consumption was 280,000 tons.

The following table summarises the progress of the industry:

	(tons)		
Year	Production	Consumption	Exports
1951-52 ..	180,000	177,000	3,000
1952-53 ..	199,000	196,000	3,000
1953-54 ..	199,000	196,000	300
1954-55 ..	225,000	216,000	9,000
1955-56 ..	270,000	258,000	12,000
1956-57 ..		280,000	11,150
1957-58 ..		305,000	

In 1956-57 the exports amounted to 11,154 tons valued at Rs. 2.04 crores. The value of the exports in 1955-56 was Rs. 1.75 crores, in 1954-55 it was Rs. 1.48 crores.

There is no export duty on Vanaspati.

* Pre-organisation States.

‡ Includes hydrogenated oil

† The number is estimated at about 3,000 at the end of 1957.

‡ Includes oxidised oil.

The gap between the installed capacity and actual production has continued to remain wide as will be seen from the following table:—

Year	Installed Capacity Tons	Production Tons
1951	325,723	172,320
1952	339,223	190,812
1953	368,232	191,652
1954	368,232	225,000
1955	380,232	280,784
1956	412,020	255,612
1957	443,724	301,356

The net capital invested in the industry is about Rs. 25 crores. Besides 10,000 workers directly employed, the industry provides indirect employment for nearly 60,000 workers.

Edible Oils constitute the chief raw material of the industry.

The table below summarises the programme of development in the Second Plan:

	(Tons)	
	1955-56	1960-61
Installed Capacity	445,000	445,000
Production	270,000	400,000
Internal Consumption	255,000	375,000 to 380,000
Exports	15,000	20,000 to 25,000

WOOLLEN INDUSTRY

IN 1951 there were 44 factories including four spindles installed were 2,039 and 116,800 put up since the war and the total capital employed was estimated at Rs 7 crores. The number of factories was higher at 122 industry gave employment to about 18,000 with 3,950 powerlooms and 157,178 spindles workers. The number of powerlooms and installed on the basis of a double shift.

The regional distribution of woollen mills and their capacity at the end of 1955-56 were as follows:

State*	No. of units	Capacity (Numbers)		
		Woollen Spindles	Worsted Spindles	Powerlooms
Bombay	12	12,226	47,936	605
Saurashtra	1	2,130	7,032	84
Mysore	3	10,478		221
Uttar Pradesh	4	12,354	9,672	364
Kashmir	1	1,542	1,500	18
West Bengal	5	1,300	5,094	76
Madhya Bharat	1	516		20
Punjab	94	20,402	25,182	2,554
Delhi	1			
Total	122	61,032	98,146	3,950

* Pre-reorganization

Woollen manufactures consist of blankets, shawls, shawls, blis coating, overcoating, tweed, of coarser and heavier types of goods.

The position in respect of installed capacity and actual production during the years 1956 and 1957 as also in the first eight months of 1958 is indicated below:

	1956	1957	Jan-Aug 1958
Yarn (million lbs.)			
Capacity	19.00	20.20	20.20
Production	15.60	27.79	19.21
Fabrics (million yds.)			
Capacity	24.00	24.00	24.00
Production	16.34	15.79	12.43

The consumption of woollen goods in India is low in comparison with other countries.

IMPORTS, EXPORTS

Imports of wool and woollen goods have remained at a fairly high level, the annual value being of the order of Rs 11.12 crores in 1954-55, Rs 11.00 crores in 1955-56, Rs 10.08 crores during the period April-December 1956. The total value of imports of raw wool, wool tops, woollen yarn, woollen cloth and druggets during the year 1957 was Rs 14.36 crores. The import of wool tops accounted for nearly Rs 7.16 crores in 1954-55, Rs 7.46 crores in 1955-56, Rs 10.00 crores in 1956-57 and Rs 12.00 crores in 1957-58. Imports aggregated Rs 11.23 crores in 1957 and Rs 7.06 crores in the first eight months of 1958. The large imports of wool tops are indicative of an important gap in the structure of the industry, the combing capacity of which is considerably short of the demand for wool tops.

The exports of woollen manufactures declined from Rs. 6 crores in 1950-51 to Rs. 4.4 crores in 1953-54 and to Rs 3.87 crores in 1954-55 and to Rs 3.97 crores in 1955-56. During the nine months April to December 1956 the exports aggregated Rs 3.30 crores. The value of export was Rs 39.78 lakhs in 1957 and Rs 28.55 lakhs in the first eight months of 1958. The export of woollen yarn, which was totally banned, has been permitted since March 1954 in view of the improved supply position, but not much progress has been made. The value of woollen yarn actually exported in 1957 was no more than Rs 1.07 lakh. Export of raw wool and wool tops is placed at Rs 8.61 crores in 1954-55 and Rs 9.73 crores in 1955-56 as against Rs 5.87 crores in 1953-54. Exports during April-December 1956 were valued at Rs 7.27 crores, in the calendar year 1957 at Rs 11.74 crores and in the first eight months of 1958 at Rs. 5.98 crores. The total capital investment in the industry amounted to Rs. 10.25 crores in 1956. The labour force was 17,000 in 1955-56.

A Development Council for the Woollen Industry was constituted by the Government of India in July 1955. The Council has actively taken up export promotion of woollen fabrics.

SECOND FIVE-YEAR PLAN

Under the Second Five Year Plan the output of woollen and worsted fabrics by the organized mill sector is expected to be stepped up from the present level of about 15 million yards to about 20 million yards by 1960-61. The yarn requirements of all the sectors will be 12 million lb of woollen yarn and 15 million lb of worsted yarn per annum.

But there is no combing plant in the country to produce wool tops. So it is proposed to establish during the period a plant with a capacity of about 9 million lbs. involving a capital investment of Rs 2.25 crores.

The development programme for the woollen textile industry, mill sector, in the Second Five Year Plan is indicated below:

	1955-56	1960-61
Spindleage and Loomage		
Woollen sector-spindles	61,032	62,768
Worsted sector- "	98,416	1,23,416
Powerlooms	3,950	4,051
Annual rated capacity on double shift		
Woollen Yarn (million lb.)	17	17.5
Worsted Yarn (million lb.)	21	28
Woollen and Worsted fabrics (million yd.)	48	50
Production		
Woollen tops (million lb.)	..	9
Woollen yarn (million lb.)	10.6	12
Worsted yarn (million lb.)	11.0	15
Woollen & Worsted fabrics (million yd.)	14.9	20

HOSIERY INDUSTRY

According to the Tariff Commission, there were in 1951, 875 units, excluding four mills having a hosiery section, of which as many as 843 were in the Punjab with a capital investment of approximately Rs 3 crores. Only 66 units were, however, registered under the Factories Act and 45 used electric power.

The quantity of hosiery goods manufactured in 1956 is estimated at over 50 lakh lb.

It is estimated that about 4 million lb. of hosiery and knitting yarn are at present consumed by the Ludhiana hosiery units and about 0.5 million lb. by the hosiery units located in other States. Some of the organized mills also produce worsted hosiery goods, consuming about 0.5 million lb. of yarn. Thus the total quantity of yarn consumed by the hosiery industry is estimated at around 5 million lb.

MINES AND MINERALS

By courtesy of Mineral Economics Division (Intelligence Section), Indian Bureau of Mines, Government of India.

ALLOTMENT under the First Five-Year Plan (mineral development): Rs. 1.06 crores.

Allotment under the Second Five-Year Plan: Rs. 73 crores.

Some major facts are given below:

The total value of the mineral production in India in 1957 was Rs. 127 crores.

The production targets of coal and iron for the Second Plan are 60 million and 12.5 million tons respectively. The current production is around 44 million and 5 million tons respectively.

By the end of the Second Plan the country would have three additional steel plants, one additional aluminium plant, four additional ferro-manganese plants and thirty-six additional cement factories.

The foreign exchange earned from minerals in 1957 was Rs. 64 crores.

The country spent foreign exchange to the tune of Rs. 200 crores for buying minerals and metals from abroad.

The mineral wealth of India, as at present known, though by no means inexhaustible, comprises an adequate range of useful products necessary for industrial development.

The reserves are ample in respect of minerals essential for basic industries—coal and iron—but the country is deficient in a fairly long list of vital minerals like ores of copper, tin, lead, zinc, nickel, cobalt and in sulphur and petroleum.

Coal, iron ore, manganese ore, ilmenite, kyanite (and mica for which data are not available) are produced in quantities of real importance to industry and other sections of economy.

Of these mica, manganese ore, kyanite and ilmenite are wholly or largely exported.

The position with regard to aluminium ore, refractories, abrasives, limestone, etc., may be considered as fairly adequate while in respect of titanium and thorium ores and of mica, the country has considerable reserves.

connected with the country's hydro-electric development as well as ground water supply.

The Indian Bureau of Mines gives advice to the Government on mineral concessions, takes up exploratory work for proving of minerals and ore deposits required for various industries; undertakes research and beneficiation of low grade ores; inspects mines to ensure improvement in mining practices and conservation of minerals; advises the Government regarding mineral policy; advises the Government and other interested parties regarding the uses, occurrences and marketing of different minerals; and collects and publishes mineral production statistics.

The Atomic Energy Department looks after the development and processing of such minerals and substances as may be used for the production or use of atomic energy or for research into matters connected with it. The Central Government have declared the following substances and all their respective components as prescribed substances for atomic use:—Uranium minerals, thorium minerals, beryllium minerals, vanadium minerals, lithium minerals, radium, zirconium, graphite, deuterium, plutonium, neptunium and minerals containing the above metals and accessories ingredients, such as uraniferous allanite, triplite, columbite and tantalite.

The Coal Board under the Ministry of Steel, Mines and Fuel looks after the mining and development of collieries in the public sector and the distribution of coal to various consumers.

For the import and export of important minerals like iron ore, manganese, etc., there is now a State Trading Corporation under the Ministry of Commerce and Industry.

PRODUCTION, EXPORTS—IMPORTS

The total value of the mineral production in 1957 was of the order of Rs. 1,272 million against Rs. 1,067 million in 1956.

The increase of Rs. 185 million or 17 per cent compared to the total valuation of the previous year was mainly due to the higher production of coal, iron ore, lead and zinc limestone and salt, and the higher prices of coal, manganese ore in the first and the latter half of the year 1957.

The total exports of mineral from India during 1957 fetched foreign exchange worth Rs. 641 million as compared with Rs. 527 million in 1956.

The exports of metals in 1957 were valued at Rs. 34.5 million as against Rs. 54.4 million in 1956. The major fall was accounted for by iron and steel materials, pig iron and zinc.

The value of the imports of minerals during 1957 was Rs. 89.4 million as against Rs. 97 in 1956.

Apatite, asbestos and sulphur accounted for 70 per cent of the total value of imports during the year.

The total value of metals imported during 1957 was Rs. 1,911 million which was Rs. 305 million higher than the preceding year.

The import of non-ferrous metals also registered a marked increase during the year.

The total value of imports (other than gold and silver) in 1957 amounted to Rs. 435 million as against Rs. 354 million in 1956.

Department of Mines

The Department of Mines was formed in 1902 to administer the Mines Act, to hold enquiries into mine accidents and into cases of explosions, inundations, fires, collapses, breakdowns etc. in mines of all types, from stone to coal and gold, etc.

Specialist staff of the Department now includes a Medical Inspectorate, an Electrical Inspectorate and Mechanical Inspectorate.

MINERAL NEEDS OF INDUSTRIES

Mineral	Estimated annual consumption (1956)	Estimated requirements in 1960-61
Coal (m. tons)	25.10	60
Limestone (m. tons)	8.2	23
Gypsum ('000 tons)	836	1.97
Iron ore	3,149	10,500
Manganese ore	100	500
Bauxite	92	175
Ilmenite	Negligible	3
Sulphur	84	210
Rock phosphate	55	400
Petroleum crude (m. tons)	N.A.	N.A.
Pyrites	..	Not estimated

POLICY

As part of the national policy to ensure efficient working of known mineral deposits, a Mines and Minerals (Regulation and Development) Act was put into force on 25th October, 1949. This Act was later repealed by the Mines and Minerals (Regulation and Development) Act of 1957 which came into force on 1st June 1958.

By Section 5 of this Act the Central Government is empowered to make rules for regulating the grants of mining leases or for prohibiting grants of such leases in respect of any mineral or in any area.

By Section 6 of the same Act, the Central Government is empowered to make rules for conservation and development of minerals and by Section 7 to make rules for the modification or alteration of the terms and conditions of the leases granted prior to the commencement of this Act, so as to bring the terms and conditions of leases granted in accordance with the rules made under Sections 5 and 6.

Section 4 of the Act provides that any prospecting licence or mining lease granted after the commencement of that Act otherwise than in accordance with those rules, shall be void and shall have no effect.

The Central Government have so far issued three sets of rules: The Mineral Concession Rules, 1949; The Petroleum Concession Rules, 1949 and the Mineral Conservation and Development Rules, 1958.

In 1956 the Ministry of Steel, Mines and Fuel framed mining leases (Modification & Terms) Rules, 1956, under Section 7 of the Mines and Minerals (Regulation and Development) Act, 1948. These Rules were published in the *Gazette of India* in Part II, Sec. 3 of 15th September, 1956.

In Oct. 1957 the Government of India decided that private parties were in future to be granted

mining leases for minerals listed in Schedule A of the Industrial Policy Resolution of 1956, which is normally reserved for the public sector.

The minerals included in the Schedule 'A' of the Resolution are coal and lignite, mineral oils, iron ore, manganese ore, chrome ore, gypsum, sulphur, gold, diamond, copper, lead, zinc, tin, molybdenum and wolfram.

The step was taken by the Central Government in view of the extreme urgency of increasing India's foreign exchange earnings.

The State Governments were requested to expedite action on pending applications especially in regard to iron ore and manganese.

In 1952 the Government of India enacted the Coal Mines (Conservation and Safety) Act, for the purpose of taking under its control the regulation of coal mines to the extent as provided in the Act. The Indian Mines Act, 1923 was re-enacted after making suitable amendments in 1952 and called Indian Mines Act, 1952.

Government of India has also framed rules for atomic energy minerals and other minerals used for the production or use of atomic energy or for research. This Act is known as The Atomic Energy Act, 1948.

GOVERNMENT ORGANISATIONS

A private company has been set up by Government by name the National Mineral Development Corporation (Pvt.) Ltd. which will be responsible for the exploitation of minerals in the public sector excluding oil, natural gas and coal. It has an authorized capital of Rs. 15 crores. To start with, it will undertake the exploitation of iron ores in Kiriburu, selected for the purpose of export to Japan of two million tons of iron ore a year.

The Geological Survey of India prepares geological base maps showing mineral deposits, and also tackles the engineering problems

The Department also conducts the various examinations for Certificates of Competency for Mine Managers, Surveyors and other mine officials.

The Department publishes monthly Coal Bulletin, an annual Indian Coal Statistics (containing statistics about employment, earnings, production, accidents, mechanisation etc.), periodicals of coal and non-coal mines (containing names and address of all mines and their owners, and the situation of these mines) and an Annual Report about the working of all mines in India.

Employment

Six lakhs twenty-eight thousand and five hundred eighty-one (628,581) persons were employed in mines in 1956. Of these 60 per cent were in collieries.

The actual break-up of the persons employed in mines is given below :—

	1956	1957
Coal	352,429	370,244
Manganese Ore	109,948	110,214
Iron Ore	37,311	40,345
Mica	33,973	35,267
Gold	17,940	17,089
Others	77,040†	79,033†
Total employment in mines	628,581	651,321

†Includes salt mines.

This is exclusive of people employed in connected industries which figure is estimated around two lakhs

ACCIDENTS

The number of accidents in mines is generally 10 to 20 times more than in factories. One reason for this is that conditions change from day to day in a mine as they do not in a factory. The problem gets worse as mines go deeper and more machinery is used.

Large-scale accidents are really about a seventh of the total number of accidents. The danger that is ever present is of individual accidents affecting one or two persons.

The first Mines Act relating to the regulation of labour and safety in mines was framed in 1901 and required inter alia the appointment of qualified managers and the submission of periodical returns.

Rules made under the Act required the provision of two outlets, maintenance of plans, proper lighting and ventilation etc., and laid down precautions to be taken against noxious gases and smoke, against falling of roof and sides, inflammable gas, inundation and during winding and use of explosives etc.

The Mines Act was re-enacted in 1923, and included new provisions relating to hours and limitation of employment.

New codes of Regulations for coal and metalliferous mines were re-framed once more in 1926 to replace the old General Rules. New important provisions related to the submission of 'abandoned mine plans', the maintenance of adequate barriers between adjacent mines and the provision of detaching hooks to prevent over-winding in shafts.

The Surveyor's Certificate of Competency was also instituted at this time.

The Regulations were further amended in 1936 to 1938 to provide against dangers of inundation, premature collapses, fires, inflammable gas, coal dust, blown-out shots, etc.

A stowing fund was also created to assist schemes of stowing to prevent and control fires and collapses.

The employment of women below ground was first prohibited in 1937. In that year, provisions were also made for the establishment of Mines Rescue Stations; they were enforced in 1939. Later amendments of regulations related to the workings of contiguous seams, maintenance of joint survey plans, determination of atmospheric conditions behind sealed-off fire areas and electric shotfiring in mines, etc.

In 1952, a new Mines Act was enforced in supersession of the 1923 Act. A new code of Coal Mines Regulations was also prepared in view of the changing methods of working and advances made in other countries, and was enforced in 1957.

The safety records of mines in India compare favourably with the best performances of the mining industry in any country of the world.

Within the country itself, it has shown a consistent downwards trend despite disasters in 1954 and 1955. In spite of a considerable expansion of the industry during these years, the number of fatalities in mine accidents came down from 425 in 1951 and 463 in 1952 to 335 in 1956 and 254 in 1957.

In the early part of 1958, however, there was a severe set-back due to two major disasters in one night—an explosion at Chinakuri Colliery in West Bengal (involving 178 lives) and an inundation at Central Bhowrah colliery in Bihar (involving 23 lives).

As this gave rise to grave concern, the Government of India called a broad-based tripartite Conference on Safety in Mines to assess the present position and to suggest ways and means to promote safety in mines. The Conference met in Calcutta in August 1958 and made important recommendations, relating to training of mine workers and technicians, safety education, discipline, manufacture of safety equipment within the country, need for research in mining problems, etc.

Steps are being taken to implement the recommendations of the Conference.

FREQUENCY RATES (PER 1000 PERSONS EMPLOYED) OF FATAL ACCIDENTS IN THE COAL MINES 1955-1957.

Country	1955	1956	1957
India	0.89	0.73	0.51
Germany (Ruhr)	0.98	43.50*	1.08
Belgium	0.71	0.56	0.67
United Kingdom	2.40	2.62	2.81

*Including 262 persons killed in Merckville fire.

COAL

The most important coal fields are Raniganj in West Bengal and Jharia and Bokaro in Bihar. The Raniganj and Jharia fields contribute about 82 per cent of the total output. The best coking coal comes from Giridih, Jharia and Raniganj. Other States in which coal is found are Madhya Pradesh, Orissa, Andhra, Madras, Kerala, Bombay, Assam, Rajasthan and Kashmir.

There are about 388 coal mines working in India.

Indian coal falls mainly into two classes namely, high grade steam and low grade steam.

The Metallurgical Coal Conservation Committee placed the reserves of coking coal at 229.6 million tons in respect of selected grade, 595.7 million tons of grade I quality and 69.1 million tons of grade II quality. With stowing, washing and blending the Committee thought that a reserve of 2,000 million tons of good quality

coking coal could be obtained. The Geological Survey of India estimated the reserves of Gondwana coal and Tertiary coal at 38,116 and 4,533 million tons respectively.

The following table gives the details of output :—

Year	Production (million tons)
1948	30.12
1949	31.70
1950	32.81
1951	34.48
1952	36.80
1953	35.98
1954	36.88
1955	38.23
1956	39.28
1957	43.50
1958	45.2

Under the Mines and Minerals (Regulation & Development) Act, 1958, the period of lease to coal mines has been extended to 30 years with the option of one renewal for the same period.

Previously it was for 20 years with an option of renewal of 20 years.

The Coal Bearing Areas (Acquisition and Development) Act, 1957, (Act No. 20 of 1957) was passed by Parliament in May 1957. This Act empowers the Central Government to acquire and develop any coal bearing area in the public interest.

Mechanisation in the industry is at an early stage of development. In 1957, on an average, there were 456 coal cutting machines in about 155 mines which produced 23 per cent of the total output. Also, there were 5 mechanical loaders and about 92 mechanical conveyors in operation.

Out of the 23 million tons of additional coal to be raised by 1960-61, 12 million tons will be raised in the public sector and 10 million tons in private sector.

The existing State collieries are administered by the National Coal Development Corporation (Private) Ltd. located in Ranchi. This will also look after the collieries which will be established during the period of the Plan.

There is a wing under the Coal Production and Development Commissioner who will be the administrative head of the State collieries and the new collieries to be established during the Plan period.

The control of coal, exercised under the colliery control order regarding distribution, price, etc., and the general control over private industry has been entrusted to a separate authority, the Coal Controller.

The approximate quantity of coal consumed by some of the principal consumers in India during 1957 was in million tons: Railways 14.612; Iron and steel plants 2.658; electric supply companies 2.610; cement factories 1.074; cotton mills 1.918; paper mills 0.617; jute mills 0.423; brick burning works 1.167; chemical factories 0.959; Indian bunkers 0.221.

The target for coal production by 1960-61 has been fixed at 60 million tons. At the same time the question of conserving metallurgical coal and washing of coal up to grade 4 has been given high priority during the Second Five Year Plan. There are already three washeries in the private sector at the Jamshedpur, West Bokaro and Lodna collieries which supply washed coal to the Tata Iron and Steel Company and the Indian Iron and Steel Company.

The present production of these washeries is not adequate to meet their expanded needs. It is estimated that by the end of 1960-61 the steel industry in India would require about 9 million tons of washed coal per year.

A Government coal washery with 500 ton per hour capacity is being set up at Kargali which will be in a position to feed 1.1 million tons and 500,000 tons of washed coal respectively to Rourkela and Bhilai steel plants.

Besides this, it has been decided to set up three more State washeries of 500 ton per hour capacity each at Dugda, Patherdih and Bhorudih.

The washery at Dugda will supply generally Bhilai and Rourkela, the one at Patherdih the I. I. S. Co and the third at Bhorudih the T.I.S. Co.

In contrast for the steel plant at Durgapur, is a washery to treat Jharla coals to meet the requirements of that steel plant.

Because of the paucity of coal deposits in south India, high priority has been given to the development of the multi-purpose 'South Arcot Lignite Project' at Weyval. This plant will be producing 980,000 tons per annum of carbonised briquettes. (See under 'Government Industrial Undertakings'.)

IRON ORE

On account of the high ash of Indian metallurgical coals, it is usual in estimating the Indian iron ore reserves to accept only ores with an iron content of 60 per cent and above. (Ores below this iron content are used only in very small quantities in Indian blast furnaces.)

India possesses about one-fourth of the total world reserves of iron ore and is the biggest single country possessing such a large quantity of iron ore deposits as 21,000 million tons, though her output constitutes only 2 per cent of the total world production, compared to U.S.A. 43 per cent and U.S.S.R. 18 per cent.

The production of iron ore in 1958 was 5,24,000 as against 5,074,000 in 1957.

The quantity of the ore exported in 1957 was 216 million tons as compared to 1.98 million tons in 1956.

The whole export of the iron ore has been canalised through the State Trading Corporation from 1st July, 1957.

The principal buyers of the Indian ore are Japan, Czechoslovakia, Italy and Poland in that order of importance.

During 1957 seven major steel companies of Japan entered into contract with the State Trading Corporation of India for the import of 7.2 million tons of iron ore over a period of 5 years. Smaller contracts were also made with the buying organisations in Czechoslovakia and Poland.

Iron and steel scrap exported to Japan in 1954 was 1.05 lakh tons valued at Rs. 185 lakhs.

DISTRIBUTION

The region-wise reserves proved and indicated in the country are shown below in million tons:

HAEMATITE ORES (in million tons)

Bihar and Orissa : Singhbhum 1,047; Keonjhar 988; Bonal 648; Mayurbhanj 60; total 2,743.

Madhya Pradesh : Dhall-Rajhara 114; Balladila 610; Rowghat 740; Jabalpur 100; total 1,564.

Bombay : Ratnagiri 5; Goa 18; Chanda 22; total 45.

Andhra	41
Kashmir	5
Mysore	904
Rajasthan	5
Punjab	2
U. P.	10
Total (Haematite ores) ..	5,316 million tons.

The total possible reserves of haematite ores are 17,690 million tons.

MAGNETITE ORES (in million tons)
The reserves proved and indicated in million tons are :

Madras : Salem-Tiruchirappalli 305.

Mysore : 215.

Bihar and Orissa : 5.

Himachal Pradesh : 60.

Andhra : 20.

Total (Magnetite ores) 605 million tons.

The total possible reserves of magnetite ores are 1,610 million tons.

LIMONITIC AND SPATHIC ORES (in million tons)

The reserves proved and indicated of limonitic and spathic ores are :

Bengal : 500 million tons; and the possible reserves 2,000 million tons.

A coal bearing region 13 sq. miles in Bankura, Dist. (W. Bengal) has been discovered with reserves of 11 million tons.

The grand total of all ores proved and indicated is 6,421 million tons and the possible reserves 21,240 million tons.

Large deposits of high grade ores are limited to a few areas of which the following fields require special mention :—

(i) **Singbhum and Orissa :** In what is known as the Singhbhum Iron Belt, consisting of the Singhbhum District, in which the Tata Iron & Steel Company's Steel Works are situated, and the neighbouring areas, there exist some of the richest iron ore deposits in the world. The iron content of the ore considered usable varies from 60 per cent to 65 per cent.

The proposed Durgapur steel plant will meet the requirement from the iron ores occurring in the neighbouring regions. The Bonal ore range which is the extension of the main iron ore range will feed the Rourkela steel plant. The Indian Bureau of Mines has worked in this area for proving iron ore deposits for the Rourkela steel plant.

(ii) **Mysore :** There are big deposits of haematite and quartz—magnetite ore in Mysore but the latter are of low-grade and would require concentration before using them. The ores used in the Bhadravati Iron Works are from the Bababudan Hills and can be compared to Singhbhum ores containing about 60 per cent iron.

Limonite deposits are also known to exist but they have not been properly explored owing to transport difficulties.

(iii) **Madras :** Very large deposits, mainly magnetite, occur in Salem. They have been estimated at 305 million tons. They will, however, require concentration before use, and there may be considerable losses in the process.

(iv) **Madhya Pradesh :** Large deposits of haematite are found in the Bastar, Drug and Jabalpur districts of this State. Dhall-Rajhara, Rowghat and Balladila ranges in the Drug and Bastar districts are the major deposits in Madhya Pradesh. These three ranges are the main sources of iron ore for the Bhilai steel plant.

The exploratory work for blocking the iron ore deposits at Jharandalli in Rajhara Pahar, from where the Bhilai steel plant will draw its supplies was done by the Indian Bureau of Mines. In addition to iron ore, the Indian Bureau of Mines has also done operations in respect of limestone at Bhanpuri, dolomite at Bhanpuri, dolomite at Balapara and manganese ore at Balaghat area, in Madhya Pradesh for the requirements of the Bhilai steel plant.

(v) **Other Areas :** In Andhra the Balladila range is reported to have haematite deposits which are inaccessible and far away from coal fields.

The only source of high-phosphorus ore is in Bengal. It is poor in iron content being 35 per cent to 45 per cent and the more easily available ore in this locality has been exploited.

The deposits in the Ceded Districts in Andhra are estimated to be not less than 300 million tons.

The contribution of Mysore to iron ore production ranges between 40,000 and 60,000 tons, and the rest comes practically from Bihar and Orissa.

Production

The following is the trend of production:

Year	Qty. in '000 tons.	Value Rs. lakhs.
1952	3,926	2,68
1953	3,855	2,81
1954	4,308	2,89
1955	4,678	3,23
1956	4,898	3,99
1957	5,074	4,34

There has been a growing export trade in iron-ore as indicated below :

Year	Qty. in '000 tons.	Value in Rs. '000.
1951	197	63.44
1952	648	2,99.08
1953	1,094	5,01.75
1954	1,056	4,62.75
1955	1,287	5,61.64
1956	1,982	10,20.00
1957	2,216	11,76.04

The present yearly production of iron ore is around five million tons and the target for the Second Five-Year Plan is 12.5 million tons. Of these, 10.3 million tons are expected to be consumed in the country, and 2.2 million tons would be available for export.

MANGANESE ORE

India is rich in manganese ore. Extensive deposits occur in Madhya Pradesh, Orissa, Andhra, Bombay, Mysore, Bihar, and Rajasthan.

The total reserves of manganese ore in the country are now estimated at over 100 million tons of which 15 million tons are of high grade. It is estimated that the deposits in the main belt of Nagpur and Bhandara in Bombay State and Balaghat and Chhindwara in Madhya Pradesh alone contain reserves of the order of 80 million tons upto a depth of 500 ft. A major part of the output is exported at present.

The following is the trend of output and exports (000 tons).

Year	Production	Exports
1951	1,292	1,017
1952	1,462	1,409
1953	1,902	1,654
1954	1,413	1,082
1955	1,584	1,232
1956	1,687	1,458
1957	1,608	1,706*

* Including ferruginous manganese.

By the end of the Second Five-Year Plan period the production and export figures are expected to reach 2 million tons and 1.5 million tons respectively.

To conserve good quality ore, export has been controlled since 1948. At present the export of high grade manganese ore is allowed to the extent of two million tons including 12,000 tons of battery grade. There is no quota restriction on the export of low grade. To conserve high grade ore Government is encouraging the setting up of beneficiation plant to improve low grade coal and promote export. A heavy media separation plant for beneficiating low grade ore was set up by the Central Province Manganese Ore Co. Ltd. at Dongri Buzurg in Rhandara District in 1954. A similar plant is being set up at Garividi in Andhra.

In the private sector four ferro-manganese plants located respectively at Joga and Ravagada in Orissa, Garividi in Andhra and Dandell in Mysore have gone into production.

The Government is also encouraging the setting up of new units for the manufacture of ferro-manganese for which a production target of 160,000 tons during the Second Five-Year Plan has been proposed.

Export

Out of this 60,000 tons will be required for internal consumption and the rest will be available for export.

The Korean war in 1949 produced a buoyant effect on production, export and prices of Indian manganese ore. The f.o.b. price for 48 per cent manganese which was quoted at Rs. 44 per ton in 1947 rose to Rs. 46 in 1949 and to Rs. 190 in June, 1953.

Ore with 42 per cent manganese and 45 per cent manganese was quoted at Rs. 31.5 and Rs. 43.5 per ton in 1947 and rose to Rs. 104 for 42-45 per cent manganese in 1949 and to Rs. 146 in June 1953.

There was little demand for ore with 38 per cent manganese before 1950. This grade was quoted at Rs. 40 in the third and fourth quarters of 1950. The price rose to Rs. 105 in May 1953. Higher prices upto Rs. 125 per ton were offered for this grade during 1951 and 1952. After June 1953 prices began to soften slightly.

The Korean war ended in 1954. This resulted in a decline in the prices of manganese ore. The ores with 48 per cent manganese and 38 per cent manganese were quoted at Rs. 56 and Rs. 45 per ton respectively in July 1954 as against Rs. 190 and Rs. 100 in June 1954.

The decreasing trend in price and in export ended at the beginning of 1955. The price rose to Rs. 115 in January 1955 for 48 per cent manganese and further improved to Rs. 180 in October and again to Rs. 250 per ton in October 1956.

There was a similar rise in the price of ore with 38 per cent manganese which was quoted at Rs. 105 per ton in December 1955 and Rs. 180 in December 1956.

The prices again showed a declining trend from the beginning of 1957. This continues (August 1958).

This is mainly due to a recession in the steel industry particularly in U.S.A. which is India's principal buyer the supply of Banjar manganese ore and the entry of Russia into the world market. The prices of 48 per cent and 38 per cent manganese ore were quoted at Rs. 175 and Rs. 90 in June 1955 as against Rs. 240 and Rs. 198 in June 1957.

The Government imposed an export duty on grade basis again with effect from 1st September, 1956.

The export duty was as follows :—(i) 30% Mn. or below : Free from duty ; (ii) Over 30% Mn. and not exceeding 40% Mn. : Rs. 10 per ton ; (iii) Over 40% Mn. not exceeding 44% Mn. : Rs. 20 ; (iv) Over 44% Mn. : Rs. 30.

In February 1958 the export duty on manganese ore containing 42 to 44 per cent manganese was brought down from Rs. 20 to Rs. 10 and the duty on low grade ore containing less than 42 per cent manganese was abolished.

In Nov. 1958 the export duty on all grades of manganese ore was abolished.

In 1958 the production of manganese ore was estimated at 1.23 metric tons.

MICA

Mica has been treated as a strategic mineral and India accounts for a big slice of the world trade in it.

The principal mica deposits are concentrated in Bihar, Rajasthan and Andhra.

In Bihar the mica belt is 60 to 80 miles long and about 12 to 16 miles wide and produces "ruby" mica which is in great demand all over the world.

At present Rajasthan is responsible for about 25 per cent of the Indian production. Most of the production from Rajasthan is sent to Bihar to be split and marketed.

The mica belt in the Nellore district in Andhra is about 40 miles long and 5 to 10 miles wide. The greater portion of the Andhra output is of "green" variety.

The statistics of mica production were not reliable till 1955. It was only after the promulgation of the Mineral Conservation and Development Rules that the Bureau of Mines was able to get correct figures.

The production and export figures of Mica are given below :—

Year	Production (crude) (cwt.)	Export (all varieties) (cwt.)
1955 ..	465,014	435,791
1956 ..	560,885	424,950
1957 ..	609,082	440,472

CHROMITE

Chromite is an important strategic mineral of which India has moderate supplies.

The chief deposits are in the Singhbhum district of Bihar, the Mysore and Hassan districts of the Mysore State, the Ratnagiri and Sawant-wadi areas of Bombay State, the Krishna district of Andhra, the Salem district of Madras and the Kronghar district of Orissa.

The estimated reserves of chromite ore are as follows (tons) :

Bihar 20,500 ; Bombay 66,000 ; Madras 220,000 ; Mysore 565,000 ; Orissa 2,443,000.

The following table gives details regarding production and export of chromite ore :—

Year	Output	Exports
1952 ..	25	8
1953 ..	65	15
1954 ..	45	23
1955 ..	89	48
1956 ..	53	42
1957 ..	79	41

Export of chromite which was unrestricted till 1948 was brought under control and a ceiling of 10,000 tons was prescribed. In September 1958 the restriction on exports was removed.

MAGNESITE

Large deposits of magnesite used in the manufacture of magnesium salts, metallic magnesium and refractory bricks are known to occur in Salem (Madras), Hassan, Coorg and Mysore (Mysore), Almora (U.P.), Idar (Bombay), Durgapur (Rajasthan) and Singhbhum (Bihar).

Of these, the chief producing centres are Salem, Hassan and Mysore.

The deposits in Madras and Mysore States are known to contain 100 million tons upto a depth of 100 ft. Large deposits of magnesite have been discovered near Almora in U.P.

The existence of deposits of the order of 1-8 million tons here has been proved.

About a half of the output is used in the manufacture of refractory bricks for steel works and a considerable quantity is exported.

The output and export of magnesite from 1951 to 1957 are given below :—

Year	Output (Tons)	Exports (Cwts.)
1951 ..	117,460	981,707
1952 ..	89,041	625,851
1953 ..	92,748	850,658
1954 ..	70,507	507,236
1955 ..	87,509	492,746
1956 ..	91,711	690,920
1957 ..	88,885	428,858

The total all-India production and export of magnesite in 1956 was : production, 91,711 tons and export, 691,000 cwt.

GYPSUM

Gypsum deposits are known to exist in several parts of India. The better known gypsum bearing regions are in Rajasthan (Jodhpur, Bikaner and Jaisalmer) and in Madras (Tiruchirappalli district).

The total reserves are estimated at 95 million tons, of which more than half is located in Rajasthan.

Smaller deposits also occur in Tehri-Garhwal, Himachal Pradesh and parts of western India ; but these have not been explored.

The annual production from Indian deposits from 1950 is given below :—

Year	Output ('000 Tons)
1950 ..	206
1951 ..	204
1952 ..	411
1953 ..	586
1954 ..	612
1955 ..	690
1956 ..	852
1957 ..	922

The entire output is consumed in the country for the manufacture of fertilizers, cement and plaster of Paris. The cement industry consumes 3 to 4 lbs. of gypsum for one ton of cement produced. The annual requirements of the Sindri fertilizer factory is about 600,000 tons of gypsum.

The reserves of gypsum in India of all grades are estimated at 88 million tons of which Rajasthan alone possesses 64.6 million tons.

Recently the Sindri Fertilizers and Chemicals (P) Ltd. have carried out assessments of gypsum deposits in Rajasthan. According to them about 120 million tons of gypsum of all grades upto 30 ft. are available in Rajasthan, out of which it is indicated 25 million tons are of fertilizer grade containing 85 per cent or above CaSO₄.

The Planning Commission has estimated that by the end of 1960-61 the country will require 1.97 million tons of gypsum. The figure is based on the capacity envisaged for industries which use

this mineral. There is a proposal to set up two additional plants similar to Sindri during the Second Five-Year Plan. One of them is to be located near Bhakra-Nangal.

The present consumption of gypsum by Sindri Fertilisers and Chemicals Ltd. is of the order of 5-3 lakh tons per year and this quantity will increase by 1.5 lakh tons after they have completed their expansion programme of production.

SULPHUR

Native sulphur in deposits of large size is unknown in India though some occurrences have come to light in the hill ranges in the north of India, and small deposits of native sulphur produced by bacterial action on sulphates derived from sea-water have been found in the coastal tract of Masulipatnam and in the Barren Island.

There are occurrences in Puga and Kashmir but they are situated in a difficult terrain.

As there is no production of sulphur in India, the country's requirements are met from imports, for which the recent figures are given below :—

Year	Quantity (cwt.)
1952-53	1,474,418
1953-54	878,287
1954-55	1,519,485
1955-56	1,695,411
1956-57	1,999,142

The mineral pyrites is another source of sulphur. It is found widely scattered in Amjor (Bihar), Taradevi (Simala), Lashtial (Kashmir), Ingaldhal, Chitaldug (Mysore), Polur (Madras).

The quantity available at Ingaldhal is estimated at 1.5 million tons.

Substantial quantities of pyrites are associated with the gold deposits of Wynad in the Nilgiris District of Madras.

Copper pyrites deposits are also a source of sulphur. Some of the Indian coal e.g. Assam coal and Kewas coal are high in sulphur. It has been estimated that one ton of sulphur can be extracted from the wasting of every 100 tons of coal.

The industrial development of the country largely depends on sulphuric acid. Its production went up from 107,000 tons in 1951 to 166,000 tons in 1956. A target of 470,000 tons, representing a 300 per cent increase over the present output, has been set for the Second Plan.

COPPER

India has only a small supply of copper. The country produces on an average 7,600 tons of fine refined copper per year, which is mostly utilised in the manufacture of brass for utensils and coins. The country's entire requirement of electrolytic copper is imported.

The production of refined copper in 1956 was 7,628 tons and in 1957 it was 7,848.

The production of the ore in 1956 was 386,196 tons, and in 1957 it was 403,929.

The more recent figures of import of the copper metal are given below :—

Year	Quantity (000 cwt.)	Value in Rs. crores
1953-54
1954-55	540	8.7
1955-56	362	8.7
1956-57	701	16.1

The only area for copper ore in India is being worked by the Indian Copper Corporation at Ghatsila, Bihar, whose smelting plant is six miles away from the place.

There are other areas in the country where the ore might be worked. The more important of these are the Singhbhum copper belt of Bihar,

Sikkim, Jalpaiguri and Darjeeling district (W. Bengal), Khetri, Daribo (Rajasthan), Tehri Garhwal (U.P.) and Jani (Andhra). Exploration conducted by the Indian Bureau of Mines is now in progress in Khetri and Daribo in Rajasthan and the results are encouraging.

SALT

The country has been not only self-sufficient in salt since 1951 but has now (1956) an exportable surplus of over 200 lakh maunds. As late as 1947 or 1948 the country had had to import about 120 lakh maunds each year to make up for the deficit.

The salt-producing areas are :

The coastal regions of Bombay, Kerala, Madras, Andhra, Orissa and West Bengal for salt from sea-brine ;

Rajasthan from lake brine as well as subterranean brine ;

Kharaghoda, Kuda, Bajana in the Little Rann of Kutch all in Bombay for manufacture from subterranean brine ;

Mandi, for rock salt, in Himachal Pradesh.

The total number of factories is 164.

The total fixed capital in the salt industry is estimated at Rs. 6.45 crores. In 1950-51 the total investment was about Rs. 5.8 crores, of which Rs. 0.9 crore were invested in the public sector. In 1954-55 the total investment was Rs. 8.3 crores, of which Rs. 1.1 crores were invested in the public sector.

The First Five-Year Plan envisaged a production of 837 lakh maunds (3.1 million tons) in 1955-56. This target was surpassed in 1953 when 861 lakh maunds (3.16 million tons) of salt were produced.

The production in 1957 was 983 lakh maunds (3.6 million tons).

The Second Plan target is 1,000 lakh maunds (3.7 million tons) in 1960-61.

The statistics of production of salt are given below (in lakh maunds) :

1946	479	1953	861
1947	516	1954	739
1948	635	1955	811
1949	586	1956	889
1950	713	1957	983
1951	744	1960-61	1,000
1952	769	(target)	

The capacity for production is unlimited. Actual production is limited by market conditions.

The total number of labourers employed per day in the salt industry in 1956 was 41,554 out of which 2,719 were employed in the public sector.

Machinery is hardly in use except in some factories in Kutch and Saurashtra where a few processes are mechanized.

There are both licensed and unlicensed manufacturers. The latter are engaged in work on areas of 10 acres and less. The number of licensed manufacturers in 1948 was 4,176.

The Salt Control Board has decided to impose control on unlicensed salt manufacture.

With the increase in production the exports have also increased. The statistics for 1955 to 1957 are as follows (in lakh maunds):

1955	66.78
1956	83.06
1957	119.40

During the period Dec. 1956 to Sept. 1957, 90,000 metric tons of salt were exported to Indonesia under a Trade Agreement between the Government of Indonesia and the State Trading Corporation of India.

Salt is subject to the levy of a cess under the Salt Cess Act of 1953. To encourage the small-scale part of this industry Government exempted it from the payment of cess with effect from 15th May 1955. The small-scale manufacture was defined as manufacture by persons whose holdings did not exceed 10 acres. Later with effect from 23rd April 1956 all manufacturers with holdings of 10 acres to 100 acres were asked to pay a cess at the rate of only one anna a maund, while those with larger holdings continued to pay cess at the rate of two annas a maund.

There are one Central Board and five regional Boards—in Bombay, West Bengal and Orissa, Andhra, Madras, Rajasthan—to advise the Government on the proper utilization of the proceeds of the salt cess and the development of the salt industry.

The Salt Commissioners prepare every year a programme of distribution to every State based on per capita consumption. The supply from the source to the consuming areas is regulated under a zonal scheme.

The Salt Department is now under the Ministry of Commerce and Industry. The head of the Department is designated Salt Commissioner; the headquarters are in New Delhi. He is assisted by four Regional Officers, one each at Sambhar, Bombay, Madras and Calcutta.

A company entitled Hindustan Salt Company (Pvt.) Ltd. has been set up by Government to take over the Government salt works at Sambhar and Didwana in Rajasthan and Kharaghoda in Bombay. The authorized capital is Rs. one crore.

To induce smaller manufacturers to join together to form co-operative societies a number of concessions are made.

The standard of edible salt has been raised from 94 per cent to 95 per cent sodium chloride content with effect from 1st January, 1957.

Ten test laboratories in the Madras region, one in the R.S.S. Division and two in the Bombay region have been opened.

Under the Second Five-Year Plan developments are proposed along the following lines: establishment of laboratories, development of works and improvement of brine and of water supply, purchase of plant and machinery, medical and educational facilities and other amenities for the staff.

An expenditure of Rs. two crores is to be incurred both in the public and private sectors.

A scheme for sinking shafts into Mandi mines has been approved. Work on this is in progress. This is expected to increase the production from 1.5 lakh maunds to 4 lakh maunds.

A Committee has been set up by the Government of India to enquire into the working of the salt industry and recommend measures for its development.

RARE METALS

What is believed to be probably the world's biggest deposits of radioactive minerals was located "somewhere in North East India" by the Indian Atomic Energy Department early in 1957.

Investigations carried out showed that the deposit had over 3.3 million tons of ore containing 300,000 tons of thorium of concentration of about 10 per cent. and 10,000 tons of uranium of concentration of 0.3 to 0.4 per cent.

The deposits also contain about 80 million tons of ilmenite. It is reported that further investigation might lead to doubling the present estimates.

The deposit is, therefore, considered more important than the famous beach deposits of Kerala, hitherto regarded as one of the world's richest deposits.

India's total reserves of uranium are reckoned at 30,000 tons and of thorium at 500,000 tons.

QUANTITY AND VALUE (a) OF MINERALS PRODUCED IN INDIA, 1956 AND 1957

Mineral	Unit of Quantity	1956		1957

GOVERNMENT INDUSTRIAL UNDERTAKINGS

IN the following pages we give short notes on Government industrial undertakings.

The following are under the Ministry of Commerce and Industry: Hindustan Insecticides, Hindustan Machine Tools Ltd., Nahan Foundry Ltd., National Instruments Factory, Hindustan Antibiotics, Sindri Fertilizers and Chemicals Ltd., Hindustan Cables Ltd.

The following factories are under the Ministry of Defence: Hindustan Aircraft Ltd., Bharat Electronics Ltd.

The following factory is under the Ministry of Communications: Indian Telephone Industries.

The following factories are under the Ministry of Atomic Energy: Indian Rare Earths Ltd., Thorium Plant.

The following factories are under the Ministry of Railways: Chittaranjan Locomotive Works, Integral Coach Factory.

The following factory is under the Ministry of Steel, Mines and Fuel: Hindustan Steel Ltd.

The following factory is under the Ministry of Finance (Dept. of Economic Affairs), Govt. of India: India Government Silver Refinery Project.

The following is under the Ministry of Transport:

Hindustan Shipyard (Private) Ltd.

ATOMIC REACTORS

(Trombay, Bombay 38)

APSARA, India's first atomic reactor, went into operation on August 4, 1956 at the Atomic Energy Establishment Trombay. It is designed to operate at a maximum power level of 1,000 kW and provides a strong source of neutrons.

The reactor is of the pool type with the core suspended from a movable trolley in a large pool (10 feet wide, 25 feet long and 25 feet deep) of filtered and demineralised water. The core consists of about 30 fuel elements made of an alloy of enriched uranium and aluminium and can be placed in three different positions. The water is for cooling the reactor, shielding personnel from radiation and slowing neutrons to the desired energy range. A number of channels through the 4½ foot thick concrete shielding walls of the pool, provide neutron beams for experiments in neutron physics. A thermal column filled with graphite of nuclear purity, is provided at one end of the pool again for neutron physics experiments. At the other end of the pool there is a shielding corner where the 4½ foot thick concrete wall is replaced by a thin aluminium panel thus allowing material to be placed close to the core so that the effects of radiation on different materials can be studied.

FERINA, a zero energy reactor for lattice investigations and new assemblies is being built to carry out studies relating to new fuel configurations. The component parts have been largely fabricated and will be assembled as soon as the building to house the reactor is ready in May 1957. This 100 W reactor will be very useful in the study and design of future power reactors.

The CANADA-INDIA REACTOR, India's largest research reactor, is under construction at Trombay and is a joint Ind.-Canadian project under the Colombo Plan. It goes into operation early in 1960. This reactor will be fuelled with natural uranium moderated with heavy water and cooled with demineralised water. It will have a maximum heat output of 40,000 Kilowatts.

The reactor is housed in a large steel pressure vessel 120 ft in diameter and 135 ft in height served with a 30-ton revolving crane. This steel shell is made from 4" thick steel and is designed to stand a pressure of 15 psi so that in case there is an accident it will completely contain any escape of radioactivity into the outside

atmosphere. Auxiliary equipment for the reactor, the control room etc. are housed in an annular building surrounding the shell. The core of the reactor is an aluminium tank pierced by some two hundred tubes for fuel elements. A few enlarged holes have been provided in the core to accommodate engineering test loops. Twenty-five experimental holes have been built in through the sides for various experiments.

These reactors will be used for research and training in agriculture, biology, chemistry, engineering, medicine, metallurgy, physics and for gaining experience leading to new reactor designs.

BHARAT ELECTRONICS (PRIVATE) LTD.

(Jalahalli P.O., Bangalore)

The establishment of a factory to produce electronic equipment was envisaged in April 1948 in the Industrial Policy Resolution of the Government of India. In pursuance of this policy leading radio manufacturers throughout the world were invited to prepare project reports for the establishment of a factory in India and after these reports had been examined by Indian experts, the French firm Compagnie Generale de Telegraphie Sans Fil of Paris was selected as technical advisers to the Government of India.

Bharat Electronics was registered as a private limited company in April 1954 with its headquarters at Jalahalli, Bangalore. The authorised capital of the company is Rs. 10 crores of which Rs. 5 crores have been subscribed. The entire capital is held by the Government of India.

The capital expenditure upto March 1956 was Rs. 243.48 lakhs.

The factory began production in the latter half of December 1955. The production programme included manufacture of 400 Watt HF Transmitter, HF Communication Receiver, VHF and HF Transceiver, Radio Transmitter, Broadcast Studio Consoles for All India Radio and crystals for HF and VHF equipment. These were required for Civil Aviation Department, P & T, Railways, Police, Meteorology, broadcasting and fire service organisations.

Production of the following equipment is envisaged in the future production programme: Airborne Twin Channel Transceiver, Multiplex equipment, Radars, valves etc.

Its programme takes into account the existing capacity for the manufacture of radio components of the requisite standard available in the country so as to utilize it to the maximum advantage.

The factory has so far produced general purpose high frequency receivers and medium power high frequency transmitters to meet the requirements of the Directorate General of Civil Aviation. In the course of 1956 it manufactured tools and jigs worth nearly Rs. 10 lakhs. It is also proposed to encourage the domestic radio industry.

In the manufacture of equipment maximum mechanisation is aimed at and in planning the order for machinery from abroad, every effort was made to see that the factory becomes as up-to-date as possible. This has been achieved by calling for tenders on a global basis for machinery which having been obtained from Switzerland, France, Germany and Britain, is among the best that could be made available by the suppliers.

The present strength of the employees is approximately 1,200. When the factory is in full production, it will employ about 5,000 persons and will produce electronic equipment worth Rs. 5 crores annually.

The actual production was valued at Rs. 1.47 lakhs in 1955-56, Rs. 20.42 lakhs in 1956-57 and Rs. 48.33 lakhs in 1957-58.

In 1956-57 the company suffered a loss of Rs. 2.18 lakhs.

The company is run by a Board of nine Directors.

Chairman, Board of Directors, O. Pulla Reddy, I.C.S. (Defence Secretary, Government of India).

Board of Management: H. V. Balla (Managing Director), J. P. Kachur (Controller of Finance), C. B. Cariapa (Deputy General Manager), T. T. Joseph (Commercial Manager).

CHITTARANJAN LOCOMOTIVE WORKS

(Chittaranjan, Burdwan Dt., West Bengal)

Branch Office: Hindustan Buildings, 4, Chittaranjan Avenue, Calcutta 13.

The works are under the Ministry of Railways.

Construction started on April 1, 1948 and was completed on September 30, 1952.

Production started on January 26, 1950. The first locomotive rolled out on November 1, 1950.

The total estimated cost is Rs. 14.93 crores.

The total number of workers (under Factory Act), 4,702, apprentices 410, total, 5,112 (corrected up to August 1955).

A monthly out turn of 14 W.G. locomotives has been reached since August 1956.

The revised target for the works is 200 locomotives per year.

Up to March 31, 1958, 681 locomotives had been put into service.

The out turn for the financial year 1957-58 was 164 locomotives.

It is expected that by 1961, the end of the Second Plan, it would be possible to manufacture the first all Indian locomotive. At the end of October 1958, the cost of the imported components was brought down to Rs. 1.23 lakhs per locomotive or about 27 per cent of the total cost. The items imported consisted mainly of bar frames, boiler plates, tyres and axles.

About 5,300 components go to make a complete locomotive. Only a small number is now imported and for a few of these capacity is now being developed at Chittaranjan itself. For some other parts capacity is being developed in the private sector in the country. There are a few components covered by patents which all locomotive manufacturers have to buy.

The production schedule has been as follows:

Year	No of locomotives
1951	18
1952	30
1953	54
1954	86
1955	123
1956	150
1957	164
1958 (up to August)	108

The cost of the Chittaranjan locomotive has come down progressively from Rs. 7 lakhs per engine to about Rs. 4.5 lakhs which is cheaper than the landed cost of an imported locomotive of similar type. With the progress of manufacture, the cost might come down still further.

The Chittaranjan Locomotive Works was the first State-owned undertaking in India to introduce as far back as December 1954, the modern worker incentive system of payment by results, based on time as the yardstick for measuring work and productivity.

Starting with only 275 employees under this scheme on January 1, 1955, the scheme has been extended by stages until it covered 3,206 workers on the same date in 1958.

The various stages by which the scheme was introduced and the number of staff brought

under the scheme at different stages are indicated below. The number of staff under the incentive scheme is given against the date when the scheme was introduced.

January 1, 1955 : 273; July 1, 1955 : 1,132;
January 1, 1956 : 2,642; July 1, 1956 : 3,000;
January 1, 1957 : 3,071; July 1, 1957 : 3,001;
January 1, 1958 : 3,206.

There has been a triple gain as a result of this scheme. The staff under the scheme are earning 25 to 30 per cent of their salary, on an average, as piece-work profits. More locomotives and boilers are being produced. The output in January 1955 was 10 W.G. locomotives and eight W.G. boilers. The production has been gradually stepped up to 14 W.G. locomotives and 14 boilers per month.

General Manager, K. Ramachandran.

HEAVY ELECTRICALS (PRIVATE) LTD. (Ministry of Commerce and Industry)

A factory for the manufacture of heavy electrical equipment in the country is being set up near Bhopal in Madhya Pradesh by the Government of India with the technical collaboration of Messrs. Associated Electrical Industries Ltd., of U.K.

A Private Limited Company, known as Heavy Electricals (Private) Limited, with an authorized capital of Rs. 30 crores was incorporated on 29th August 1956 to control and manage this project.

The project has been divided into three phases.

The factory is scheduled to start production in the latter part of 1960 on switchgears, transformers, control gears and capacitors, and is expected to attain full production, as envisaged in the first phase, by 1965. Production of traction motors, industrial motors and heavy rotating plant is scheduled to commence in phase II from July 1963 and full production of these items will be attained in January 1967. The third phase envisages the production of water wheel turbines and rectifiers in July 1966 achieving the full production rate by July 1970.

Two agreements (i) with a Syndicate of London Banks for long term credit and (ii) with Messrs. Associated Electrical Industries Ltd., London as our Purchasing Agents for Machine Tools and Equipment in London, have been executed to implement the rephased programme.

To man the factory with trained technical personnel, a comprehensive training scheme has been drawn up and the training was expected to commence in the latter part of December 1958, in H.E.P.I. Training School, Bhopal. Engineers, draughtsmen and artisans will be given training in different trades. The programme of training was expected to begin in December 1958 when the first batch of 900 trainees were expected to be admitted to the school.

The total estimated cost of the project is Rs. 61.00 crores. A provision of Rs. 20.02 crores has been made in 2nd Five Year Plan. Capital outlay on the 1st Phase will be Rs. 28.73 crores. Annual output of the factory expected on full production in the 1st Phase is Rs. 6.20 crores.

The factory will employ about a thousand men on reaching full development after the completion of 3 phases and about eighteen thousand men on doubling up production.

Already considerable work has been carried out at the factory site.

HEAVY MACHINERY PLANT (Ministry of Commerce and Industry)

Government have established a new company called the Hindustan Heavy Engineering Corporation (Private) Ltd. with an authorized capital of Rs. 80 crores.

This would include the Heavy Machine Building Plant, the Foundry Forge Plant and the Coal Mining Machinery Plant.

The registered office is at Ranchi.

After obtaining expert technical advice from friendly countries the Government of India have decided to set up (1) a heavy machine building plant, (2) a heavy foundry and forge plant, (3) a mining equipment plant, (4) a heavy machine tool factory, (5) a heavy structural works and (6) a heavy plate and vessel works.

The proposed heavy machine building plant, expected to be located at Hatia near Ranchi in Bihar, will have an initial capacity of 45,000 tons of machinery per year which can be raised later to 80,000 tons. With that capacity the factory would be in a position to turn out every year two steel plants which can produce one million tons of steel each, per year. The principal items to be manufactured in the initial stages will be blast furnaces, steel melting furnaces, coke ovens and by-product plants, rolling mills, cranes, etc. The estimated cost of the plant during the first stage will be about Rs. 20 crores. A contract has been entered into with Messrs. Technoexport of Moscow for the preparation of a detailed project report which was expected to be ready by the middle of 1959.

Following an understanding reached between the Government of India and Messrs. Technoexport of Czechoslovakia in January 1958 for the supply of machinery and equipment required for the foundry project on deferred payment terms, a contract was signed in August 1958 between them. The contract has provided for the payment of Rs. 10 crores by the Government of India to Technoexport in equal annual instalments, the last two of each will fall due in 1967. No payment involving foreign exchange will be due before April 1961. Under the contract Technoexport have undertaken to prepare a detailed project report and supply machinery and equipment required for the first stage of the plant. They will also supervise the erection of the machinery and equipment and provide consulting and technical services.

During the first stage of the project which is designed to meet the requirements of the heavy machine building plant, the annual production capacity of the factory will provide for 25,000 tons of grey iron casting of a maximum weight of 50 tons per piece, 14,000 tons of steel castings also of a maximum weight of 50 tons per piece, 300 tons of non-ferrous castings, maximum piece weight of 1,10th of a ton and 13,950 tons of forgings with a maximum weight of 17 tons per piece.

The plant will also be located at Hatia, near Ranchi close to the Heavy Machine Building Plant. It is expected to start production by the middle of 1962. The cost is likely to be Rs. 20 crores.

The mining machinery plant is being established at Durgapur in collaboration with the Russians. It will have an annual output of 30,000 tons per year of mining machines and equipment and will cost about Rs. 15 crores. The principal items proposed to be manufactured are coal cutters, coal loaders, conveyors locomotives, mine pumps and fans, etc. The detailed project report was expected to be received in the middle of 1959.

The foreign exchange component of the expenditure on setting up the heavy machine building plant and the mining equipment plant will be met from the 500 million roubles credit made available by the Soviet Government.

The heavy machine tool factory, which will manufacture the machine tools required by the heavy machine building plant and other heavy engineering works, will be able to make 3,500 to 4,500 tons of machine tools per year on a single shift basis. Its cost is estimated at Rs. 5 crores.

Negotiations for establishing the heavy machine tool factory, the heavy plate and vessel works and the heavy structural shop were going on (October 1958). The heavy structural shop will turn out 10,000 to 12,000 tons of structural while the plate and vessel works will produce 10,000 to 12,000 tons of plates and vessels required by heavy chemical industries.

Mr. Director, S. Sarangapani.

HINDUSTAN AIRCRAFT (PRIVATE) LTD. (Hindustan Aircraft P.O., Bangalore District, Mysore)

Tel. & Cable address : Aircraft, Bangalore.

The company is managed by a Board of Directors under the Ministry of Defence through a Board of Management.

Founded in 1940, the Hindustan Aircraft, Ltd., is the largest aircraft manufacturing, repairing and overhauling organisation in the East. It has succeeded in establishing a sound aeronautical industry in the country.

Aircraft Activities : In addition to the overhaul and converting of various types of war surplus aircraft, like the DC-3, the Liberator and their engines, H.A.L. have successfully manufactured the Percival Prentice Trainer and the De-Havilland Vampire Aircraft under licence, for the Air Force. H.A.L. have designed, developed and produced in quantity an elementary piston engine trainer designated as HT-2 for the I.A.F. and civil use.

An HT-2, accompanied by a flying instructor and an engineer, was sent to Singapore for a year to give training under the Colombo Plan. It was for the first time that India gave aeronautical engineering assistance to a foreign country.

In 1958 HAL built a new ultra-light two-seater aircraft 'Pushpak', which can rightly be claimed as the people's plane because it is not likely to cost more than Rs. 20,000. Whereas it can be employed with advantage by the Armed Forces for communication duties, artillery observation and liaison flights, the Flying Clubs can use it for the initial training of pilots and the State Governments for flying-squad duties, aerial reconnaissance and flood-relief work.

An aero-engine was also produced for the first time in India. About 95 per cent of this was manufactured indigenously. It was planned to fit the Pushpak.

The Aircraft Division has planned to produce High Speed Supersonic Jet Fighters and Jet Trainer Aircraft while the newly formed Engine Division will produce Jet Engines for installation in these Aircraft.

In 1957 the Government concluded an agreement with the Bristol Aeroplane Company, under which India obtained a licence to make the full range of Bristol-Orpheus turbo-jet engines. Licence negotiations have also been completed with the Folland Aircraft Company for the manufacture by HAL of Britain's latest jet fighter, the Gnat. A few H.A.L. engineers were deputed to England to familiarize themselves with the production aspect of the Gnat and the Orpheus. Specialists from these factories have also come to assist the H.A.L. in developing the industry and training Indian personnel. Quantity production was expected to commence shortly.

The De Havilland Enterprises have appointed HAL as their repair and service agents in India. The factory has also been approved by the Civil Aeronautical Administration of the U.S.A. for the repair and overhaul of Dakota aircraft and engines.

HAL-built Vampire jet fighters today form part of the fleet of the Air Force. The factory is also building jet trainers, thus helping the Service in its transformation into an "all-jet" fighting force.

In 1958 Dec. HAL designed and fabricated a supersonic jet fighter airframe which was awaiting trial.

Pressure of work compelled HAL to open a branch at Barrackpore (near Calcutta) in 1952 to meet the mounting demands of overhauling.

Other activities : HAL has, since 1947, been supplying all-metal third-class broad-gauge railway coaches of their own design to the Railway Board and the production rate is about 200 coaches a year. About 1,400 coaches, with several new amenities, like night-lights, electric

fans, sleeping accommodation and wash-basins, had been delivered to the Indian Railways till October 1958 and proved very popular with the travelling public. These coaches now run on all the divisions of the Indian Railways and are also being used on the popular Janata services. One of the projects undertaken under the second Five-Year Plan is the manufacture of lightweight integral coaches in collaboration with MAN, a leading German firm, the target being 300 coaches a year. HAL has also been manufacturing bus bodies and bus-body kits of its own design for several transport authorities in the country.

H.A.L. has a modern Cast Iron and Light Alloy Foundry, which not only caters for its own needs but supplies castings to Messrs. Hindustan Machine Tools, which is another Government Undertaking, manufacturing high precision lathes, milling and drilling machines. H.A.L. has set up a forge shop to cater for the aluminium alloy forgings required by its Aircraft Division.

Board of Directors:

Chairman, O. Pulla Reddy, I.C.S., Secretary, Ministry of Defence.

Directors, J. R. D. Tata; Air Marshal S. Mukerjee (Chief of Air Staff, Indian Air Force); S. Jayasankar (Financial Adviser, Ministry of Finance (Defence), Government of India); K. Narayanaswamy, I.A.S. (Director of Industries and Commerce (Mysore)); Air Vice-Marshal A. M. Engineer (General Manager and Managing Director).

Board of Management:

Chairman, Air Vice-Marshal A. M. Engineer (General Manager and Managing Director).

Members, Bahadur Murao (Finance Manager); Dr. V. M. Ghatage (Aircraft), A. Zampolno (Factory Manager), Dr. K. W. Tank (Director of Engineering), S. L. Sakre, B.E. (Deputy General Manager (Aircraft)), P. M. Reddy (Deputy General Manager (Engines)); *Asst. Production Engineer*, R. L. Kapoor; *Overhaul Manager*, Wing Commander V. N. Bhargava.

HINDUSTAN ANTIBIOTICS (PRIVATE) LIMITED

(Pimpri, Poona District)

The Government of India Penicillin Plant now known as Hindustan Antibiotics (Private) Ltd. is located at Pimpri, nine miles from Poona. It is a private limited company of the Government of India with all the shares held by the President of India and his nominees. It is being managed by a Board of Directors with Mr S. T. Raja as the Managing Director.

Starting in March 1952, the factory is now complete. It went into full production in August 1955. On 12th September 1955 the first batch of Indian penicillin manufactured at the Pimpri Plant and bottled at its Bottling Plant in Bombay was put on sale. On 11th December 1955, Rajkumari Amrit Kaur, then Union Minister for Health formally inaugurated the first bulk sales when 148,000 mega units of Pimpri manufactured penicillin were sold to leading pharmaceutical houses in India.

The factory is located on a 200-acre site in Pimpri, about nine miles from Poona on the Poona-Bombay Road. It was constructed on the basis of a tripartite agreement between the Government of India, the World Health Organisation (since transferred to United Nations Technical Assistance Administration) and the United Nations Children's Emergency Fund.

The Indian Government provided the land, the buildings, equipment procurable locally, the electric sub-station, water supply system, sewage disposal unit and quarters, at an estimated overall cost of Rs. 1.5 crores.

The UNICEF supplied equipment to the value of \$850,000. The WHO provided technical 'know-how' and training facilities abroad to Indian scientists involving an expenditure \$850,000.

The designed capacity of the plant is 9 million mega (9,000 billion) units per year; but the plant now produces at the rate of 22 million mega units per year as a result of the improvements in penicillin technology. A Pilot Plant, a workshop and all essential services have been arranged for. Large-scale bottling operations at Pimpri commenced in March 1956. In addition, the former Indian Penicillin Committee's Bottling Plant at Bombay was taken over and continued to bottle Pimpri made penicillin. This plant was shifted to Pimpri (1956) and is bottling penicillin, streptomycin and dihydrostreptomycin. The present rated capacity of the plant is 25 million mega units per year and after completion of its expansion programme it was expected to produce about 40 million mega units per year from April 1959.

In terms of finished product for clinical use the production was 17.9 million mega units in 1957 as compared with 5.2 million in 1956. The total production of penicillin, certified and passed during 1957-58 was 21.45 million mega units as against 9.9 million mega units in 1956-57 and .62 million mega units in 1955-56.

Production in 1958-59 was 34 mln. mega units.

The profit during 1956-57 was about Rs. 57,000 while that during 1957-58 (April-March) was Rs. 33 lakhs. The total gross sales during the whole of 1957-58 amounted to over Rs. 1.8 crores as against Rs. 57.8 lakhs during 1956-57.

The factory employs 786 workers including the staff at the bottling plant in Bombay, since shifted to Pimpri.

Equipped with the latest scientific equipment, a model Research Laboratory built at an approximate cost of Rs. 15 lakhs has been put alongside the factory. There are plans to develop this Research Laboratory into a sizable Research Centre on antibiotics offering large-scale research opportunities to Indians and qualified scientific men from all over the world. A quality control unit has been set up to ensure quality of the best Indian Penicillin product.

A production bonus was given at the end of 1958 as a result of satisfactory working.

Mg. Director, S. T. Raja, B.A., LL.B., Barrister-at-Law.

HINDUSTAN CABLES (PRIVATE) LIMITED

(P. O. Hindustan Cables,

Rupnarainpur, Bardwan Dt., West Bengal)

With a view to manufacturing telephone cables in this country, the Government of India have set up the Hindustan Cables Factory at a capital cost of Rs. 125 lakhs, under the technical assistance of Messrs. Standard Telephone & Cables Ltd., London. The Company is entirely owned and financed by the Government of India and is under the over-all control of the Ministry of Commerce and Industry.

The factory started regular production on Sept. 1, 1954. The present capacity of machineries installed is sufficient to turn out nearly 500 miles of telephone cables of different sizes every year which is nearly a crore of rupees in value.

The proposal to double the capacity of the factory is already in hand and when this expansion is completed, it will be possible to manufacture about 800/1,000 miles of cables annually when the country's total requirement for telephone cables would be met.

Keeping pace with the demand of the Indian Posts & Telegraphs Department embodied in the Second Five-Year Plan, the expansion of the factory for manufacture of co-axial cables is already in progress and it is expected to be completed before the expiry of the Second Five Year Plan period, and when commissioned, the factory is expected to yield about 300 miles of co-axial cables per year.

Chairman, Board of Directors, N. Subramanyam, I.C.S.

Directors, M. P. Birla; D. C. Driver; G. D. Ambekar; V. Nihantan; C. A. Corpehus; B. R. Nijhawan; B. D. Kalelkar; V. N. Rajan, I.C.S.; B. R. Murgai; K. N. R. Pillai (*Managing Director*).

HINDUSTAN HOUSING FACTORY (PRIVATE) LIMITED

(Jangpura, New Delhi)

The Hindustan Housing Factory Private Ltd. was taken over completely by the Government of India with effect from 16th August 1958.

The present Directors of the Company are:—

Chairman, K. S. Krishnaswami; *Directors*, A. P. V. Krishnan; O. V. Ramadora; J. M. Rijhwani.

General Manager, R. P. Mhatre, C.E.S.I.

Since taking over the factory fully under the control of the Government, it has made a net profit of approximately Rs. 45,000 for the period ending 31st July 1957. This profit has been made after meeting all the liabilities including depreciation on the plant, machinery and building, leased to the factory by the Government and interest on working capital, etc.

The recommendations of the Experts Committee, which was appointed to look into the feasibility of running this factory have been accepted by the Government and the factory is being run in the light of these recommendations. Under the new set-up the authorised share capital of the company is Rs. 75.00 lakhs and paid-up capital Rs. 40.00 lakhs.

For the period 1-8-1957 to 31-7-1958, the factory achieved a production of Rs. 39.5 lakhs and may make a small net profit of about Rs. 40,000. During the period 1-8-1956 to 31-7-1957, the factory made a net profit of Rs. 38,971.57. During this period the factory faced the difficulty of getting regular supplies of high tensile wire, due to restrictions on foreign exchange. The Woodwork Department of the factory could not step up its production due to the unsatisfactory position of the supply of timber. In spite of these handicaps, the factory has been able to achieve a production of Rs. 39.5 lakhs approximately.

For the year 1-8-1958 to 31-7-1959, the target of production in accordance with the budget for 1958-59 was Rs. 57.00 lakhs, as the position of supply of raw materials had improved. The factory was expecting to get during 1958 a sample order for manufacture of precast concrete railway sleepers from the Northern Railways.

During the current year commencing from August 1, 1958, production was expected to touch the figure of about Rs. 57 lakhs.

The Hindustan Housing factory at present (Nov. 1958) manufactures the following products: (i) Prestressed Concrete Departments: Transmission poles, street light poles, industrial heavy beams, precast roofs with prestressed concrete joists and precast R.C.C. slabs, fencing poles, vibrated cement concrete pipes and pavement flags; (ii) Wood work Department: Door, windows and utility furniture and (iii) Foam Concrete Department: Foam concrete or light weight concrete insulation blocks for cold storage plants and air-conditioned buildings and partition blocks for use in buildings.

The factory also contemplates taking in hand the manufacture of prestressed concrete and precast concrete railway sleepers, when it is decided by the Railway Board to use concrete sleepers for their railways.

For improving the production in the Woodwork Department, arrangement for purchase of seasoning-cum-preservation plant of timber had been made and it was expected that this plant would start working in March, 1959.

HINDUSTAN ELECTRICS (PRIVATE) LIMITED

Udyogmandal, Alwaye (Kerala).
Industrial Area, New Delhi 16.

The factory is managed by Government through a private limited company with a Board of Directors under the Ministry of Commerce and Industry. The Government of India also decided to put the second factory to be constructed at Alwaye, under the management of the same company. The company was

incorporated in March 1954 to manage the affairs of the first Government owned DDT Factory at Delhi.

Delhi Factory

This factory is situated in the industrial suburb of New Delhi and was set up with the assistance of United Nations agencies of UNICEF and W.H.O. (UNTAA). The UNICEF agreed to supply the plant and machinery at a cost of \$250,000 and the W.H.O. (UNTAA) technical assistance to the extent of \$100,000. The Government of India agreed to provide land, buildings, services, auxiliaries and the installation of plant and equipment at an estimated cost of Rs. 35,00,000. It was also agreed to utilise the output of this factory for public health purposes without any cost to the ultimate beneficiary.

The construction of the factory was started in 1953 and continued till the early part of 1955. The factory went into production in March 1955. The capacity of the plant was 700 tons Technical DDT per annum.

Expansion: For doubling up the capacity of the plant an agreement was reached by the Government of India with the UNICEF for an additional gift of equipment worth \$275,000. The designs for the expansion were prepared by the Company's technical staff and the UNTAA expert in Delhi and were approved by UNTAA in New York.

The work on expansion was started in 1956 and was completed in 1958 thus giving the Delhi plant a capacity of producing 1,400 tons of Technical DDT per annum. The factory has since achieved the rated capacity and is producing DDT to its full strength April 1958 marks the beginning of the expansion phase of the Delhi factory.

Production: Since the commencement of operations in March 1955 production has been steadily stepped up. Beginning with 10.6 tons production in April 1955 the factory has now reached the figure of 123.7 tons in August 1958. Production during the previous years was—

1955-56 1956-57 1957-58

Technical DDT 280 tons 518 tons 694 tons
Formulated DDT 401 " " "

The output of the factory till the end of September 1958 was 2,095.29 tons of Technical DDT and 2,311.73 tons of Formulated DDT.*

Distribution: Formulated DDT is distributed according to the indents placed by the Malaria Institute of India. Chipped Technical DDT below 4" mesh is also supplied to the Malaria Institute.

Alwaye Factory

With a view to augmenting the production of DDT and making the country self-sufficient in this vital insecticide the Government of India decided to instal during the Second Five Year Plan period another factory for the manufacture of 1,400 tons of Technical DDT per annum at Alwaye, Kerala State.

Global tenders were invited and after protracted negotiations the firm of Messrs. Singmaster & Breyer Inc., New York, was awarded the contracts for both Technical DDT plant and the Formulated DDT plant on a turnkey basis in the years 1954, 1957 respectively.

Erection of plant and machinery was completed towards the end of 1957. With the completion of the other services like power, steam, water, trial production began in February 1958. The plant is now in regular production.

The Company employs approximately 500 men at both the factories.

Chairman: Dr. A. Nagamja Rao.

Managing Director: S. S. Jagga.

HINDUSTAN MACHINE TOOLS (PRIVATE) LIMITED

(Jalahalli P.O., Bangalore)

This is a private limited company under the Ministry of Commerce and Industry registered in Mysore on February 7, 1953 and located in Jalahalli, Bangalore.

The authorised share capital of the company is Rs. 12 crores.

The original production plans were based on an agreement between the Government of India and Messrs. Oerlikon Machine Tool Works, Buehrle & Co., Zurich, Switzerland, concluded in April 1949 and later revised by a new agreement signed in March 1957. According to the new agreement, the capital and management participation of the Swiss Company was terminated and the shares worth Rs. 20 lakhs originally held by the Company were bought by the Government of India.

The Company produces 18 types of machine tools—H 22 High Speed Lathes of two types, milling machines—vertical, horizontal and universal in two sizes each and radial drills in 1½" to 2" sizes in 10 types. The milling machines are manufactured under a licence agreement with M/s Fritz Werner, the well-known Machine Tool Manufacturers of West Germany, while the radial drills are produced under a similar licence agreement concluded in 1958 with M/s Herman Kolb, also of West Germany.

The addition of the new types of machines will give further flexibility to the production programme of the factory and enable the country to save foreign exchange to the extent of about Rs. 2 crores per year.

The Company employs 2,770 skilled and semi-skilled workers and is expected to employ 3,000 by 1960-61.

Till the end of August 1958, the Company produced 583 lathes and 140 milling machines. The plan targets of production of the Company was 400 machines by the end of the Second Plan period i.e., 1960-61. The Company reached this target three years ahead of schedule by manufacturing 402 diversified machine tools during the financial year 1957-58. The production of 402 Machine Tools valued at over Rs. 1.55 crores by the Hindustan Machine Tools during the year 1957-58 represents two-thirds of India's output of Machine Tools. The year's profits exceeded Rs. three million.

The following table gives details about the ships built at the shipyard:

Name of ship	Date of laying keel	Date of launching	Date of completion and sailing	To whom sold
1. "Jalansha" (8,000 DWT) ..	22- 6-48	14- 3-48	15-10-48	Scindia S. N. Co. Ltd.
2. "Jalaprabha" ..	22- 8-48	20-11-48	31- 3-49	"
3. "Kutabari" (245 DWT) ..	22- 8-48	18-12-48	19- 6-49	"
4. "Jalaprabha" (8,000 DWT) ..	27- 5-48	8- 8-49	14-12-49	"
5. "Jalapankhi" ..	7- 1-49	6-12-49	31- 3-50	"
6. "Jalapadma" ..	28- 1-50	14- 9-50	14- 1-51	"
7. "Jalapanka" ..	28- 1-50	27-12-50	20- 2-51	"
8. "Bharatmitra" ..	28- 9-50	28- 3-51	28- 6-51	Bharat Line Ltd.
9. "Jalapetra" ..	28- 9-50	28- 3-51	28- 6-51	"
10. "Jagran" ..	9- 5-51	15-12-51	4- 6-52	Great " Eastern Shipping Co. Ltd.
11. "Jalapratap" ..	9- 5-51	27- 2-52	31- 7-52	Scindia S. N. Co. Ltd.
12. "Jalapushpa" ..	26-12-51	9- 7-52	30- 9-52	"
13. "Bharatratna" ..	22- 7-52	28- 8-52	21- 6-54	Bharat Line Ltd.
14. "Jalapetra" ..	22- 7-52	9-11-53	12- 8-54	Scindia S. N. Co. Ltd.
15. "Jalavihar" (7,000 DWT) ..	1- 8-53	16- 8-54	14- 6-55	"
16. "Jalavijaya" ..	30- 9-53	28- 9-55	17-12-55	"
17. "Jalavibhava" ..	16-12-53	2-11-55	18- 5-56	"
18. "State of Kutch" ..	2- 9-54	23- 3-56	1-11-56	Eastern Shipping Corporation.
19. "Andamans" (4,000 DWT) ..	11- 8-55	25- 7-56	4-12-57	Govt. of India Home.
20. "State of Orissa" (8,000 DWT)	8-12-55	16- 2-57	31-12-57	Eastern Shipping Corporation.
21. "Jalavikram" (7,000 DWT) ..	16- 4-56	23- 7-57	26- 2-58	Scindia S. N. Co. Ltd.
22. "Jalavarna" ..	4- 8-56	22-11-57	1- 7-58	"

The company is managed by a Board of Directors, as already mentioned, under the Ministry of Transport. **Chairman:** G. L. Mehta; **Managing Director:** Commodore N. B. Loh, I.N. **Members:** R. L. Gupta, I.C.S.; Tulalidas Kilachand; Michael John, M.P.; Shantikumar N. Morarjee; T. M. Goondkas; Dr. Nagendra Singh, I.C.S.; Rear Admiral Daya Shankar, I.N.; Dr. M. V. Krishna Rao; S. S. Shrivastava, I.A. & A.S.; Capt. T. B. Bose, I.N.; Jahangir P. Patel.

* Production in 1958-59: Technical D.D.T. 1,288 tons; Formulated 1,100 tons.

A new line of production has been undertaken from December 23, 1956 for producing cheaper lathes in five sizes. Negotiation is in progress with a French firm, Battignolles.

The sale price of 1,000 mm. lathe has been brought down from Rs. 36,000 to Rs. 29,500 with effect from June 1, 1958 as against the landed cost of Rs. 40,500 for imported machines of equivalent outlay.

Including pending orders for 173 machines brought forward on April 1, 1957 and orders for 438 machines booked during the year 1957-58 there were total orders for 611 machines as against the production of 402 machines.

HMT is the first industry in the public sector in the country where the scheme for labour-participation in management has been introduced on an experimental basis. A Joint Council of Management was established consequent on the signing of the Agreement between the Company and its Employees' Association on September 12, 1958.

The company has substantially expanded its welfare programme for the employees. The number of houses built upto June 1958 for the employees rose to 535 from 319 on April 1, 1957. Two well equipped dispensaries have been maintained by the Company for the benefit of workers and their families. Incentive bonus, enhanced wages and dearness allowance have been given to the employees. The entire wage structure has been rationalised and the minimum wage has been increased by 50 per cent.

Chairman, Board of Directors: Sir Raghavan Pillai.

Managing Director: M. K. Mathulla.

Directors: R. L. Kirloskar; E. W. Issacs; N. N. Wanchoo; K. Narayanaswamy; L. K. Jha; Prof. M. S. Thacker.

HINDUSTAN SHIPYARD (PRIVATE) LIMITED

(Vishakapatnam 5, Andhra Pradesh)

This is located at Vishakapatnam in Andhra Pradesh. It was originally designed by the firm of Sir Alexander Gibb and Partners.

The original design envisaged the provision of eight berths but the shipyard now has four building berths to build ships ranging from 320 to 550 ft in length and from about 5,000 tons to about 15,000 tons deadweight capacity.

A fifth berth suitable for building small craft has also been constructed.

It has a fitting out wharf 1,200 ft long.

There are about 5,000 technicians, workers and staff.

The yard is being managed by Hindustan Shipyard (Private) Limited since the 1st of March 1952 a company in which the Government of India have a controlling interest.

The Board of Directors consists of nine Government nominees including the Chairman and the Managing Director and four nominees of Scindia Steam Navigation Co. Ltd.

The authorised capital of Rs 10 crores is divided into 100,000 ordinary shares. Issued and paid-up capital is Rs 5,06,25,000 in which the Government's contribution is Rs 4,02,00,000.

Technical assistance was provided by Societe Anonyme des Ateliers et Chantiers de la Loire, Paris a French firm of ship-builders under an agreement entered into with them.

This expired on 15th July 1954.

So far (Jan. 1959) 12 steam ships of 4,000 DWT each an unbathed passenger vessel of 45 DWT five diesel ships of 7,000 DWT each two diesel ships of 8,000 DWT each and one passenger-cum cargo vessel of 4,000 DWT for the Andaman trade have been built apart from a launch and a tug.

Orders to build fourteen more ships are under execution. This number includes two naval craft for the Indian Navy.

A provision of Rs. one crore has been made for further development of the shipyard in the Second Plan.

The amount of foreign exchange spent on ships built upto November 1954 during the Second Plan period and the further amount expected to be incurred on more ships planned to be built during the rest of the Plan period were Rs. 355 lakhs and Rs. 564 lakhs respectively.

HINDUSTAN STEEL LIMITED

Board of Directors: G. Panik (Chairman), N. Padmanabha Ayyar, K. C. Mahalingam, S. K. Khanna, C. Deb, Michael John K. Sen, M. Ganapathi N. C. Shrivastava, A. Nagaraja Rao.

Hindustan Steel (Private) Limited was incorporated on 19th January, 1954 as a private limited company with an authorised capital of Rs 100 crores with the object of establishing a steel plant at Rourkela in Orissa State.

With effect from the 1st April, 1957, the Bhilai and Durgapur Steel Projects were also transferred to the management of Hindustan Steel (Private) Limited. The authorised capital was increased to Rs. 300 crores.

In March 1959 this was renamed Hindustan Steel Ltd.

The investment at the end of 1958 was Rs 266.31 crores. Out of this Rs 20.70 crores was by way of loan and Rs 245.61 crores by way of equity capital.

The loan would bear interest at a rate not exceeding one per cent over the bank rate.

When in full production each of the three plants will produce one million tons of ingot steel or in finished salable products 0.72 million tons at Rourkela, 0.77 million tons at Bhilai and 0.75 million tons at Durgapur.

The Rourkela steel plant was formally opened by the President on Feb. 3, 1949 and the Bhilai on Feb. 4 when they started producing iron. They will begin to produce saleable steel in Oct. 1959 when Durgapur will begin to produce iron.

About the cost of these plants the present (Jan. 1959) estimates provide for an expenditure of Rs 439 crores for the three plants proper

—for Rourkela 170 crores, for Bhilai 131 crores and for Durgapur 138 crores.

These estimates do not include the cost of townships or mines and quarries land prospecting and designing development of sources of water supply, power supply facilities upto the perimeter of the plant, personnel required for operation including the cost of training railway works outside the perimeter of the plant, personnel employed directly by the project, customs duty expenditure on medical services, office expenditure and such other ancillary expenditure.

A provision of Rs. 120 crores has been made for these items but again the increase in the cost due to escalation have not been taken into account.

The total estimated outlay at the moment is thus Rs 559 crores.

The estimates for some of the ancillary items are (in Rs. crores): Three townships 42.0; Ore mines and quarries for Rourkela and Bhilai 20.0; Fees to Consultants 8.0; Cost of Soviet staff for supervision 4.3; Other expenditure on prospecting works undertaken by the project outside the perimeter of the steel plant customs duty etc. 45 to 46.

The original estimates for the steel plants on the basis of which provision was made in the Second Plan were:

	(Rs. crores)
Rourkela	124
Bhilai	110
Durgapur	115

Including the production of the three steel plants in the private sector the total production of net saleable steel would be about six million tons by the end of the Second Plan. All internal requirements of steel would be met and there will be a small surplus for export.

A preliminary contour survey for India's fourth steel plant at Bokaro in the public sector has been done. A sum of Rs. 4 lakhs was expected to be spent before the end of March 1959.

Raw Materials

The principal raw materials for the production of iron and steel are iron ore, coal and limestone. For the Rourkela steel project iron ore will be drawn from mines which are being developed in Barso about 50 miles away.

For Bhilai iron ore will be drawn from Rajhara about 60 miles away.

For Durgapur iron ore will be obtained from new mines being developed in Bolani in Orissa.

For Rourkela coal will be drawn from Kargall, Bokaro and Jharla fields.

For Bhilai it is expected that besides Kargall, Bokaro and Jharla the new fields of Korba which are being developed will also supply coals.

As a measure of conservation of the limited resources of metallurgical coal coals from Kargall, Bokaro will be washed in a washery which has been built in Kargall. To wash the coals from Jharla a washery is under construction in Dugda near the coalfields. Until this washery is ready unwashed coals from the Jharla fields will be selected and used for the operation of the Rourkela and Bhilai steel plants.

Korba coals will not be washed.

For the Durgapur steel plant, metallurgical coals of Jharla will be blended with the high volatile semi-caking coals of Barakar. Jharla coals will be washed in a washery which is being put up as a part of the main steel plant in Durgapur.

Limestone for both Rourkela and Durgapur will be obtained from the Birmitrapur-Hathibari area. A preliminary project report prepared for the opening of quarries in Hathibari (Purnanandi) shows that beyond a certain stage, it might be more economic to look for other sources of limestone even if they were somewhat more distant. For Durgapur limestone will be drawn partly from this quarry and partly from existing market sources in Birmitrapur next door.

For Bhilai, limestone will be drawn from the Nandini deposits about 12 miles from the steel works. The quarries in this place are being developed with the assistance of Soviet experts

and until plant and machinery are installed for mechanised mining manual quarrying has been undertaken.

Water, Power

The Mandira Dam built across the river Sankh will provide an unfailing supply of water to the Rourkela steel plant.

A system of reservoirs will supply industrial water to Bhilai. A new coagulation tank connected with the permanent drinking water supply has been brought into use relieving considerably the water works in Bhubaneswar which will supply the new steel township and the old town of Bhubaneswar.

Durgapur will get its water from the river Damodar through a channel which is being constructed by the Damodar Valley Corporation.

With the adoption of the L. D. process large quantities of surplus gases would be available in Rourkela. To utilise these and to have near at hand a source of power supply which would be reliable and responsive to fluctuations, a power plant of 75,000 kW is constructed within the steel works. During peak hours additional power would be obtained from the Hirakud hydro electric system.

For the Bhilai steel plant the main source of power would be the thermal station which is under construction in Korba. In addition, 24,000 kW of power would be generated within the steel works in the thermal station.

In Durgapur the Damodar Valley Corporation is putting up a 150,000 kW thermal station primarily to supply the steel works. Because of the proximity of this the stand by station within the steel works will only be of 15,000 kW.

Training, Personnel

For each of the steel plants it is estimated that on an average about 670 engineers and higher supervisory staff and 6,000 skilled workers and operatives will be required.

256 engineers were sent for training to the U.S.A. Of these 221 have returned after training and no difficulty is anticipated in completing the training of a total of 686 men according to schedule.

A large number of engineers of the Rourkela and Durgapur steel projects will be trained in the U.S.A. The first batch of 110 engineers has returned after training in the U.S.A. The second batch of about 100 is under training in that country (Jan. 1959).

Arrangements have been made under the Colombo Plan for the training of 300 engineers of the Durgapur steel project in the U.K. 68 engineers are now in that country (Jan. 1959).

5 engineers have returned after training in Australia and one in Canada. Canada and Australia have agreed to provide further training facilities for 14 and 12 men respectively.

72 engineers of the Rourkela steel project have been trained in West Germany. Another 23 are under training in that country (Jan. 1959).

A large training establishment is being run at Jamshedpur at which every young engineer is first given preliminary training before going abroad.

A certain number of highly skilled operatives who have to have specialist experience of steel plants, are also to be trained abroad. 261 operatives were sent to the U.S.A. of whom 134 have returned after training. 32 have gone to West Germany.

Arrangements have been made with the existing steel works in India to train 1,800 operatives in about four years. Over 50 engineering firms have agreed to train 1,600 skilled workers at a time. It is hoped that by the time all the three steel plants go into full production, about 13,000 skilled workers would have been trained at these centres.

Engineers, operatives and skilled workers returning from training abroad are engaged in erection, the designing offices and in planning for operation.

* Started producing coke on 23rd Feb. 1959.

Although ultimately there would be only about 7,500 engineers, operatives and skilled workers in each plant, the number of engineers and workers employed in construction is many times more.

At present, there are 10,000 workers employed by the Rourkela project direct and 46,000 by the contractors in Rourkela. In Bhilai, there are 26,000 departmental workers and 38,000 contractors' workers. In Durgapur, there are about 2,000 workers employed by the project and 25,000 by the contractors.

Houses would generally have to be built for all the engineers, skilled workers and most of the semi-skilled and non-industrial workers required for operation. In addition to these, there will be a number of people engaged in sales, town administration, water and power supply facilities, etc. Accommodation would also have to be provided, to some extent, for a few shop-keepers, barbers, washermen and such like who are essential for the life of a community. At the same time, it could be expected that a number of these people might live outside the steel town proper.

Taking in view all these factors, each of the townships will have 7,500 houses with a hospital, health centres, schools, shopping centres and the like.

In Rourkela, over 3,000 houses have been built and another 3,000 are under construction. In Bhilai, over 2,700 houses have been built and another 2,300 are under construction. In Durgapur, 1,400 houses have been built and a further 1,400 are under construction.

In addition, temporary accommodation has been provided to large numbers of construction staff and workers (Jan. 1959).

The company is entirely owned by the Government of India and has a Board of Directors of which the Secretary, Ministry of Steel, Mines & Fuel (Department of Iron & Steel), is the Chairman.

Rourkela: The annual output expected at Rourkela is about one million tons of steel ingots capable of being turned into about 720,000 tons of finished plates, sheets, strips, and tinplate.

The capacity of the plant can be expanded with a few additions to 1.3 million tons. The layout provides for an ultimate expansion to two million tons.

The plant will consist of 3 coke oven batteries of 70 ovens each, a By-Products Plant and 3 Blast Furnaces each producing 1,000 tons of iron a day. The steel melting side consists of 4 Open Hearth Furnaces (of 40 tons capacity) and 3 L.D. Converters which will produce 250,000 tons and 750,000 tons of ingot steel, respectively.

When all the departments of the steel plant are in commission, Rourkela will produce 200,000 tons of plates, 470,000 tons of hot and cold rolled sheets of various gauges and 50,000 tons of tinplate, besides about 50,000 tons of foundry iron.

The by-products plant will deal with 130 tons of tar per day and produce benzol, cresosote, naphthalene and other products.

In addition, a fertilizer plant is being put up to use the surplus nitrogen from the oxygen plant. This will produce 580,000 tons of nitro-limestone. The fertilizer plant will, therefore, be as big as Sindri.

The present (Jan. 1959) estimated cost of the plant is Rs. 170 crores.

Rourkela is in Orissa, 257 miles from Calcutta on the main Calcutta-Bombay railway line.

Resident Director: M. Ganapati; **Technical Advisor:** Dr. H. Kilar; **Chief Engineer:** B. R. Malhotra.

Bhilai Steel Project: An agreement was entered into between the Governments of India and the U.S.S.R. on 2nd February 1954, providing for technical and economic assistance in the erection of an integrated steel plant at Bhilai in Madhya Pradesh. The plant is designed to produce about 750,000 tons of

heavy and medium structural steel and 300,000 tons of foundry pig iron.

At the Bhilai plant again, there will be 3 coke oven batteries but with 65 ovens each and a By-Products Plant. The 3 blast furnaces have a rated capacity of 1,135 tons per day. In addition to producing iron for steel furnaces, 300,000 tons of foundry quality pig iron would also be made.

Iron will be converted into steel in 6 open-hearth furnaces of 250 tons capacity each.

The Rolling Mills will consist of one Blooming Mill, one Rail and Structural Mill, one Continuous Billet Mill and one Merchant Mill.

The production will be 200,000 tons of rails and sleeper bars, 160,000 tons of heavy structurals and 280,000 tons of medium structurals, besides 150,000 tons of billets for re-rolling industry and 300,000 tons of iron for the foundry industry.

The by-products plant in Bhilai will deal with 130 tons of tar per day and produce the same coal tar products as in Rourkela.

The capacity of the plant can be expanded with a few additions to 1.25 million tons. The layout provides for an ultimate expansion to 2.5 million tons.

A Project Division of the Ministry of Steel, Mines and Fuel, Government of India, under the charge of a General Manager, is looking after the construction of this Project.

The estimated cost is about Rs. 131 crores exclusive of the cost of township, one mine, and such other ancillary expenditure. In 1957-58 about Rs. 63.33 crores were spent on the project as against an expenditure of Rs. 9 crores in 1956-57.

Bhilai is in Madhya Pradesh, 156 miles from Nagpur on the main Calcutta-Bombay line.

Gen. Manager: N. C. Shrivastava.

Dy Gen Manager: M. K. K. Nayyar.

Chief Engineer: K. N. Subbaraman.

Durgapur Steel Project: The Steel Plant at Durgapur in West Bengal is the third one in the public sector (besides Bhilai and Rourkela). This will produce about 750,000 tons of light and medium section and bars, in addition to about 350,000 tons of pig iron.

There is room in the layout for expansion of the plant to produce 2.5 million tons per year. The contract for the construction of the steel plant was signed on the 31st October, 1956 with Messrs. Indian Steel Works Construction Co. Ltd., London and the work is in progress. The pilot plant furnace is expected to go into production by October 1959 and the entire project will be completed by the end of July 1961.

At Durgapur also there are 3 coke oven batteries of 78 ovens each and a By-Product Plant.

There will be 3 Blast Furnaces each of a capacity of 1,250 tons per day, which will produce all the iron required for the Steel Melting Shops and also 350,000 tons of pig iron for sale.

The steel-making plant consists of 9 basic Open Hearth Furnaces of which 8 will be of 200 tons capacity.

The Rolling Mills consist of a Blooming Mill, Intermediate Mill, Continuous Billet Mill, Medium and Merchant Section Mills and a Sleeper Bar Plant.

These will produce 100,000 tons of forging blooms and billets, 240,000 tons of Merchant Sections, 200,000 tons of light structurals, 60,000 tons of sleeper bars, 150,000 tons of billets for sale. The wheel and axle plant will make 40,000 tons of wheels and axles.

The estimated cost of the plant is about Rs. 138 crores.

In 1957-58 about Rs. 81.69 crores were spent as against 15.48 crores in 1956-57.

This Project also is being managed by a Chief Project Officer under the direct control of the Ministry of Steel, Mines and Fuel, Government of India.

General Manager: K. Sen, I.C.S.

Dy. General Manager: A. N. Banerjee.

Chief Engineer: Hukam Singh.

WASHERIES

The requirements of washed coals for the three new steel plants in the public sector and the expanded steel plants in the private sector are estimated at about nine million tons.

The washery at Kargali, set up by the National Coal Development Corporation, will supply 1.1 million tons to Rourkela and 0.5 million tons to Bhilai.

Two washeries owned by Tata, one at Bokaro and the other in Jamadoba would, after certain improvements, supply 1.5 million tons of washed coals. The washery at Lodna, which supplies the Indian Iron and Steel Works, has an output of 0.22 million tons.

With the establishment of the washery at Kargali and the improvements to the Tata Washerries, capacity has to be set up only for the balance of about five and a half million tons. A washery is included in the contract for the steel plant at Durgapur to wash Jharia coals to meet the requirements of that plant. The balance about 4.8 million tons—is proposed to be met from three washeries to be put up, one in Dugda, another in Bhojudih and the third in Patherdih.

The washery in Dugda will supply washed Jharia coals to Bhilai and Rourkela, the one in Bhojudih to the Tata Iron & Steel Works and the Patherdih washery to Indian Iron & Steel Works.

INDIA GOVERNMENT SILVER REFINERY PROJECT

47, Strand Road, Calcutta 7.

This project is under the Ministry of Finance (Department of Economic Affairs), Government of India. Erection and installation of the plant and machinery were nearly completed (October 1958) and commissioning was expected to commence shortly.

A sum of Rs. 88 lakhs was initially estimated to cover capital expenditure.

The number of persons employed (October 1958) was about 200. The project is expected to operate in three shifts round the clock with officers and staff numbering about 600.

The project is intended for the extraction and refining of silver from the Q.A. cut and defaced coins and recovery of copper as by-product.

The process of refining is a new patented process, the joint authors of which are late Mr. O. C. Mitter, formerly Master, Assay Deptt. and Silver Refinery Project and Messrs. Demang Elektrometallurgie G.m.b.H., W. Germany.

Master, Assay Deptt. and Silver Refinery Project, Benoy Kumar Bose.

INDIAN RARE EARTHS (PRIVATE) LIMITED

Udyogamandal P.O.

(Alwaye, Kerala)

This factory is owned jointly by the Government of India and the Government of Kerala.

The subscribed capital is Rs. one crore, of which the Government of India's share is 64 per cent and of the Kerala Government 36 per cent.

The factory started production in July 1952. The Plant has a rated capacity to process 1,500 tons of Monasite per annum. The main products are Cerium Compounds, etc., Mixed Rare Earths Chloride, Mixed Rare Earths Carbonate and Crude Cerium Hydroxide. Cerium Oxide and Cerium Naphthenate are also manufactured in small quantities. Tricadium Phosphate is obtained as a by-product.

The Cerium Compounds are exported for use in the manufacture of Misch Metal, Nuclear Cast Iron, Alloys for Jet Engines, Pyrophoric alloys, Enamelling of Cast Iron and Steel, Polishing of Optical Glass, Tinting of Optical Glass, Lenses for aerial photography cameras, Tanning of leather, Carbon for arc lamps, etc.

The Trisodium Phosphate has multiple uses and is being used in textile, paper and other mills and industries for dyeing, bleaching, softening of industrial water in boilers and for general cleaning purposes in mills, factories, hospitals homes, etc.

The Company also operates the Thorium Plant of the Government of India at Bombay where Thorium Compounds are manufactured from raw material obtained at the Alwaye Plant.

Thorium Compounds are sold by the Company on behalf of the Department of Atomic Energy, Government of India.

Chief Administrative Officer, G. Rajagopal Menon.

Works Manager, H. N. Sethna.

Deputy Chief Administrative Officer, K. V. N. Nayar.

Deputy Works Manager, C. M. Mani.

INDIAN REFINERIES (PRIVATE) LTD. New Delhi

A private limited company under the Companies Act 1956 under the name and style of "Indian Refineries Private Limited" was registered in Delhi on August 22 1958, with an authorised capital of Rs 30 crores to control and manage the two oil refineries to be established by the Government.

The company will be managed through a Board of Directors to be appointed by the President. The number of Directors will for the present be 10.

Mr Feroze Gandhi, M.P. has been appointed as the chairman and Mr J. M. Shrinagesh I.C.S., as the Managing Director of the Company.

INDIAN TELEPHONE INDUSTRIES (PRIVATE) LIMITED

(Duravani Nagar P.O., Bangalore Dt., Mysore State)

Railway Station - Krishnarajapuram
(Southern Railway)

City Office: No. 5, Kensington Road, Bangalore.

Tel. Address: "Phonindustry."

Telephones: 5111 (4 lines).

Board of Directors

M. M. Philip I.C.S. (Chairman), R. C. Vaidya, J. J. Eades I.C.S. Tod (Alternate Director), M. A. Shrivastava, M. V. Ramakrishna Rao, T. Shamanna, Jagdish Prasad (Managing Director)

Administration

General Manager, N. V. Shenoi
Joint General Manager, K. D. Vaidya
Financial and Accounting Manager, V. T. Srinivasan

Secretary, D. V. M. Rao.

The I.T.I. (Private) Ltd., the first industrial concern in the public sector after achieving independence, was originally started as a Government department in 1948 under the Ministry of Communications. On February 1, 1960 it was converted into a private limited company with the Government of India as the major shareholder.

The Company has acquired about 372 acres of land and has got its own railway siding. It is the sole agent for its associate—the Automatic Telephone & Electric Co., Ltd., Liverpool, England.

Facts and Figures

Present Production per annum: Telephones - 84,000, exchange lines - 84,000, single channel carrier systems - 131, 3-channel systems - 24, 12-channel systems - 51 bays, co-axial equipment - 72 bays. In addition other telecommunication equipment such as transmission measuring set, voice frequency repeaters, ultraphones, etc. are produced in considerable quantities. Paper condensers and precision screws of various types and sizes are also manufactured surplus quantities of which are supplied to other industries.

The factory normally works two shifts from 6-15 A.M. to 2-30 P.M. and 2-30 P.M. to 10-30 P.M. in addition to the general shift between 8-45 A.M. & 5-15 P.M. The shift system has been introduced to rationalise transport facilities as most of the workers live in Bangalore, six to ten miles away from the factory. Around the factory, a township (Duravani Nagar) has been developed and residential quarters for more than 1,000 families have already been provided. The township has got all modern amenities such as hospital, hostel, school, playgrounds, children's park, bank, market place, cricket and sports stadium, guest house and club.

A Joint Works Council of management and labour was inaugurated on 7th April 1959.

Number of persons employed: 5,500

Amenities

Three fully equipped canteens and two lunch sheds are provided for the benefit of the workers and staff. The canteens are run by the Employees' Co-operative Society. The Society also runs a provision shop for the benefit of the residents of Duravani Nagar.

All the employees are covered by the Employees State Insurance Scheme for purposes of medical treatment. In addition, a well equipped 40 bed hospital and a separate first aid centre have been provided for their benefit.

Other amenities include a well-organised sports club, a joint library and reading room,

a Fine Arts Society, publication of the I.T.I. Magazine, separate rest room for female employees, a crèche for the children of female employees, supply of free milk to employees doing hazardous work, supply of overalls to factory workers at 80 per cent of the cost, free film shows at frequent intervals, etc.

The employees themselves have organised a voluntary fund for giving financial aid to needy employees in emergencies.

In co-operation with the Hindustan Aircraft (Private) Ltd., transport facilities have been provided for about 3,000 employees at very low rates.

INTEGRAL COACH FACTORY Perambur, Madras.

The Integral Coach Factory Project at Perambur, a suburb of Madras on the Madras-Bombay line, is Asia's largest Coach Building Unit and perhaps one of the largest of its kind in the world. It is an important endeavour of the Ministry of Railways included in the first Five-Year Plan, and is a significant step forward in the attainment of self-sufficiency in rolling stock. The factory when in full production will produce coaches worth about Rs. 4 crores per annum and will thus result in a considerable saving in foreign exchange.

The factory structures, which cover an area of 850,000 sq. ft. and concrete roadways totalling 3.5 miles in length are very modern and have been designed and constructed by Indian engineers with an eye to provide the worker ideal working conditions.

Construction started in the latter half of 1952. During the construction stage of the project covering about three years, employment was provided for 3,000 men. The factory, when in full production, will have a labour strength of over 4,000 men in the various categories. The first coach was turned out in October 1955.

The factory has been equipped with the latest machine tools.

The yearly target of railway coaches to be manufactured in the factory during full production is 350 coaches. This was originally planned to be achieved in the course of five years after October 1955, when production was inaugurated in the factory. The target date has been advanced in the light of experience gained. Details of the actual production and targets are given in the table below.

Period	Target as per agreement with the Swiss firm	Revised targets	Actual output
April 1955-March 1956	8	12	12
April 1956-March 1957	48	72	85
April 1957-March 1958	248	174	223
April 1958-March 1959	255	312	148 (upto August 1958)
April 1959-March 1960	331	350	—

Simultaneously the Integral coach factory is planning to work the factory on double shift in order to attain an output of 800 coaches a year.

As against the planned overall procurement of 3,516 B.O. passenger coaches during the Second Plan, a total of 1,822 coaches have been entrusted to the Integral Coach Factory, Perambur, for production. Out of these 601 coaches had actually been turned out from this factory by the end of Sept. 1958 including 179 turned out during the first six months of 1957-58.

The type of coach to be manufactured in the factory called the "Integral coach" is of a modern design developed by a Swiss firm, Messrs. Swiss Car and Elevator Manufacturing Corporation Ltd., Schlieren, Zurich. As compared to the

conventional coach consisting of a wooden body secured to a steel frame, in the Integral coach the all-steel body and frame form one piece, one being welded to the other, becoming a rigid body of tubular design. This type of construction results in the forces sustained by the coach being taken by the entire body, including the skin. The ends of coaches are specially designed to prevent telescoping, a potential source of loss of life, in train accidents. Particular care has been given to ensure smooth running and affording of greater comfort to the travelling public. These coaches are also lighter in weight compared to conventional coaches and this enables a larger number of coaches being attached to a train leading to the easing of congestion.

The factory has begun to manufacture third-class-cum-luggage vans. The factory is also

planning to produce postal vans and first class coaches.

A Technical Aid Agreement was entered into with the Swiss firm for successfully establishing production of this new type of coach and imparting the "know-how" to the Indian personnel. This work has since been completed and all the Swiss engineers and technicians have left for their country. The factory is now managed entirely by Indian personnel.

Technical training: A Technical School to train all the skilled workmen of the factory was established in March 1964, 18 months ahead of production.

The first batch of 70 apprentices was available on the Shop floor by the end of 1964.

A hostel to accommodate 250 boys was completed on 1st August 1966.

A proper theoretical Training School was completed subsequently and has been functioning since November 1956.

Furnishing Unit: Due to the increased load thrown on the Railway Workshops it was considered necessary by the Government of India that a furnishing Annex should be attached to the Integral Coach Factory for furnishing the body shells. Necessary arrangements are being done to expedite bringing the furnishing unit into full production and also to have additional coach building capacity.

The construction of a furnishing Annex to the factory is well under way. In the meanwhile the factory has started furnishing its own shells in the temporary furnishing arrangements inside the workshops of the shell factory as well as in the interim furnishing sheds constructed for the purpose. Up to the end of August 1966, 135 integral coach shells produced by the factory have been furnished. It has been so planned that when the furnishing Annex is ready to start production work, skilled personnel, machinery etc. may be shifted to the Annex from the temporary arrangements. The peak production capacity of furnishing 350 shells could, as per present plans, be attained in the first production year itself viz. 1960-61.

Technical Assistance to Indigenous Industries: The purchases of the Integral Coach Factory have gone up from Rs. 14.71 lakhs in 1952-53 to Rs. 529.66 lakhs in 1957-58 and by 1960-61 it is expected that the purchases will go up further to Rs. 7 crores. These purchases include production tools, pneumatic tools, small tools, and hand tools, raw materials such as steel for coaches, coach components like axle boxes, wheels and axles, roller bearings, steel tubes, draft castings, M. I. castings, brake blocks, vacuum brake cylinders and reservoirs, interior fittings, stainless steel screws, bright screws and nuts, etc. 500 different firms in the country have benefited from these purchases. Several industries are developing in the country to meet Integral Coach Factory requirements. A department has also been organised to give technical assistance to such firms as are anxious to make supplies to I.C.F.

Design Drawing Office: Vigorous efforts put in during the preceding years for the establishment of a Design Office for introducing new designs of Integral Coaches have borne fruit with the completion of the designs of the T.L.R. (i.e. third class, luggage and brake-van) in the Factory Design Office. The manufacture of the prototype coach in the Factory was nearing completion (October 1966). Modifications to the existing bogies to improve their riding qualities were also being tackled and the design of a first class coach of integral type was expected to be taken up very shortly.

Cost of the Coach: With increased outturn and improvement in the skill and technical know-how of the staff, the cost of production of coaches has from the first batch onwards registered a systematic downward trend. The latest cost of production of an indigenous manufactured shell is only Rs. 89,000. This cost, apart from being considerably below the landed cost of the complete Schlieren shell, i.e. Rs. 1,87,000, is also lower than the ex-works

price of a similar coach obtainable in the continent which is Rs. 1,02,000. It may also be mentioned that the I.C.F. built coach incorporates certain additional fittings and necessitates certain additional operations at an aggregate cost of Rs. 8,000 per coach.

Amenities: A Colony of more than 400 quarters has been provided to accommodate the essential staff. All the modern amenities are included in this Colony, which has a Primary School, a Children's Park, a Recreation Club and a Co-operative Store.

For the Furnishing Annex a colony of 200 quarters has been sanctioned. This colony is being planned contiguous to the ICF Colony and suitable expansions of amenities by way of Children's School, Recreation area, Marketing area and so on are also being contemplated.

It has been the aim of this administration to provide good working conditions for workmen in the factory. Lighting and ventilation of the shops have been given special attention. Staff Canteens run on a co-operative basis have been provided near the main entrance as well as in the office. Water coolers to supply cooled drinking water have been installed in the shops. Bathing places and lavatories have been provided at convenient places.

The total number of employees (permanent and temporary) on the rolls as on 31st March 1966 was 4,779 as against 2,542 as on 31st March 1957.

Chief Mechanical Engineer: K. Swarup; **Deputy Financial Adviser and Chief Accounts Officer:** M. Sundar Raj; **Deputy Chief Mechanical Engineer (Furnishing):** K. M. Alana; **Deputy Controller of Stores:** R. K. Tandon.

NEYVELI LIGNITE CORPORATION (PRIVATE) LTD.

(Ministry of Steel, Mines and Fuel, Government of India.)

In view of the importance of developing an economic source of fuel and power for south India which is at present handicapped by limited hydro resources, a high degree of priority has been given in the Second Five Year Plan to the mining, utilisation and processing of the extensive lignite deposits which occur at Neyveli in the South Arcot District of Madras.

Preliminary investigations of these deposits were undertaken first by the Madras Government and then by the Central Government from January 1, 1956, in consultation with Messrs. Powell Duffryn Technical Services Limited, a U.K. firm of technical consultants, whose services were made available to the Government of India under the Colombo Plan.

These preliminary investigations, including large-scale pumping tests, having proved the feasibility of economic mining and utilisation of the Neyveli lignite, Government have accepted, in principle, the execution of the Integrated Lignite Project at an estimated cost of about Rs. 75 crores and have sanctioned the mining part of the Project at a cost of about Rs. 17 crores.

The Integrated Project envisages the mining of 8.5 million tons of lignite per annum to be utilised for:

- production of 250,000 kW of power in a thermal power station using lignite as fuel;
- production of fertilisers with a nitrogen content of 75,000 tons per annum, in the form of urea; and
- manufacture of 714,000 tons of raw lignite briquettes per annum to be processed in a low temperature carbonising plant to yield 380,000 tons of carbonised briquettes per annum for use as domestic and industrial fuel, 49,000 tons of char dust, 6,400 tons of motor spirit, 51,300 tons of tar and 1,033 tons of phenol.

A detailed mine plan involving an estimated expenditure of Rs. 17 crores for the development and production phases of the mine submitted by the technical consultants was sanctioned by the Government. The scheme was inaugurated

by the Prime Minister on April 20, 1957. Messrs. P.D.T.S. Ltd. have been appointed consultants for the Mining Scheme. Orders for Rs. 5.6 crores worth of conventional and specialised machinery required for removing the overburden and developing the mine for full production have been placed.

All the conventional equipment have already arrived at site and items of specialised mining machinery are beginning to arrive. The estimated cost of production of lignite has been worked out at Rs. 8 to Rs. 10 per ton which compares favourably with the price at which coal is available in south India. In accordance with the time schedule for the mining project, the mine will be in full production by December 31, 1960.

The total quantity of overburden removed till the end of Dec. 1956 was 5.99 million cubic yards against a target of 5.66 million.

The Central Water and Power Commission have drawn up the Project Report for the 200 MW. thermal station, the most important constituent scheme in the Integrated Lignite Project. The Thermal Station Scheme is one of the schemes to be financed from the credit offered by the U.S.S.R. in respect of which an agreement was signed in Delhi in 1957.

The Project Report for the Fertilizer Unit has also been drawn up. The total capital cost of the scheme has been estimated at Rs. 21 crores.

Tests conducted on bulk samples of Neyveli lignite in West German laboratories have established that the lignite is of a high quality, capable of yielding satisfactory briquettes, both raw and carbonised on a commercial scale.

Further tests on a pilot plant scale are to be conducted at Neyveli with the help of pilot plant equipment, provided under the T.C.M. aid, for determining the optimum conditions under which the lignite should be briquetted and carbonised. Thereafter the question of the type of press to be used and the choice of consultants will be considered.

This component of the project is estimated to cost Rs. 10 crores and will be commissioned in accordance with the time-schedule by December 31, 1961.

Key officers of the Project have returned from a study tour abroad.

A railway siding about four miles long is being laid (Dec 1958) from Omandalam Railway Station three miles away from Neyveli, to facilitate easy transport of materials and machinery to the work spot during the constructive stage and the transport of finished products during the production stage. The sub-graded work has practically been completed and the super-grade work, now in progress, is expected to be completed in the latter half of 1958.

An insulator manufacturing factory, one of the allied industries of the lignite project, was expected to go into production early in 1959. The insulator factory's capacity would be 720 ton of h.t. insulators and 420 tons of i.t. insulators per year.

A new township consisting of 30 sectors with all modern amenities like parks, schools, shops, hospital etc., has been planned, to accommodate offices, factories, staff and workers of the different units of the Integrated Project. It is to be constructed according to a phased programme. Construction work has already started.

Pending construction and development of the new township, a minimum number of temporary buildings have been constructed in the area south of the railway line, to meet the requirements of office and residential accommodation and to provide amenities on a modest scale.

As the mining gains momentum, the labour force of Project will go up. A full time labour welfare officer has been appointed to look after the interests of the workers. An Information Officer has also been appointed.

The Corporation has opened a middle school and an elementary school for the benefit of the children of its employees. There is a dispensary at Neyveli with facilities for maternity cases.

When the township is constructed, there will be a fully equipped hospital.

The ownership, management and administration of the Neyveli lignite project has been entrusted to a Government of India-owned private limited company, Neyveli Lignite Corporation (Private) Ltd., which started functioning on 8th December 1956 and has its registered office at 151, Lloyds Road, Madras 14.

(Chairman, Board of Directors, C. R. Pattabhiraman, B.A., LL.B. (Lond.), Bar-at-Law, M.P.

Managing Director, T. M. S. Mani, I.C.A.

MACHINE-TOOL PROTOTYPE FACTORY, AMBERNATH

The Machine-tool Prototype Factory at Ambernath near Bombay was set up in 1953 by the Ministry of Defence, Government of India under the Director-General, Ordnance Factories, in collaboration with a Swiss firm. It was a pioneer project to design and develop ordnance weapons as well as machine tools.

Since its inception the factory has established production of several types of precision machine tools of its own design, and supplied these to various Government establishments and industry. Further development programmes were in hand (September 1958).

To overcome the shortage of skilled artisans necessary for the production of armaments, a Training School has been attached to M.T.P.F. since its inception. The school helps to meet the requirements of other ordnance factories also.

NAHAN FOUNDRY (PRIVATE) LTD.

(Nahan, Sirmur District, Himachal Pradesh).

This was started in 1875 and has been continuously expanded.

The authorised capital is Rs. one crore and the paid-up capital Rs. 40 lakhs. The number of persons employed is about 500 at Nahan and about 150 in the agencies.

Production consists of improved type of cane crushers, bullock and power driven; centrifugal pumps in different sizes; paddy threshers; ploughs; corn-sheller machines (a new patented machine for separating maize corn from their cobs); chain-cutters of different types; boiling pans; flour mills, power and bullock driven; and miscellaneous items.

The company has a network of about 90 agencies in north India which cater to the needs of the cultivator in the villages in respect of machines, and also undertake repairs at site.

It is managed as a private limited company (which took over on Jan. 1, 1953) with the President holding all the shares. The affairs are looked after by a Board of Directors appointed by the President of India and is under the administrative control of the Ministry of Commerce and Industry. It is a pioneer industry in northern India for the manufacture of cane crushers and "Sultan" is a speciality all over India.

General Manager, C. S. Shukla.

NANGAL FERTILIZER—HEAVY WATER PROJECT

(Ministry of Commerce and Industry, Government of India).

The factory which will be located at Nangal on the right (western) bank of Sutlej, can be divided into three major units: a) silos, b) electrolysis and rectifier plant and c) ammonia and other allied plants. It will produce nitro lime stone fertilizer with an annual capacity of about 3.95 lakh tons. It will also produce 12 to 15 tons of heavy water for the use of the Department of Atomic Energy. The factory which is likely to cost about Rs. 27.5 crores, is expected to go into production early in 1960.

The Nangal Fertilizer Heavy Water Project will be the first factory in India to produce ammonium nitrate, a fertilizer with high percentage of nitrogen content.

The control and management of the Project were formally transferred to Messrs. Nangal

Fertilisers and Chemicals (Private) Limited, a company entirely owned by the Government of India, on April 20, 1956. The authorised capital of this company is Rs. 30 crores.

Messrs. Vitro Engineering Division of New York (U.S.A.) have been engaged as Technical Consultants for the project.

The contract valued at over Rs. 3.63 crores for electrolysis, which constitutes the first large section of the plant, was given to an Italian firm in March 1957.

Another contract was given in 1957 to a French firm for the supply, erection and commissioning of the fertilizer group of plants for the project. Half of the fertilizer plants are due to be erected and put into commission by the end of 1959 and the remaining half by the end of March 1960.

A contract was given to a British firm Messrs. English Electric Company in December 1957 for the supply of electrical equipment for the project. The equipment is estimated to cost about Rs. 2.24 crores. The order for the supply of accessories and auxiliaries for the electrolysis plant has been placed with an Italian firm. Satisfactory deferred payment terms have been agreed to by the suppliers for all these.

Orders for the heavy water plant was under examination (1958) by the Government and was expected to be placed at any time.

The first consignment of the electrolysis comprising 25 per cent of the entire plant arrived at the factory site and the second consignment comprising another 25 per cent was shipped from Italy in August 1958. Construction work on the buildings for the electrolysis, nitric acid and ammonia plants and empty bag storage building has commenced. (Nov. 1958).

The contract for the entire factory (civil works) has been given. Construction of quarters in the permanent township in the first phase of construction is making steady progress.

The laying of the railway track from Nangal Dam railway station, including Nangal Dam bridge, up to the factory entry point is almost complete. The laying of the track from this point to the site of electrolysis plant building is progressing. Electrical equipment were expected to start coming in from the beginning 1959.

A detailed programme of recruitment of engineering and technical personnel for the project has been chalked out. It has been arranged to train at the Sindri Factory, 95 apprentices for the project in different branches of engineering.

The power requirements which will be of the order of 160,000 kW are to be supplied by the Bhakra Dam Project.

NATIONAL INSTRUMENTS (PRIVATE) LTD.

(15, Wood Street, Calcutta 16 and Raja Subodh Mullick Road, Jadavpur, Calcutta 32)

Total investment Rs. 1.16 crores. Value of production and repair for 1957-58 Rs. 30.01 lakhs. Number of persons employed 1,074.

This is a Government owned Company under the Ministry of Commerce and Industry.

It is one of the oldest if not the oldest factory in India engaged in the manufacture and repair of scientific and mathematical instruments in India.

It manufactures prismatic compasses, theodolites, levels and other survey instruments, prismatic binoculars, telescopes, thermometers and hydrometers of various types, excise apparatus, barometers and other meteorological instruments, profile projectors, students' microscopes, pantagraph, pressure and vacuum gauges, demonstration eyepieces, sextant, drafting machines and other drawing office equipment and also repairs all types of scientific and aircraft instruments.

The Planning Commission had provided Rs. 180 lakhs for the first plan period to reorganize the factory including construction of its own building at Jadavpur (on the outskirts of Calcutta), the first phase of reorganisation being complete. The major portion of the factory

had been shifted to its new building at Jadavpur and the rest was expected to be shifted by the beginning of 1959.

Under the Second Five-Year Plan, the manufacture of the following has been included: Special microscopes, medical diagnostic instruments, recording instruments and cameras.

Practical training facilities have been provided to the various categories of trainees.

The development plans of this factory are so planned that this factory may serve as a nucleus in future for the manufacture of instruments, precision and scientific, which are at present imported.

Managing Director, S. D. Joshi, B.Sc. (Hons.), P. Edy Tech. (I.K.)

Works Manager, L. M. De, B.Sc. (Eng), AMIE Prod. EXAMINER.

Secretary, S. Natarajan, B.A.

OPTICAL AND OPHTHALMIC GLASS FACTORY

(Ministry of Commerce and Industry).

The Government of India have selected Durgapur in West Bengal as the site for setting up the optical glass plant. The proposed plant will manufacture 10 tons of optical glass and 200 tons of ophthalmic glass per year.

A contract has been entered into with Messrs. Techno-export of Moscow for the preparation of a detailed project report. Foreign exchange expenditure on this project will be met from the credit extended by the Government of the U.S.S.R. The National Industrial Development Corporation is currently making the necessary arrangements for the work relating to the project.

The scheme is likely to be completed by 1961-62 and an expenditure of Rs. 2.30 crores is estimated to be incurred on the project.

SINDRI FERTILIZERS AND CHEMICALS (PRIVATE) LIMITED

(Sindri, Bihar)

This is a State-owned and State-managed private limited company under the Ministry of Commerce and Industry, Government of India, in which all shares are held by the Government of India. The Company was registered on December 18, 1951.

Authorized share capital—Rs. 50 crores; paid-up—Rs. 17 crores. A further sum of Rs. 7.5 crores was invested by the Government as a loan at 4½ per cent interest.

The factory went into production on 31st October 1951; gas plant started 13th April 1951; production of anhydrous ammonia started 28th August 1951; marshalling yards completed 20th August 1951; bagging plant commissioned 4th February 1952; bags of ammonium sulphate went out of the factory 7th February 1952.

The gross profits for the year 1957-58 amounted to Rs. 3,52,11,246. After providing Rs. 1,96,11,230 for depreciation and utilising Rs. 13,18,167 in paying interest on the loan to the Government of India and adding Rs. 20,40,240, the amount brought forward from last year's account, the balance available was Rs. 163,31,109. Out of this amount, Rs. 33,30,722 has been provided as reserve for repairs and renewals, Rs. 25,00,000 as taxation reserve and Rs. 85,00,000 as dividend to the shareholders. This leaves Rs. 20,00,387 to be carried over to the account for 1958-59.

Sindri has set up a record for efficient production and successful working. The total production of ammonium sulphate during 1957 was 3,32,031 against the target of 330,000 tons. A record production of 82,891 tons was achieved during December 1957 giving a record daily average of 1,061 tons, the highest ever achieved.

The fertilizer despatches to the various States during 1957-58 were 3,29,829 tons.

The factory consists of coke oven, gas, ammonia, sulphate plants; power from 80,000 kW Power House; water (some 12 million gallons a day under full production condition). Adequate arrangements have been made to ensure this large supply of water from the Damodar river for the factory and connected activities.

A barrage has also been thrown over the Gomal, a tributary of the Damodar, impounding about 1,000 million gallons of water as a stand-by.

Then there are a bagging plant, marshalling yards and 12-mile railway track.

The Coke Oven Plant built at a cost of Rs. 2.81 crores and designed to produce 600 tons of coke per day and other important by-products of industrial importance, went into production on September 1, 1954.

The cement factory built by the A.C.C., with an installed capacity of 600 tons of cement a day for the utilisation of Sindri's by-product—chalk sludge—went into production on 1st September 1955.

Sindri's Rs. 13 crore expansion scheme for the production of 70 tons of urea and 400 tons of double salt per day, is nearing completion (November 1958). Practically all the plants have been erected and initial testing of equipment has started.

The township sprawls over an area of 1,700 acres, has six groups of composite and self-sufficient colonies, all modern amenities (electricity, water supply, sanitary services, roads).

There are also a 100-bed modern hospital, four branch dispensaries, one first-aid post,

two high schools for boys and girls, one middle school, three primary schools and one Kindergarten school, three post offices, three recreation centres and several shopping centres.

The Government of India, according to the annual report, sanctioned during the year 1957-58 an ad hoc ex-gratia payment of Rs. 16 lakhs for the staff. Out of this amount, Rs. 12 lakhs were distributed in cash and a sum of Rs. 4 lakhs was being utilized for making an appropriate addition to the provident fund of all employees drawing upto Rs. 500 and having more than one year's service on 31st October 1957.

The per capita expenditure on workers' welfare works out to Rs. 173.8 against Rs. 167 during 1956-57.

Sindri has developed into an important training centre for young engineers and technicians. Sindri has already provided several trained technicians and engineers for other industries recently set up by the Government. During 1957-58 there were 70 graduate apprentices and 63 trade apprentices under training. In addition there were 60 graduate apprentices under training for the Nangal Factory and 43 trainees for the Hindustan Steel. Training facilities are being expanded with a view to training more technical personnel to man supervisory posts as a result of Sindri's expansion and the setting

up of new fertilizer factories during the Second Five-Year Plan period.

At present only about 55 per cent of the requirements of fertilizer of the country is met by Sindri.

Price—The selling price to the Central Fertilizer Pool is Rs. 280 per ton.

Board of Directors:

Chairman, Sir Shri Ram.

Members, J. J. Ghandy; S. R. Vasavada; B. C. Mukherji, I.C.S.; Dr. A. Nagaraja Rao; T. C. Furl, I.C.S.; K. L. Ghel; Digvijaya Narain Singh, M.P.; K. Raman, I.C.S.; Dr. Hussain Zahir.

Mg. Director, V. Nilakantan.

THORIUM PLANT

(Trombay, Bombay 38)

The plant went into production in August 1955.

It produces a few hundred tons of thorium and a few tons of uranium a year which is equivalent in fuel value to roughly 1,000 million tons of coal. This is about thirty times the present annual production of coal in India.

(See also under 'Research'.)

STATE-OWNED OR STATE-AIDED

GOVERNMENT CEMENT FACTORY

Churk, Mirzapur, U.P.

The Government Cement Factory was established at Churk in Mirzapur District at an initial cost of Rs. 4.5 crores. The factory went into production in September 1954. Its installed capacity is 700 tons per day. The factory employs over 2,000 persons.

In 1957-58 the cement production in the factory was 2,39,633 tons as against 1,96,350 tons in 1956-57. The factory supplied over 40,000 tons of cement for the construction of Rihand Dam during 1956-57.

The expansion programme, costing Rs. 275 lakhs, has made considerable headway. Orders for the purchase of plant and machinery costing over Rs. one crore, have been placed with a Czechoslovakian firm and the expansion unit is expected to go into production in 1960. With the completion of the expansion programme the factory will start producing 1,400 tons of cement per day.

GOVERNMENT PRECISION INSTRUMENTS

FACTORY
Lucknow, U.P.

The factory was established in 1950 at Lucknow, for the manufacture of water meters, microscopes and other precision instruments and went into production in 1952, when the turnover was nearly 300 water meters per month. The present production of water meters and microscopes is 3,000 and 25 per month respectively. Till October 1958 in all 97,614 watermeters and 654 microscopes had been produced most of which was sold in various parts of the country.

Besides the established lines of production of water meters and microscopes, manufacture of various types of surgical instruments has also been started. In addition, the Government of India have granted licence for the manufacture of pressure gauges in the factory.

The factory, now a self-supporting economic unit, showed a net profit of Rs. 1,24,596 in 1957-58 as against the corresponding figure of Rs. 91,601 for the year 1956-57.

KOLAR GOLD MINING UNDERTAKINGS

Kolar Gold Fields, Mysore State.

Total investment: Rs. 180.29 lakhs.

No. of Mines and their location: 3, all located in K.G.F.

Total annual output and average value: Gold (1957-58): 1,63,123 five ounces, Sale proceeds: Rs. 474.98 lakhs.

No. of workmen: About 25,000.

Names of companies taken over: (1) The Mysore Gold Mines; (2) The Champion Reef Gold Mines; (3) The Nandydroog Mines.

During November 1956, the gold mines in Kolar Gold Fields, established in 1880, passed from the private sector to the public sector under the provisions of the Kolar Gold Mining Undertakings (Acquisition) Act, 1956. The total compensation fixed under the Act is Rs. 164 lakhs, a major portion of which has already been paid to Messrs. John Taylor & Son, the former company.

Board of Management appointed by the Government of Mysore: The Chief Minister (Chairman); S. Munianappa (Vice-Chairman); G. Mathias, Finance Secretary; T. P. Krishnachar, Director of Geology and Mines; a representative of Messrs. John Taylor & Son who continue their association with the mines as Consultant Engineers.

THE MYSORE IRON AND STEEL WORKS

(Bhadraavathi, Shimoga Dist., Mysore State).

This Mysore State Government project for the establishment of the industry was worked out during the years 1914-18, and the basic industrial enterprise started operations in 1923.

The present total investment is Rs. 6.1 crores.

The works produce pig iron, cast iron pipes, plate sleepers, general foundry castings, merchant steel sections, steel castings, portland cement, ferro-alloys. The turn-over amounts to over Rs. four crores per annum.

The manufacture by electric process is a noteworthy feature.

The annual production of pig iron is 90,000 tons; of cement about 78,000 tons; of ferro-silicon 5,000 tons; of steel about 30,000 tons.

The production in the General Foundry is about 2,500 tons of general castings; 600 tons of grinding bodies and 4,500 tons of plate sleepers a year.

The annual output of the Rolling Mill is about 30,000 tons of mild steel sections.

The Rod and Strip Mills produce 40 to 45 tons of rods or 30 to 35 tons of strips per day.

The Electric Steel Furnace produces annually about 4,500 tons of ingots and 900 tons of rough castings of which 300 tons are machined castings. The output of the Structural Shop is about 100 tons a month.

In the expanded scheme of the works, there is a Cast Iron Spun Pipe Plant for manufacture of pipes upto 12" diameter.

Production of ferro-manganese in 2 Fuelde Furnaces with a capacity of 1,500 tons per year commenced during 1956-57.

The works have their plans for the Second Five-Year Plan period, to increase the steel ingot capacity from 30,000 tons to 1,00,000 tons and ferro-silicon production to 20,000 tons. A scheme for the manufacture of tool and alloy steel, stainless steel sheet and silicon steel is under consideration.

The labour employed: monthly rated about 1,800 and daily rated about 6,500.

Director and Vice-Chairman, M. D. Shivanappa, I.A.S.

General Managers: T. Krishnappa, M.Sc. (Met); B. Seshadri Sharma, B.E.

THE NATIONAL NEWSPRINT AND PAPER MILLS LIMITED

(Nepanagar, Nimar Dist., Madhya Pradesh).

The mills are situated on the main line Bombay-Itarsi, about 27 miles from Khandwa and 17 miles from Burhanpur.

The Company is a limited concern with about 10,000 shareholders. The major portion of the investment, however, has been raised by way of loans from the Government of M.P. and the Central Government through the M.P. State Government.

It has now been decided to convert the greater portion of these loans to share capital.

The construction of the mill started in 1948, and the installation of the Paper Machine and Ground Wood Mill was completed by January 1955. The mill had a trial run on 11th January 1955 for the first time manufacturing newsprint from indigenous groundwood pulp and the imported chemical pulp.

The Chemical Plant was put into commission and newsprint manufactured from cast per cent indigenous raw materials on 29th December 1955.

The rated capacity of the plant is 100 tons per day. Present production is 77 tons a day. Production is being gradually stepped up with a view to reaching the target production.

The production during 1957-58 was 14,244 tons.

The total revenue from sales during 1957-58 was Rs. 129.35 lakhs.

The Project has cost about six crores of rupees. Total loss upto March 31, 1957: Rs. 1,40,00,000.

1,141 workers are working on monthly wages.

At the head is a Board of Directors who are elected at the annual general meeting of the Company by the shareholders.

Chairman, Board of Directors, Sir A. Ramaswami Mudaliar.

Managing Director, S. L. Visvanathan.
Works Manager, S. R. Krishnaswami.

SIRPUR PAPER MILLS LTD.

(Sirpur-Kaghasnagar, Central Railway, Andhra Pradesh).

The managing agents are Messrs. Birla Brothers (Private) Ltd., 8, India Exchange Place, Calcutta; and the registered office is at Ali Villa, Somaiguda, Hyderabad.

Production started in 1942. The total capacity of the mill is 18,000 tons per year and actual

production in 1956-57 was 17,400 tons. The mill employs about 2,100 workers. The authorized capital of the company is Rs. 8.85 crores, issued capital Rs. 2.91 crores and the paid-up capital Rs. 2.59 crores.

For the year ended 30th June 1957, the profit was Rs. 33.59 lakhs.

The Company had on hand plans to raise production capacity to 100 tons a day by the end of 1958.

Chairman, Board of Directors, G. P. Birla.

THE SIRSILK LTD.

(Sirpur-Kaghasnagar, Central Railway, Andhra Pradesh).

The managing agents are Messrs. Birla Brothers (Private) Limited, 8, India Exchange Place,

Calcutta; and the registered office is at Ali Villa, 6-3-655, Somaiguda, Hyderabad.

The authorized capital is I. G. Rs. 10.80 crores, issued and subscribed capital I. G. Rs. 3.20 crores, and called and paid-up capital I. G. Rs. 3.02 crores.

The profit and loss account for the year ended September 30, 1957 shows a gain of Rs. 49,370. The working of the year 1959 has also shown an improvement.

The capacity is five tons of yarn at present (September 1958) and the company has obtained a licence to raise the capacity to ten tons. Out of the 480 looms received, 470 were installed and were working on double shift (September 1958).

Chairman, Board of Directors, G. P. Birla.

ANDHRA PRADESH

THE ANDHRA PAPER MILLS (Rajahmundry)

The capital investment was Rs. 25 lakhs and production capacity is 10 tons a day. The Government proposes to increase the present production capacity of the Mills from 2,000 tons to 8,000 tons of paper a year at a total capital cost of Rs. 190 lakhs during the Second Five-Year Plan period. It has also been proposed to manufacture better quality of paper. A sum of Rs. 20 lakhs was provided in the State plan for 1958-59 for the purchase of equipment required to increase the production.

THE GOVERNMENT CERAMIC FACTORY (Gudur, Nellore Dist.).

The Government Ceramic Factory, Gudur is at present confined only to the production of crockery and sanitary ware. It is proposed to expand the factory during the 2nd Plan period at a total cost of Rs. 12.60 lakhs in order to take up the manufacture of Electrical Insulators as additional line of production, to meet the requirements of the Government Electricity Department, etc.

The construction of additional buildings has been completed. The tunnel Kila which comprises the most important item has been imported from the United Kingdom and is being erected.

HYDERABAD TANNERIES LTD. (Hyderabad).

The investment is Rs. 13 lakhs. The production is temporarily suspended. The issue of reorganisation is under active consideration for hitting the targeted production envisaged in the tannery.

PRAGA TOOLS CORPORATION (Hyderabad).

The authorised capital is Rs. 1.35 crores. The Union Government has agreed to invest another Rs. 75 lakhs to Rs. one crore for expanding the production which includes setting up of a modern foundry and a heavy forge shop.

It produces machine tools and accessories, precision tools, automobile parts, diesel parts, railway duplicates and accessories.

The present production is about Rs. 60 lakhs. The target for 1959 is Rs. 90 lakhs. The investment would be: Andhra: Rs. 47.57 lakhs; public: 18.35 lakhs; India Government: Rs. 70 lakhs.

THE SRI VENKATESWARA STRAWBOARD MILLS (Tirupati).

This was originally a private company which the State Government has purchased. It has been proposed to start the Sri Venkateswara Strawboard Factory at Tirupati as a State enterprise at an estimated cost of Rs. 10.35 lakhs during the Second Plan period with a production capacity of 10 tons of strawboard per day.

The Government have sanctioned Rs. 16,000 towards repairs to the existing buildings and Rs. 96,000 for the construction of new buildings.

A sum of Rs. 1,23,000 has also been sanctioned towards purchase of part equipment.

ASSAM

GOVERNMENT SHELLAC FACTORY

(Chaparmukh, Nowgong).

The factory was started in 1954 as a relief measure for the Mikir tribesmen growing lac. The capital outlay is Rs. 2.5 lakhs. It handles 2,000 maunds of raw lac a year and provides work for 30 labourers with five on the establishment side. The target is 15,000 maunds a year.

BIHAR

BIHAR STATE SUPERPHOSPHATE FACTORY

(Sindri).

The factory went into production in April 1954.

Capacity of production: Single superphosphate—15,000 tons per annum.

Installed capacity of plants: (i) 240 tons superphosphate per day; (ii) 25 tons sulphuric acid 98 per cent per day.

Total investment: Rs. 65 lakhs.

No. of workers expected to be employed: About 100.

At present State-owned, but may be made a private limited company.

The factory is capable of producing 240 tons of superphosphate per day or about 70,000 tons per annum of 300 working days, provided an additional 50-ton per day capacity sulphuric acid plant is installed. There is provision for the establishment of an acid plant utilising pyrites in the Second Five Year Plan. Most of the super-

phosphate produced in the first stage will be consumed within Bihar, but supplies are also being made to neighbouring States.

The First Five-Year Plan had an allotment of Rs. 54.55 lakhs for the factory. The Second Five-Year Plan has allotted Rs. 20 lakhs for the expansion of the factory.

Works Manager, B. A. Sundara Moorthy, B.E., A.M.I.E. (Ind.); *Senior Works Chemist*, R. Jagannathan, M.A., A.R.I.C., A.M.I.Chem.E.; *Chief Engineer*, S. Kumar, B.Sc. (Eng.).

JAMMU & KASHMIR

GOVERNMENT DRUG RESEARCH LABORATORY

(Canal Road, Jammu).

The Laboratory was started in 1943. Total investment is Rs. 18 lakhs. The number of persons employed is 300. The present production is valued at Rs. 12 lakhs and the Second Five-Year Plan target is Rs. 15 lakhs.

GOVERNMENT DRUG RESEARCH LABORATORY

(Raj Bagh, Srinagar).

The Laboratory was started in 1956. Total investment is Rs. 10 lakhs and the number of

persons employed is 100. The present production is valued at Rs. 3 lakhs and the Second Five-Year Plan target is Rs. 15 lakhs.

GOVERNMENT SILK WEAVING FACTORY (Raj Bagh, Srinagar).

The factory was started in 1938-39 with 33 looms and 1,872 spindles. It is now equipped with 124 looms and an up-to-date Throwing Plant of 5,616 spindles.

Total investment: Rs. 12.94 lakhs odd. The factory employs 559 persons (479 labour and 74 establishment).

The present production is four lakh yards per annum. The target for the Second Five-Year Plan is six to seven lakh yards.

GOVERNMENT WOOLLEN MILLS

(Srinagar, Kashmir).

The mill was started on 7th December 1950. The total investment is Rs. 18,49,534. The number of persons employed is 500. The average monthly production on the basis of 1957 working is—cloth 12,566 yards and yarn 83,798 lbs. The Second Five-Year Plan target is 1 lakh lbs. of yarn per year.

KERALA

GOVERNMENT CERAMIC CONCERNS

(Kundara, Quilon Taluk).

The factory was started in 1940 and has been functioning under direct management of Government. The factory consists of two sections, viz. (1) The mining and refining of China Clay and (2) The manufacturing section.

China clay is mined in the vicinity by open cast system from a deposit averaging upto 60 ft. from the ground level. There are very few places in India where such superfine china clay of equally good quality is available. China clay produced at Kundara is being supplied mainly for use in textile, paper, pottery and rubber industries, throughout India.

In the manufacturing section a good variety of electrical goods, refractories, pipes, etc. are being produced.

Total investments: Present factory—Rs. 13,40,329 (at the end of 1955-56); New factory—Rs. 32,43,865 (at the end of 1955-56).

The factory produces porcelain, crockery goods, refractories, etc.

GOVERNMENT HYDROGENATION FACTORY

The work on the building was started in 1949 and completed in 1953. An expenditure of Rs. 17,63,400 has been incurred for the factory. The production capacity of the plant is 15 tons per day.

GOVERNMENT OIL FACTORY

(Kozhikode).

Regular operation of this factory started from the year 1948. The capital invested by the Government comes to about Rs. 4,55,541-15-8. The Oil Chemist is in immediate charge of this Institute. The Director of Industries & Commerce has the overall control. Various types of oils as Seagold Adamine, Stayit are manufactured here.

KERALA SOAP INSTITUTE

(Kozhikode).

Regular operation in this institute began in the year 1923. The institute manufactures several varieties of toilet soaps including the Kerala Sandalwood, Rose soaps etc. as also Wash-well and other varieties of bar soaps. The work of training of students in soap making is also undertaken.

The capital investment alone comes to Rs. 7,10,856-0-5.

The capacity of the factory is about 450 tons per annum. But it is now being increased. The Oil Technologist is in immediate charge of the Institute. The Director of Industries & Commerce has an overall control. Agents have been appointed in all parts of India.

S.K.V.G.A. PHARMACY

(Trichur).

S.K.V.G.A. Pharmacy, Trichur, functions as a commercial concern under the Director of Indigenous Medicines.

Main products manufactured in the pharmacy are Ayurvedic Medicines, viz. Asavams, Arishtams, Thylams, Lahyams, Ghritams, Pills and Choorams, etc., etc.

SHARK LIVER OIL FACTORY

(Trivandrum).

This factory was started by the University of Travancore and was functioning from the end of 1950. Government has invested Rs. 2 lakhs in the factory. The main products manufactured in the factory are: (1) First Grade Shark Liver Oil (Sharliverpill) 5,000 units per gram; (2) Second Grade Shark Liver Oil 2,000 to 3,000 per gram; (3) Stearine and fish oil soap.

The factory has an installed capacity of 10,000 gallons and production is being increased by new methods of manufacture.

KERALA GOVERNMENT CERAMICS

This is a new factory commissioned in January 1957. The capital invested is about 35 lakhs. This is a scheme completed under the First Year Plan of the State. The production of white ware hitherto attended by the Ceramic Factory has been taken over by the new Concerns. The latest type of Electric Double Tunnel Kiln has been installed in this factory, and quality goods, mainly tea sets are being produced.

PALLATHRA BRICKS & TILES LTD.

(Kottayam District, Kerala).

(A Kerala State Government Company under section 617 of the Companies Act.)

Capital: Rs. 11 lakhs (51 per cent of the share capital to be subscribed by Kerala Government).

Labour: About 350 workers.

Probable date of commencement of production: Beginning of 1959.

Initial target: 20,000 bricks per shift of 8 hours in one unit. Only one unit is proposed to be started now.

TRAVANCORE MINERALS PRIVATE LTD.

Head Office: Quilon, Kerala State.

Works: Chavara, Quilon Dt., Kerala State.

Date when started: January 1952—successors of Travancore Minerals Company, a private limited company incorporated in England; fully nationalised in June 1949. Pioneers in beach mineral dressing.

Total investments: Rs. one crore.

Present production: Ilmenite—800 tons and two tons rutile per day. Also monasite.

The present set-up of the Company consists of a Board of three Directors, one representing the Government of India, one the Kerala State, and the Chairman being nominated by the Government of India.

This new set-up commenced functioning in May 1957. The Company is being administered by a Chief Administrative Officer, Lt.-Col. J. N. Satchi, formerly of the Defence Department,

Government of India. A reorganisation of the industry has recently been undertaken by the present Board of Directors.

Second Five-Year Plan target: No scheme for the expansion of the production schedules of ilmenite and monasite is included in the Second Five-Year Plan. A scheme for the production of rutile with the latest type machinery is however included in the Plan with a physical target of 7,000 tons at an estimated expenditure of Rs. 12.86 lakhs. A High Tension Electro-Static Separator from Florida, U.S.A., has been received.

TRAVANCORE PLYWOOD INDUSTRIES

This is a factory started as a Public Company with Government support. Finally in 1947, Government purchased all the shares of the company and became sole proprietor. The Capital investment in buildings and machinery is about Rs. six lakhs. The factory is now mainly producing plywood for tea chests. The installed capacity of the machinery for the production of plywood is 3 million a ft. of 4 m m. plywood a year. The soft wood logs required for the manufacture of plywood are being delivered to the factory by the Forest Department. The tea chest panels now produced in the factory find ready sales. Commercial plywood also is in good demand.

TRAVANCORE RUBBER WORKS

(Chackal, Trivandrum 7).

The factory was started on 17th August 1935 as Travancore Govt. Rubber Factory (later leased to the Travancore Cables & Rubbers Ltd. from January 1937 to March 1938). Subsequently the factory was working on partnership basis between the Travancore Government and Sir Chinubhai Ranchodlal Madhwalal from 10-2-1940 to 8-10-1949. The concern was finally taken over by the Govt. of Travancore-Cochin on 9-10-1949.

The capital investment by the Government as per balance sheet on 31st March 1957 is Rs. 8,60,700. The factory consumes about half to three quarter ton of raw rubber per day and the production capacity is about two tons of goods worth Rs. 4,000 to Rs. 5,000 per day.

The factory employs about 271 persons: Staff 51 including officers and peons. Watchmen 8. Workers 212 (26 on monthly wages and 186 on daily wages).

The production capacity of the factory is 25,00,000 lbs. per year.

The main products manufactured in the factory are cycle tyres and tubes, sheeting pure single and double insertion and mottled, hoses armoured, suction, plain, radiator, bent, etc. of different specifications, tubing, valve tubes, rings, bushes, abonite, rods, sheets, etc., latex sponge and latex foam cushions.

Under the Second Five-Year Plan there are two schemes: 1. A cycle rim plant is under construction. 2. A scheme of modernisation of the present equipment and expansion of production programme of cycle tyres, tubes, sheetings, hoses, latex goods, moulded goods, etc., has also been taken up. Increased output of up-to-date finished goods and increased profits are expected by the mechanization and modernization.

MYSORE

THE GOVERNMENT CENTRAL INDUSTRIAL WORKSHOP

(Post Office Road, Bangalore).

Established : 1897.

Capital invested : Rs. 16,77,176 (including additional capital under expansion schemes)

No. of persons employed : 210.

Annual outturn : Rs. 4,30,721

The process of shifting the factory to new premises and amalgamating the mechanical department of the Government Electric Factory with it is under way. The scheme is estimated to cost Rs. 9.5 lakhs. The shifting was expected to be completed by the middle of 1954. A production target of Rs. 16 lakhs per annum is expected to be reached by the end of the Second Five-Year Plan.

GOVERNMENT ELECTRIC FACTORY

(Mysore Road, Bangalore).

Established : 1939.

Capital invested : Rs. 140 lakhs

No. of persons employed : 1,014.

Annual outturn : Rs. 40 lakhs

A scheme is under way to expand the factory during the Second Five-Year Plan and a sum of Rs. 125 lakhs has been granted by the Centre under the Central Aid Scheme. Negotiation for collaboration of the factory with a famous engineering firm, Messrs. A. E. G. Germany, has been concluded. The expansion scheme envisages (1) production of transformers of capacities up to 10,000 KVA and of voltage rating up to 66,000 volts, recording an annual output of 200,000 KVA. (2) restarting the manufacture of electric motors with a capacity up to 250 hp and the ultimate annual output of 60,000 hp and (3) manufacture of switch-gear like the iron clad switches, a variety of fuse

cartridges, group operated isolators, oil circuit breakers, etc. up to a rupturing capacity of 250,000 KVA and voltage rating up to 33 KV.

GOVERNMENT PORCELAIN FACTORY

(Malleswaram, Bangalore).

Established : 1932.

Capital invested : Rs. 70,70,600.

No. of persons employed : Regular 520, Casual 500.

Annual outturn Rs. 1,30,967 ; Electro-porcelain : 300 tons ; Crockery : 24 tons.

The Government Porcelain Factory is the only State-owned industry of the type in India. In order to meet the growing demand for insulators, bushings, etc., an expansion scheme estimated to cost about Rs. 84 lakhs is under way in technical collaboration of Messrs. Nippon Gaiishi Kaisha Ltd., Nagoya, Japan. This scheme envisages an output of 2,500 tons of production per annum. Since this scheme could not be completed within the end of the First Five-Year Plan, it had to be included in the Second Five-Year Plan.

GOVERNMENT SANDALWOOD OIL FACTORY

(Mysore South & Shimoga Town).

Established : 1916

Capital : Rs. 24,12,000

Number of persons employed : About 166

Annual output : 1,40,000 lbs of sandalwood oil Rs. 1,36,463

A programme of replacing the existing equipment and machinery by up-to-date and modern ones is in hand. Details are being worked out. It is also proposed to develop the factory at Shimoga into a full-fledged and self-contained unit

GOVERNMENT SOAP FACTORY

(Rajajinagar, Bangalore).

Established : 1918.

Capital invested : Rs. 19,15,000.

No. of persons employed : 166.

Annual outturn : Rs. 32,59,348.

The factory shifted to its new premises at Rajajinagar, Bangalore's industrial suburb, in March 1957 ; is expected to produce 1,500 tons of soap per year which can be further increased to 3,000 tons. A glycerine recovery plant and a rectification plant are also being erected in the new premises. This will have an output of 75 tons of chemically pure glycerine a year.

MYSORE GOVERNMENT SILK WEAVING FACTORY

(Mysore).

Established : 1932.

Capital invested : 11,41,823.

Number of persons employed : 212.

Annual outturn : Rs. 9,74,079.

MYSORE IMPLEMENTS FACTORY

(Hassan).

Established : 1939.

Capital invested : Rs. 16,54,000.

No. of persons employed : 254

Annual output : Rs. 941,000

A scheme for mechanisation and development of the factory with a capital cost of Rs. 14 lakhs is being executed

INDIA'S FOREIGN LIABILITIES AND ASSETS

THE following section presents the results of a survey made by the Reserve Bank of India in 1956 and 1957

The results of a more detailed survey made in

1955 are given in the second half of this article in several respects. But they do provide a broad indication of the trends during the year. It should be noted that reliable estimates of foreign investments can be provided only for 1956. The available data for 1957 are incomplete. Below we give three tables which sum up the position as at the end of 1956

INDIA'S OVERALL INVESTMENT POSITION*

(Rupees crores)

	Liabilities			Assets			Net Position		
	1955	1956	1957	1955	1956	1957	1955	1956	1957
Private (Non-Banking)	470	506	555†				(-) 470	(-) 506	(-) 555
Banking	57	61	48	55	52	62	(-) 2	(-) 9	14
Official	209	220	455	1,171	955	725	971	735	270
TOTAL	727	787	1,058	1,226	1,007	787	499	220	(-) 271

* The figures are not strictly comparable with those published in the Report on the Survey of Foreign Liabilities and Assets, 1955. For the private (Non-Banking) sector, no estimates have been made for foreign liabilities (other than business investments), and for foreign assets. This does not perhaps affect the overall position significantly as these two items are probably of the same magnitude and thus cancel out each other. The figures for banking and official sectors cover the position both on short-term as well as long-term account

† A tentative estimate

Sources :—Exchange control returns for all component items excepting for the following :

(a) export bills outstanding, (b) non-resident holdings of shares in Indian joint stock companies, (c) profit and loss account balances and fixed assets of branches of foreign companies and (d) fixed assets held abroad by Indian joint stock companies. For items (b) and (d) an estimate based on the Survey of Foreign Liabilities and Assets 1955 has been incorporated. Item (a) is based on returns obtained from banks in respect of outstanding foreign bills, etc; the country-wise breakdown is, partly estimated. Item (c) is derived from the annual Balance Sheets of branches of foreign companies.

* Investment 1956 : 150 million dollars. Average return : 12.8 per cent.

POSITION DURING 1956 AND 1957

During 1956, there was a net inflow of foreign business investments amounting to Rs. 38.4 crores in non-banking activities. This included Rs. 12.1 crores of IBRD loans utilized by steel and power companies in the private sector. Capital obtained from foreign private sources thus amounted to Rs. 24.3 crores.

This rate was more or less equal to the average annual inflow during July 1948-December 1953 and was higher than the average annual inflow of about Rs. 16 crores during 1954-55.

As in the past the inflow was mostly of the direct investment category (Rs. 23.7 crores), branches and subsidiaries of foreign companies receiving over 90 per cent of the capital. This amounted to Rs. 23.7 crores.

Petroleum and manufacturing activities continued to attract a major portion of the new investments.

The main investing countries, as before, were the U.K. and the U.S.A.

Available data indicate a net inflow of Rs. 48 crores during 1957. This figure is arrived at after allowing for Rs. 32 crores of IBRD loans and Rs. 3.5 crores of outflow connected with the nationalization of life insurance. Excluding these two items the inflow during 1957 would be Rs. 19 to 20 crores.

While this shows a reduction as compared to 1956, it is somewhat higher than the average annual rates for 1954 to 1955.

Movements in banking capital, which are mostly of a short-term character, recorded an inflow of Rs. 7.7 crores in 1956 but this trend was reversed in 1957 when there was a large outflow of Rs. 23.4 crores.

The movements in banking capital during 1956 and 1957 mainly affected the position *vis-à-vis* the U.K. Between 1956 and 1957 bank liabilities to the U.K. decreased by Rs. 15.7 crores while bank assets increased by Rs. 3.6 crores.

An easing of money conditions in India during the latter half of 1957 and increased cost of borrowing of foreign funds as a result of the high U.K. bank rate appear to have contributed to the substantial outflow of banking funds during 1957.

The years 1956 and 1957 witnessed major shifts in India's international investment position as a result of large payment deficits financed for the most part by drawings on the country's exchange reserves and by official borrowings from abroad.

At the end of 1955, India was a net creditor abroad to the extent of about Rs. 500 crores;

this was the net result of a *creditor* position of about Rs. 970 crores in respect of the official sector and a *debtor* position of Rs. 470 crores in respect of the non-official sector.

During the two years 1956 and 1957 the official sector's creditor position was reduced by about Rs. 700 crores, while the non-official sector's debtor position increased by Rs. 70 crores.

As a result of these changes, India's net creditor position of about Rs. 500 crores at the end of 1955 was converted into a *debtor* position of Rs. 270 crores.

RESERVE BANK SURVEY OF 1955

The following section presents the main results of a Survey conducted by the Reserve Bank of India of the country's foreign liabilities and assets as at the end of 1955. Like the two previous enquiries in this field viz., Census of foreign liabilities and assets as on 30-6-1948 and Survey of foreign liabilities and assets as on 31-12-1953, this Survey provides an indication of the country's international investment position on long-term and short-term accounts as at the end of 1955 and an analysis of business invest-

ments from abroad, particularly in foreign-controlled enterprises.

This is a much more detailed and comprehensive survey than was attempted in 1948 or 1953 the results of which are outlined above.

Some 1,700 companies filed returns under the Survey. The data were supplemented by informa-

tion obtained from official agencies including the departments of the Bank.

India's total liabilities and assets at the end of 1955 amounted to Rs. 766.3 crores and Rs. 1,251.8 crores respectively, indicating a net creditor position of Rs. 485.5 crores.

This net creditor position was wholly due to the official sector, which had a net creditor position of Rs. 960.8 crores, the non-official sector showing a net debtor position to the extent of Rs. 475.3 crores.

TABLE 1.—INDIA'S INTERNATIONAL INVESTMENT POSITION (SUMMARY)

(Crores of Rupees)

Period	Liabilities			Assets			Net Position
	Short-term	Long-term	Total	Short-term	Long-term	Total	
OFFICIAL SECTOR							
30th June 1948	55.5	122.6	178.1	1,208.8	730.8	1,939.6	+ 1,761.5
31st December 1953	16.0	223.6	249.6	433.8	772.8	1,206.6	+ 957.0
31st December 1955	16.6	193.3	209.9	455.8	714.9	1,170.7	+ 960.8
NON-OFFICIAL SECTOR							
30th June 1948	38.4	287.7	326.1	11.5	57.6	69.1	- 257.0
31st December 1953	35.4	441.4	476.8	11.4	66.0	77.4	- 399.4
31st December 1955	50.0	506.4	556.4	16.4	62.7	81.1	- 475.3

The country-wise details show that India was a net creditor with respect to both the United Kingdom (Rs. 408.5 crores) and Pakistan (Rs. 289.5 crores), while it was a net debtor with respect to the U.S.A. (Rs. 104.7 crores) and most of the other countries. India's position vis-a-vis Burma was changed from that of a net creditor as at the end of 1953 to that of a small net debtor mainly on account of the settlement of Burmese debt of Rs. 48 crores during 1954-55.

TABLE 2.—INDIA'S INTERNATIONAL INVESTMENT POSITION (COUNTRY-WISE)

A fuller table appears below.

(Crores of Rupees)

Country	30th June 1948			31st December 1953			31st December 1955		
	Liabilities	Assets	Net Position	Liabilities	Assets	Net Position	Liabilities	Assets	Net Position
U.K.	298.2	1,501.2	+1,203.0	396.0	830.4	+434.4	443.6	852.1	+408.5
U.S.A.	20.2	15.3	- 4.9	125.9	43.7	- 82.2	140.6	35.9	- 104.7
Pakistan	64.8	323.5	+ 258.7	56.0	321.7	+265.7	50.7	330.2	+ 289.5
Burma	8.8	54.2	+ 45.4	4.9	51.6	+ 46.7	5.5	3.9	- 1.7
I.M.F./I.B.R.D.* ..	14.9	11.6	- 3.2	69.5	19.3	- 50.2	29.3	19.3	- 10.0
Others	95.3	13.7	- 81.6	74.2	17.3	- 56.9	96.6	20.4	- 76.2
Total	504.2	2,008.7	+1,504.5	726.5	1,234.0	+507.5	766.3	1,251.8	+ 485.5

Between 30-6-1948 and 31-12-1955, India's net creditor position was reduced by Rs. 1,019 crores as a result of a fall in assets of Rs. 757 crores and an increase in liabilities of Rs. 282 crores.

Most of this change occurred during the period prior to 1953. India's creditor position was reduced only to the extent of Rs. 72 crores between 31-12-1953 and 31-12-1955 as a result of a fall in assets of Rs. 32 crores and an increase in liabilities of Rs. 40 crores.

A large part of the decline in the net assets

of the country between 30-6-1948 and 31-12-1955 was accounted for by the official sector; its assets declined by Rs. 789 crores while its liabilities increased by Rs. 32 crores. At the same time, the net debtor position of the non-official sector increased by Rs. 218 crores; its foreign liabilities increased by Rs. 230 crores while its foreign assets showed a small rise of Rs. 12 crores.

Though India emerged as a net creditor country at the end of 1955 it is very likely that by the end of 1957 it has already become a net

debtor country as a result of the large reduction in the country's sterling assets and substantial additions to its liabilities to the U.S.A., the I.M.F. and the I.B.R.D.

The official sector comprises the Central Government, State Governments, port trusts, improvement trusts, local authorities and statutory corporations including the Reserve Bank of India.

The table on next page gives a comparative picture of the long-term official liabilities and assets as at the end of 1955 and 1953.

* Capital contributions in rupee securities have been omitted from both sides.

TABLE 2.—LONG-TERM LIABILITIES AND ASSETS OF THE OFFICIAL SECTOR

(Crores of Rupees)

Head	Assets*		Liabilities*	
	1953	1955	1953	1955
1. Government securities	246.5	244.7	41.5	39.7
2. (a) Loans (excluding (b) below) ..	—	—	117.6	114.5
(b) Dollars purchased from the I. M. F. out-	—	—	—	—
standing	—	—	47.6	6.0
3. Liabilities in respect of goods purchased abroad	—	—	0.3	7.0
4. Inter-Government debt due from Burma ..	48.2	—	—	—
5. Gold and dollar subscriptions to the I.M.F. and I.B.R.D.	16.9	16.9	—	—
6. Claim on the U.K. under the 1955 pensions settlement	53.3†	48.0	—	—
7. Others	7.9	5.3	5.9	5.4
Total	472.8	414.9	215.0	172.7

* Assets exclude Rs. 300 crores of partition debt due from Pakistan; Liabilities exclude Rs. 20.6 crores due to the U.K. by way of World War I loan, liability of which remains suspended. Both these items figure in Tables 1 and 2. † Claim as on 1st April 1955.

Two important changes have taken place during this period. On the assets side the inter-Government debt of Rs. 48.2 crores due from Burma was liquidated following certain arrangements reached with Burma in 1954. The debt was in the first instance scaled down to Rs. 20 crores, of which Rs. 15.6 crores was repaid by Burma in the form of rice shipments to India; the balance of Rs. 4.4 crores was treated as India's aid to Burma under the Colombo Plan.

As regards liabilities, India repurchased its currency from the I.M.F. to the extent of Rs. 41.6 crores. The balance of Rs. 6 crores outstanding on 31-12-1955 was repurchased in April 1956.

It may be recalled that this liability was incurred in 1948-49 when India purchased from the I.M.F. \$100 million in order to ease the pressure on its reserves. In accordance with the principle of maintaining the revolving character of the I.M.F.'s resources, India commenced repurchase transactions in March 1954 and completed the repurchase in five instalments.

Another item showing a significant change in the position as compared to 1953 was the increase in the outstanding credits in respect of goods purchased from abroad, to the extent of Rs. 6.7 crores.

TABLE 4.—LONG-TERM FOREIGN LIABILITIES OF BUSINESS ENTERPRISES AS ON 31ST DECEMBER 1955

(Trade-wise Summary)

(Crores of Rupees)

Head		BUSINESS INVESTMENTS							MISCELLANEOUS LIABILITIES							Total Business Investments

Data in respect of foreign liabilities of business enterprises in India comprise (a) the net position of branches of foreign-incorporated companies which is a composite of short-term and long-term obligations, (b) all the long-term obligations of Indian joint-stock companies such as shares, debentures and loans and advances.

These liabilities have been classified under three heads, viz., direct investments, portfolio investments and miscellaneous obligations.

Where foreign investments are accompanied by control and direction of the enterprises by foreign investors, such investment may be said to belong to the direct category.*

Portfolio investments comprise ordinary shares held by non-residents, other than those treated as direct-controlled, as well as preference shares and debentures held by all non-residents.

Miscellaneous obligations represent loans and advances, including inter-company, inter-branch balances, and liabilities to non-residents in respect of life and non-life insurance policies.

The combined total of direct and portfolio investments is regarded as business investments.

Total liabilities of business enterprises (*vide* table 4) as at the end of 1955 aggregated Rs. 522 crores of which business investments amounted to Rs. 481 crores.

The latter was predominantly in the form of branch investments and equity holdings while creditor capital amounted to only about 3 per cent of the total.

The bulk of the investments was of the direct category, portfolio obligations being less than 15 per cent of the total.

There are some striking differences with regard to the distribution of each type of business investment among the different business activities. The foreign branches have largely invested their capital in trading, utilities and transport, and plantations. Direct-controlled joint-stock companies, especially the subsidiaries, have concentrated their investments mainly in the manufacturing sector.

Britain continued to occupy the predominant position amongst creditor countries (*vide* table 5). Liabilities to the U.K. at the end of 1955 exceeded Rs. 400 crores or 77 per cent of the total of foreign business liabilities.

The U.S.A. accounted for some Rs. 45 crores of capital a large part of which was invested in petroleum activities.

The remaining countries taken as a whole provided Rs. 74 crores of which nearly one-half represented financial liabilities.

The long-term foreign assets of the Indian joint-stock companies as on 31-12-1955 amounted to Rs. 54 crores.

The banking and insurance companies accounted for Rs. 15 crores of this total, while other joint-stock companies had invested abroad Rs. 39 crores.

The holdings were mainly in the form of ordinary shares and immovable property (Rs. 19.2 crores), Government securities (Rs. 18.9 crores) and inter-company balances and loans and advances, etc. (Rs. 12.8 crores).

A considerable portion of the assets represented claims on the U.K. (Rs. 20.0 crores) and Pakistan (Rs. 17.6 crores); the rest of the assets

were distributed among a large number of countries.

Comparing the figures compiled under the present Survey with those under the Survey for 1953 it will be seen that foreign-held business investments in India showed an increase of Rs. 61 crores during the two years, and stood at Rs. 481 crores on 31st December 1955 (*vide* table 6). Since during this period some valuation changes have also taken place, the difference of Rs. 61 crores mentioned above does not correspond to the net movement of capital. Such valuation changes can affect the balance sheet values of both fixed and floating assets.

In the recent period valuations were largely confined to the tea companies. During 1954-1955, the tea companies resorted to revaluation of their fixed assets to an unusual extent and as a result, the foreign investments in this sector were written up by as much as Rs. 20 crores. The revaluation of the fixed assets in the other industries, however, appears to be of a small order to the extent of not more than Rs. 2 crores at the most.

Valuation changes in respect of the floating assets are likely to be significant only during times of substantial price movements. The years 1953 to 1955 were a period of price stability, at any rate, for raw materials and manufactured goods, which constitute the bulk of the floating assets of business concerns. It appears that the valuation changes in respect of floating stocks are unlikely to have influenced the changes in the levels of foreign business investment to any significant extent between 1953 and 1955.

TABLE 6.—FOREIGN BUSINESS INVESTMENTS

The following table shows the position for 1948 as on 30th June and for 1953 and 1955 as on 31st December.

	(Crores of Rupees)		
	1948	1953	1955
Manufacturing	72.0	135.7	163.3
Trading	64.4	94.8	102.3
Utilities & Transport ..	31.2	50.5	53.1
Mining ..	11.5	8.4	9.6
Financial			
(a) Banking ..	31.7	16.2	20.2
(b) Others ..	6.9	14.7	19.1
Plantations ..	52.3	71.5	87.2
Miscellaneous ..	17.7	27.7	25.9
Total ..	287.6	419.6	480.6

Adjusting for valuation changes, the net change in the foreign business investment would be of the order of Rs. 39 crores as against the unadjusted figure of Rs. 61 crores. Excluding from the total some Rs. 4 crores of banking capital, which is mostly in the nature of liquid and floating assets, the non-banking business investments would amount to Rs. 35 crores.

The available data do not permit an accurate estimation of the gross movements of capital in respect of non-banking business enterprises. However, a rough estimate of the cash transfers inward and outward, and net accumulation of earnings by foreign investors in India has been made; deducting this estimated figure from the total figure for the investments in the non-banking enterprises an estimate mainly of investments in kind has been obtained.

Cash transfers on account of repatriation of foreign investments are estimated at Rs. 10 crores while inward remittances for investment purposes amounted to about Rs. 8 crores giving a net outflow of funds of Rs. 2 crores. As regards the retained earnings, it would appear that there was a net inflow of foreign capital of Rs. 23 crores; the residual capital inflow in investments in kind etc. must therefore have been of the order of Rs. 19 crores.

Table 7 compares the 1954-1955 pattern of capital inflow with the corresponding pattern relating to the period July 1948-December 1953.

TABLE 7.—PATTERN OF CAPITAL INFLOW (Crores of Rupees)

	July 1948 to Dec. 1953	1954 and 1955
Total change in business investments ..	132	61
Estimated revaluation of assets ..	-12 to 15	-22
Change in banking investments ..	16	-4
Estimated non-banking capital inflow ..	133-136	35
(a) Cash transfers (net) (excluding transfers of accumulated earnings) ..	-15 to 20	-7
(b) Retained earnings (net) ..	70	23
(c) Investments in kind, etc. (derived) ..	85	19

Table 8 presents a classification of the changes in the foreign investments, under main business activities in a form slightly different from that given earlier.

Petroleum activities appear in the table as a separate group and are excluded from the groups 'Manufacturing' and 'Trading', with a view to showing the importance of this field of investment during the two periods.

TABLE 8.—NON-BANKING BUSINESS INVESTMENTS

	(Crores of Rupees)	
	July 1948 to Dec. 1953	1954 and 1955
Petroleum: trading	+ 46.1	+ 8.1
Petroleum: manufacturing	+ 8.7	+ 18.7
Manufacturing ..	+ 55.1	+ 8.9
Trading ..	- 15.7	- 0.6
Utilities and Transport ..	+ 19.3	+ 2.5
Mining ..	- 3.1	+ 1.2
Financial ..	+ 7.8	+ 4.4
Plantations ..	+ 19.3	+ 15.7
Miscellaneous ..	+ 10.0	- 1.6
Valuation changes ..	- 12.0 to 15.0	- 22.0
Total ..	+ 132.5 to 135.5	+ 35.2

As in the past direct investments continued to occupy a predominant position in 1954-1955 also. Even as regards direct investments, investments in the Controlled joint stock companies were much larger than those in branches of foreign incorporated companies.

* The branches of foreign companies, the ownership and direction of which are wholly in the hands of foreign owners are the obvious instance of direct investments. The following types of Indian Joint Stock Companies are also treated as direct controlled viz., (i) subsidiaries of foreign parent companies, (ii) with a few exceptions, companies 40 per cent or more of the shares of which are owned by non-residents belonging to one country, (iii) companies managed by foreign-controlled managing agents in terms of managing agency agreements and (iv) companies 25 per cent or more of whose shares are owned by another foreign-controlled company in India. Only ordinary shares are taken into account for computing direct investments in Indian joint-stock companies.

TABLE 9

	July 1948 to Dec. 1953	1954-55
Direct Invest- ments		
(a) Branches ..	+ 73.4 to 76.4	+11.8
(b) Controlled Joint Stock Companies	+ 33.1	+24.5
Total	+111.5 to 114.5	+36.3
Portfolio invest- ments ..	+ 21.1	- 1.1
Total capital in- flow	+132.5 to 135.5	+35.2

This trend is in contrast with the one witnessed during the earlier period when investment through the branches was much more important.

The available information shows that a large part of investments during 1954-55 was in companies established after 30-6-1948. As shown in the table below, petroleum-manufacturing companies accounted for most of the investment in the new companies during 1954-1955.

TABLE 10
(Crores of Rupees)

	New com- panies	Old com- panies	All com- panies
Petroleum: trad- ing	—	8.1	8.1
Petroleum: manu- facturing ..	19.5	-0.8	18.7
Manufacturing (other than petro- leum)	3.4	5.5	8.9
All others ..	1.0	-1.5	-0.5
Total	24.0	11.2	35.2

A greater part of the investments in the old companies was concentrated in the petroleum trading companies.

The manufacturing investments (other than Petroleum) in the old companies at Rs. 5.5 crores were also somewhat larger than in new companies. In other activities, there was on the whole some repatriation of funds by the old companies as compared to an investment of Rs. 1 crore in new companies.

The foregoing estimate of the foreign business investments does not take into account certain other capital movements, affecting the joint stock companies.

These represent capital receipts and payments associated with (a) the borrowings abroad by way of loans and advances and (b) the acquisition of foreign assets of various kinds by the joint-stock companies.

Such data have been obtained only for obligations with a maturity of more than a year. The inter-company advances as well as other loans and advances obtained by the companies resulted in a capital-inflow of Rs. 5 crores part of which represented advances secured by the petroleum refining companies.

Foreign assets of the companies showed hardly any significant changes between 1953 and 1955.

Since the loans and advances obtained by the companies appear to be mainly connected with the financing of fixed capital, they are

to be included while arriving at the total figure for the long-term capital obtained from abroad by the companies. Including this inflow, therefore, the foreign investments in the non-banking business enterprises in India during 1954-1955 would be of the order Rs. 40 crores.

The average annual rate of capital inflow would be Rs. 20 crores during 1954-1955, as against Rs. 25 crores during the period July 1948 to December 1953.

A country-wise breakdown of the change in business investments during the middle of 1948 to the end of 1955 shows certain interesting features.

The industrially advanced countries have, over the period, added to their investments substantially. Four industrial countries, viz., the U.K., the U.S.A., Western Germany and Switzerland increased their investments by nearly Rs. 175 crores (Rs. 135-140 crores during July 1948 to December 1953 and Rs. 36 crores during 1954-1955).

In addition, resources provided by the I.B.R.D. to private companies (representing capital provided by industrial countries) amounted to about Rs. 3 crores.

The other countries, taken as a whole, reduced their investments by Rs. 7 crores. Pakistan, Ceylon and Burma were among the countries whose investments showed a considerable reduction during this period.

The U.K. maintained its position as the leading investor of capital during 1954-1955; however, its investment during this period was much smaller than that during the earlier period.

Adjusting for the revaluation of assets, the increase in the U.K. investments during 1954-55 was around Rs. 23-24 crores or Rs. 11 to Rs. 12 crores a year. The average annual inflow during the earlier period at Rs. 21-22 crores, however, was almost double the size of the inflow during this period.

On the other hand, there was a considerable stepping up of the rate of investment from the U.S.A. from the average of Rs. 3.4 crores (during July 1948 to December 1953) to Rs. 4.9 crores during 1954-1955; the U.S. investment during 1954-1955 however was mainly under petroleum activities.

The German investments also showed marked increases during 1954-1955, though Germany's total investments still are not very significant.

COLOMBO PLAN

COLOMBO Plan Bureau, P.O. Box No. 596, Colombo.

Director: R. H. Wade; **Information Officer:** R. K. Chatterjee; **Asst. Information Officer:** L. P. Goonetilleke.

Present Plan period: 1951-51.

Original Plan period: 1951-57.

Members of the Colombo Plan:

Australia, Burma, Cambodia, Canada, Ceylon, India, Indonesia, Japan, Laos, Malaysia, Nepal, New Zealand, Pakistan, Philippines, Thailand, United Kingdom (with Brunei), North Borneo, Sarawak, Singapore), U.S.A., Viet-Nam.

The Colombo Plan Organization consists of the Colombo Plan Consultative Committee and the Colombo Plan Council for Technical Co-operation in South and South-East Asia. The Consultative Committee which meets once a year in one of the member countries takes note of the progress of the Plan and the role which external assistance plays in the development of the area and makes recommendations for being dealt with by member countries. The Colombo Plan Council, located at Colombo, supervises the operation of the Colombo Plan Technical Co-operation Scheme and the dissemination of information on the Colombo Plan.

External assistance provided under the Colombo Plan under both public and private auspices, has played an important role in the economic development of the countries of South and South-East Asia.

Since the inception of the Colombo Plan to the middle of 1958, this assistance amounted to about \$ 5,000 million. During 1957-58 alone, the value of the assistance rendered was of the order of \$ 1,000 million.

Assistance has been given primarily in three forms—financial assistance and equipment for development projects, food and other commodity assistance as contribution towards economic stability and growth, and technical assistance to increase the number and range of skills and strengthen the economic and social institutions. The major part of the assistance under the

Colombo Plan has come from member countries from outside the area. Internally, in the area, mutual assistance has progressively increased in recent years.

1957-58 AID

Brief details of some of the major items of assistance rendered by the donor countries during 1957-58, as recorded in the Seventh Annual Report of the Colombo Plan Consultative Committee are given below:

Australia. A \$ 27.3 million (includes diesel motors and railwagons, and equipment to All-India Radio); **Canada.** (upto 1958-59) \$248.2 million. Assistance to Kundah Project and the Canada-India Atomic Reactor in India; **Japan.** \$20 million yen; **New Zealand:** £ 8.3 million till 1958-59. Assistance to the All India Institute of Medical Sciences and several dairy development schemes in India; **United Kingdom:** Includes release of sterling balances of which about £ 200 million was utilised during 1957-58; Government assistance in the form of credits and aid which from 1951 to end of June 1958 amounted to £ 123.25 million. The Federation of Malaysia, Singapore, Sarawak and North Borneo received about £ 60 million since 1952; A credit to India of £ 15 million for the Durgapur Steel Project, £ 3.71 million under the Technical Co-operation Scheme till the end of June 1958; **United States of America:** \$ 4,000 million from 1950 to middle of 1958 of which a sum of \$ 900 million was provided during 1957-58; **India:** Till March 1957 capital aid mainly to Nepal amounted to Rs. 54 million. During 1957-58 India contributed to the economic development of Nepal Rs. 7.5 million, International Bank for Reconstruction and Development. Provided loans amounting to \$ 816 million to the countries of the area during the Colombo Plan period.

From 1951 upto June 1958 about 1,002 experts were made available to Asian countries and training facilities were provided for 6,886 selected trainees. During 1957-58 alone, 1,264 training places and 210 experts were provided; special equipment for the training and use of experts valued at over £2 million was also provided under the scheme.

By December 1957, the total value of technical assistance provided under the scheme by the member countries amounted to about \$9.8 million as against a total of about £6.8 million till December 1956, constituting an increase of almost £3 million in the calendar year 1957.

Expenditure on the provision of training has maintained a progressive rise and amounted to £1.56 million in 1957 as against £0.85 million in 1956 and £1.36 million in 1956. Training facilities and services of experts provided under the Scheme cover all the major fields of development, and include Engineering, Administration, Food, Agriculture and Forestry, Education, Medical and Health, Industry and Trade, Transport and Communications, Banking, Finance and Accountancy, Power and Fuel, Statistics, Social Services, Co-operatives, Fisheries, and Journalism.

It was agreed at the Singapore meeting that the Colombo Plan be extended from July 1957 to June 1961. The question of the continuation of the Plan beyond 1961 was expected to be taken up at the meeting of the Consultative Committee in 1959.

DEVELOPMENT EXPENDITURE

During the period (1951-57) national income in the region has continued to rise at a rate slightly in excess of the rate of population growth. Much effort went into this achievement as the population of the area is rising at a rate of 10 million annually.

The countries have made advances both in the planning and implementation of development programmes. India completed her first Five-Year Plan with encouraging overall results and a second Five-Year Plan has been adopted. In Pakistan, a new Five-Year Plan has been prepared.

The countries of the area are also investing more and more on development. Fifteen Colombo Plan countries of South and South-East Asia incurred an estimated expenditure of nearly £ 1,700 million on development in the public sector in 1957. The budgeted expenditure for 1958 is over £ 1,400 million.

Expenditure on development in the public sector (£ million at a constant rate of exchange):

£ million

Total	884.0	1,056.51	1,699.3	1,815.2

During 1957, significant progress continued to be made in furthering the development of the Colombo Plan region. The rate of progress was, however, somewhat less than in previous years. The rate of growth in *per capita* real income in the region mentioned in previous reports was not maintained. In some countries of the region, adverse weather and a decline in food production, inflationary pressures and heavy imports accompanied by a decline in export earnings, and other factors, occasioned setbacks. Progress continued to be made at a substantial rate in such vital economic sectors as industrial capacity and

improvement of basic facilities, including roads, irrigation, and land reclamation.

The development expenditure is met in each country largely from internal resources and by valuable assistance received from external sources.

TECHNICAL ASSISTANCE

Australia, Canada, Ceylon, India, Japan, New Zealand, Pakistan, Malaysia and Singapore and United Kingdom are contributing £12.7 million to finance the Colombo Plan Technical Co-operation Scheme.

Technical assistance consisting of provision of facilities for training, supply of experts and provision of equipment for training and research institutions, is also offered under various programmes of the United States and the United Nations and its Specialised Agencies.

Till 30 June, 1958, 15,573 places have been found for men and women of the area to receive training outside their own countries. Not all the training is arranged outside South and South-East Asia; some Asian countries are helping others in training facilities.

In the same period, 1,002 experts had served in the area under the Technical Co-operation Scheme of the Colombo Plan; and 4,886 under the Expanded Programme of the United Nations and the Specialized Agencies. As of 31 March 1958, I.O.A. technicians of the U.S.A. employed in the area numbered 2,261. A number of countries have established technical schools and polytechnics in special fields such as textile and nursing education. Many countries are using the services of consultants in preparing general development plans and specifications for particular projects. Ideas are also being canvassed for the establishment of workshops, for small scale industries and also of new regional training centres, or the expansion of existing facilities, so that more than one country may benefit from institutions available for the study of common problems.

The future holds out great opportunities for technical training so essential to economic development. The United Kingdom has announced a contribution of £7 million towards the provision

of technical assistance for the seven years beginning April 1956. The Canadian Government has provided a NRX atomic reactor to India. This type of reactor is a high-powered research and experimental unit. In accepting the offer the Indian Government has indicated its willingness to allow accredited foreign scientists, including those from other Colombo Plan countries in South and South-East Asia, to work with this reactor. The United States has also offered to locate an atomic research centre in South and South-East Asia.

Japan agreed to assist India by making available \$ 8 million for the procurement of machinery, equipment and other material from Japan for the development of iron ore mining in the Bouriela area. She is also assisting the Government of India with funds for the establishment of a technical centre attached to an industrial estate near Calcutta. The Japanese Export Import Bank has made arrangements to supply a special line of credit amounting to 10,000 million yen to the Government of India or parties recommended by it.

Under the Technical Co-operation Scheme of the Colombo Plan, 1,002 experts and 6,886 training places had been provided to the countries of South-East Asia till June 1958. Their distribution is as follows:

	Training Awards	Experts
Australia	2,225	284
Burma	10	—
Canada	940	170
Ceylon	46	2
India	718	26
Indonesia	12	—
Japan	156	115
Malaya	28	—
New Zealand	552	89
Pakistan	78	1
Singapore	34	—
Thailand	10	—
United Kingdom	2,077	315
Total	6,886	1,002

The following table gives the accounts of expenditure by supplying country and type of assistance, Technical Co-operation Scheme July 1950 to December 1957. (Pound Sterling)

Country	Actual				Firm Forward Commitments				Actual plus Commitments
	Trainees	Experts	Equipment	Total	Trainees	Experts	Equipment	Total	
Australia	1,984,334	578,933	130,811*	3,321,721	1,040,000	128,000	360,000	1,528,000	4,849,721

* Contribution towards the cost of Bureau excluded.

* Cost of buildings and equipment, etc.

INDIA

India has offered both economic and technical assistance to the countries of the region. Economic assistance has been given primarily to Nepal, upto Rs. 54 millions till March 1957. This assistance was for development of roads and communications, construction of an air-field, mapping and air survey work, construction of Trisuli Project and minor irrigation works.

During 1957-58 India contributed to the economic development of Nepal a sum amounting to Rs. 7.5 million. India has agreed to assist to the extent of Rs. 37.5 million in the construction of the Trisuli Hydro-Electric Project in Nepal.

A loan of Rs. 20 crores had been advanced to the Government of Burma for the economic development of that country. Another loan of Rs. 4.58 lakhs had been given to the Government of Indonesia for training Indonesian air force personnel. This sum had been given out of an agreed loan of upto Rs. 50 lakhs.

In the technical field, India has provided 896 scholarships and fellowships to students of South-East Asia in various technical subjects at the Indian Universities, Scientific and Research Institutes and in other projects since the beginning of the Colombo Plan Technical Co-operation Scheme. Of this number 587 were to Nepal, Ceylon (117); Philippines (48); Pakistan (39); Burma (31); Thailand (16); Indonesia (16); Singapore (9); Malaya (8); Japan (5); New Zealand (1); North Borneo (2); Viet-Nam (6); and Australia (1).

The break-up figures given below are for the previous year: The largest number of places were provided in the field of Engineering (147); followed by Statistics (129); Education

(123); Industry & Trade (72); Food, Agriculture and Forestry (65); Transport and Communications (54); Medical and Health (51); Administration (20); Co-operatives (16); Banking, Finance, Accountancy, Taxation and Insurance (7); Journalism, Press Photography and Printing (4); Fisheries (2); Social Services (2); and Miscellaneous (6).

The training in statistics has been provided by the International Statistical Education Centre, Calcutta, which is jointly sponsored by the International Statistical Institute and the Indian Statistical Institute in collaboration with UNESCO.

Training facilities available in the various research laboratories of India such as National Chemical Laboratory, Poona; Central Drug Research Institute, Lucknow; Fuel Research Institute, Digwadih; National Physical Laboratory, Delhi; National Metallurgical Laboratory, Jamshedpur; Central Glass and Ceramic Institute, Mysore; and Central Leather Research Institute, Madras, have been offered for junior scientists from the countries of South and South-East Asia.

Training facilities in dredging river survey, port traffic operations and management, harbour engineering works, etc. have been offered on the major ports of Bombay, Calcutta, Madras, Cochin, and Kandla and also pre-sea training in the Mercantile Marine Training Institutes in India.

To give random examples of the sort of assistance India is receiving:

Canada assists in nuclear research. About 80 nuclear scientists from India are being trained in connection with India's second research

reactor which Canada is helping to build at Trombay, near Bombay.

An Australian expert is advising on the best types of boats and gear for training local fishermen of West Bengal.

For a million-ton steel plant under construction by a British consortium at Durgapur, West Bengal, 300 engineers and technicians are to be trained.

Britain has also sent two missions of experts to India, one to advise on the establishment and siting of a second ship-building yard and the other on reducing port congestion.

Mutual Aid: Mutual aid in the region is an important aspect of the Colombo Plan, and with the progress of development in the region, mutual aid is increasing. Nine countries of the area have now become donors of assistance. These are Burma, Ceylon, India, Indonesia, Malaya, Pakistan, Sarawak, Singapore and Thailand. Of the 6,886 training facilities provided under the scheme, 936 places representing about 14 per cent of the total, were given by the 8 countries of the area, the donors being: India 718; Pakistan 78; Ceylon 46; Singapore 34; Malaya 28; Indonesia 12; Burma 10; Thailand 10.

India, Ceylon and Pakistan have also supplied experts.

25 Indian experts helped Burma, Ceylon, Indonesia, Singapore and Viet-Nam in several fields of development including potato-growing, tractor engineering, timber research, small savings, sugar technology and use and maintenance of H.T. aircraft. India has provided on loan an H.T. aircraft to the Government of Singapore for the use of the Singapore Flying Club.

The following table shows the number of training places by subject and receiving country, provided from July 1950 to June 1953 under the Colombo Plan Technical Co-operation Scheme:—

Subject	Australia	Brunei	Burma	Cambodia	Ceylon	India	Indonesia	Japan	Laos	Malaya	Nepal	North Borneo	Pakistan	Philippines	Sarawak	Singapore	Thailand	Viet-Nam	Total

U. S. AID TO INDIA

MAJOR Items of American aid to India, Governmental and private, can be tabulated as follows:

	Millions of dollars
1. Technical Assistance and Economic Aid administered by TCM (up to Dec. 31, 1958) ..	433.3
2. Export-Import Bank Loan of 1958 ..	150.0
3. Develop. Loan Fund Loans (June & Sept. 1958) ..	175.0
4. Wheat Loan of 1951 ..	190.0
5. PL 480 Agreements (loans & grants only): Aug. 1958 \$288.1 million; June 1958 \$49.3 million; Sept. 1958 \$210.1 million ..	547.5
6. Agr. commodities distributed through voluntary agencies (as of June 30, 1958) ..	65.2
7. Flood Relief Aid, 1956-57 ..	4.9
8. Planned Programming for TCM up to June 30, 1959 ..	17.6
9. Ford Foundation Grants ..	27.9
10. Rockefeller Grants ..	6.0
11. Voluntary Agencies' aid under Indo-US Agreement ..	5.5
12. American Red Cross contributions ..	0.8
13. Other private aid (estimate as of Dec. 31, 1957) ..	50.0
	1,673.7

(Rs. 797 crores)

Of the above, \$680.8 million (Rs. 324 crores) has been outright grants (including \$90.2 million private aid); \$652.7 million (Rs. 311 crores) is loan repayable optionally in dollars or rupees; and only \$340 million (Rs. 162 crores), comprising the wheat loan of 1951 and the Export-Import Bank loan, is repayable in dollars.

TECHNICAL ASSISTANCE

Below we give a summary of the assistance provided under the Indo-American Technical Assistance Programme. The position is as on June 30, 1958.

	(In 000's of dollars)
I. Agriculture and Natural Resources	
Acquisition & Distribution of Fertilizer ..	17,200
Acquisition & Distribution of Iron & Steel ..	10,790
Plant Protection & Locust Control ..	562
Determination of Soil Fertility & Fertilizer Use ..	901
Expansion & Modernization of Marine & Inland Fisheries ..	2,347
Groundwater Irrigation ..	18,462
Agricultural & Home Science Extension & Training ..	1,752
Groundwater Exploration ..	4,099
Training in Agricultural Machinery Utilization ..	172
Agricultural Education & Research ..	6,647
Modern Storage of Foodgrains ..	1,409
Augmenting Fertilizer Supply ..	10,647
Livestock Improvement ..	505
Agricultural Information, Production & Training ..	353
Agricultural Economics Research ..	214
Water Resources Survey and Minor Irrigation Works ..	480
Crop Production & Development ..	373
Farmers' Organisation ..	160
Dairy Development ..	627
Citrus Fruit ..	17
Cooperative Marketing and Warehousing of Agricultural Produce ..	7
Calcutta Milk Scheme ..	357
Assistance to Ministry of Food & Agriculture ..	33

	(In 000's of dollars)
U.P. Agricultural University ..	148
Cooperative Membership Education ..	21
Technicians* (American) ..	3,803
Participants* (Indian trainees) ..	438
Total Agricultural & Natural Resources ..	92,023

II. Industry and Mining

Development of Forest Research & Desert Afforestation ..	599
River Valley Development ..	8,004
Exploratory Lignite Excavation & Development ..	605
Building Materials Development ..	224
Augmenting Steel Supply ..	41,055
Training Construction Equipment Operators & Mechanics ..	680
Rihand Valley Development ..	6,078
Improvement of Rajasthan Power Facilities ..	1,065
Industrial Research & Technical Service Organisations ..	3,115
Technical Education Institutions ..	4,688
Provision of Industrial Technical Services ..	2,337
Electric Distribution Systems ..	290
Maintenance Training Centres ..	290
Minerals Survey and Development ..	1,655
Flood Control ..	260
Technical Services in Water Resources & Power Development ..	632
Technical Assistance to Irrigation Research Institute ..	98
Small Industries Development ..	761
Steel Standards ..	140
Telecommunications Development ..	103
Marketing Conference & Study Tour ..	5
Machine Tool Industry Development ..	18
National Productivity Council ..	56
Delhi Thermal Plant ..	4,000
Geological Survey of India ..	279
Oil & Gas Commission ..	41
Lime Industry ..	13
Fuel Research Institute ..	25
Coal Industry ..	10
Indian Institute of Technology, Kanpur ..	89
Council of Scientific & Industrial Research ..	38
Orissa Iron Ore Development ..	20,000
Survey of the Expansion of the Sindh Fertilizer Plant ..	27
Rural Electrification ..	3,000
Tubewell Casing ..	2,000
Cement Manufacturing Equipment ..	7,500
Foundry Training ..	212
Technicians* ..	514
Participants* ..	195
Technical & Engineering Services to Central Water & Power Commission ..	100
Engineering Services to Damodar Valley Corporation ..	95
Steel Industry ..	19
Total Industry and Mining ..	110,588

III. Transportation

Railway Rehabilitation and Expansion ..	75,129
Expansion of Aviation Ground Facilities ..	2,837
Technical Assistance to Civil Air Transport ..	38
Highway Transportation ..	30
Indian Airlines ..	13
Technicians* ..	8
Participants* ..	111
Total Transportation ..	78,061

	(In 000's of dollars)
IV. Labour	
Establishment of a Central Labour Institute ..	84
Study of the Effects of Thermal Environment Conditions ..	64
Trades Training ..	668
Foreman Training ..	87
Industrial Safety ..	24
Technicians* ..	137
Participants* ..	228
Total Labour ..	1,237

V. Health and Sanitation

Malaria Control ..	27,699
National Water Supply & Sanitation Programme ..	6,457
